PROCEEDINGS AND DEBATES OF THE 92^{d} CONGRESS, SECOND SESSION

SENATE—*Tuesday, August 15, 1972*

The Senate met at 9:15 a.m. and was called to order by the President pro tempore (Mr. EASTLAND).

PRAYER

The Chaplain, the Reverend Edward L. R. Elson, D.D., offered the following prayer:

Eternal Father, we thank Thee for the quietness of the morning hour when the day is new, the mind is clear, and the soul receptive to Thy presence. Move among us, O Divine Spirit, to lighten our burdens, lift our spirits, warm our hearts, and direct our actions. When hours grow tedious or tension is high, still give us Thy quickening power and Thy refining and steadying grace. When perplexity or bewilderment overtakes us and we are unsure of the course to follow, guide us through the difficulties to a victorious conclusion in accord with Thy will. So may we "serve the present age our calling to fulfill." And when the day is ended may we have Thy benediction and hearts at peace with Thee. Amen.

THE JOURNAL

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the reading of the Journal of the proceedings of Monday, August 14, 1972, be dispensed with.

The PRESIDENT pro tempore. Without objection, it is so ordered.

COMMITTEE MEETINGS DURING SENATE SESSION

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Subcommittee on Housing and Urban Affairs of the Committee on Banking, Housing and Urban Affairs; the Committee on the District of Columbia; the Committee on Commerce; the Committee on Armed Services; the Committee on Government Operations; the Committee on Finance; the Committee on Labor and Public Welfare; and the Committee on Public Works may be authorized to meet during the session of the Senate today.

The PRESIDENT pro tempore. Without objection, it is so ordered.

LAND ACQUISITION APPROPRIATIONS FOR THE NATIONAL PARK SYSTEM

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Senate turn to the consideration of Calendar No. 981.

The PRESIDENT pro tempore. The clerk will report the bill.

The legislative clerk read as follows:

Calendar No. 981 (S. 2806) a bill to authorize appropriations for additional costs of land acquisition for the national park system.

The PRESIDENT pro tempore. Is there objection to the request of the Senator from Montana? The Chair hears no objection, and it is so ordered.

The Senate proceeded to consider the bill which had been reported from the Committee on Interior and Insular Affairs with an amendment beginning on page 1, line 11, after "P.L. 91–646; 84 Stat. 1894).", insert "There are also authorized to be appropriated such sums as may be necessary in addition to those authorized in Public Law 92–272 (86 Stat. 120) to provide for such costs, benefits, and expenses in connection with the acquisition of lands authorized therein.

SEC. 2. Whenever an owner of property elects to retain a right of use and occupancy pursuant to any statute authorizing the acquisition of property for purposes of a unit of the National Park System, such owner shall be deemed to have waived any benefits under sections 203, 204, 205, and 206 of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 (84 Stat. 1894), and for the purposes of those sections such owner shall not be considered a displaced person as defined in section 101(6) of that Act.

So as to make the bill read:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That in all instances where authorizations of appropriations for the acquisition of lands for the National Park System enacted prior to January 9, 1971, do not include provisions therefor, there are authorized to be appropriated such additional sums as may be necessary to provide for moving costs, relocation benefits, and other expenses incurred pursuant to the applicable provisions of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 (P.L. 91–646; 84 Stat. 1894). There are also authorized to be appropriated such sums as may be necessary in addition to those authorized in Public Law 92–272 (86 Stat. 120) to provide for such costs, benefits, and expenses in connection with the acquisition of lands authorized therein.

SEC. 2. Whenever an owner of property elects to retain a right of use and occupancy pursuant to any statute authorizing the acquisition of property for purposes of a unit of the National Park System, such owner shall be deemed to have waived any benefits under sections 203, 204, 205, and 206 of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 (84 Stat. 1894), and for the purposes of those sections such owner shall not be considered a displaced person as defined in section 101 (6) of that Act.

The amendment was agreed to.

The PRESIDENT pro tempore. The bill is open to further amendment. If there be no further amendment to be proposed, the question is on the engrossment and third reading of the bill.

The bill (S. 2806) was ordered to be engrossed for a third reading, was read the third time, and passed.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 92–1032), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

BACKGROUND

Public Law 91–646, the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, was enacted on January 2, 1971. The purpose of this legislation was to provide for uniform and equitable treatment of persons displaced from their homes, businesses, on farms by Federal and federally assisted programs and to establish uniform and equitable land acquisition policies for Federal and federally assisted programs. The application of the provisions for Public Law 91–646 is mandatory.

Briefly, the benefits which agencies are required to pay under Public Law 91–646 are as follows: A landowner being displaced from a dwelling that he occupies is entitled to (1) actual moving and related expenses, or an in lieu payment not to exceed $500; and (2) replacement housing cost (the amount required to pay the difference between the dwelling sold to the Government and the dwelling purchased, including increased interest payments and closing costs), not to exceed $15,000.

A tenant being displaced from a dwelling is entitled to the following benefits: (1) actual moving and related expenses, or an in-lieu payment not to exceed $500; and (2) rental not to exceed $4,000 over a 4-year period or, in lieu thereof, the amount necessary to enable such a person to make a down payment on the purchase of a decent, safe, and sanitary dwelling, up to $2,000. An additional payment up to $2,000 can be made on a matching basis with money provided by the tenant. Such total Federal contribution, however, in no event will exceed $4,000 or the maximum amount of the rental differential payment. This is done in order to encourage home ownership. In other words, payment by the Government of any amount up to a second $2,000 of the $4,000 maximum payment must be matched by an equal amount provided by the tenant.

Displaced owners or tenants occupying and operating farms or commercial units are entitled to actual moving and related expenses, or an in-lieu payment not to exceed $10,000. They are also entitled to actual costs of moving personal property and to replacement housing not to exceed $4,000 for tenants or $15,000 for owners.

An occupant of a seasonal cottage is entitled to actual moving and related expenses, or an in-lieu payment not to exceed $500.

In addition to the above, the property owner is entitled to incidental expenses resulting from the transfer to title to the United States, including recording fees, transfer taxes, prepayment penalty costs, and prorata portion of real property taxes which are the United States. An owner of unimproved land which is acquired by the Federal Government is entitled to these same benefits.

NEED

In creating the foregoing statutory benefits over and above just compensation, Public Law 91–646 has increased the cost of land acquisition. For the National Park Service, where authorizations are limited by individual area laws, this means that the acquisition program cannot be completed within the statutory ceilings set by the Congress.

At the time of the enactment of Public Law 91–646, the National Park Service was engaged in land acquisition in some 54 areas where Congress had previously established a statutory ceiling on appropriations for land acquisition. Therefore, in order for the Service to comply with Public Law 91–646 in these areas, it is necessary that legislation be enacted to authorize the service to exceed those ceilings by the amounts necessary to pay additional costs and expenses incurred by reasons of the provisions of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970. The bill specifically makes increases applicable only to those areas in which a congressionally imposed land acquisition ceiling does not include estimated amounts, or other provisions, for moving costs and other relocation benefits, and the related administrative expenses arising from payment of such benefits.

COST

Enactment of S. 2806, of itself, carries no cost, since the costs of relocation and other benefits are already required to be paid under existing law. The Department of the Interior estimates that the additional land acquisition costs attributable to Public Law 91–646, the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, in the areas of the National Park System where Congress has imposed land acquisition ceilings, is $15,343,595. However, elections and options are available to the landowner and actual costs will not be known until the landowner is displaced; therefore, it was necessary to rely on averages to arrive at the estimated cost.

AMENDMENTS

The Interior Department recommended that S. 2806 be amended to apply to the new authorizations in the omnibus park legislation (Public Law 92–272) recently approved by the Congress. Accordingly, the recommended amendment would enable the National Park Service to request funds needed to pay relocation costs in connection with the recent omnibus park legislation. The amendment is as follows:

On line 11 after the period insert:

There are also authorized to be appropriated such sums as may be necessary in addition to those authorized in Public Law 92–272 to provide for such costs, benefits, and expenses in connection with the acquisition of lands authorized therein.

The committee is concerned, in this connection, about the applicability of this general statute, which was intended primarily to ease the impact of major ongoing acquisition programs such as the Federal-Aid Highway and Urban Renewal programs, to the acquisition of land for units of the National Park System, areas that are individually authorized and considered on a case-by-case basis by the Congress.

As a consequence of individual consideration of park area legislation certain benefits have been inserted into park authorization statutes that do not appear in legislation authorizing the ongoing Federal programs referred to above. For example, most recent recreational area legislation considered by this committee permits owners to retain a right of use and occupancy for their lifetimes or for a specific term of not to exceed 25 years. Yet, as the Department of the Interior's Office of the Solicitor has ruled, such owners are entitled to receive relocation benefits at the end of their retained term. Clearly, the costs of relocation benefits—and thus the full cost of land acquisition—cannot be ascertained with certainty at the time Congress authorizes the park if this situation prevails. Moreover, the committee believes there is a question as to whether such owners should be entitled to benefits if they elect to retain a right of use and occupancy.

It is the committee's belief that areas of the national park system where owners are permitted to retain the use of their dwelling and not—as would be the case under the highway program, for example—required to be displaced immediately ought to be treated differently. These general relocation benefits must be tailored, in the case of park land acquisition, to fit other rights and privileges written into park legislation by this committee. Accordingly, the committee recommends an amendment in the form of a new section to provide that an owner who elects to retain a right of use and occupancy, wherever authorized in a park law, thereby elects not to avail himself of the additional relocation assistance benefits of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970.

The committee does not object to providing such owners with actual moving expenses at such time as they are displaced. Rather, the amendment seeks only to avoid the situation where an owner elects to retain a right of use and occupancy in his dwelling for a term of years after which he is entitled to assistance in obtaining replacement housing. In the committee's view, such an owner should be given the choice, on the date of acquisition, whether he wishes to stay in his house or move with the Government's help. Without the amendment he could do both.

Requiring the owner to make such a choice is, the committee believes, consistent with the purposes of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970. Relocation assistance and replacement housing benefits were intended to promote continuity of home ownership, in order that the Social and economic impact of Federal acquisition would be lessened. However, a person who is displaced 25 years after he is paid for his property will likely have dissipated the fund with which to acquire comparable housing by the time of displacement. The chances of his being able to acquire comparable housing after 25 years, even with Government assistance, would also be very slim in many cases.

The amendment is as follows: On page 1 add the following new section:

Sec. 2. Whenever an owner of property elects to retain a right of use and occupancy pursuant to any statute authorizing the acquisition of property for purposes of a unit of the national park system, such owner shall be deemed to have waived any benefits under sections 203, 204, 205, and 206 of the Uniform Relocation Assistance and Real Property Acquisition Polices Act of 1970 (84 Stat. 1894), and for the purposes of those sections such owner shall not be considered a displaced person as defined in section 101 (6) of that Act.

EXECUTIVE SESSION

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Senate go into executive session to consider nominations on the Executive Calendar.

The PRESIDENT pro tempore. Without objection, it is so ordered.

INTERNATIONAL ATOMIC ENERGY COMMISSION

The second assistant legislative clerk proceeded to read sundry nominations in the International Atomic Energy Commission.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the nominations be considered en bloc.

The PRESIDENT pro tempore. Without objection, the nominations are considered and confirmed en bloc.

Mr. MANSFIELD. Mr. President, I ask that the President be notified immediately of the confirmation of the nominations.

The PRESIDENT pro tempore. Without objection, the President will be notified forthwith.

LEGISLATIVE SESSION

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Senate resume the consideration of legislative business.

There being no objection, the Senate resumed the consideration of legislative business.

STATEMENT BY RAMSEY CLARK ON PRISONERS OF WAR

Mr. SCOTT. Mr. President, I think it is most unfortunate that upon his return from Hanoi Mr. Ramsey Clark made the statement that after talking to a cabinet officer of Hanoi and a journalist he believed that Hanoi would not return the prisoners of war until the candidate of the opposing party is elected President. This has the effect of saying that he believes Hanoi is holding our prisoners of war hostage for the election of Senator McGovern. That kind of reports injects Hanoi into the American political campaign.

Aside from the unwisdom of having joined a commission examining U.S. war crimes, which itself is a prejudgment, and then having made a statement while visiting with that commission—which would strongly imply that he believes the United States has committed war crimes—and to include in that the comment that he believes Hanoi will only release the prisoners subject to an outcome of the election which they regard as favorable to them is, in my mind, an extremely unfortunate position for Mr. Clark to take.

I make this statement regretfully because I know Mr. Clark, I have worked with him on various occasions and I like him very much, but when somebody goes foolish it seems to me it has to be noted, if going foolish involves the security of a foreign policy of the United States. So I regret Mr. Clark allowed himself to be used by Hanoi. I regret this kind of intervention of Hanoi into the American political campaign. I hope that Americans generally will reject this kind of campaigning from over the enemy's borders.

ORDER OF BUSINESS

The PRESIDENT pro tempore. Under the previous order the Senator from Virginia (Mr. Harry F. Byrd, Jr.) is recognized for not to exceed 15 minutes.

Mr. HARRY F. BYRD, JR. Will the Chair inform the Senator from Virginia when there is 3 minutes remaining?

The PRESIDENT pro tempore. Yes.

RHODESIA

Mr. HARRY F. BYRD, JR. Mr. President, the House of Representatives last Thursday, August 10, again—again—struck a blow against those who would subordinate the American Congress to the Security Council of the United Nations.

By an almost 2-to-1 vote the House struck from the foreign assistance legislation a proposal which, in effect, would have repealed the Byrd amendment to the military authorization bill which was passed by the Senate, by the House, and signed by the President last year.

Mr. President, I think a little history is in order. About 5 years ago, the President, by unilateral action, at the request of the United Nations Security Council, declared an embargo on trade with Rhodesia.

Rhodesia is the world's richest source of chrome ore, a material vital to defense, and the embargo made the United States dependent on Russia for this commodity.

Last fall legislation was presented in the Senate to set aside this embargo insofar as the importation of a strategic material, namely chrome ore, is concerned.

In the Senate the legislation to set aside the embargo was presented by the Senator from Virginia, the Senator from North Carolina (Mr. Ervin), the Senator from Florida (Mr. Gurney), the senior Senator from Arizona (Mr. Fannin), and the junior Senator from Arizona (Mr. Goldwater).

A bill to the same effect was presented in the House by the Honorable James M. Collins of Texas.

Between last fall and the present time, on three separate occasions, the Senate voted to set aside the embargo of the United Nations—an embargo placed on the United States unilaterally by President Johnson—insofar as importation of a strategic material from Rhodesia is concerned.

The House by a vote of 251 to 100 last fall sustained the Senate's action. So the vote last Thursday again sustained the action of the Senate and the action which the House took last fall.

In the meantime, a group of House Members brought a suit in the Federal Court of the District of Columbia, requesting that the court throw out the legislation setting aside the United Nations embargo. The Federal judge ruled in favor of Congress.

So now we have a clear-cut situation in which the Senate on three separate occasions, the House on two separate occasions, and a U.S. District Court all have stated loud and clear that the Congress of the United States has the power and the right to set aside any embargo that might be placed on the American people by the United Nations or by the unilateral action of the President of the United States.

That is highly significant, Mr. President.

It goes beyond the question of Rhodesia; it goes beyond the question of chrome, it goes beyond the question of a strategic material; and it goes beyond the question of national defense.

If the courts or Congress had acted otherwise, it would have meant that the Congress of the United States would be subordinate to the Security Council of the United Nations, and that would be an intolerable situation.

I am glad that those who opposed my proposal, those who have been demanding that Congress subordinate itself to the United Nations, have continued to press the issue. Every time they have lost—and in losing they have built a stronger case for those of us who feel that the embargo unilaterally decreed by President Johnson was wrong—they have strengthened the position of those of us who feel that the U.S. Congress must not be subordinated to the United Nations, and this Nation must not be dependent on Communist Russia for a strategic defense material.

Mr. President, today I want to mention those who participated so effectively in the debate in the House of Representatives last Thursday. Ten Members of the House took part in that debate, in sustaining the position previously taken by the Senate and previously taken by the House.

The fight was led by that fiery and able Representative from Pennsylvania, John H. Dent, a Democrat, and by James M. Collins, of Texas, a Republican. Joined with them were Representatives J. Herbert Burke, of Florida, Republican; Wayne L. Hays, of Ohio, Democrat; Frank M. Clark, of Pennsylvania, Democrat; William L. Dickinson, Alabama, Republican; Joe D. Waggonner, Louisiana, Democrat; John Buchanan, Alabama, Republican; Robert Sikes, Florida, Democrat, and John Ashbrook, Ohio, Republican.

It was a bipartisan effort of five Democrats and five Republicans.

When one analyzes the rollcall vote, one finds that Representatives from 42 of the 50 States supported the position that the U.S. Congress must not be subordinate to the United Nations and that this country must not be dependent on Communist Russia for a strategic material; namely, chrome.

So the issue that the Senate has been fighting, the position on which the Congress of the United States has made its voice felt several times now, is not a sectional issue or a regional issue. It is a national issue. Representatives from 42 of the 50 States last Thursday cast their vote in support of the Byrd amendment dealing with the importation of chrome.

When one adds the Senate votes to that, one finds that representatives from 46 of the 50 States at one time or another—and we have had a series of votes—have voted to set aside the United Nations embargo; have voted to permit the importation of chrome; and have voted that the U.S. Congress shall not be dependent on or subordinated to the United Nations Security Council.

I think that the vote of last week struck yet another blow for a very important principle. It struck yet another blow against those who would say, as so many Senators have said on this floor, and as some Representatives have said on the floor of the House of Representatives, "Oh, we cannot do anything the United Nations does not want us to do. We cannot go against the United Nations. They want us to have an embargo, and the Security Council voted for the embargo, so the American Government then must knuckle down and do what they say and we must have an embargo." I am very pleased that the Congress of the United States stood up against that.

The PRESIDENT pro tempore. The Senator has 3 more minutes.

Mr. HARRY F. BYRD, JR. I thank the Chair.

I want to pay tribute to my distinguished colleagues in the House of Representatives who fought such a difficult battle last week to sustain once again the position which has been sustained three times in the Senate and once by a Federal court.

ORDER OF BUSINESS

The PRESIDENT pro tempore. Under the previous order the Senator from Wisconsin (Mr. Proxmire) is recognized for not to exceed 15 minutes.

BUDGET CEILING SHOULD BE ESTABLISHED AT $240 BILLION

Mr. PROXMIRE. Mr. President, I intend to offer an amendment which would set a budget ceiling for fiscal year 1973 at $240 billion. This is $10 billion below the $250 billion ceiling proposed by the Nixon administration but it is still $8.5 billion higher than budget outlays for fiscal year 1972—$231.6.

$250 BILLION CEILING MEANINGLESS

The $250 billion ceiling proposed by the administration is too high. Since that is what the administration expects to spend in any case, it is really meaningless as far as a ceiling for the administration is concerned. It is particularly meaningless because it is the President—the executive branch—which has control over spending or "outlays." By a stroke of the pen, by a verbal order to the Budget Director, or by a letter to the Defense Department, the President of the United States has the power and the authority to limit or cut or reduce "outlays."

We in Congress have no such power. We control "new obligational authority." We appropriate funds. Some of the funds are spent this year—in fact, the bulk of them are spent in the year appropriated. But billions are not spent this year. The Pentagon alone has a $40 billion backlog of money—a huge honey jar—which they continue to draw down year in and year out even as the Congress cuts the new appropriations. We control appropriations. We do not control spending.

NEED CEILING ON OUTLAYS

It is, therefore, necessary to have a "ceiling" on expenditures or "outlays." I commend the Senator from Delaware (Mr. ROTH) for his amendment. But the problem with his amendment is that he sets the ceiling at the amount the President intends to spend in any case. It establishes no new "control" or "discipline" over the executive branch.

$240 BILLION CEILING WOULD FORCE DISCIPLINE

What my amendment would do is to require that the President cut "outlays" and "cut them by $10 billion." This is some whopping $8.5 billion over last year, and a very modest ceiling indeed when the Government is telling private business and labor to cut back with price and wage controls.

We can do this and we should do this.

ROTH AMENDMENT LETS PENTAGON OUT FROM UNDER CEILING

A second problem with the ceiling amendment proposed by the administration is that it does not require a cut in the Defense Department. The additional outlays of $1.2 billion which the President requested for Vietnam is outside this ceiling. The President intends to increase defense spending by that amount, but he intends to take it out of the other agencies and departments of the Government.

Further proof of that fact is seen in the way the President and his supporters in the Senate worked against the McGovern ceiling amendment on defense funds. When the Senator from South Dakota proposed that the new obligational authority for the Pentagon be established this year at last year's level, or a savings of $4 billion, the Pentagon and the administration worked against it and every Republican in the Senate save one, voted against it.

What we have now in the administration $250 billion is a ceiling amendment which exempts the Pentagon from the discipline of the budget ceiling. They are outside the rules. They are not only going to spend every dime that was asked for in the 1973 budget but $1.2 billion in addition.

But if we pass my amendment, they too will have to come under the discipline of the budget ceiling. They too will have to make choices and establish priorities.

CHOICES FOR THE PENTAGON

If they want to continue bombing North Vietnam into the stone ages, let them at least take the funds out of their existing budget. We should not give them more money to do that.

If they continue, as they are continuing, to have overruns on their major weapons systems of $35 billion, let us cut their money and force them to establish some fiscal discipline in their procurement.

If they continue with procurement contracts which are almost 90 percent negotiated—and only 10 percent let by competitive advertised bids—the lowest percent in years—let us cut their budget to enforce some discipline over their excesses.

Mr. MANSFIELD. Mr. President, will the Senator yield?

Mr. PROXMIRE. I yield.

Mr. MANSFIELD. I rise only for the purpose of raising the question and asking the distinguished Senator to furnish some information. Is my understanding correct that there were $400 million left in the budget of the Navy which was disposed of in the last day or so, or the last week or so, of the last fiscal year?

Mr. PROXMIRE. The Senator is absolutely correct. As a matter of fact, the Chief of Naval Operations, Admiral Zumwalt, sent out a memorandum urging the Navy to get rid of that money, saying if necessary to require overtime, or anything they could do to use up that $400 million.

Mr. MANSFIELD. I raise the question because I think the Senator himself raised the question in the first place, and I was seeking clarification.

The second question has to do with another statement made by the Senator to the effect that something like $38 billion has been lost in contracts let for the development of exotic weapons. Could the Senator furnish a list, so that we could have that material in the RECORD?

Mr. PROXMIRE. I shall be very happy to do that. I do not have it with me now, but I have it at my office, and will be happy to have it incorporated into the RECORD as a part of my remarks this morning. I ask unanimous consent that I may do that at the end of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. MANSFIELD. Does the Senator recall the approximate figure?

Mr. PROXMIRE. The approximate figure, as I recall, was about $36 billion in overruns over the cost of the original contracts. This was something provided for us by the General Accounting Office, and we recalculated it to adjust for the fact that there had been changes in quantities, and so forth, in particular weapons orders.

Mr. MANSFIELD. Was that prior to the cancellation of the Cheyenne helicopter contract a few days ago?

Mr. PROXMIRE. It was.

Mr. MANSFIELD. I thank the Senator.

Mr. PROXMIRE. I thank the majority leader very much.

Mr. President, the Pentagon now has some 400 major and nearly 3,000 minor bases scattered in 30 countries around the world. Let them cut back on many of these which are hold-overs from World War II.

They now spend some $6 billion a year in all forms of foreign military aid to over 46 countries in the world. Let us put a ceiling on expenditures which would force the military to make some tough hard choices about military foreign aid.

We now have more high-ranking officers of some grades—than we had at the peak of World War II. Excesses could be cut there.

The Pentagon is building massive new weapons systems while continuing to build the older systems. With more firepower, far more costly planes and ships, and huge overruns, they should be required to pick and choose and make choices as every one else must do.

NONDEFENSE SPENDING COULD BE CUT

But it is not only in the Pentagon that Government waste and Government spending can be cut.

SUBSIDIES, SUBSIDIES, SUBSIDIES

The Joint Economic Committee, in a landmark study issued last January, established at least $63 billion a year which is paid out in one form of subsidy or another. Not all of these are bad, but much of it is either wasteful, or goes to wealthy recipients, or is unneeded. A $240 billion ceiling would require a reexamination of these subsidies.

PUBLIC WORKS WASTE

We all know the extent of waste in public works projects. We know that investment of private capital in the country brings in at least 12-percent return. But the discount rate or cost of public funds invested in public works projects is calculated at less than 6 percent. That means we take money from taxpayers to pump into projects that return less than they would return if invested in private business. That is inefficient. A $240 billion ceiling would force the Budget Bureau and the President to toughen up on wasteful public works projects.

MANNED SPACE FLIGHT WASTEFUL

Manned space flights are excessive. The most competent scientists tell us we can do everything with machines and do it for about half the cost of manned flights. A $240 billion ceiling would force a review of this problem.

PAYMENTS TO WEALTHY FARMERS

We have excessive spending for farm program payments which go to very wealthy farmers. A $20,000 ceiling on payments to any one farm or farmers, which the administration has fought against, could save tens of millions of dollars in the farm program and help those who really need help the worst. A $240 billion ceiling would force action in this area.

EXCESSIVE HIGHWAY SPENDING

Spending for highways is out of hand. Some $120 million alone is being spent for the Shirley Highway mixing bowl here in Washington. That is outrageous. But the highway lobby has its funds protected by the trust fund, so they can spend and spend and spend while other vital needs like mass transit are deprived. A $240 billion ceiling on spending could force a review of the highway trust fund. And that is long overdue.

WASTE IN HEALTH AND EDUCATION PROGRAMS

While I am a strong supporter of health programs and education programs, everyone knows that the National Institutes of Health have been stuffed with funds which they have used very poorly. And we know that Health, Education, and Welfare spends education money in some very bad ways. Impacted aid is a primary target. A $240 billion ceiling could force a ground up review of these expenditures.

And in passing I should point out that not even a majority of Republicans and administration supporters voted for the ceiling on the HEW appropriations when that proposal was before us a few days ago.

There are excesses in urban renewal, model cities, and sections 235 and 236 housing programs.

The so-called uncontrollables should also be reviewed. Medicare costs have gone through the roof. But a review of medicare practices can save tens of millions without harming the needy elderly.

REVIEW NEEDED FROM BOTTOM UP

I assert that the budget of the United States can be cut by $10 billion without harming the people of the United States. In fact, by cutting back on military fat and waste, by applying priorities to domestic spending, by reviewing every program from the bottom up and by cutting back on huge subsidies—sugar subsidies, housing subsidies, interest rate subsidies, subsidies to big farmers, subsidies to big shipbuilders, subsidies to the banks and highway and earth moving industries who benefit from foreign aid, subsidies to defense contractors through Government provision of their plants and working capital—we could save billions of dollars which could better be spent in the private sector and which now cost the American taxpayers billions of dollars in execessive taxation.

$240 BILLION CEILING NECESSARY

For all of these reasons, I say that a $250 billion ceiling—a ceiling with little or no warning for that is exactly what the President intends to spend in any case—is not enough and that if we are to establish a working, meaningful ceiling it should be established at $240 billion. That is $8.5 billion more than we spent last year.

It is only $6 billion less than the President originally asked for.

It would make the Pentagon eat its excesses.

It would establish some discipline over Government spending.

I urge its acceptance.

Mr. GURNEY. Mr. President, will the Senator yield?

Mr. PROXMIRE. I am happy to yield to the distinguished Senator from Florida.

Mr. GURNEY. I have been listening carefully to the Senator's statement, and I must say I agree with his general thesis that we have been spending too much money and we should start cutting back rather severely and carefully.

I would like to question the Senator, however, about defense spending. He mentioned defense manpower. Is it not true that manpower in the Defense Department, both in uniform and out of uniform on the civilian side, has been cut back rather severely in the last year or two?

Mr. PROXMIRE. It is true that there have been some cutbacks, but the cutbacks have been less than could be justified on the basis of the cutback in Vietnam. Also, there has not been as great a cutback on the civilian side in the military establishment in relationship to those in uniform. I believe a limited, modest reduction could be achieved. Certainly not the 1.7 million in 3 years that has been suggested—that is too much, but I think there could be some reduction below what the President has proposed.

Mr. GURNEY. Is it not also true that although our defense budget is the largest single budget in the history of Federal budgeting, actually the percentage of defense spending compared to the gross national product has decreased continually over the last few years, while the social spending has increased considerably?

Mr. PROXMIRE. The Senator is correct, and of course this is because there has been a wind down, and I think all of us should be happy and grateful that there has been, of the war in Vietnam. But, once again, the war in Vietnam has been cut back by about $20 billion a year in expenditures, and it seems to me that reduction has not been reflected in a corresponding cutback, even allowing for pay increases and inflation and corresponding reductions in military expenditures.

Mr. President, I yield the floor.

Exhibit 1

Costs of 45 Selected Major Weapons Systems Increased by $36.5 Billion

Mr. Proxmire. Mr. President, the costs of 45 selected major weapons systems have increased by $36.5 billion over the original planning estimates for those weapons.

This is the largest accumulative overrun reported so far.

Last November I reported a $35.2 billion cost overrun on the same 45 programs. The November figures were based on data compiled by the Department of Defense as of June 30, 1971. The figures I am making available today are based on data compiled by the Department of Defense as of March 31, 1972.

In the 9 months separating the two sets of figures, the costs of the same 45 programs increased by $1.3 billion.

Despite the countless congressional investigations, reports, exposes, and blue ribbon panel studies, the message that billions of dollars are being lost through mismanagement and waste in military procurement has either gotten lost or been ignored.

The picture would have looked even worse except for the fact that seven of the 45 weapons programs were removed from the Pentagon's reporting system and figures for these programs can no longer be updated. Most of the programs in this category were dropped from the reporting system because they were either canceled or completed. Three are among the most mismanaged in recent years. They are the Main Battle Tank, which was canceled after a dismal performance; the Gamma Goat, which received a scathing report from the House Armed Services Committee just a few days ago; and the FB–111, a program whose technical performance is as poor as its cost record.

Several other factors tend to understate the size of the cost overrun problem. Among these is the fact that the data supplied by the Pentagon is often seriously outdated and is sometimes inaccurate.

The Pentagon shows a cost overrun of $222.1 million on the F–14 aircraft program. The Navy has distorted the F–14 picture by supplying a current estimate of $5.3 billion to complete the program when in fact the Navy estimates that it will cost $6.5 billion to complete the program. Instead of a $222.1 million cost overrun, the Pentagon ought to be reporting a $1.5 billion cost overrun.

In the case of the LHA ship program, the Navy reports that it will cost $970 million to complete when, in fact, the Navy now estimates that it will cost $1.4 billion to complete. The LHA cost overrun has been understated by approximately $471 million.

The Air Force has managed to minimize the F–15 aircraft cost overrun by changing the cost base. The original planning estimate for this program was $5.1 billion, as shown in Development Concept Paper No. 19, dated September 28, 1968. But the Air Force now reports a planning estimate of $6 billion, thereby shrinking the difference between the planning estimate and what it will cost to finish the program. Instead of a $1.8 billion cost overrun in this program, there is really an overrun of $2.7 billion.

The omissions in the Pentagon's reporting system in these three programs alone understate the cumulative cost overrun by $2.6 billion.

Other programs showing extremely large increases include Safeguard ABM, $2.1 billion; the B–1 bomber, $2.2 billion; the C5–A aircraft, $1.8 billion; the F–111 aircraft, $4.9 billion; and the SRAM missile, $1 billion.

Another shortcoming in the Pentagon's reporting system is the practice of omitting the costs of large subsystems and associated costs of major weapons. The Safeguard ABM report, for example, ignores the costs of warheads, family housing construction and operation, missile test range support, hospitalization, training, and other Armywide support activities. The most recent estimate of these costs was in excess of $1 billion, and that estimate was made in 1970. The Army has refused to revise this figure.

A March 1972 GAO report on Safeguard strongly suggests that the Army is concealing the full costs of the program. The Army would not make available to GAO documentation showing the basis and source of its planning estimate for Safeguard. GAO concluded that the Safeguard estimate did not contain the provisions for certain known or anticipated costs and were significantly lower than estimates prepared by the weapon system contractor. In my experience, when the military estimate of the cost of a program is lower than the contractor's estimate for that program, the contractor almost always turns out to be right.

In the case of the DD-963 destroyer, all signs point to another large cost increase on top of the already large overrun that has been acknowledged. The DD-963 is supposed to be built in the same shipyard as the LHA and the delays on the LHA have already had a detrimental impact on the DD-963, although the Navy has so far refused to admit it.

Finally, the cumulative nature of the data on costs often obscures the reasons for the overruns. Admittedly, some overruns are excusable. When the cost of a weapon rises because more weapons are being purchased than was originally planned, the rise may be justified if the decision to buy more weapons was a wise one and was not concealed from Congress at the time the planning estimate was made. Changes in a weapon as it undergoes development and production may also increase costs, and this increase may be warranted. There are other factors, such as general economic inflation, which affect the costs of weapons.

In stating the overruns for the 45 selected weapons in this report, I have taken into account as much of the dollar costs of the quantity changes as is possible. Where the quantity to be purchased was increased, I have revised the planning estimate upward by the appropriate amount in order to arrive at the net overrun. Where the quantity was reduced, I have revised the planning estimates downward.

Too often the causes of cost-overruns are gross mismanagement on the part of the Pentagon and inefficiency on the part of the defense contractors. Most of the cost overruns I have studied fall into this category. Unnecessary cost overruns have contributed to general inflation.

Another problem is the intentional underestimate of the cost of a weapon program. A relatively low price tag combined with the rest of the Pentagon's sales pitch has succeeded in winning support for weapons which may otherwise have not been approved by Congress. A number of major weapons fall into this category.

The Pentagon has obviously been unable to cope with the cost overrun problem. The situation seems to me to be growing worse instead of improving. In addition, Congress and the public are still not being told the truth about cost overruns on major weapons.

I request unanimous consent to have printed in the RECORD a report of the costs of 45 selected weapons systems provided to me at my request by the General Accounting Office.

There being no objection, the report was ordered to be printed in the RECORD, as follows:

COMPTROLLER GENERAL OF
THE UNITED STATES,
Washington, D.C., July 24, 1972.

The Honorable WILLIAM PROXMIRE,
Chairman, Subcommittee on Priorities and Economy in Government, Joint Economic Committee, Congress of the United States.

B-163058

DEAR MR. CHAIRMAN: Enclosed is the updated summary of estimated cost data, on the status of 45 selected major weapon systems. Since our last report to you 7 of the 45 systems have been dropped from the Selected Acquisition Reporting System.

Attachments I and II presents the estimated cost data for 38 major weapon systems as presented in the March 31, 1972, Selected Acquisition Reports (SARs) as released by the Department of Defense. Attachment III presents the estimated cost data on the 7 major weapon systems at the time they were dropped from Selected Acquisition Reporting. We have made no audit or verification of the reported data.

Sincerely yours,

ELMER B. STAATS,
Comptroller General of the United States.

Enclosures—3.

ATTACHMENT I

COMPARISON OF THE ESTIMATED COST DATA AS OF MAR. 31, 1972, WITH THE ESTIMATED COST DATA OF JUNE 30, 1971, FOR 38 WEAPON SYSTEMS

[Dollars in millions]

Number of systems	Planning estimate	Development estimate	Cost change		Current estimate
			Quantity	Other	
Army (8)	$10,892.7	$11,701.9	$1,234.6	$3,130.8	$16,067.3
Navy (20)	29,731.3	37,490.6	(576.2)	5,280.6	42,195.0
Air Force (10)	33,273.6	41,082.1	(3,762.5)	9,859.8	47,179.4
Total (38) as of Mar. 31, 1972	73,897.6	90,274.6	(3,104.1)	18,271.2	105,441.7
Total (38) as of June 30, 1971	73,897.6	89,083.5	(5,871.8)	18,124.6	101,336.3
Difference between June 30, 1971, and Mar. 31, 1972	0	1,191.1	2,767.7	146.6	4,105.4

Note: The amounts indicated above for current estimate show a net increase of $4,105,400,000 as compared to the similar total as of June 30, 1971. This net increase consists of an increase of $3,324,800,000 for the Army, a decrease of $301,300,000 for the Navy ($68,600,000 related to Navy actions and $232,700,000 due to elimination of the Air Force portion of Sparrow E from SAR), and an increase of $1,081,900,000 for the Air Force.

The systems accounting for the major changes are as follows:

ARMY

Safeguard: Increase—$1,791.0 million.

This increase includes $856 million for adding a fourth site to the program, $417 million due to stretchout of equipment readiness date of the third site, $225 million support change primarily for adding a Safeguard Missile Integrated Reliability Test (SMIRT) Plan, and $199 million for incorporation of OSD projected price indices.

SAM-D: Increase—$1,318.7 million.

This increase is due to $49 million for additional testing equipment, $54 million for anti-missile/nuclear option, $91 million for management reserve, $600 million for reconfiguration and quantity change, and $530 million for revised estimate and economic escalation.

TOW: Decrease—$62.7 million.

This decrease is attributable to $25 million for a reduction in quantity to reflect current inventory objectives and a $39 million decrease due to revising cost estimates based on existing multi-year missile contracts and changes in support requirements. These decreases were offset by about $1 million increase for economic escalation.

Dragon: Increase—$214.8 million.

This increase is attributable to $101 million quality change as a result of a revision in combat and training consumption rates and forces to be equipped, $67 million due to change in learning curve computations, labor rates, overhead rates and estimating error, $12 million for stretchout of procurement, $24 million to update futue economic escalation, and $11 million for support costs.

Cheyenne: Increase—$38.2 million.

This increase is primarily a result of the request for fiscal year 1973 funds for the fabrication of an additional prototype utilizing parts and tools available from the original production program, and for the renovation of two existing development prototypes.

NAVY

SSN—688: Increase—$250.2 million.

This increase is primarily due to an increase in the quantity of ships at a cost of about $182 million and $69 million for update of escalation.

Poseidon: Decrease—$303.6 million.

This decrease is primarily due to net reductions associated with lower negotiated missile and other equipment costs of about $245 million, and a decrease in the estimated cost for escalation of $14 million.

Mark 48: Decrease—$306.0 million.

The current SAR reflects the Mark 48 Mod 1 torpedo program for which a production contract was awarded in July 1971. The decrease shown above is primarily attributed to the elimination of $281 million in costs related to the Mark 48 Mod 0/2 programs which have been cancelled.

AIR FORCE

F-15: Increase—$493.0 million.

This increase reflects a $26 million increase in development program based on contractor cost data submitted for renegotiation of engine contract after deletion of engines for F-14B aircraft, $2 million for added program scope requirements for missile test hardware and a decease of $4 million for deletion of test center service funding. In addition, the air vehicle price increased $412 million based on contractor data submitted for renegotiation of engine contract after deletion of F-14B aircraft which was offset by a decrease of $8 million for refinement of previous estimates. Initial spares estimates increased $94 million due to deletion of engines for the F-14B aircraft which was offset by $44 million as a result of computing spare engines on a modular support concept.

F-111: Increase $326.7 million.

This increase is attributable to $293 million for an increase in quantity of aircraft to be procured and $33 million for initial spares cost increase.

Minuteman II: Increase—$161.8 million.

This increase is primarily due to force modernization costs.

Minuteman III: Increase—$128.8 million.

This increase is primarily due to force modernization costs.

ATTACHMENT II

SCHEDULE OF PROGRAM COST DATA APPEARING ON THE MAR. 31, 1972, SARS

[In millions of dollars]

System	Planning estimate	Development estimate	Cost change		Current estimate
			Quantity	Other	
Army (8):					
Cheyenne[1]	125.9	129.9	15.4	189.9	331.2

Maverick	257.9	383.4	(82.1)	84.0	385.3
SRAM	167.1	236.6	125.6	969.7	1,331.9
Minuteman II	3,014.1	4,254.9	4.0	647.5	4,906.4
Minuteman III	2,695.5	4,673.8	(155.3)	1,592.0	6,110.5
Total	33,273.6	41,082.1	(3,762.5)	9,859.8	47,179.4

[1] The Cheyenne costs represent research and development costs only. These est mates do not include termination costs related to the cancelled production contract.

[2] For the programs where the SAR's have shown only a development or a planning estimate, we have made both estimates the same to prevent distortion between the totals of these columns.

[3] The development estimate of $4,031,000,000 formerly reported, dated March 1967, was changed to $5,240,500,000 in March 1972, to reflect the entry into engineering development.

[4] Although no development estimate was shown on the June 30, 1971, SAR, our last report included the same cost for the planning and development estimates in order to prevent distortion between the totals of these 2 estimates. With the award of the production contract, the Navy established a development estimate in the Dec. 31, 1971, SAR and is reflected in this schedule.

[5] Cost estimates for the Air Force portion of this program were deleted from the SAR in December 1971.

[6] Cost estimates include Air Force estimates for its portion of the Sparrow F program.

[7] The development estimate was revised based on the award of the production contract in July 1971.

ATTACHMENT III

WEAPON SYSTEMS REMOVED FROM THE SAR

[Dollar amounts in millions]

System	Planning estimate	Development estimate	Cost change		Current estimate	Date of final SAR
			Quantity	Other		
MBT-70[1]	2,126.5	2,100.9	(602.4)	721.2	2,219.7	Sept. 30, 1971
Gama goat[2]	69.1	163.9	(5.5)	22.7	181.1	June 30, 1971
SQS-23[2]	157.1	170.5	(82.7)	94.6	182.4	Do.
SSN-685[2]	100.8	151.7		26.2	177.9	Do.
DLG Conv.[3]	698.8	698.8		307.8	1,006.6	Do.
Amtrac[2]	324.4	328.5	(126.9)	0.4	202.0	June 30, 1971
FB-111[2]	1,781.5	1,781.5	(1,043.3)	546.6	1,284.8	Sept. 30, 1971
Total	5,258.2	5,395.8	(1,860.8)	1,719.5	5,254.5	

[1] Dropped from the SAR because program was canceled.

[2] Dropped from the SAR because production was completed or substantially completed, or the program costs are below the revised OSD thresholds.

[3] Dropped from the SAR because visibility required by the SAR is no longer necessary and an internal monthly status report will be substituted in its place.

THE INTERIM OFFENSIVE WEAPONS AGREEMENT

The PRESIDING OFFICER (Mr. HARRY F. BYRD, JR.). Under the previous order, the Senator from Mississippi (Mr. STENNIS) is recognized for not to exceed 15 minutes.

Mr. STENNIS. I thank the Chair.

Mr. President, I shall speak at this hour on the Interim Offensive Weapons Agreement, and say that I do this under the pressure of other demanding assignments for today. I shall return to the floor and undertake to debate any point I make that might be challenged or commented on.

I want to say, at the outset, that I support the SALT agreements, both the ABM treaty—now approved—and the pending 5-year limitation on offensive weapons. I certainly hope—and expect—that, having approved the treaty, the Senate will quickly approve the interim agreement.

Occasionally, we in this Chamber have an opportunity to cast our votes on an issue which vitally and basically affects man's state—the status of mankind—not only in the United States and what we call the "free world," but the state of man everywhere. I believe this is such an issue, approval of these agreements.

I do not mean to say that these agreements, if approved by the appropriate actions here and in Moscow, will put us unfailingly on the straight and narrow path to lasting peace. I do not say that. No single action, in this Chamber or elsewhere can do that.

I believe strongly, however, that these agreements can be a beginning—a start—toward better relations between the United States and the Soviet Union. That would be a start, a significant start toward a more tranquil world.

These agreements are just a start, a first step, but President Nixon has made it clear that he wants to begin negotiations at once on a second-step strategic arms agreement. That is why we have moved rapidly to consider—and, I believe, to approve both these agreements.

CAREFULLY REVIEWED

Despite this priority action here, these agreements have been considered by two Senate committees. Other speakers will, I am sure, discuss the policy findings of the Senate Foreign Relations Committee. I want to state for the record that the Senate Armed Services Committee has carefully considered military implications of the agreements.

Actually, the Armed Services Committee, through a Subcommittee headed by the Senator from Washington (Mr. JACKSON) kept itself informed on the progress of the 3 years of SALT negotiations in Helsinki and Vienna. Since those talks were completed at the Moscow Summit, the full committee has held hearings on the resulting agreements.

As chairman of the committee, I took part in those hearings and heard all the witnesses except two, and I have reviewed their testimony.

Public and executive sessions were held before and after the July congressional recess. Witnesses heard included the Secretary of Defense, Mr. Laird; the chairman, Admiral Moorer, and members of the Joint Chiefs of Staff, and Ambassador Smith and members of his SALT delegation.

As I have said, these hearings focused on the military implications of the agreements. The committee did not ask that the agreements be formally referred to us; we held our hearings to bring out information and assure ourselves with respect to military implications of these agreements.

Under these circumstances, the Senate Armed Services did not and will not issue a formal report on the agreements. We asked the Printing Office for a rush job, however, and our printed hearings are now available.

SOUND AND SAFE

I will not attempt to summarize our testimony in detail, Mr. President, but I would like to tell the Senate of the questions with which I entered our committee review and the answers which emerged from it.

I began our hearings with the conviction that we now have a strategic force which is clearly strong enough to deter any challenge. But I wanted to be quite sure about that point.

I also wanted to inquire whether we would have the authority, under this interim agreement, to maintain and update a fully credible deterrent so that it would be available at the end of the 5-year period coverd by the agreement. I wanted an answer to that question in case it should develop that the 5-year interim agreement could not be renewed or extended.

Finally, there was a question in my mind about verification. I wanted to be quite sure that we will know what the other side is doing under these agreements. Would we know that the terms of the agreement were being observed?

Our SALT hearings strengthened my conviction that we now have a credible deterrent—that we have a force so strong, so diverse, that potential enemies would not risk attacking us.

Thus, it leaves the matter up to us solely, while making judgments on this question. I will leave the floor shortly to go to a meeting of the Committee on Armed Services, which is passing on the identical point, as to how far we should go with reference to these weapons.

Our hearings also persuaded me that our deterrent will still be strong and wholly credible 5 years hence if we continue to modernize our weapons and improve our technology—as we are permitted to do under the agreements.

Our hearings convinced me that we do have the means to know what the other side is doing while the treaty is in force.

In short, I concluded that the treaty and the interim agreement are sound and that we can safely approve them as the basis for new negotiations aimed at tighter limitations on offensive strategic arms.

Looking toward those SALT II negotiations, I am pleased to be a cosponsor of the amended approval language proposed by the Senator from Washington (Mr. JACKSON). Over the years, no Member of the Senate has given closer attention than he to the strategic posture of the United States as against that of the Soviet Union.

I share some of the concerns he expressed during his exhaustive questioning of witnesses at the committee's SALT hearings. I agree, for example, that this agreement is only an interim agreement. If no permanent agreement—no treaty—has been negotiated by 1977, the United States will certainly have to look down the road—and look down that road before then—and assure the survivability of its deterrent in future years. That is, I believe, the concept expressed in the first part of Senator JACKSON's amendment.

Further, the present 5-year agreement gives certain numerical advantages to the Soviet Union based, in part at least, on technological advantages which we now enjoy. Those technological advantages cannot be assumed to continue for all time. A permanent treaty, therefore, must take this into account and balance the level of strategic forces on both sides by considering numbers of launchers, numbers of warheads, destructive power of weapons, and potential growth within the terms of the treaty. This, as I understand it, is the main aim of the second portion of the Jackson amendment.

The third portion of the Jackson amendment pledges us to a vigorous program of weapons research and weapons modernization. To my mind, this is just commonsense.

As I have said, I wholeheartedly support this interim agreement. I also support the Jackson amendment because I do not believe it places any reservation or limitation on the basic offensive weapons agreement. I do not, and would not, support any limitation or reservation, or anything I judged to be a limitation or reservation.

I believe, however, that the Jackson amendment, as it stands, as he offered it on August 7, constitutes a wise expression of views by Congress as it approves the agreement.

JOINT CHIEFS APPROVE

I am confident that my conclusions about the agreements were solidly based on the facts presented and the best military judgments available.

We questioned Admiral Moorer, Chairman of the Joint Chiefs, and Admiral Zumwalt, General Ryan, and General Palmer very closely. I believe their view is quite clear.

The Joint Chiefs of Staff, who followed the negotiations closely, favor approval of the treaty and the interim agreement, provided we continue to go forward with modernization of strategic weapons and improvement of weapons technology.

Here is the position of the Joint Chiefs of Staff as presented to the Armed Services Committee on June 20 by Admiral Moorer:

> The Joint Chiefs of Staff were officially represented on the SALT delegation and were consulted prior to signature. If we press forward vigorously with our programs designed to protect against a degradation in national security posture, the Joint Chiefs of Staff believe that the deterrent capability of our strategic forces will not be impaired, that peace of the world may be enhanced, and that the undertakings will be in the best interests of the United States.

I am confident, based in part on decisions of the past and in particular on our recent procurement debate here and the decisions then made, that the Senate will continue to back the SALT agreements with adequate funds for improved weapons and technology within the terms of the agreements.

SALT SAVINGS

One final word about these agreements. As chairman of the Senate Armed Services Committee, I want to take issue with those critics who complain that savings anticipated under SALT, have proven illusory and that the money saved has been engulfed in funds for new weapons spending. That is not true if we look ahead a few years—as we must look ahead.

Before the SALT agreements, Congress was committed, in some degree, to four ABM sites. The Defense Department had set its sights on 12 of them. Under the treaty we will buy no more than two.

Before the SALT agreements, the Russians were rapidly expanding their land and sea-based strategic missile forces, and there was no apparent end to it. Well before the 5-year term of the proposed offensive agreement, we would have to take aggressive—and expensive—steps to counter the expanding threat.

I believe that we would have to move, in the strategic weapons area—and move soon—if the agreements were not approved and the Russians were to continue their open-ended expansion of their missile programs.

Looking down the road, there are savings, very great savings, implicit for the future in these SALT agreements. Of course, it will require some hard decisions by Congress and the executive branch as to whether or not we really make these savings.

A START

We will save money in the long run under these SALT agreements, but, as I have said, the agreements promise much more than a measure of relief for the American taxpayer. They promise a start towards arms control—I do not say disarmament—in the nuclear age. It is a start which I believe we should make, first, in our own best interests, but also in the interests of others.

Mr. President, I do not want to get excited about it, but I have been very close to these problems for the last several years; and I say on my responsibility—every ounce of it—that there is no complete defense to a nuclear attack; that if these arms are ever turned loose by one party or another and we have a nuclear war, great parts of the world will be destroyed and a great percentage of the population of the world will be destroyed.

Senators should face the fact that, while we debate this bilateral first step, the nuclear arms race is accelerating among other powers. The ban on nuclear testing does not apply to underground tests, and some nuclear powers do not abide by the 1963 treaty. Several nations already have nuclear weapons and limited delivery systems. These are just—well known facts. They are not often mentioned because they are so unpleasant but it is a part of the world in which we live. In fact, the Atomic Energy Commission lists 23 nations capable of developing nuclear weapons and sophisticated delivery systems within 5 to 20 years.

Picture that—if anyone can—a world 5 to 20 years from now in which 23 nations will be capable of having nuclear weapons with modern delivery systems, that is, the ability to deliver a nuclear weapon on target. It is unthinkable that we should not try, now, to go as far as possible in preparing against that day.

It is high time that the major powers took steps toward curbing their nuclear arms so that other nations with a menacing potential can be drawn into an arms control network.

I urge approval of the interim agreement which is limited but is a start.

Let me emphasize, in concluding, that we do now have, beyond doubt, in being, sophisticated weapons that are entirely capable of providing the necessary deterrent that we need to deter any nation from risking the consequences of an attack upon us.

Further, for emphasis, under the terms of the agreement to which I have addressed myself, we will have sufficient deterrent force and we can provide, for the intervening period, and the period beyond the 5-year period, should there be no extension of this agreement, or should it be violated in the meantime.

We have an opportunity, and the time, to provide the benefits of research and development and technology that would update the weapons we have, or even bring forth new weapons that would add to our deterrent capability.

Further, I am satisfied—and this is something new, it was not true a few years ago—that we now have the capability to detect and to be able to tell on a week-to-week and a month-to-month basis what is going on on the other side, what they are doing, and what their activities are. I do not mean looking into their minds as to what they are planning, but finding out what they are doing toward improving their own position and thus avoiding, through this marvelous technology, getting caught by surprise.

No system is perfect, but I have been here a good many years and I am satisfied that we are not taking too much of a chance. We are not taking an unreasonable chance in making this modest start, because I realize that something has got to be done. I believe this will prove to be the germ—the beginning—of what will finally develop, I hope, into a worldwide limitation of some kind with reference to nuclear weapons. I am not off on a rosy path of thinking about disarmament or unilateral action, but thinking totally within the terms of this agreement as I have outlined it.

Mr. President, I yield the floor.

ORDER OF BUSINESS

The PRESIDING OFFICER (Mr. ROBERT C. BYRD). Under the previous order, the senior Senator from Kentucky (Mr. COOPER) is now recognized for not to exceed 10 minutes.

INDIA'S 25TH ANNIVERSARY AS AN INDEPENDENT, DEMOCRATIC NATION

Mr. COOPER. Mr. President, I send to the desk for myself and on behalf of Senators CHURCH, TUNNEY, JAVITS, SAXBE, KENNEDY, STEVENS, PERCY, CASE, BAYH, HOLLINGS, CRANSTON, BROOKE, MATHIAS, TAFT, HATFIELD, and ROTH, a resolution expressing the congratulations of the Senate to the Republic of India on its 25th anniversary as an independent, democratic nation.

Mr. President, as I have just said, I have submitted today on behalf of myself and the Senators I have named, a Senate resolution extending to the Republic of India and to Prime Minister Indira Gandhi, to its Parliament and people, the congratulations and good wishes of the Senate of the United States on the 25th anniversary of India's establishment as an independent, sovereign and democratic nation. I know that we are joined by millions of the people of the United States in this expression of good will.

It was 25 years ago that the partition of the subcontinent of India was completed. To one who has spent any time in India, I think it would be clear that there never was any question in its long history that India would be independent. The strength and continuity of its ancient culture and its history made independence inescapable. The part that Ghandiji, the late Prime Minister Jawaharlal Nehru and other great leaders played in hastening independence were in a larger sense an expression of Indian thought and purpose and determination. I think it worthwhile also to remember that Great Britain and her statesmen played an enlightened role at the time of her independence. But, above all, it was the unwavering spirit of the Indian people and their leaders growing out of its long history and culture that assured independence.

It has been 25 years since that historic day of independence and in the years that have passed, India's progress and work have been marked by the spirit and activity which only independence and complete freedom can give.

It was my opportunity to serve in 1955 and 1956 as Ambassador of the United States to the Republic of India and I have revisited India on three occasions since that time. Each time I have seen the continuous growth and success of its economy in the field of agriculture and industry. But of equal importance, this economic growth has been accompanied by a concern for the social and humane needs of its people in health and education and social justice.

India's life has stayed firmly bound to democratic values in its parliamentary institutions, the rule of the law, its free courts and the holding of free elections, larger in point of participation by its people than any other country in the history of the world.

India has had its trials but it has held true to its course of independence and democratic and human values.

The United States, throughout the years, has been of assistance to the people of India. I hope that the spirit and the values of the peoples of the two countries will be increasingly close and bound together to friendship.

We extend to the Republic of India, to Prime Minister Indira Gandhi, a great leader of her people, to our sister parliament, and to India's people our congratulations on its success and our best wishes for the future.

I ask unanimous consent to have printed in the RECORD an excerpt of Gandhi's writings which tells much about the spirit of the Republic of India.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

> Recall the face of the poorest and the most helpless man whom you may have seen and ask yourself, if the step you contemplate is going to be of any use to him. Will he be able to gain anything by it? Will it restore him to a control over his own life and destiny? In other words, will it lead to swaraj or self-rule for the hungry and also spiritually starved millions of our countrymen? Then you will find your doubts and yourself melting away.

The PRESIDING OFFICER. Under the previous order the distinguished Senator from Idaho (Mr. CHURCH) is now recognized for not to exceed 10 minutes.

TO THE NEW INDIA—HAPPY 25TH BIRTHDAY

Mr. CHURCH. Mr. President, today, the Republic of India is celebrating its 25th independence anniversary. I am delighted to submit a sense of the Senate resolution, along with Senators COOPER and TUNNEY and others, expressing this body's congratulations to the Parliament of India on such a significant occasion.

Through this resolution, we in the U.S. Senate want to express to our legislative counterparts halfway around the world our good will and best wishes, and pay our compliments to the people of India for their impressive economic and social achievements over the past quarter of a century, and for their steadfast support of parliamentary government.

The world's most populous democracy and the foremost power in South Asia, India is a free and secular society based on a written constitution that seeks social, economic, and political justice for all its citizens. Its judicial system is devoted to the rule of law. From the time that Prime Minister Jawaharlal Nehru spoke on behalf of India's freedom 25 years ago, the United States has supported and encouraged India's efforts to develop its economy and strengthen its democracy.

I first saw India during World War II; I returned for the second time at the end of November 1971. During my brief visit last year, I caught a glimpse of India's energetic program of economic development to raise up 550 million people from the depths of poverty and to make the transition from a traditional society to one of just distribution of the benefits of wealth, science, and technology. I saw the infrastructure, which Prime Minister Indira Gandhi has said "will enable us to become a modern economy." I saw the modernization of India's agriculture, known universally as the green revolution, whereby the country has reached self-sufficiency in rice production.

In the industrial sector, after major diversification, India today ranks as the world's eighth industrial nation, able to supply to its people consumer and capital goods as well as to export sophisticated products.

The Government has worked hard to raise the living standards of the Indian people by providing extensive health services, raising life expectancy from a grim 29 years at independence to 55 years today, by increasing the literacy rate from 14 percent in 1947 to over 30 percent in 1972, and by promoting effective family planning programs nationwide.

Since India's political system, like that of the United States, is a test and a proof of the democratic path to achieve social justice and economic well-being, what happens in India, especially over the next 25 years, will help to determine the future of other nations in Asia that look to this democratic power for guidance and leadership. The significance of India's economic well-being then, realized in the open air of democracy, extends not only to the country's 500,000 villages and cities, but far beyond India's borders.

The diverse cultures of India and the United States are naturally bound by the bridge of democracy by which both societies guarantee free debate, free worship, and free elections, India having had six national elections since independence. Both countries share values that are set forth in the American Declaration of Independence, and both nations have demonstrated a deep sense of responsibility toward mankind by offering refuge to the oppressed. The 10 million East Bengalis who fled to India during Bangladesh's war of independence last year have returned home, but India still hosts the Dali Lama and close to 100,000 of his Tibetan followers.

India and the United States have chosen to follow the path of progress for the many rather than the few. Thomas Jefferson said:

> Men are naturally divided into two parties, (1) those who fear and distrust the people, and wish to draw all powers from them into the hands of the higher classes; and (2) those who identify themselves with the people, [and] have confidence in them.

On its silver independence anniversary, India can look back with satisfaction on 25 years of building, of exemplifying that the state does exist to serve the people, not that the people exist to serve the state. As in the case of Jefferson's America, India can look forward to expanded horizons for growth with a society firmly based on democratic institutions.

As a friend of India, I offer my heartfelt congratulations on its 25th birthday. May this be the opening of an era of increasing prosperity and opportunity, domestic tranquility, and peace for the Indian people.

The words of the poet, Shelley, apply: "The world's great age begins anew."

I ask unanimous consent that an interview with Prime Minister Gandhi in Sunday's Parade magazine and a dispatch from Delhi in today's Washington Post be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Parade magazine, Aug. 13, 1972]

A TALK WITH INDIRA GANDHI

(By Michael Gorkin)

NEW DELHI.—"We are quite willing to forget what has happened, and to make a new start with the United States. We want your friendship. But the Nixon Administration has shown no real desire to improve its relations with India. The American people—that's another story. They have consistently been sympathetic. I, personally, get such a vast number of letters from Americans—in every state, and every age—all expressing their friendship for India. We are grateful for this support. And we sincerely hope that the U.S. Administration, too, will try to undertand our point of view and our problems. It is never too late or too early to be friends."

Thus did Prime Minister Indira Gandhi, leader of India's 560 million people, express to Parade her hopes for future U.S.-Indian relations. Coming as they do, on the eve of India's 25th anniversary of Independence from Britain (on Tuesday), her words are a reminder that there still may be some common ground between the world's most powerful democracy, the United States, and the world's largest democracy, India. They are also a reminder that never in the past 25 years have relations between our two countries been worse.

THORNY PATH OF INDIA-UNITED STATES RELATIONS

To some observers, the surprising thing is that Indian-American relations didn't fall apart a long time ago. For, ever since 1954, the U.S. has been allied to India's arch-enemy, Moslem Pakistan. We have spent billions of dollars in military aid, propping up various dictatorships in Pakistan, which borders on the Soviet Union and agreed to be our ally. And while we have also invested some $10 billion in "non-aligned" India (almost all of it economic aid) we have consistently been more critical of India, and we have usually looked the other way when Pakistan pointed its American-supplied guns in India's direction.

NEW NATION OF BANGLADESH

This was perhaps never more evident than last December, when India and Pakistan got embroiled in their fourth war in 25 years—a war that saw East Pakistan emerge, with India's assistance, as the independent country of Bangladesh. During the 14-day conflict, and for several months preceding it, the U.S. gave moral support to Pakistan, even though we claimed publicly to be neutral. (The "Anderson Papers," it will be recalled, made this embarrassingly clear.) As a result, Indian-American relations plummeted to a new low—in fact, to the point where the newly retired American Ambassador here, Kenneth Keating, had to be accompanied by a 24-hour armed guard.

As might be expected, the main beneficiary of all this bad feeling between the U.S. and India is the Soviet Union, which, for the past few years has steadily increased its strength on the subcontinent. At this point they are now India's main arms supplier, having pumped in some $1.8 billion since 1965. ("We pay for all of our arms from the Soviet Union, and this in no way affects our status of 'non-alignment,'" counters Mrs. Gandhi.) Moreover, in August, 1971, India and the Soviet Union signed a 20-year Treaty of Peace, Friendship and Cooperation—which, though not a mutual-defense pact, nonetheless has sent the shivers up some American spines. As Kenneth Keating expressed it, with diplomatic calm: "Mrs. Gandhi will perhaps tell you that the Treaty in no way affects India's status of 'non-alignment' [she did] but for the American mind, at least, it is difficult to imagine the Treaty having no effect, or making no changes, isn't it?"

MRS. GANDHI GAINS POWER

Such worries notwithstanding, it is probably too soon to say whether the Soviet Union has won a permanent place for itself in India, or whether the U.S. has lost the world's second most populous country as a friend. But what is certain is that much will depend on India's popular and powerful Mrs. Gandhi. At 54, she has been India's Prime Minister for six years; yet, it wasn't until her overwhelming success in last year's elections, followed by the victory over Pakistan in December, that she became India's undisputed leader. Today, in fact, many observers feel that no leader in India's recent history—not even her father, Jawaharlal Nehru, who was Prime Minister from 1947 until he died in 1964—has had as much power as the strong-willed, brilliant, attractive Mrs. Gandhi.

In a way, Indira Priyadarshini ("dearly beloved") Gandhi has been grooming for this position ever since she was a child living in her grandfather's mansion in northern India. Both her grandfather and father were leaders in India's struggle for independence, and Indira was often present when British officers came to cart them off for interrogation and prison—or, as her father called it, his "other home." During his long stays in prison, Nehru sent letters to Indira—his only child—often confiding to her his deepest hopes for India's future. It wasn't long before Indira, too, joined in the "freedom struggle," nor was it long before she emerged as one of its young leaders, and was tossed, along with her father, into that "other home."

This close working relationship with her father continued even after India won its independence in 1947 and Nehru became its first Prime Minister. Nehru's wife having died, he asked Indira—who by then had married a childhood friend and was a mother—to move, along with her family, into the Prime Minister's residence and to serve as his official hostess. Indira thought about it, argued about it—with her husband Feroze (he died in 1960)—and then agreed. Thus, for the next 17 years she was constant witness to the comings and goings of world leaders (she has met, for example, all the American Presidents since Truman); and she was constant "ear" to her father, who continued to discuss with her his problems and plans. Not surprisingly, by the time he died, Indira knew as much about politics and leadership as anyone in India. And just two years later, she got a chance to prove it when she was elected Prime Minister.

UNITED STATES WAS SOURCE OF INSPIRATION

Today, at the pinnacle of her power, Mrs. Gandhi is attempting to finish the job that her father barely started—namely, that of bringing a peaceful, democratic revolution to poverty-wracked India. To do this, she obviously needs all the help she can get, and what has been disappointing is that the U.S. has not come down firmly on India's side. As Mrs. Gandhi expressed it, somewhat philosophically: "For many of us who were in the freedom struggle in India, the U.S. was a source of inspiration. The speeches and sayings of Thomas Jefferson and Abraham Lincoln—we looked to these with great admiration. But look what has happened: the U.S. has taken to supporting regimes that are alienated from their own people—in Pakistan, in Vietnam, throughout the world. In fact, if we look at this recent history, we must ask whether America, with all its talk of democracy, is really supporting democracy anywhere.

"Yet, even though I say this, it is also true that there *has* been friendship in the past. As I've said, the American people have always shown a sympathy and understanding for us. But what is also necessary is for America's *present* leaders to understand the problems of our area. For instance, you simply cannot overlook the spirit of nationalism in Asia. Almost all our countries have only recently won their independence: so, when we hear America's leaders talk about how they have gone into Vietnam to defend and develop the Vietnamese, it just sounds like an old version of 'the white man's burden' to us. Therefore, what we in India say is that it would be better for American troops to get out of Asia altogether. On the other hand, if

America genuinely wants to help us, and be friends with us—we welcome it."

The kind of "help" Mrs. Gandhi is referring to, quite obviously is American dollars. And no doubt, one of the first steps the U.S. must take to patch up relations with India is to resume—if not increase—our foreign aid to them (since December we have cut off aid to Mrs. Gandhi's government). But, as one American official pointed out, "she is hardly going to come begging for it. And besides, as much as Mrs. Gandhi would like our assistance, she knows that in the end it is up to India to solve its problems mostly by itself."

And staggering problems they are. For India today is a terribly poor country (per capita annual income is less than $100), and there is barely enough food to go around. Moreover, the population is increasing by some 13 million per year—which means that, at the present rate of growth, by the year 2000 there will be a billion mouths to feed. And, how does one change this trend—how does one modernize agriculture and cut down the birthrate—when most of the people are tradition-bound and uneducated (70 percent are illiterate)?

LEGACY OF COLONIAL RULE

"Obviously it will take some time to completely conquer these problems," explains Mrs. Gandhi. "Centuries of British colonial rule left us in a state of terrible stagnation, and we have had only a few years to get over it. But the point is, we *are* getting over it. We have a sense of self-confidence that we never had before, and already we have begun to make important inroads into these problems."

No doubt, the most crucial inroad made in recent years is what Indians call the "green revolution." By introducing into some regions the newly developed varieties of wheat and rice (which increase yields some 200-300 percent), and by applying large amounts of fertilizer, India has in just five years become self-sufficient in these vital foods—which means, incidentally, the Indian's leaders no longer have to go pleading, as they did in 1966, to the wealthy countries to rescue their people from starvation.

'"And now what we have to do is spread our 'revolution' to all regions, and all farms in the country," says J. Katarya, an agricultural technician in north India. "You see, once we convince farmers that fertilizer won't—as some of them say—rob the soil of its strength, and once we get them to see that even though the new wheat and rice taste different they are still good, then these farmers are happy to go along with us. And once we have all farmers using new methods, there will be enough wheat and rice for everyone to eat as much as he likes."

Maybe so. But undoubtedly much will depend on just how successful India is in limiting the number of mouths it will have to feed. Thus, in the last few years the government has tried almost every method possible to encourage birth control: a "standing army of 90,000 workers" has been organized to tour the countryside and spread the message of family-planning; sterilization centers have been set up to perform vasectomies, for which the sterilized man is paid some $15, or about two months' wages; and contraceptives are now being sold—at government-subsidized rates—in almost every nook and cranny of the country.

PROGRESS MADE, BUT CHANGES TAKE TIME

"We still haven't made as much progress as we would like in some of the poorer areas," concedes Uma Dixit, Minister of Health and Family Planning. "Many parents still have the old ideas about needing a lot of children to support them in old age, or needing many sons to protect them against their neighbors. And, of course, in many of these areas there isn't much else to do for entertainment at night. But, even so, we have made some progress, and I am optimistic that we can keep India's population down to manageable proportions. It's just that we can't expect to see these changes take place overnight; it's going to take some time."

But, how long does India have? And what if India cannot keep her population from growing by leaps and bounds? And what if the green revolution then cannot produce enough food to go around?

These are the troublesome questions that hang over India on this, the 25th anniversary of her Independence. And these are the problems that Mrs. Gandhi—who has promised her people "Out With Poverty!"—is now trying to solve. But, while everyone here knows that India alone is ultimately responsible for their solution, there is still a disappointed feeling that 10,000 miles away, the world's wealthiest country doesn't much care.

[From the Washington Post, Aug. 15, 1972]

India, Free 25 Years, Enjoys Stability Amid Poverty

(By Lewis M. Simons)

New Delhi.—In the 25 years since Jawaharlal Nehru kept his country's "tryst with destiny," the government of independent India has made remarkable progress toward modern statehood.

But the people of India have not kept pace.

As a government, India has advanced far toward the recognition its leaders dearly crave from the world beyond the Subcontinent. Political stability is so much a fact of life that opposition is almost nonexistent and critics are beginning to raise cries of "dictator" against Nehru's daughter, Prime Minister Indira Gandhi.

As a people, the great Indian masses are as impoverished today as they were on this day in 1947, the day Britain set them free.

To the outsider, witnessing this phenomenon of advancing government and lagging populace can be like watching a lumbering bullock cart. But on this cart, sometimes one wheel rolls forward and one stands still, and the cart turns in a circle.

ECONOMIC EVALUATION

Consider this evaluation of the Indian economy 25 years after independence by Finance Minister Y. B. Chavan:

"All-round economic progress since independence has radically altered the character of our economy and brought about a significant increase in real incomes generally.

"But, the absolute number of those living in abject poverty has scarcely diminished; economic disparities appear to have widened; unemployment has become a seemingly intractable problem."

Or again, in an analysis of land reform by State Minister of Agriculture Sher Singh, the wheels seem to spin in two directions:

"One of the spectacular results of the spread of modern technology has been a widening of the disparities in wealth and income in rural areas.

"On top of this, the unplanned spread of mechanization threatens not only to accentuate the inequalities but also to reduce employment opportunities. In the result, new social tensions are developing in the countryside."

DEFICIT ELIMINATED

On occasion, the wheel of the government and the wheel of the people seem to roll smoothly alongside each other, and the results can be startling. The "Green Revolution" of Indian agriculture is one of these rare achievements.

Spurred by the disastrous droughts and famine of 1965–67, government leaders, scientists, technicians and peasants pulled together. Within five years, they eliminated the great food deficit which had plagued this country from antiquity and built a reserve now claimed to be adequate to ward off starvation for more than a year.

While this is an achievement that would doubtless stun the founders of independent India, Gandhi and Nehru, once more it is beginning to look as through the accomplishment will be that of the government more than of the people.

FOOD EXPORTED

After its resounding defeat of Pakistan last December, the government delivered a reported 750,000 tons of rice to its newly liberated neighbor, Bangladesh. The word went out: For the first time in history, India can export food grains.

A deal with a Japanese company was reported in which India was bartering 100,000 tons of corn. The government offered "miracle rice" seeds to North Vietnam.

The government also claims its storehouses hold 9.5 million tons of food grains. Some politicians in opposition to Prime Minister Gandhi have disputed the figure, but this can probably be dismissed as sniping and most diplomatic observers accept the official statistics.

Yet, when the current monsoon was late in developing and summer crops were burning in the parched ground, it was only a matter of weeks before peasants began dying. Government officials, anxious that green revolution not appear to be a fragile shell, insisted they were dying of malnutrition, not starvation.

Now, although the monsoon has come, great damage has been done to crops, and no more is to be heard about grain exports. The Japanese deal is back "under negotiation." The U.S. mining of North Vietnam's ports eliminated the seed offer.

There is no doubt that India is capable of feeding itself and even of exporting grain. The point has been made. What has not been proven is that the diverse elements of the government and the people can be made to haul together in good times as well as bad to overcome dependence on the capricious monsoon and to make agriculture a manageable science.

INDUSTRY'S ROLE

Industrial growth since independence does not approach agricultural gains. In 1950, three years after the Union Jack was lowered in New Delhi, industry contributed about 5 per cent to India's national income. By 1968, this contribution had doubled.

Since then, however, with the government moving increasingly into the industrial picture, growth has fallen off sharply. In the last four years, the government has granted only 125 out of 1,000 applications by large private industrial organizations seeking expansion.

This shackling of the private sector has caused the government to dip deeper and deeper into bank credits to help develop public sector growth. In the last fiscal year, the government borrowed a record $1.1 billion.

The handful of indigenous industrial giants has grown frustrated. In an annual report to one of his companies last month, the country's leading business figure, J. R. D. Tata, complained bitterly:

". . . Modern and mature countries which, whether calling themselves socialist or not, have provided their people with the highest standards of living and the most complete welfare services in the world, have resolutely turned their back on outdated Marxist theories and shibboleths still blindly accepted by so many in our country who think the prosperity and welfare of the people can only come from the destruction of all private ownership and enterprise."

Most observers in New Delhi are not as convinced as Tata, who is frequently described as an "enlightened capitalist," that Mrs. Gandhi intends to destroy private enterprise. What she does seem intent on doing, however, is developing something she calls the "joint sector," an ill-defined melding of government and private management.

POLITICAL MOTIVATION

The effort to eat into private control of industry appears to be politically motivated. Long-time observers note that dramatic moves, such as nationalizing a huge private factory, can pay dividends in impressing a large number of poor people, even though the benefits to them may be nil.

To those of India's supper class—a class which forms an eggshell-like veneer over the depths of grinding poverty—Mrs. Gandhi has become an object of scorn for her steps in nationalization and her efforts to place restrictions on both rural and urban landholdings.

To this class, from which Mrs. Gandhi and her aristocratic father themselves came, she is "that woman," just as Franklin Roosevelt was "that man in the White House" to critics of his New Deal.

The argument over nationalization is a constant one here. But, while critics can cite convincing figures as evidence that nationalized industries such as banking, insurance, and some steel plants, are doing very poorly, proponents can point only to future hopes.

As to what this furiously spinning government wheel is churning out for the people of India, Times of India columnist Prem Shankar Jha wrote recently: "What difference does it make to the 200 million people who live below the bread line whether industry is controlled by 100 or 1,000 families or, for that matter, by the state?"

GREATEST FAILURES

At this "below the breadline" level of society lie India's greatest failures in its first quarter century: Failure to provide housing for more than 10.5 million families; failure to provide education for the children of these families; and failure to provide basic medical attention.

Clinging to the lowest rung on India's social ladder are some 80 million Untouchables, or as Gandhi called them with heart-rending affection, Harijans—Children of God.

(The Untouchables were members of certain Indian castes which, though considered Hindus, were excluded from the ordinary social and religious privileges of Hinduism. India outlawed "untouchability" in 1949 and made persecution of untouchables punishable by law.

(How this caste came to be ostracized is obscure. According to one definition, Untouchables are best described as Hindus who were not allowed to enter ordinary Hindu temples and who supposedly caused pollution to ordinary Hindus either by touch or by proximity.)

Untouchability, in effect relegated an entire community to the dregs of society. And, as American Blacks have learned, prejudice cannot be legislated out of existence. Untouchability is still very much a fact of Indian life, not only in the villages but in the big cities as well.

Even in New Delhi, where a handful of Harijans have become Cabinet ministers and public figures, the men and women who sweep the streets and empty latrines are always Untouchables.

In the villages, their lot is far more degrading—and dangerous. In the first six months of this year alone, 20 cases have been reported of Untouchables being made human sacrifices to satisfy obscure religious rites. Those cases not reported, according to one authority, "must be legion."

Officially, prejudice against Untouchables is exercised in diverse ways. For instance, when electric power is installed in rural villages, the adjacent slum areas occupied by the Untouchables of the village are inevitably ignored. There is now a program to provide electrification for one Harijan settlement a day in each state in the country.

But, according to one official source, government measures have no significant effect on improving the overall status of Untouchables since 1947.

The Untouchables and the lower, or "scheduled," castes and tribal groups make up the breeding ground for India's exploding population. According to the official 1971 census, the population now stands at 548 million, an increase of 24.8 per cent in the last decade—the highest growth rate for any decade to date.

RATE OF BIRTHS

According to informed observers, the total population is nearer 500 million and the rate of births may be even higher than the one officially reported.

The goal of the national family planning program is to reduce the growth rate from 39 per thousand to 32 by the end of the current five-year plan in mid-1974. "The achievements so far do not indicate that, except in a few states, this goal will be reached," Health and Family Planning Minister Uma Shankar Dixit said recently.

All these are social problems and very serious. Some of Prime Minister Gandhi's harshest critics say India's social ills continue unabated because she has concentrated her efforts on making a place for herself—and India—in the world instead of making India a better place to live.

Whether this criticism is valid or not, there is no question that the daughter of Nehru has far surpassed her predecessors in gaining international position and respect for both herself and her country.

By shrewdly accepting the courtship of the Soviet Union at a time when war with Pakistan over Bengali nationalism was growing imminent, she cleared the way for her generals to fight the battle without having to worry about super-power intervention.

RINGING VICTORY

The ringing victory over Pakistan has also swept aside that lingering aura of nonalignment, so carefully nurtured by Nehru. And though Mrs. Gandhi and her ministers would be loath to admit that nonalignment is a thing of the past, leading Indian political scientists are not only open about it, but proud.

"Nonalignment answered our needs for security and our urges for prestige," said a top government defense analyst in an interview. "By being friendly in varying degrees with Washington, Moscow and Peking, Mr. Nehru hoped to make the Subcontinent free from excessively hostile interference by any major power. Indo-Pak strains were there for anyone to exploit."

For a number of years, India consoled itself by saying it was an area of agreement between the Soviet Union and the United States. But as ambitious a figure as Mrs. Gandhi could not be content with this self-deception forever.

Then, in December, 1970, Sheikh Mujibur Rahman won an impressive victory in the east Pakistani elections, and Mrs. Gandhi saw that the unity of Pakistan was in serious trouble.

Here at last was a hope for India to reconstruct the Subcontinent to its liking.

Victory gave India the position it has carved since Britain partitioned the Subcontinent preceding independence.

WANTS RECOGNITION

What Mrs. Gandhi wants now from the United States and China, and already enjoys from the Soviet Union, is the recognition that India reigns supreme in South Asia.

There can be no doubt that much of the indigenous criticism levelled at Mrs. Gandhi is political carping. She has achieved in her tenure progress and stability beyond the dreams of the former British rulers and the Indians who initially inherited leadership.

In some ways, progress has been so significant as to cause some criticism to become quite fine-grained, in itself a tribute to India's first 25 years.

But there can also be no doubt that the next 25 years must be a period of advance for the Indian people themselves. While they may no longer be the starving masses that once haunted the conscience of the world, their suffering is still overwhelming.

Until this suffering is alleviated, India's progress will continue to be irregular, like the two-wheeled bullock cart, sometimes lurching forward and sometimes lumbering in a circle.

The PRESIDING OFFICER. Under the previous order, the distinguished Senator from California (Mr. TUNNEY) will be recognized for not to exceed 10 minutes.

INDIA: 25 YEARS OF INDEPENDENCE

Mr. TUNNEY. I am pleased to join today with my distinguished colleagues from Kentucky, Idaho, and others in submitting this resolution to extend warmest congratulations to the Parliament and all other citizens of India on the 25th anniversary of India's independence.

This date, August 15, marks not only a beginning of a new era in the long history of India, but also the Renaissance of earlier times when Indians governed themselves. Some 5,000 years ago, when the rest of the world still wandered through the mists of precivilization, a remarkable civilization developed on the shores of the Indus River. Spreading from the river valley, the Indus Valley civilization developed a rich and varied culture which modified and transformed its many conquerors for centuries to come.

Various peoples and cultures followed the Indus Valley civilization. These included the Indo-Aryans, Greeks, Mauryas, Hindus, and finally the Europeans. Vasco Da Gama's success in reaching India sailing around Africa in 1498 inaugurated a 200-year struggle by the Europeans for control of the fabulous jewel of the "Indies." Finally, through the efforts of the East India Co. the British achieved complete control of the river valleys and coastal plains, the sources of most of the colonial wealth Britain sought. After the great Sepoy revolt of 1857-58, the company ceded the government to the British crown.

Interior and less-accessible areas were left under the control of the local hereditary rulers, but with British supervision.

In 1947, following years of protest, consultation, and careful planning, India finally achieved her rightful independence under the leadership of the immortal Mohandas K. Gandhi, the Mahatma. Gandhi's greatest contribution to his country may have been his work and influence toward peaceful independence. Many, however, prefer to regard as his greatest gift to India the legacy of spiritual truth and love that he so impressed in his people; it has become inseparable from their national character.

Certainly he and his works must be considered with Siddhartha Gautama, the Buddha, as one of the greatest of India's contributions to the spiritual well-being of mankind. He is symbolic of the India of peace and moderation, of contemplation and mercy, of understanding and cooperation for peace.

Yet attaining independence did not ease India's long-term economic and social problems. A country of approximately 550 million people, India supports an average population density of more than 400 per square mile. Approximately 20 million Indians are unemployed, and per capita income measures $8 per month. The literacy rate hovers at 30 percent.

Linguistic and religious fragmentation remain even more troublesome. Fifteen different languages and 800 dialects are spoken in India, usually on a regional basis. Approximately 15 percent of India's population is non-Hindu, and strong tensions between some Hindus and some Moslems still exist.

India is steadily confronting those aspects which hindered economic growth in the first decade after independence: The lack of development capital, low level of consumer income, inadequate transport facilities, limited power supplies, and the lack of skilled technicians and experienced management. India has faced these difficult challenges with spirit and imagination. With time, all of these problems are being surmounted as the entire economy matures and continues to grow at a rate that is envied by developed and underdeveloped nations alike.

Although agriculture continues to be the predominant component of the Indian economy, comprising about half of the national income, the contribution of the other sectors to the economy has increased steadily since independence. The annual industrial expansion has averaged 10 percent, aggregating 150 percent during the period 1951 to 1965. Large modern steel mills, fertilizer plants, heavy machinery plants, oil refineries, and locomotive works have been constructed at an amazingly rapid rate. New plants turn out a wide variety of consumer and producer goods, many never before manufactured in India.

Despite her economic accomplishments, India's greatest achievement in the last 25 years has probably been her system of government. Although technically establishing a parliamentary form of government, India's constitution of 1950 adopted several features of our own system of government. By sharing power with the numerous states, the Indian National Government has embraced federalism in hopes of channeling regional pride for the national good. Consequently, the Indian Parliament consists of two chambers, one representing the individual states and the other representing the general population.

As the largest democratic nation in the world, India has faced political obstacles which would amaze most Americans. The country remained united largely through the efforts of one of the world's most effective political organizations—the Congress Party. Yet after the deaths of its great leaders, Mohandas Gandhi, Jawaharlal Nehru, and Lal Bahadur Shastri, the power of the Congress Party waned in 1966 and 1967.

Under Mrs. Indira Gandhi's leadership, however, the new Congress Party has gained new-found support. Recently, the economy showed new resiliency as the production of food grains rose sharply at a 6 percent annual rate for 3 consecutive years. Then Mrs. Gandhi, with great political acumen, called for elections 1 year ahead of schedule and campaigned energetically on her pledge to "remove poverty." The result was a landslide victory at the polls as the new Congress Party elected 351 of the 517 members in the Lok Sabha, the lower House of Parliament.

The attempts of this democracy to alleviate some of the world's most acute poverty explains the tremendous interest of developing nations and the superpowers in India's future. In its approach to the problems of development, India has adopted an approach so different from that of mainland China that a significant rivalry has developed. Will India and the democratic path to development that it pursues produce the results necessary to maintain a viable economic and political community? The stakes could not be higher.

India has very great problems indeed, but it has been blessed with the spirit and determination to make remarkable progress.

As a person who has traveled in India extensively on two occasions, I think that the achievements of the Indian form of government, enabling it to maintain a democracy with as many diverse linguistic and ethnic cultures as exist in India, is proof that democracy can work in the underdeveloped world if there is the kind of political leadership India has enjoyed for the past 25 years. I have every reason to believe that India has become symbolic to underdeveloped nations of the world, as a country which does not have to depend upon totalitarian methods of rule to elicit the cooperation of its citizens and to achieve economic progress.

Therefore, I am most pleased to join so many of my colleagues in the Senate in wishing India success in the next several centuries of her existence.

Mr. President, I ask for immediate consideration of the resolution which has been submitted by the Senator from Kentucky (Mr. Cooper).

The PRESIDING OFFICER. The Chair would inquire whether or not the Senator has cleared the matter with the leadership on both sides.

Mr. TUNNEY. Mr. President, I believe that it has been cleared with the leadership on both sides.

The PRESIDING OFFICER. The leadership on both sides?

Mr. TUNNEY. I yield to the Senator from Idaho for a statement as to whether it has been cleared.

Mr. CHURCH. I spoke with the majority leader just a few moments ago. With respect to the minority leader, I ask that the Senator from Kentucky speak on that point.

Mr. COOPER. Has it been cleared on both sides of the aisle?

Mr. CHURCH. I have only spoken with the majority leader. I would have to defer to the Senator from Kentucky to speak for the minority leader.

Mr. COOPER. I see no reason that it should not be considered, but the question has been raised, and I want to be fair about it.

The PRESIDING OFFICER. Does the Senator from Kentucky (Mr. Cooper) feel that the matter would be agreeable to the distinguished minority leader?

Mr. COOPER. We have time available until 10:30 a.m. If the Senator will allow me, I will check it with the minority leader.

Mr. GURNEY. If the Senator will yield, this Senator is the acting minority whip at the moment. I will check with the minority leader and report back to the Senator.

Mr. COOPER. I thank the Senator.

Mr. BUCKLEY. Mr. President, will the Senator yield?

Mr. TUNNEY. I yield.

Mr. BUCKLEY. Mr. President, I ask the senior Senator from Kentucky to add my name as a cosponsor of the resolution.

Mr. COOPER. I am glad to. I ask unanimous consent that the name of the junior Senator from New York be added as a cosponsor of the resolution.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. COOPER. Mr. President, we still have 3 or 4 minutes remaining. I can get the assurance of the minority leader in that time.

In the meantime, I would like to say I am grateful to the Senator from Idaho (Mr. Church), the Senator from California (Mr. Tunney), the Senator from New York (Mr. Buckley), and all others who have joined in this resolution. The Senator from California called this to my attention several days ago and he was very anxious that such a resolution and statements be made on this matter. I hope very much there will be no objection to the immediate consideration of the resolution.

We have had our difficulties in the past between the two countries but there are so many ideas which may be expressed in different ways and which are common between the two countries that I think it is of great importance that the Senator make an expression of feeling on behalf of people throughout the United States, and to give this expression to the Government of the people of India.

QUORUM CALL

Mr. TUNNEY. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. CHURCH. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. Tunney). Without objection, it is so ordered.

Mr. CHURCH. Mr. President, I understand clearance has been obtained from both sides for the immediate consideration of a resolution.

Mr. GURNEY. Mr. President, I have checked with the Republican leader. He has no objection to the immediate consideration of the resolution.

Mr. CHURCH. Mr. President, I ask the Chair to lay before the Senate, for immediate consideration, the resolution recognizing India's 25th anniversary as an independent, democratic nation.

The PRESIDING OFFICER. The clerk will state the resolution by title.

The assistant legislative clerk read the resolution by title, as follows:

Senate resolution 354 recognizing India's 25th Anniversary as an independent, democratic nation.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the resolution?

There being no objection, the resolution was considered and unanimously agreed to.

The preamble was agreed to.

The resolution, with its preamble, reads as follows:

S. RES. 354

Whereas 25 years ago, on August 15, 1947, India's achieved its independence, becoming the world's most populous democracy; and

Whereas the United States from 1947 has supported and encouraged India's impressive efforts to develop its economy and strengthen its democracy; and

Whereas India's free and secular society is based on a Constitution that seeks social, economic, and political justice for all its citizens; and

Whereas India's judicial system is devoted to the rule of law and justice; and

Whereas over the last 25 years, India has embarked on an energetic program of economic development to raise up 550 million people from the depths of poverty and to make the transition from a traditional society to one providing a just distribution of the benefits of wealth, science, and technology; and

Whereas, with the modernization of agriculture known as the "Green Revolution", India is approaching self-sufficiency in wheat and rice production, and after major diversification of its industrial base, it presently ranks as the world's eighth industrial nation, able to supply to its people consumer and capital goods as well as export products; and

Whereas, by raising the living standards of its people, India is providing extensive health services, consequently raising life expectancy from a grim 29 years at the time of its independence to 55 years today; has increased the literacy rate from 14 percent in 1947 to over 30 percent in 1972; and is waging effective family planning programs nation-wide;

Whereas what happens in India, especially over the next 25 years will help to determine the future of other nations in Asia that look to this democratic power for guidance and leadership; that India's political system, like that of the United States' is a test and a proof of the democratic path to achieve social justice and economic well being; and that the significance of India's economic well-being and social justice, wrought in the open air of democracy, extends not only to the country's 500,000 villages and cities, but far beyond India's borders; and

Whereas the diverse cultures of India and the United States are naturally bound by the bridge of democracy by which both societies guarantee free debate, free elections, and free worship; and both countries share the values set forth in the American Declaration of Independence, and demonstrate a deep sense of responsibility toward mankind, by offering a refuge for the oppressed: Now, therefore, be it

Resolved by the Senate, That the Congress of the United States hereby extend its cordial congratulations and wholehearted best wishes to the Parliament and the people of India, upon the occasion of the twenty-fifth anniversary of India's establishment as an independent, democratic nation.

SEC. 2. The Secretary of the Senate shall transmit a copy of this resolution, through the Department of State, to the President of India.

Mr. ROBERT C. BYRD subsequently said: Mr. President, I ask unanimous consent, with respect to the resolution that was adopted earlier today by the Senate (S. Res. 354), recognizing India's 25th anniversary as an independent, democratic nation, that in the resolving clause, the word "Congress" be deleted and the word "Senate" be substituted in lieu thereof.

I know that this will meet with the approval of the sponsors of the resolution because the Senate can only resolve an action on the part of the Senate and not on the part of the Congress.

The PRESIDING OFFICER (Mr. HOLLINGS). Without objection, it is so ordered.

TRANSACTION OF ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. Under the previous order there will now be a period for the transaction of routine morning business for not to exceed 15 minutes, with statements limited therein to 3 minutes.

Mr. CHURCH. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMUNICATIONS FROM EXECUTIVE DEPARTMENTS, ETC.

The PRESIDENT pro tempore laid before the Senate the following letters, which were referred as indicated:

APPROVAL OF LOAN TO BRAZOS ELECTRIC POWER COOPERATIVE, INC., WACO, TEX.

A letter from the Administrator, Rural Electrification Administration, Department of Agriculture, reporting, pursuant to law, on the approval of a loan to Brazos Electric Power Cooperative, Inc. of Waco, Tex., in the amount of $21,819,000 (with an accompanying paper); to the Committee on Appropriations.

REPORT ON EXPERIMENTAL, DEVELOPMENTAL, TEST, AND RESEARCH PROCUREMENT ACTION

A letter from the Secretary of the Air Force, transmitting, pursuant to law, a report on experimental, developmental, test and research procurement action, for the 6-month period ended June 30, 1972 (with an accompanying report); to the Committee on Armed Service.

REPORT OF COMPTROLLER GENERAL

A letter from the Comptroller General of the United States, transmitting, pursuant to law, a report entitled "Federal Efforts to Combat Drug Abuse", dated August 14, 1972 (with an accompanying report); to the Committee on Government Operations.

PROPOSED AMENDMENT OF WILD AND SCENIC RIVERS ACT

A letter from the Assistant Secretary of the Interior, transmitting a draft of proposed legislation to amend the Wild and Scenic Rivers Act (with an accompanying paper); to the Committee on Interior and Insular Affairs.

REPORT OF ARCHITECT OF THE CAPITOL

A letter from the Architect of the Capitol, transmitting pursuant to law, a report of all expenditures from moneys appropriated to the Architect of the Capitol, during the period January 1, 1972 through June 30, 1972 (with an accompanying report); ordered to lie on the table and to be printed.

PETITIONS

Petitions were laid before the Senate and referred as indicated:

By the PRESIDENT pro tempore:

A joint resolution of the Legislature of the State of California; to the Committee on Commerce:

"ASSEMBLY JOINT RESOLUTION NO. 22

"Relative to noise pollution

"Whereas, The California Legislature has long recognized the problems of noise pollution; and

"Whereas, The California Legislature has actively sought to control noise pollution for over 20 years; and

"Whereas, California has pioneered as a laboratory for the development of pollution control technology; and

"Whereas, The California Legislature fought successfully, with the support of California's congressional delegation, to retain the right to set air pollution control standards more stringent than those adopted by the federal government; and

"Whereas, The magnitude of California's population, size, resources, industrialization and urbanization intensify the problems of noise suppression; and

"Whereas, The people of this nation already have serious reservations about the ability of government to deal effectively with environmental problems; and

"Whereas, Federal preemption of noise standards would destroy California's innovative efforts to control vehicle and aircraft noise long before the effects of such controls can be evaluated; now, therefore, be it

"*Resolved, by the Assembly and Senate of the State of California, jointly,* That the Legislature of the State of California respectfully memorialize the people of the United States, and the President and the Congress of the United States, to reaffirm the fundamental right and obligation of the states to defend the health, welfare, and safety of their citizens; and be it further

"*Resolved,* That this Legislature respectfully memorializes the Congress of the United States to reject any plan or noise regulation which would prohibit states from adopting standards more stringent than those adopted by the federal government; and be it further

"*Resolved,* That this Legislature respectfully memorializes the Congress of the Congress of the United States to support California's efforts to adopt more stringent noise standards, in order that the technology of noise suppression may be advanced as rapidly as economically feasible; and be it further

"*Resolved,* That the Chief Clerk of the Assembly transmit copies of this resolution to the President and the Vice President of the United States, to the Speaker of the House of Representatives, and to each Senator, and Representative from California in the Congress of the United States."

A joint resolution of the Legislature of the State of California; to the Committee on Commerce:

"SENATE JOINT RESOLUTION NO. 16

"Relative to television blackouts of sports events

"Whereas, Millions of sports fans who are unable to attend sports events in their locality due to health, advanced age, lack of adequate transportation, or inability to purchase tickets, either because of a sellout, or the cost, should be able to watch these events on television; and

"Whereas, Sports events are, however, not shown on television while they are occurring in the locality in which they take place, thus depriving these millions of sports fans of the opportunity to watch these sports events on T.V.; and

"Whereas, Many sports fans have installed fringe area T.V. antennas to receive sports events from stations located outside the blackout area, thus contravening the effects of the blackout; and

"Whereas, The rationale for the blackout, which is to secure the largest possible attendance at the sports events, is no longer valid after all the tickets have been sold and attendance at the game is no longer possible; and

"Whereas, The rationale has never been, and should not be, to prevent the poor, sick, aged, and disadvantaged from watching the game, yet this is the effect; now, therefore, be it

"Resolved by the Senate and Assembly of the State of California, jointly, That the Legislature of the State of California memorializes the President and the Congress of the United States, and the Federal Communications Commission, to take such action as may be necessary to prevent blackouts of nationally televised sports events *whenever the event is sold out at least two weeks in advance;* and be it further

"Resolved, That the Secretary of the Senate transmit a copy of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, to each Senator and Representative from California in the Congress of the United States, and to the Federal Communications Communication."

A joint resolution of the Legislature of the State of California; to the Committee on Interior and Insular Affairs:

"SENATE JOINT RESOLUTION NO. 12

"Relative to the preservation and protection of an archaeological site

"Resolved by the Senate and Assembly of the State of California, jointly, That the Legislature of the State of California respectfully requests the Department of the Interior, through the Bureau of Land Management, to enter into negotiations with the State Lands Commission for an exchange of the north one-half, or all, of Section 22 of Township 10 North, Range 2 East, San Bernardino Meridian, *upon the United States having clear fee title to such lands,* for state lands in the vicinity, or for the purchase of such federal lands by the state, or for such other alternative as the Bureau of Land Management may find is suitable, in order to insure the preservation and protection of an archaeological site located on the lands, and to permit the state to take the necessary steps to construct buildings and other facilities essential to such preservation and protection; and be it further

"Resolved, That the Legislature respectfully requests the Bureau of Land Management to take whatever steps are necessary to preserve and protect such archaeological site pending the outcome of negotiations; and be it further

"Resolved, That the Secretary of the Senate transmit copies of this resolution to the President and Vice President of the United States, to the Secretary of the Interior, to the Director of the Bureau of Land Management, to the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States."

Two joint resolutions of the Legislature of the State of California; to the Committee on Labor and Public Welfare:

"SENATE JOINT RESOLUTION NO. 18

"Relative to mine safety

"Resolved by the Senate and the Assembly of the State of California, jointly, That the Legislature of the State of California respectfully memorializes the President and the Congress of the United States to support and enact legislation which would provide up to 50 percent funding for mine safety programs in states which have chosen to retain jurisdiction over mine safety; and be it further.

"Resolved, That the Secretary of the Senate transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States."

"SENATE JOINT RESOLUTION NO. 23

"Relative to emergency food for farm workers

"Whereas, Many thousands of farmworkers *and other allied agricultural workers* will be underemployed or unemployed in the Central Valley area during the 1972–73 fiscal year as a result of the frost damage to crops; and

"WHEREAS, In order to sustain these farmworkers *and other allied agricultural workers* and their dependents, it is necessary to provide a minimum of 1.8 million dollars in emergency food in such area; and

"WHEREAS, The Governor of this state has declared an emergency and has requested the President of the United States to declare part of California, including the Fresno County area, a disaster area; and

"Whereas, Actions by various agencies have already gone into effect regarding emergency loans to the farmowners; however, no action has been taken to alleviate the plight of the farmworker *and other allied agricultural workers* who will be unable to purchase the basic necessity of food as a result of the loss or decrease in earning capability due to the frost disaster; now, therefore, be it

"Resolved by the Senate and Assembly of the State of California jointly, That the Legislature of the State of California respectfully memorializes the President and Congress of the United States and the Director of the Office of Economic Opportunity to approve the application of the Fresno County Economic Opportunities Commission, and applications of any and all counties which apply, for funds to purchase and distribute emergency food to farmworkers *and other allied agricultural workers* during the 1972–1973 fiscal year; and be it further

"Resolved, That the Secretary of the Senate transmit copies of this resolution to the President and Vice President of the United States, to the Director of the Office of Economic Opportunity, to Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States."

A joint resolution of the Legislature of the State of California; to the Committee on Veterans' Affairs:

"SENATE JOINT RESOLUTION NO. 25

"Relative to adequate educational benefits for Vietnam veterans

"Whereas, More than two million American veterans of the Vietnam war face adjustment to civilian life; and

"Whereas, That adjustment has been made more difficult by persistent inflation and chronic unemployment in our economy; and

"Whereas, Generally, education benefits have declined for veterans, since for military service in World War II, returning servicemen received full tuition fees and the cost of books and were given a minimum of $75 monthly for living expenses, while single servicemen returning from Vietnam receive only $175 a month for all expenses including tuition, or up to $230 if they have two dependents; now, therefore, be it

"Resolved by the Senate and Assembly of the State of California, jointly, That the Legislature of the State of California respectfully memorializes the President and Congress of the United States to give full consideration to higher educational benefits for Vietnam veterans; and be it further

"Resolved, That the Secretary of the Senate transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives and to each Senator and Representative from California in the Congress of the United States."

A joint resolution of the Legislature of the State of California; to the Committee on Interior and Insular Affairs:

"ASSEMBLY JOINT RESOLUTION NO. 34

"Relative to strip and open-pit mining in the Los Padres National Forest

"Whereas, A proposed phosphate pit mine operation under federal lease in the Los Padres National Forest in Ventura County about 25 miles north of the City of Ventura would cause serious and irreparable harm to the environment; and

"Whereas, The operation would be located adjacent to State Highway Route 33, a proposed scenic highway, would be expected to last at least 50 years, would use a million gallons of water per day, and would emit more sulfur dioxide into the air than all existing sources in Ventura County combined; and

"Whereas, To allow such a strip or open-pit mining operation to be conducted on federal lands in this area would be inconsistent with the National Environmental Policy Act of 1969; now, therefore, be it

"Resolved by the Assembly and Senate of the State of California, jointly, That the Legislature of the State of California respectfully memorializes the President and the Congress of the United States to take all steps necessary to prevent strip and open-pit mining in the Los Padres National Forest; and be it further

"Resolved, That the Chief Clerk of the Assembly transmit copies of this resolution to the President and Vice President of the United States, to the Secretary of the Interior, to the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States."

A joint resolution of the Legislature of the State of California; to the Committee on Labor and Public Welfare:

"ASSEMBLY JOINT RESOLUTION NO. 15

"Relative to immigrant children

"Whereas, The Immigration Act of 1965 drastically altered the flow of new immigrants to the United States of America; and

"Whereas, The United States of America has always attempted to provide the same opportunity to immigrants as we have to our native-born citizens; and

"Whereas, Large numbers of the children of new immigrants need special educational services to allow them to participate in regular school programs; and

"Whereas, The majority of such students need special training in the English language in order to receive the full benefits of public education; and

"Whereas, Local school districts in California and throughout the nation wish to provide such children with such necessary services; and

"Whereas, Current financial constraints make it impossible for districts always to provide such services; and

"Whereas, the federal government of the United States has a special responsibility to ensure that such children receive equal educational opportunities; now, therefore, be it

"*Resolved by the Assembly and Senate of the State of California, jointly,* That the Legislature of the State of California respectfully memorializes the President and the Congress of the United States to provide local school districts in California and throughout the nation with the financial resources necessary to meet the special educational needs of children of immigrants; and be it further

"*Resolved,* That the Chief Clerk of the Assembly transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States."

A resolution of the Legislature of the State of California; to the Committee on Veterans' Affairs:

"House Resolution No. 115

"Relative to veterans' pensions

"Whereas, The Hartke-Thurmond amendment to HR 15495, now pending before the Congress of the United States would increase the retirement pay of all pensioned veterans of all branches of services so as to equalize the pensions of older retirees with the pensions of more recent retirees of equivalent rank or grade and length of service; and

"Whereas, Present inequities in the retirement laws for veterans are unfair in that older retirees do not presently receive such equivalent benefits; now, therefore, be it

"*Resolved by the Assembly of the State of California,* That the President and Congress of the United States are respectfully memorialized to support and enact the Hartke-Thurmond amendment to HR 15495 to equalize the pensions of veterans; and be it further

"*Resolved,* That the Chief Clerk of the Assembly transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. EASTLAND, from the Committee on the Judiciary, with amendments:

S. Res. 329. A resolution to refer the bill (S. 1594) for the relief of John J. Yarnell to the Chief Commissioner of the United States Court of Claims for a report thereon (Rept. No. 92–1046).

EXECUTIVE REPORTS OF COMMITTEES

Mr. THURMOND. Mr. President, as in executive session, from the Committee on Armed Services I report favorably the nominations of three general officers in the Army, one rear admiral in the Navy, 12 general officers in the Marine Corps and two general officers in the Air Force.

I ask that these 18 nominations be placed on the Executive Calendar.

The PRESIDING OFFICER. Without objection, it is so ordered.

The nominations, ordered to be placed on the Executive Calendar, are as follows:

Lt. Gen. Donald Vivian Bennett, Army of the United States (major general, U.S. Army), to be assigned to a position of importance and responsibility designated by the President, to be General;

Rear Adm. Damon W. Cooper, U.S. Navy, for commands and other duties determined by the President, for appointment to the grade of vice admiral while so serving;

Gen. Jack G. Merrell (major general, Regular Air Force) U.S. Air Force, to be placed on the retired list in the grade of general;

Lt. Gen. George B. Simler (major general, Regular Air Force) U.S. Air Force, to be assigned to a position of importance and responsibility, requiring the rank of general;

Lt. Gen. Alexander Day Surles, Jr., Army of the United States (major general, U.S. Army), to be placed on the reitred list in the grade of lieutenant general;

Samuel Jaskilka, and sundry other officers, for temporary promotion in the Marine Corps;

Clarence H. Schmid, and sundry other officers, for temporary promotion in the Marine Corps; and

Brig. Gen. George Joseph Hayes, Army of the United States (colonel, Medical Corps, U.S. Army), for temporary appointment in the Army of the United States, to the grade of major general.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first time and, by unanimous consent, the second time, and referred as indicated:

By Mr. BENTSEN:

S. 3918. A bill for the relief of Guillermo Teodoro Ardid-Borraz. Referred to the Committee on the Judiciary.

By Mr. SPARKMAN:

S. 3919. A bill for the relief of Chung-Tung Yue;

S. 3920. A bill for the relief of Albien L. Taylor; and

S. 3921. A bill for the relief of George W. Wright. Referred to the Committee on the Judiciary.

By Mr. PERCY (for himself, Mr. Brock, Mr. Cooper, Mr. Pastore, Mr. Taft, and Mr. Bentsen):

S. 3922. A bill relating to employment of inmates in Federal and D.C. penal and correctional institutions. Referred to the Committee on the Judiciary.

By Mr. ERVIN:

S.J. Res. 258. A joint resolution designating October 8–14, 1972, as "Newspaper Week" and October 14, 1972, as "Newspaper Carrier Day." Referred to the Committee on the Judiciary.

By Mr. PERCY:

S.J. Res. 259. A joint resolution to authorize the President to designate the period from March 4, 1973, through March 10, 1973, as "National Nutrition Week." Referred to the Committee on the Judiciary.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. PERCY (for himself, Mr. Brock, Mr. Cooper, Mr. Pastore, Mr. Taft, and Mr. Bentsen):

S. 3922. A bill relating to employment of inmates in Federal and District of Columbia penal and correctional institutions. Referred to the Committee on the Judiciary.

WORK YOUR WAY OUT OF PRISON

Mr. PERCY. Mr. President, a principal reason ex-offenders return to crime, and to prison, is the inability to get a job. They cannot find jobs because they lack work skills. They lack work skills because they have never received adequate vocational training. The unemployed person often turns to crime to obtain the money he needs. But, once sentenced to prison, the inmate rarely develops a marketable skill he can use to get a legitimate job when he is again on the outside. His time in prison is too often occupied with useless tasks in an environment of indolence and lethargy. There are two reasons for this: It has long been thought that it would cost the Government too much money to become really involved in effective vocational training for each inmate; and, in addition, a plethora of laws stand in the way of innovative projects that could increase the inmate's job potential.

The costs of keeping people in prison without preparing them to make their way on the outside are high. The inmate becomes a greater burden to society. The Government spends an average of $11.55 per day to keep an inmate locked up in a cell that may have cost up to $30,000 to construct. Once released, 7 of 10 prisoners will return to prison within a few years, having learned nothing in prison except to continue as a criminal.

There are other, less obvious costs. Some 55,000 families receive AFDC payments because the family wage earner is in prison and unable to support them. This increases government welfare costs and encourages the breakup of the family unit. Too often, the ties of a prisoner with his family are strained, if not severed. And the result of this high cost? The typical prisoner comes out from behind prison walls with no money, no job skill, and probably no family.

The cost—to society and the individual—is devastating.

Mr. President, I have been active in the field of criminal justice reform because many crimes are a direct result of the failure of the criminal justice system. When 80 percent of all crimes are committed by people who have previously been in prison, the entire system should be revamped. New programs and organizational changes are necessary. I am not an expert in the field of criminal justice, but a great many experts have contributed ideas for change. Since 1967, four presidential commissions, dozens of legislative reports and more than 500 books and articles have recommended reform in our correctional system. It is about time that some of these reforms are implemented.

The President's Commission on Law Enforcement and Administration of Justice pointed out that work skills are badly needed by many offenders. The Commission said:

> These skills are best developed under realistic conditions of production.

It recommended that:

> States should work together with the Federal Government to institute modern correctional industries programs aimed at rehabilitation of offenders through instilling good work habits and methods. State and Federal

laws restricting the sale of prison-made products should be modified or repealed. (*The Challenge of Crime in a Free Society*, 1967, page 176.)

President Nixon reiterated this thought when, on November 13, 1969, he stated:

> Private industry can help rehabilitate criminals in many ways, such as retraining and hiring those who have served time.

Mr. President, the legislation that I am introducing today provides for a program that would flesh out many of the ideas put forth on this matter.

Specifically, the legislation would authorize the Federal Government, along with the District of Columbia, to implement pilot projects involving the private sector which would provide vocational training opportunities within the prison to prisoners while they are serving their terms. This "work your way out of prison plan" calls for private industry to lease prison property on a long-term basis, and to provide work facilities within the prisons. In these facilities, the employer would hire prison inmates at union-scale wages to produce regularly marketable items, just as if they were employed at a plant or factory on the outside. Participation in this program by a prisoner would be completely voluntary. The employer would also be expected to provide such supportive services for the inmates of the prison, as training, education, counseling, and so forth.

By earning a union-scale wage, the prisoner could pay the Government for his room, board, and maintenance. He could also help support his family, pay taxes and make social security payments. In addition, he would be required to contribute up to 10 percent of his wages to a fund to compensate victims of crime.

These demonstration projects would run for at least 2 years, at which time the Attorney General would report to the Congress on the progress of the programs. Assuming the programs will have proven their viability, they could be extended and expanded to include all Federal correctional institutions.

This legislation is designed to enable someone to emerge from prison with a marketable skill, work habits, a stake in the community, and a family that relies on him and not on welfare. Instead of a financial and criminal liability, the ex-offender hopefully would be a positive contributor to society, a person who can pay his own way.

I have worked closely with the Federal Bureau of Prisons in the development of this bill, and the Bureau has given its full support.

Mr. President, I ask unanimous consent that a letter from Norman Carlson, Director of the Federal Bureau of Prisons, be printed at this point in the Record.

There being no objection, the letter was ordered to be printed in the Record, as follows:

U.S. Department of Justice,
Bureau of Prisons,
Washington, D.C., August 1, 1972.

Hon. Charles H. Percy,
U.S. Senate,
Washington, D.C.

Attention: William B. Lytton, Staff Assistant.

Dear Senator Percy: At your request, I have had my staff review your draft for a bill relating to the employment of inmates in Federal and District of Columbia penal and correctional institutions.

Upon review we can say that we are able to support this proposal, as it is consistent with our program of developing in each offender skills consistent with modern industry demands. If the industry can locate on or near an institution, if it can employ offenders at reasonable market wages and if it can absorb some of these new employees into its operation after their release, we believe that chance of the participating offender returning to crime is greatly decreased.

Sincerely,

Norman A. Carlson,
Director.

Mr. PERCY. Mr. President, this bill would also apply to the District of Columbia, and officials there also have given it their support. I ask unanimous consent that a letter from Kenneth Hardy, Director of the District of Columbia Department of Corrections, be printed at this point in the Record.

There being no objection, the letter was ordered to be printed in the Record, as follows:

Department of Corrections,
Washington, D.C., August 8, 1972.

Hon. Charles H. Percy,
U.S. Senate,
Washington, D.C.

Dear Senator Percy: This is in response to your request for comment on your proposed legislation relating to the employment of inmates in Federal and District of Columbia penal institutions, the D.C. Department of Corrections intends to implement Project W.E.A.R. (Work Experience in Automotive Repair) as our demonstration project.

Project W.E.A.R. aims to establish a training program for inmates in the field of automotive body repair and spray painting. Your bill will enable us to expand this program by developing an auto body shop that will be owned by one or several of the area automobile agencies who in turn may hire the residents of Lorton at prevailing wages. The Automobile Manufacturers Association is expected to cooperate in this endeavor by establishing guidelines for the training program and may provide further employment opportunities for releasees.

Employment and adequate income are among the most important needs of offenders and the involvement of private industries towards meeting these needs is urgent. The Department of Corrections anxiously looks forward to the passage of your bill.

Sincerely,

Kenneth L. Hardy, *Director.*

Mr. PERCY. Mr. President, this concept should not be limited to the Federal and District of Columbia systems. States could have a great deal of success with such a program. For example, in Illinois, a new unified Code of Corrections was recently signed by Governor Ogilvie. This new law provides that prison-made products can be sold to nonprofit organizations, such as church groups and universities. The opening up of potential markets provides an avenue for similar programs to be instituted. I have discussed this project with the director of the Illinois Department of Corrections, Peter Bensinger, and he will be working actively to promote such a demonstration project in the State of Illinois. I ask unanimous consent that a letter from Peter Bensinger be printed in the Record at this point.

There being no objection, the letter was ordered printed in the Record, as follows:

Department of Corrections,
Springfield, Ill., July 20, 1972.

Hon. Charles H. Percy,
U.S. Senator, Committee on Government Operations, Washington, D.C.

Dear Senator Percy: Thank you for sharing your most recent draft of legislation relating to the employment of inmates in Federal and District of Columbia penal and correctional institutions.

The Bill appears to be an admirable piece of legislation, practicable for the Director of the Federal Bureau of Prisons and the Commissioner of Washington, D.C., and a model for progressive state correctional systems.

I have two specific comments to make, both of which may be served as well by being passed on to the involved correctional administrators as by being written into the program's enabling legislation.

It may be advantageous to contract for labor services directly between the inmates and the employers, rather than have the inmates subcontracted to private industry. The reasoning here is that in Illinois at least, prison laborers are not considered employees of the State, and so are not eligible for Workmen's Compensation benefits and rights. In the case of injuries, their remedy is limited to a tort recovery.

However, in my opinion, private industry-employed, union wage inmate workers should be eligible for Workmen's Compensation. To avoid this possible inequity, inmates should not be made available through the correctional agency involved contractually.

Also, in case of theft, vandalism or accidental destruction of private property, the incoming industry must be made aware that the correctional institution is in no way responsible, unless conclusively shown to have been done by a member of the correctional institution's staff action or inaction. Although the institutional administrators are still going to be responsible for security, industry must be alerted that the correctional system is not automatically responsible for the inmates' total conduct.

With these caveats, neither of which is necessarily legislative in nature, the legislation has my complete endorsement. As always, my staff and I are at your service to review proposed legislation related to the field of corrections.

I am sure you have discussed this with Norm Carlson of the Federal Bureau of Prisons, and I think he and I would both be interested in this pilot project.

Sincerely yours,

Peter B. Bensinger, *Director.*

Mr. PERCY. Mr. President, apart from the support of those in Government, this legislation needs and deserves the support of both business and labor. I have been in contact with leaders from both areas and each person I have consulted supports the idea behind this bill.

Mr. President, I do not believe that this will be a controversial piece of legislation. The net savings, in dollars, to the Government will be dramatic but, more importantly the savings to society in terms of reduced crime and recidivism will be substantial. This legislation merits close scrutiny and quicky action by the Congress. We cannot afford to wait any longer to undertake the vital task of reforming our correctional process, thereby serving society by helping to reduce the rates of crime and recidivism.

I think employment is an important key to the problem of reducing crime and I feel that implementation of a program such as this one would be a step in the right direction.

Mr. President, I ask unanimous con-

sent that the text of the bill be printed at the conclusion of my remarks.

There being no objection, the bill was ordered to be printed in the Record, as follows:

S. 3922

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) the Federal Prison Industries is authorized to establish and carry out, within the exterior boundary of any Federal penal or correctional institution, demonstration type projects involving the employment of inmates of such institutions. Such projects may also provide for the provision of supportive services to inmates of the demonstration institutions, such as training, education, counselling, and the like. In establishing such projects, the Federal Prison Industries is authorized to enter into agreements (by contract or otherwise) with any private person pursuant to which such person shall be authorized to establish (by construction, lease, or otherwise) facilities within the exterior boundaries of such penal or correctional institutions for the purpose of carrying out industrial or other operations herein authorized, notwithstanding the provisions of section 436 of title 18, United States Code. *Provided however,* That the employment within such institutions of inmates shall be on a voluntary basis.

(b) Any such agreement shall contain provisions assuring that the wages paid to such inmates shall not be less than those paid as union wages for work of similar nature in the locality in which the work is to be performed.

(c) Any inmate of any such institution so employed shall be entitled to receive, after deductions authorized in subsection (d) of this section or under any other law, wages earned by him in performing such work, except that, such wages shall be made available to such inmate at such time or times as the Attorney General may by regulation prescribe, but in no event later than at the time of his release by parole or otherwise, from confinement in a Federal penal or correctional institution.

(d) Any inmate so employed shall be required, pursuant to regulations promulgated by the Attorney General, to pay from the wages received for work in accordance with this section, and the Attorney General is authorized to deduct therefrom—

(1) such costs incident to the inmate's confinement as the Attorney General deems appropriate and reasonable;

(2) such amounts to the dependents of such inmate as the Attorney General deems appropriate and reasonable; and

(3) such amount to any Federal fund established by law to compensate victims of crime, as the Attorney General deems appropriate and reasonable, but in no event in an amount in excess of 10 per centum of such wages earned during any calendar month.

(e) Any amounts deducted by the Attorney General pursuant to paragraph (1) of subsection (d), shall be deposited in the Treasury of the United States as miscellaneous receipts. Any amounts so deducted pursuant to paragraph (2) or (3) of such subsection, shall be payable in such manner as the Attorney General may by regulation prescribe. The provisions of section 4126 of title 18, United States Code, shall not be applicable with respect to any such amounts so deducted pursuant to this Act.

(f) In administering the provisions of this section, the Federal Prison Industries, with the approval of the Director of the Bureau of Prisons, is authorized, as a part of, or in connection with, any agreement pursuant to subsection (a) of this section, to make available, by lease or otherwise, land (together with improvements thereon) located within the exterior boundary of any Federal penal or correctional institution for use by the private party to such agreement for providing employment in accordance with this section. Such lands (including improvements) shall be made available pursuant to such terms and conditions as the Director of the Bureau of Prisons may prescribe.

(g) Nothing in this section shall be construed to prohibit the sale to the public of any products produced by inmates of Federal penal or correctional institutions in accordance with the provisions of this section, and the provisions of section 4122 of title 18, United States Code, relating to competition with private enterprise, the provisions of the first paragraph of section 4123 of such title, and the provisions of the first paragraph of section 4123 of such title, and the provisions of section 1 of the Act of January 19, 1929 (45 Stat. 1084), shall not be applicable with respect to industrial operations under this section. The provisions of section 1761 of title 18, United States Code, shall not be applicable with respect to any such products shipped in interstate or foreign commerce.

(h) As used in this section, the term "person" means any individual, corporation, partnership, association or other entity.

(i) On or before the expiration of the twenty-four calendar month period following the date of the enactment of this section, the Attorney General shall submit a report to the Congress concerning the administration of the provisions of this section, together with his views and recommendations with respect thereto.

Sec. 2. (a) The Commissioner of the District of Columbia is authorized to establish and carry out, within the exterior boundary of any one penal or correctional institution under the direction of the Commissioner of the District of Columbia, a demonstration type project involving the employment of inmates of that institution. Such projects may also provide for the provision of supportive services to inmates of the demonstration institutions, such as training, education, counseling, and the like. In establishing such project, the Commissioner is authorized to enter into an agreement (by contract or otherwise) with any private person pursuant to which such person shall be authorized to establish (by construction, lease, or otherwise) facilities within the exterior boundaries of such penal or correctional institution for the purpose of carrying out industrial or other operations herein authorized, notwithstanding the provisions of section 436 of title 18, United States Code. *Provided, however,* That the employment within such institutions of inmates shall be on a voluntary basis within such institution.

(b) Any such agreement shall contain provisions assuring that the wages paid to such inmates shall not be less than those paid as union wages for work of similar nature in the locality in which the work is to be performed.

(c) Any inmate of any such institution so employed shall be entitled to receive, after deductions authorized in subsection (d) of this section or under any other law, wages earned by him in performing such work, except that, such wages shall be made available to such inmate at such time or times as the Commissioner of the District of Columbia may by regulation prescribe, but in no event later than at the time of his release by parole or otherwise, from confinement in a District of Columbia penal or correctional institution.

(d) Any inmate so employed shall be required, pursuant to regulations promulgated by the Commissioner, to pay from the wages received for work in accordance with this section, and the Commissioner is authorized to deduct therefrom—

(1) such costs incident to the inmate's confinement as the Commissioner deems appropriate and reasonable;

(2) such amounts to the dependents of such inmate as the Commissioner deems approriate and reasonable; and

(3) such amount to any Federal fund established by law to compensate victims of crime, as the Commissioner deems appropriate and reasonable, but in no event in an amount in excess of 10 per centum of such wages earned during any calendar month.

(e) Any amounts deducted by the Commissioner pursuant to paragraph (1) of subsection (d), shall be deposited in the correctional industries fund in the Treasury of the United States, established pursuant to the first section of the Act of October 3, 1964 (D.C. Code, sec. 24–451). Any amount so deducted pursuant to paragraph (2) or (3) of such subsection, shall be payable in such manner as the Commissioner may by regulation prescribe.

(f) In administering the provisions of this section, the Commissioner is authorized, as a part of, or in connection with, any agreement pursuant to subsection (a) of this section, to make available, by lease or otherwise, land (together with improvements thereon) located within the exterior boundary of any District of Columbia penal or correctional institution for use by the private party to such agreement for providing employment in accordance with this section. Such lands (including improvements) shall be made available pursuant to such terms and conditions as the Commissioner may prescribe.

(g) Nothing in this section shall be construed to prohibit the sale to the public of any products produced by inmates of any such penal or correctional institution in accordance with the provisions of this section, and the provisions of section 4122 of title 18, United States Code, relating to competition with private enterprise, the provisions of the first paragraph of section 4123 of such title, and the provisions of section 1 of the Act of January 19, 1929 (45 Stat. 1084), shall not be applicable with respect to industrial operations under this section. The provisions of section 1761 of title 18, United States Code, shall not be applicable with respect to any such products shipped in interstate or foreign commerce.

(h) As used in this section, the term "person" means any individual, corporation, partnership, association or other entity.

(i) On or before the expiration of the twenty-four calendar month period following the date of the enactment of this Act, the Commissioner shall submit a report to the Congress concerning the administration of the provisions of this section, together with his views and recommendations with respect thereto.

Sec. 3. There are authorized to be appropriated such sums as may be necessary to carry out the provisions of this Act.

By Mr. ERVIN:

S.J. Res. 258. A joint resolution designating October 8–14, 1972, as "Newspaper Week" and October 14, 1972, as "Newspaper Carrier Day." Referred to the Committee on the Judiciary.

HONORING THE NATION'S NEWSPAPERS

Mr. ERVIN. Mr. President, Thomas Jefferson once remarked:

> The basis of our government being the opinion of the people, the very first object should be to keep that right; and were it left to me to decide whether we should have a government without newspapers, or newspapers without a government, I should not hesitate a moment to prefer the latter.

Most Americans would agree with Thomas Jefferson's view that a free press is essential to any free society. Newspapers and other forms of communication have enabled the American people to determine for themselves whether government is serving the best interests of the country. They have added greatly to the social, intellectual, and spiritual horizons of us all. Despite some attempts by government over the years to quiet or intimidate the press, our Nation continues to be enriched by an active, independent, and robust free press.

In recognition of the vital role which a free press has in our society, I am introducing a joint resolution entitled "Designating October 8 to 14, 1972, as 'Newspaper Week' and October 14, 1972, as 'Newspaper Carrier Day.'" Congressman CLARENCE J. BROWN, of Ohio, has introduced the same resolution in the House of Representatives.

It is my understanding that the first National Newspaper Week was held in October 1940. Since that time, professional news associations have joined in an effort once a year to emphasize the importance of newspapers to America. In the past, the President of the United States has designated the week during which recognition is given to newspapers. In my opinion it is appropriate for the Congress to join the President in honoring this Nation's newspapers.

I ask unanimous consent that the text of this proposed joint resolution be printed in full at this point in the CONGRESSIONAL RECORD.

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows:

S.J. RES. 258

Whereas it is an important part of freedom and democracy for people to be well informed about current events and matters that affect their lives, and

Whereas newspapers historically and traditionally have been the basic news medium for informing citizens of the United States in greatest detail, and

Whereas the Nation's more than nine thousand weekly and daily newspapers provide vital information of economic, educational, social, and political value to the citizens of the Nation, and

Whereas more than five million public and parochial school students annually receive instruction through newspaper-in-the-classroom programs using newspapers as text material for many different subjects, and

Whereas the newspapers of the Nation have donated much space for community and national service campaigns without charge, and

Whereas newspapers have always contributed to the cause of protecting consumers and improving consumer education and information, including rejection of much unacceptable and unreliable advertising, and

Whereas over six hundred thousand young men and women serve more than seventy million newspaper subscribers of the United States as independent, responsible junior business executives in delivering newspapers to homes and families, and

Whereas improved people-to-people communications and understanding through newspapers are keys to a better future for all citizens, and

Whereas newspapers are continuing to prove themselves to be the full information medium needed for a free and open society: Therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That October 8–14, 1972, be observed as Newspaper Week '72 and October 14, 1972, as Newspaper Carrier Day by the Congress of the United States of America on this — day of 1972.

By Mr. PERCY:

S.J. Res. 259. A joint resolution to authorize the President to designate the period from March 4, 1973, through March 10, 1973, as "National Nutrition Week." Referred to the Committee on the Judiciary.

SENATOR PERCY REQUESTS PROCLAMATION OF NATIONAL NUTRITION WEEK

Mr. PERCY. Mr. President, recent years have witnessed a tremendous increase of public interest in the subject of the nutritional adequacy of the foods we eat. Americans have come to realize that it is not only the quantity of food we eat that determines our health and well-being, but also the quality of what we eat. We are learning that it is possible for our bodies to be starving for essential proteins, vitamins, and minerals even though we eat three meals each day.

Studies have shown that many of the most popular food products on the market are entirely lacking in nutritional value. Fortunately, the public is gradually coming to realize that the most widely advertised products and the foods that are marketed in the brightest, boldest packages are not necessarily the foods that are most supportive of good health.

Despite the gains that have been made, however, much effort still needs to be devoted to providing the American public with an adequate education in the field of personal and family nutrition. Many Americans still do not realize how vitally necessary good nutrition is to basic good health. And only a minority among us fully understand that a balanced diet not only helps to prevent illness but is conducive to vitality of mind and spirit as well.

Furthermore, among those Americans who understand the benefits that good nutrition can bring, far too few are cognizant of the necessary ingredients of a balanced and nutritious diet. Not only is it important to select foods with a sufficient amount and variety of nutrients each day, but proper food preparation is also essential to good nutrition. While a person may conscientiously try to provide himself with a balanced and varied diet, he may unwittingly be ignoring some essential nutrients as well as unknowingly depleting the nutritional value of his meal by the common practice of overcooking.

It is my hope that with the encouragement of Congress and the administration, concerned groups and organizations will pursue activities especially intended to make known to all Americans the importance and the necessary components of good nutrition. Further, it is my hope that with this encouragement, individual Americans will take the opportunity to educate themselves and their families regarding good nutrition.

Therefore, Mr. President, I am pleased to introduce today a joint resolution calling for the designation of National Nutrition Week. I urge the support of my colleagues for this resolution in this further effort to end malnutrition in America. The proclamation of National Nutrition Week will also serve to honor the expanding field of professional nutritionists and dieticians. I hope that my fellow Senators will join me in taking this further step toward eradicating nutritional ignorance and naivete in this country.

Mr. President, I ask unanimous consent that the text of my joint resolution be printed in the RECORD.

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows:

S.J. RES. 259

Whereas good nutrition is of vital importance to the health and well-being of this Nation's citizens; and

Whereas many Americans are not yet aware of the importance of good nutrition; and

Whereas most Americans are not entirely familiar with the necessary composition of a nutritious diet: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the President is authorized and requested to issue a proclamation designating the period from March 4, 1973, through March 10, 1973, as "National Nutrition Week," and calling upon the people of the United States and interested groups and organizations to observe that week with appropriate ceremonies and activities.

ADDITIONAL COSPONSORS OF BILLS AND JOINT RESOLUTIONS

S. 325

Mr. BEALL. Mr. President, I am very pleased to hear that the Senate Armed Services Committee has ordered reported to the full Senate the survivors benefits legislation.

As the author of S. 325, the survivors benefits measure, which has 45 cosponsors, and as one who appeared before the Senate Armed Services Committee recently urging expeditious action on this "must" legislation, I naturally am pleased with this development. I certainly hope that the leadership will schedule this bill for Senate floor action as soon as possible so that this measure might be signed into law by the President.

I am pleased to announce that both Senators STAFFORD and BAKER have agreed to cosponsor S. 325, I ask unanimous consent that their names be added as cosponsors of this measure.

The PRESIDING OFFICER. Without objection, it is so ordered.

S. 3156

At the request of Mr. MCCLELLAN, the Senator from Florida (Mr. GURNEY) was added as a cosponsor of S. 3156, a bill to amend the Federal Property and Administrative Services Act to establish Federal policy concerning selection of firms and individuals to perform architect and engineering and related services for the Federal Government.

S. 3741

At the request of Mr. MATHIAS, the Senator from Illinois (Mr. STEVENSON) was added as a cosponsor of S. 3741, a bill to amend title 18 of the United States Code to promote public confidence in the legislative branch of the Government by requiring full financial disclosure by Members of Congress and certain employees of the Congress.

S. 3785

At the request of Mr. MATHIAS, the Senator from West Virginia (Mr. ROBERT

C. Byrd), the Senator from Florida (Mr. Chiles), the Senator from Hawaii (Mr. Fong), the Senator from West Virginia (Mr. Randolph), the Senator from Vermont (Mr. Stafford), and the Senator from Alaska (Mr. Stevens) were added as cosponsors of S. 3785, a bill to promote the sale and development of American arts and handcrafts.

S. 3872

At the request of Mr. Javits, the Senator from Hawaii (Mr. Inouye) was added as a cosponsor of S. 3872, the Japanese-American Friendship Act.

S. 3880

At the request of Mr. Schweiker, the Senator from West Virginia (Mr. Randolph) was added as a cosponsor of S. 3880, the National Diabetes Education and Detection Act.

SENATE JOINT RESOLUTION 243

At the request of Mr. Mathias, the Senator from New York (Mr. Javits) and the Senator from New Jersey (Mr. Williams) were added as cosponsors of Senate Joint Resolution 243, providing U.S. support for the United Nations Office of Disaster Relief.

LAND USE POLICY AND PLANNING ASSISTANCE ACT OF 1972—AMENDMENT

AMENDMENT NO. 1440

(Ordered to be printed and to lie on the table.)

Mr. BOGGS. Mr. President, I send to the desk an amendment that I intend to call up during the Senate's consideration of S. 632, the proposed "Land Use Policy and Planning Assistance Act of 1972." I submit the amendment on behalf of myself, as well as Senators Cooper, Muskie, and Tunney.

I ask unanimous consent that the brief text of the amendment be printed at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. BOGGS. Mr. President, the purpose and content of this amendment is very simple and direct. It is intended to assure States that they can and should establish a portion of their lands for the purpose of preserving and conserving natural resources for the future.

Title III of S. 632 authorizes the Federal Government to make annual grants to assist the States in developing and administering a State land-use program.

Section 301 lays out the basis for determining if a State is in a position to initiate such a program.

Section 302 establishes conditions for evaluating the process under which a State develops its land-use plan.

If a State is to receive continued Federal support for land-use planning after 3 full fiscal years following enactment, the conditions of section 302 must be met.

The Federal Government's determination on the adequacy of the State's planning process is made on a number of points, the third of which, beginning on page 73, line 22, reads:

> (3) projections of the nature and quantity of land needed and suitable for recreation and esthetic appreciation; agriculture, mineral development, and forestry; industry and commerce, including the development, generation, and transmission of energy; transportation; urban development, including the revitalization of existing communities, the development of new towns, and the economic diversification of existing communities which possess a narrow economic base; rural development, taking into consideration future demands for and limitations upon products of the land; and health, educational, and other State and local governmental services;

The amendment I am offering on behalf of myself and several colleagues would insert another phrase in that list. After the word "appreciation," which ends on page 72, line 24, the amendment would insert the phrase "conservation and preservation of natural resources."

This subsection requires that the statewide land-use process must include projections on the nature and quantity of land needed and suitable for a variety of purposes. We believe it is necessary to add language that will assure the consideration of "conservation and preservation of natural resources" in making these projections.

As reported, paragraph (3) of Section 302(a) relating to preparation of statewide projections of the nature and quality of land is limited to present or future developmental uses of land such as recreation, transportation, or urbanization. An inventory which does not include consideration of conservation and preservation—land set aside for no use at all—is inadequate.

It is our view that the conservation and preservation of natural resources must be weighed in any such evaluation of land use policy.

I believe this option is vital to preserve a proper balance in order to protect our environment for future generations. As paragraph 3 of section 302(a) is now proposed, it appears to me that a restrictive, or nonuse, classification could not be considered as an alternative. This amendment would make clear that States may establish such restrictive or "nonuse" classifications.

The intent of the bill should be a balancing one. The language we offer will assure such a balancing test and criteria.

EXHIBIT 1

AMENDMENT NO. 1440

On page 72, line 24, insert the following: before the word "agriculture," insert "conservation and preservation of natural resources;".

NOTICE CONCERNING NOMINATION BEFORE THE COMMITTEE ON THE JUDICIARY

Mr. ROBERT C. BYRD. Mr. President, on behalf of the distinguished Senator from Mississippi (Mr. Eastland), I announce the following nomination has been referred to and is now pending before the Committee on the Judiciary:

Frank D. McCown of Texas, to be U.S. attorney for the northern district of Texas, for the term of 4 years, vice Eldon B. Mahon, resigned.

On behalf of the Committee on the Judiciary, notice is hereby given to all persons interested in this nomination to file with the committee, in writing, on or before Tuesday, August 22, 1972, any representations or objections they may wish to present concerning the above nomination, with a further statement whether it is their intention to appear at any hearing which may be scheduled.

NOTICE OF HEARING ON INDIAN BILL

Mr. BURDICK. Mr. President, on behalf of the Senator from Washington (Mr. Jackson), I wish to announce for the information of the Senate and all other interested parties that the Subcommittee on Indian Affairs has scheduled an open public hearing for September 12, 1972, on S. 3377, a bill to extend the time for commencing actions on behalf of an Indian tribe, band, or group.

The hearing will be held in room 3110, New Senate Office Building, and begin at 10 a.m.

NOTICE OF HEARINGS BY THE DISTRICT OF COLUMBIA COMMITTEE

Mr. EAGLETON. Mr. President, I wish to announce hearings on Thursday, August 17, 1972, at 9:30 a.m. in room 6226, New Senate Office Building, by the District of Columbia Committee on the following:

Nomination of H. Carl Moultrie, of the District of Columbia, to be an associate judge, Superior Court of the District of Columbia;

Nomination of Stanley S. Harris, of Maryland, to be associate judge of the District of Columbia Court of Appeals; and

S. 3861, to convey to the city of Alexandria, Va., certain lands of the United States, and for other purposes.

Persons interested in testifying on these matters should contact Mr. Gene E. Godley, General Counsel, in room 6222, New Senate Office Building.

NOTICE OF HEARING ON NEW JERSEY AND NEW YORK COMPACT

Mr. ROBERT C. BYRD. Mr. President, on behalf of the distinguished Senator from Mississippi (Mr. Eastland), I announce that a special subcommittee of the Committee on the Judiciary has scheduled public hearings for Tuesday, September 19, 1972, at 9:30 a.m., in room 2228 New Senate Office Building, on the resolution, Senate Joint Resolution 54, granting the consent of Congress to the States of New Jersey and New York for certain amendments to the waterfront commission compact and for entering into the airport commission compact, and for other purposes.

Notice is hereby given to all persons interested in this resolution of this public hearing.

The subcommittee consists of the Senator from Mississippi (Mr. Eastland), chairman; the Senator from Arkansas (Mr. McClellan) and the Senator from Nebraska (Mr. Hruska).

ADDITIONAL STATEMENTS

SALUTE TO A GREAT AMERICAN

Mr. McINTYRE. Mr. President, I wish to pay personal tribute to a man in my hometown of Laconia, N.H., who epitomizes loyalty, devotion, dedication, and service to his country.

I speak of Dr. Richard H. Whitehead, the man who helped to build the Panama Canal; a man who has given nearly three-score years of his life to serving the best interests of the United States of America.

Dr. Whitehead, who is 85, has been ill in recent weeks, but is now recuperating at home. I take this occasion to pay him homage and to thank him, in behalf of his fellow countrymen, for all that he has done for us.

On July 26, Mr. President, an interview with Dr. Whitehead was published in the Manchester, N.H., Union Leader. That interview attested, once again, to the professional competence of a man who was once described by the builder of the Panama Canal, Gen. George W. Goethals, as "the greatest living engineer." Of equal importance, the interview also attests to Dr. Whitehead's unceasing concern for the canal and its most effective use.

Specifically, the interview reports Dr. Whitehead's assessment of a just-published book, "The Panama Canal, 'Heart' of America's Security." Dr. Whitehead takes issue with author Jon P. Speller's advocacy of the modernization of the waterway.

Mr. President, I am not an engineer, so I would not presume to comment on the substance of Dr. Whitehead's views. My purpose today is simply to make just recognition of his many contributions and his devotion to his country, and to express my personal respect for him and my appreciation of his friendship.

I ask unanimous consent that the Manchester Union Leader's interview with Dr. Whitehead be printed in the RECORD.

There being no objection, the interview was ordered to be printed in the RECORD, as follows:

LACONIA MAN WHO HELPED BUILD FAMED CANAL TAKES ISSUE WITH AUTHOR'S VIEWS—NEW BOOK ON PANAMA CANAL REVIEWED

(By Earl O. Anderson)

LACONIA.—"The American public has been misled to believe that the (Panama) Canal is obsolete, and only a sea-level canal would suffice . . . the best course to take with our unsettled economy is to leave the canal alone, keep intact our rights, and give consideration to increased tolls."

That is the reply of a man distinguished in many fields, who helped to build the canal some six decades ago, to a just-published book by Jon P. Speller which advocates the modernization of the waterway.

Dr. Richard H. Whitehead of this city, now 85, was once described by Gen. George W. Goethals, the man responsible for building this vital artery to world commerce, as "the greatest living engineer."

Whitehead, in an exclusive interview with this newspaper, claims that the real purpose of the book is "to eliminate the locks on the Pacific side, replacing them further south with a combined set of locks, then to build additional new and larger locks, and an 85-foot dam on the outskirts of Panama, to form a new, terminal lake, at unnecessary expense, to replace the present small Miraflores Lake."

The elevation is 54 feet, it was explained, between the Miraflores and Pedro Miguel locks, fed largely through the (Gaillard) cut.

This book, it was contended, serves to promote the so-called "Terminal Lake Plan," backed by U.S. Sen. Strom Thurmond (R) and U.S. Rep. Daniel J. Flood (D), in a bill now before Congress, for canal modernization."

These men are, however, commended as "able, capable, congressional leaders" by the book's critic.

Its author is also described as "rightly opposing" the proposed treaties that would give the Canal Zone to Panama and operate it under dual authority.

SEES NO MERIT

"As the engineer who organized the Pedro Miguel and Miraflores lakes and operating forces and tested out and put into service the lock-operating equipment, and was initially in charge of the Pacifica Locks." Dr. Whitehead asserted flatly, "I regard the Terminal Locks plan without merit."

"Incorrect and misleading" were terms used by him regarding the book's statement that the bottleneck of the canal is the Pedro Miguel locks.

"Pedro Miguel, located at southern entrance to the Gaillard Cut," explained Whitehead, "with its emergency dams, safeguards the Pacific side of the canal from the waters of the Great Gatun lake, has the capacity of the other locks, and a good safety operating record."

"CHOKEPOINT"

The "real chokepoint", he maintains, was Gaillard Cut, which he points out has been widened from 300 feet to 500 over a period of years, permitting former "clear cut" ships to pass each other.

"The former 'able' Governor Leber, who completed this work," noted Whitehead, "has plans for further reasonable expenditure that will greatly increase canal capacity without new locks.

"Larger locks will never be large enough to handle 'super' ships being built," the canal engineer firmly believes," and the cost would be exhorbitant, and borne by regular traffic, under present legislation requiring the canal to be self-sufficient."

Such additional costs would greatly increase tolls on present shipping, it is maintained, "probably to an amount that would decrease present traffic."

An increase of 25 per cent would, however, in Dr. Whitehead's opinion, probably have small effect on the traffic.

"We have had no increase in tolls since opening of the canal in 1914," recalled the man who helped to construct it, 'with the recent devaluation of the dollar, an increase should be made, to also provide larger payments to Panama, because of this devaluation."

GREATLY IMPROVED

It is now evident that during its many years of heavy transits, the canal has not only been greatly improved, but it is today an "ideal, cheap and efficient" waterway," Whitehead asserted.

"It is a main artery vital to our national defense and economy," he emphasized.

"No consideration has been given . . . to a like waterway across Lake Nicaragua," pointed out this man of many accomplishments.

"It would cost no more than the just-completed Arkansas River Development," he contends, "and would likewise create wealth exceeding its costs, besides bringing New Orleans (La.) 560 miles closer to San Francisco."

The best course to take, with the nation's unsettled economy, the canal engineer said he is convinced, "is to leave it alone, and keep our rights intact."

Dr. Whitehead said that he regards the Speller book, entitled, "The Panama Canal, 'Heart of America's Security," as of "no contribution" to present works, and says that it fails to give valuable references.

"It does not even mention George W. Goethals, the builder of the canal, recognized as such by Congress," Whitehead noted.

(It does however, dedicate the book "to the builders, operators and defenders of the Panama Canal.")

CITES PURPOSE

Author Speller says in his foreword that purpose of the 164-page volume is to "simplify the issues" revolving around the Panama Canal.

"No great issue has been subject to such confusion as has this one," asserts Speller.

Much-needed modernization of the canal, he claims, has been delayed, due to attempts to cloud the issues. Speller voices the hope that his book "will cut through the fog of confusion" and help passage of those bills related to the canal's improvement, which he says have been "thoroughly studied and prepared."

"If it can serve to remove the current 'impediments' to their passage," concludes Speller, "it can represent, in my belief, a contribution to the future security of ourselves, our children and future generations of Americans."

Dr. Whitehead cited a visit by him only last year to the Panama Canal, and what he observed.

"I spent several weeks on the canal," he stated, "and discussed future plans with top echelon officials and engineers in charge.

"I was much impressed with the handling of 300,000 ton ships through the Pedro Miguel locks by the new towing locomotives," he added.

"After over 50 years of service," Whitehead observed, "we have a fine, modern canal," with a capable organization and greatly-increased capacity.

"We should hang on to it, and give up no measure of control," he made clear. "We have served well all of the nations using it, and traffic has developed beyond anticipation by the capable builders."

The prosperity and capability of Panama, by the same means, has been helped by the canal, he said, together with "our benevolent attitude" toward their well-being, and the fact that they are on the cross roads of the continent in a "dollar economy."

"We and Panama need each other," emphasized this canal builder, who has achieved prominence in so many fields. "So every effort should be made to 'keep alive' the policies that have brought such prosperity to Panama, and made the canal a vital artery to world trade."

RETIREMENT OF GORDON F. HARRISON, STAFF DIRECTOR, COMMITTEE ON RULES AND ADMINISTRATION

Mr. CASE. Mr. President, early in my service in the Senate, I became a member of the Committee on Rules and Administration. Gordon F. Harrison was then its staff director, and I remember well his courtesy and helpfulness in making me feel at home with the committee and its work. Always affable and a mine of information about the committee, Gordon served five committee chairmen with dedication and loyalty. As the present chairman of the Rules Committee already noted, if Gordon has any weakness at all, it is his inability to turn any fellow away from his door.

He will be greatly missed, not only by the committee and its staff, but also by the host of friends he has throughout the Senate.

THE GENOCIDE CONVENTION AND AMERICAN PRISONERS OF WAR

Mr. **PROXMIRE.** Mr. President, the day for Senate debate and action on the Genocide Treaty is finally in view. Unfortunately, an old but persistent argument against the treaty is again surfacing in the press. It is being charged that if we ratify the Genocide Treaty, we will be opening up an avenue for the conviction of American prisoners of war on charges of genocide.

This contention is a fear not founded on the facts. Mr. Eberhard P. Deutsch, a prominent member of the American Bar Association, appearing before a subcommittee of the Committee on Foreign Relations, has provided us with strong words to the contrary. He has stated:

> I do not believe that the United States of America will ever be charged truthfully, properly or justifiably with the commission of genocide as such.

Ratification of the Genocide Convention will not subject our fighting men to any new hazards. An enemy power can charge an American prisoner of war with any crime that it dreams up. Acceptance of the Genocide Convention does not change that situation.

Mr. Nicholas Katzenbach, who as a former Attorney General is well qualified to give an opinion on this matter, has clearly stated that agreement to the treaty will present no new dangers for our American troops.

Mr. President, it is quite clear that our ratification of the genocide will not endanger the American prisoners of war. Therefore, I strongly urge that we ratify the Genocide Convention.

DISTRIBUTION OF INCOME AND WEALTH

Mr. **HARRIS.** Mr. President, for more than 30 years both Republicans and Democrats have agreed on how the country should be run. To correct gross inequities caused by our economic system, the Federal Government should provide subsidies to citizens aggrieved. And for the past 30 years political debate has centered in the size of the subsidy with the Democrats tending to be more generous and the Republicans more conservative.

The problem, however, is that the subsidy system does not work. I am the first to admit that so long as our economy remains unreformed, the system is necessary. We cannot ignore poverty or unemployment. We have to do something about these problems and until we have better tools, we must make use of those we have. Even so, can anyone contend that existing policies have been very successful?

Increasingly, a few far-sighted men are attempting to get at the deeper issues. They are pointing out that if our economy had a more equitable distribution of wealth and income, as well as more real competition, then there would be far less need for the Federal Government intervention which so alarms many in our society. They note that if we are dissatisfied with the results of government intervention, the answer is not to end that intervention when we do not have anything to put in its place but to study and implement proposals to alter and improve the distribution of wealth and income in the country and to establish real competition.

With these points in mind, I invite the attention of Senators to two remarkable documents. The first is an article published in the July 2, 1972, Minneapolis Tribune about the attempts of the wealthy and famous Pillsbury family to carry out real and meaningful change in America. The second is the commencement address by the Honorable Luis A. Ferre, Governor of Puerto Rico at the Graduate School of Business at the University of Pittsburgh on August 4, 1972.

The article on the Pillsbury family is remarkable because young Charles Pillsbury is a fervent McGovern supporter, while his father George Pillsbury supports President Nixon. Yet despite these political disagreements, they both agree that the fundamental problem facing America is the maldistribution of wealth and income.

The turning point in the father's point of view came when he retired from the business world and decided to manage his family investments while devoting most of his time to charitable works. To his astonishment, he accumulated more wealth at a faster rate than while he was employed. It made him understand why a Harris poll showed 68 percent of Americans now subscribe to the notion that the "rich get richer and the poor, poorer." In the words of wealthy George Pillsbury, "the fact of the matter is it's true." George Pillsbury now believes we must find ways to diffuse wealth-holding patterns in our society, so that a majority of Americans and not just a few gain access to "income producing property."

This is also the revolutionary concept behind Governor Ferre's Proprietary Fund in Puerto Rico. The idea is to make every worker the private owner of the wealth of the country. Like George Pillsbury, Governor Ferre would consider himself a political conservative, but I believe both have understood something about human nature. Over the long run, no system is viable which steadily concentrates more and more wealth in the hands of a few. It is possible that the wealthy can be persuaded to distribute some of their wealth to working people through progressive taxes. But even this system is unstable over the long run because it asks the majority of the people to become the charitable wards of a handful of rich people. The only real answer is a more democratic distribution of real property in the country. By this we do not mean naive leveling but institutional pressures which guarantee that the present trends towards increased concentration can be halted and a new trend toward wider distribution of ownership established.

I urge all Senators to read the Tribune article and Governor Ferre's commencement address with care. Both documents raise questions which should now be before Congress. Instead we must commend a progressive businessman and an imaginative Governor for their willingness to experiment with new ideas.

Mr. President, I ask unanimous consent that the two documents be printed in the RECORD.

There being no objection, the documents were ordered to be printed in the RECORD, as follows:

TWO PILLSBURYS GET TOGETHER ON A POLITICAL THEORY: FATHER, SON BELIEVE WORKERS MUST BECOME CAPITALISTS ALSO

(By Bernie Shellum)

A funny thing happened to George Pillsbury after he let go of his big executive's paycheck and dropped out of the big business world to tinker with his family's investments and do good works for the 99 percent who have to make do with less.

What happened? He accumulated more wealth at a faster rate than he had before.

That just proved to him that his 24-year-old son Charles had been right all along, while he was only half-right; it is ownership, not just production, that must be expanded if the gap between the rich and the poor is to be narrowed.

Until the 50-year-old Pillsbury altered his thinking, there had been, in his son's words, "heated debates."

Like the typical businessman, George Pillsbury had argued that the proper task of industry is to "make a larger pie," that is, to produce more goods which would find their way into more and more hands.

"A lot of good that does," Charles Pillsbury was wont to reply, "for people who don't own a piece of the pie." He viewed the mere expansion of production as a formula whereby: "the rich get even richer and the poor get the crumbs."

But now the father—a Republican for Richard Nixon—and the son—a Democrat for George McGovern—see eye to eye.

Together they espouse "universal capitalism," which involves a fundamental restructuring of the economy. It's so far-reaching it makes McGovern's so-called radical program to redistribute wealth look like a welfare dole.

In his presidential campaign, McGovern advocates an annual federal payment—something like $1,000—to every man, woman and child, regardless of income or assets, to increase the purchasing power of the poor and the tax liability of the well-to-do.

To Charles Pillsbury, whose support for McGovern rests on his criticism of the defense budget, the candidate's economic program "is for the birds."

"McGovern's only talking about redistribution of income," he said last week in a joint interview with his father.

"McGovern is no threat to a Bruce Dayton (board chairman of Dayton Hudson Corp.) or a J. Paul Getty (billionaire oil man). He's a threat to the professional—the doctor, the lawyer—who has a high income. He cuts into that, but he's not touching the very rich."

Both George and Charles Pillsbury, heirs of one of Minnesota's oldest families, count themselves among the very rich, defined as the 1 percent who derive more than half their income from investments.

Being political realists, they have no intention to pool their holdings, or to propose that the government confiscate those of other wealthy owners as part of some altruistic scheme.

"If you divide up what everyone has now," said the younger Pillsbury, "there wouldn't be enough to go around."

He asserts, and his father vehemently agrees, that it is essential to "slow this irrational accumulation of wealth by the wealthy, and to allow those who have nothing—who have no property at all—to gain access to capital, to income-producing property."

In Charles's dictum, "If capitalism is good for a few, then it's good for everyone."

It is the objective of his father, a Conservative state senator from Orono, to make "universal capitalism" the policy of Minnesota's government.

Then corporations no longer would raise almost all of their new investment capital by the orthodox issuance of new stock or borrowing from large institutions, the system that now serves to enrich further those few who have the most wealth.

Rather, in George Pillsbury's words, something like this would take place:

"When a company, such as the Pillsbury Co., needs additional capital, instead of going to the market place, instead of going to the present owners, you set up an employee stock ownership plan and you give the employees a chance to own the additional equity.

"They and the company would set up an employee stock ownership trust. The company would issue the new shares of stock that it needed. Say it needed $10 million; it would issue $10 million of Pillsbury stock, at market value, to the trust.

"In turn, the company and the trust would go to a lending institution and borrow the $10 million. It would be given to the trust and the company would guarantee the repayment of the loan. The trust, in turn, would give the $10 million to the Pillsbury Co. in payment for the stock that was issued.

"Now the company has $10 million, the trust has $10 million worth of Pillsbury stock and it has a note. It owes the lending institution $10 million. Over the ensuing years, the company would pay into the trust dividends on the stock and up to 15 percent of its payroll."

Janitors, clerks and top executives would share the ownership of the stock in relation to the size of their paychecks. Once the $10 million debt was paid off, the dividends would pass through to the employee-owners, who would have become capitalists the same way most rich people do—on borrowed money.

During a visit to Minnesota about two weeks ago, the origial architect of "universal capitalism," Louis Kelso, informed George Pillsbury and the other members of the Legislature's Reconversion Study Commission that there is no end to its applicability. With variations, it can be used, Kelso said, in corporate farming, even on behalf of government bureaucracies.

Corporations are turning more and more to stock ownership, he said, "to motivate their labor force, to raise low-cost capital, to prevent labor union pressure demanding more and more pay for less and less work, to eliminate the alienation that reflects itself in our society in dope-taking, hijacking, bombings, sabotage, wasting materials, lousy craftsmanship and a thousand other ways."

Some of these maladies were on George Pillsbury's mind, too, last week. The Harris Survey had just reported that 68 percent of Americans now subscribe to the notion that "the rich get richer and the poor get poorer," compared with 48 percent who did so in 1966.

"The fact of the matter," Pillsbury said, "is it's true."

It has been two years and eight months now since George Pillsbury left the Pillsbury Co., founded by his grandfather in 1869, "to do my own thing and to work in the public sector." Before retiring, he had observed that "the blue-collar worker who owned Pillsbury stock thought differently from the union member who didn't," however small his holdings. But Pillsbury failed to persuade the other directors to broaden employee ownership of the company.

Eighteen months ago Charles Pillsbury, a Yale student who attained notoriety as a critic of corporations that supply arms for Vietnam, received in the mail a copy of Kelso's "Two Factor Theory: the Economics of Reality."

Initially, he said, "I thought it was from a nut." But eventually he showed it to his father. "It reconciled to some extent the heated debates that we would have over the division of wealth in the world," Charles said.

Now George Pillsbury describes the Kelso doctrine as "very sound," and he is trying to persuade the Reconversion Study Commission to recommend it.

Through "universal capitalism" he sees the prospect of "a more stable country."

"How can a man be politically independent," Pillsbury asks, "if he has no security? And what gives a man or woman security but ownership of property?"

In that outlook, too, he has an ally in his son Charles, a conscientious objector and the founder and leading force of the Council for Corporate Review, a Minneapolis organization striving to make corporations more alert to social concerns.

"I see my own political independence, my own outspokenness as based on my total economic security," Charles said. "There's not much that anybody can do."

COMMENCEMENT ADDRESS BY THE HONORABLE LUIS A. FERRE, AT THE GRADUATION EXERCISES OF THE GRADUATE SCHOOL OF BUSINESS OF THE UNIVERSITY OF PITTSBURGH, AUGUST 4, 1972

Chancellor Posvar, Dean Zoffer, distinguished members of the faculty, members of the graduating class of the Graduate School of Business, ladies and gentlemen:

It is for me a very special honor to be able to address you today. I say that, because the invitation to speak to you was issued to me on the recommendation of the student executive board. I have given a few commencement addresses before, but never had I been asked to do so by the students themselves. It is a tribute of which I shall always be particularly proud and I thank the members of the student body very sincerely for asking me to be here today.

For the past twenty years we have witnessed a revolution in our means of communications. The tremendous improvements in television broadcasting coupled with the use of satellites, make it possible for three or four hundred millon people throughout the world to watch a particular event simultaneously. Such was the case of the first lunar landing and the world championship soccer game played in 1970. But the improvements in our means of communications have also brought about a wave of rising expectations and, unfortunately, our socio-economic systems have not been able to keep abreast of this increase in the expectations of our people. The result has been the mounting unrest which we see in all of the world today.

Finding the way to effectively meet these rising expectations will be the greatest challenge that you will face when you enter the business world. It is a challenge which you will have to meet quickly because the improvements in communications are bringing about an instant consciousness not just of lunar landings, but also of hunger and of great disparities in wealth, not only within every country, but also between the different countries all over the world.

The communist solution to this problem has been to put all wealth in the hands of the state. But in so doing, socialist countries have found that they have destroyed the incentives that move men to produce greater wealth and at the same time they have destroyed individual liberty. Under such societies, regimented under a tyrannical order, the outcome has been a distribution of scarcity.

To meet this challenge of rising expectations we need a virtual revolution in our socio-economic structures, a revolutionary change which, while keeping the advantages of our system of free enterprise and private property and without destroying individual freedom, will enable all our citizens to achieve equality in their opportunity to fulfill their aspirations. Speaking to the national Press Club in 1969, I described my political philosophy as being "revolutionary in ideas, liberal in objectives, and conservative in methods". The institution about which I will speak today fits this phrase pretty well; the objective of making every worker the private owner of the wealth of the country is sufficiently new and untried so as to call it liberal, if not revolutionary. But the method of achieving this objective, namely, through existing financial institutions, and while maintaining our system of private enterprise, is traditional enough to be called conservative.

In spite of all its defects, capitalism is still the most effective economic system yet devised by man for creating wealth. This is amply demonstrated by the recent announcements that an American oil company has entered into a large contract with the Russian government for the exploration and development of an oil field in Siberia and the subsequent announcement that one of our aircraft companies will be selling airplanes and spare parts to the Chinese Government—nevertheless, the wealth that our capitalistic system has created is still concentrated in the hands of a relatively small portion of our citizens. In a world of increasingly rising expectations this can only be a source of friction unless we do something about it.

This proprietary fund for the progress of Puerto Rico, is our way of doing something to correct the uneven distribution of wealth in our system. It is based on the idea of changing our present utilitarian capitalism to what I call altruistic capitalism. The mere production of wealth should not be the ultimate goal of capitalism, though it is very important to maintain its incentives to do so. The production of wealth should be a means to a higher goal. In our constitution we have stated the three natural rights of man: life, liberty and the pursuit of happiness. Through our capitalistic system and our scientific and technological progress, we have guaranteed the right to life to the vast majority of our citizens; through our democratic institutions we have guaranteed our liberties—but the pursuit of happiness has been sadly forgotten. And today, we find ourselves surrounded with material goods, but with our lives spiritually frustrated and with our world on the verge of an ecological collapse.

It is the young people who have sensed the great danger; it is they who are forcing us to re-examine our goals and it is their refusal to continue accepting our established patterns as unchangeable that has started a reappraisal of the goals of our society.

There is nothing wrong with capitalism per se. But its present goal of merely increasing production, without any consideration of its social impact, is wrong.

Unfortunately, the rejection of strictly utilitarian capitalism, has produced a backlash against our technological progress which again is wrong. Technology and science are neither good nor bad. They are not value bearing activities. It is the use that man puts them to, which makes them good or bad. We must evaluate their uses from the point of view of their social significance and their ecological impact. We cannot forget that the population of the world today is 3.7 billion people, which is three times the population of the year 1850, and that it will be 6.5 billion people by the year 2000. Certainly such an increase in world population needs the help of our present technology to assure its survival, for without present technology, industry could not provide enough food, clothing, housing and other essentials to satisfy its needs.

Thus, the world you are entering upon graduation is a world which needs basic changes in its structures, viewpoints and goals. It has excellent tools to work with: creative capitalism, democracy, science and technology. It also has rich values: compassion, love and respect for human life and dignity. The latter must become the goals of the former if humanity is to survive. This is the challenge to the young people of today. They must probe new ways to obtain this purpose, amongst which is the turning of valueless utilitarian capitalism into value-rich altruistic capitalism. Capitalism should become a means and not an end. Its goal, within our free society, should be the efficient production of wealth to satisfy the material needs of man, distributed with a deep sense of social justice, in order to give life spiritual richness. The old dictum, the greatest good for the greatest number, should become the greatest good for everybody.

The proprietary fund is a step in this direction. It proposes to correct the shortcomings of the present economic order and to substitute instead a more equitable economic order in which all of the people participate in the production and enjoyment of goods and services not through employment alone but also through their individual ownership of productive capital. In this respect, the propietary fund is perhaps more of a social measure than an economic one, though it has a great potential for stimulating our economy.

Let's take a look now at how the fund works. First of all, it will have a board of directors consisting of twelve members, initially, they will be appointed by the Governor of Puerto Rico, but a mechanism is provided so that after three years the shareholders of the proprietary fund will be electing six of the twelve directors. All directors will serve a two-year term.

The actual management of the fund will be in the hands of a president, to be selected by the board of directors. It is our intention to go into the ranks of the financial community and obtain the best possible professional talent for the position of president and for his staff. It will be their job to operate the fund in a strictly professional, business-like way, so as to obtain the best possible benefits for the stockholders.

The proprietary fund will have two classes of stock: Common stock, without par value, and convertible preferred stock of a par value of one dollar per share. The preferred shares shall be entitled to a cumulative preferred dividend of seven cents per share per year. The shares will be available only to residents of Puerto Rico which meet certain requirements spelled out in the law.

The preferred shares are, in effect, a means of financing a person's participation in the proprietary fund. They will be available only to workers who earned not less than $800 nor more than $7,800 the preceding year and whose income from other sources did not exceed $1,000 for the previous year (unemployed persons may not purchase these shares). The common shares will be available to any worker resident of Puerto Rico whose income the previous year did not exceed $18,000. The reason for so limiting the number of persons who may participate in the fund is that the fund is designed to help only those workers who cannot acquire capital by ordinary means. It is felt that any one with an income of over $18,000 should acquire capital through the available market mechanisms, without any special help from the government.

Once an eligible worker has indicated, in a special form that the fund will provide, his desire to purchase preferred shares, and his eligibility has been ascertained, he will be issued fifty dollars in preferred shares which will in turn be matched with fifty dollars of common shares that the government of Puerto Rico, through the fund, will purchase for this person. The purchase of the preferred shares will be financed, at the election of the purchaser, through loans from banks, which loans will be arranged by the fund. The common shares will be issued free to the purchaser of the preferred shares but will serve as collateral for the loan that the purchaser made in order to buy the preferred shares. The dividends from both the preferred and the common shares will be applied to repay the principal and interest on each loan. If a loan is not repaid within five years, the government undertakes to pay its outstanding balance and all dividends on the corresponding shares will be applied to repay the amounts advanced by the government.

This plan, which we have called the commonwealth co-investment plan, is the heart of the proprietary fund. It is the motor that drives what I call our vehicle for achieving a better distribution of wealth in Puerto Rico. Quite frankly, although the proposal has been the subject of some criticism, we are very confident that it will be a great success.

Through the co-investment plan, the worker will be able to purchase one hundred dollars of stock without using even one penny of his pay or his savings. We expect that the shares will increase in value so that after a period of eight or ten years he should have acquired, without using any of his own funds, a relatively significant participation in the wealth of his economy, and a participation which, if he continues to elect through the years, could become a substantial one for him.

Obviously, the success of the fund will depend on the success of the institutions in which it invests. We have quite a number of both small and large corporations in Puerto Rico which have been very successful, and which have produced extremely favorable returns. We have actually approached some of the more successful ones and they have indicated their willingness to make large blocks of their stock available to the fund. Furthermore, the fund itself will be exempt of all taxes, and gains realized in selling to the fund equity in business enterprises will be exempt from income tax. Through these means we expect the fund to earn enough money to pay out dividends to both its preferred and common stockholders.

Dividends paid on the shares of the fund shall not be subject to income tax for the stockholder. Similarly, the acquisition by the fund of common shares for a qualified worker under the co-investment plan shall not be treated as income received by the worker. Once a worker's shares pay out the loan he made to purchase those shares, they will begin to provide the worker a tax-free annual return which can grow into a substantial source of additional income for that worker.

The proprietary fund should be such an attractive proposition to the persons eligible to participate in it that we expect that all eligible workers will want to participate. Unfortunately, Puerto Rico does not have enough resources at this time to allocate to the fund enough money to allow every qualified worker to participate. Therefore, the bill creating the fund provides an order of priority of participation. The order of priority will be in inverse relation to the workers' income; that is, the first ones chosen to participate will be workers who earned $800 the previous year, and so forth, until the Government appropriation for such year is used up. For the first year we propose an appropriation of $10,000,000 which we estimate will cover about twenty to twenty-five percent of the eligible workers. Hopefully, the Government will be able to increase its appropriation as time goes on. In addition, as the fund grows, its own funds should become available for the co-investment plan.

As far as the mechanics of operating the fund are concerned, we realized early that banks would be very reluctant to undertake the financing of thousands of small, fifty dollar loans. In order to cut down the paperwork and make it as simple as possible, the bill creates a statutory short form which, in a single document, will constitute an application for a loan, an agreement to subscribe to shares of the fund, a power of attorney to the fund to apply to a bank for a five-year loan and to execute and deliver to the bank, on behalf of the applicant, the necessary promissory note and other legal documents. It will also constitute the broadest authorization to the fund to take whatever measures are deemed necessary or convenient to properly implement the financing plan. We envision that the fund will process several thousands of these forms and then take them, in a single large block, to a bank and, in effect apply for one single large loan, rather than thousands of small loans. In our preliminary discussions, representatives of Puerto Rico's banks have indicated their belief that this procedure will make it feasible for them to finance the purchase of shares under the co-investment plan.

Time does not allow me to go into more of the details of our vehicle for achieving a better distribution of wealth. However, as I said before, there has been some criticism of the plan and I will like to discuss some of it. I must emphasize here that the proprietary fund is a dynamic concept, a new approach, which can and will certainly be the object of improvements. We do not pretend that it will instantly bring about a new economic order but we certainly believe that it can lead us to a more equitable distribution of wealth within our framework of private property.

First of all, the fund is not meant to tempt workers into venture equity investment. Its officers will invest only in proven enterprises and the bill provides limits to the fund's participation in any one company so that if one company should fail, only a small portion of the fund's investment will be jeopardized. Secondly, we feel that it is quite sound and proper to use a small (just over one percent) portion of our revenues as an incentive for the workers to save. I use the term save because the worker will not be able to touch his shares during the first five year period when they are not paid for; the proceeds of the loan he made will be invested for him by the fund, in the capital of our economy. In other words, the Government appropriation will increase capital investment.

It is true that low income classes have a lower propensity to save and that in such cases, a rapid redistribution of income results in more spending without any increase in savings. This has been pointed out by Professor Rosenstein-Rodan, formerly of M.I.T. and now with Boston University. It was after discussions with Professor Rosenstein that I began to conceive the details of the proprietary fund. In order to avoid the inflationary effect that a rapid redistribution of income would have, we have provided special mechanisms in the fund which will "freeze" the worker's investment for a period of time. In addition, a worker who sells his shares and pulls out of the program will be penalized for so doing, the penalty being that he will not be able to participate again for three years.

This will be another incentive to keep his investment in the fund.

We are also concerned with the possibility that a small group of persons might try to acquire a majority or a substantial number of shares of the fund. To avoid that, the bill will provide that no person may own at any time a number of shares greater than the maximum number of shares that could have been acquired by a qualified worker in all the years since the initial offering of shares by the fund. The only exception to this is with respect to shares acquired by inheritance. You can see that we have tried to keep it as "safe" as possible from speculators. Like I said before, we do not pretend that our proposal is perfect; we will welcome any changes that improve upon it. What we *do* claim is that it is a bold, new first step into what I already suggested should be your own goal: To re-orient our capitalistic system towards the solution of the inequities that exist in our present economic order and to maximize the income of every family and individual not only through opportunities for better employment, but also through feasible opportunities for acquiring ownership of productive capital.

Let me stress that I do not hold that this is the only solution to the problem of how to keep the creative power of capitalism, while giving it a social goal, and protecting the freedom of the individual. But as a practical business-man, a practicing politician and a person with an inquisitive mind that is not afraid to tread new paths, I think it is a step in the right direction. It may sound like a dream. But in Shakespeare's words: "Dreams are the stuff our lives are made of", and I add, only young hearts that have not lost their ability to dream, will find the ways to progress.

GOP PLATFORM SUGGESTIONS

Mr. GURNEY. Mr. President, to read the newspapers or to watch television, one would think that the GOP platform hearings now going on in Miami Beach are in the nature of a rubberstamp session—window dressing for a pretailored White House policy statement. The implication that this might be so, or that there is little or no room for alternative proposals and constructive debate, frankly concerns me.

I know that there are many, many Republicans like myself who are deeply concerned about what goes into their party platform. Given the importance of this election to the country and given the evidence that far too many Americans do not understand where the parties, or the candidates, stand on the issues, this concern is fully justified. The future of the country is too important a subject for there not to be the fullest possible discussion of the issues by all interested parties.

Because I am concerned about where we are headed and because I have some specific ideas as to the direction we should take, I have made a number of recommendations—10 in all—to the platform committee. These suggestions were submitted Sunday, however, the press of Senate business made it impossible for me to deliver them in person today. Therefore, for the benefit of Senators. I ask unanimous consent that they be printed in the Record.

There being no objection, the suggestions were ordered to be printed in the Record, as follows:

Remarks of Senator Edward J. Gurney, Republican Resolution Committee, Miami Beach, Fla.

I. INTRODUCTION

Mr. Chairman, when looking back over the course of history, certain dates stick out as being decisive. When 21st century historians write about 20th century America, they may well look back at November 7, 1972 as being one of those dates.

Judging from the positions taken by the Democratic Nominee and the posture adopted by the Democratic Party in its platform, Americans will have a real choice to make this November. Issues like isolationism versus internationalism, national security, the economy, welfare and tax reform, preservation of the environment, and domestic tranquility are of the utmost importance. There is a big difference between the promises of the Democrats and the record of the Republicans on these issues, the choice we make now will determine direction of this Nation for years to come.

A recent Harris Poll has indicated that a great many Americans do not understand the positions of Richard Nixon and George McGovern on the issues. Given the importance of the electoral decision to be made, this is a circumstance that needs to be rectified. Records are important, for in judging the qualifications of a candidate or of a political party, one must take into account what has been accomplished as well as what has been promised. As Roscoe Drummond, in his recent column entitled "Upside Down Politics" pointed out, the campaign theme of the party out of power invariably is "Throw the Rascals Out." Certainly that is the case this year. But, as Mr. Drummond notes, Democrats have controlled the White House for 28 of the last 40 years and Congress for 36 of the last 40 years. Yet, we have the Democrats condemning a war they got us into, attacking attempts to control an inflationary spiral they were responsible for, lashing out at tax loopholes they wrote into law, criticizing a crazy-quilt welfare system they have designed and promoted, and assailing Congress for not exercising its prerogatives when they were the leadership in Congress.

On the other hand the Republicans have a record of both consistency and accomplishment. The GOP platform in 1969 called for an honorable end to the war in Vietnam. Since then, Richard Nixon has withdrawn over 500,000 men from South Vietnam without compromising that nation's right to defend itself from Communist aggression. The GOP platform in 1964 called for an end to the draft. Since then, Richard Nixon has proposed a volunteer Army, a lottery system has been established, draft calls have been reduced and the end of conscription is in sight.

In 1964 and 1968, we Republicans called for a restoration of law and order in this country. Yet from 1964 through 1968, urban riots, campus disturbances and crime in the streets all increased. However, since 1969, under a Republican administration; the incidence of urban riots has dropped to practically zero, campus unrest has dwindled sharply, and an all out effort has been launched against crime in the streets. In Washington, D.C. for instance, the crime rate has dropped to its lowest point in five years.

Another hallmark of the Republican administration has been its commitment to reducing inflation and getting the economy going again.

From 1965 to 1969 inflation increased dramatically reaching a high of 6.1% the year President Nixon took office. Now, the latest economic reports show that it is down to 2.7%. In addition, real output jumped an incredible 8.9% last quarter. Employment has increased 2¼ million in the past year and the unemployment rate has declined from 6.1% just before the freeze to 5.5% in June. And, finally, real purchasing power—the true indicator of how much progress the workingman is making—has risen 4.5% since last August.

These figures are just one more example of the old adage about actions speaking louder than words. When the facts are presented to the people, I have every confidence they will recognize who got us into economic difficulty and who is getting us out, who makes promises and who delivers.

And what about the foreign policy initiatives undertaken by the present administration? For the first time since the days of the Eisenhower administration, the United States has gone on the offensive diplomatically. Instead of simply reacting to the initiatives of other nations, we have taken some major steps which could lead to a lasting world peace.

Of course, when dealing with the Communists, nothing is certain and, as the administration has so often stated, we have to keep up our guard, not only to protect ourselves, but also to give the Soviets the incentive to negotiate further. And what does the Democratic candidate offer—a 40% cut in our defense budget. If that were to happen, how would we live up to our commitments in Europe, in Asia, in the Middle East?

In foreign policy, the Republican position has been one of peace through strength. It has worked for us in the past, and there is no reason to think that it will not work well for us in the future. We have honored our commitments and have lived up to our responsibilities as a leader in the free world. To now turn our back on these responsibilities, to venture down the path of isolationism, would be a terrible mistake just as it was in the years before the outbreak of World War II.

Ours must be a positive policy for peace, but at the same time it must be realistic. In the last 4 years, it has been both.

What about the future? Well, as far as this Senator is concerned, we cannot afford to rest on the past. We must push ahead—in foreign policy, in space, in the field of transportation, and in dealing with the problems of senior citizens. We must assure all our citizens that they won't be discriminated against because of sex or color. We must provide for quality education while at the same time ending the senseless business of forced busing. We must tackle the task of bringing our court system up-to-date so that it can provide a fair and effective system of justice in today's modern world.

For the benefit of the Committee on Resolutions, I would like to go into these problems I have just mentioned in greater detail and make some suggestions as to what provisions the GOP platform should contain.

II. THE OLDER AMERICAN

The point has often been made, but it certainly bears repeating, that we Republicans are extremely interested in, and concerned about, the problems facing the older American. Certainly, the administration record over the last four years reflects not only that concern, but also a determination to do something about it. Now it is our job to suggest what should be added to what has already been done.

As a Senator from Flordia, I am particularly aware of the problems of senior citizens. Florida's pleasant climate has attracted many retirement families. As of 1970, almost 18% of the people of Florida were sixty-two or over. I am talking to these people all the time and I tell you that a greater effort than ever is needed to resolve their problems.

In the last sixty years, the number of older Americans in the United States has increased dramatically. In 1910, they comprised only 4.1% of the total population; now, they account for 9.9% If you add in the nearly ten million people between sixty and sixty-five, the percentage rises considerably. Moreover, many of these senior citizens live on very limited incomes—social security and perhaps a small pension—and they have been hurt badly by an inflation inherited from the previous Democratic administration.

To emphasize the point, a few statistics are perhaps in order. In 1970, about 3.6 million families have a person sixty-five or over as head of the household had incomes of less than $6,000 and almost half of these made less than $3,000. In addition, another 2.9 million senior citizens living alone or with nonrelatives had incomes of less than $1,500. No wonder some 20% of the Nation's 25 million poor are elderly.

In the field of elderly housing, it has been estimated that there is a need for between a million and a quarter and a million and a half new units. We also need to make it possible for the large number of senior citizens who own their own homes—some 70%—to go on living in those homes.

Medical costs and the cost of prescription drugs have also risen sharply. In the last five years, expenses for an average three month illness have risen 42%. Considering that 86% of all Americans over sixty-five have at least one chronic disease, the effect of such increases on limited budgets is painfully obvious.

What does the senior citizen on a fixed income do when faced by rising costs for food, drugs, clothes, housing and transportation? The answer, all too often, is to do without. This, despite the fact that when this nation adopted the social security program, it committed itself to providing a reasonable means of support for senior citizens in their retirement years. Older Americans have held up their end of the bargain. We cannot let inflation and changing patterns of family living deprive them of the dignity that is the cornerstone of a meaningful retirement.

Fortunately, President Nixon is fully aware of the income problem and its sweeping ramifications. As he so aptly put it, "If we fail to move here, the other battles will be impossible." And, he has acted. During this administration, social security benefits have been increased 46%, increases which I personally supported. Perhaps even more important for the future is the fact that the recent 20% social security increase also included a clause making future benefit increases automatic every time the cost of living rises more than 3% in one year. This will end, once and for all, the political football syndrome that has occurred in the past. Time after time, benefit increases have either been timed for political considerations or attached to other, unpopular legislation in the hopes that this attachment would insure passage. Given this cost of living provision, we should have no repetition of this kind of situation.

Public housing units for the elderly have been increased by almost 60% since 1968; a bill to provide for better nutrition has been signed into law; social security and medicare reform measures have been pushed; programs to enlist the energies of elderly Americans have been implemented; the first White House Conference on Aging in ten years has been held, and, perhaps most importantly, meeting the needs of our senior citizens has been made a top level national priority.

Where do we go from here? Well, first of all, the remaining sections of H.R. 1 dealing with social security and medicare need to be acted upon. This bill was proposed by the President three years ago, yet it still has to be voted on by the Senate. The Republican Party should go on record in support of those provisions which:

(1) Increase the earnings limitation for social security recipients to $3,000.

(2) Increase widow's social security benefits by 17.5%.

(3) Eliminate the existing medicare part B fee and

(4) Make individual members of retirement families over sixty, who are not now covered by medicare, eligible for it.

Just passing a long overdue social security benefit increase is not the answer to all senior citizen problems. Other things have to be considered.

For instance, another area of concern should be the provision of free prescription drugs to senior citizens. Reduced hospital costs won't do much good if the necessary follow-up medication is beyond the means of the recently hospitalized senior citizen.

Then there is the quality of health care. Demonstration projects and professional standards review organizations are needed to improve the quality of medical attention under medicare and, as the President has pointed out, stricter regulations are needed for nursing homes.

Housing, as I have indicated, is a problem, with rising property taxes a major difficulty. Expansion of Federal assistance to senior citizens who want to buy their own homes will no doubt help, but since 70% of our senior citizens already own their own homes, the President's actions in sponsoring revenue sharing and his promise to develop other property tax substitute proposals in the not too distant future are likely to have a far greater impact.

Another alternative that should be examined is the possibility of developing local senior citizens co-ops that could contract for home maintenance and repair services at lower cost. This would cut down on the physical and financial problems facing a senior citizen living in his or her own home.

Transportation, of course, is another major problem facing the elderly. In this regard, physical handicaps as well as income limitations must be considered. Programs such as the one being tried in Washington, which provides for reduced bus fares for senior citizens, will reduce costs, will encourage municipalities to provide transit vehicles that are safe for and accessible to older people and will help overcome the physical limitations of age—a combination that should promote the sense of self-sufficiency that is so essential if our senior citizens are to maintain their dignity.

To those who would argue that retirement communities offer a better solution, it should also be pointed out that senior citizens want to be an active part of society, not segregated from it. Many senior citizens look upon retirement as a time to contribute more to the community rather than less; to cast aside their talents and experience would be unfortunate not only for them but also for all those that they might overwise be able to help. Senior citizens may have special problems, but that does not make them different people.

One could go on almost indefinitely about various senior citizen problems. The party platform should discuss such things as home health care, tax problems, employment opportunities, legal services, consumer protection, and the necessity for controlling inflation. But, we might also consider these problems—and our response to them—in a broader context, with an overall theme, if you will, and that theme, I might suggest, should be dignity.

Older Americans have worked hard for their retirement and have unselfishly contributed a great deal to this Nation. They are not welfare cases and they are not looking for a handout. What they want, and it is certainly a reasonable request, is to get a return on their investment in this country. In drawing up this platform plank, the party should redeem that promise and ease the plight of those who have done so much to help make America the great Nation it is today.

III. COURT REFORM

For too long, the United States has lagged behind other nations of the world in its judicial system. For too long, justice in this country has been neither swift nor certain. Among the greatest crises facing the United States as a nation today is the desperate need for reform in this area; the tragedy lies in that this need continues to go unanswered.

When the situation gets so desperate that there is danger the legal system will simply cease to function, as has occurred recently in New York and Philadelphia—the response has been swift, but uncertain, un-coordinated and piecemeal. For true reform, an organized, well funded and well coordinated effort at all levels is not only crucial, but is absolutely essential, if our legal system is to even survive.

Basically, reform must cover all areas of our judicial system—civil as well as criminal, and it may involve actual elimination of some court activities, as well as the updating and streamlining of others.

It would be possible to speed up justice if we could actually remove certain procedures from their traditional place in the judicial system. There are certain matters which are, in effect, not really serious enough to be considered crimes at all, and these could be removed from our over-burdened courts, and handled more expeditiously by social welfare agencies and/or the various police departments.

Most traffic offenses—such as speeding—could be expedited by the arresting police department. For example, in the various State district courts in Rhode Island, one day a week is set aside simply for the "trying" of traffic "cases." Considering the fact that most individuals so charged pleaded "guilty" and payed the required fine, it is ludicrous in these days of legal turmoil to see a sitting judge, his clerk and bailiff, spending an entire day dealing with such offenses. All except the most major traffic offenses, those involving damage to persons or property, should be dealt with by the police, thus freeing these judges to deal with more important matters.

Similarly, "crimes" of drunkenness and vagrancy could be channelled through social welfare agencies which are far better equipped to handle these matters than an already overworked judge.

Much the same can be said of domestic relations matters, which originally entered the realm of the courts because of clashes between royal and ecclesiastical courts in England. In several states, "chancellors"—practicing attorneys appointed for that purpose—make decisions and grant decrees regarding divorces and other family law matters, thus freeing the courts from lengthy and often time-consuming litigation.

While delay in a civil suit, such as a traffic accident case, may be several years and may involve economic loss to all those involved, particularly the injured plaintiff, delay in a criminal action is far more serious, and often involves the loss of freedom for the accused. In criminal matters, "justice delayed" is truly "justice denied." A person ineligible for or unable to produce bail, may languish in jail for weeks or months, awaiting trial. Indeed, in cases of crimes whose penalties are relatively short periods of incarceration where the courts may subtract the time spent awaiting trial from the actual sentence, it is not unusual for the defendant to have spent more time before his trial, than his sentence would call for.

A number of diverse reforms are needed to effect a true speedup of the criminal justice system, from arrest through trial and sentencing.

In the United Kingdom, most individuals charged with criminal offenses, are brought to *trial* within sixty days of their *arrest*. Unfortunately, this is far from the case in this country, where an individual may wait a year before being brought to trial.

One reform in this area would require the court with jurisdiction over the defendant to drop all charges against any prisoner who—through no fault of his own—has not been brought to trial within a reasonable time of the date of his arrest. An exception to this rulewould be made where the individual had been charged with homicide.

This reform has been working in New York, California, Illinois, the District of Columbia, and the courts of the 2d Federal Circuit, composed of the States of New York, Connecticut, and Vermont. Basically it puts pressure on the prosecution to move as expeditiously as possible. Conversely, it is possible to put similar pressure on defense lawyers, requiring them to be ready and to avoid delaying tactics, by having them operate under a penalty of fine should they fail to be ready when the prosecution is.

In the criminal courts themselves, the abolition of the traditional "central calendar system: would speed up the operation of the system considerably, and hand down justice in a fairer manner. Under the central calendar, used in most large cities, one charged with a crime may appear before a different judge at each stage of his case, from initial hearing, through trial and final sentencing. Under this, the case is shifted from one judge's own calendar to another's, thus preventing any one jurist from acquiring a "feel" for the case and from rendering a truly fair judgment. Also, it is a time-consuming, paper-generating antiquated process which has no place in a modern judicial system.

The central calendar system, should be replaced by an "individual assignment" system under which each criminal case would be assigned to an individual judge at the outset, and this judge would be responsible for the case all the way through.

The reasonable time limitation coupled with the individual assignment system would greatly speed up the judicial process, particularly in the courts of our huge cities, where the crisis has been greatest and most serious.

In many areas, there is a severe shortage of manpower in the legal system. Judges, particularly at the local levels, are often over-worked and the courts themselves are poorly-managed, if it can be said that they are managed at all. Often, there are insufficient numbers of prosecutors to handle the work load. All courts are buried beneath a never-ending sea of self-generating paper, the location of the individual droplets of which is left to an antiquated system of file drawers and clerks.

While a large input of personnel at all levels is not the sole answer, more judges, prosecutors and supporting individuals in well-chosen areas is definitely one answer. The channeling of "victimless" crimes out of court would release large numbers of capable jurists for service in other, much more crucial matters.

The need for competent, capable court administrators is essential. Men, lawyers or not, trained specifically to deal with a complex system of opposing forces and ideas, tenuously held together by tradition and rules, and to make this system run, are a major part of the solution. The Republican Party must go on record in support of full-funding of regional facilities for the training and placement of skilled court administrators.

In areas where the crisis is not so great, the appointment and training of an administrative judge to oversee the courts is recommended.

Where prosecutors are at a premium, it is possible to invite former assistant district attorneys back to work on a per diem basis to assist in the disposal of cases. A number of young lawyers, particularly in our large metropolitan areas, began their careers in these positions, and their experience is invaluable and should not be allowed to go to waste in attempting to solve the current crisis.

The computer has proven successful in industry and government, and its value to the court system should not be overlooked. Whole case files can be reduced to microfilm or computer tape and can be located at the push of a button, instead of at the whim of a file clerk.

The Republican Party must go on record in full support of the funding of reform and upgrading of State courts. An office, similar to the law enforcement assistant administration, in the Department of Justice should be established for this purpose.

All these reforms should be pursued in a coordinated, well-financed manner. The crisis is so awesome at all levels that the time for scattered, poorly-funded attempts at reform must be over. The Republican Party and the Nation must recognize this fact, and we as a party and we as a Nation must not be afraid to take what some would see as radical action, and to spend what some would see as great sums of money in order to achieve true "equal justice under law."

The Republican Party should recommend a well-financed, coordinated, nationwide program to upgrade the administration of justice in the United States. Specifically, the Republican Party should go on record in support of the establishment and funding of a national office to fund and coordinate court reform programs at all levels of government, including the following:

A restructuring of lower-court jurisdiction to relieve judges of needless litigation in automobile, vagrancy and domestic relations matters.

A re-ordering of the criminal justice system so as to require that a criminally-charged defendant must be brought to trial within two months of his arrest, further requiring that if this is not done, that all charges against him will be dropped.

An increase in manpower, where needed, at all levels of the judicial system, including clerks, bailiffs and secretaries, as well as well-trained, competent jurists.

The employment of skilled, highly-trained professional court administrators in order to increase the efficiency of courts at all levels.

The use of part-time prosecutors in areas of heavy criminal litigation coupled with severe, present or potential, backlogs.

The maximum use of computerized and microfilm data retrieval systems in order to speed the processing of records and to eliminate the needless mounds of paperwork.

IV. BUSING

Ever since 1647, when Massachusetts adopted the first rudimentary public school law, Americans have recognized, ever more fully, that the twin objectives of education—increasing knowledge while transmitting culture—were essential to the development of a strong nation. Out of this realization emerged public school systems, compulsory school attendance requirements, and, starting in 1869, free pupil transportation laws—all implemented in the hope that better education would promote better citizenship.

Over the years, our system of public education has expanded and improved. Some of the biggest steps have been taken during Republican administrations. For instance, during the Eisenhower administration, the first big steps were taken to end the system of de jure segregation that deprived many black Americans of the chance to get a quality education at the school of their choice. During the Nixon administration more money than ever before has gone to improving the quality of education for all Americans; in 1973 we will be spending $12 billion more than in 1963. The Republican record, therefore, is clear; we take a back seat to no one in our commitment to provide every child access to a quality education.

However, when the Supreme Court ruled, in 1954, that "separate but equal" schools were unconstitutional, it was the intention of the Court to eliminate race as a factor in determining pupil assignment. In the Court's view, the practice of busing black children away from their neighborhoods to maintain segregation was to end, and no child was to be legally prevented from attending the school of his or her choice on the basis of color. That was a landmark decision, long overdue, one that overturned a long-time injustice being done to one group of our citizens and one that opened the way for all Americans to have access to a quality education.

Now, however, we have come full circle. Instead of having school boards that are colorblind with regard to pupil assignments, we have courts ordering school systems to assign and bus students in order to achieve a certain racial balance. Not surprisingly, we see that many black Americans find busing for balance almost as noxious as busing for segregation. To say that the black child can only improve himself academically by being bused to a white school is almost as obvious a suggestion of inferiority as was the idea that the black child was not good enough to go to school with the white. The only difference is that the first is grossly patronizing and insulting while the second is blatantly discriminatory. Neither idea is right and the former should be rejected as soundly as the latter has been.

This is but one argument, albeit a compelling one, against the forced busing of schoolchildren to schools not of their parents choosing. There are, of course, others, perhaps the most significant of which deal with the question of whether forced busing (1) raises the academic achievement levels of educationally underprivileged children or (2) improves the chances for mutual understanding. However, when put to the test, results show that forced busing accomplishes neither. According to a recent study published in the summer issue of *The Public Interest* by David J. Armor, Harvard University professor and former researcher for the U.S. Civil Rights Commission, achievement levels are not materially raised while, at the same time, racial tensions in the public schools are heightened.

This is certainly not the only study that leads to the same conclusion. Statistical studies done in California, New York and Illinois show that achievement levels have risen far less than pro-busers had expected and, in at least one case, they actually declined. And, as far as racial tensions are concerned, studies lead inescapably to the conclusion that forced busing makes things worse rather than better.

Now this is not to say that school integration should be thrown in the ash can. Far from it. People of good will in both races must redouble their efforts to make it work better. What it does suggest is that forced busing is not likely to contribute to either good education or better understanding.

As if these factors were not enough, there is also the matter of cost. Those who claim that busing for racial balance constitutes only a small fraction of pupil transportation costs forget that busing has heretofore been confined to the south and that, usually, the figures they quote do not include the massive forced busing of the last two years. In fact, forced busing is a very expensive proposition, one that takes millions of tax dollars desperately needed for new schools, more teachers and better equipment and wastes them on something that does nothing to improve the overall quality of education.

For example, in Los Angeles, school officials have estimated that the eight year plan they developed in anticipation of court ordered busing will require the busing of 196,000 children twice a day as compared to the 35,000 being transported now. The cost will be a whopping $180 million. During the first year alone, if Los Angeles were to use that money for $10,000 a year teachers, they could add no less than 3,600 of them to the school system.

In Richmond, Virginia, forced busing is already an expensive proposition. In April 1971 a court order forced the city of Richmond to bus 7,000 more students than the previous year, a move that required an extra fifty-six buses costing $500,000. Now, if Judge Mehrige's order is upheld, the metropolitan area will have to bus 78,000 out of 104,000 children—10,000 more than last year. School officials estimate that in Henrico County alone, the new plan will cost them two or three times the $743,000 now being spent on pupil transportation. This is only the initial cost. The big yearly driver and maintenance cost will be on top of that.

At Columbus, Georgia, an excellent example of misplaced priorities is apparent. Two years ago, pupil transportation cost the city about $365,000. This year the cost will be an estimated $720,000. The reason—a forced busing plan which has increased the number of pupils being bused from about 10,000 last year to over 14,000 now. And if this staggering increase—nearly 100%—were not sobering enough, consider for a moment the fact that the Georgia State Board of Education has recently termed twenty-two of the sixty-seven schools in the district substandard and has recommended that they be phased out. Nine of these schools are considered to be fire hazards. As long as facilities are substandard or unsafe, or schools are unaccredited, it seems only logical that every available dollar go to correcting these deficiencies.

Jacksonville, Florida, is a somewhat similar case. In that city, there has been a long, hard struggle to regain accreditation for their schools. A Federal Court Order, issued last summer, required that 12,000 additional school children be bused to achieve racial balance as soon as the necessary buses could be purchased. In practical terms, this means that next year over one million dollars that could have been spent further upgrading the schools will be wasted busing children an average of twelve to thirteen miles a day (some will have to go thirty-one miles). How does this enhance quality education?

Here in Miami, the situation may be even worse. Last winter, a Federal Court Order prompted the Dade County School Board to propose a county-wide plan that would have bused, over and above the 37,000 children bused already, 8,000 students next fall and 33,000 in the next five years—at a staggering cost of approximately $3.8 million. A school boycott caused the school board to drop that idea and submit a more modest proposal, but the precedent set by the Richmond decision makes it quite likely that another ambitious county-wide forced busing plan will be pushed upon Miami by the courts.

And finally, there is the case of Detroit, where a Federal judge, Stephen J. Roth, has ordered the State to buy 295 school buses, costing $3 million, so that an interim busing plan for Detroit may be implemented this fall as a prelude to an even more comprehensive plan that would affect 780,000 students in 53 school districts. Now, the 6th U.S. circuit court of appeals has stayed that order, but unless congressional action is taken to put an end to court ordered forced busing, sooner or later, this order, or one like it, is sure to be put into effect.

Another thing that must be considered is that forced busing, rather than overcoming segregation, is actually promoting it. In order to put their children in quality schools, many parents are moving away from areas where forced busing plans are in effect. The result is that once integrated schools soon become resegregated. Instead of helping matters, enlarging the scope of busing simply increases suburban sprawl and hastens the decay of the inner city. Unless the government starts regulating where we live—something I believe no government has a right to do—this process will continue. Forced busing can only make it worse.

And what about the students? How do they profit from spending two hours a day on a bus, riding into a strange neighborhood, when they could have gone to a school a couple of blocks away? How do they benefit from not being able to participate in school supported extracurricular activities because they have to catch the bus home? Who profits from a reduction in parent participation in, and support of, our public school system? How does a child get a better education when the school at the other end of the bus line is inferior to the one around the corner or when he or she suffers psychological disorientation from moving twice a day from one neighborhood to another? The answer to all of these questions is that forced busing does not benefit the child, the parent or the community.

The American people have certainly made their position clear on this issue. Recent polls have shown that a majority of blacks, and 70–75% of all Americans, oppose forced busing. In Florida, the vote ran 77% opposed to busing—in Tennessee, 80%. Wherever it has been implemented, busing has been opposed, not because Americans want a return to segregated schools, but because they see absolutely no point in sending their kids to a school across town when there is one, often a better one, right around the corner. Parents also recent, and rightly so, the fact that, after putting out a lot of money, perhaps their life savings, to move into a neighborhood with a good school, they cannot send their children to that school. All Americans—black and white—should have the right to send their children to the neighborhood school of their choice, to require otherwise represents a basic denial of individual rights.

Building a nationwide network of quality public school systems is no easy task. To accomplish it, we need to put all our time and resources to the best possible use. To that end, the Republican Party affirms its wholehearted support of all efforts that would promote quality education and expresses its determined opposition to those schemes which do not materially contribute to that objective. We support increased aid to public education and we favor compensatory programs that will upgrade those schools which need help the most, but we must oppose programs, such as forced busing, which deny all parents the basic right to send their children to the school of their choice.

V. THE EXPLORATION OF SPACE

One of the most shocking omissions in the platform approved by the 1972 Democratic Party Convention is the total lack of reference to the United States space program. In this, and in other respects, the Democratic Party and its chief national spokesmen continue to indicate their lack of appreciation for the necessity of pursuing advances in science and technology across the entire range of human experience.

The Democrats talk about the need for more jobs, they ring their hands over foreign competition, and yet their only solution to the employment ills of this country is to turn the Federal Government into an employer. Now in certain cases this may have merit, but I submit that if we do not continue to pursue excellence in the areas of science and technology all of us will be forced to turn to that employer of last resort, the Government. We might even reach the ridiculous position, which the new Democratic Party would probably consider gainful enterprise, of swapping food stamps back and forth.

Throughout history nations have either grown, developed and pursued technological advances or they have fallen by the wayside, relegated to the backwaters of history. Indeed the history of man is a continuous narration of one society after another building and progressing and expanding technological horizons.

If it were not for the level of technology we enjoy, our unemployment rate would not be the present 5% but would be a great deal higher. There is no doubt that we have problems in this country—the Republican Party has recognized those problems and the Nixon Administration has isolated them and proceeded to deal with them strongly and effectively, but to turn our backs on science and technology, to turn our backs on programs such as the space program, is not a solution but an acceleration of some of the problems.

In just one area alone—that of foreign trade—the results of this downgrading of technology would be disastrous. The American worker today is the highest paid worker in the world. By virtue of his skills, by virtue of his industry, he deserves that high salary. He deserves to continue to be the highest paid worker in the world. But, because of this, the American industry cannot compete in world markets in the area of low technology products, those products where labor costs are a substantial part of the total sale price. However, we can compete in areas of high technology where our labor force can apply highly developed skills and where our basic science and research potential are such that we offer a product that surpasses anything produced by any other nation.

This is the goal to pursue, to avoid a situation where our workers would be reduced to the level of wages paid in Korea or Hong Kong and to promote the active cultivation of markets for our communication satellites, our launch vehicles, and our airplanes.

One of the great pluses of the space program is that it pursues excellence in the areas of science and technology across the broadest possible spectrum ranging from fuel technology and metallurgy to communications and medical science. Lives are saved each day as a result of space program spinoffs. For instance, as a result of related medical advances today a cardiac victim can have his heartbeat monitored by a hospital while he is being carried to that hospital in an ambulance. In the hospital his heart is continuously monitored by a centrally located trained technician. This high quality care was a direct fallout and application of the space program.

Furthermore, it is estimated that 50,000 lives were saved during Hurricane Camille as a result of advance meteorological forecasting through the use of weather satellites.

And how do we place a value upon the use of communications satellites in places all over the world? Satellites placed in fixed orbit can be used to reach radios throughout scattered, isolated and remote villages and bring education and news to people who would otherwise never receive them.

Because of this, the Republican Party should make clear that one of the most important goals of the Nixon administration should be continued advancement in every area of science and technology, with particular emphasis on the importance of the space program as a means of increasing the knowledge of this Nation.

We also urge cooperation between all nations in the use and exploration of space for peaceful benefits for all mankind.

I believe strongly that we must continue technological development if our Nation is to progress. Historically those nations that have failed to develop their technology have lost their ability to maintain and raise the quality of life of their citizens.

Sir Bernard Lovell, director of Britain's Jodrell Bank Observatory, has offered a significant word of caution:

"If you look at the thousands of years of civilization, you will find that only those communities that have been prepared to struggle with the nearly insolvable problems at the limits of their technical capacities—these are the only communities, the only times, that civilization has advanced. The Roman Empire decayed when it ceased to be progressive in this sense, and there are other examples. To a certain extent, you see the beginnings of it in the United Kingdom today, but fortunately, not in the United States, and certainly not in the Soviet Union."

Throughout the history of man there have been doomsayers, those individuals who have said "Let us not go farther else we shall suffer destruction." I am sure these people were around when man first decided to harness the energy of fire. I am sure that they were around when the phoenicians developed ships to set sail and trade throughout the Mediterranean Basin. I am sure that there were gloomy defenders of the status quo in the court of Queen Isabella who told her that the money obtained from pawning her jewels could be better spent elsewhere, that she should not invest in Columbus' trip, because after all everyone knew that there was nothing on the other side of the world and that his venture would inevitably fail.

President Nixon has committeed this Nation to advances in science. He has done so by initiating such programs as the space shuttle. His commitment has been most wise.

I submit to you that the history of mankind is an uninterrupted history of the achievement of those who have ignored the doomsayers and brought increased benefits to all mankind. We as a nation cannot afford to turn our backs on the future. We as a nation cannot afford to abandon what technological superiority we still enjoy and retreat to the point where we become a second-class power, a nation increasingly relegated to the backwaters of history, a nation which cannot compete in space technology or, for that matter, in military might, or in trade competition with its neighbors.

The Republican Party must make clear its support for a national commitment in the area of science and technology, especially the space program, and strongly support the Nixon Administration in its establishment of a such a policy.

VI. TRANSPORTATION

In transportation efforts, our country has been concerned primarily with connecting separate urban centers by a continuous network of roads, waterways, railroads, and airways—with spanning our vast land area as quickly as possible. By means of both private and public investment, America, in the past century, has established a transportation system which, in the aggregate, is recognized as moving more goods and services to more people, more efficiently than anywhere else in the world.

The creation of this fundamental transportation system has been essential to the economic development of our country. The construction of highways, airports, and waterways has been rapid and on a grand scale, to enable necessary commerce and pleasure travel; but, it has been accomplished only with substantial social costs, which have only recently been recognized. The history of America's transportation development is marked with short-range, immediate goals, coupled with a failure to recognize future consequences of a national transportation policy that developed haphazardly.

Most of the existing situations which have now been recognized by local, State, and Federal bodies as pressing transportation problems could have been avoided if the history of federal involvement had demonstrated more consistency, more comprehensive analysis, and a more systematic approach. In the major effort to facilitate free, easy movement through the United States, the transportation programs of the Federal Government have failed historically to demonstrate comprehensive planning and efficient integration of various transportation modes. Highways have been built where rapid rail transit would have served better, waterways have been constructed where railroads would have provided better less costly service.

Urban congestion in airways and on highways could have been eliminated, or at least relieved, if resources had been channeled to providing larger capacity vehicles and carriers and to planning methods for reducing the number of peak hour operations.

The present financial distress of some modes of transportation (specifically, the railroad, airline, and maritime industries) has been aggravated by a history of specific tax relief measures which reflected no clear-cut federal concern for maintaining a competitive economic climate for all elements of the transportation industry. Furthermore transportation safety hazards persist with a history of federal reluctance in establishing industry-wide safety standards. Untold environmental damage has resulted from unwise decisions in constructing the nation's transportation system. Air pollution from auto, truck, and bus emissions, annoying noise pollution, water pollution from transportation projects and vehicle operations are imbedded in the fabric of our everyday life. Little use has been made of existing technology in reducing environmental damage in the development of a national transportation system.

The present Republican administration has made major contributions to unravelling the themes of federal transportation policy, to identifying need priorities, and to solving transportation problems requiring urgent attention. The 1970 airport and airway development act has enabled more than $1 billion in improvements of airport facilities and air navigation and traffic control systems. The 1970 urban mass transportation assistance act made $10 billion in federal funds available to initiate a national program of capitol investment in urban transportation. In the next four years, the administration must intensify efforts to consolidate federal resources which can be allocated for transportation purposes and to formulate consciously a national policy which gives greater flexibility to localities and regions in fulfilling their specific transportation needs.

The Republican party pledges:

(1) To Hasten the introduction of new technology into the nation's transportation system to improve the environmental effects of transportation development.

(2) To create a federal funding mechanism whereby regions and localities, whether urban or rural, can finance appropriate, tailor-made transportation systems, efficiently integrating the various transportation modes.

(3) To increase Federal efforts to eliminate traffic safety hazards by expanding Federal regulation of safety in highway travel.

(4) To formulate transportation policy with a full consideration of social costs of new airway, waterway, and highway systems.

(5) To rationalize the freight system with the intention of making rates more directly a function of cost in rail, truck, and barge industries, thereby increasing competition.

(6) To place greater reliance on collective bargaining and less on federal intervention in settling labor disputes.

(7) To identify the unique transportation problems of the elderly and the handicapped and to devote necessary federal research and implementation resources to effect solutions.

(8) To re-organize the government agency responsible for directing national transportation policy, giving it authority to develop a more comprehensive, better planned approach—including considerations of local, state, and federal goals in environmental quality, economic development and maximum safety.

VII. FOREIGN POLICY

All of us commend the President in his endeavors to reach agreements with the Soviet Union and with the peoples Republic of China that would assure future generations peace in this world.

The Republican party has made clear its support of such negotiations and agreements. However, the party should also make clear that those negotiations can only be successful, and can only be in the best interests of this country, when they are negotiated and entered into from a position of strength.

Both Republican and Democratic Administrations have learned that when a strong posture is taken the communists will back down, but that when the least sign of hesitation or weakness is displayed the result is detrimental to the United States. Since the end of World War II there have been numerous instances of this principle.

President Truman's Marshall plan, for example, counteracted the Soviet inspired revolt threat to Turkey and Greece and retained those countries within the western family of nations. In 1948 President Truman's swift airlift response to the Soviet Blockade of Western Berlin resulted in that city being saved by a takeover by the Communists.

The Dispatch of U.S. Marines to Lebanon in 1958 by President Eisenhower protected that country against the takover inspired by Moscow and Cairo.

The stand by the late President Kennedy over Soviet attempts to place missiles in Cuba in 1962 caused Moscow to back down and remove the missles from that island. And then in 1970 Swift Action by President Nixon (which included a visit to the 6th fleet) discouraged Soviet backed Syria and Iraqi troops from intervening in the Jordanian Civil War and helping dethrone pro-Western King Hussein. If this were not enough, the swift flow of events this past year have indicated once again the desirability and necessity of the United States taking a firm and decisive position on foreign policy matters.

In the far east, those democratic Doomsayers who seek capitulation as the only alternative to Armageddon raised screams of protest over the mining of Haiphong Harbor and the bombing of North Vietnam. They warned of all sorts of dire consequences ranging from cancellation of the Moscow trip to active intervention in the war by Communist China. Of coures none of the predictions have come to pass. Any student of 20th century history could have told them as much.

VIII. ISRAEL

In the Middle East our Communist enemies and their Arab satellites took as a sign of weakness the sincere attempts of the Nixon Administration to work out a compromise solution to the Middle East situation that would be acceptable to all parties. Once the Nixon Administration made very clear that this Nation would support Israel, would supply Israel with necessary military equipment and would not force her into any negotiations that would require a lessening of her needed security, what happened? The Arab countries protested somewhat and then kicked their Russian advisors out of Cairo.

The upshot of all this is that the possibility of face to face negotiations between the parties in the area to achieve solutions to their problems on their own without any outside interference and intervention has improved.

The Republican Party should go on record as recognizing the importance of the Middle East to the United States foreign policy and the necessity for blocking Soviet expansion to that area. It should also recognize the fact that this posture can only occur with two preconditions.

The first is that we maintain a very strong military presence in the Mediterranean, including a naval establishment in that ocean which is second to none. The second is that Israel should be made the cornerstone of our Middle East policy and that we should continue to make clear that we support that Nation in its attempts to attain permanent security and peace for itself and its neighbors. In implementing this, the second Nixon Administration should make it clear that any future settlement of grievances in the Middle East will have to be worked out by the parties themselves. We should support quite firmly the position of international law that international waterways such as the Suez Canal and the straits of Tiran must remain open to the shipping of all Nations and that no discrimination amongst Nations will be tolerated by this country.

We should oppose any efforts to divide Jerusalem, to return Jerusalem to its Arab administrators or even to make it an international city. Under Israeli control, the city, for the first time in recent history, has been open to all faiths; now Jews, as well as Moslems, and Christians are entitled to visit shrines sacred to all. The people calling for a change, whether it be restoration to the Arabs or internationalization, are those same people that remained totally silent during the long years when people of the Jewish faith were deprived of access to their holy places in that city. They do not bring their arguments forward with clean hands and they should not be countenanced. The Nixon administration should make it clear that the United States neither supports nor wishes any change in the control of Jerusalem.

Finally, the Nixon administration should be commended for taking the initiative in discussing with the Kremlin leaders the plight of Soviet Jews. The GOP should go on record in supporting all administration efforts to assist these unfortunate individuals in their desire to leave the Soviet Union and Communist oppression and emmigrate to Israel. We should also express our clear disapproval of the tactics employed by the Kremlin leaders in imprisoning and otherwise punishing Jewish citizens of that country who desire to escape to freedom. The Republican party fully supports the Nixon administration in all efforts to assist Israel in the resettlement of these individuals including direct aid and the use of counterpart funds for the establishment of centers for education and training.

IX. CUBA

Turning to our own hemisphere, the Republican Party should reaffirm its commitment of assistance to and cooperation with the nations of Latin America. At the same time, we should also reaffirm—in the strongest terms—our policy of political and economic sanctions against the dictatorial communist regime of Fidel Castro.

Back in October 1962, just prior to the Cuban missile crisis, Congress passed a resolution "that the U.S. is determined to prevent by whatever means may be necessary, including the use of arms, the Marxist-Leninist regime in Cuba from extending, by force or the threat of force, its aggressive or subversive activities to any part of this hemisphere; to prevent in Cuba the creation or use of an externally supported military capability endangering the security of the United States; and to work with the organization of American States and with freedom loving Cubans to support the asperations of the Cuban people for self determination." Such a statement is as applicable now as it was then and the Republican Party would do well to express its continued support of the principles contained therein.

We would also do well, in light of recent events and in view of the fact that the Democratic platform suggests re-examination of our policy towards Cuba, to express our opposition to any weakening in the U.S. policy of non recognition of, and economic sanctions against, Cuba.

It has been eleven years since the United States broke off diplomatic relations with Fidel Castro's Cuban government in response to Cuba's limitation of our embassy staff, the continuing stream of anti-American invective, and the expropriation, without compensation, of American property in Cuba. In that time, two things have become evident. First, there has been a concerted effort on his part to export violent revolution throughout the hemisphere especially to other Latin American nations who want no part of his brand of communism. Second, Castro has shown no indication that he (1) wants the U.S. to be anything other than a punching bag to use as an excuse for his domestic failures, or that he (2) will compensate Americans for losses suffered at his hands.

The record is quite clear as to Castro's responsibility for the breakoff in relations, and his persistence in widening the rift over the years. There also can be no doubt, as the governments of such nations as Costa Rica, Venezuela, Guatemala, Colombia, Bolivia, Uruguay and Brazil would attest, about Castro's long-standing efforts, dating back to 1960, to export his type of revolution to the rest of Latin America.

In spite of this record, and in spite of evidence that Cuban trained revolutionaries were involved in the kidnaping of the U.S. Ambassador to Brazil and the assassination of the U.S. Ambassador to Guatemala, there are some people who believe that Castro has reduced his efforts to export revolution to Latin America. What, in fact, has happened is that, instead of a reduction, there has been a shift in tactics from rural to urban terrorism. On a philosophical level, this shift has manifested itself in the replacement of the Guevara's Guerrila warfare by Carlos Marighella's Mini Manual of the Urban Guerrilla as the bible for revolutionary subversion; on a practical level it has meant changes in the guerrilla training programs being conducted by Castro. Instead of training a large number of revolutionaries as in the past, Castro gives a limited number of them specialized training in urban terrorism at one of the dozen or more Cuban run training camps. The reduction that some have perceived is, therefore, deliberate; Castro has concluded that there is more to be gained by sending a smaller number of better trained guerrillas to certain selected Latin American countries. According to recent estimates, there are about 2,000 of these revolutionaries now operating in Latin America.

Time and time again Castro has restated his intention to revolutionize the hemisphere. On April 19, 1971 he said that, before a truly inter-American system can function "There first must be revolution in each of the Latin American countries." And that "American revolutionary peoples can depend" on Cuba for support. On July 26, 1971, he said that revolutionaries "shall not make a single concession to imperialism" and that they "shall stand here firmly erect, raising our banners until the last Latin American nation is liberated." In August, 1971 he said "We have not repented one whit and the path we have followed up to today is the path we will follow in the future. And, following the visit of Soviet Premier Kosygin in October 1971 Castro hailed "An upsurge of revolutionary movement in Latin America." By now, the rest of the hemisphere should have gotten the message that the only type of recognition Castro wants is the type accorded a dictator by those unfortunate enough to have no other choice.

On September 16, 1971, Deputy Assistant Secretary of State for Inter-American Affairs, Robert Hurwitch, put the matter in its proper perspective when he stated, to the Senate Foreign Relations Committee, that "unless the Cuban Government were to abandon its policies and actions which constitute a threat to the peace and security of the hemisphere, the benefits to be derived from normalization of relations with Cuba are not readily apparent, whereas the costs are clear." Any reversal of this position would not, in my opinion, be in the best interests of the United States or of the rest of Latin America. Furthermore, continuation of our present policy of political and economic sanctions offers a greater prospect for success now than at any time in recent years.

I say this for two reasons. First, Cuba continues to be an economic drain on the Soviet Union and second, the Soviets may no longer, in view of recent events, be willing to assume such a burden indefinitely.

In the last 10 years or so, Communist bloc nations have given Cuba a total of $3.6 billion in economic assistance. Over $3 billion of that—$1.5 million a day—has come from the Soviet Union in the form of loans which are still outstanding. And, as far as the Soviets can see, there is little hope for improvement. Castro failed in his attempt to promote a 10-million ton sugar harvest in 1969–70 and the effort resulted in a much lower sugar crop last year and this year. Since sugar is Cuba's principal earner of foreign exchange, Cuba is likely to be dependent on Soviet aid for a while to come. About the only thing that could change that would be if the United States reestablished normal trade relations with Cuba and took the Soviets off the hook. In my view, that would be a mistake since there are indications that the Soviets may be coming to the conclusion that Castro isn't worth it.

One of the most striking things that has emerged from the President's trip to Moscow, has been the hint that the Soviets are interested in a relaxation of tensions—at least temporarily—between the United States and the U.S.S.R. If the Soviets are unwilling to run the blockage of North Vietnam, then it follows they may not be so interested in continuing to prop up a Cuban government that the Soviets know has been an aggravation to the United States. The Soviets are not ones to pour money into expensive projects that do not promote their own interests.

Therefore, if the United States and other Latin American nations continue their economic boycott, Castro may, as a result of Soviet aid cutbacks, be forced to make a choice—either explain to the Cuban people his failures or adopt a responsible or responsive attitude towards the rest of the Hemisphere. The possibility of forcing Castro into such a position requires that we continue political and economic sanctions; to ignore the opportunity would be to break faith with the OAS and with freedom loving people around the world, including some 650,000 refugees who have fled Castro's tyranny. The time has long since come for Castro to give up his dreams of revolution and to make good on the promise of freedom that brought him to power. The burden of proof is upon Castro; when he is ready to return Cuba to the Western Hemisphere, the Hemisphere will be ready to reevaluate him.

X. EQUAL RIGHTS FOR WOMEN

In 1923, nearly fifty years ago, the first equal rights amendment was introduced in Congress. During the decades that followed, the Republican Party has reiterated time and again its endorsement of the principle that "equality of rights shall not be abridged by the United States or by any State on account of sex".

In 1972, with the support of a Republican administration, Congress finally passed the equal rights amendment. We should commend this first step toward assuring constitutional protection for the rights of women. At the same time, we must recognize that congressional approval alone will not achieve our desired goal. Only upon ratification by the States can we truly begin to correct those inequities which have, since the founding of our Nation, relegated half of our population to second class citizenship.

It should be the goal of our party to secure ratification of the equal rights amendment.

In addition, we should seek effective promulgation and enforcement of equal rights laws. It is anticipated that there will be a need for ancillary legislation as well as modification of existing statutes at the various government levels. It should be our resolute intention to encourage reform in our legal system which will allow full compliance with the congressional intent of the equal rights amendment.

Discrimination on the basis of sex in the areas of education and employment must be eliminated. The Republican Party should vigorously support and undertake to achieve the following goals:

(1) Support the full and equal participation in the political and governmental process and especially support women seeking elective public office.

(2) No female shall be denied acceptance to any public educational institution on the basis of sex.

(3) Job opportunities, both in the private and public sectors, must be made available strictly on the basis of qualification to perform the given function.

(4) Wage laws must be worded to assure equal pay for equal work.

(5) Job promotion, advancement, tenure and salary increases must be given to women on the basis of performance and ability, as they would apply to men in comparable positions.

(6) Training programs of all kinds shall be available to women on a more equitable basis.

(7) Efforts must be made to ensure women a better representation in the higher echelons of Government service, appointed positions, advisory commissions, and special task forces.

(8) Women shall be given full and equal opportunities in any program, contract or grant utilizing Federal funds.

(9) Reductions in force shall not be made indiscriminately on the basis of sex.

One area adjunct to employment is that of protective labor laws. According to a labor department study, "The special restrictions originally designed to protect women now tend to discriminate rather than protect". The Republican Party should support a careful revision of these laws, to eliminate unfair restrictions on working women. Laws conferring maternity benefits should be made available to women who work.

We should support more equitable treatment of women relative to financial status, not only on the basis of wages, but also in the area of tax benefits and financial transactions.

Our present tax system should be adjusted to reflect fairer treatment of single women and working mothers.

Changes are needed in social security and other retirement benefits to allow just compensation for widows and their families and women heads of households.

In addition, we should support modification of regulations and laws which apply to financial transactions and contracts such as leases, property rights for married women, credit and financing procedures.

Finally, we must be prepared to assist those agencies, at every level of government, whose responsibility it is to see that equal rights are not violated.

We should be pledged to this program.

We should not be satisfied with mere token compliance.

We should not be satisfied with attempts to abrogate the intent of this amendment.

We should not be satisfied with anything less than full equal rights for the women of this country.

RETIREMENT OF GORDON F. HARRISON

Mr. JACKSON. Mr. President, with the retirement from the Senate of Gordon Harrison we have lost one of the most skilled, dedicated and honorable men with whom I have had the honor to be associated. Every Senator has benefited from the excellence with which this man pursued his work as chief counsel and staff director of the Senate Committee on Rules and Administration. He was appointed to this position by Senator Theodore Francis Green of Rhode Island shortly after I came to the Senate in 1952. A mark of this man's loyalty and dedication is that he continued to serve in this position through each succeeding chairman. These qualities coupled with the technical skills which span the entire gamut of Senate administration made him an invaluable source of guidance and counsel for all of us.

From Senator to newest Senate staffer Gordon Harrison always had time to help.

Mr. President, I want to take this opportunity to express my personal thanks to this exemplary lawyer, naval officer, Senate staffer, and friend for his years of public service. His retirement will leave a wide gap in our ranks. He will be missed.

ITT HOLDINGS IN MAINE

Mr. HARRIS. Mr. President, we have been shocked in recent months by ITT's activities in the Federal Government and in Chile. We should have known that that company would be active at the State and local level as well.

On August 8, the Wall Street Journal reported on ITT's efforts to buy up huge sections of the State of Maine. In typical fashion, the company refuses to state the purpose for which it is buying this land. This is a surprise which will be sprung on the residents of Maine sometime in the future, when it is too late.

I believe that other Senators will be interested in this latest piece of evidence on ITT's activities. I therefore ask unanimous consent that it be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

JUST EXACTLY WHAT ARE THOSE ITT GUYS UP TO IN MAINE WILDS? FIRM HAS BOUGHT LOTS OF LAND BUT WON'T HINT AT REASON; "JUST A BUNCH OF FARMERS"

(By David Gumpert)

EUSTIS, MAINE.—The pain in Maine lies mainly in the mystery: Namely, why is International Telephone & Telegraph Corp. buying up the state?

Well, not exactly all of it, of course, but in the past two years an ITT resources development subsidiary, Raymidga Co., has acquired large chunks of wild Maine backcountry and is seeking to buy more. True to form, ITT will say next to nothing about why it is buying the land. And Maine residents, mindful of the company's image as a memo-shredding, coup-plotting, behind-the-scenes mover and shaker, are getting downright jittery.

"I wouldn't be so concerned about it except it's so secretive," says Pat Fogarty, a community organizer in the Eustis area. Normally easy-going state officials also are edgy. "They're so huge, and we're just a bunch of farmers," frets one of them.

ITT's land lies just north of this tiny (pop. 595) town in northwest Maine, a largely untouched area of heavily wooded mountains and sparkling streams and lakes. The nearest commercial development, the Sugarloaf ski area, is 30 miles south. Over the years, the land has been held as reserves by lumber and paper companies, who were sellers to ITT.

IS ITT DROOLING?

"If I were a developer, that land would make me drool," says James Haskell, executive director of a state agency that overseas unorganized territory. Many Maine people suspect ITT is drooling, too, which is why there is renewed vigor in the continuing debate over conservation versus economic growth. That debate has added significance here because Maine's 10.6 million unsettled acres—nearly half the state—is probably the biggest expanse of unspoiled scenery in the Eastern U.S.

Exactly how much of it ITT controls isn't an established matter of fact. A spokesman says the company owns "around 50,000 acres" and is leasing an additional 21,000 that it hopes to acquire eventually; that adds up to 111 square miles. However, the state's Land Use Regulation Commission, Mr. Haskell's agency, says it understands ITT owns 45,317 acres and leases 9,000. And the Maine Bureau of Taxation's records indicate ownership of only 22,437 acres.

"This is what they've got, and this is what they're going to be billed for" in 1972 taxes, says an official with finality.

The biggest worry, though, is what will be done with the land. ITT's chief spokesman within the state, Fred Baird, rides around the Eustis area in a telephone-equipped Jeep, but he isn't very communicative. C. B. Cox, ITT's director of conservation, speaks of plans for "the long-term development of natural resources," and also mentions "a small wood industry" and "a timber management program." But when pressed for details, he says, "I'm really not in a position to go into it."

AIRPORT AND A GOLF COURSE

Fueled by this reticence, rumors and speculation fly. Among the guesses: a huge four-seasons resort; mines to extract some newly discovered mineral deposits; maybe even a self-contained "new city" on the order of Columbia, Md. A state official tosses out possible clues by saying that ITT has informally discussed building a golf course, an airport, multi-income housing and a manufacturing project that would use every bit of a piece of timber, down to wood chips and sawdust.

Except for this plant, the clues fit another popular theory—ITT plans to build a plush retreat for its executives. The company already has put up a hunting and fishing camp on its land. It apparently is near a lake because an amphibious plane flies executives and their guests to the camp almost every summer weekend, say airport personnel in Augusta, 100 miles south.

Whatever the plans, ITT has begun exercising its owner's prerogatives.

It hired a watchman and built a new log cabin for him and his family along the main dirt road leading in from the highway. A heavy chain is slung across the road at the house, and a woman comes out to tell unwanted visitors that if they proceed further it will have to be on foot. Several people with vacation cottages on ITT land have been told their leases have been canceled.

UNNEIGHBORLY RETALIATION?

However legal it may be, such treatment doesn't sit well with a lot of residents. They might respond with unneighborliness of their own, hints Linwood Rolfe, owner of a sporting goods store in nearby Farmington. In late summer, he says, forest fires become more prevalent and local residents are often recruited to help fight them in the unorganized territory. ITT might find such help hard to find, he says.

The underlying fear, of course, is that ITT will buy more and more land, despite assurances from the company's Mr. Cox that the only additional land it wants is that which it has under lease. But residents here find it easier to believe such folks as Basil Powers, a farmer who owns 200 acres near ITT's holdings. He claims to have heard that big landowners nearby have been pressured to sell. He expresses the rumor-fed bitterness he shares with many of his neighbors:

"This isn't going to be the state of Maine, it's going to be the state of ITT."

NATIONAL HISTORICAL PUBLICATIONS COMMISSION

Mr. ROTH. Mr. President, I am pleased to cosponsor S. 3899, introduced by the Senator from Rhode Island, to expand the work of the National Historical Publications Commission. For 5 years Senator PELL has ably represented the Senate on this Commission whose important work has largely escaped the public eye. The Commission's activities assisting in the collecting, describing, editing, and publishing of documentary sources important to American history—are likely to have a lasting influence on the way in which we interpret our country's history and traditions.

Perhaps it was President Eisenhower who best described the need for such a program when he said:

> The free world must have histories written by men and women in search of the truth—not by those seeking to rewrite the records of the past to their own advantage. This underlines the essential need of a broad and incorruptible supply of our Nation's documentary resources.

During the past decade, under the direction of its able and experienced Executive Director, Dr. Oliver W. Holmes, the Commission has been engaged in a program to make more broadly available the documentary resources of which President Eisenhower spoke. Its grant program has assisted in the publication of letters, papers, and other documentary sources relating to famous Americans such as Thomas Jefferson, John C. Calhoun, Henry Clay, Benjamin Franklin, Alexander Hamilton, Woodrow Wilson, Andrew Johnson, James K. Polk, Ulysses S. Grant, John C. Fremont, Jefferson Davis, George Mason, and John Marshall. The Commission has been able to undertake such an extensive program despite a very limited budget because these projects have attracted outside contributions from universities, foundations, charitable organizations, and other groups that are nearly double the Federal grants.

As the work continues, the words of the men and women who did the most to shape our Nation's institutions and values are collected from all the scattered and fragile source material and put on microfilm or in books where everyone can read them.

I can perhaps best illustrate the value of this work by referring to the papers of John Dickinson, a Delawarean, whose influential tracts and writings earned him the appellation of "penman of the Revolution." Some of the Dickinson papers are stored at the Historical Society of Delaware, where requests come in from researchers and historians from all over the country asking for information about their contents. Although Dale Fields, the executive director of the historical society, and his staff do their best to service these requests, it is impossible to provide all the information asked for, and every reference to the original papers contributes to their deterioration. From the point of view of those who write in, the specific letter or paper in which they are interested may not be in the historical society collection, but in some other collection, and they may have to write several letters before locating a document.

If these papers were available on microfilm or in a published form, they could easily be checked by the research scholar in his own library. Moreover, the added convenience would make it much more likely that the scholar would extensively consult the original documents, giving him a more thorough firsthand knowledge of his subject.

Mr. President, S. 3899 will make it possible for the work of the National Historical Publications Commission to continue in an expanded form as part of our observance of our Nation's bicentennial celebration. At this time, when we will be especially thinking about our country's future, it is important also that we reflect upon its past to remember and rediscover the ideas and principles that lay behind the American achievement.

REVENUE SHARING

Mr. SPARKMAN. Mr. President, a $30-billion revenue-sharing bill now before the Senate is currently stalled because of unresolved jurisdictional questions. I would hope that these questions can be cleared up quickly so that the Senate can move ahead with this extremely important legislation.

Revenue sharing is a concept whose time is long past due. It could well be the salvation of our cities and counties—many of which are on the brink of financial disaster.

Not only does this bill provide financial relief, but it also begins a trend of returning some of the power and authority of government to the local level. We must return some decisionmaking authority to those State, county, and local officials who are able and willing to provide solutions to problems facing their communities.

I also happen to believe that the Senate version of the revenue sharing bill is superior to the one passed by the House. In my own State of Alabama, this bill would provide some $127.6 million—or about $47 million more than was provided in the House-passed version of the bill.

Mr. President, we cannot afford to let this golden opportunity slip away from us. The bill will, I believe, pass overwhelmingly once it reaches the floor of the Senate. So I would hope that the unresolved questions about jurisdiction can be resolved speedily and that we can get on with the passage of what is truly historic legislation.

TAX REFORM

Mr. HARRIS. Mr. President, on August 3, I discussed with commentator Frank McGee, on the Today show, the problem of tax reform and other matters. I request unanimous consent that the interview be printed in the RECORD.

There being no objection, the interview was ordered to be printed in the RECORD, as follows:

SENATOR FRED HARRIS INTERVIEWED

FRANK MCGEE. One of the battles at the Democratic Convention last month was over tax reform. A minority proposal for repeal of the present income tax system, in favor of a more sharply graduated income tax, was defeated, but narrowly, and on a voice vote.

The idea of tax reform is not necessarily limited to the Democratic Party. Shortly after the Democratic Convention the Republican administration's leading tax expert, Undersecretary of the Treasury Edwin S. Cohen, suggested in Congressional testimony that Congress rewrite and toughen the tax laws so that wealthy persons would pay a greater share of federal income taxes.

Senator Fred Harris of Oklahoma, who joined with economist J. Kenneth Galbraith to promote the tax reform idea at the Democratic Convention, is with us this morning to discuss his tax proposals, and the larger subject, actually, the question of a redistribution of wealth in the United States

If I understand your position, you feel that this question, a redistribution of wealth, and the power that stems from wealth, will be the dominant issue in politics throughout the decade of the seventies. What leads you to that conviction?

Senator FRED HARRIS. Well, I do, and I hope that that's so. Actually, the reason why we're organized as a government is to better and more fairly distribute income, wealth, and power. Now we haven't said that as plainly as I think we ought to, but that's what it's all about. Because rich and powerful people, they can take care of themselves. What we want to do is to try to give people a better chance at what income and wealth buy—health, housing, education, and so forth. That's what government's about. But the fact is that we're doing a very poor job of it.

MCGEE. Is the idea here to try to get — aside from the merit of the ideas—is it to get money into the hands of the people directly rather than through, say, federal health programs, federal insurance programs, federal housing programs, and things like that?

Senator HARRIS. It's actually mixed. But we ought to focus on this business of income. For example, we're good at treating symptoms. So we look at, say, the problems of elderly people and we say, ah ha elderly people have—often have problems of nutrition. So why don't we have a food program? They have—a lot of them are having to give up breakfast or lunch to buy medicine. So why don't we give them medicine? Or they have very poor housing, many do. So why don't we provide housing?

Well all these things are important. But what we often miss is that income is what they lack. If you had income you could buy housing and health and medicine and nutrition, and that gives you more options too. I talked to an elderly fellow down in—my wife and I did—in one of those high rise housing projects in Miami not long ago. And he said, I have cataracts in both eyes, and he said, I can't shop anymore. I can't cook, I live alone. Why can't I take my food stamps to the cafe and buy prepared food? Well you think why can't he? And then you go past that and you think why can't he just have the money, and then he could do whatever he pleased. That, I think, would be a far better way. Of course, what we're talking about primarily with income is the right to a job and a decent income. And those who can't work or can't get work we think ought to have a decent income.

McGee. Well Senator, if this approach has merit, that you just give them the money and they'll take care of themselves, that is a kind of an abrupt turnaway, is it not, from the New Deal concept?

Senator Harris. It is. The thing you have to focus on is that there is a terrible maldistribution of income and wealth and power in this country. And as a result of that you have these terrible stresses and strains in our society. And this isn't—it's not just an economic matter, it's a social matter. We have a kind of social contract with each other. And we say that we're banded together in a society that's going to try to be fair with its members, and people ought to have some kind of fair chance for a job, and so forth. Now if that breaks down—if as is true the upper two percent hold eighty percent—own eighty percent of all the individually owned corporate stock in America, one hundred percent of all the tax exempt municipal bonds—if it's true that the upper one-fifth of our population has forty-one percent of the income—eight times the income of the lower one-fifth—then you can see that that social contract is beginning to kind of break apart.

And so it evidences itself in a lot of pathological symptoms—rising alcoholism, rising crime, rising use of narcotics, apathy and withdrawal, violence of various kinds, self destructive behaviour. Our tendency is to treat the symptoms, and that is important. But what's more important is to get at these terrible strains and stresses that are tearing the social contract apart.

McGee. Well if, as we suggested, that this is a departure from the New Deal concept, do you think that the problem is as aggravated—as pronounced today—as it was at the time that the New Deal concept for economic and social legislation came into being?

Senator Harris. Yes it is, and in many ways it's worse. You and I grew up down there in Oklahoma. I came from a background which by any standards would have to be called poor. We were working poor, but we were very poor. But that didn't seem quite so—quite so bad because nearly everybody I knew was poor as well. Now—a part of it is relative deprivation. But while we're the wealthiest country in the world, we have tremendously rich people—enormously rich people—we still have the working class people, and those who are poor—below the working class—that are left out. And their opportunities are far less to break out of that economic class today than they once were.

A good example of that is how industry has become more and more closely held, more and more concentrated, fewer and fewer big corporations now dominate the economy, and the worst example of the unfairness in the social contract and economically is the tax system. If the way we finance government is unfair, why then what is fair? And that's why we need to get rid of all these loopholes, many of which are rather recent in the law, and at least quit redistributing income in the wrong direction through tax breaks, through these huge farm subsidies, and other kinds of more hidden subsidies. We redistribute income in the wrong direction. And at least we ought to stop that.

McGee. Well given the opposition to really wholesale tax reform in the Congress, what makes you believe that's the best way to tackle this problem if we admit the problem exists?

Senator Harris. I don't think you'll do it through the Congress. First of all, you need a President. I support Senator McGovern because one of the main things he said is do something about this tax reform. And he's talked about redistribution of income and wealth.

But I believe that just as you didn't get progress on a broad range of fields like civil rights, the Vietnam war—ending the Vietnam war—the environment, women's rights through political action—or it didn't originate there—but it originated with citizens' movements, I believe the same must be done about calling this country to its main goal—a redistribution of income, wealth, and power, concentrating first on tax reform.

And so I'm head of an organization called New Populist Action which this fall I hope will have teach-ins around the country to call attention to tax avoiders by name, and how they avoid taxes, both property taxes and estate taxes as well as federal income taxes. And then I hope next spring we can put together a series of tax rallies, of demonstrations against and picketing of tax avoiders, perhaps even work stoppages, to build the kind of citizens' movement that the government cannot fail to respond to.

McGee. Well to get right down to it Senator, what effect is all this activity going to have on Chairman Wilbur Mills of the House Ways and Means Committee? Now he's the tax writer.

Senator Harris. Wilbur Mills is, of course, the man who knows as much about the tax system as any man in America. He's also shown, as with Medicare, revenue sharing, welfare reform, that he can respond and will respond to public sentiment. On all those issues, I believe, at one time or another Congressman Mills was against them. Now he—with the public sentiment having been demonstrated and built up—he at least in part is for all or some of those programs. And I believe that the Congress in our democratic society can be made to respond to an outraged citizenry. Seventy-four percent of the people said in a poll by Louis Harris last month that they believed that the rich were favored by the taxes, and that working class people were paying an unfair burden. Now that's something that we can build upon and make the government respond to.

McGee. We have very little time, but that's not a new attitude. That's an old complaint.

Senator Harris. That's true. Back at the turn of the century down in my part of the country and all around America there was a Populist movement. But I'm talking about a new Populist movement. Back then down in Kansas they said, farmers have to raise more hell and less corn. And I believe that's true of working class people generally, and others around this country now.

McGee. Thank you. We've been talking with Senator Fred Harris of Oklahoma.

THE POSITION OF JAPANESE-AMERICANS

Mr. HARRIS. Mr. President, it has at last become part of the common wisdom that there is a close and inseverable relationship between our foreign and domestic affairs. But nowhere is this linkage more clearly established than in an article in the Wall Street Journal of August 8 which describes the impact of President Nixon's policy toward Japan on the Japanese-American community.

According to the author, Norman Pearlstine, with the new chill in relations between Japan and the United States, hostility in America toward Japanese-Americans is beginning to surface again. Among examples he cites is the Congressional Record insertion by Representative James R. Mann of a song entitled the "Import Blues." One verse:

> Buying Jap-made products so sleazy to see
> Is a damn fool thing for you and me
> And I'm fighting back because I won't run
> From the slant-eyed people of the Risin' Sun.

Pearlstine also reports ads in Phoenix, Ariz., by a Chevrolet dealer who warns:

> Remember Pearl Harbor, when they tried to take your country from you. They are back with cheap imports to take your jobs, pensions and social security.

I hope, Mr. President, that in the coming weeks the Democratic ticket will be able to expose this administration's mistaken policy toward Japan. I hope that as Democrats we can outline clearly the steps we will take in the next administration to reestablish close contacts with a nation which may now be as important to our prosperity and security as any other country in the world.

But most important, I hope that we will make clear that we will vigorously oppose any measure of discrimination directed against Japanese-Americans or any other group of American citizens. The World War II internment of Japanese-American is a disgrace for which this country has never fully atoned. We have a special obligation to prevent any recurrence.

Mr. President, I ask unanimous consent that the Wall Street Journal article be printed in the Record.

There being no objection, the article was ordered to be printed in the Record, as follows:

The "Quiet Minority"—Tokyo-United States Differences Stir Fear and Militancy in Japanese-Americans

(By Norman Pearlstine)

Manzanar, Calif.—A biting morning wind whips through the sagebrush and mesquite, blowing up billows of sand that momentarily blur the peaks enclosing this desolate valley. Not a soul is in sight, but there are ghosts everywhere.

Here and there, rising from the sand, are relics: decaying barracks floors, a guardhouse, a cemetery near an old garbage dump. They are the remains of a different Manzanar, one of 10 internment camps that 30 years ago held 110,000 Japanese-Americans who, it was feared, might otherwise conduct crippling sabotage in the U.S. and help Japan win World War II.

Beginning in the spring of 1942, federal authorities rounded up almost every Japanese-American on the West Coast, from old women to little children, and penned them into places like Manzanar where they lived surrounded by barbed wire, guards and the suspicions of their fellow Americans. Though many were allowed to leave the camps over the next couple of years and relocate outside the West Coast (some entered the U.S. armed forces), a number died in the camps, and others were incarcerated until 1945.

When they were imprisoned they were ordered to leave almost everything behind. Some sold their homes and businesses at heavy discounts or losses. Others finally returned to find their property stolen or in ruins or destroyed by vandals. In 1947 the Federal Reserve Board estimated their losses at $400 million. The government paid $38.5 million in property claims.

THE WINDS OF CHANGE

Few Japanese-Americans today believe that the degradation of Manzanar will again be visited on their people. But this camp, in the Owens Valley about 250 miles northeast of Los Angeles, stands as a stark reminder that white America's attitude toward citizens of

Japanese extraction blows hot and cold with changes in relations between Japan and the U.S. With a definite chill between the two nations now, mainly because of economic matters, hostility is beginning to come to the surface again—and with it, fear. Some examples:

In Phoenix, Star Chevrolet warns the public in ads: "Remember Pearl Harbor, when they tried to take your country from you. They are back with cheap imports to take your jobs, pensions and social security."

During a strike at the Fontana, Calif., plant of Kaiser Steel Corp., workers on the picket line cry, "Jap steel Jap steel!" and curse the supervisors who drive through in Datsuns and Toyotas. They say nothing to men driving Volkswagens.

A South Carolina Congressman, Rep. James R. Mann, a Democrat whose constituents include many unemployed textile workers, inserts a song called "The Import Blues" into the Congressional Record. One verse: "Buying Jap-made products so sleazy to see/Is a damn fool thing for you and me/And I'm fighting back because I won't run/From the slant-eyed people of the Risin' Sun."

The American Immigration Committee of Decatur, Ga., a small right-wing group, publishes a "population report" calling for an end to immigration of "aggressive Japanese" who the committee warns, might wind up controlling the federal government.

The Seattle firefighters' union magazine suggests, in an article intended to be humorous, that lowering of the height requirements to 5-feet-6-inches means that rice and chopsticks will have to be delivered to all fire stations.

CAUSE FOR ALARM

The 600,000 Japanese-Americans aren't laughing. They know what even trival insults can portend: being stuck in the middle between Japan and the U.S. And for those Japanese-Americans who might have thought that the old grudges have been forgotten by whites, there are disturbing indications to the contrary.

For example in 1967, when relations between the two nations were better than they are now, researchers at the University of California at Los Angeles published a poll showing that 48% of Californians approved the incarceration of Japanese-Americans in camps during the war. According to researchers who supervised the study, the poll showed a strong relation between the image Californians have of Japan and acceptance of Japanese-Americans.

Faced with such attitudes, the historically passive "quiet minority" is beginning to grow restless—particularly the *sansei*, or third-generation citizen, and the more militant members of the *nisei*, or second generation.

Their militancy is a far cry from the confrontation tactics and near guerrilla warfare that have sometimes marked the black drive for civil rights. It nevertheless represents a major step for Japanese-Americans, who have not heretofore believed in rocking the boat or drawing public attention to themselves or challenging authority lest they endanger their drive to assimilate with American whites.

POLICY UNDER FIRE

By avoiding confrontation tactics and following a policy of assimilation rather than separatism, Japanese-Americans have become far more prosperous and better-educated than blacks or Mexican-Americans. But the prosperity came in the years soon after World War II when Japan wasn't a threat to the U.S. and the two countries got along well. Today many Japanese-Americans feel ignored by America. All the barriers are not yet down, they say, and they are beginning to feel that white Americans aren't particularly concerned about it.

So the policy of assimilation is being seriously questioned for the first time by many Japanese-Americans who believe that it hasn't worked. Instead they want to promote more cohesion and racial pride, challenging authority when they think authority is taking advantage of them, and joining with other Asian minorities as well as blacks and Chicanos in fighting discrimination.

In the San Francisco Bay area, with a large population of Japanese-Americans and many militants, young protesters have picketed S. I. Hayakawa, the president of California State University, San Francisco, who is a steadfast believer in assimilation, calling him a "banana"—yellow on the outside—white inside—the equivalent of the blacks' epithet "Oreo."

Japanese-Americans in San Francisco have also allied themselves with Chinese-Americans, Filipinos, Samoans and other Asian minorities to form an Asian-American Political Caucus that seeks representation on the city's school board and city council. They have even protested the visit of Japanese warships to the city, asserting that their presence would only be harmful to Japanese-Americans.

Elsewhere, other changes are occurring. At least one Japanese-American underground paper has been formed, there are two other Asian-American papers, and Los Angeles now has an Asian-American bookstore. Many California colleges have Asian-American student centers and courses in Asian-American studies.

California has about 215,000 Japanese-Americans, second only to Hawaii. Hawaii has about 225,000. They constitute 40% of Hawaii population, and discrimination isn't much of a problem there. Other states with sizable Japanese populations are New York and Washington, with 20,000 each; Illinois, 17,000; Oregon, 6,800, and Texas, 6,500.

The growing solidarity of Japanese-Americans, and their increased willingness to become more visible as a minority, were evident in the case of Dr. Thomas T. Noguchi, the flamboyant Japanese-American coroner of Los Angeles County. In 1969 his superiors discharged Dr. Noguchi on the ground that he wasn't doing his job properly.

Dr. Noguchi fought back with the help of JUST (Japanese United in Search for Truth), a group that thought the firing may have been racially inspired. The group collected over 10,000 signatures protesting his dismissal and raised money for a court challenge. The coroner was subsequently reinstated and is still on the job.

Militants concede it is difficult to get Japanese-Americans to take a more active role because of the notion of *shikataganai* (translated loosely as "it can't be helped"), which reflects a fatalism and belief in accommodation that arrived here with the first immigrants from Japan and which continues today with many of their descendants.

IMPACT OF AFFLUENCE

In addition, the material affluence that many Japanese-Americans have experienced in recent years may have made them less interested in pushing for social equity.

George Omi, a landscape architect in Sausalito, Calif., is perhaps typical of those Japanese-Americans who appear to have "made it" in white America. Mr. Omi says he "detached" himself from San Francisco's Japanese-American community seven years ago because he wanted a better future for himself and his family in the suburbs. Though he spent 2½ years in an internment camp, he says that he isn't bitter about it and that he wants nothing more than to be a respected and accepted citizen in his home community. That is still the goal of many—to blend into the white world.

But for others, that isn't enough. William Marumoto, a White House special assistant, says there is need to escape "the complacency of affluence." He adds, "A lot of us are out there in the suburbs now, with two-car garages, color TV, electric hibachis, the whole image of making it in America. Everything is okay now, and all we have to worry about is our kids smoking pot, the mortgage on our crabgrass, and how the Rams will do next fall. We have become the epitome of westernization. We have become the perfect yellow WASP."

Mr. Marumoto adds, however, that despite this material success, anti-Japanese feelings can sprout up again. "The root of the trouble, prejudice based on race, most certainly still exists," he says.

He ticks off some figures showing that, outside Hawaii, Japanese-Americans are almost invisible in power positions: Of some 1,600 mainland colleges and universities, only one has a Japanese-American president (Mr. Hayakawa, a famous semanticist); although there are 20,000 school districts on the mainland, Mr. Marumoto says he knows of no Japanese-American superintendent of schools; and there are, according to Mr. Marumoto, only about 20 Orientals—the number of Japanese-Americans among these 20 isn't available—among the 5,500 civil service employes in "supergrade," or top, federal positions.

"TECHNOLOGICAL COOLIES"

Others besides Mr. Marumoto complain that Japanese-Americans, though skilled and decently paid, are denied access to high positions. "We are no longer laboring in the fields," says Raymond Okamura, a chemist with the California Department of Public Health, "but we are now nothing more than technological coolies who are systematically denied management positions in most white enterprises."

Many Japanese-Americans complain that even Japanese companies setting up U.S. subsidiaries hire almost no Japanese-Americans for responsible posts, preferring to employ native Japanese or "real" Americans as show-window types better suited to dealing with Americans.

In their personal lives, too, Japanese-Americans are constantly given the impression that what Lt. Gen. John L. DeWitt said 30 years ago is an accurate statement of the feelings of much of white America today. Gen. DeWitt, who was in charge of the wartime internment of Japanese-Americans, said: "A Jap's a Jap . . . it makes no difference whether he is an American."

Japanese-Americans whose families have been here for generations say they are still treated as Japanese. "No matter how good my English is, or how stylishly I'm dressed, I am still viewed as a foreigner by most white Americans," says Paul Takagi, a Sacramento-born sociology professor at the University of California at Berkeley.

Prof. Takagi, like many Japanese-Americans, fears that discrimination will mount as more and more blame is heaped on Japan for U.S. economic problems. "In the 1930s we had a similar situation," he says. "It started with bad-mouthing of the Japanese and then the hostility was turned on us. And I'm afraid it's happening again."

Warren Furutani, a fourth generation Japanese-American from Los Angeles who has been an active supporter of many social causes, says: "As soon as I get on the picket line, whites shout at me, 'Why don't you go back to where you came from?' The minute we start to rock the boat, we are no longer accepted."

REQUESTS FOR AID

Japanese-American groups also complain that their requests for state and federal aid for the needy in their communities are regularly turned down. One frustrated fund-raiser says: "The impression seems to be that we have all made it materially and that there aren't problems like poverty, juvenile delinquency and drug abuse."

Indeed, "the last 25 years have been pretty good ones for Japanese-Americans," says Jeffrey Y. Matsui of Los Angeles, former associate director of the Japanese-American Citizens League, a national organization with 25,000 members that is active in fighting discrimination. "But lately," Mr. Matsui adds, "we've been sounding warnings that the honeymoon may be over and that tougher times are coming."

There are ample lessons in history. The first Japanese in the U.S. came to the West Coast in 1869 but were pretty much left alone until after 1890. By then, they were present in large numbers and many had moved out of the laboring class to compete in business with white entrepreneurs. Under pressure from exclusionists, the U.S. got Japan to agree in 1908 to a so-called "Gentlemen's Agreement" limiting the influx of Japanese laborers to the U.S. In 1913, California prohibited Japanese from owning land or from leasing it for more than three years.

Anti-Japanese feeling largely evaporated between then and 1920, after Japan entered World War I on the side of the Allies. But then the steady growth of Japanese military and industrial power over the next 20 years led to growing hostility toward Japanese-Americans; they were viewed as part of "The Yellow Peril."

In 1924, under heavy pressure from California, Congress excluded Japanese from entering this country. Exclusion was repealed in 1952.

RELATIONS TODAY

Today, many Japanese-Americans believe relations between Japan and the U.S. are worse than at any other time in the last 25 years. And many white Americans believe that the aggressive trade policy and economic strength of modern Japan pose a real danger to their own well-being. Hence such reactions as the shouts at the Fontana picket line and the South Carolina Congressman's attack on Japanese imports.

Many Americans have become increasingly concerned about Japan's growing trade surplus with the U.S. The surplus was in the U.S.'s favor until the mid-1960's, and as recently as 1968 the surplus in favor of Japan was only $1.1 billion. Last year it was $3.2 billion, and this year some experts predict it may reach $4 billion.

In addition, many Americans resent the rigid quotas that Japan has on many items that U.S. businessmen would like to export to Japan, including many agricultural products such as beef and oranges, and computers and many computer components.

The extent to which such resentment of Japanese economic power and policies turns into resentment of Japanese-Americans may be indicated by the response to a photographic exhibit that deals sympathetically with the Japanese-Americans who were interned in the World War II camps. The exhibit has prompted a number of hate calls and letters to several California cities where it has been shown. And Roberty Abernathy, a newsman for KNBC–TV in Los Angeles, is still stunned by the violent viewer reaction to a brief item reviewing the exhibit.

"In the first 10 minutes after the segment went on the air, we got 55 calls cursing us for implying that the round-up of Japanese-Americans had been a mistake," he says. "The callers didn't see any difference between Japanese soldiers in the Western Pacific and Japanese-Americans here." Mr. Abernethy adds:

"They thought internment was better than they deserved, then or now."

THE MYTHS OF WELFARE—ADDRESS BY SENATOR McGOVERN

Mr. HARRIS. Mr. President, during the Democratic Convention, the Senator from South Dakota (Mr. McGOVERN) delivered an excellent speech to the National Welfare Rights Organization, pointing out the myths of welfare that are used to discredit poor people.

The real problem in America today is that there simply are not enough jobs that provide a decent standard of living for people. I think Senator McGOVERN understands the basic need for decent jobs at livable wages. I think he will bring our country out of its present economic disaster, and I think he will see that those who cannot work or cannot find work will have the basic necessities of life.

Mr. President, I ask unanimous consent that Senator McGOVERN's remarks before the NWRO be printed in the RECORD:

There being no objection, the remarks were ordered to be printed in the RECORD, as follows:

THE WELFARE MYTHOLOGY

(Remarks by Senator GEORGE McGOVERN)

I am happy to speak to the last N.W.R.O. Convention held during Richard Nixon's last term as President of the United States.

And I am proud to speak to this organization because you have broken the age-rule that the poor should endure, but not be heard.

You have reminded the rest of us that no citizen is simply a welfare case, to be supported by government and supervised by bureaucrats.

You have taught us that the poor are not just a cause for action by others, but human beings with a right to fight for the cause that is their own.

In word and deed, you have shown us in the 1970s some truths that should have been self-evident long ago.

It is not a shameful thing for an American to be poor. But it is shameful that America still tolerates the stain of poverty. None of us will deserve our liberty until all of us are liberated from deprivation. And who among us can be content when a hungry child is crying only moments or miles away? Surely, a nation that worries about balanced diets for household pets can afford to feed that child. And any nation capable of inflicting an unthinkable level of human destruction around the world should also be able to afford at least a minimum level of human subsistence in its own land.

What, then, stays the hand that could help those in need?

The fault is not in the essential character of our country, but in the failure of too many of our countrymen to see the truth. And, as John Kennedy once told us, "The greatest enemy of the truth is very often not the lie . . . but the myth." So your great enemy now—and the greatest ally of poverty—is a welfare mythology which traffics in stereotypes, confuses with code words, and misleads America away from justice and compassion.

Old myths die hard, especially when they serve the interests and solve the conscience of those who oppose what is right because they have a stake in things that are wrong. And this is why the welfare myths live on. They are used by the powerful and the privileged to divide the minority who are poor from the majority who are not rich. They are used to preserve a system which burdens workers and welfare recipients alike—and barely taxes the wealthy, the boardrooms of Wall Street, and the billion dollar corporations.

Yet I believe we can dispel the myths. For if we have learned anything from the politics of 1972, it is that the American people are tired of being tricked into voting against their best instincts and their own interests. They want the truth—and they are anxious for economic justice. So today and throughout the campaign let us talk about poverty and welfare—and let us lead our fellow citizens to see where justice lies by separating the myths from the truth.

The first and the greatest welfare myth is that the government has done all it should for those who earn less than they should.

This myth is no new invention. It is as old as the poorhouses of sixteenth century England—which imprisoned thousands in virtual slavery, but were hailed as a remarkable social advance by those in power. Since then, the repression of the poor has often come in the clothing of reform. And that is exactly what is happening today.

Richard Nixon has offered us something he calls welfare reform. I call it repression.

It is repression—not reform—when human beings are asked to exist on $2400 a year for a family of four—which is less than we spend to care for some of the animals in the National Zoo.

It is repression—not reform—when Americans are told to work for a slave labor wage of a dollar and twenty cents an hour—at that rate you have to work two months to make what the President of ITT collects every single hour.

And it is repression—not reform—when residency requirements are reinstated and the rights of the poor are reduced—which means that some bureaucrat will have the power to sentence a family to slow starvation with the stroke of a pen.

The traditional myth is that government has done enough for the poor. The current form of the myth is that the President's plan will do even more. But the plain truth is that the Nixon welfare reform is nothing but a charter for repression, which will make millions of Americans exiles from the freedom and abundance of their own land.

The second and the most contemptible welfare myth is that people are poor because they are lazy.

This myth is a White House favorite. The President likes to imply that the poor could be prosperous if only they were willing to scrub floors and empty bedpans. I have some news for Richard Nixon—the poor are already scrubbing floors and emptying bedpans—and they are still poor. And most of them cannot find any job at all.

The problem is not that people are too proud to work. The problem is the economic incompetence of the Nixon Administration. Where are the jobs? If the President knows, he should tell five million unemployed Americans. And then he should explain why only five per cent of the welfare recipients who have been retrained are at work today.

Of course, Richard Nixon is not really hiding jobs—he is just attempting to hide his own failure. His mask is a myth—that the poor prefer a relief check to a paycheck. And he has exploited this myth to justify welfare repression.

His plan requires two and a half million poor Americans to register for employment or training. The President promises to put them to work. That is a lie—and Richard Nixon knows it. The welfare repression bill calls for only 400,000 training slots and only 200,000 jobs—and after the first four years, the federal government will spend nothing to keep people at work. It is bad enough to compel the poor to take jobs without compelling employers to pay a living wage. It is even worse to trick those who are deprived and those who pay for welfare into hoping for jobs which will not be there.

Employment cannot be created by edicts which say that people must work when work is not available. And no myth can justify forced labor for mothers—who cannot leave their children for a job now, even when they decide they should—because Richard Nixon vetoed day care centers last December. The American people have a veto too—and they will exercise it to veto this Administration out of office next November.

The third great welfare myth is that we lack the resources to assure every American the fundamental necessities of life.

This myth is a major issue in 1972. The Agnews and the Doles who do Mr. Nixon's hatchet work are already carrying it with them down the low road of politics. Once again, they are trying to frighten people—this time, by telling them that a decent standard of living for the poor will mean a lower standard of living for workers.

It is not surprising to hear this from men who know it is a lie. For they do not dare to tell the truth—just as Richard Nixon does not dare to disclose the names of his campaign contributors. The special interests own this Administration—and this Administration owes them special favors. The Republicans cannot support genuine welfare reform because they oppose meaningful tax reform. And what they are really trying to protect is not the income of workers, but the privileges of the wealthy.

It is time for every American to pay a fair share in taxes—so no American will have to settle for a grim share of poverty. And, if I may borrow a phrase, it is time to crack down on the really big welfare recipients of our society.

It is time to crack down on the welfare boys in the executive suite at Lockheed—they took the government for the largest welfare payment in history—$250 million.

It is time to crack down on the welfare boys who just pushed through an $8 billion tax cut for big business—they wanted something for nothing—and the Nixon Administration gave it to them.

And it is time to crack down on all the welfare boys who have lobbied for tax loopholes—they are saving billions while the poor are left with too little and middle Americans are paying too much.

Maximum tax reform can make possible a minimum standard of security for every citizen. We will not achieve as much as we want as fast as we want. I wish that we could afford an immediate guarantee of $6,500 for a family of four. I believe that this remains, not only a rallying cry, but a deeply human goal. And though we will have to accept something else, let us demand far more than a welfare mess which has abandoned millions to poverty and alienated millions of others from the poor.

Let us demand at least that an average family be assured of a poverty level income. We can finance this reform without raising taxes on families who earn under $20,000. And at the same time, we can raise the income of hard-pressed working families.

The myth has it that we cannot afford a decent society—that we must permanently exist part prosperous and part poor. Like the rest of welfare mythology, this myth is wrong. It underestimates the greatness of our wealth and the generosity of our people. And it betrays every American who has ever trusted in the capacity of this country to achieve its ancient dream—that through sweat and sacrifice, we can extend the boundaries of justice to encompass all our people.

But no matter how wrong they are, we cannot expect the mythmakers in the White House to change course in the months ahead. For in almost every area of endeavor, the President has nothing left but myths. He will use them to play on our fears. Vice President Agnew will use them to convey what the old Nixon once said, but the new Nixon is too embarrassed to say. And the Republican Party will use the myths to excuse every error and answer every attack.

We will hear the myth that it is not those who support the war in Vietnam—but those who oppose it—who stand in the way of peace. It is the same thing we heard ten and twenty and fifty thousand American lives ago. Before another American is killed, we must decide how we will answer W. H. Auden's bitter question: "To save your world, you asked this man to die/Would this man, could he see you now, ask why?" Now, we must resolve that never again will we commit the young life of this land to the defense of a cruel and corrupt dictatorship ten thousand miles away.

We will also hear the myth that national health insurance is too expensive. It is the same thing we heard when the A.M.A. was fighting Medicare a decade ago. In 1972, we must reject the myth again—and vote to take the dollar sign out of American medicine forever.

And we will continue to hear the myth of the new prosperity. It is the same thing we heard last month and last year. Now we must insist on a new prosperity that is not the old Nixon recession—and we must demand a job for every American who wants to work.

These are the common goals of countless citizens. Just as working Americans share your interest in welfare reform, so you share their interests in a host of vital areas. A coalition for fundamental change is gathering in this country—and it is a coalition of conscience as well as self-interest. We welcome and we seek the allegiance of everyone who is committed to economic justice—whether they are wealthy or poor or in the middle. But one thing I will never do is to sacrifice my beliefs to buy the support of entrenched privilege.

And this above everything else is what I believe: We must become in this nation what you are to each other in this organization—not merely associates in a shared effort, but brothers and sisters in all things.

As brothers and sisters, we must meet the deepest of all human obligations—to live as though every other life depended on our own. We must learn that none of us can abandon even one of us to poverty. And we must understand that the death of any family's son in war diminishes every family.

Finally, as brothers and sisters, we must bring America home from the long dark night of conflict and doubt, destruction and despair. Then our children and their children after them will love this land, not just because they were born here, but because of the great and good country that you and I together have made it.

ABUSE OF THE GRAND JURY IN FORT WORTH, TEX.

Mr. KENNEDY. Mr. President, day after day, the Department of Justice indicts itself by tolerating the unfair and unconscionable imprisonment of five Irish-Americans from New York in the Tarrant County jail in Fort Worth, Tex.

For more than 6 weeks, these men have been imprisoned, far from their homes and families and friends. They have been indicted for no crime, convicted of no offense. Yet they languish in jail, imprisoned without bail, charged with contempt of court because they refuse to answer questions before a Federal grand jury investigating possible gunrunning from the United States to the Irish Republican Army in Northern Ireland.

As I have repeatedly emphasized, I hold no grief for the IRA. I condemn the indiscriminate killing and violence that the IRA has so wantonly inflicted on the people of Northern Ireland. I would warmly support any legitimate investigation to prevent gunrunning from this country to the IRA.

But the imprisonment in Fort Worth exceeds all bounds of legitimate investigation. The five witnesses have raised a substantial legal challenge against the validity of their imprisonment, primarily on the ground that the immunity the Justice Department granted them was too narrow to protect them from future prosecution. That clear-cut issue is now before the courts. Pending the resolution of the issue—and inevitably, the final resolution must come from the Supreme Court—these men deserve to be granted their freedom on bail. To do otherwise is to deny them justice.

As individual citizens, they may be too weak to test the jailer's key or to challenge the enormous power of the Attorney General of the United States. Too often, as we know, individuals are easily crushed unfairly by the machinery of our justice. We cannot let that happen now.

This is a case that cries out for notice and attention. I do not underestimate the power of the spotlight of public opinion, or its ability to demonstrate, that, each day these men rot in jail, the quality of American justice is diminished. That is why I have spoken out on this issue in the past, and that is why I shall continue to speak out until justice is done at last.

More than 2 weeks ago, I wrote to Attorney General Kleindienst, urging him to make a thorough inquiry into the circumstances of the Fort Worth investigation, and to take whatever steps may be necessary to secure the prompt release of the five imprisoned men.

So far, I have received only an interim reply, from Mr. A. William Olson, the Assistant Attorney General in charge of the Internal Security Division, acknowledging my letter, stating that a full reply is being prepared, and commenting ambiguously on the relationship of Great Britain to the origin of the investigation.

During the same period, I have also received a handwritten letter from each of the five imprisoned men. One speaks of the hardship on his family, of how his son thinks he may be dead. Others state that none of them have ever been in jail before. All give eloquent testimony against the denial of the basic rights they now are forced to suffer.

But the imprisonment of the Fort Worth Five has a more insidious connotation, because it bears the hallmark of an attempt to harass and intimidate peaceful and lawful activities by Irish-Americans in this country in behalf of the rights of the Catholic minority in Northern Ireland.

For many months, concerned citizens in America and throughout the world have raised their voices in protest against Britain's repressive policy of internment without trial in Ulster. Now, by some cruel irony, the United States is implicated in the process, as our own Department of Justice practices internment without trial in Texas.

In the convention days ahead, we shall hear much of the administration's achievements. We shall hear much of their platform and programs for the future. We shall even hear of their devotion to civil liberties and to the quality of justice in our Nation.

But their rhetoric will have a hollow ring. So long as five victims of their justice rest unjustly in a Texas jail under the authority of the Attorney General, their imprisonment will be a silent damning indictment of the promises we shall hear. I urge the Attorney General to act now to end this unfair treatment. I urge him to remove this cloud that mars his justice. I urge him to acquiesce in the release of these men on bail and return them to their families.

Mr. President, I ask unanimous consent that the text of the letters I have received from Mr. Olson and the five imprisoned men, together with a letter from Mrs. Eileen Laffey, the wife of one of the imprisoned men, may be printed in the RECORD.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

DEPARTMENT OF JUSTICE,
Washington, D.C., August 10, 1972.

Hon. EDWARD M. KENNEDY,
U.S. Senate,
Washington, D.C.

DEAR SENATOR KENNEDY: The Attorney General has asked me to send this interim reply acknowledging receipt of your letter of August 1, 1972, concerning the incarceration, on the basis of civil contempt of court, of five individuals in Fort Worth, Texas.

One point in your letter, however, should be clarified at this time. You express your understanding "that this investigation was initiated by the Department of Justice, upon the basis of representations made by the Government of Great Britain." It should be definitely understood that this Department's investigation was in no respect initiated at the suggestion or the request of the government of Great Britain.

The Attorney General is having prepared a full reply to the matters raised in your letter, and you can expect to hear from him in the near future.

Sincerely,

/s/ A. WILLIAM OLSON,
Assistant Attorney General.

TARRANT COUNTY JAIL,
FORT WORTH, TEX.,
August 2, 1972.

Senator E. M. KENNEDY.

DEAR SENATOR: How elated and thankful we are here (the five imprisoned Irish born men) for your plea on our account. This great humanity of yours extends to our children & wives; one of my little boys thinks I am dead and my wife and the older children have to keep reassuring him that I am alive, thank God.

Your great heart and humanity I am sure will be appreciated by all decent people. Cardinal Cooke is also with Bishop Casatta of Ft. Worth looking in on our unsual case. There was trouble in getting permission for priests to visit us here in prison. My wife has explained to our children that jails are meant for bad men but that unfortunately too many men who try to go good often end up in jail.

I am very grateful to you Senator for your courageous statement, Mr. Heath will not be pleased, but it may sober him to realize that people are "their brothers keepers".

Very sincerely,

/s/ KENNETH TIERNEY.

P.S. We are much in the same position as the Civil Rights workers who in North East Ireland were dubbed I.R.A. and thrown into jail, just to silence them! they also without charge or trial either.

TARRANT COUNTY JAIL,
FORT WORTH, TEX.,
August 2, 1972.

DEAR SENATOR KENNEDY: I am writing you this short letter to express to you my deepest gratitude to you for interceding on our behalf. This gratitude comes from my family also, my wife Eileen and three young children.

It is a great feeling to have a Senator such as you to speak out against this grave injustice. Your brothers R.I.P. would surely be proud of you.

There will always be a warm spot in every Irishman's heart and in the hearts and minds of all freedom loving people for what you have done for us.

By speaking out for us you are indeed keeping alive the democratic ideals that the Kennedy brothers have always possessed and which all of you fought hard for.

There is not much else I can say but to say thank you and God bless.

/s/ THOMAS LAFFEY.

TARRANT COUNTY JAIL,
Fort Worth, Tex.

DEAR SENATOR KENNEDY: I am very grateful to you for having spoken out on behalf of our civil rights.

My comrades and I have never been in prison before. When we read your statement in today's newspaper, it was a thrilling elevation for our great hopes.

Again, I must thank you on behalf of myself and my immediate family.

Yours sincerely,

/s/ DANNY CRAWFORD.

TARRANT COUNTY JAIL,
Fort Worth, Tex., Aug. 2, 1972.

DEAR SENATOR KENNEDY: I am most grateful to you for having spoken out against my imprisonment here in Fort Worth 1400 miles from my wife and children.

Your great concern for civil rights for all people makes you as one of the greatest men in this nation.

On behalf of my wife and family I wish to express my deepest thanks.

Very sincerely,

/s/ MATTHIAS REILLY.

TARRANT COUNTY JAIL,
Fort Worth, Tex., Aug. 2, 1972.

DEAR SENATOR KENNEDY: As one of the five imprisoned Irishmen here in Fort Worth jail, I wish to thank you most sincerely for your personal appeal to Richard Kleindienst to have us released from jail.

I as a good Irishman, have never been involved in any violation of the law, my records can be traced back to Ireland as well as here in New York.

This country was built in practically every aspect by Irishmen and now we are victims of Police State tactics.

As a little boy in Ireland I was fascinated by your late brother, then President Kennedy R.I.P. Mr. Kennedy, it is wonderful to have a man of your esteem, speak out on this grave matter here, as well as N. Ireland.

Thanking you again,

Sincerely,

/s/ PASCHAL MORAHAN.

WILLISTON PARK,
New York, Aug. 7, 1972.

DEAR SENATOR KENNEDY: I wish to thank you from the bottom of my heart for your concern on behalf of my husband, Thomas Laffey who for the past six weeks has been in jail in Fort Worth, Texas. Please continue to use your good influence to have him released and able to come home to me and my three young children.

Your help so desperately needed at this time is deeply appreciated by me and my family.

Thank you.

Sincerely,

/s/ MRS. EILEEN LAFFEY.

GOP CONVENTION RULES

Mr. PERCY. Mr. President, I wish to commend my own Illinois colleagues, Representatives TOM RAILSBACK and JOHN ANDERSON for the fine work they have been doing, along with other Republican Members of the House, in the area of rules reform for the Republican Convention.

I have enjoyed working with these men. This is a project that we are working on together, irrespective of ideology, for the formulation of new rules for the convention that are both right and constitutional. We are united in our opposition to any system based on quotas or compulsion.

An article by Representative RAILSBACK, published in the Washington Post of August 14, dealt with what he is trying to accomplish in the way of reform.

I ask unanimous consent that the article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

"BROADEST POSSIBLE PARTICIPATION"—GOP PARTY RULES: A CONGRESSMAN CALLS FOR REFORM

(By Representative TOM RAILSBACK)

A while ago I joined with a group of Republicans, who represent diverse ideological views, in drafting reform recommendations that we will make to both the Rules Committee of the Republican National Committee and the Convention Rules Committee in Miami. Our recommendations represent an effort that is meant to signal that we in the Republican Party want the broadest possible participation of all segments of our voting population—including young people, senior citizens, minorities, and women.

At least with respect to one voting group, young people, Republicans are not doing as well as they should be. The March Gallup Poll revealed that only 19% of the 18-20-year-old voters intend to vote Republican this year. There are 11 million of these newly enfranchised voters.

I remember in 1968, participating as a freshman member of Congress in a political science seminar at Western Illinois University in Macomb, and being asked, "What are you doing in the Republican Party?" The questioner implied that he could not understand why anyone relatively young and concerned about solving national problems would be a member of the Republican Party. I pointed out that from an age standpoint the Republican members of both Houses of Congress were considerably younger on the average than their Democratic colleagues. I also expressed my pride in the progressive attitude of many of the newly-elected young legislators. Since that time, I have had an opportunity to visit many other campuses all over the country, and have found the same skeptical attitude among young people toward the Republican Party.

Personally, I happen to believe President Nixon should do well in November with young people. In his 1968 campaign, Mr. Nixon urged that the voting age be lowered to 18, and on June 20, 1970, he signed such legislation into law. Also, he has worked to reorder our priorities by placing a heavier emphasis on human needs. For the first time, under the Nixon Administration, the United States is spending more on human needs than on defense. The President has moved us—as he says—from an era of confrontation to one of negotiation, and has journeyed to Peking and Moscow on missions of peace. He has withdrawn half a million men from Southeast Asia.

Yet, despite all this, young people are still reluctant to support the Republican Party. Blacks, too, have not given substantial support to a Republican candidate since the 1930s—except to President Eisenhower—although blacks voted largely Republican in the first three decades of the 20th Century. Perhaps one reason these and other groups have not supported the Republican Party proceeds from their inability to get inside the party and to help make decisions. That is what we are trying to encourage.

In 1968, only 1% of the delegates at the Republican National Convention were under 30. This year we expect approximately 10% young people at Miami. In 1968, only 17% of the delegates were women. That figure will increase to at least 30% for the 1972 Convention. Four years ago, blacks made up only 1.9% of the Republican Convention, and I have read projections of 4 or 5% for this Convention. However, there is clearly much more to be done. Our Ad Hoc Committee on Delegate Selection Reform has now made recommendations which are directed at further opening the door for broader participation in the party by providing open meetings, prohibiting proxy voting, abolishing automatic delegate selection, abolishing fees and assessments of delegates, and eliminating other restrictive practices presently conducted in some states.

We specifically favor a proposal declaring that each state shall endeavor to provide equal representation of men and women in its delegation. However, we are opposed to quotas and have chosen not to support recommendations which would impose them. Instead, we would direct the Republican National Committee as well as the State's Governing Committee to take positive action to achieve the broadest possible participation of all segments of the voting population.

We would also have the Republican National Chairman appoint a national committee broadly reflective of all voting segments to review, study and work with the states in implementing the rules adopted by the 1972 Convention.

The members of the ad hoc committee, besides myself, include Lou Frey (Fla.), John Anderson (Ill.), Bill Frenzel (Minn.), John Heinz (Pa.), Bill Keaing (Ohio), Jack Kemp (N.Y.), Margaret Heckler (Mass.), John Dellenback (Oregon), Clarence Brown (Ohio), and Bill Steiger (Wis.), Senators Bob Packwood (Oregon) and Bill Brock (Tenn.) have also participated as members of our group.

In addition, Senators Percy, Javits and Mathias have endorsed our proposals. These senators, and Senators Packwood and Brock, have been working on their own reform proposals, including the allocation of delegates. On August 8, our ad hoc group met with Clark MacGregor and explained our recommendations to him. At that time he indicated he had no objection to our recommendations and would check with the White House to determine the views of the President. I expect to get a report back from Clark MacGregor within the next few days.

It seems to me important that we not overlook the fact that the Republican Party is still a minority party. There are only 20 Republican governors. Since 1965 only about 25% of our population considered itself Republican. However, in 1964, 53% of the population considered itself Democratic. In 1968, this figure was drastically reduced to 46% and in 1972, 44% of the population identified with the Democratic Party. During this same period, the percentage of independents has increased from 22% to 31%. The Republican Party now finds itself in the unusual position of controlling the White House at a time when allegiance to either major party is low. Both Republicans and Democrats are losing people to the independents, and Republicans must redouble their efforts to attract them.

Naturally, there are those who would oppose any change we propose. Whenever change occurs, some individuals are affected, and therefore quite naturally object. However, the changes the Ad Hoc Committee on Delegate Selection Reform propose are changes that will be of benefit to the party. We believe that for our party to be successful in coming elections, there must be the opportunity for all to participate, work, and earn a place as a delegate. We must open the door of the party so that those persons who have not participated in the recent past will be encouraged to participate.

For too long, the Democratic Party has taken the young, the black, the minorities for granted, because we Republicans have written them off. It's now time for us to change the past, so that we can look forward to a future in which the Republican Party properly reflects all segments of our society.

Mr. PERCY. Mr. President, the efforts of Representatives RAILSBACK and ANDERSON have also been directed toward the goal of achieving an accurate reflection of both population and Republican strength in the State delegations to the convention by revamping the system in which delegates are allocated to the individual States. I am pleased to have worked with them in this area.

I ask unanimous consent to have printed at this point in the RECORD a statement that I delivered before the Rules Committee of the Republican National Convention at its meeting in Miami Beach yesterday.

There being no objection, the remarks were ordered to be printed in the RECORD, as follows:

REMARKS BY SENATOR CHARLES H. PERCY

It is a pleasure to meet with you, and I particularly appreciate your willingness to forgive my inability to arrive here earlier today in time for the hearings of the full Rules Committee.

Our party has achieved remarkable successes, but it also has some difficult problems.

We have elected a President who, in my judgment, is better equipped than any other man in American history to hold the Presidency. I think we can look forward confidently to another four years of President Nixon's Administration.

But I worry about our Party for another reason. We are very much in the minority in voter registration, and we are the minority party in the Senate and the House. We must, it seems to me, expand our Party's membership in order to bring into the Party the new, younger voters, and in order to gain majorities in both Houses of Congress. President Nixon's effectiveness has been impaired by not having a Republican majority. So many of his great programs—revenue sharing, welfare reform, executive reorganization—have been set back because of this.

As President Eisenhower said, most organizations tend to organize fewer and fewer people, better and better. President Nixon has asked us to be wary of this tendency. As he said so eloquently when dedicating the new headquarters of the Republican National Committee on Capitol Hill, we must become the Party of the open door—open to everyone, receptive to everyone's views, willing to go out and bring in the new majority—younger voters, women, people of different ethnic and racial origins, and our senior citizens.

Your work as a member of the rules committee at this Convention will have a fundamental impact on the future vitality of our Party, and on our ability to obtain a majority in the Congress and among the voters in the future.

This morning you heard from many Party leaders about rules reform. Senator Javits, Senator Mathias, Senator Packwood, Senator Brock and I have been working with the ad hoc group of members of the House to develop rules proposals. I support their efforts to change Rule 32 to make state parties more representative of the voters in each state, and to remove procedural obstacles to open participation in our Party.

I think it is important to draw very carefully the distinction between Rule 30's delegate allocation provisions, and those proposed changes in Rules 32 and 29 which have to do with the makeup of individual State delegations. Rule 30, as you know, determines how many delegates each state will send to the Convention. It has nothing to do with those who are chosen to be delegates. The objective of the House and Senate groups with regard to Rules 32 and 29 has been to try to make delegations more representative of the population and the Republican voter base in each State.

There has been some confusion about this subject as well. Attempts to make delegations more representative of the voter base have been called "quotas." I am absolutely opposed to any quota system. Quotas cannot guarantee representativeness. For example, a delegation containing a certain proportion of delegates over 65 who are mainly professional and business people would not accurately represent those one out of four of our citizens over 65 who live in poverty.

We want to achieve representativeness in general terms, without any kind of quota system. By asking state parties to use their best efforts to try to broaden their organizations we hope we can obtain a more representative total delegate body. A council composed of members appointed by the National Chairman to work with the states to increase representativeness will, I believe, be very helpful and effective.

More importantly, however, we must remove any obstacles, procedural or monetary, to participation in the affairs of the party at the grass-roots level.

We must eliminate all of the obstacles to open participation in the delegate selection process by implementing DO Commission recommendations one through six. Proxy voting should be eliminated, for example, as should any kind of payment or fee to be a delegate.

No person should be prevented from being a delegate because he cannot pay his way to the Convention. These costs can be very high. The Republican National Committee should, I believe, at least pay the costs of delegate transportation. In this way we can do much without the application of any kind of quota or sanction.

Our groups have also discussed changes in Rule 30's delegate allocation formula, which in my judgment is the single most important issue at this Convention.

As I have studied this problem I have been struck by the extent to which Rule 30 now results in surprising degress of inequality among the states. Delegates from large states represent many times as many people as delegates from small states. I have attached a table which compares Rule 30 delegate allocation with 1968 Presidential vote and population. A glance at the table will show some of the inequalities. For example, Delaware sends 12 delegates to this Convention; each delegate represents 8,060 votes for President Nixon in 1968 and 45,675 people, according to the 1970 census. California sends 96 delegates to this Convention, but each delegate represents 36,122 votes for President Nixon in 1968, and 207,845 people.

These basic facts about the results of the application of Rule 30 have caused court action, as you know. The District Court in *Ripon* v. *National Republican Party* found this spring that the present formula contains inequities that result in under-representation of the more heavily populated states in the Republican Presidential nominating process, and enjoined us from using it after 1972.

The present rule, the court said, is not "constitutionally permissable" because it allocates delegates according to a formula based on electoral college votes and bonus delegates.

The *Ripon* decision, and other decisions, provide ample guidance for structuring a constitutionally correct delegate allocation formula. In *Ripon*, Judge Jones said that a formula based on electoral college votes or Republican voting strength, *"or some combination of these factors,"* would be constitutionally rational.

In the case of *Bode* v. *National Democratic Party*, the U.S. Appeals Court for the District of Columbia found that a formula based strictly on party voting strength would be incorrect. The Court said that a formula that balances almost equally both population size and party voting strength is correct, and found that a formula allocating 46 percent of the delegates on the basis of party vote and 54 percent on the basis of population strength would be correct.

In *Georgia* v. *National Democratic Party*, the U.S. Appeals Court for the District of Columbia decided that a formula based solely on population strength would not be correct, because it would, for example, give an almost entirely Democratic state, such as Mississippi, as much representation at the Convention as an entirely Republican state of the same size.

So I think we as a Party are faced with these central facts:

The present delegate allocation system clearly does not reflect accurately the popular and Republican voting strength of the larger states.

A District Court has found our present formula to be incorrect, inconsistent with Constitutional guarantees, and has enjoined us from using it after this Convention.

Two Appeals Courts have laid down very clear guidelines that provide a rational basis for structuring a constitutionally correct delegate allocation formula.

We want to become the majority party by broadening our total national strength, increasing Republican Party strength in the larger states that elect the bulk of the Congressman, and drawing new people into the Party.

The conclusion is inescapable: we must change the present rule. I urge that this Committee, and this Convention, adopt a new Rule 30. We have all the facts. We know what is right, and we know how to draft a new Rule 30 that is constitutionally acceptable.

Let us not put ourselves in the position of the Democratic Party, which was required by Court order to act.

I propose that the following principles guide our new delegate allocation formula:

This Convention should adopt a new Rule 30 that is structured in such a way that all states are given fair delegate representation in the Party's nominating process, based on measures both of population size and Republican voting strength.

At the same time we should structure the formula so that those states that might lose delegates through application of a new, more proportionate formula should be permitted to retain the same number of delegates at the 1976 Convention as they send to this Convention.

Such a formula should be drawn so as to come within the guidelines contained in recent court decisions regarding constitutionally correct delegate allocation formulas.

I am very pleased to report that this statement of the need for change in Rule 30 has received very encouraging support from a number of my colleagues in both the House and Senate; Congressmen Anderson (Ill.), Andrews (N. Dak.), Biester (Pa.), Dellenback (Oreg.), Heinz (Pa.), and Railsback (Ill.), and Senators Dominick (Colo.), Javits (N.Y.), Mathias (Md.), Schweiker (Pa.), Scott (Pa.), Taft (Ohio), and Saxbe (Ohio).

I can report a strong belief among many of my colleagues, and among party officials with whom I have spoken, that the present formula should be changed here in Miami Beach.

I have prepared my own formula based on the above principles. My proposed language for Rule 30, and the results of the application of the proposal, are attachments 2 and 3.

My formula would:

—Allocate four at-large delegates to each state, plus two delegates for each Congressional district. This part of the formula in effect gives every state 2 delegates for each electoral college vote, thus reflecting the state's population, while retaining the bias that already exists toward the smaller states which have a proportionately larger electoral college vote.

—Provide one additional District Delegate from each Congressional district for each 35,000 votes or major fraction thereof of the largest Republican vote cast for the Republican candidate for President in the last election in that district, or cast for the Republican candidate for Governor, Senator, or House of Representatives in that district, whichever is greater. This provides a measure of Republican voting strength in the state, and thus provides the necessary balance between population size and party voting strength in the formula.

—Provide a savings, or grandfather, provision which would insure that no state, as the result of the adoption of this formula, will have fewer delegates in 1976 than it has at this Convention.

This formula treats the District of Columbia as a state, taking it out of the "Territories" category to which it is traditionally relegated, and thus recognizing that citizens of the District may vote for President, and that they now designate a Delegate to the House of Representatives. Territories are assigned delegates based on population strength, and they are also grandfathered.

Let me comment briefly on some similarities, as well as some differences, between the present Rule 30 and the formulation I am proposing.

Rule 30 now consists of two elements, electoral college votes and "bonus delegates."

The electoral college element derives from Rule 30's provision for four at-large delegates from each state (or two for each Senator) and the two delegates for each Congressional district that are provided by Section (b). Rule 30's Section (b), of course, *appears* to be a measure of Republican voting strength, but in practice it does not work that way. Only two Congressional districts of 435 failed to cast fewer than 12,500 votes for the Republican Presidential candidate in 1968, or the Republican nominee for Congress in 1970. Thus, every Congressional district but two is represented by two delegates to this Convention (or two for each Congressman), plus two for every Senator, exactly double the number of the electoral college, minus two.

Thus, one element of the present rule in practice almost exactly reflects electoral college strength, which is a measure, though a distorted one, of a state's population. As we know, in *Georgia* v. *National Democratic Party*, the Court found that a formula reflecting population size alone was not proper. The additional award of six bonus delegates to every state that produces Republican victories, no matter how large the state, simply adds to the distortion. Smaller states have two types of advantages: one created by their advantage in the electoral college, and the other created by the award of bonus delegates on a non-proportionate basis.

My formula provides two at-large delegates for each Senate seat, and two delegates for each Congressional district, thus providing an accurate measure of electoral college strength, apportioned among the states on the basis of 1970 population. By eliminating the bonus rule, and substituting a provision that apportions delegates on the basis of district Republican voting strength, my formula provides a nearly perfect balance of delegates, totalling 2,130. Of this total, 1,076 are provided by the electoral college factor (204 at-large delegates, plus 872 representing Congressional seats). An additional 1,013 delegates are assigned on the basis of Republican voting strength, providing a nearly perfect division between the two standards, which is entirely consistent with the Court's dictum in *Bode* v. *National Democratic Party*. These totals are contained in attachment 3.

Against a total of 2,130 delegates, the provision for 34 "grandfathered" delegates is clearly not significant enough to distort the formula in any but a *de minimis* way.

I have tried to draft and present to you a formula that is consistent with court decisions and the best interests of the Republican Party.

One concern that has been expressed is that this formula provides too large a delegate body to assure that the Convention is conducted in orderly fashion. With the addition of one alternate for each delegate, the total number of delegates and alternates on the Convention floor would be 4260. The Democratic Convention provided for close to 3,000 delegates, with half that number of alternates, for a total of about 4,500. And that was, from appearances at least, an orderly Convention.

If we wanted to increase the number of delegates and yet keep the delegate body small in total, we too could provide one alternate for every two delegates.

I have also heard it said that a very large delegate body reduces the number of cities that can accommodate a Republican Convention. But it would seem that only five or six cities—New York, Chicago, San Francisco, Miami, Atlantic City, and Houston—can handle a Convention even of our present size.

I am not wedded to this particular formulation, however. We could draw up a formula that produces a smaller or larger total number of delegates, that reduces the importance of electoral college votes, or increases the proportion of delegates assigned according to party voting strength.

I would point out that my proposal has two advantages. First, it retains electoral college strength as a key factor in the formula, and it thus permits the smaller states to keep the advantage they now derive from the makeup of the electoral college. Second, it grandfathers the smaller states that would lose delegates. By balancing delegates produced by the electoral college factor with a large block of delegates produced by party voting strength, the resulting allocation of delegates becomes constitutionally correct.

Though we can devise different formulas, what is most important is that we set to work now to change Rule 30 in a way that is consistent with court rulings. It can be argued that we should wait until after the Appeals Court decides on the Republican National Committee's appeal before changing Rule 30. I would argue, instead, that we should act now to do what we know is right. Let us wholeheartedly embrace reform, not be forced to do it by court order. Let us bring the rules of the Republican Party into conformity with the Constitution of the United States. Let us ensure that our 1976 Convention is truly representative of a *national* party.

RULE 50

(Proposed new language to implement "Percy Formula")

The membership of the next National Convention shall consist of:

A. DELEGATES FROM THE 50 STATES AND THE DISTRICT OF COLUMBIA

1. Four (4) Delegates at Large from each of the fifty (50) States, and the District of Columbia.

2. Two (2) additional Delegates at Large for each Representative at Large in Congress from each State, including the District of Columbia.

3. Two (2) District Delegates from each Congressional District.

4. One (1) additional District Delegate from each Congressional District and one (1) additional Delegate for each State having only one (1) Congressional District, for each 35,000 votes or major fraction thereof, of the largest Republican vote cast for the Republican nominee for President in the last preceding Presidential election, or for the Republican candidate for Governor, Senator, or for all Republican candidates for Representative at Large or Member of Congress, in that election or a subsequent election, whichever is greater.

D. DELEGATES FROM THE TERRITORIES

1. Five (5) Delegates at Large for Puerto Rico.

2. One (1) Delegate at Large for the Virgin Islands.

3. One (1) Delegate at Large for Guam.

C. SAVINGS PROVISION

In any case when the application of this Rule for apportionment of Delegates to a State, the District of Columbia, or Territory results in the designation of fewer Delegates than such State, the District of Columbia, or Territory sent to the 1972 Republican National Convention, such State, the District of Columbia, or Territory shall have the same number of Delegates at the 1976 Republican National Convention.

D. ALTERNATE DELEGATES

One (1) Alternate Delegate shall be provided for each Delegate to the National Convention.

ATTACHMENT 3

RESULTS OF "PERCY FORMULA"

	Number	Percent
1. Number of delegates at-large (4 for each State and District of Columbia)	204	9.6
2. Number of district delegates based on congressional seats	872	47.6
3. Number of district delegates assigned according to Republican voting strength	1,013	40.9
4. Number of "grandfathered" delegates	34	1.6
5. Delegates assigned to Puerto Rico, Virgin Islands, and Guam	7	.3
Total	2,130	100.0
Balance of delegates based on electoral college vote vs. delegates based on party voting strength:		
Delegates reflecting electoral college votes (1 and 2 above)	1,076	50.59
Delegates reflecting party voting strength	1,013	47.60

CHILD NUTRITION PROGRAMS

Mr. PERCY. Mr. President, I commend the work of the Committee on Agriculture and Forestry in reporting H.R. 14896. I think it is basically a good bill that will clear up many uncertainties about our child nutrition programs for the school year ahead.

I am pleased that the bill as reported contains many of the elements found in S. 3661, a bill which I cosponsored. I felt that S. 3661, prepared, as it was, by the USDA in consultations with many concerned individuals and groups inside and outside of Government, offered the best framework for improving the present structure of child nutrition programs.

I trust that our consideration of this bill will not preclude the possibility of a more searching examination of our present programs and the consideration of more fundamental and far-reaching reforms such as are embodied in my own bill, S. 3904, The Comprehensive Child Nutrition Act of 1972. My cosponsors and I are convinced that a fresh start is badly needed in this field if we are to achieve our final goal of assuring adequate nutrition for all needy children.

But that is in the long run, and we are faced today with amendments to the National School Lunch Act and the Child Nutrition Act that are necessary for the coming school year.

I applaud the steps which are taken in this bill to strengthen and improve the school breakfast program, the special or nonschool food assistance program, and the nonfood or equipment assistance program.

I also support the committee's action in fixing free and reduced price meal eligibility guidelines at no more than 125 percent and 150 percent respectively of the income poverty guideline. I shall support efforts to amend the bill to include a so-called grandfather clause to cover those areas which presently have higher eligibility standards.

In general, I believe in the performance funding concept which the committee has proposed for section 4 food assistance and which the Senator from Iowa (Mr. MILLER) will, I understand, propose by floor amendment for section 11, special lunch assistance. But I would like to clarify a few points with the managers of the bill before we vote on final passage. I take this occasion in advance of consideration of the bill to advise my colleagues, a few unanswered questions that I have is they are now on the floor at the moment.

As I understand it, the bill guarantees a State a dollar amount equal to the number of lunches it serves multiplied by the average national payment per lunch which in no case shall be less than 8 cents. I presume this is correct.

But a school within a State is not necessarily guaranteed an amount equal to the number of lunches it serves multiplied by the average national payment. The answer appears to be correct.

So some schools in Illinois, for example, may actually be receiving a payment equal to 6 cents per lunch while others may be receiving the equivalent of 10 cents per lunch. I wonder if this may not be a disincentive to some schools to do the very best job they can in providing nutrition services to all needy children.

In this same regard, why does the legislation speak of a national average payment per lunch? Am I to take this to mean that in fact one-half of the States and territories may be receiving, say, 6 cents per lunch and the other half 10 cents per lunch for a national average of 8 cents? Taking the language at face value, the answer to this must be "Yes."

Is this equitable? I think we shall hear many complaints—and justifiably so, in my opinion—if in the next fiscal year an average payment per lunch nationwide is achieved by below-average payments to some schools and to some States and above-average payments to others.

Would it not be more equitable if we guarantee the States as well as the schools within each State a minimum payment per lunch? This would make our meaning absolutely clear: Eight cents per lunch would mean at least 8 cents and not perhaps as low as 6 or as high a 10.

Did the committee consider this language? I would hope the managers would consider amending the bill to this effect.

INDIA AT 25

Mr. HUMPHREY. Mr. President, it was on August 15, 1947, that the British recognized India's independence, and it was on August 15, 1947, that the dream of Mahatma Gandhi and Jawaharlal Nehru came true. There was a rebirth of a great nation, an awakening and revitalization of a great people but at the same time there was the cold realization of the responsibilities which lay ahead for an impoverished, albeit independent, country with the second largest population in the world.

All was not euphoria at the time of independence day celebrations, any more than it is today. The responsibilities remain, and, if anything, they have grown more complex due to the rapid growth of population in India which continues to absorb her real economic growth, and due to evolving power relationships throughout the world. Nevertheless, India has weathered many of the storms. Its democratic, parliamentary system has remained in tact. It has a strong, perceptive Prime Minister, Indira Gandhi, at its helm and a commitment to social reform and economic development.

Usually, at anniversary times, especially one as important as the one India is celebrating now, commemorative speeches are lengthy in their praise and short on the hard stuff of what lies ahead. I will not be long in my praise because I count on others for that. I rely on the qualities of contemporary Indian civilization to speak for itself. And I will not be long in my criticism either.

Mr. President, my intent is only to wish this great country and its people well and to stress that the problems ahead will challenge the best of them. India's future lies not in ambitious plans done in the abstract for classroom consumption, but in the formulation and implementation of policies which meet the needs of the people—needs that are written in their faces and are a part of everyday of their lives. I am speaking of providing food, improving agricultural production, raising industrial productivity, initiating urban housing and welfare programs, rationalization of the economy, and a redistribution of wealth to reduce the income disparities which persist.

Recent articles commemorating India's 25th anniversary of independence describe in a very vivid way the needs of the people and what remains to be done. I ask unanimous consent, that two relevant articles published in the New York Times and Washington Post be printed at this point in the Record.

There being no objection, the articles were ordered to be printed in the Record, as follows:

[From the New York Times, Aug. 14, 1972]

India, Still in Shadow of Poverty, Shows Pride as a Nation Now 25

(By Robert Trumbull)

New Delhi.—Prime Minister Indira Gandhi is about to open a subdued year-long celebration of the 25th anniversary of Indian independence in a country where much has changed, yet much remains the same, since her father, Jawaharlal Nehru, hailed the new nation's "tryst with destiny" as Britain handed over power in the first minutes of Aug. 15, 1947.

Physical improvements have brightened the face of this ancient and long-suffering land, though Mr. Nehru's comment that "we have achieved much" but "we must achieve much more" is as applicable today as when he made it on the first Independence Day.

The shining image of India in the emerging "third world" of former colonial countries has dulled in the years of shifting alliances and the declining relevance of neutralism, the basis of Indian foreign policy under Mr. Nehru, the first Prime Minister.

The internal political complexion of the country has also altered, with the power no longer in the hands of the old Congress party as Mr. Nehru had known it until his death in 1964. Indians say that Mrs. Gandhi's rule at the head of a reconstructed party, younger and more leftist, is firmer than her father's ever was.

Mrs. Gandhi has taken the economy, never strong, into uncharted socialist paths. With wages low, prices up, productivity down and unemployment growing, the success of the socialist experiment is yet to be established.

Meanwhile, uncontrollable natural factors of alternating floods and droughts, and the savage summer heat, are unchanging agonies in a disaster-prone country poorly served by nature.

Following a recurrence this summer of the droughts that periodically deprive struggling industry of needed electric power and threaten food shortages where many already are hungry, Mrs. Gandhi has decreed an austere observance of the 25th Independence Day in order to rebuild depleted reserves.

Such spectacular holiday displays as the outlining of public buildings with electric lights on the festive night have been barred and the public has been asked to forgo the customary ostentatious anniversary parties.

In the midst of India's modernization, some things remain unchanged. Despite a jagged new skyline of monolithic high-rise buildings, the environs of the capital retain an ambiance of timeless antiquity through the spectacular old monuments of bygone eras, like the huge seventeenth-century Red Fort, once the seat of Mogul emperors.

With urban sprawl pushing New Delhi's boundaries ever outward to country that was semidesert, the quiet of the night in this once-compact capital is shattered by traffic sounds instead of the jackal's eerie wail. These noisy, skulking animals that once scavenged nightly in the city's outskirts shun the new suburbs.

But the twilight hour, when sunset cuts the heat like the closing of an oven door, is still made vivid by flocks of screeching parakeets darting above the city streets like streaks of green flame.

A MIXTURE OF SOUNDS

Besides the screams, chirps and caws of the many kinds of birds, the cacophony of Indian cities includes the chattering of untamed rhesus monkeys roaming the urban roofs, and the undulating tones of the snake charmer's flute.

In the countryside around New Delhi a motorist may have to swerve to avoid hitting a wild peacock strutting on the highway. In the railway yards of eastern India elephants are preferred to engines for shifting boxcars.

The new mingles with the old.

Soviet-made tractors, driven by bearded, turbaned Sikhs, dodge around bullock carts and camels on the Grand Trunk Road, the great Punjab artery described in Rudyard Kipling's tales of British India.

Children of the untouchables, lowest of the low in the stratified Hindu social order, earn university degrees although their fathers may still live in hovels and follow inherited menial occupations that members of the higher castes hold in contempt.

In teeming cities like New Delhi, Calcutta, Bombay and Madras, new apartment houses are rising in vast slum-clearance projects. But in most cities the odorous colonies of tumbledown makeshift huts also grow despite regulations against them. "You can enforce regulations only so far," said a municipal housing official in Madras.

A notable feature of the new India is the air of cheery pride exhibited in fields and factories where so many faces once were hangdog and discouraged.

"You know, we send technicians to other countries now," said an Indian irrigation expert in Himachal Pradesh, a mountain state whose melting Himalayan snows water the burning northern plain.

"Garibi Hatao"—"Banish poverty"—is the slogan adopted by the new Congress party built by Mrs. Gandhi after she had led the elections in casting out the old guard.

The socialist approach has so far produced a mixed pattern of Government monopoly, official competition with private enterprises, Government and private partnerships and the purely private sector.

To its existing monopolies in communications and transportation, the Government has added banking, insurance and coal, and 80 per cent control of the steel industry.

"Actually, we have nationalized very little," a close adviser to Mrs. Gandhi said in a recent interview. "Mostly, we have merely taken over ailing businesses to put them on their feet."

Private businessmen have been unimpressed by such assurances. "We are living on a knife edge, wondering what the Government is going to seize next," said one successful entrepreneur in Bombay.

Some Western economic analysts here charge the Indian Government with being overly nationalistic and conservative in managing what Mrs. Gandhi calls the "commanding heights" of the economy.

"India is too cautious in hoarding $1.25 billion in foreign exchange instead of using some of it on projects to expand the economy," an American expert declared.

SOME IMPORTS HALTED

Imports of consumer goods have virtually ceased, judging by the goods available in shops, although the black market is another matter. "You can get anything if you can pay for it,' said a Calcutta resident.

However, India now produces a spectrum of items covering everyday wants, from canned foods to cameras, though the variety and quality may leave much to be desired, and prices are high.

"They tell us we make machinery good enough to be sold in the United States," said a Bombay housewife. "Then why can't we make a toaster that won't break down in a few days?"

According to a recent report by Moinul Haque Chaudhuri, the Minister for Industrial Development, Government ventures suffered an over-all loss of more than 100 million rupees in the 1969–1970 fiscal year, but lost only 30.7 million rupees in 1971–72. The Indian rupee is exchanged at about 7.5 to the dollar.

"We don't look just at the balance sheet," a Government economist said. "We also take into account the social benefits flowing from Government enterprise."

In many instances, he said, when the Government takes over an enterprise it "virtually creates a new company town" at the plant, enabling the employes to "live better than they otherwise would."

In Punjab and other states, where the "green revolution" in grain production has enabled India to halt costly importing and even to think of exporting food soon, the successful farmers have been discouraged by the Government's imminent imposition of a ceiling of 10 to 12 acres of land holdings.

"I may as well sell my tractor and move to the city,' said a Punjab farmer who had arrived as a destitute refugee from Pakistan 25 years ago and now owns 90 productive acres and employs several families. "But think of the millions of landless cultivators who will become owners when the excess acreage is redistributed," a state official insisted, when told of the Punjab farmer's despair.

A proposal to limit urban property holdings is expected to be put before the parliament, where Mrs. Gandhi commands an overwhelming majority, as soon as a New Congress party committee has worked out the details.

The plan upset a New Delhi widow who has just built a four-bedroom house, modern in all respects, that she can rent to an embassy family for the equivalent of $400 a month.

"After expenses and taxes I'll have nothing left," said the widow, who lives in a small apartment, "and I don't even know if I will be allowed to leave the property to my children."

Concern for the myriad underfed, jobless poor has enabled Mrs. Gandhi to renege without a qualm on pledges by her father's Government, such as the payment of privy purses—in effect, pensions—to the former princely rulers in return for ceding their states to the Indian union. Her action in stopping the payments bothered the consciences of many Indians.

Mrs. Gandhi's tendency to act on significant matters without consulting Parliament has been criticized by Indians who feel that ignoring the forms of democracy can engender contempt for the substance.

A close associate of Mrs. Gandhi recently described her ideology as "centrist, or left of center." At the same time she keeps the support of the extreme left, including a new youth corps that has evolved from the wreckage of the Naxalites, a Maoist organization that had advocated violent revolution.

Mrs. Gandhi's luster at home has been enhanced by India's victory over Pakistan in the war last December, which resulted in the creation of Bangladesh in what was formally East Pakistan.

Except for Hindu diehards, the country has acclaimed the accords worked out by Mrs. Gandhi and President Zulfikar Ali Bhutto of Pakistan in Simla last month, beginning an effort to end 25 years of ill-will and four wars between the two countries.

While relations with Pakistan are improving at last, the suspicions of small states for giant neighbors has lessened India's popularity in Nepal, Bhutan, Bangladesh and Sikkim, the latter an Indian protectorate.

Nearby Ceylon has displeased New Delhi by moving closer to China. The border dispute with Peking, which resulted in an Indian military defeat in 1962, still poisons relations between the two Asian giants, once the warmest of friends.

India's confidence of her role as a leader among the neutralist states was shaken when many of these countries decided not to take sides in the conflict between New Delhi and Peking, and declined to support India in United Nations debates on the Bangladesh affair.

Except for the tiny Himalayan kingdom of Bhutan, which is committed by treaty to be "guided" by India in foreign affairs, only the Soviet Union and her satellites supported New Delhi's opposition to a cease-fire in Bangladesh.

India's status as a nonaligned nation has been impugned since New Delhi and Moscow signed a treaty last year that has military overtones. India spokesmen, however, insist that no Soviet military aid has been accepted.

The increasing commitment to the Soviet Union, India's consistent supporter in international disputes, and the alienation from the United States since President Nixon's reported "tilt" toward Pakistan in the Bangladesh situation disturb many Indians.

American friends of India have noted that criticism of United States policies, to the extent of denigrating the effect of great amounts of American economic aid, has become distressingly fashionable in official and intellectual circles.

The image of antimilitarism and nonviolence cultivated by Indians, already tarnished by the invasions of the recalcitrant princely states of Junagadh and Hyderabad and the seizure of Goa and other Portuguese enclaves in 1961, not to mention the events leading up to the war in Bangladesh, has been further tarnished by recent talk of developing nuclear weapons, although Mrs. Gandhi has disavowed any such idea.

However, talks with many officials, industrialists, professional people and residents in a selection of key cities, towns and villages during a tour of more than seven weeks have uncovered a tremendous reservoir of admiration and regard for Americans in general, if not for Mr. Nixon.

"Indians have never forgotten American support for Indian independence," said a university professor in Bangalore, an industrial hub of the south. "We would have starved without American wheat," a businessman in Calcutta declared.

"For God's sake," a high Government official begged an American journalist friend, "tell your people that we aren't in the Russians' pockets."

[From the Washington Post, Aug. 15, 1972]

INDIA, FREE 25 YEARS, ENJOYS STABILITY AMID POVERTY

(By Lewis M. Simons)

NEW DELHI.—Aug. 15 (Tuesday)—In the 25 years since Jawaharlal Nehru kept his country's "tryst with destiny," the government of independent India has made remarkable progress toward modern statehood.

But the people of India have not kept pace.

As a government, India has advanced far toward the recognition its leaders dearly crave from the world beyond the Subcontinent. Political stability is so much a fact of life that opposition is almost nonexistent and critics are beginning to raise cries of "dictator" against Nehru's daughter, Prime Minister Indira Gandhi.

As a people, the great Indian masses are as impoverished today as they were on this day in 1947, the day Britain set them free.

To the outsider, witnessing this phenomenon of advancing government and lagging populace can be like watching a lumbering bullock cart. But on this cart, sometimes one wheel rolls forward and one stands still, and the cart turns in a circle.

ECONOMIC EVALUATION

Consider this evaluation of the Indian economy 25 years after independence by Finance Minister Y. B. Chavan:

"All-round economic progress since independence has radically altered the character of our economy and brought about a significant increase in real incomes generally.

"But, the absolute number of those living in abject poverty has scarcely diminished; economic disparities appear to have widened; unemployment has become a seemingly intractable problem."

Or again, in an analysis of land reform by State Minister of Agriculture Sher Singh, the wheels seem to spin in two directions:

"One of the spectacular results of the spread of modern technology has been a widening of the disparities in wealth and income in rural areas.

"On top of this, the unplanned spread of mechanization threatens not only to accentuate the inequalities but also to reduce employment opportunities. In the result, new social tensions are developing in the countryside."

DEFICIT ELIMINATED

On occasion, the wheel of the government and the wheel of the people seem to roll smoothly alongside each other, and the results can be startling. The "Green Revolution" of Indian agriculture is one of these rare achievements.

Spurred by the disastrous droughts and famine of 1965–67, government leaders, scientists, technicians and peasants pulled together. Within five years, they eliminated the great food deficit which had plagued this country from antiquity and built a reserve now claimed to be adequate to ward off starvation for more than a year.

While this is an achievement that would doubtless stun the founders of independent India, Gandhi and Nehru, once more it is beginning to look as though the accomplishment will be that of the government more than of the people.

FOOD EXPORTED

After its resounding defeat of Pakistan last December, the government delivered a reported 750,000 tons of rice to its newly liberated neighbor, Bangladesh. The word went out: For the first time in history, India can export food grains.

A deal with a Japanese company was reported in which India was bartering 100,000 tons of corn. The government offered "miracle rice" seeds to North Vietnam.

The government also claims its storehouses hold 9.5 million tons of food grains. Some politicians in opposition to Prime Minister Gandhi have disputed the figure, but this can probably be dismissed as sniping and most diplomatic observers accept the official statistics.

Yet, when the current monsoon was late in developing and summer crops were burning in the parched ground, it was only a matter of weeks before peasants began to die. Government officials, anxious that the green revolution not appear to be a fragile shell, insisted they were dying of malnutrition, not starvation.

Now, although the monsoon has come, great damage has been done to crops, and no more is to be heard about grain exports. The Japanese deal is back "under negotiation." The U.S. mining of North Vietnam's ports eliminated the seed offer.

There is no doubt that India is capable of feeding itself and even of exporting grain. The point has been made. What has not been proven is that the diverse elements of the government and the people can be made to haul together in good times as well as bad to overcome dependence on the capricious monsoon and to make agriculture a manageable science.

INDUSTRY'S ROLE

Industrial growth since independence does not approach agricultural gains. In 1950, three years after the Union Jack was lowered in New Delhi, industry contributed about 5 per cent to India's national income. By 1968, this contribution had doubled.

Since then, however, with the government moving increasingly into the industrial picture, growth has fallen off sharply. In the last four years, the government has granted only 125 out of 1,000 applications by large private industrial organizations seeking expansion.

This shackling of the private sector has caused the government to dip deeper and deeper into bank credits to help develop public sector growth. In the last fiscal year, the government borrowed a record $1.1 billion.

The handful of indigenous industrial giants has grown frustrated. In an annual report to one of his companies last month, the country's leading business figure, J. R. D. Tata, complained bitterly:

". . . Modern and mature countries which, whether calling themselves socialist or not, have provided their people with the highest standards of living and the most complete welfare services in the world, have resolutely turned their back on outdated Marxist theories and shibboleths still blindly accepted by so many in our country who think the prosperity and welfare of the people can only come from the destruction of all private ownership and enterprise."

Most observers in New Delhi are not as convinced as Tata, who is frequently described as an "enlightened capitalist," that Mrs. Gandhi intends to destroy private enterprise. What she does seem intent on doing, however, is developing something she calls the "joint sector," an ill-defined melding of government and private management.

POLITICAL MOTIVATION

The effort to eat into private control of industry appears to be politically motivated. Long-time observers note that dramatic moves, such as nationalizing a huge private factory, can pay dividends in impressing a large number of poor people, even though the benefits to them may be nil.

To those of India's upper class—a class which forms an eggshell-like veneer over the depths of grinding poverty—Mrs. Gandhi has become an object of scorn for her steps in nationalization and her efforts to place restrictions on both rural and urban landholdings.

To this class, from which Mrs. Gandhi and her aristocratic father themselves came, she is "that woman," just as Franklin Roosevelt was "that man in the White House" to critics of his New Deal.

The argument over nationalization is a constant one here. But, while critics can cite convincing figures as evidence that nationalized industries such as banking, insurance, and some steel plants, are doing very poorly, proponents can point only to future hopes.

As to what this furiously spinning government wheel is churning out for the people of India, Times of India columnist Prem Shankar Jha wrote recently: "What difference does it make to the 200 million people who live below the bread line whether industry is controlled by 100 or 1,000 families or, for that matter, by the state?"

GREATEST FAILURES

At this "below the breadline" level of society lie India's greatest failures in its first quarter century: Failure to provide housing for more than 10.5 million families; failure to provide education for the children of these families; and failure to provide basic medical attention.

Clinging to the lowest rung on India's social ladder are some 80 million Untouchables, or as Gandhi called them with heart-rending affection, Harijans—Children of God.

(The Untouchables were members of certain Indian castes which, though considered Hindus, were excluded from the ordinary social and religious privileges of Hinduism. India outlawed "untouchability" in 1949 and made persecution of untouchables punishable by law.

(How this caste came to be ostracized is obscure. According to one definition, Untouchables are best described as Hindus who were not allowed to enter ordinary Hindu temples and who supposedly caused pollution to ordinary Hindus either by touch or by proximity.)

Untouchables, in effect relegated an entire community to the dregs of society. And, as American Blacks have learned, prejudices cannot be legislated out of existence. Untouchability is still very much a fact of Indian life, not only in the villages but in the big cities as well.

Even in New Delhi, where a handful of Harijans have become Cabinet ministers and public figures, the men and women who sweep the streets and empty latrines are always Untouchables.

In the villages, their lot is far more degrading—and dangerous. In the first six months of this year alone, 20 cases have been reported of Untouchables being made human sacrifices to satisfy obscure religious rites. Those cases not reported, according to one authority, "must be legion."

Officially, prejudice against Untouchables is exercised in diverse ways. For instance, when electric power is installed in rural villages, the adjacent slum areas occupied by the Untouchables of the village are inevitably ignored. There is now a program to provide electrification for one Harijan settlement a day in each state in the country.

But, according to one official source, government measures have had no significant effect on improving the overall status of Untouchables since 1947.

The Untouchables and the lower, or "scheduled," castes and tribal groups make up the breeding ground for India's exploding population. According to the official 1971 census, the population now stands at 548 million, an increase of 24.8 per cent in the last decade—the highest growth rate for any decade to date.

RATE OF BIRTHS

According to informed observers, the total population is nearer 560 million and the rate of births may be even higher than the one officially reported.

The goal of the national family planning program is to reduce the growth rate from 39 per thousand to 32 by the end of the current five-year plan in mid-1974. "The achievements so far do not indicate that, except in a few states, this goal will be reached," Health and Family Planning Minister Uma Shankar Dixit said recently.

All these social problems are very serious. Some of Prime Minister Ghandi's harshest critics say India's social ills continue unabated because she has concentrated her efforts on making a place for herself—and India—in the world instead of making India a better place to live.

Whether this criticism is valid or not, there is no question that the daughter of Nehru has far surpassed her predecessors in gaining international position and respect for both herself and her country.

By shrewdly accepting the courtship of the Soviet Union at a time when war with Pakistan over Bengali nationalism was growing imminent, she cleared the way for her generals to fight the battle without having to worry about superpower intervention.

RINGING VICTORY

The ringing victory over Pakistan has also swept aside that lingering aura of nonalignment, so carefully nurtured by Nehru. And though Mrs. Gandhi and her ministers would be loath to admit that nonalignment is a thing of the past, leading Indian political scientists are not only open about it, but proud.

"Nonalignment answered our needs for security and our urges for prestige," said a top government defense analyst in an interview. "By being friendly in varying degrees with Washington, Moscow and Peking, Mr. Nehru hoped to make the Subcontinent free from excessively hostile interference by any major power. Indo-Pak strains were there for anyone to exploit."

For a number of years, India consoled itself by saying it was an area of agreement between the Soviet Union and the United States. But as ambitious a figure as Mrs. Gandhi could not be content with this self-deception forever.

Then, in December, 1970, Sheikh Mujibur Rahman won an impressive victory in the East Pakistani elections, and Mrs. Gandhi saw that the unity of Pakistan was in serious trouble.

Here at last was a hope for India to reconstruct the Subcontinent to its liking.

Victory gave India the position it has craved since Britain partitioned the Subcontinent preceding independence.

WANTS RECOGNITION

What Mrs. Gandhi wants now from the United States and China, and already enjoys from the Soviet Union, is the recognition that India reigns supreme in South Asia.

There can be no doubt that much of the indigenous criticism leveled at Mrs. Gandhi is political carping. She has achieved in her tenure progress and stability beyond the dreams of the former British rulers and the Indians who initially inherited leadership.

In some ways, progress has been so significant as to cause some criticism to become quite fine-grained, in itself a tribute to India's first 25 years.

But there can also be no doubt that the next 25 years must be a period of advance for the Indian people themselves. While they may no longer be the starving masses that once haunted the conscience of the world, their suffering is still overwhelming.

Until this suffering is alleviated, India's progress will continue to be irregular, like the two-wheeled bullock cart, sometimes lurching forward and sometimes lumbering in a circle.

Mr. HUMPHREY. Mr. President, in noting the problems which India faces, it would be supercilious for us to leave it at that. The scale of India's problems may dwarf our own in some areas, but not all. In fact what is most striking are the resemblances and the need for greater cooperation between the United States and India in solving our problems. Mrs. Gandhi spoke in part about this in her very eloquent address to the International Conference on the Human Environment in Stockholm. Few representatives of our own Government have really spoken in concrete terms about how we can collaborate with Indian leaders to tackle the problems we share and those we do not as well. Little representation has been made on the part of this administration about American concern that close relations between the United States and India not languish any longer. Too little has been done, and too much remains to be done.

There are those of us in this country who are sensitive to this gap. And we will do all we can to repair it. Confirmation of this desire is better than shallow adulation. India is a great land, and can be a stabilizing force for peace in Asia. But it needs assurance and encouragement, something we can provide with effort and imagination.

Independence was a great achievement in Indian history. There have been other great achievements in its most recent history, but none would be so monumental as the achievement of high socioeconomic standards and peace in South Asia. None would be so respected as a devotion of human energies to the individual and the mass of people in India, to their satisfaction and contents.

> When one knows thee, then alien there is none, then no door is shut. Oh, grant me my prayer that I may never lose the touch of the one in the play of the many.
>
> —Rabindranath Tagore.

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Is there further morning business? If not, morning business is closed.

INTERIM AGREEMENT ON LIMITATION OF STRATEGIC OFFENSIVE WEAPONS

The PRESIDING OFFICER. Under the previous order, the Chair lays before the Senate the unfinished business, Senate Joint Resolution 241, which the clerk will state by title.

The assistant legislative clerk read the joint resolution as follows:

A joint resolution (S.J. Res. 241) authorizing the President to approve an interim agreement between the United States and the Union of Soviet Socialist Republics.

The Senate proceeded to consider the joint resolution.

The PRESIDING OFFICER. The question is on the amendment of the Senator from Montana. The yeas and nays have been ordered.

THE SENATE'S ROLE IN STRATEGIC ARMS LIMITATION—THE JACKSON-SCOTT AMENDMENT

Mr. BELLMON. Mr. President, I am happy to be one of the cosponsors of a significant amendment to Senate Joint Resolution 241. The amendment, as Members know, has gained support from both sides of the aisle and from the administration itself. This spirit of bipartnership has an honorable history in the conduct of U.S. foreign policy. Our greatest successes in this area have come when partisanship was laid aside, and when all Americans rallied around certain enduring principles of policy.

Mr. President, there has been broad acclaim, both here and abroad, for the President's achievements in SALT I. But not even the President has claimed that the ABM Treaty and the interim agreement have put the problem of strategic weapons to rest. Nor has the President done anything but encourage the closest congressional scrutiny of these accords. The President recognizes that when the security of the Nation is involved, there should be no such thing as rivalry between the parties or between the branches of Government.

Mr. President, the limitation of strategic arms is as important a matter as we have ever undertaken in the foreign policy field. Success in controlling strategic weapons can bring us closer to the goal we have sought since atomic weapons were first made—a reduction in the possibility of nuclear war. It is, therefore, of the highest importance that the Senate do its share in establishing principles to guide consideration of this all-important matter, and that those principles be of a kind which can gather the broadest public support.

I believe that the amendment we are proposing does embody simple and sensible and consistent principles. I believe these are principles that the American people are prepared to support. I would add, Mr. President, that there has been much public confusion over the terms of the agreements we are being asked to approve. There has been considerable public discussion of the technical problems involved in the limitation of strategic arms, but comparatively little consideration given to the guidelines which should govern the conduct of future negotiations. I think it is high time that the American people know the Senate's views on these matters.

Now, what principles should we be talking about? I suggest, Mr. President, that the most important are set forth in the text of this amendment. It should be perfectly clear to the entire world that this Nation's intentions are entirely peaceful. It should be clear that we have no desire for territorial gain, and no desire to exert our will over the people of any other nation.

Actions of the United States following World War II should have made these facts abundantly clear. At the end of the war, the United States had the most powerful military establishment ever known to mankind—a military machine that, with very little effort, could have conquered and dominated every continent.

We were the first and only nation to possess the atomic bomb, and this weapon alone was sufficiently ominous to blackmail the rest of mankind. But instead of using our atomic capability for national gain, we shared the knowledge with the nations of the world.

In terms of conventional forces, at that time we had more men under arms, more ships, more planes, more tanks, and other heavy armaments than any other nation.

Instead of using these forces for military gain, this great machine was virtually dismantled, the planes junked, the ships put in mothballs, and the soldiers returned to civilian life.

We did not have claim on any territory from wartime victories.

Our industrial complex, which was the greatest ever conceived and built by mankind, was totally untouched by the ravages of war. Yet the military production from this military complex was rapidly changed to civilian production. So, in my mind, there can be no genuine question about the peaceful actions and peaceful intentions of the United States and of the citizens of the country. But, to help keep the record straight, I would like to contrast the actions of the United States at the end of World War II and in the time since then with the actions of the Soviet Union.

Since World War II, we have seen the Russian Government cause frequent and serious disruptions of international affairs. We remember clearly the actions that led up to the Berlin blockade. We remember the Russian military activities at the time of the Hungarian Revolution. We remember similar actions on the part of the Russian Government when there was an uprising in East Germany. We remember vividly the Russian involvement in Cuba which led to the Cuban crisis.

More recently, we know of the construction of the Berlin Wall and of the Russian military action in Czechoslovakia which crushed the freedom of the citizens of that country.

Now, Mr. President, we are subjected to a period of time when, for reasons which none of us can fully understand, the Russian Government seems to be smiling, but none of us can be certain how long this frame of mind will last for that Government, which has caused so much trouble in the world since World War II. We know that zebras do not change their stripes, but we are not certain yet whether or not a bear can permanently change its personality.

Mr. President, in addition to the other actions that I have mentioned that our country has taken since World War II to bring about peace in the world, I would call the attention of the Senate to the fact that during this period, according to the best records I can get, the United States has put forth a grand total of almost $150 billion in foreign aid, to former foes and to our friends alike, and this has gone a long way toward building up the economies of many countries, some of which are now strong enough to challenge us seriously and successfully in the marketplace.

So the record is that for more than 25 years, the United States has sought ways to prevent the outbreak of general nuclear war. All of the strategic programs funded by the Congress have had that end in mind. We have committed ourselves to a posture of deterrence, a posture which says to any potential adversary that the initiation of nuclear hostilities against the United States will be tantamount to self-destruction.

Such a posture will work, such a posture will be believed, only when an adversary is convinced that he cannot execute a disarming first strike against us. He will not, therefore, look solely at the size of our inventory of strategic weapons—the number of missiles, the number of aircraft, or the number of warheads. He will concentrate instead on the number of strategic weapons that will be able to survive his first attack. Thus it is the survivability of our strategic arsenal, even more than its size or its destructive power, which is vital to the maintenance of deterrence.

The testimony of our diplomatic and military experts before Senate committees makes it plain that the interim agreement, in and of itself, does not provide certain assurance of the survivability of America's deterrent. The record of the hearings—a record I commend to the attention of all Senators—makes it clear that there is enough leeway permitted to the Soviets in the way of military modernization to cause me to conclude that the survivability of a sufficient U.S. deterrent force is not a certainty in or after 1977.

The capacity to retaliate after a first strike is affected crucially by the type of weapon available. Current American ICBM and Polaris capabilities would be most effective against cities, the so-called soft targets. In contrast, the Soviet nuclear force, with its SS-9 ICBM armed with a 25 megaton warhead, seems to be designed primarily for destroying ICBM silos and other strategic capabilities without employing the smaller warhead missiles deployed on the submarine force. The United States could retaliate with its Polaris squadrons primarily against Soviet cities. But this would still leave the Soviet Union with a capability for destroying American cities. In these circumstances, as President Nixon has asked:

> Should a President, in the event of a nuclear attack, be left with the single option of ordering the mass destruction of enemy civilians, in the face of the certainty that it would be followed by the mass slaughter of Americans?

If the U.S.S.R. possesses a counterforce first-strike arsenal, possession of even an assured second-strike capacity by both sides is not the equivalent of parity. The threat of such a Soviet counterforce capability is precisely the reason for the alarm over the Soviet strategic programs.

The U.S.S.R. has constructed a large ICBM, the SS-9, for which the United States has no counterpart. Deployed in sufficient numbers and armed with the multiple independently targetable warheads—MIRV's—of sufficient accuracy, this missile could threaten our land-based ICBM forces. Our MIRV systems, by contrast, do not have the combination of numbers, accuracy, and warhead yield to pose a threat to the Soviet land-based ICBM force.

The political consequence of this sort of "parity"—which is really U.S. inferiority—is the elimination of the U.S. nuclear force as protection for our allies and friends against a Soviet military incursion, or at least a major decline in its credibility.

It is this fact which makes necessary and appropriate the declaration of policy that a failure to achieve an agreement which limits the threat to the survivability of our deterrent within 5 years could jeopardize the supreme interests of the United States. With this language, the Senate will be expressing its view that action on the part of the Soviets which could call into question the survivability of our deterrent is incompatible with international stability and American interests. As such, our amendment is a reaffirmation of the principle which has governed our strategic planning for a quarter of a century. It makes it clear to friend and adversary alike that the United States is determined to maintain a credible strategic posture. And it tells the American people that they can have confidence in the determination of their Congress to protect their security.

The adoption of this amendment in no way alters the content of the interim agreement which we are asked to approve. Adopting this amendment will indicate, however, that we are prepared to face up to whatever problems we may encounter over the next 5 years. I certainly hope that these problems will not arise, but it is only prudent to recognize the possibility.

Can we forget that the Soviet Union adheres to a doctrine of historical evolution which can be described only as expansionist, the eventual triumph of the Soviet brand of communism as the future world order?

As Leonid Brezhnev put it at the 1971 24th Congress of the Communist Party of the Soviet Union:

> In recognition of its international duty, the USSR will continue to pursue a line in international affairs toward promoting the further activation of the world anti-imperialist struggle and the strengthening of the combat unity of all its participants. The total triumph of socialism the world over is inevitable, and for this triumph, for the happiness of the working people, we will fight, unsparing of our strength.

The other important principle I would emphasize today, Mr. President, is the need for Soviet-American balance in any comprehensive agreement on strategic offensive arms. I must say, in all candor, that I am surprised that this aspect of our amendment has engendered controversy. I would have thought that no Member of the Senate would recommend that the President of the United States sign a permanent treaty in which the United States did not receive equal consideration with the other party. I would have thought, therefore, that no Senator would oppose a declaration of the Senate's views on this matter.

What we will be saying in approving this amendment, Mr. President, is that in any treaty on strategic offensive arms, the United States should not be limited to levels of intercontinental strategic forces below, or inferior to, the levels established for the Soviet Union. Now, in proposing this amendment, we do not mean to suggest that numbers alone can be or should be the sole determinant of strategic equality. Obviously, important characteristics of strategic weapons, such as throw weight, must be a part of the calculation. But it is important to point out that the administration's argument in behalf of the interim agreement rests on the premise that our advantage in technology balances out the large Soviet advantage in numbers. I therefore ask the Senate to consider how strategic equality is to be calculated once the technological gap between ourselves and the Soviets—especially in crucial areas of military technology—begins to narrow as it necessarily must over the next 5 years. Will we then be able to say that the relationship which held true in 1972 will still hold true in 1977? I think not.

In March, 1971, President Nixon said:

> There are two great powers facing us, Russia and China . . . Certainly neither of them wants war. But both are motivated by a philosophy which announces itself as expansionist in character. This they will admit themselves. And only the U.S. has sufficient strength to be able to help maintain a balance in Europe and other areas that might be affected.

The great increase in Soviet strategic and conventional military power relative to the United States is no longer a matter of controversy. Within one 2-week period, the President of the United States, the Secretary of Defense, and the Chairman of the Joint Chiefs of Staff all delineated the existing and projected force levels of the Soviet Union and the United States.

The most significant elements of the Soviet military buildup relate to strategic forces, naval forces, and research and development. With respect to the first of these, President Nixon declared:

> We believe the number of Soviet strategic forces now exceeds the level needed for deterrence.

More explicitly, he asserted:

> The design and growth of these [Soviet] forces leads inescapably to profound questions concerning the threats we will face in the future, and the adequacy of our current strategic forces to meet the requirements of our society.

As to naval forces, Adm. Thomas H. Moorer summed up as follows:

> The Soviet deep water fleet, over the past decade, has been steadily expanding in size and capability. They are expected to have some 217 operational combat surface ships by the middle of this year, and this number will probably increase through the 1970's. In contrast to our fleet, which still has a sizable number of combat ships more than 20 years old, the Soviet fleet is much newer, with very few ships more than 20 years old.

With respect to research and engineering, Dr. John Foster, Director of Defense Research and Engineering, testified in recent hearings before the Armed Services Committees of the House and Senate that, since 1968, the Soviet Union has allocated most of its funding in research, development, testing, and engineering to the military. Since 1968, there has been an annual growth rate of about 15 percent in Soviet military expenditures. As a result, the Soviet devoted the equivalent of about $11 billion to military research and development during fiscal

1972, 40 to 50 percent more than the United States. Secretary of Defense Laird has acknowledged that "reductions in technological areas already have seriously affected our ability to sustain essential technological leadership."

The possibility of successful recourse by the United States to superior technology as a shortcut for diplomatic or military error is fast disappearing. In fact, the declining U.S. effort in R. & D. increases the prospects for the kind of technological surprise that is exemplified in the Soviet launching of the first Sputnik in 1957. Failure to maintain its competitive position on the frontiers of science research and technological development reduces the ability of the United States to respond effectively to Soviet advances. A disorganized and declining R. & D. program cannot be revived immediately, even by the most prodigious efforts, because of the lead time between scientific discovery, technological application and industrial production. At best, United States-Soviet R. & D., competition "is a horse race, with the United States now ahead by a neck, but falling back." So it is obvious that we cannot place our total dependence upon the temporary and diminishing technological advantages that this country presently enjoys.

The U.S.S.R.'s motives in arms control are numerous. And its reasons for favoring an agreement may include a desire to slow the U.S. deployment of advanced weapons systems while the Soviet Union registers technological advances.

For the U.S.S.R. an agreed arms control formula which halts further quantitative deployment in offensive systems is more desirable than one which prevents qualitative improvement of existing weapons.

The motives, definition, and type of limitation converge in the issue of verification. For example, a limitation on MIRVs cannot be supervised by means of short ground inspection, but new missile silos under construction can be observed by satellite.

The ability of the United States to enter a strategic arms agreement compatible with national security depends largely upon an estimate of U.S. ability to restore a balanced relationship between United States and Soviet strategic capabilities through qualitative improvements. Simultaneously, the United States and its allies must be able to match Soviet conventional forces in the post-SALT era.

The nuclear protection provided by U.S. strategic forces to our friends and allies is being reduced by the vast increase in Soviet military capabilities. In addition, the Soviet Union appears to be developing naval and air forces capable of projecting its political influence on a global scale.

Through its superior conventional strength and growing nuclear forces, the Soviet Union is enjoying the status quo in Eastern Europe, while maneuvering to keep Western Europe divided and to strengthen forces friendly to the Soviet Union. Soviet influence and presence are expanding in the Mediterranean, in the Middle East, and in the Indian Ocean. Through skillful manipulation of local conflict and direct military intervention along the Suez Canal, the Soviet Union is bidding for control of the old British imperial route to the Indian Ocean and Far East.

The political trends in the Southern Hemisphere—anti-American and revolutionary—favor Soviet activities which have the effect, at the least, of restricting future U.S. flexibility in dealing with the crises like Cuba—1962—and the Dominican Republic—1965.

The uncertainty associated with nuclear deterrence cannot check a calculated, incremental extension of Soviet foreign policy interests and commitments, buttressed by conventional military presence and an ever more-powerful strategic nuclear force. Even the most cautious and least pretentious of the tendencies in Soviet foreign policy presumes the growth of Soviet power and influence in areas from which the Soviet Union has been historically excluded—from the Middle East to Southeast Asia to Latin America. The Soviet Union stands ready, as never before, to complement and consolidate the political gains of the indirect approach by military might.

The reluctance of many Americans to cope with the world beyond U.S. borders could be read by Soviet policymakers as presenting opportunities to alter the global balance of power, to fragment our alliances, and to threaten U.S. security itself.

Growing American appearances of irresolution before Soviet advances are already making the United States a questionable partner for those who must risk our friendship as an alternative to accommodation with the Soviet Union. The United States can have no policy save retreat if it is unable or unwilling to maintain political commitments with a defense capability sufficient to deter the Soviet Union from political exploitation of the vast Soviet military establishment.

Yet, in recent years, we have sought to achieve security at bargain rates. The proof of this can be seen in the continuous decline in the portion of our ever-expanding GNP that is committed to national defense—in contrast to the steady increase in comparable Soviet expenditures. Although the wide margin of superiority we enjoyed over the Soviet Union a decade ago has, until recently, sustained the psychological appearance of U.S. advantage, we have failed to recognize that national security and international peace cannot be bought cheaply. The United States may have forgotten the maxim that there is room for only one at the top. Leonid Brezhnev's declaration to the 24th party congress—"the total triumph of socialism the world over is inevitable"—reminds us that the Soviet Union wants to be that one. This fact should not be lost upon present or future Presidents of the United States or upon the negotiators who represent this country at the conference table, and this is the reason for the Jackson amendment.

Mr. President, I hold in my hands a document entitled "National Security Strategy of Realistic Deterrence" put out by Secretary of Defense Laird in connection with his Department's report for fiscal year 1973. Throughout the document there are repeated statements which lend credence to the position I have been expressing; namely, that our negotiators and our Government need the support of the Congress and the people of this country as they attempt to work out an agreement with the Soviet Union that provides a balance between the military capabilities of our two countries.

On page 16 of this report, Secretary Laird says:

> We face a whole range of incredibly complex problems. The responsibility of meeting these problems is one the Congress shares with us.

So, Mr. President, to me, this plainly says that the Department of Defense recognizes the need for congressional understanding and support as they attempt to prepare themselves to cope with the incredibly complex problems he mentions.

On page 22, the Secretary says:

> Successful implementation of the Strategy of Realistic Deterrence is, I believe, the most difficult and challenging national security effort this country has ever undertaken. This is so because we must move forward in an environment of virtual balance in the strategic nuclear field, and in a period of vigorous Soviet military expansion at sea, on the land, in the air and in space.

Later on he says:

> Success will require deep understanding and strong support, both from Congress and the American people. For without understanding of our national objectives, and without support for the means we adopt to reach them, no strategy pursued by the representative leaders of a free and open society can possibly succeed for long when contested by a powerful, closed society. Free nations must measure the ultimate strength of their defense policies in proportion to the willing support their citizens give to those policies. A closed society is not dependent on such popular support.

So, Mr. President, it is obvious to me that the Secretary of Defense, who must face these questions daily, is virtually pleading for action by Congress to show that the American people and this body are behind the administration in their efforts to achieve the kind of balance that can lead to lasting peace.

Again, on page 24, the Secretary says:

> Effective deterrence, of course, is not divisible. It is based on a balanced force structure of strategic and theater nuclear weapons and adequate U.S. and allied conventional defenses.

It is obvious from this report that the Secretary of Defense needs and solicits and, in fact, almost requires two things; one is the support which only the Congress can give and, second, are the tools to keep a reasonable balance between the strategic forces of the United States and the Soviet Union.

In February of 1972, President Nixon sent Congress a report entitled "United States Foreign Policy for the 1970's—The Emerging Structuring of Peace."

On page 171 of that report is an expression by the President of his feeling on the matter that the Senate now has under consideration and I should like to read for the RECORD what the President had to say:

> National security is the paramount responsibility of any American President. There has always been an essential continuity between administrations in meeting this responsibility. Just as long-range decisions of previous Presidents have shaped present capabilities, the choices I make today will be crucial to our future security.
>
> Security issues in the 1970's are more complex than ever before.
>
> The fundamental requirements for our security are not as obvious today as they were in the earlier bipolar era when threats were less complex.
>
> Many citizens and legislators are understandably concerned over the high cost of modern weapons systems, and over the size of the U.S. share of the heavy security burdens borne by us and our increasingly prosperous allies.
>
> The Vietnam experience has left some Americans skeptical concerning defense issues.

Then this paragraph which seems to be particularly pertinent and applies to the debate now going on:

> The current strategic balance with the Soviet Union creates new conditions which could provide additional incentives for negotiations on limiting armaments, but could also lead to localized conflicts below the level of strategic nuclear war.

The President goes on to say:

> To meet our security requirements under the Nixon Doctrine and a national strategy of realistic deterrence, we must harmonize our essential strategic objectives, our general defense posture, and our foreign policy requirements with the resources available to meet our security and domestic needs. Our military program must not absorb resources beyond those essential to meet foreseeable dangers. Nevertheless, I recognize that there is a prudent minimum below which we cannot go without jeopardizing the nation's fundamental security interests. If this were allowed to happen, we would lose control over our destiny both at home and abroad.
>
> In this Administration, we have been able, for the first time in twenty years, to spend more on domestic social programs than on defense. The total defense budget is today a smaller portion of the Federal Budget and a smaller portion of our Gross National Product than at any time since the Korean War. Measured in terms of constant dollars, our defense spending is already down to the pre-Vietnam War level. It will remain so next year, even though overall defense spending will be increased in order to maintain our security at an adequate level.

Then this is what President Nixon had to say on the subject we are discussing now:

> American strength is essential if we are to move from an era of confrontation toward an era of negotiation. As the world's strongest power, this nation has important responsibilities to its friends as well as unique opportunities for improving global stability. American weakness would make no contribution to peace. On the contrary, it would undermine prospects for peace.

The Jackson amendment would have the effect of insisting that our negotiators not negotiate us into a position of weakness but rather we insist on a position of balance but in an equality so that we would be able to continue to make a contribution to peace through the strength of our military strategic forces.

President Nixon continues:

> We have taken a number of steps to nurture an international climate in which progress in arms control is possible. In the past year we have moved forward in bilateral discussions with the Soviet Union on strategic arms limitations and in multilateral efforts to provide a firm basis for control of both nuclear and conventional weapons. We have made important advances toward achieving strategic stability, but there also have been disturbing developments. While engaged in the strategic arms negotiations we have witnessed a continuing Soviet buildup in nearly every major category of military power.

What that says is, we may be dealing with an enemy, a potential enemy who puts on two faces. On the one hand he seems to be smiling and willing to work out an agreement that will help preserve the peace and then, on the other hand, he is developing his capacity for making war at a highly accelerated rate.

President Nixon says further:

> An agreement to limit strategic weapons would be an unprecedented achievement. Our goal is to stabilize the strategic balance through mutual restraint and agreements which provide no unilateral advantage. We recognize that only a mutually designed balance of strategic armaments can establish a shared basis for security. On the other hand, if the Soviet Union attempts to extend its strategic buildup beyond equality, the United States will have no choice but to initiate compensating actions.

Mr. President, in my opinion based upon the statements by both the Secretary of Defense and President Nixon, our Government's leaders are inviting, and, in fact, almost beseeching Congress to give them the support that they need at the negotiating table to help make certain that this country does not find itself in a position of inferiority which would certainly do a great deal to unsettle conditions in the world and that would certainly contribute nothing to the peace of the world.

For that reason, Mr. President, the Jackson amendment deserves the support of the Senate. It will establish the Senate's position in finding a balance between our country and the U.S.S.R. in the future. It will help us in our efforts to secure a more peaceful world. We should approve the Interim Agreement on Offensive Weapons. However, at the same time we should express our real and legitimate concerns by voting for the Jackson amendment.

Mr. President, it seems appropriate to me to quote a statement made by President Nixon in 1971 when he said:

> We are not bent on conquest or on threatening others. But we do have a nuclear umbrella that can protect others, above all the states to which we are allied or in which we have great national interest. This is the moral force behind our position. We could become a terrible threat to the world if we were to lose that restraint or if we were to sacrifice our own power and allow ourselves to become too weak to uphold the weak.

Mr. President, I yield the floor.

The PRESIDING OFFICER (Mr. HOLLINGS). The Senator from New York is recognized.

Mr. BUCKLEY. Mr. President, I will shortly be addressing myself to the Jackson amendment. However, at this time I would like to make some comments about the interim agreement.

The very title of the interim agreement placing limitations on certain categories of strategic arms reminds us that we are concerned with a part of an ongoing process. I mention this obvious fact because it would be unwise for us to consider the agreement as an end in itself. As an interim agreement, it should serve not to put end to thought about the state of our national defense in the field of nuclear arms, but to prod us into thinking through the difficult and complex problems with which we are presently faced and will continue to be faced during the next 5 critical years.

We in the Senate have the responsibility to advise as well as consent in matters affecting our country's external affairs. Any thoughtful debate on the matter now before us must necessarily take into consideration the larger perspective of our long-term security needs.

It is of fundamental importance that we understand that in the interim agreement, the United States has accepted a position of significant quantitative inferiority in every area of offensive strength which is subject to its control. Depending on how the parties choose to exercise their options under the agreement, the Soviet Union will be able to deploy, in round figures, between 1,400 and 1,600 intercontinental ballistic missiles to our 1,000, and over 1,000 submarine-launched ballistic missiles to our 700. She will be able to expand her fleet of modern Y-class nuclear-powered submarines to 62, while retaining 22 diesel-powered G-class submarines, for a total force of 84 missile-launching submarines in comparison with the fleet of 44 which we will be allowed to maintain.

Most significantly, because of the enormous size of Russia's heavy missiles, the ceilings placed on intercontinental and submarine-launched ballistic missiles will provide the Soviets with a more than four times advantage over the United States in the payload capacity or "throw-weight" of these weapons systems. This means that the Russians will be guaranteed the capability, during the term of the agreement, to deploy on these missiles more than four times as many warheads as the United States, should they achieve parity with us in warhead design. Furthermore, if the Soviets make improvements in the propulsion system and other characteristics of their missiles which are permitted under the agreement, the advantage could be as much as 9 or 10 to 1.

It is argued that the quantitative superiority in ICBM's and SLBM's which the interim agreement provides the Soviets is not cause for concern because first, the Soviets will not be able to exploit that superiority before the expiration of the agreement 5 years hence; and second, if we take into consideration all nuclear weapons at our disposal—airborne as well as missile launched—we currently enjoy a 2-to-1 advantage over the Russians in deliverable nuclear warheads which is more than adequate to protect us during the life of the agreement. This argument is based on U.S. superiority in manned heavy bombers, in multiple warhead technology, and in forward based systems. I believe, however, that it is important to emphasize the fragile and transitory character of this "advantage."

First, with regard to the U.S. superiority in manned bombers, this advantage quickly disappears when one includes the medium bomber forces available to both sides. While the United States has about 75 refuelable FB–111 medium bombers in the Strategic Air Command which can operate as part of our retaliatory force, the Soviets have approximately 550 TU–16 Badgers and 150 TU–22 Blinder refuelable medium bombers which are capable of reaching the United States.

Second, while a combination of skillful warhead miniaturization and relatively accurate guidance systems provides the United States with a formidable present advantage in multiple warhead technology, we have little reason to be complacent. It should be noted that the United States developed its multiple warhead hardware in approximately 3 years, from 1966 through 1969. Discussions of the engineering characteristics of our multiple warhead missiles have been widely disseminated in trade journals and congressional hearings. I believe it would be imprudent, at best, to presume that the Soviets are so technologically retarded that they would be incapable of developing and deploying significant numbers of multiple warheads within the 5-year term of the interim agreement.

It has been argued that our intelligence estimates give the Soviet Union only a limited capability to develop multiple warhead technology. I would point out that these intelligence analysts are the ones who have consistently underestimated Soviet nuclear force objectives. It is these same intelligence analysts who advised Secretary of Defense Robert S. McNamara in the mid-1960's that the Soviet Union had permanently accepted the status of strategic inferiority. It is these same intelligence analysts who concluded in 1964 that the Chinese Communists would detonate a primitive nuclear device made of plutonium rather than the uranium device actually detonated, a device which required a huge gaseous diffusion plant for the manufacture of nuclear material.

Third, with regard to forward based systems, it is true that the United States maintains a force of several hundred fighter bombers based on the European mainland. In addition, the 6th Fleet maintains several aircraft carriers in the Mediterranean with aircraft capable of reaching Soviet targets. The weakness in relying on forward based systems for deterrence purposes lies in our vulnerability to preemption.

The Soviet Union maintains a force of some 700 medium and intermediate range ballistic missiles targeted on Western Europe. Virtually all U.S. aircraft based on the European mainland could be wiped out in a Soviet first strike. This would leave the relatively few nuclear-capable heavy aircraft based on attack aircraft carriers in the Mediterranean for deterrence purposes. Aircraft from the Mediterranean would not have the range to attack sufficient numbers of targets within the Soviet Union to provide credible deterrence. Thus, for strategic deterrence purposes, the U.S. "advantage" in forward based systems is illusory.

With respect to these and other advantages which the United States may currently possess in noncontrolled strategic offensive weapons, it should be noted that there is nothing in the SALT accords to prevent the Soviet Union from overtaking us in every category while these accords prohibit us from overtaking the Soviet Union in those areas where they have been assured substantial margins of superiority.

There are additional hazards in the interim agreement which result from ambiguities in its text or from the inadequacy of its provisions for verification. For example:

First. The agreement places a ceiling on intercontinental ballistic missiles based on the number of light and heavy missile launchers in place or under construction as of July 1, 1972. Yet the United States has no definitive information as to the size, number, and approximate location of land-based Soviet strategic missile forces. At the present time, the United States is relying entirely on its own intelligence estimates. It should be noted that the general area in which Soviet ICBM's are deployed is in North-Central Asia, where the normal cloud cover is among the heaviest of any region in the Northern Hemisphere. It is entirely possible that at some time subsequent to July 1, 1972, scores of additional ICBM's could be discovered by our reconnaissance satellites. As the agreement only prohibits "starts" on new construction after that date, we would face the practical difficulty of not being able to establish whether or not newly discovered missile sites had been constructed in violation of the agreement.

Second. It is not at all clear that the so-called national technical means of verification available to the United States will suffice to provide conclusive evidence as to whether or not Soviet medium and intermediate range ballistic missiles—M/IRBM—will be upgraded to an intercontinental capability through the replacement of obsolescent SS–4 and SS–5 missiles with variable range SS–11 missiles. It has already been noted in the press and elsewhere that the Soviet Union has begun to place SS–11 missiles in her M/IRBM fields in the western part of the Soviet Union. If the United States does not obtain ironclad proof that an upgrading to an intercontinental capability is not taking place the Soviet Union could add an additional 700 ICBM's to its arsenal without detection.

Third. While it is agreed that missiles and launchers may be modernized and replaced so long as the respective ceilings on light and heavy missiles are not exceeded, nowhere is there an unambiguous definition of what is meant by a "heavy missile." The United States has issued a unilateral definition, but this is somewhat less than satisfactory. If, for example, the Soviet Union were to exchange its existing SS–9's for new missiles having twice their payload capacity—and this may well be possible even within our own definition of what constitutes a heavy missile—the resulting threat to our land-based forces could be so formidable as to allow us no prudent alternative but to develop and deploy a mobile ICBM system on an urgent basis.

I am quite prepared to accept the proposition that given the rate at which the Soviet Union has been overtaking us in its deployment of ICBM's and nuclear-powered submarines, the risks which we are most assuredly assuming under the interim agreement are nonetheless far smaller than those we would be assuming if current trends were allowed to continue. I do feel, however, that it is most important that the Congress recognize that we are, in fact, assuming substantial risks so that we may take appropriate measures to minimize them during the term of the agreement and to place ourselves in an optimum position to negotiate a satisfactory SALT II agreement within the next 5 years; or should this fail, to move swiftly to restore and sustain a posture of parity in offensive nuclear weapons.

I believe that it is imperative that the debate in the Congress and the language of the resolution approving the agreement reflect the following position; namely, that the United States cannot prudently enter into the interim agreement except with the understanding that it must immediately intensify its investment in military research, development and procurement so as to first, preserve those areas of strategic superiority which it currently enjoys, and second, achieve the maximum qualitative improvement possible during the term of the interim agreement in those weapons systems in which it will be frozen into a position of quantitative inferiority. The debate must also show that we intend to be thoroughly alert during the period of the interim agreement, and that we will not hesitate to exercise our right of termination if we should find the survivability of our deterrent forces threatened by significant qualitative improvements in the Soviet Union's offensive capabilities.

I believe that if the Congress will so condition its approval of the interim agreement, and if the Congress will give further evidence that it understands the agreement's inherent risks by launching a serious and sustained program to upgrade our strategic and military capabilities within the limits imposed by the two agreements, then we will not only minimize those risks as they affect our physical security, but will at the same time avoid a critical dilution of our influence in world affairs.

If we do anything less, if it appears that we are willing to retreat to a position of permanent strategic inferiority, then we will see subtle but corrosive forces at work in the world arena which will have the most serious implications for the United States and for the cause of a lasting peace.

We can expect, for example, to see the Soviet leadership intensify its diplomatic pressures around the globe; and in any future confrontations with the West, to assume more confident and intransigent attitudes. By the same token, to the extent that the relative strategic position of the United States declines, so will the options which are available to an American President in any such future political crisis with the inevitable erosion of his ability to support vital foreign policy objectives. Furthermore, it is not only our own diplomatic options which will be affected by an understanding that the Soviet Union has achieved a position of strategic supremacy. In testifying before the Foreign Relations Committee, Dr. Donald G. Brennan, of the Hudson Institute, pointed to the following adverse political consequences:

> The new imbalance of power will become established in the minds of our allies, which will utimately lead them to be more responsive, perhaps unduly responsive, to Soviet diplomatic pressures and initiatives.

What Dr. Brennan is speaking of is a position where Soviet strength vis-a-vis American strength becomes so large that no European nation could prudently anticipate that we would, in fact, launch a nuclear attack to protect Western European interests because of the certainty that our own cities would be devasted.

Nor can we expect the Japanese to accept with equanimity so dramatic a change in the relative strength of the super powers. Japan will be left little choice but either to seek an accommodation with the Communist powers or, in the alternative, to develop an independent military and strategic capability which will guarantee it a degree of independence in matters affecting its own security.

I can assure Members of the Senate that no one in the western Pacific today would look forward to the time when Japan once again achieved the capacity for imperialistic or expansive aggressive military action.

What I am suggesting, in short, is that unless we couple our approval of the interim agreement with a clear indication that we will settle for nothing less than nuclear parity, unless we launch credible programs for the modernization of our strategic capabilities within the limits set by this agreement, the SALT accords will prove not only dangerous to the security of the United States but to the political stability of the globe.

Mr. President, we find ourselves in a unique historical position. We do not yet know the nature of the interim period to which the title of the agreement refers. Perhaps history will record that it was an interim between an age of nuclear fear and an age of international peace based on prudence and reason. Perhaps, on the other hand, it will be seen as an interim between a time when the United States was the leading nuclear power and a time when it lost that position of power to the Soviet Union.

We cannot know now what history will say about the next 5 critical years. What we can do is to make certain that whatever the ultimate verdict of history, no one will ever be able to look back upon the debate in this chamber and say that we did not work hard enough or long enough, or think problems through carefully enough, or undertake to sacrifice enough to make certain that we will have done all that human beings can do to insure the security and freedom of our people.

Mr. GURNEY. Mr. President, I wish to express my wholehearted support for the proposed amendment of the distinguished Senator from Washington (Mr. JACKSON) to the interim agreement which we have before us now.

The issue before the Senate today, of course, is the approval of the interim agreement limiting certain strategic offensive weapons, which was signed by the President and Chairman Brezhnev of the Soviet Union in Moscow on May 26, 1972. Specifically, should the Senate of the United States simply approve these agreements without any comment, or should we express the views of the Senate on certain specific issues which have before now been widely debated in this body and in the public?

I believe we have an obligation to express our views as precisely as possible, and this is why I support the proposed amendment to the resolution submitted by my colleague from the State of Washington for himself and the Senator from Pennsylvania (Mr. SCOTT) and a broad bipartisan group of cosponsors.

The President advised us, when he sent the SALT agreements up here, to examine them very carefully and debate them very fully, and this is what we have done. This is what we are doing. In the course of that debate some Senators have expressed concern about the strategic situation which could emerge as a result of these agreements. I share those concerns.

Let me make it clear that I do not consider our security to be imperiled at the present time by the agreements, or our strategic posture to declare attacks or thrusts against us and our allies, as nearly as I can determine by the testimony and remarks of those more closely connected with the military situation of our country than I.

My concern is with the future, and on that point, looking down the road to the future, it seems to me that the interim agreement that we have before us, which, of course, runs for 5 years, while it places certain limits on strategic offensive forces, leaves much unlimited. In particular, it places no limitations on qualitative improvements in strategic offensive forces.

We are told by the experts there are things which the Soviet Union could do within the next 5 years which would seriously threaten our strategic capability. It is only prudent to accept that estimate. The Soviets have the capability and can surely within the 5-year period develop a MIRV warhead and to begin deployment of it.

Some of the experts in this field say they will achieve this capability long before the 5-year period has ended. Such a capability would pose a threat to our Minuteman force and thereby threaten the stability of our deterrence. Thus, by the end of that 5-year period they could be in a position to move ahead with a very serious threat to our deterrent. We simply could not stand by should such a threat begin to emerge. It would take us time to develop and deploy measures necessary to counter such a threat.

Thus, in the interest of our security and in the interest of stability, we ought to make very clear to the Soviet Union that we will not stand by and watch a threat develop without taking compensating action.

I think that by approving the proposed Jackson-Scott amendment to the resolution, we can help convey that message, and that the Soviets will understand that message, which, of course, is precisely what the amendment is designed to do.

We also, by approving this amendment, will convey the message that the United States is not prepared to permit the Soviet Union a strategic advantage in any future negotiations.

It is important not only to make this clear to the Soviet Union but also to our allies. They, after all, depend heavily on the U.S. strategic deterrent for their security. They are extremely conscious of any disparities that may exist between the United States and the Soviet Union and the respective power of these two great nations.

They follow carefully the discussion of these matters in the United States and are alert to any signal of a change in U.S. policy or any change in the strategic balance between the two nations, the Soviet Union and ourselves.

While they have supported the SALT accords to date, they also fully expect us to maintain parity with the Soviet Union, and to continue to extend our deterrent to them.

I want the Senate to approve this amendment, making clear where the United States stands, making clear that any future agreement must provide for equality.

It seems to me it is clear from the record of the past SALT negotiations that the Soviet leaders respect strength and are quite prepared to take advantage of weakness. We have an excellent example in the SALT negotiations just completed earlier this year resulting in a treaty to limit antiballistic missiles. Throughout the 2½ years of these negotiations, the United States pursued an ABM program. Many of my colleagues in this body voted against the moneys for ABM, and at least some—rather, I think many—in the belief that it would improve the prospects of negotiating ABM limits. As a matter of fact, a great deal of the debate—the historic debate, I might say—that centered around an ABM shortly after the Nixon administration took office was around the argument that we should not go ahead with the ABM, and we should not develop it, we should not deploy it, because this would somehow annoy the Soviet Union, destroy the SALT talks, and shoot down any prospects for arms limitation or peace in our time.

Fortunately, in my view, these arguments did not prevail, and as our ABM program continued, so did the SALT negotiations continue, and we now have an ABM treaty.

As a matter of fact again, one of the principal arguments in the debate on the ABM by the proponents of an ABM was that developing an ABM and deploying it would be the one greatest motivating influence on the Soviets to go ahead with a treaty limiting antiballistic missiles. As I say, the Soviets respect strength. They do not respect weakness. Many, including a number of our negotiators, and certainly including this Senator, are convinced that a major incentive for the Soviets to conclude the Moscow accords was to limit expansion of our ABM program.

They went ahead with a treaty because they respect our scientific knowledge and expertise. They knew we were ahead of them in a sophisticated ABM program. They felt that with the development and deployment of an ABM program it would perhaps alter the nuclear balance and would perhaps pose a threat to their ability to knock out our intercontinental ballistic missiles and, of course, destroy our cities and a large part of our population, and in order to stop our going ahead with our very fine ABM program, it occurs to me—and I think many others agree with this viewpoint—the Russians decided to go ahead and sign and conclude the ABM treaty.

There remain certain programs that we need to pursue if we are to maintain credible strategic deterrence. Within the terms of the interim agreement, this requires qualitative excellence in strategic forces rather than mere quantity. While the proposed amendment commits us to no specific programs, it does make clear our determination to retain qualitative excellence. I think this is most important at a time when doubts have been raised about how much money we should be spending for defense. The level of defense spending is likely to be a major issue in our political campaign this fall, and I think it will be a legitimate issue. When I say likely to be an issue, I am making a gross understatement, because it is already a big issue in the campaign with the candidates for the Republican Party and the Democratic Party, respectively, taking diametrically opposed positions on how much we should spend for defense.

Many Members of this body sincerely believe that the defense budget can and should be reduced, and that this can be done without sacrifice to our security. This issue will be debated at another time when the defense appropriations are before us.

Meanwhile, however, I believe that it is extremely desirable to make clear that, whatever our views of defense spending are on specific programs, this body is prepared to support whatever measures may be necessary to maintain a modern strategic deterrent that is inferior to none.

It is this Senator's own personal view on defense spending, that instead of cutting it, I think we should be expanding, because while the defense budget is the largest single budget in the Federal spending, it is also a fact that all during recent years the percentage of defense spending, in comparison with the gross national product and with the expanding wealth and productivity of this country, has decreased; it has not increased, it has not even remained level, but it has gone down and down every year. Not only that, but the manpower of our armed services has gone down. The employment of civilians in the Defense Department has gone down.

As far as developing any new weapons systems, we have had to struggle within the Senate and in the House of Representatives every year just in order to save the few programs we have going on now.

Mr. BUCKLEY. Mr. President, will the Senator yield for a question?

Mr. GURNEY. I am glad to yield to the distinguished Senator from New York.

Mr. BUCKLEY. Is it not true that during this period the Senator describes, in which our military spending has been declining as a percentage of our gross national product or of our Federal budget, we have also so increased salaries that, whereas we used to be spending about half of our budget for pay, we are now approaching 60 or 65 percent?

Mr. GURNEY. That is true, and the Senator makes an excellent point there. That means that, because a much larger percentage of defense spending is going for salaries, it jeopardizes the new programs we need for new weapons to keep abreast of the Soviet Union.

Mr. BUCKLEY. Is it not also true that if we take into consideration inflation, we are spending far less now than we were 10 years ago on our strategic and other weapons research?

Mr. GURNEY. The speaker is eminently correct on that point.

Mr. BUCKLEY. Is it not also true that, first of all, the Soviets are making twice the relative effort that we are at the present time, and that, with much lower manpower costs, therefore, their overall efforts in every area of military research, development, and deployment are far ahead of those of the United States?

Mr. GURNEY. I am sure the Senator's statement is correct. I do not know the percentages myself, but knowing what the Soviet Union generally does in the area of defense spending, in research and in technology, I am certain that the Senator is correct in his assumption.

Mr. BUCKLEY. I am glad to hear the Senator say that. I have a feeling, Mr. President, that so much has been said over the past years about reordering priorities that the American public at large, and perhaps even some of our colleagues who have not studied the figures, are under the impression that we have been in an arms race—by "we" I mean the United States. But I think that any careful, fair examination of the actual figures will show that we have a tortoise and a hare situation, except that the Russian hare shows no inclination to sit down and rest.

Mr. GURNEY. I think the Senator has made a very good analogy, and I think we have reached a point in the respective strengths of the two countries—in all of their weapons systems, in all of their defense establishments, in the number of soldiers they have as opposed to the number we have, in the numbers of planes they have as opposed to the numbers we have, in the numbers of submarines they have and are going to have as opposed to the numbers that we have, as well as, of course, in this whole area of intercontinental ballistic missiles, where they have more than we do, and they, of course, are racing just as hard as they can to develop the technology that we have—that it almost has come down to, not an arms race at all, but from our point of view it is almost a race for survival.

If we do not go ahead with the development of our weapons systems, especially improving the qualitative aspect of our weapons systems, then many of us believe—as I do and I am sure the distinguished Senator from New York does—that we are not only going to be in an inferior position, but that if we expect to catch up, the race is going to be one for survival—not just an arms race to keep abreast of each other, but for us to catch up in order to survive.

Mr. BUCKLEY. I am glad to hear the Senator from Florida say that, Mr. President. It also opens up another area. He has spoken about our finding ourselves in a position where we will be ending up fighting for our own survival. This suggests that we may find ourselves in a position where the balance of forces aimed at the United States becomes so large that we will no longer have the surplus strength to be able to occupy that position of being the balance wheel on the West to offset the accumulation of power behind the Iron and Bamboo Curtains.

We do know that as a result of treaties for mutual security that the United States has entered into in Europe and elsewhere since shortly after the end of the Second World War, we have been able to maintain some kind of tenuous peace, some kind of stability, all based on the assumption that the United States had the absolute power of striking at the Soviet Union without the risk of unacceptable loss to the United States. But I suggest that if we do not take the posture which is incorporated in the Jackson amendment, we will telegraph to our allies that we will find ourselves, at the end of 5 years, with a chance of being in such a position of inferiority that they can no longer rely on the United States for their protection. Is this, in the mind of the Senator from Florida, a correct assessment?

Mr. GURNEY. Yes. I think, again, that the Senator from New York has made a very viable point, and that his statement is a correct one.

In this whole area—that is, this whole area of whether the Soviets believe that we are going to undertake our responsibility to defend ourselves and also make secure our allies around the world—we could talk about other things, too: For example, whether our word is credible. That certainly is a part of the argument in connection with these agreements before us. If we let the Soviet Union go ahead of us in nuclear power, then, of course, we lose our credibility with other countries so far as our defense posture is concerned.

But this is also involved in other areas. Take the area of naval strength: Since the beginning of the recorded history of mankind, certainly a large part of the power of any nation has existed in its naval strength. That certainly is true in modern times, when Great Britain was considered the world's dominant power, or when France was considered the world's dominant power, or when Spain, during the days of the Spanish Armada, was considered the dominant power of the world. Then going back to ancient times, the Romans, and before them the Carthaginians, which nation had a very considerable navy; the Phoenicans before them—and on back through history we have never seen a time when a powerful nation did not have a strong navy.

Well, what is happening in this area? Of course, after World War II the American Navy was by far the strongest navy in the world. Great Britain, for financial reasons, gave up her colonies; and, instead of being a world power, retreated to the status of a small island nation, and at the same time gave up her large navy. Now it has only a small force. That is true of the naval nations, such as France.

On the other hand, the Soviet Union, which had no navy at all to speak of, certainly in modern times, not even in World World II, now lays great emphasis upon its navy. We know the submarine strength of the Soviet Union, because that has been discussed here day after day. It is now much greater than our own in numbers. So far as modern nuclear submarines are concerned, she of course will go past us in the near future; and the ability to go past us has been assured by this agreement, which was made in Moscow fairly recently and which we are debating today.

But submarines are only a part of it. The Russian Navy is expanding in all kinds of vessels. Whereas they had no presence in the Mediterranean, now their fleets are as powerful as the U.S. 6th Fleet in the Mediterranean. Whereas they did not have a single ship in the Indian Ocean, they now have many ships there.

The Russian Navy is a very modern navy. I am told that the average age of a Russian naval ship is less than 10 years; whereas, the average age of a U.S. naval ship is now somewhere around 20 years, which is considered an old ship in the Navy and ought to be retired. As a matter of fact, we are retiring them, as I am sure the Senator is well aware.

What I am saying is that we are no longer the naval power we were. Our naval forces are dwindling each year, and the Russian forces are getting stronger each year. They are challenging us all over the world with their naval presence. And in the U.S. Senate, every time we have a military bill, those of us who want a strong Defense Department have to fight with all our power to make sure we have a modern navy.

So the whole business of credibility—that is, whether the Russians are going to believe that we intend to maintain an adequate defense and whether our allies are going to believe that we are going to maintain an adequate defense—goes far beyond the subject matter we are discussing today—that is, the agreements and the nuclear capability of both nations. It goes throughout the Defense Establishment of both the United States and the Soviet Union, and that is why I took the time to say a little about the naval strengths of the respective nations.

Mr. BUCKLEY. I am glad the Senator from Florida has done so, because he has pointed out a critically important point, which is this: Assuming that we can emerge from the interim agreement period covered by a satisfactory SALT II agreement assuring parity—meaningful parity—then we really have established the conditions for a nuclear standoff.

At that point, that element which had been the predominant source of strength, the predominant source for the security of the free world, will, in effect, be placed on the shelf; and once again we will be in the condition in which conventional arms become important. Therefore, we should not be deflected by our preoccupation these days with strategic arms from the absolute necessity to make certain that we have the traditional military capabilities of holding our own in any conflict with the Soviet Union.

I am particularly glad that the Senator mentioned the situation with respect to our fleet. Americans are in the habit of assuming that we rule the seas. We still do, as of this moment, but at the rate at which the Soviets have been launching new and modern, well-designed, imaginative vessels, at the rate at which we have to retire our own units, we will see that superiority challenged.

I know that many Americans say, "Why do we need military force? All we need is to make sure that no one can land on the shores of New York or Florida or California." But, at the same time, Americans do understand that in the world as it is constituted today, America has to operate in the world arena; and this is where military forces have been used, not in the traditional sense of defense, not in the traditional sense of offense, of aggression, but in showing that we have the sheer power to back this Nation's foreign policy decisions that we need to back in order to preserve stability in the world.

One area of the world is of particular interest to large numbers of my constituents—as a matter of fact, to all Americans. Over the years, spokesmen for both the Democratic Party and the Republican Party have combined in their understanding of the strategic importance of stability in the Middle East to America's economic, strategic, and military interests.

I believe that the present Democratic platform has a plank with respect to the need to maintain the security of the State of Israel.

But how in the world do you maintain the security of the State of Israel if you do not at the same time maintain a quality of aircraft, a quality of ships, a number of ships which can enable the United States to effectively prevent the Soviets from becoming tempted to enter actively in another breakout in this highly contagious area? We know that through the skillful deployment of our 6th Fleet in recent crises involving the Middle East, we have in fact, prevented a large conflagration from taking place. We have, in fact, deterred the Soviets from any temptation to become involved in an active way. We have, in fact, provided Jordan with the strength required to hold back the Syrian tanks and to beat them back.

This is where military power becomes essential to the job of preserving the peace. This is something that I fear is not sufficiently understood by the American public at large and by some of our colleagues.

Mr. GURNEY. The point of the Senator from New York is extremely well made. I am glad he brought up the whole question of the Middle East; because if there is an area in the world today that has been on the brink of war for years and on the brink of a conflict which, if it had been touched off, if it had started, might well have developed into a world war, it is the Middle East, because immense forces were arrayed on both sides there. Surely, the ability of the United States, with its Defense Department and with its strong military capability, was the factor that prevented it.

The furnishing of our first line fighter planes to the gallant little State of Israel certainly prevented the Egyptians, aided by their promoters and suppliers, the Soviet Union, from launching another attack against Israel.

There is no question that our furnishing arms to Israel was the most important factor in preserving the peace in the Middle East. I must say that in preserving the peace in the Middle East by the furnishing of the military supplies, in point of time, the Egyptians finally became disgusted with the Soviet promoters because the Russians were not supplying them with all the things they asked for, and the Egyptians finally kicked the Russians out.

So surely we accomplish a very wonderful step in the furtherance of peace in the Middle East. As the Senator pointed out, the Jordanian incident was again another example of where quick action and a massive presence on the part of the United States' 6th Fleet in the Mediterranean stopped in its tracks the tank assault by Syria on Jordan and Iraqi forces moving into Jordan, too. That again most certainly stopped a war in the Middle East and might have even stopped another and more dangerous conflict. So the Senator's point is well made. The only reason why this was able to be done was that we have a strong Department of Defense. Indeed, we are preserving peace around the world in very admirable and notable fashion.

Mr. President, the Senator from New York has brought up, really, the major factor. While he and I both support the Jackson amendment to the interim agreement, it is wrapped up in the word "parity" which the Senator from New York talked about. That, I think, is what the amendment seeks to talk about, that the important thing in any kind of agreement with the Soviet Union, this agreement we have before us, but perhaps even more important, looking down the road to whatever agreements we may enter into the future, hopefully, in the continuing SALT talks, the best thing we can do to insure peace in the world is to make sure that we have parity so far as our defense strength is concerned and so far as our military strength is concerned with the Soviet Union.

For the life of me, I cannot understand how some of us here in the Senate and in the Congress, in considering these very important treaties and agreements we have before us and the comments made about them in the press and the other media and by the people who tend to be expert in these matters, how this whole business of history can be overlooked so far as the respective strength of nations is concerned and parity among the nations.

It occurs to me that a study of history would indicate clearly that certainly, so far as the world's greatest conflict is concerned, World War II, the reason why it started was that there was no parity between the Axis powers—I guess we still call them that—Germany, Italy, and their allies—and France, Great Britain, and the other allies who joined their cause.

Following World War I, the world was eager to disarm. We did disarm. We destroyed a lot of our armaments. We had the naval treaty, of course, which all nations entered into and we put out of commission a great many war vessels.

England and France, it seems to me, got interested in other things, peaceful endeavors, and did not keep up their military establishments.

Germany, on the other hand, of course, began to build up her armaments. When Adolf Hitler came into power, the rebuilding of Germany's armaments was greatly accelerated.

Then of course, the Nazi regime under Adolf Hitler made a number of moves in order to regain their place in the sun which they held prior to World War I and which they thought they were entitled to hold again.

They marched into the Rhineland and into the Saar which were demilitarized areas, areas under international control, which had belonged to Germany prior to World War I and were taken away from her by the Treaty of Versailles. They did that, really, with police and no army. I think, at the time, if we reread history, Germany must have wondered whether they were going to get away with it. But, of course, they did. France and England and their leaders made noises that this was not a very nice thing to do, but they did not do anything to stop Germany from doing it at that time.

My recollection of history is that both France and England had military forces, weak as they were, which were much more powerful than the Germans had, that could have stopped Germany from going into the Rhineland and into the Saar.

Well, of course, that did not satisfy the German appetite and they continued to rebuild their armies, and they got themselves an air force. History will show they started in with gliders and small airplanes like Piper Cub types. They trained people to fly and moved on from there into military aircraft.

Then, of course, the next move was against the Sudentenland, which was part of Austria and then, of course, they gobbled up all of Austria. Then, finally, having gotten away with all of that, in the interim we had the Munich agreement where the British Prime Minister came back with his umbrella on his arm and said that he had negotiated an agreement which would give "peace in our time." Of course, it did not give any peace at all. All it did was to whet the appetities of the Germans to become increasingly stronger and to get away with land and territory grabs one after the other, until Hitler and his cohorts—Goering and the others—were convinced they had the world by the tail and no one could stop them.

Then an interesting thing happened. They made a little side agreement with the Russians, the same people whom we made an agreement with a few weeks ago. The little side agreement was for Russia and Germany to carve up Poland and each to take one-half of that country. That is exactly what happened. Germany moved in from the east and Russia moved in from the west. And that was the end of Poland.

About that time the British and French Governments decided that the time had now come to do something about it. However, it was too late. They had no power. Germany was much stronger than the combined strength of Great Britain and France. And we had the greatest war in the history of the world. Billions and billions of treasure went down the drain, and millions and millions of men were killed.

The war raged on every ocean. There were military installations on every continent. There was fighting on most of the continents throughout the world.

I think that one of the reasons why all of this happened was because there was not parity. One side let the other side become too strong. I mentioned the allies. However, I should not drop this subject unless I talk about ourselves. We had also drawn into a cocoon on this side of the globe. We did not do anything about it. We said: "Russia is not our problem. That is the problem of France and England. If they are in an argument with Germany, let them argue with Germany. We are safe over here. We don't have to become involved."

Everyone knows that we finally became more involved or as much involved as any other nation of the world. And as a result, World War II occurred.

So, I say that I cannot understand why we do not go back and take a look at some of the historical examples, because much can be learned from history. And I think this is especially true with regard to military matters and war and peace.

Another example that comes to mind was back in the early days of Rome when Carthage was regarded as one of the great and powerful nations of the world. It was a country on the north shore of Africa. Rome and Carthage were two of the most powerful nations in the world, and they fought each other constantly down through the years. Then they finally agreed on peace. Carthage was the aggressor, at least in that occasion when they tried to invade Italy and Rome and went over the Alps, if the Senator recalls, on their elephants. Rome repulsed them. Peace was maintained.

Then what happened? This is a very interesting thing. Way back in ancient history, I think the same thing happened. It happened during World War II. Rome became more powerful. However, as she became more powerful, she thought about Carthage, her old enemy. She felt that she would never dominate the world and would never be the world power. Am I talking about the ancient world?

Then Rome decided that she would get rid of and do away with Carthage for all time. I cannot remember who it was who made the suggestion. It comes to my mind that it was Julius Ceasar, although I might be wrong. At any rate, some Roman statesman at that time said:

> The way to stop all future threats from Carthage is to destroy Carthage.

That is what the Romans set out to do and what they planned to do.

In the meantime, Carthage had reduced its military forces, the size of its army, the size of its navy. Then Rome began pressing them for agreements of advantage. And Carthage, like England and France did in World War II, gave a little bit here and gave a little bit there until finally Rome, of course, was much more powerful than they were militarily.

The leaders of Carthage had done this. Then the people of Carthage began to suspect that perhaps all was not too well and that they had become too weak and had allowed Rome to become too strong. They insisted that Carthage do a turnabout and reestablish its military defenses and become strong again so that it could meet any threat that the Romans posed against them.

My recollection of history is that Carthage went to work on almost a 7-day-week basis, around the clock, and started to rebuild their army. They made swords and spears and all of the paraphernalia of war at that time and started to rebuild their navy. However, before they were able to rebuild their strength, the Romans came and absolutely destroyed Carthage and leveled every building in that great city, a city that was as great as Rome was in its day. They killed every inhabitant of Carthage. That great nation was utterly destroyed and wiped out. And of course it has never been resurrected since.

We learn much from history. We learn that when we let other nations of the world whose interests may run counter to ours become more powerful than us, that is when the danger arises. That is when we invite war. And that is when, sometimes, we make war.

Mr. BUCKLEY. Mr. President, I believe that the distinguished Senator from Florida is saying that many things have changed, but not human nature, and that for better or worse there are always some nations that are aggressors.

Certainly I know that for centuries the Russian boundaries expanded and they had been extending their spheres of influence and domination over Eastern Europe.

I think the lessons of history should teach us and should underscore the things that are so absolutely rooted in human experience. We ignore them at our peril. It is not only that weakness invites a strike, but also that it reflects a national will. And if that national will is underestimated, we also invite danger.

This has caused me great concern in the debates that have taken place in the Congress of the United States in the last 2 or 3 years. We seem to be telegraphing to the world an intention to move inward, to withdraw from world responsibilities, which could have the greatest effect and be one of the things that pushes the world into the horrors of a third World War.

The Senator was describing the deplorable record of this century. At one point the Secretary of State of the United States declared that henceforth we would have no interest in what happened in Korea. Within a matter of months we saw what developed, and we had no choice but to go back in.

So I think that the Senator has raised points that are of profound importance not only in terms of our over-all strategic situation, military situation, or economic situation, but also in terms of the subject matter of the debate now in hand.

If we allow ourselves to be put in the position of Carthage where we look at the interim agreement as an umbrella and a shelter for 5 years while we do nothing and let the Soviets exploit the technology which will give them that awesome advantage in intercontinental ballistic missiles and SLBM's, if we then wait until that last minute to see what they are then capable of doing to us, we will not have the time to catch up. The Carthaginians did not have to have 4, 5, or 6 year leadtime before they could strike their swords or build their ships, but we do. That is why it is necessary that we give assurance to the American pubic that we understand the implications of the agreement. Then and only then can we make sure that the atmosphere in which the SALT II negotiations are undertaken will be most conducive to achieving what we all want, namely a condition where we have parity, at the same time reducing, reducing, reducing the implementation of weapons of mass destruction. This must be our position.

I cannot understand why the policy statements given us by the President interpreting these agreements should give us such concern.

Mr. GURNEY. I think the Senator's point on Korea is extremely well taken. It is a classic example of what happens when there is not equal strength.

Mr. BUCKLEY. Or the intention to use equal strength.

Mr. GURNEY. That is true; or the intention to use equal strength.

There is another example of Communist intransigence in Korea because Korea for centuries wanted to be an independent nation. She was under the domination of Japan, even though she thought she was going to be an independent nation after World War II. This is what we strived to gain during the peace conference with the Soviet Union, but of course the Soviet Union was adamant, as the Senator well knows. No, they were not going to permit any unified Korea. Finally they insisted—I do not know if I should say we threw in the towel or not, but we agreed and we have a Korea divided, a Communist north and a free south.

After that we were anxious to get rid of our burdens, as the Senator pointed out, and we withdrew almost all of our Armed Forces from Korea and, as the Senator, pointed out, our Government made the statement that we were not really interested in Korea; it is on the other side of the world, and the U.S. foreign policy was not concerned with that.

Hardly had that statement been out of the mouth of the spokesman on our side before the North Koreans struck and war started, and we got into a big conflict in Korea.

Of course, had we simply made our intentions known to the Soviets, the Chinese, and the North Koreans that we intended to support South Korea, that we intended for her to remain a free nation, the Korean war, in my view, and I think the Senator will agree with me because he brought up the example, would never have happened; and all the blood, sweat, and treasure that went down the drain as far as the United States was concerned, as well as a lot of other nations, would never have happened.

But because we refused to maintain parity, and because we refused to maintain equal strength on the side of the North Koreans and South Koreans, and because we refused to indicate we would not continue our commitment to this free nation, we had war.

I think another example that comes much closer to home about weakness and misunderstanding of the intent on the part of other nations was the entire Cuban missile crisis. When the Russians decided to move into Cuba back in 1962 with intermediate range nuclear missiles—she did not have the submarines then she now has—she thought there was a great launching pad for her to look down our throats, as far as nuclear capability was concerned. Why did that happen? Of course, I do not know what was in Mr. Khrushchev's mind or the minds of his advisers, but one of the reasons of war, and I feel sure that many people who have commented on the Cuban missile crisis have made this argument, that the reason Mr. Khrushchev did that, or one of the motivating reasons he made that whole gamble was because he thought the new, young President of the United States really would not face him down and really would not say no. I do not know why he thought that was true, but that was the way I assessed the situation. He really did not think that once those missiles were introduced—some were beginning to be introduced—that we would have the guts and courage to demand that they be removed. Thank goodness we did have that courage; the Russians were told to move their missiles and they did. There is some question because nobody ever inspected the cargo ships to find out if they were or were not, but the point of the story is that even though we had tremendous strength as far as weapons, as far as bombers, as far as the Navy, and as far as the Defense Department are concerned, the Russians had the idea that we were getting soft, that we really would not face up to them and live up to our commitments. We took the gamble. I think that is another example of misunderstood intentions.

That is what we are arguing about here so far as the amendment to the interim agreement is concerned. The agreement was signed in Moscow.

Mr. BUCKLEY. Mr. President, if the Senator will yield, the Senator does not mean the amendment to the agreement itself, but merely the language of the resolution.

Mr. GURNEY. I do mean that.

Mr. BUCKLEY. Because I would suggest that the amending language in no way changes the agreement, the intention between the parties.

Mr. GURNEY. I am glad the Senator mentioned that. That is what I meant.

Again, as I see it, in the Jackson-Scott amendment, we are saying, "Yes, we in good faith signed the agreement with Moscow which permitted you to have more missiles than we have and more submarines. We do this because we feel at the moment the quality of our capability is greater than yours, so we do not feel any danger that we permitted you more missiles."

But on the other hand we are saying, "If you are not honest and sincere about this agreement in keeping parity, if you are going to negotiate sincerely and honestly in further SALT agreements so we can, indeed, do away with some of the nuclear weapons that we both have, and indeed so that we can come to grips with honest-to-goodness disarmament, and on the SALT talks we will have in the future so that we will have parity a hundred years from now, then we think we should spell out in this Jackson-Scott amendment that if you are going down the road to try to get the edge on us, and not live up to the spirit of these historic agreements signed by President Nixon and Mr. Brezhnev in Moscow, then we say we are going to have to take steps in order to make sure that we maintain our parity with you."

In other words, we are trying to make clear to the Russians what apparently was not clear to them. Mr. Khrushchev tried to introduce missiles into Cuba because he thought we were too soft and would not do anything about it. We are trying to avoid that and get this message across to the Russians now in this interim agreement that we will not put up with any actions on their part to take advantage of us.

Is not that what we are trying to say?

Mr. BUCKLEY. I think so, absolutely, and I think it merely underscores what I understand to be the official U.S. policy with respect to the SALT II agreements.

I would like to call the Senator's attention to certain excerpts from the letter of transmittal by Secretary Rogers to the President, dated June 10, 1972, the letter transmitting the text of the ABM treaty and the interim agreement. In it the Secretary says:

> In this connection, the United States has stressed the unique relationship between limitations on offensive and defensive strategic arms. This interrelationship lends extraordi-

nary importance to the undertaking in Article XI "to continue active negotiations for limitations on strategic offensive arms."

The special importance we attach to this relationship was reflected in the following formal statement relating to Article XI, which was made by the Head of the United States Delegation on May 9, 1972:

I will skip a few sentences:

Both sides recognize that the initial agreements would be steps toward the achievement of more complete limitations on strategic arms.

And this is Ambassador Smith in his official statement to his Russian conegotiators:

If an agreement providing for more complete strategic offensive arms limitations were not achieved within five years, U.S. supreme interests could be jeopardized. Should that occur, it would constitute a basis for withdrawal from the ABM Treaty.

Then he goes on to say:

The U.S. Executive will inform the Congress, in connection with Congressional consideration of the ABM Treaty and the Interim Agreement, of this statement of the U.S. position.

In other words, it is the official U.S. policy that we have an interim agreement—that is what it is, a standby agreement—which is a transition from the position we find ourselves in toward that hoped for, ultimate situation where we have an agreement which will provide a sensible limitation on the offensive weapons on both sides, namely parity. It also makes clear that if we do not achieve that objective within this 5-year period, then all bets are off; we would no longer have an interim agreement because it would have expired, and conditions existing then would constitute such a threat to our deterrent capability that we would no longer have an ABM treaty.

It seems to me that is the essence of the situation as understood by the U.S. negotiators. That is the essence of the U.S. position as delivered to the joint Houses of the Congress. Therefore, when the Senate, in its capacity of advising as well as consenting, incorporates that specific language into language authorizing the President to execute these agreements, it reinforces, by bringing the legislative branch shoulder to shoulder with the executive, our determination not to ignore the realities of this world, not to find ourselves 5 years hence in a position of inferiority, without the ability to catch up.

As I said earlier, I do not understand why there should be any argument in that simple statement of America's self-interest. Also, it is in the interest of the Soviet Union, because the great wars in the past started by aggressors, which happily in our century they have lost, have always been triggered when expansionist nations have miscalculated the determination of free men. It is this which we need to avoid—the possibility of miscalculation on the part of the Soviet Union.

Mr. GURNEY. It seems to me that also, in dealing with the Russians, it is necessary to make oneself clear and one's position crystal clear so they do understand.

Certainly, all of us hope that this interim agreement will lead to meaningful future SALT talks, and hopefully, disarmament in the area of nuclear weapons in the future. We all want that. It is why we are negotiating in SALT. That is why we signed this agreement. But I think we can neither ignore the realities of our world nor the fact that the Russians do not live up to their agreements very well, and tear them up if it suits their purposes. It also seems to me there are other factors which are tied in with negotiations in this particular agreement that we ought to talk about and that ought to be a warning sign as to what the Russian intentions may be.

For example, it struck me as being rather odd that the Soviets refuse any inspection of what they are going to do as far as building submarines and other weapons are concerned. We pressed for that. We wanted inspection. We were willing to have them inspect what is going on over here, but they refused to do anything about the inspection part of this agreement. Now, that struck me as rather odd if they really want to get ahead with the business of nuclear disarmament.

Another thing that struck me as rather odd, too, was that we have an agreement, of course, on nuclear submarines, but we have no agreement on diesel-powered submarines. Under this agreement, they can build all the diesel-powered submarines they want to. As a matter of fact, my understanding is that they are building a good number of them and intend to build more. To be sure, a diesel-power submarine is not the same as a nuclear-powered submarine. It can remain on station only for a limited period; it has to surface for air, it is noisy, and all that sort of thing. But I can see, if the Soviet Union built several score or several hundred of these diesel-powered submarines and always had one on station off the Atlantic coast and off the Pacific coast, armed with nuclear missiles, I do not care whether it is a diesel-powered submarine or one with a nuclear powerplant in it, as far as the safety of American citizens is concerned, and as far as the safety of their cities is concerned, and as far as the vulnerability of our B-52 fields and wings are concerned, it seems to me they are just as vulnerable with a lot of diesel-powered submarines off our two coasts, as if they were nuclear-powered submarines.

I was surprised that that was completely omitted from the treaty. They can build all they want to. I simply say that is something we ought to think about a little bit. Why was that omitted? Why was that not included, if they really mean what they say?

Does the Senator share my concern about that?

Mr. BUCKLEY. The Senator from New York certainly does. I think the Senator has focused on just one area of the many deficiencies of the situation with which we would have to live during the next 5 years if the interim agreement is ratified or authorized, as it no doubt will be.

The Soviets, as the Senator has pointed out, have denied us the ability to inspect on the ground their compliance with the two agreements. We have offered them that opportunity. They have refused.

People who have studied these matters are concerned that they can cheat on these agreements and escape detection at the same time. For example, they have some very high altitude antiaircraft missiles which reach up to 100,000 feet. There are experts in the field who believe these can be converted to ABM capacity and linked up with necessary radars in a manner that will not be observed by our satellites. Again, the ABM Treaty provides there shall be no multiple launchers in order to get around the limitation of 200 interceptors per nation.

We happen to know that, the way their ABM's are constructed, it would not be all that difficult to build multiple launching mechanisms and store them in warehouses somewhere out of sight, one day to be installed and presented as a fait accompli.

We know that, as I was mentioning a few minutes ago here on the floor, they have an SS-11 missile which may have intercontinental capability, which could be substituted for some of their M/IRBM's. This is permitted under the treaty. In any number of areas, we must face up to the fact that we are assuming calculated risks, strong risks.

We believe that since, as of this moment, we have the overall advantage in terms of numbers of deployable warheads and in terms of technology, this may be a risk which we can accept in order to slow down the rate at which the Soviets have been installing these huge intercontinental missiles and the rate at which they have been deploying their new submarines. But what all this does is to reinforce the simple premise that the American people, if they value their freedom, if they value their security, cannot afford not to invest important new sums of money in basic research and basic development, not only to get the maximum advantage under the terms allowed us and the limitations allowed us under the treaties, but also to modernize our conventional weapons, so that we become competitive once again, not dominant, but just competitive.

Also, we must recognize that it is possible, men being what men are, that we cannot negotiate a satisfactory acceptance of the interim agreement, in which event we must be poised to take off and really engage ourselves in an arms race, much as the Senator from Florida would hate to see that and much as the Senator from New York would hate to see it.

Mr. GURNEY. The Senator's point is well made. He mentioned the fact that they have another missile more improved, apparently, one of greater capability than the SS-9 which is certainly a big bang father, much larger than anything we have here; and that brings to mind another point in this interim agreement that I think is very interesting, that caused me concern, which was the provision for silos for

ICBM's being permitted to be expanded by a size of 15 percent.

Now, I am not exactly sure how this 15 percent is figured, but I understand that you can juggle this 15 percent around so that it would accommodate a much bigger or much more improved ICBM than the Russians now have.

Mr. BUCKLEY. It is my understanding that this is not an increase of 15 percent in volume, but 15 percent in linear dimensions, which translates into about 50-percent increase, which takes their already huge missile, many times larger than ours in its lift capacity, and increases that capacity 50 percent again.

Mr. GURNEY. I am glad the Senator has explained that very technical point, that I did not understand. All I understood was that it is there so they can have a bigger missile; and now the Senator has explained how they can, when already they have a missile, the SS–9, that is far, far larger than anything we had.

Now, we did not want that 15-percent increase. That was something the Soviets asked for, and obviously asked for because they wanted it for something; they had something in mind. And the Senator has ably explained what they do have in mind: That it will permit them to put into those silos a much bigger weapon in the future if they want to.

Now, all these little things that are in that agreement, and some things that are not in that agreement, like inspection, cause this Senator great concern and great worry as to precisely what the intentions of the Soviet Union may be in so eagerly going ahead with this interim agreement as it now stands.

I understand and I support the position of the Administration that for now we are safe, because we do have a qualitative edge and a qualitative advantage on the Russians. We understand that.

The Russians today, this day in August, and certainly for at least a short time down the future, are not going to engage in any nuclear warfare with us, because if they do, they are going to come off just as badly injured and hurt as we are. They know that, and that is why they will not do it; but why they will not do it is because we do have a slight edge at the moment.

What we are saying is that we do not necessarily want to maintain an edge, so that the Soviets are scared into an arms race; but neither do we want to be placed in second position. We do not want them to have the edge. We do not want them to take advantage of any loopholes in this treaty, any language in this treaty, or any factor that is in this treaty that may permit them to go ahead and get a nuclear edge on the United States.

That is why this Senator supports the Jackson-Scott amendment. He thinks it is absolutely essential that we make sure in language—which does not alter the treaty any, as the Senator has pointed out—that we are not going to stand idly by if their intention in executing this agreement is to get an edge on the United States in nuclear capability. That is extremely important, and I hope that the U.S. Senate, when we vote on this amendment, I suppose some time tomorrow, will vote overwhelmingly in support of it and give the administration the extra tool it needs in an expression of the understandings, intentions, and concerns the Senate has about this matter, and that they are hopefully sending a clear message to the Russians: "Yes, we want peace. We want to cut back on nuclear weapons; hopefully, some day we can do without them at all," as we made the offer way back in Truman days to give up all our nuclear missiles if the Russians would not go ahead with theirs.

Certainly the intentions of the United States are good in this area, and are well known. We want them to know.

Mr. BUCKLEY. The Senator has spoken of U.S. intentions. I think it is very important that we understand something about ourselves, lest we be defeated by ourselves.

I think that any fair examination of history will lead to the conclusion that there has never been a power such as the United States that meant as well, that dealt in as good faith, that had less ambition to overcome and dominate others. But our problem is that we suffer from a certain sense of insularity. We assume others have those same intentions, and we blind ourselves to what history teaches us.

We spoke earlier about trusting the Russians. We have heard a great deal of rhetoric in this room in the last few weeks that we are now going into an area of detente; how can we achieve peace, good will, and so forth, if we demonstrate that we do not trust the Russians?

This is, in light of the record and in the light of Communist writings, the greatest naivete. The Russians pride themselves on the fact that they believe that any tactic, any deceit, is proper and justified, and desirable, if it will help in the long-term defeat of the capitalist nations.

This is one of their tactics we have noticed in the past, and there have been other areas of detente, and so on. But every time that the Soviet Union has felt it to be to her advantage to break an agreement, break an understanding, break a treaty, she has done so, and certainly there has been no better example of that than when she broke the moratorium on atmospheric tests. While we were dismantling all our equipment, and so on, in good faith reliance on their word, the Soviets were vigorously and feverishly undertaking a whole series of tests which gave them information we will never be able to secure for ourselves, which has implications for our security which we do not know how to estimate, and then quickly signed on the dotted line an agreement that kept us from catching up.

There is no reason to believe that the Soviets will not exploit this situation to every advantage available to them in the next 5 years. It is for that reason, not only for our own protection but also to persuade the Russians, that the American people are not ever going to be willing to take second seat in this essential military posture. Only by showing the Russians that we will not disarm ourselves without seeing that they are equally disarmed can we hope to end up with a meaningful treaty that will in fact protect the world from the possibility of a nuclear holocaust.

Mr. GURNEY. I could not agree more with the Senator from New York.

The Senator mentioned detente and the euphoria that seems to surround that word, certainly so far as the interpretation of it is concerned by certain people in the United States. I think that all of us—the Senator from New York as well as I—would like to have some detente with the Russians; but I think that he and I believe very strongly that we will get no detente with the Russians unless we operate from a position of strength and that with a position of weakness there will be no detente at all.

Mr. President, as Senators, every one of us is charged with the distinct and vital responsibility of doing everything possible to insure that our citizens are not subjected, unnecessarily, to the risks of an attack by a foreign power. In carrying out this responsibility, each of us has to answer to the dictates of his or her own conscience, knowing that, in this nuclear age, to make a misjudgment is to invite disaster. This reason, and because I would rather be safe than sorry in matters where the survival of the Nation is concerned, is why I feel it essential to speak out in support of the Jackson amendment to interim agreement on offensive weapons.

In looking at this interim agreement—and at the arguments being put forth pro and con—I have become increasingly concerned about what it would do to the national defense posture of the United States. Both the Senator from Colorado, Senator ALLOTT, and the Senator from Washington, Senator JACKSON, made some telling points in their presentations Thursday, August 3—points that have not been refuted.

For instance, it greatly disturbs me that this agreement leaves the Soviet Union with a guaranteed, 5-year, 50-percent lead in all types of intercontinental ballistic missiles, yet permits the Soviets to catch up in the area of warheads and delivery systems where they are presently at a disadvantage. If the goal is balanced forces, then we should have, as a goal, parity as soon as possible. We have agreed to numerical parity in ABM's; why should we not make it very clear to the Russians that we expect parity in every respect to result from this interim offensive weapons agreement?

At present, we have fewer missiles, more warheads, and the all-important ability to MIRV our missiles. Hence, we can offset the megatonnage gap that the Russians would otherwise enjoy with their combination of bigger missiles, bigger warheads, and no MIRV. However, as practically everyone agrees, the Soviet Union will, within a year or so, have MIRV capability and parity will then no longer exist. Technology will be even, but they will have more of everything else.

In prior debate, we have heard arguments to the effect that U.S. bases in Europe and the U.S. advantage in long-range bombers offset the quantitative

Russian advantage in ICBM's and SLBM's.

I remain unconvinced of this for several reasons: First, the Russians have enough IRBM's and MRBM's to take care of our European bases, and even if they do not, they have a great number of surface-to-air missiles and fighter interceptors. Second, the United States has no IRBM's, MRBM's or ABM's to offset the Russian missiles. Put the two together and the supposed U.S. advantage is no advantage at all.

As far as the bombers are concerned, those arguing that our 400 odd B–52's constitute an advantage forget that the plane is old and basically obsolete; just recently, we recognized that when we voted to go ahead with the B–1 bomber. They also forget to figure in the Soviet medium range bombers which, when added in, give the Soviets slightly over 800 bombers to our 460, and they overlook the aforementioned Soviet lead in fighter interceptors and surface-to-air missiles. As if we needed any reminder on the effectiveness of the latter against the B–52, we have only to look at the extremes to which we have gone to keep the B–52's from being shot down in Vietnam. They hardly constitute an adequate deterrent anymore.

There are several other aspects of this agreement which bother me as well. As Senator Allott pointed out, in his excellently researched study, there is no limitation placed on the Soviet Union's G-class missile launching submarine, 22 of which are now in existence. Just because these subs are diesel powered, and have missiles with a limited range, does not mean they cannot sit a few miles offshore and knock our bombers and bomber bases not to mention what they can accomplish in wiping out all our great cities which would be within their range either from the Atlantic or Pacific Oceans. So, not only is our disadvantage in missile firing subs greater than we believed—84 to 44 instead of 62 to 44—but there is nothing to keep the Soviets from building more of these diesel-powered missile subs in the future. This, I think, has to be considered when we talk about parity.

And then there is this business about no increases in the dimensions of the silos exceeding 15 percent. But, if, that 15 percent is at the bottom of the silo, it will make a big difference in the capability of the missile involved. As Senator Allott pointed out, any addition to those big Russian missiles can, along with MIRVing, soon wipe out our lead in the quantity of warheads.

Still another point, and one that concerns me, is this business of inspection. I have heard it argued that we should not question the sincerity of the Soviet Union by adding this amendment to the resolution, yet it occurs to me that they never gave us their actual missile numbers and it was they who balked over inspection of covered submarine berths. This distrust business cuts two ways: Their suspicions should be matched by our own. For instance, on inspection, how are we to check on areas that are often shielded by clouds. If a militarily significant part of the Soviet Union is covered by clouds at least 80 percent of the time, as has been implied, then we should recognize still another weakness exists in the treaty.

Finally, there is an overall consideration that trouble me and that is that this agreement has been based, in part, on this premise that, without it, we would have dropped hopelessly far behind the Soviet Union in offensive weapons. If that premise is accurate, we must ask ourselves, first, how did we let such a thing happen and, second, if it happened once, could it happen again as a result of these agreements?

Mr. President, in my view, acceptance of this agreement, without an indication that Soviet MIRV'ing could lead to its abrogation, will simply encourage the Soviets to take all kinds of liberties. They have already clearly indicated that they will be building everything allowed them under the combination of treaty, agreement, and protocol, and if we do not indicate now that we do not intend to accept a position of permanent inferiority, we may get backed into a corner later. In any event, we will not be in as good a position to bargain as we would be if Congress were to pass the proposed amendment now. It will do no harm, since it does not change the agreement itself, and it is likely to do a great deal of good. Therefore, I urge my colleagues to support the Jackson amendment and reassure all Americans that the security of the country will not be further endangered.

MESSAGES FROM THE PRESIDENT

Messages in writing from the President of the United States were communicated to the Senate by Mr. Leonard, one of his secretaries.

INTERNATIONAL EXPOSITION ON THE ENVIRONMENT—MESSAGE FROM THE PRESIDENT

The PRESIDING OFFICER (Mr. Hollings) laid before the Senate the following message from the President of the United States, which, with the accompanying papers, was referred to the Committee on Foreign Relations:

To the Congress of the United States:

In accordance with Public Law 91–269, I wish to inform the Congress today of current plans for the six-month International Exposition on the Environment to be held in Spokane, Washington in 1974.

This exposition will be a particularly welcomed event in America. The Spokane exposition and the 1976 Winter Olympics are now the only internationally recognized events scheduled for this country during our Bicentennial Era. In addition to stimulating trade and cultural exchanges, the exposition through its theme—"How Man Can Live, Work and Play in Harmony with His Environment"—will also focus fresh attention on one of the most pressing concerns of our time.

In November 1970, Expo '74, the nonprofit corporation which is sponsoring the exposition and is responsible for its planning and operation, applied for Federal recognition of the exposition under the provisions of Public Law 91–269. After reviewing the plans of the sponsor, the Secretary of Commerce submitted to me the detailed report required under Section 2(a)(1) of Public Law 91–269 and recommended Federal recognition. A copy of the Secretary's report is transmitted herewith. In this report the Secretary indicated that the sponsor had fulfilled all of the requirements of that law and the regulations issued thereunder (15 CFR § 667).

The Secretary concluded that the environmental theme of the exposition was relevant to current national concerns and was appropriate to the exposition site. He also determined that the sponsors had obtained from the State of Washington, the local governments involved, business and civic leaders of the region and others the financial and other support necessary to assure the successful development of the exposition.

The Secretary of State also reported under Section 2(a)(2) of Public Law 91–269 that the event qualified for registration by the Bureau of International Expositions as a Special Category event.

Based on these favorable reports, I advised the Secretaries of State and Commerce on October 15, 1971, that the exposition warranted Federal recognition as provided by statute. I also indicated that it was my intention to extend this Administration's fullest possible support to foster a successful event.

On November 24, 1971, upon request of the United States, the Bureau of International Expositions in Paris officially recognized the event as a Special Category exposition and approved its General Rules and Regulations by unanimous vote. At its meeting on May 16, 1972 the Bureau also established procedures for sanctioning the special rules and regulations for the exposition.

On January 31, 1972, I issued a proclamation directing the Secretary of State to invite such foreign countries as he may consider appropriate to participate in this event. The Secretary issued those invitations through diplomatic channels on February 15, 1972. Thus far, Canada, the USSR, and Iran have accepted—and many other countries are now expected to accept. In that proclamation, I also indicated that I planned to appoint a United States Commissioner General to exercise the responsibility of the United States Government for fulfillment of the Convention Relating to International Expositions of November 22, 1928, as modified. Pending this appointment, I am designating the Secretary of Commerce to serve in that capacity on an acting basis. In addition, the Secretary is currently preparing a plan for Federal participation under Section 3 of Public Law 92–269, which I will transmit to the Congress at some later date.

Richard Nixon.

The White House, *August 15, 1972.*

REPORT OF NATIONAL ADVISORY COUNCIL ON ECONOMIC OPPORTUNITY—MESSAGE FROM THE PRESIDENT

The PRESIDING OFFICER (Mr. Hollings) laid before the Senate the following message from the President of the

United States, which, with the accompanying report, was referred to the Committee on Labor and Public Welfare:

To the Congress of the United States:

Pursuant to Public Law 89-794, I have the honor to transmit herewith the Fifth Annual Report of the National Advisory Council on Economic Opportunity.

RICHARD NIXON.

THE WHITE HOUSE, *August 15, 1972.*

EXECUTIVE MESSAGES REFERRED

As in executive session, the Presiding Officer (Mr. HOLLINGS) laid before the Senate messages from the President of the United States submitting sundry nominations, which were referred to the appropriate committees.

(The nominations received today are printed at the end of Senate proceedings.)

MESSAGE FROM THE HOUSE—ENROLLED BILLS SIGNED

A message from the House of Representatives, by Mr. Hackney, one of its reading clerks, announced that the Speaker had affixed his signature to the following enrolled bills:

S. 596. An act to require that international agreements other than treaties, hereafter entered into by the United States, be transmitted to the Congress within 60 days after the execution thereof;

H.R. 6957. An act to establish the Sawtooth National Recreation Area in the State of Idaho, to temporarily withdraw certain national forest land in the State of Idaho from the operation of the U.S. mining laws, and for other purposes; and

H.R. 15692. An act to authorize for a limited period additional loan assistance under the Small Business Act for disaster victims, to provide for a study and report to the Congress by the President setting forth recommendations for a comprehensive revision of disaster relief legislation, and for other purposes.

The PRESIDENT pro tempore subsequently signed the enrolled bills.

DEPARTMENT OF TRANSPORTATION APPROPRIATIONS, 1973—CONFERENCE REPORT

Mr. ROBERT C. BYRD. Mr. President, I submit a report of the committee of conference on H.R. 15097, and ask for its immediate consideration.

The PRESIDING OFFICER (Mr. HOLLINGS). The report will be stated by title.

The assistant legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 15097) making appropriations to the Department of Transportation and related agencies for the fiscal year ending June 30, 1972, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by all the conferees.

The PRESIDING OFFICER. Is there objection to the consideration of the conference report?

There being no objection, the Senate proceeded to consider the report.

(The conference report is printed in the House proceedings of the CONGRESSIONAL RECORD of August 7, 1972, at p. 27166.)

Mr. ROBERT C. BYRD. Mr. President, I have cleared with the ranking minority member of my Subcommittee on Appropriations the matter of calling up this conference report at this time.

Mr. President, when the Senate concluded consideration of H.R. 15097, the Department of Transportation and related agencies appropriation bill for 1973—June 16—the bill, as amended, was a net $115.4 million over the House version of the bill. This net increase consisted of total increases of approximately $157.2 million, offset by decreases of $41.8 million, and included 55 amendments.

I should like to highlight at this point the conferees' recommendations on salient items among the amendments.

The conferees agreed upon the addition of $50.7 million to provide 84 instrument landing systems, 30 control towers, and three airport surveillance radars; these facilities, essential for air traffic safety enhancement, are for localities eligible for such installations under agency criteria, but were not included in the budget request or House version of the bill. In connection with the facilities program, the joint explanatory statement of the managers includes the following language:

> The conferees are concerned over the delay in the implementation of this program. Accordingly, the conferees direct FAA to submit, by October 1, 1972, its plan for obligating all appropriated funds and its schedule for commissioning all instrument landing systems, control towers, and airport surveillance radars for which funds have been provided.

The recommendations of the conferees also include the addition of $100,000, as added to the Senate version of the bill, to accelerate the development and technical feasibility of devices which would provide pilots with timely and adequate information on terrain obstacles, particularly during approach to landing under poor visibility conditions.

The conferees' recommendations provide the $3.5 million of the Senate version for screening devices necessary for aviation security, and the managers' statement includes the following language:

> This appropriation would also permit the Federal Aviation Administrator to extend the benefit of the funding action to those airlines which responded promptly to the new aviation security regulations by reimbursing such airlines for (or acquiring from such airlines) screening devices heretofore acquired by the airlines.
>
> The conferees expect that FAA and the airlines will agree on uniform procedures which will supplement the screening devices and decrease the time involved in providing comprehensive coverage of airport boarding gates in order to assure safety of citizens in air transportation.

The conferees' recommendations include, under the heading of "Railroad Research," the $150,000 proposed by the Senate for railroad grade crossing and track relocation studies at Wheeling, W. Va.; Lincoln, Nebr.; and Lafayette, Ind.

The conference recommendation for the high speed ground transportation research and development program provides for $52.5 million, an approximate split between the $45 million proposed by the House and the $60.9 million included in the Senate version of the bill. These funds provide for the Metroliner and turbotrain demonstrations and other important rail research and demonstrations to be carried out largely at the Pueblo Test Center.

The Senate version of the bill had included $16.5 million not allowed by the House for dual mode research, an area of study to develop a vehicle capable of automated operation on or in guideways and convertible to manual operations on a conventional road or highway. The conferees' recommendations provided $4 million for this purpose.

The conference recommendation provides $875,000, of a requested $1 million requested in the Senate version as compared with $750,000 of the House version of the bill, for grants-in-aid for natural gas pipeline safety.

The conferees agreed to the inclusion of the $31.7 million for the Coast Guard's Select Reserve as provided in the House bill. This item had been deleted for lack of authorization at the time it was under consideration in the Senate committee. The authorization is contained in the military procurement authorization bill, which is now in conference.

The recommendations provided $4.5 million, proposed at $3 million in the House version and $7.5 million in the Senate version, for the Coast Guard's State boating safety assistance grant program to encourage greater State participation in the reduction of boating fatalities.

In conclusion, the conferees' recommendations totaled $2,999,118,095 in new budget authority, which is $39,057,000 under the Senate version which totaled $3,038,175,095; it is $76,323,000 over the House version which totals $2,922,795,095. It is $41,244,000 under the 1973 budget estimates of $3,040,362,095—which excludes $37,361,000 deferred for lack of authorization—and it is $195,496,902 under the 1972 appropriation of $3,194,614,997. In addition to the new budget authority, the bill also includes $5,393,990,000 in appropriations to liquidate contract authorizations—funds required to meet commitments made under authorizations contained in substantive bills. This would include the payments from the Highway Trust Fund for the Federal-aid highway programs, funds from the Airport and Airway Trust Fund for airport grants-in-aid, funds for highway traffic safety programs, as well as amounts necessary to meet commitments made under the Urban Mass Transportation Fund. The grand total for the bill, as recommended by the conferees, is $8,393,273,000.

I should call to the attention of the Senate that funds added in the Senate version of the bill and agreed to by the conferees are strongly oriented toward the safety of the traveling public, especially in the field of air transportation.

Funds have been added for all airports throughout the country which qualify for instrument landing systems, airport traffic control towers, and airport surveillance radars. It is my belief—and the conferees concurred—that we should provide all the funds which can be properly and feasibly spent for magnetometers and other screening devices to deter aircraft hijacking and for construction of airport equipment to insure every degree of safety and protection possible for the ever-increasing number of air travelers. This same preoccupation with safety considerations led to the addition of funds for the expedited development of an improved ground proximity warning indicator for aircraft and grade crossing elimination studies.

The public is entitled to such safety and protection, and I am pleased that the conferees share your committee's concern and determination to provide the necessary funding.

I shall be pleased to answer such questions as Members of the Senate may have with respect to any other items not covered.

The conference report is signed by all conferees—however, note that Senator ALLOTT "reserves" on amendment 34—High Speed Ground Transportation, Federal Railroad Administration—and amendment 39—Research, Development and Demonstrations, Urban Mass Transportation Administration.

Mr. President, I ask unanimous consent that two statements by the distinguished Senator from Colorado (Mr. ALLOTT), also a member of the subcommittee, be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

STATEMENT BY SENATOR ALLOTT

Mr. President, I should like to address myself to several specific points relating to the Transportation Appropriations Conference Report now presented.

My name appears as having signed the conference report. I did sign it, but noted my reservations to Amendment No. 34, relating to appropriations for the High Speed Ground Transportation Research and Development program, and to Amendment No. 38, relating to research and development funds for the Urban Mass Transit Administration.

My reservations appeared neither in the first printing of the Conference Report nor in the placement of that Report in the Congressional Record. Therefore, at this time, I should like to delineate my rationale for these specific and firm reservations.

The Senate had increased the appropriation for High Speed Ground Transportation research and development over the House figure by $15 million. This fully restored the substantial cut proposed by the House which had only allocated $45 million to this project. After a great deal of debate and discussion in the Conference Committee, we arrived at a figure of $52,500,000. This figure falls short by $2 million the minimum amount of money which prudent judgment recognizes as necessary for the continued orderly development of some of the most important transportation projects in the Nation. Whereas the House and the Senate in their individual appropriations bills appeared to accept the breakdown in the amounts of money to be spent on individual programs for high speed ground transportation, the Conference Report does not specify where the $52,500,000 is to be spent.

Generally speaking, however, this will give the Federal Railroad Administration the flexibility it needs to go ahead with those programs which are most important at this particular time. I am sure the Department agrees with me that the funds which had been cut originally by the House for development of the Pueblo Test facility must be restored by the Department as it makes its own decision. The funds for development at Pueblo relate to the physical plant there. If money is diverted from this to other projects, it would simply mean a delay in any number of additional programs which could not be tested or deployed as the result of the lack of completion of the requisite facilities at Pueblo.

I am also sure that the Federal Railroad Administration will agree with the Congress that swift development of the tracked air cushion vehicle will be of great value in determining where we go in the decades ahead. Therefore, I am sure that the Department will desire to use some of the money which was restored toward that end.

Mr. President, I believe, in all of the projects which have been put forth by the Office of High Speed Ground Transportation. I fought for them with all the strength at my command in the Conference. Unfortunately, all of the money was not restored; therefore, some of the long-range programs will simply have to be deferred a bit longer. I regret this as much as those in charge of the programs, but I am confident that if the Federal Railroad Administration demonstrates real progress with the $52 million which has been appropriated for this year, we can move ahead without similar problems in the years ahead.

Now, Mr. President, I want to turn to the appropriations for research and development in the Urban Mass Transit Administration.

I was quite displeased with the final outcome in this category. The $11,500,000 for an urban demonstration of the PRT Systems (the so-called "people movers") does not provide the type of resources which I believe would have enabled the Department to go full speed ahead. Nevertheless, the restoration is a far cry from the House position, which allocated only $1 million, and which would have confined UMTA to testing the PRT's at Dulles Airport for an additional year.

Very frankly, one of the criticisms that I heard brought up in the Conference Committee, which I believe to be a justifiable criticism to some extent, was that UMTA has waited until the end of the fiscal year to commit its project funds. It appeared to some members of the Conference Committee that UTMA was simply trying to spend for the sake of spending in order to justify an increase in appropriations for the next fiscal year. I am satisfied that Carlo Villarreal, Administrator of the Urban Mass Transit Administration, has delayed committing funds because he has wanted to be sure that the funds were properly spent. In many cases, he has devoted a great deal of time and effort to a close examination of what transportation projects would best serve the needs of the Nation. However, Mr. President, I think that UMTA can clear up the question that was raised in this regard by complying with the language expressed in the Senate Appropriations Report to name the demonstration site for the PRT System within 60 days of the adoption of the Conference Report which we are now considering. This would be most reasonable and would show the members of the Senate and House Transportation Appropriations Committees that UMTA is ready to move forward with progressive and innovative programs.

The $4 million for the Dual Mode Transit System development could, in all probability, have been better used elsewhere. Nevertheless, if we are going ahead with this program, it must be under the jurisdiction of UMTA alone and should not get caught in an intra-bureaucratic struggle within the Department. I regret that additional funds could not be made available for the urban tracked air cushion vehicle. However, the $4,500,000 which was allocated, I am confident, is enough money to enable that program to be tested next year.

I opposed in the Senate and I continue to oppose any money for Service Development. My opposition to this program is predicated on the fact that "Service Development" is merely an aggrandizement for an out-and-out subsidy. This is an example of a situation I see all too often whereby utilizing the ploy of a "catchy" title, a program is able to continue momentum without the careful scrutiny it deserves. I regret that the conference committee agreed to the $1,750,000 for that item. The money does not serve a useful purpose and I expect to begin earlier next year, if the voters of Colorado see fit to send me back here, to insure that projects of this kind are eliminated completely from the budget.

While the conference committee did not address itself to this point because there was no "line item" in the budget, I wish again to call attention to the Senate language which directed that more resources from the rail portion of research and development funds be diverted into the "light rail" field. The Senate agreed with my suggestion that "light rail" projects should be tested at Pueblo. In any case, I will be looking for some swift action in this area in the coming months.

Finally, Mr. President, I wish to touch upon the appropriation for the Civil Aeronautics Board for payments to air carriers. The Senate added $11.4 million to the House allowance of $54 million. This increase represented the short-fall of the 1972 fiscal year appropriation. Class Rate 6 was promulgated near the end of Fiscal Year 1972. I believed a wise course to follow was to appropriate in this Appropriation Bill an amount needed to fully fund the subsidy need for last fiscal year.

On page 9 of the Conference Report, it states, and I quote:

> "It is the understanding of the Conferees that the CAB can borrow forward to pay the additional amounts due in fiscal year 1972 resulting from the promulgation of Class Rate VI. It is, of course, the intention of the Conferees to recognize the obligations of the Government with respect to payments to air carriers under the applicable law."

Because the CAB can utilize Fiscal Year 1973 monies in order to pay the additional amount due in Fiscal Year 1972, all of the obligations of the Federal Government will be fulfilled and the air carriers will receive full funding of the amounts due them under that Class Rate.

The CAB will be formulating a new estimate of the subsidy need for Fiscal Year 1973. At such time as the Fiscal Year 1973 appropriation becomes inadequate, a supplemental appropriation must be submitted. It is clear from the Conference Report that both the House and the Senate Committees will be very receptive to any supplemental request along this line.

Mr. President, as many Senators know, I believe very strongly that the Federal Government has a contractual obligation to these air carriers which serve our rural communities. Over-zealous attempts to economize in this area can retard the effect of the massive sums that Congress has allocated for rural development. Accordingly, I will closely monitor the CAB subsidy determination for Fiscal 1973 to assure the continued viability of this program.

Mr. President, it has long concerned me that there is a general lack of understanding of this program. Accordingly, the program has often suffered from neglect. So that Senators may have further information available to them, I add the following statement of mine which addresses this subject:

Local Service Airline Subsidies

(Statement by Senator Gordon Allott before the Senate Transportation Appropriations Subcommittee)

Mr. Chairman, If you will permit me, I would like to make a brief statement relative to the Local Service Airline Subsidy issue. I think it will be useful to impose on our later discussions an overview of relevant issues.

As you know, the Senate recently passed a multi-billion dollar Rural Development Bill. A major purpose of that legislation is to stimulate growth in our rural areas which, as we all know, means attracting more jobs to those rural areas. Air service is a prerequisite to most any business move to a new location; thus, an over-riding issue of this Local Service Subsidy is rural development.

Air transportation is vital—the life blood, if you will—to these rural communities. This is the reason that over the years, I have continued to express my concern regarding an inadequate subsidy level.

Let us look at the results of inadequate subsidy. It causes the air carriers to lose money; the carriers tend to cut back on their scheduling to the minimum certificate service; and eventually, encourages the carrier to terminate their service on subsidy-eligible routes. This certainly is not the intended result of the expressed Congressional mandate. Everyone loses when this occurs. First, the citizens of rural America; secondly, the local service air carriers and their stockholders; thirdly, the citizens of chocked urban centers which need growth directed *from* them—all lose whenever the rural development effort is retarded or impeded.

To be parochial for a moment, I wish to translate this situation to my State of Colorado. Frontier Airlines serves Colorado; and they have been cutting back to minimum certificated service in many places around the State. And although this action greatly disturbs me, I cannot in good conscience blame the Company . . . because the Company has received an inadequate level of subsidy for the past few years. Because of this inadequate subsidy level, they had no choice but to drastically cut costs to stay in business. The days of inadequate subsidy must end!

An over-zealous attempt to economize in this local service subsidy area which nets a savings of a few million dollars today can negate the effect of the billions of dollars that we plan to spend in the next few years for rural development. This effect is on top of the fact that, by law, the Federal Government has a legal obligation to provide a fair rate of return to the local service air carriers—an obligation which, in my opinion, has not been met by the Federal Government in recent years.

CAB member, Robert T. Murphy was quoted in the May 10, 1972 edition of *Aviation Daily* as saying,

"Moreover, on hindsight, I believe that we at the Board and you in the industry were too quick to reduce subsidy after 1966 considering the commitments required for new equipment, the time necessary to promote and develop the new routes and the unanticipated turndown in traffic."

Mr. Chairman, I would like, at this point, to quote statistics from a March 1972 staff study of the CAB's Bureau of Operating Rights entitled "Service to Small Communities" Part I, "Local Service Carrier Costs and Subsidy Need Requirements to Serve Marginal Routes." In 1969, according to this staff study:

Frontier Airlines was paid $4.3 million less than its subsidy need;

Texas International Airlines was paid $600,000 less than its subsidy need;

Allegheny Airlines was paid $3.8 million less than its subsidy need.

As we approach the overall task of rural development and this Committee's immediate task of providing adequate air transportation to rural communities, it is most relevant to look at the stockholder equity position of the nine local service air carriers.

Mr. Chairman, I would like to ask your consent that two tables I have prepared on this subject appear in the hearings record at this point.

TABLE I

Local service industry retained earnings

1960	$1,088
1961	5,263
1962	10,818
1963	14,798
1964	21,771
1965	31,323
1966	36,634
1967	28,401
1968	(2,672)
1969	(68,650)
1970	(79,931)
1971	(89,733)

TABLE 2

Local service industry net profit or (loss)

1960	$1,940
1961	4,841
1962	5,962
1963	4,862
1964	7,772
1965	12,722
1966	10,376
1967	(4,472)
1968	(29,800)
1969	(63,008)
1970	(61,426)
1971	(10,226)

Table 1 deals with the retained earnings of the local service industry and Table 2 deals with the net profits or loss of this industry. In summary, the statistics reveal that eight of the nine local service carriers today have a negative cumulative net earnings position. As a group, including the one carrier out of nine which has positive net earnings, the carriers show a $89 million net loss through 1971.

In arriving at the level of subsidy each year, the CAB allows the carriers a certain "rate of return." As I understand it, briefly, the Board most recently has allowed the carriers a 7.25% rate of return on their debt capital and a 20% rate of return on its equity. In the most recent CAB determination, I am informed that this calculation allows for a 12.35% overall rate of return for the carriers in Class Rate Six. For the record, I want to point out that from this "rate of return" the individual carrier must pay its interest expenses and "disallowed expenses." (Disallowed expenses are those incurred which are not allowed as a valid operating expense in determining subsidy need. For example, legal fees in excess of $15,000; executive salaries in excess of $25,000, and the payment to employees of bonuses related to profits.)

From information available to me, the 12.35% "rate of return" allowed in Class Rate Six will allow most carriers approximately a 5% profit. I believe, and I hope that Chairman Browne will correct me if I misstate the fact, but I believe that a lower "rate of return" is allowed for subsidy operations than for fare purposes.

Mr. Chairman, you will recall this Subcommittee's direction contained in the FY–72 Committee Report:

"The Committee approves an appropriation of $53,600,000 for payments to local service air carriers, the same amount as the House allowance. Evidence indicated that this was the minimum amount that would be necessary to fulfill this obligation. The CAB in repeated appearances before this Committee has stated that it has a contract liability for such subsidy payments to the certificated air carriers. Because estimates of the level of subsidy needed were as high as $82,000,000 and because this group of air carriers has sustained net losses on these routes for three consecutive years, the Committee directs the Board, as soon as it is feasible, to re-evaluate the level of payments required for this fiscal year. The Committee will be receptive to any supplemental request based thereon, in order to assure that large segments of the American public will continue to receive at least minimum air service." (Page 27, Senate Report No. 92–271, July 20, 1971.)

Since that time, the Board and the carriers as a group have been negotiating on Class Rate Six. Needless to say, I am disappointed that the Class Rate has not been published at this late date. As I understand it, the carriers submitted up-dated information on March 31, 1971. After the Committee's direction to which I have referred, the carriers again up-dated information through June 30, 1971. In studying the implications of the Presidentially invoked wage price freeze, the Board demanded the carriers up-date through September 30, 1971 and finally, an up-dating was also provided through December 31, 1971. Thus, the Class Rate for Fiscal Year 1972 was basically negotiated using as a base calendar 1971. Bear in mind that these Class Rates are supposed to be *prospective*. Informal information I have received from the staff of the Board indicates that the Class Rate is now near finalization.

Prior to asking a few questions, I want to make the record clear on one point. As I predicted a year ago, the subsidy request by the CAB was inadequate to meet the needs. Your estimation of $53.6 million has risen to approximately $65 million. The $65 million figure is designed to produce profits for the carriers on their subsidy eligible system of about $5.5 million.

Resumption of Statement

Those are the main matters for concern in this legislation.

I wish again to express my appreciation to the distinguished Senator from West Virginia (Mr. Robert C. Byrd) for his unending indulgence and cooperation as we continued to work on a bill which, for its seeming lack of controversy, has turned out to be one of the most difficult appropriations bills to be worked out this year.

Mr. ROBERT C. BYRD. Mr. President, I move adoption of the conference report.

The motion was agreed to.

The PRESIDING OFFICER (Mr. Hollings). The clerk will state the amendment in disagreement.

The assistant legislative clerk read as follows:

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 3 to the aforesaid bill, and concur therein with an amendment, as follows: In lieu of the sum proposed, insert: "$875,000".

Mr. ROBERT C. BYRD. Mr. President, I move that the Senate concur in the amendment of the House to the amendment of the Senate numbered 3.

The motion was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the Record a table showing the budget estimates, the House and Senate allowances, and the amounts agreed to in conference for each item in the bill.

There being no objection, the table was ordered to be printed in the Record, as follows:

SUMMARY OF H.R. 15097—DEPARTMENT OF TRANSPORTATION AND RELATED AGENCIES COMPARATIVE STATEMENT OF NEW BUDGET (OBLIGATIONAL) AUTHORITY FOR 1972 AND BUDGET ESTIMATES AND AMOUNTS RECOMMENDED IN THE BILL FOR 1973

Item (1)	New budget (obligational) authority, fiscal year 1972 (enacted to date) (2)	Budget estimate, fiscal year 1973 (3)	Version of bill— House (4)	Version of bill— Senate (5)	Conference recommendation (6)

Mr. GURNEY. Madam President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mrs. EDWARDS). The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECESS SUBJECT TO THE CALL OF THE CHAIR

Mr. ROBERT C. BYRD. Madam President, I move that the Senate stand in recess, subject to the call of the Chair, with the understanding that the recess not extend beyond 1:30 p.m. today.

The motion was agreed to; and at 12:58 p.m. the Senate took a recess, subject to the call of the Chair.

The Senate reassembled at 1:30 p.m. when called to order by the Presiding Officer (Mrs. EDWARDS.)

INTERIM AGREEMENT ON LIMITATION OF STRATEGIC OFFENSIVE WEAPONS

The Senate continued with the consideration of the joint resolution (S.J. Res. 241) authorizing the President to approve an interim agreement between the United States and the Union of Soviet Socialist Republics.

Mr. BENTSEN. Madam President, I rise to support the amendment offered by the distinguished Senator from the State of Washington.

Let me say at the outset that it is my intention to support the interim agreement which has been reported by the Foreign Relations Committee. I feel that it marks a significant step forward in the effort to limit the arms race and that it is certainly a welcome development.

My concern here, Madam President, and my purpose in cosponsoring the amendment of the Senator from Washington is to put the Congress on record in favor of an arms limitation agreement that will in fact insure a more stable world and a certain peace. We are not seeking to impede SALT–II but rather to improve its chances for success.

The measure before us is only an interim understanding and leaves a great number of important policy issues unresolved. I feel that the Congress has a role to play in shaping the policy which will be the basis for the final United States-Soviet Arms Control Agreement to be reached during SALT–II.

The Jackson amendment deals with three issues of crucial significance to the security of the United States:

First. The threat to the survivability of the U.S. strategic deterrent forces under the interim agreement.

Second. The need for equality in any follow-on agreement on offensive intercontinental strategic weapons and

Third. The need for research development and force modernization.

Certainly, there can be little disagreement with the principal thrust of any of these three points. On the first point, no Senator, I feel sure, would ask the United States, for the sake of an arms agreement, to place itself in an indefensible position in which our own strategic forces would be threatened by advances in Soviet weaponry. The Jackson amendment merely asks us to confirm that belief in the context of this interim agreement.

On the second point, certainly most Senators would expect the United States to secure an agreement in the SALT–II negotiations that leaves the United States on equal footing with the Soviets in terms of strategic intercontinental weapons.

The language of the amendment does not commit us to any numerical formula that would tie the hands of the negotiators at Helsinki. It does, however, put the negotiators on notice that the Congress expects them to drive a hard bargain which will leave us at parity with the Russians in terms of major strategic weapons systems. This point of view concerning the second round, by the way, has been shared by every major administration witness to testify before the Armed Services Committee on the interim agreement.

On the third point, Madam President, I feel that a majority of the Senate would continue to support a vigorous program of research, development, and modernization in support of a prudent strategic posture. The Senate approved this year an $8.5 billion authorization for research and development within the Department of Defense which represents the largest amount ever approved for these important activities by the Congress.

The language of the Jackson amendment merely reaffirms the intent of the Congress to continue to support a research and development program that will enable us to maintain technological parity with the Soviet Union.

This language in no way commits the Congress to support any particular weapons system or research program.

Madam President, I feel that the Jackson amendment is an imminently correct assertion of the Senate's right to advise and consent in foreign policy matters. The U.S. negotiators at Helsinki, as well as the Soviet representatives they will face, deserve an expression from the Congress as to what are our expectations for the second stage of SALT. It may well be, Madam President, that an affirmative statement by the Congress today could eliminate any subtle misunderstandings on the part of the negotiators which could jeopardize the approval of a permanent arms control agreement in the future. For this reason I will support the Jackson amendment and hope that a majority of the Senate will share in this view.

Mr. JACKSON. Madam President, will the Senator yield?

Mr. BENTSEN. I am glad to yield to the distinguished Senator from Washington, who is one of the authorities on this problem and how we should deal with it and who has expended a great amount of time on it.

Mr. JACKSON. Madam President, first of all, I want to say to the Senate that no one on the Armed Services Committee took a keener interest in connection with the witnesses who appeared before our committee on this particular subject of the strategic arms limitation talks than the able and distinguished Senator from Texas.

Mr. BENTSEN. I thank the Senator.

Mr. JACKSON. I say this in all objectivity. His questions were penetrating and to the point. He helped to bring out many of the issues he has been bringing out here today by his searching questions. I, as one who is sponsoring this amendment with the Senator from Texas and other Senators on a bipartisan basis, am deeply in his debt for the record he has made on this subject.

I just wanted to ask the Senator a question. Does he not feel it is important to consider the fact that the interim agreement, that we are called upon to approve upon an interim basis, is in fact an agreement that leaves the United States during this 5-year period on a basis of, shall we say, subparity in the specific subjects involved; that is, sea-launched missiles and land-based missiles? Is that not correct?

Mr. BENTSEN. I would say in particular it leaves the United States in a position where, without our moving ahead in modernization and research, they could move substantially ahead of us, because in that area there is no limitation.

Mr. JACKSON. Beyond that, under the agreement the Soviets are given an advantage of 50 percent in launchers and a throw-weight capacity advantage of 4 to 1?

Mr. BENTSEN. Yes.

Mr. JACKSON. So the particular amendment the Senator has addressed himself to this afternoon does not run in effect to what we are referring to as the interim agreement, but runs as a policy directive, does it not, to the negotiators and the President who will have his representatives at Geneva in October. to say, "Look, we can approve this interim agreement on a 5-year basis, but what we want is to achieve strategic equality as stipulated in the amendment." We got equality in the ABM treaty, and the Russians insisted on equality. Did they not?

Mr. BENTSEN. That is correct.

Mr. JACKSON. We got two ABM sites and they got two ABM sites. Actually, we will utilize only one site. All we are asking for in this declaration is that we obtain equality and parity with the Soviet Union in strategic offensive arms.

We have agreed to equality or parity in limits on defensive arms, antiballistic missile systems, is that not correct?

Mr. BENTSEN. That is correct. I would say to the distinguished Senator from Washington that what we are asking is that we tell our negotiators and the Russians ahead of time, before acceptance of the guidelines, that we do not want to have to come in here with 20–20 hindsight and tell them what they did wrong, but that we believe that the exercise of the power to advise ahead of time is a part of the proper role of the U.S. Congress.

Mr. JACKSON. And if we fail in this, it might put our negotiators in a difficult spot. I can hear the Russians saying, "Congress has already agreed to an agreement that gives the Russians 50 percent more in the way of launchers and a 4 to 1 advantage in throw weight or carrying capacity." The amendment we propose would make clear that the interim agreement is one thing and the permanent agreement, which will involve a treaty, is another, and that in the permanent treaty or agreement that we hope we can negotiate, we will expect equality.

As I have said, Madam President, on a number of occasions since the debate got underway, I would like to see the Soviet Union cut back their offensive forces to where we are, that is, from 1,618 missiles down to 1,000, and I would like to see them stop right now on their Y-class submarine force, and agree to either 44 or 41 submarines.

People who talk about ending the arms race should be talking in these terms, it seems to me. This is the kind of rough equality that I think we are trying to achieve. The amendment is very clear. On page 2 of the amendment, line 9, we have laid it out as clearly as anyone can. What we say is this:

> The Congress recognizes the principle of United States-Soviet Union equality reflected in the antiballistic missile treaty, and urges and requests the President to seek a future treaty that, inter alia, would not limit the United States to levels of intercontinental strategic forces inferior to the limits provided for the Soviet Union.

That is the heart of the amendment. How in the world can there be any objection to that kind of policy guidance to the President and to his negotiators? I just would like to see some reductions on the Soviet side. In the ABM treaty that I voted for and the able Senator voted for the United States has agreed to reduce our ABM forces; have we not?

Mr. BENTSEN. That is correct.

Mr. JACKSON. We are dismantling the force at Malmstrom Strategic Air Force Base in Montana. Would it not be wonderful, if we could make some progress in the control and limitation of arms by which the Soviet Union would agree to cut their offensive strategic forces back to the levels that we have tried to maintain?

Mr. BENTSEN. Let me make this point very clear: No one more than the Senator from Texas would like to see an end to this arms race, and see those funds diverted to things that we need for our people in this country. But I understand there is also the question of surviving as a nation. In this interim agreement, we have arrived at two kinds of numbers. We are talking about the Russians having the ability to have 950 SLBM launchers, and we are talking about the United States having 710 such SLBM launchers.

Mr. JACKSON. And in addition to their 950, they get to keep the G-class submarines.

Mr. BENTSEN. That is correct.

Mr. JACKSON. That would add 70, if they exercise that option.

Mr. BENTSEN. We are talking about our having some 44, maximum number of modern ballistic missile submarines to launch such missiles, but the Russians having some 62.

I am willing to accept that if I am also to understand that we are going to work toward parity in the long run.

Mr. JACKSON. In the next round of negotiations.

Mr. BENTSEN. Yes. If we are really going to have an arms agreement that can survive, then it has to be one that finally works toward parity, where neither side has an advantage over the other. That is the only way we are going to end this arms race, and the only way the people of this Nation should accept it.

Mr. JACKSON. Right. In other words, what the Senator is saying, too, is that we want agreements that will stabilize, not destabilize. We do not want either side to have an advantage, and if we are going to bring about a more peaceful world, it has to be a world in which the major powers, at least, can be assured that they have the means of defending themselves against any kind of catastrophic attack that the other side might make, that they will have a survivable and, therefore, a credible force; is that what the Senator is saying, in part?

Mr. BENTSEN. I would concur with that. I say also to the Senator that the argument can be made and should be made, to fully understand the situation, that while we have more missile heads than do the Russians at this stage, and while we have MIRV'ed more warheads, can the Russians be far behind? With their technology, I am sure they will be MIRV'ing theirs very shortly; and then, with their additional throw-weight, with their larger missiles, that can take more technological advancements than ours by their size alone, they can very rapidly pass us in the number of missile heads themselves.

Mr. JACKSON. And in the yield—the size of the missiles.

Mr. BENSTEN. There is no question about that. They are already there on throw-weight. They have already passed us in the yield per warhead on each of those missiles.

Mr. JACKSON. That is correct.

Mr. BENTSEN. These are things we have to be concerned with in attempting to establish a parity that this Nation can live with over the years.

Mr. JACKSON. Madam President, I just want to say, in conclusion, with the Senator's permission, that I think he deserves tremendous credit for the time that he has spent in connection with the hearings, in digging out the critical information, when we had all of the key witnesses there and we spent several days with the Joint Chiefs of Staff, the Secretary of Defense, representatives of the Arms Control and Disarmament Agency, and outside experts. The record of our hearings speaks for itself, but I wish to express my deep appreciation to the able Senator from Texas for his invaluable contribution. And I might say that what he was able to elicit, in substantial part, from the witnesses laid the foundation for the amendment that we all drafted, cosponsored by some 27 Senators from both sides of the aisle, and I want to express my deep appreciation to him.

Mr. BENTSEN. I thank the Senator from Washington, and I yield to the Senator from Utah.

Mr. BENNETT. Madam President, I am not a member of the Committee on Armed Services, so I have to approach this problem without the basic technical information that many of my colleagues, like those who have just spoken, possess. But I think that I can understand the problems which underlie the need for the amendment that has been offered by the Senator from Washington, and I join my many colleagues who have supported his amendment, as I do. My colleagues, as they have spoken, have addressed themselves to a number of issues with which I find myself in full accord:

The imperative that the United States not accept a position of inferiority in any final strategic offensive arms agreement seems so obvious that I am led to wonder why this Senate finds it necessary to debate the point. If there are those amongst us who would truly prefer a position of inferiority let them so state. I agree with those who have noted that this is not a position which the American public is prepared to endorse.

So too do I agree with those who have emphasized the importance of strictly adhering in this agreement to intercontinental strategic forces; that is, intercontinental ballistic missiles, submarine-launched ballistic missiles, and intercontinental range bombers. To do otherwise—implicity or explicitly—raises the question of the integrity of our alliance commitment. Involving systems or forces devoted to the direct defense of the territories of our allies in bilateral United States-Soviet talks is certainly not appropriate.

I have heard no one argue that the subject of systems and forces in which our allies might be involved cannot or should not be considered separately and on its own merits. But this should be done in its own time and place and in particular with the direct involvement and participation of those allies who would be affected.

I have also listened with great interest as a number of my colleagues have addressed the issues of the military dangers inherent in the massive buildup of Soviet strategic armaments. The facts are unpleasant, but they are facts, and we would ignore at our peril the deployment of this enormous capability by the USSR.

All those who have testified before the Senate committees—whatever their political convictions and however they may view the value of the strategic offensive arms agreement—are unanimous in their judgment that the Soviets are deploying forces grossly in excess of those they would require strictly for deterrence.

Finally, I have been equally impressed by the arguments I have heard which suggest that it is not merely the direct military threat from Soviet forces with which we must concern ourselves but the political implications that are inherent in the massive Soviet strategic buildup.

In this connection, I am bound to state that the sort of commentary to be found in the editorial in yesterday's Washington Post strikes me as missing a good part of the point expressed by the Jackson amendment. It is not just the physical danger of attack which would concern us in viewing recent Soviet deployments. We must also acknowledge the fact that those forces might be utilized to exert political pressures as well, a technique whose mastery the Soviet leadership has demonstrated.

Military power carries with it an unmistakable impression of political power, and there are those who would use it deliberately in that way. Nor can this strategic force buildup be viewed apart from Soviet conventional force capabilities, which have been ominously large for years.

What, for example, are those who are dependent on military power to think when they read in the recent edition of the highly respected Jane's Fighting Ships that "it is a sobering thought that no other country in the world in this day and age of sophistication and inflation can possibly build as many submarines as the Soviet Navy has at the present time"?

In our capitalist economies we have to account for our expenditures. Under the

Soviet system, their Government can use any percentage of the total output of the people in any way it pleases, and they have demonstrated that by their emphasis on the building up of their submarine navy.

We cannot and must not let it be said that the strategic relationship between Soviet offensive forces and those of the United States can never be redressed.

Having associated myself, therefore, with many of my colleagues who clearly support the Jackson-Scott amendment, I should like to address myself to an additional point which to me is of equal importance.

The Jackson-Scott amendment provides for "the maintenance of a vigorous R. & D. and modernization program." I think it is vitally important for the Senate to express support for such a provision. It is perfectly apparent to all who are students of military programs that technology does not stand still. One might wistfully yearn for the days of the bow and arrow or the musket, but they are gone, never to return. One might hope, also, that at any given point in time, two potential military opponents such as the United States and the U.S.S.R. might be completely equal, might have the same number of submarines with the same number of missiles and the same number of men, and so forth. But, of course, that is not what happens.

We do not plan and build our forces on the same pattern, and there is never a point in time when we can say that there is actual, measurable equality. Actually, what happens is a sort of game of leapfrog, and I think nothing illustrates that better than our submarine situation.

When World War II ended, we began to build up the first fleet of nuclear submarines; and for a generation we possessed the only effective fleet of nuclear submarines, mounting missiles with nuclear warheads, in the world. The Russians waited 20-odd years before they began their fleet, and now they are building one much more rapidly than we have done; but they are able to capitalize not only on our mistakes—if we made any—but also on the increased and improved technology.

So I do not think we are being unpatriotic when we admit that the new 1972 nuclear submarines coming out of the Russian shipyards are better than any nuclear submarine we have. This, I hope, is a temporary thing; and if we can continue—again to quote the words of the Jackson-Scott amendment—"the maintenance of a vigorous R. & D. and modernization program," we can leapfrog over the Russians when the time comes.

That is the way arms progress goes, because we do not all build the same thing at the same time, on the same blueprints—which means, of course, that we cannot afford to stand still. We must continue to attempt to gain additional knowledge, additional technical skill, in order that the weapons we build—the submarines, the airplanes, and the missiles—will be better than those the Russians have because they are later and have the benefit of the later technology. In the meantime—and this is the meantime, in a sense—the Russians are ahead of us, and we cannot afford to sit back and let that condition continue indefinitely.

It is equally wistful to yearn for an end to the process of refinement and further development of modern military technology. It just violates all the meaning of the human attitude. We struggle constantly to do better whatever we do. We have tremendous curiosity, all of us. We try to find new ways and new things. If we require any proof of that, we need only look back to the naval limitations we tried to enter into in the 1920's and realize how far we have gone in the 50 years since, and realize that that limitation failed because—for one reason, among others—neither we nor our allies nor the people who signed that agreement with us could be content to leave things as they were.

I confess that I sometimes wonder—when I read the statements of some well-meaning citizens and even distinguished groups such as the Federation of American Scientists—whether their interest is not first and foremost an attempt to shackle U.S. military technology development, leaving that of the Soviet Union free to grow as it will. It is hard for me to understand how a group of men who call themselves a Federation of American Scientists can believe that the scientific approach, the scientific mind, will not continue to operate, because if they are true scientists, they will never be content with the situation as it is. It seems to me pollyannish not to face the fact that our future security will be dependent upon our attainment of the most advanced state of the art in military weaponry at each step and each point in time in our history. One might wish that it would be otherwise. But sadly, this is the state of the world in which we live. If we should decide that we have come to the end of our ability or our interest in increasing our military sophistication, we can be sure that there are other men, other scientists in other nations who will press on and continue to seek for more effective weapons.

I can only say that I count it as a blessing that American genius has kept the quality of our military forces as nearly in the forefront of technological capacity as we now are. I count on them to continue to keep us abreast, in uneven steps, perhaps, but, over time, at a pace which will equal those of the other nations of the world.

Mr. President, the Jackson-Scott amendment recognizes the problems and challenges that lie ahead. If we adopt it, we will commit our Nation to the necessary improvements and commitments that it must make if we are, over time, to be sure of our independence, of our freedom, and of our place as the leader of the free world.

I think that if the Senate approves the Jackson-Scott amendment, as I hope it will—and I shall vote for it—it will be making a substantial contribution not only to the safety of this Nation in the future but also to the future of the peace of the world.

Mr. HARRY F. BYRD, JR. Mr. President, the address just given by the able senior Senator from Utah (Mr. BENNETT) is a magnificent one. I wish that all the American people could have heard it. It enunciated the principle of the Jackson-Scott amendment which I think all Americans subscribe to; namely, that the United States must be sure it has equality with any potential enemy in the field of nuclear arms.

Mr. BENNETT. Mr. President, will the Senator from Virginia yield?

Mr. HARRY F. BYRD, JR. I am glad to yield to the Senator from Utah.

Mr. BENNETT. I tried to make the point that we cannot hope to maintain constant parallel equality. It seems to me that one of the important values of this amendment is it does give us the opportunity to catch up in those fields in which we might temporarily be behind.

Mr. HARRY F. BYRD, JR. Yes. That is what impressed me about the Senator's statement. As he points out, under the interim agreement, in some areas we are temporarily behind and will be behind during the period of the interim agreement in certain numerical cases.

The Jackson-Scott proposal looks to the future. It says to our future negotiators that Congress feels, on the question of nuclear weaponry, in this very dangerous period in world history, that the United States must not conclude an agreement that would put our nuclear forces in a subparity position vis-a-vis the Soviet Union.

This whole debate of the past few days has been most desirable. I believe that the distinguished Senator from Washington (Mr. JACKSON) deserves high commendation for forcing the debate. Had he not presented the amendment, it is unlikely that the Senate would have given detailed discussion to this interim agreement which was signed by President Nixon and Chairman Brezhnev in Moscow not long ago. It is important that the Senate debate this matter at some length. The vehicle for the debate has been the Jackson-Scott proposal.

QUORUM CALL

Mr. HARRY F. BYRD, JR. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. TAFT). The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. FANNIN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. TAFT). Without objection, it is so ordered.

MESSAGE FROM THE HOUSE

A message from the House of Representatives by Mr. Berry, one of its reading clerks, announced that the House had passed the following bills of the Senate, severally with an amendment, in which it requested the concurrence of the Senate:

S. 141. An act to establish the Fossil Butte National Monument in the State of Wyoming, and for other purposes;

S. 1475. An act to authorize the Secretary of the Interior to provide for the restoration, reconstruction, and exhibition of the gunboat "Cairo," and for other purposes;

S. 2166. An act to authorize the establishment of the Grant-Kohrs Ranch National

Historic Site in the State of Montana, and for other purposes; and

S. 3159. An act to authorize the Secretary of the Interior to establish the John D. Rockefeller, Junior, Memorial Parkway, and for other purposes.

The message also announced that the House had passed the bill (S. 2956) to make rules governing the use of the Armed Forces of the United States in the absence of a declaration of war by the Congress, with amendments, in which it requested the concurrence of the Senate; that the House insisted upon its amendments to the bill, asked a conference with the Senate on the disagreeing votes of the two Houses thereon, and that Mr. MORGAN, Mr. ZABLOCKI, Mr. HAYS, Mr. FASCELL, Mr. MAILLIARD, Mr. FRELINGHUYSEN, and Mr. FINDLEY were appointed managers on the part of the House at the conference.

The message further announced that the House had passed the following bills and joint resolutions, in which it requested the concurrence of the Senate:

H.R. 10486. An act to make the basic pay of the Master Chief Petty Officer of the Coast Guard comparable to the basic pay of the senior enlisted advisers of the other Armed Forces, and for other purposes;

H.R. 12383. An act to amend chapter 30 of title 39, United States Code, to permit a person, in complete anonymity, to send substances in the mails which they suspect are drugs to Government officials for analysis, and for other purposes;

H.R. 13697. An act to amend the provisions of title 14, United States Code, relating to the flag officer structure of the Coast Guard, and for other purposes;

H.R. 13792. An act to amend title 10, United States Code, to limit, and to provide more effective control with respect to, the use of Government production equipment by private contractors under contracts entered into by the Department of Defense and certain other Federal agencies, and for other purposes;

H.R. 13825. An act to extend the time for commencing actions on behalf of an Indian tribe, band, or group;

H.R. 14891. An act to amend title 14, United States Code, to authorize involuntary active duty for Coast Guard reservists for emergency augmentation of Regular forces;

H.R. 15577. An act to give the consent of Congress to the construction of certain international bridges, and for other purposes;

H.R. 15922. An act to amend the Railroad Retirement Act of 1937 to simplify administration of the act;

H.J. Res. 1211. Joint resolution to amend the joint resolution providing for membership and participation by the United States in the South Pacific Commission; and

H.J. Res. 1257. Joint resolution to authorize an appropriation for the annual contributions by the United States for the support of the International Agency for Research on Cancer.

HOUSE BILLS AND JOINT RESOLUTIONS REFERRED

The following bills and joint resolutions were severally read twice by their titles and referred, as indicated:

H.R. 10486. An act to make the basic pay of the master chief petty officer of the Coast Guard comparable to the basic pay of the senior enlisted advisers of the other Armed Forces, and for other purposes;

H.R. 13697. An act to amend the provisions of title 14, United States Code, relating to the flag officer structure of he Coast Guard, and for other purposes; and

H.R. 14891. An act to amend title 14, United States Code, to authorize involuntary active duty for Coast Guard reservists for emergency augmentation of regular forces; to the Committee on Commerce.

H.R. 12383. An act to amend chapter 30 of title 39, United States Code, to permit a person, in complete anonymity, to send substances in the mails which they suspect are drugs to Government officials for analysis, and for other purposes; to the Committee on Post Office and Civil Service.

H.R. 13792. An act to amend title 10, United States Code, to limit, and to provide more effective control with respect to, the use of Government production equipment by private contractors under contracts entered into by the Department of Defense and certain other Federal agencies, and for other purposes; to the Committee on Armed Services.

H.R. 13825. An act to extend the time for commencing actions on behalf of an Indian tribe, band, or group; to the Committee on Interior and Insular Affairs.

H.R. 15577. An act to give the consent of Congress to the construction of certain international bridges, and for other purposes;

H.J. Res. 1211. Joint resolution to amend the joint resolution providing for membership and participation by the United States in the South Pacific Commission; and

H.J. Res. 1257. Joint resolution to authorize an appropriation for the the annual contributions by the United States for the support of the International Agency for Research on Cancer; to the Committee on Foreign Relations.

H.R. 15922. An act to amend the Railroad Retirement Act of 1937 to simplify administration of the Act; to the Committee on Labor and Public Welfare.

SIGNALS FOR PEACE IN 1969

Mr. FULBRIGHT. Mr. President, the competing national candidates have been engaged in a protracted controversy over whether in the first months of his administration President Nixon ignored a "signal" for genuine peace talks from Hanoi. In the course of this discussion, Vice President AGNEW has acted in character by hurling political epithets at Mr. Shriver, while Secretary of State Rogers has acted quite out of character by doing the same. Whatever the merits of the controversy pro and con, Senators of both parties will surely agree that it would be most inappropriate if the Secretary of State were to demean his office by signing on as another partisan hatchet man for Mr. Nixon—especially since the administration is already lavishly endowed with that particular talent.

Although I have no firsthand knowledge of the event, I think it likely that the inexperienced Nixon administration of 1969 did ignore a signal for peace from Hanoi, as our former negotiators in Paris, Averell Harriman and Cyrus Vance, as well as Mr. Shriver, who was then Ambassador in Paris, have testified. And there is no doubt whatever that the administration ignored an even stronger signal for peace from the American people. Whatever Mr. Nixon may have lacked in diplomatic experience in early 1969, he was certainly was not lacking in political experience. He could hardly by that time have forgotten his explicit campaign promise of the previous year:

> If in November this war is not over after all of this power has been at their disposal, then I say that the American people will be justified to elect new leadership and I pledge to you that the new leadership will end the war and win the peace in the Pacific and that is what America wants.[1]

Like most other Americans, I took it for granted that Mr. Nixon intended to honor his promise and carry out the mandate of his election. As it turned out I was mistaken, but it was not yet clear by March of 1969 that the Nixon plan to end the war would in fact be a plan to perpetuate it through the program called "Vietnamization." On the assumption that Mr. Nixon was interested in a compromise peace rather than a military victory for the Thieu regime, I gave the President a memorandum of recommendations at a private meeting on March 27, 1969. My "peace signal" was ignored like the others—those from Hanoi and from the American people. Nonetheless, my memorandum of March 1969 may be pertinent to the current discussion; I therefore ask unanimous consent to have it printed in the RECORD at this point.

There being no objection, the memorandum was ordered to be printed in the RECORD, as follows:

MEMORANDUM GIVEN TO PRESIDENT NIXON BY J. W. FULBRIGHT AT A PRIVATE MEETING ON MARCH 27, 1969

If there was any recognizable mandate from the electorate in the November election, it was that the Vietnam war should be brought to an end as quickly and efficiently as possible. How to carry out that mandate will probably be the most important issue to face the President during his term in office and will have great impact on the course of domestic politics and foreign policy for years to come. This memorandum is based on the assumption that the President seeks a compromise settlement which will bring about the withdrawal of United States forces and leave South Vietnam's internal political problems to be settled by the Vietnamese.

With this mandate the President, unhampered by ties to past policy, has much room to maneuver in charting a new course for United States policy. But it is imperative that he act decisively before events foreclose his options. Those options are being foreclosed rapidly by actions in South Vietnam and inaction in Paris. The failure of United States negotiators, thus far, to pursue diplomacy in Paris on substantice issues, plus an aggressive military and political posture in South Vietnam, again raise serious questions about United States objectives, resurrecting the doubts which doomed peace gestures by the Johnson Administration.

Credibility has a fragile and elusive quality and, once destroyed, is most difficult to reconstruct. If progress is to be made in Paris, the President must make the United States policy of seeking a compromise settlement more credible. There are many pressures at work to escalate our objectives, with the aim of avoiding genuine political compromise which will bring about the withdrawal of American forces. These pressures, if allowed to go unchecked, will soon destroy the delicate balance which brought the parties together in Paris and dash any hope for a early end to the war.

1. VIETNAM AND PARIS

The decision to halt the bombing signaled admission by both sides of the existence of a military stalemate, a situation in which further escalation would not advance the objectives of either side. That decision presumably carried, as a correlative to the understanding that Hanoi would not take military advantage of the halt, the implication that the United States and South Vietnam would show a degree of military restraint in the South. If it were otherwise, the North Vietnamese and Viet Cong forces, without reinforcements from the North, would have been subject to sure extermination by our side. One must assume that the North Vietnamese did not intend to make such a sacrifice.

---

[1] Speech at Hampton, N.H., quoted in "Nixon Says He'd End War, Contends LBJ Has Not Used Power Wisely," Washington Post, March 6, 1968, p. 1.

Thus it was reasonable to assume that if one side took undue advantage of the situation, the other side would feel compelled to retaliate in order to maintain the validity of its negotiation position. Their current offensive is a logical and predictable result of Allied military operations in South Vietnam since the bombing halt. There are ominous signs that the military war has regained a momentum which threatens to defeat the political approach to a settlement.

Official reports and news accounts reveal that there has been a concerted step-up in both the military and the political aspects of the war in the South since October. Department of Defense statistics show that in the three months following the bombing halt the number of battalion-size operations against the enemy increased by 33%; the monthly toll of enemy troops killed in action went up by 46%; enemy weapon losses increased by 44%; and United States troop strength increased by 12,000. News reports indicate that bombing raids and other operations against long-held Viet Cong areas increased substantially since the bombing stopped. And during November and December, under the accelerated pacification program, the number of hamlets under government control increased by 7%, while those under Viet Cong control decreased by 4½%.

The step-up in military operations has been accompanied by a hardening of the Thieu government's political policies. It has not moved to broaden its base or take other steps to strengthen its position for dealing with the National Liberation Front on a political basis. Repression rather than reconciliation seems to be the government's theme. The closing of newspapers, arrests of public figures and religious leaders, and general coercion of those who advocate peace evidence uncertainty and weakness, not assurance or a willingness to contest politically with the National Liberation Front. This pattern of conduct, carried out with the apparent acquiescence of the United States, is hardly conducive to creating the proper atmosphere for negotiations and, again, speaks far more persuasively to North Vietnam and the National Liberation Front about our objectives, than do the words of our spokesmen in Paris. If our policy makers were in the shoes of the other side, they too might have doubts about United States intentions.

The siren song of those who would turn that last corner, seeking the victory which has eluded Vietnam policy makers for so many years, will only lure the United States into a deeper and more devastating war. Too many United States officials equate the objectives of the Thieu government with our own, and believe that, if we keep up the military pressure, the negotiations will eventually become a forum to define the surrender terms for the other side. But neither side has come to surrender, and if the President is to avoid becoming a prisoner of events, he must take steps to insure that our military actions in South Vietnam are carefully geared to advancing a compromise solution in Paris; that we begin the painful, but essential, process of divorcing our interests from those of the Thieu government; and that our negotiators make every effort to begin serious conversations with the other side on political issues.

2. THE NATIONAL INTEREST

The terms of peace we seek and the means by which we seek them necessarily depend upon what we conceive our interests to be in Vietnam and what we conceive it not to be. That has been, and remains, the controlling, unresolved issue of American policy in Vietnam. Until it is resolved, questions of the feasibility of one plan of procedure as against another are premature if not irrelevant; the question remains: feasible to what end? Is it our aim to eliminate the Viet Cong insurgency or to come to terms with it? And, more broadly, in seeking to end the war, are we trying to realize a positive purpose or to liquidate an unsound policy?

Although it was not always so, there is now widespread agreement among politicians, diplomats and academicians that our policy has been ill-advised, that there is no vital security interest of the United States at stake in Vietnam, and, accordingly, that the nature of the government of South Vietnam is not a matter of vital interest to the United States but only one of strong preference. The premise on which this outlook is based is that our vital interest is a strategic rather than an ideological one, which is to say, that American security depends not upon the elimination of the Viet Cong or any other Communist movement but rather upon the discouragement, or containment, of Chinese expansion.

It is not my purpose to repeat the now familiar arguments against the war in Vietnam. It may be useful, however, to list them because, taken together, and representing as they now do, the weight of informed political and academic opinion, they constitute a powerful—to my mind irrefutable—case against pursuing the war toward its original aim of eliminating the insurgent threat to the Saigon government.

The first point to be made is that this goal is unattainable. As Ambassador Yost wrote:

"The most decisive lesson of Viet Nam would seem to be that no matter how much force it may expend, the United States cannot ensure the security of a country whose government is unable to mobilize and maintain sufficient popular support to control domestic insurgency. . ."[1]

No less unrealistic is the concept of an exemplary war, a war designed to prove that "wars of national liberation" cannot succeed and to demonstrate America's fidelity to its alleged commitments. Mr. Kissinger has written:

". . . Whatever the outcome of the war in Vietnam it is clear that it has greatly diminished American willingness to become involved in this form of warfare elsewhere. Its utility as a precedent has therefore been importantly undermined."[2]

Equally fallacious is the expectation that the war in Vietnam will "contain" China. The prevalent view among southeast Asian specialists is that the Chinese challenge in south Asia is more political and cultural than military, that a strong independent Communist regime is a more effective barrier to Chinese power than a weak non-Communist regime, that the Hanoi government is nationalist and independent, that, accordingly, once peace is restored, North Vietnam will serve as a barrier rather than as an avenue to Chinese expansion. It is also pointed out that the primary targets of Chinese supported insurgency have been those countries—notably Vietnam, Laos and Thailand—which have allied themselves militarily to the United States, while those—such as Burma and Cambodia—which have accepted Chinese cultural and political predominance have by and large been left alone, free to enjoy a tolerable independent existence.

Assuming still that our national interest in Asia is strategic rather than ideological, it follows that the United States has no vital security interest in the preservation of South Vietnam as an independent, non-Communist state. We have, to be sure, a moral obligation to those South Vietnamese whose lives would be jeopardized by an American military withdrawal, but this obligation can be met by any one of a number of means as part of a peace settlement and certainly does not in itself justify the continuing sacrifice of two hundred or more American lives every week. The basic point is that it is not a matter of vital interest to the United States whether South Vietnam is governed by Communists, non-Communists or a coalition; nor is it a matter of vital interest to the United States whether North and South Vietnam are united or divided. Our interest is in the prevalence, whatever its form, of indigenous Vietnamese nationalism; beyond that strategic interest gives way to ideological preference.

C. CONDITIONS OF PEACE

Mr. Kissinger may well have had an important insight in asserting that "the subject of a coalition government is the "most thankless and tricky area for negotiation *by outsiders*."[3] Whether or not American representatives actively participate in negotiations for a new political regime in South Vietnam, quite obviously the consent of the immediate parties, the Saigon government and the National Liberation Front, will be of primary importance. In addition to being *impractical*—and more to the point from the standpoint of American interests—it is *unnecessary* for the United States to *impose* a coalition government on South Vietnam.

It is equally unnecessary—for the same reasons of American national interest—for the United States to put the weight of its power behind Saigon's refusal to enter—or even to discuss—a coalition government. That, to all appearances, is what the United States is now doing, thereby sacrificing American lives for a purpose which is not vital to American interests. As long as the Saigon government is allowed to believe that it can count on undiminished American military backing regardless of its refusal to make concessions to the National Liberation Front, there can be little prospect for the successful negotiation of a compromise settlement. The issue seems to be one not of what we may impose on the Saigon government but what we allow it to impose upon us. By the same logic that the United States ought not to impose a coalition government upon South Vietnam, neither ought it to shield the Saigon leadership from having to enter a coalition government should that be the result of the natural interplay of indigenous forces within Vietnam.

The primary requirement is that the internal political regime of South Vietnam be determined by the unhampered interplay of indigenous forces. Whether this is accomplished by direct negotiations between the Saigon government and the National Liberation Front, by an internationally supervised election as called for by the Geneva Accords of 1954, or by some other means is not of critical importance. In extremity, should the two parties prove intransigent, we have the option simply to let them fight it out—without further American military participation.

[3] Henry Kissinger, "The Viet Nam Negotiations," *Foreign Affairs*, January 1969, p. 228.

We have that option because our own vital security interests are not at stake in Vietnam. Nor indeed is the political and personal prestige of the new Administration at stake, although continued delay in the initiation of a new policy cannot but have the effect of associating the new Administration with the old policy, and is likely, moreover, to result in the loss of the broad domestic political support which the Administration now commands.

I recommend accordingly, that the American negotiating position in Paris be adjusted to comply with the following general principles: (1) that the United States has no vital security interest at stake in Vietnam; (2) that, accordingly, it is the invention of the United States to withdraw its forces from Vietnam as soon as circumstances allow; (3) that these circumstances can best be brought about by the conclusion of a direct agreement between the Saigon government and the National Liberation Front; and (4) that, to this end, the Saigon government must be advised and kept aware that the United States is not prepared to secure for that government a military victory and, indeed, is not prepared to take any further military action beyond the requirements of American security interests.

INTERIM AGREEMENT ON LIMITATION OF STRATEGIC OFFENSIVE WEAPONS

The Senate continued with the consideration of the joint resolution (S.J. Res. 241) authorizing the President to approve an interim agreement between the United States and the Union of Soviet Socialist Republics.

Mr. FANNIN. Mr. President, I am very pleased to speak in support of the amendment offered by the distinguished Senator from Washington, Senator JACKSON for himself, Senator SCOTT and 25 other cosponsors. The amendment is a sensible way to establish basic policy guidelines for the second round of the SALT talks.

Representatives of the United States are being asked to meet with representatives of the Soviet Union in October to begin negotiating what may be a long-term agreement limiting offensive nuclear weapons. I maintain that it was one thing for our negotiators to accept as a temporary measure an agreement which was designed to freeze the deployment of forces, without regard to the long-term consequences of such deployment—indeed, the consequences of such deployments over the next 5 years. It is quite another matter, I maintain, to ignore the fact that our negotiators must reengage representatives of the Soviet Union in hammering out an agreement which could affect the interest of both nations well into the future. When our representatives undertake these negotiations, I believe it imperative that they speak with a clear and strong voice. That voice must convey the message that this country, while seeking an equitable agreement, will not tolerate permanent inferiority, inferiority in terms of the limits set upon our strategic armaments. I believe it important—indeed vital—for our negotiators to understand that they speak not merely for the executive branch of this Government but for the Congress as well.

Surely, the approval of this amendment will offer an opportunity for the Senate of the United States to reassert its rightful role in sharing responsibility with the President for formulating our foreign policies. Moreover, this amendment provides us with an opportunity to join in an expression of support for the general objectives sought by the administration. The White House and the Secretaries of State and Defense have made clear the administration's support for the Jackson-Scott amendment.

I am surprised that some of my colleagues—Senators that I would have expected to be in the forefront of those supporting Senatorial prerogative—were prepared to approve the resolution on the interim agreement without including the advice of the Senate, indeed, almost without comment. That is remarkable.

Mr. President, I should like to call attention to one consideration not explicitly covered by the pending amendment but one which I take to be one of the concerns leading to its introduction. This has to do with the issue of verification. I remind my distinguished colleagues that the interim agreement provides for no on-site inspection—despite the fact that a requirement for on-site inspection has been a central fixture of all major U.S. arms control proposals. We have felt that this requirement was essential to give confidence to both parties that arms control agreements would be adhered to in all respects. Considering the closed nature of the Soviet society, as contrasted to the very open nature of our own, I would have felt that insistence on a similar provision in this agreement would have been in the U.S. interest. Indeed I still feel that, and I would hope that our negotiators will find it incumbent upon themselves to explore, to the maximum extent possible, on-site inspection as part of the next SALT agreement.

But should we fail in that objective, we shall presumably be forced to rely upon so-called national means for purposes of verification. It is common knowledge that these national means do in fact provide a very high degree of verification. But they are by no means infallible. The systems themselves have inherent shortcomings and they are, moreover, subject to external environmental circumstances over which they have no control. Finally, and in my view most importantly, they are subject to a degree of reliance on proper conduct and good faith on the part of those whose territories are the subject of this verification.

We should note, in this regard, that article V of the present agreement states that:

> Each Party undertakes not to use deliberate concealment measures which impede verification by national technical means . . .

Are we entirely clear on what is meant by deliberate concealment measures? I am not confident that we are. There are perhaps some such measures which would be perfectly recognizable as deliberate concealment, but others might not be. Yet, verifying the present interim agreement depends upon the effectiveness of our national means, in the face of ambiguity about what constitutes deliberate concealment.

If a follow-on SALT II agreement is basically sound, if it provides limits under which neither side is frozen into a position of inferiority, we may perhaps have somewhat less concern over the inherent limitations in our capability to verify. Conversely, if the terms of the agreement itself permit gross disparity in levels of intercontinental strategic weapons allowed the two sides, we may be operating closer to the margins if cheating takes place. Thus a sound agreement, as called for by the terms of the Jackson-Scott amendment in itself, should make the agreement, if and when reached, more stable and long lasting.

We are here dealing with a matter central to the future security and welfare of this Nation. Our Founding Fathers established a Constitution under which the general security and welfare were vested in the elected representatives. We are duty-bound to discharge that responsibility and it is apparent to me that the Jackson-Scott amendment makes a major contribution to this end.

Mr. GOLDWATER. Mr. President, will the Senator yield?

Mr. FANNIN. I yield to the Senator from Arizona.

Mr. GOLDWATER. Mr. President, I congratulate my senior colleague on a very well thought out argument for the Jackson-Scott amendment. I want to join him in supporting this amendment because I feel it is vital if we are going to enter into this agreement as the President has suggested.

This agreement the President has suggested sounds as if it makes a lot of sense. If one wants to confine himself to the basic arguments that if we do not enter into this agreement, that at the end of 5 years even if we continue our present productivity and the Soviets continue theirs, we will not be able to get together in the same ball park because they will be so far ahead of us. That argument can be brought by anyone in this Chamber even though we have reached a terrible time in our history when we have to admit that any country in this world can surpass the United States in armament and the development of new ideas, and continue to do so.

I cannot understand the argument in this body against the language that merely says in effect that this "would not limit the United States to levels of intercontinental strategic forces inferior to the limits provided for the Soviet Union." This to me is, as we say in the West, common horse sense. As a matter of fact, I wish more parts of this country had more horse sense; we might have more horse sense.

But any agreement that we make—the Soviets are our only potential enemies as of now—the advantage over us not only is now, but also for the 5 years until 1977, which is the running time of this agreement, and on into perpetuity, if it works out to be a big mistake.

I have seen some propaganda put out by the Committee on Foreign Relations.

Again, I am reminded of a book I once saw on how to lie with statistics. In this case I think it might have been objected to by some Members of this body, but nevertheless the figures are completely misleading. For example, we are talking about the importance of the Jackson amendment and giving the United States an opportunity to maintain equality. The Committee on Foreign Relations pamphlet shows an inferiority in bombers. If we want to count heavy bombers that we have against the heavy bombers the Soviets have, we are ahead of them by quite a bit and probably will remain that way. However, what we fail to recognize is that quite a few years ago the United States in a completely unilateral way mothballed every one of our B-47's which constituted our intermediate range bombers. What the Committee on Foreign Relations and its chairman carefully overlooked is the fact that the Soviets have a vast number of intermediate range bombers that can reach the United States. It is true they might not get back, but we have known enemies that did not care, and I think if it ever came to war with the Soviets we would find an enemy that did not care if its bombers got back or not.

So if we want to be realistic from an air standpoint, we are at a standoff vis-a-vis the intermediate range bombers and long range bombers. They have a number that will not only equal but will surpass ours. I am not aware of the megatonnage but I am sure that they could inflict damage on most cities of the United States and then either land, if they care to, or carry to a friendly country, like Cuba.

In submarines, a field where I am sure the Senator from Washington is most concerned, we have given the Soviets the right to outnumber us in submarine launched ballistic systems by over 20, and we are not even yet in production with our submarine, the Trident, which will come in the inventory some time in the 1980's.

In the meantime, we have given the Soviets the right to continue building eight a year. This is another sad commentary to me on our situation in this country. We could not build eight a year unless we undertook a crash program, and under testimony from the Navy Department it might take 5 or 6 years to reach that. The Soviets can do it today.

My next point, and this will be the end of my remarks today, is in the general field of missiles, which again I know the distinguished Senator from Washington (Mr. JACKSON) is most disturbed about. I am sure my senior colleague is disturbed about it, because in our State we happen to house some of the old Titan missiles. They outnumber us in land-based missiles by 600. They will outnumber us in submarine missiles by quite a number when they finish their 62 missiles they are allowed to build.

It is true they do not have the MIRV. I do not know whether I am disclosing any secret information, but it seems to me that I have read in a technical paper from a foreign source that we have had the footprint of a MIRV launched by the Soviets. If they do not have it now, they can have it. It is not a complicated type of missile to build.

Again, in this general field, we are told by the Foreign Relations Committee not to worry, because we have warheads. That might be true, but I would like to inform members of the Foreign Relations Committee that screwing another warhead on another missile is not like loading a .30-caliber rifle. It takes quite a long time. Then it takes a long time to insure the accuracy of the aiming that is put into these devices. So that, on the whole, no matter how many warheads we have stored, the Soviets outnumber us in deliverable missiles and certainly outweigh us in deliverable megatonnage.

Again, I can remember the little chart in that foreign policy comic book, I would like to call it, that pooh-poohs the idea that a 25-megaton device is any more effective than a 1.2-megaton device. Let me repeat, a 1.2-megaton device could miss Washington by 10 miles. We would feel it, but Washington would remain. A 25-megaton device could miss Washington by 10 miles, but there would not be any Washington. A lot of people might say, "That is a good idea." I do not agree with that. We did not build a lot of megatonnage bombs, because we thought we did not need them.

Another point made by the foreign policy paper is that they stress the extreme accuracy of our Minuteman. I remind my colleagues that we have never tested a warhead on a Minuteman. We do not know whether a warhead will even ride on it, because it sets up vibrations. We do not know what the accuracy is. We figure a CEP, which is a measure of accuracy, of a mile, or perhaps even a half-mile. These are the figures that a computer would give us. That is what we got from Robert McNamara, whose middle name was Strange—which was very accurate, I may say. I would bet my money that they are accurate, even though we never tested them, but we were denied the opportunity to find the answer by going into the Test Ban Treaty. So we do not know what the answer is about our antiballistic missiles, because these answers cannot be found underground. The Soviets have all the answers they need to prevent our attacking them, because again we do not know what our missiles will do.

I apologize to my senior colleague for taking so long to ask what should have been a question. Instead, it turns out to be a compliment to him for this thoughtful message that the least this body can do, I think, is support the Jackson amendment before it goes on and says to the Soviet Union, "We are going to stop. You stop it, even though you are football fields ahead of us. We hope you are honest this time." We certainly hope they are.

My decision has not been made as to how I will vote on this measure unless the Jackson amendment is in it. I am tempted strongly to vote against it, because I do not think, without the Jackson amendment, it would be in the best interests of the United States.

Mr. FANNIN. Mr. President, I wish to express my appreciation to my distinguished colleague. I know of his expertise in this field. There is no Member in the U.S. Senate, or in all of Congress, who can speak with as great an expertise in this particular area. I agree with him. I know of his long study in the field of aviation and his long and dedicated service to the Armed Services Committee. He realizes that we are in a serious position what with the Russians continuing to go forward while we are standing still—in fact, going backward. My colleague has brought out that much of our equipment is becoming obsolete and some of that equipment is stored in our State of Arizona. I wholeheartedly agree with him.

I appreciate the fact that the distinguished Senator from Arizona has brought out these facts which are so important in the decisionmaking process of this body. I know the information he has disclosed here today will be read with a great deal of interest by the other Members of this body, as well as by Members of the House of Representatives.

I yield the floor.

Mr. HARRY F. BYRD, JR. Mr. President, I share many of the concerns expressed so ably by the two distinguished Senators from Arizona. I have been inclined to support the interim agreement signed by President Nixon and Chairman Brezhnev. I am convinced, however, that it would be greatly improved should the Jackson amendment be adopted.

The longer this debate goes on, the more convinced I am of the service which the Senator from Washington is giving the American people and the Congress in airing so fully the problems connected with the limitation of nuclear weapons.

The two Senators from Arizona just brought out some extremely important points in this regard. For the life of me, I cannot see how any Member of the Senate could object to voting for an amendment such as that presented by the Senator from Washington (Mr. JACKSON) and the Senator from Pennsylvania (Mr. SCOTT), which says that, in the oncoming discussions with the Soviet Union in regard to nuclear weapons, the United States must not accept an inferior position. How in the world could anyone object to that? How could any Member of Congress vote against an amendment to the pending legislation saying that the United States, in the question of nuclear weapons, should have parity and should have equality? That is all the Jackson proposal does.

Mr. FANNIN. Mr. President, will the Senator yield?

Mr. HARRY F. BYRD, JR. I yield.

Mr. FANNIN. Mr. President, I want to commend the distinguished Senator from Virginia for stating his position so eloquently. I agree that not to insist upon equality would be a great mistake. In fact, I am sure the Senator agrees, because he has so stated, that we should have superiority. To forgo both superiority and equality would be tragic.

Mr. LONG. Mr. President, will the Senator yield?

Mr. HARRY F. BYRD, JR. I am glad to yield to the Senator from Louisiana.

Mr. LONG. I am compelled to concur with the Senator. I, for the life of me, do not see why, in an arms limitation agreement between the two great powers, the United States and the Soviet Union, the United States should negotiate for anything less than equality, equal power, possessing vast weapons which we hope neither will ever use. The idea of limitation generally is to allow both powers to have that which they deem necessary for their defense and that which they would need in case one attacks the other by surprise, for instance.

Does the Senator think it is possible that we ought to enter into a limitation where the other fellow has far more power to strike us than we have to strike him in return? For my part, I cannot see that.

Mr. FANNIN. I certainly agree with the distinguished Senator; we have always talked about negotiating from a position of strength. Here we are negotiating a treaty that is important not only to us, but to the entire free world. If we do not undertake to negotiate from a position of strength we are not being fair to the people of America or the other free nations of the world.

Mr. LONG. Mr. President, will the Senator yield?

Mr. FANNIN. I yield.

Mr. LONG. It occurs to me that if we are not going to ask for it, we are certainly not going to get it. What is the point of not asking for it?

Mr. FANNIN. I agree we must ask for it. I think we would be very negligent in our obligations, as I say, not only to the American people but to the free nations of the world, if we did not ask for it, and I thank the distinguished Senator from Louisiana.

Mr. BUCKLEY. Mr. President, will the Senator yield?

Mr. FANNIN. I am very pleased to yield to the distinguished Senator from New York.

Mr. BUCKLEY. I have been very puzzled, over the past few days, as to why there should be any objection whatever on the part of any Senator to the Jackson amendment. I wonder if the Senator could enlighten me as to what there is in that amendment that is inconsistent with what the negotiators of the SALT agreements have told us is the official policy of the United States.

Mr. FANNIN. I would say to the distinguished Senator from New York that the Members of the Senate have over and over again expressed that this is the position to which the administration agreed. I feel just like the Senator from New York in wondering why we are debating this issue when it is so evident that it is the desire of most of the Members of the Senate? But we just cannot bring it to a vote.

It surprises me to hear some of the Senators who were thought perhaps to be against this treaty neglect to discuss on the floor why they are against this amendment.

Mr. BUCKLEY. As yet, I have not been able to find out.

Mr. GOLDWATER. Mr. President, will the Senator yield?

Mr. FANNIN. I yield to my distinguished colleague from Arizona.

Mr. GOLDWATER. I do not know if I can shed a lot of light on what the Senator from New York has asked, but I detected, as long ago as 1960, a very strong movement in this country toward unilateral disarmament. I have watched this movement grow. I have watched it grow on the floors of Congress. I have watched it become evident in the amendments that we have been asked to support on both floors of Congress, that would take away from the President his powers of war. I have watched it in the arguments made by Members of this body and by groups like Peace Through Law, that we ought to destroy the armament of our country.

While I do not like to think for one moment that a Senate committee bearing the title of Foreign Relations would be interested in the unilateral disarmament of our country, I would like to be around in 150 or 200 years, because I think the answer to the Senator's question will be quite obvious. Yet there continue to be groups of people in this country who would like to see the United States reduced in armament and reduced in power, not only its military power but its power in the world to work for good. I think those forces are working to the end that amendments such as the Jackson amendment will be defeated. I see no other reason for activity against this amendment.

The amendment makes sense. It is something that we all, as Americans, have called for in every other action we have ever taken with a foreign country, and to suddenly find this body even faintly considering entering into negotiations without this guarantee seems patently to be ridiculous.

Mr. BUCKLEY. I was interested in the Senator's analysis about the impulses of the last 10 or 12 years, because as a matter of fact they must have been to a degree successful, or we would not have found ourselves in a posture where we would have to face this awful alternative of continuing as we are doing, with the Russians overtaking us on such a massive scale, especially on these weapons of massive destruction, or, in the alternative, agree to an interim agreement which would slow that down but not stop it, which will freeze us for a 5-year period into a position where they will have a significant quantitative advantage over us in the weapons affected.

This, of course, is a quandary which we have to face one way or the other, but it has resulted from this antimilitarism which has pervaded this country, an antimilitarism which does not understand that it is precisely our strength which has maintained world peace since the Russians started flexing their muscles back in the 1950's.

I really believe that one of the problems we have is to communicate to the American people—and this is why I think this debate is so hopeful, if it will be reported—that we are entering a period in which we face greater danger than in any other since the end of World War II, if we enact these accords, because when the Russians will come to the end of that 5-year period, they will have had the opportunity to develop and install those qualitative refinements which will give them an overwhelming superiority to the United States in the weapons of terror.

Therefore, it is important to telegraph to the Russians and now to the American people that we must begin looking now to see to it that should the Interim Agreement fall apart, should we not succeed in achieving a new agreement which imposes true parity, we will then be in a position far behind, but at least we will have the option to try to protect the United States by going ahead and developing the weapons we need.

Mr. GOLDWATER. If the Senator will yield, I might remind the Senator once again that the United States, as have many, many other countries prior to this country, is going through the same thing that civilization after civilization has gone through; namely, reaching that affluent point in their history where they felt that that in itself, with the goodness of themselves, the beneficence of themselves, would keep other powers away, when the history of the world is absolutely replete with example after example of countries falling through the middle, through loss of morale and their willingness to be taken over by or fall under the influence of countries which became strong.

I think our present dilemma stems, to a great degree, from the fact that we emerged from World War II as the leader of the world, without many people in this country, except maybe five or six in Washington, realizing that it was coming, or why we were becoming the world leader.

I think also the enactment of the massive retaliation concept, which has always been sort of a dirty word or phrase to many, but nevertheless a correct one, did not really begin, with the American people, until about 1960, when they began to become aware of the great number of treaties that we had entered into in the 1950's, that not only took us to war but took us up to the approaches of war.

I think it was about that time that opinion in the country began to be divided—I do not believe the division started in Congress, though I think it has been helped by Congress—until today we find the American people sorely puzzled, not understanding why it is necessary for us to maintain our position of leadership, naively feeling that we can pull in our horns to the days of the 1920's, and 1930's, when we were a completely isolated country. Those people, I fear, will be terribly disappointed to find out the reaction within the coming days of history to any negative action on the part of the United States that would result in our giving up any more of the military power that we have held in the past, and I would hope that the Jackson amendment would indicate to the rest of the world that Congress realizes the seriousness of making an agreement with the Soviets, and wants to reserve for itself the power of decision that can, at some later date, enable us to act in the best interests of the United States.

Mr. FANNIN. I thank my colleague and the distinguished Senator from New York for their valuable contribution to this colloquy; they have brought out facts that are very important to the consideration of this amendment. I wholeheartedly agree with them that the future of this Nation and the free world depend to a great extent on the decisions that will be made here in the next few days. We are dependent upon the power and the ability of this Nation to face up to the obligation we have as a leader in this world, and we certainly cannot afford to fall behind. If we do not go forward with what is contemplated by the Jackson amendment, we no doubt will fall behind further and further.

Mr. President, I yield the floor.

The PRESIDING OFFICER (Mr. TAFT). The question is on agreeing to the amendment.

Mr. HARRY F. BYRD, JR. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. HARRY F. BYRD, JR. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HARRY F. BYRD, JR. Mr. President, several more Senators wish to participate in this debate. They are at a meeting at the present time and are not available. I understand that the Senator from Arkansas would like to speak.

Mr. FULBRIGHT. I would like to say a few words. I have not had an opportunity.

Mr. HARRY F. BYRD, JR. Mr. President, I yield the floor.

Mr. FULBRIGHT. I thank the Senator from Virginia.

Mr. President, it has been said by the junior Senator from Washington that the proponents of this treaty and the opponents of the Jackson amendment have not taken much time, so I think it is appropriate to say a few words about the matter.

Mr. President, as Senators undoubtedly know, there were lengthy negotiations yesterday and much of today between the Senator from Washington and those who are supporting his position and those of us who support the agreement as signed and as accepted by the President and as presented to the Members of Congress in the meeting at the White House upon the return of President Nixon from Russia. Up to this time, there has been no tangible agreement resulting from these negotiations.

I feel that the Rules of the Senate, at least as they used to be followed and applied, encourage full and free debate on important issues. That is the proper course to follow.

I think agreements to limit time on routine legislation are quite proper, and they do facilitate the work of the Senate. But the Senate is given a special responsibility in the field of foreign policy; and when a matter is brought up that is as important as the interim agreement is for the relations of this country with Russia, I believe we are entirely justified in reverting to the traditional rules of the Senate, the traditional practice of the Senate, to engage in full and free debate on an issue. Much too much is riding on the subject of this debate for us to accept the restrictions we apply to ordinary routine legislation. Therefore, I make no apologies for not agreeing to limit debate to a few minutes on each amendment or on the agreement itself. I think we are entitled to a full opportunity to discuss this matter.

Mr. CHURCH. Mr. President, would the Senator from Arkansas be good enough to yield at that point?

Mr. FULBRIGHT. Yes, I yield. For a question?

Mr. CHURCH. I merely wanted to comment on the position taken by the chairman and to quote the President in support of that position. As I understood the Senator from Arkansas, he feels that the present agreement, and any language that the Senate may add to it, is a matter of such importance, it should be fully examined through extended debate, which is the normal practice of the Senate when faced with issues of gravity.

I would simply point out to him that President Nixon took the same view in his address before the joint session on June 1, which was broadcast to the Nation on television and by radio, when he explained the agreements that he had entered into between the United States and the Soviet Union at the Summit Conference in Moscow.

This is what he said about the interim agreement and the role of Congress with respect to it:

> I ask from this Congress and I ask from the Nation the fullest scrunity of these accords. I am confident such examination will underscore the truth of what I told the Soviet people on television just a few nights ago, that this is an agreement in the interest of both nations. From the standpoint of the United States, when we consider what the strategic balance would have looked like later in the 1970's if there had been no arms limitation, it is clear that the agreements forestall a major spiraling of the arms race, one which would have worked to our disadvantage since we have no current building programs for the categories of weapons which have been frozen, and since no new building program could have produced any new weapons in those categories during the period of the freeze.
>
> My colleagues in the Congress, I have studied the strategic balance in great detail with my senior advisers for more than 3 years; and I can assure you, the Members of the Congress and the American people tonight, that the present and planned strategic forces of the United States are without question sufficient for the maintenance of our security and the protection of our vital interests.
>
> No power on earth is stronger than the United States of America today, and none will be stronger than the United States of America in the future.

Mr. President, I call this to the Senator's attention because it seems to me that the President not only invited the fullest scrutiny of Congress, which our distinguished chairman advocates, but he also went on to reassure the country and the Congress that, in his estimation, the accords reached in Moscow fully protected the security of the United States. He declared most forcefully that the accords placed the deterrent power of the United States, in no jeopardy whatever. Does the Senator agree?

Mr. FULBRIGHT. The Senator is absolutely correct. It was on that assumption that the Committee on Foreign Relations, after thorough hearings unanimously approved the agreement. Our hearings to which the Senator from Washington says we paid no attention, are on the desk of each Senator in this Chamber and they total 400 pages, including the actual hearings plus supporting documents. They were good hearings. We heard 24 witnesses representing all shades of expertise and opinion. We voted unanimously to report this agreement for approval without any amendments. Subsequent to that, this question has arisen. The committee met again. It felt that no amendment was necessary. It was the intervention of the Senator from Washington and his amendment, with some kind of endorsement by the White House—and I have never seen anything specific from the President directly, only from his spokesmen—that has led to this controversy.

Mr. CHURCH. The very confusion that has been created by the ambivalent position of the White House is, to my mind, most regrettable. I have read into the RECORD the affirmative endorsement the President gave the agreements when he returned from the summit. There is no question that he was fully satisfied, then, that the agreements protected the vital security interests of the United States in all respects. He had no doubts about it when he delivered his message to the 2 bodies of Congress and to the American people.

Now, for reasons that are quite baffling, he endorses the amendment suddenly offered by the Senator from Washington which, when read, can only be construed as raising serious doubts about the accords entered into in Moscow and laying down guidelines which, in effect, say, "Don't do it this way again."

Yet his spokesmen, while affirming that the President endorses the amendment of the Senator from Washington, are at great pains to say that the administration disassociates itself from the interpretation given the amendment by the author himself. That is baffling. It can only lead the public and Congress to wonder where the President does stand. Does he favor the accord entered into, as he said so positively to the Congress only a few weeks ago, or does he himself now have doubts about that agreement, or is this merely a political game in which he is undertaking to be all things to all people?

I do not know where the President stands. No one can say for sure what he means by endorsing an amendment which, at the very least, is highly critical of the accords and, at most, repudiatory of them, and then carefully disassociates himself from the interpretation laid on that very amendment by the author himself.

What a compromising position for the President to take. What a vacillating position on a matter of such crucial importance to the country.

Mr. FULBRIGHT. May I say to the Senator, too, that this amendment proposed by Mr. JACKSON is rather an odd document. It does not undertake to change the text of the agreement signed by the President. It is, in form, simply advice given to the President. The President could say on his own, "It is my intention to be much tougher in the next negotiation. I will insist upon equality"—whatever that may mean. The President does not need any amendment to do that.

This is not a law. It does not affect the President's constitutional powers. It does not affect anyone's power. It is merely a vague guideline.

On the very issue of equality, what kind of equality does the Senator from Washington have in mind? Now, if the President has a different view of the meaning of "equality" than the author of the amendment, it is very easy for him to say so. He did say so in the briefing at the White House in which he said in effect that neither side won, neither side lost. This agreement is to the advantage of both sides.

The words he used to describe equality, it seems to me, are much more accurate than to say that equality consists only of equal numbers of ICBM's, which I think is the thrust of the language of the Senator from Washington.

Mr. CHURCH. Mr. President, would the Senator from Arkansas agree that if the Senate approves the Jackson amendment, the country and the world will of necessity assume that the Senate is dissatisfied with the results of the President's Moscow accords and harbors some idea that they would place the United States at a strategic disadvantage?

Mr. FULBRIGHT. Mr. President, I do not see how it could be interpreted in any other way. Attaching this language to our resolution of approval leaves the implication that the Senator describes, that there is something inadequate in the agreement signed by the President.

If the Senator from Washington wishes to give the President the views of the Senate, he could bring in a separate resolution and say, "Resolved, that it is the sense of the Senate that in the negotiations the Senate wants to be much tougher."

That is the point the Senator seeks to accomplish by his amendment. I think the procedure of using an amendment to express his view of what he believes should happen in the future is very unfortunate, because under all the circumstances it necessarily leaves the implication that there is something wrong with this present agreement. I do not think there is anything wrong with it. Neither did the committee. Neither did the President. This is what is so wrong with the approach of the Senator from Washington. The committee unanimously thought that there was nothing wrong with the agreement. We voted unanimously for it.

Mr. CHURCH. The statement was made by Mr. Kissinger. I have already quoted from the President himself, from his address to the Congress and to the Nation on June 1, but let me quote from the statement of Mr. Kissinger, who spoke on behalf of the President on this very question of whether the accords entered into with the Russians place the United States at any strategic disadvantage.

This is what Mr. Kissinger had to say:

> We reject the premise of that question on two grounds. First, the present situation is on balance advantageous to the United States. Second, the Interim Agreement perpetuates nothing which did not already exist in fact and which could only have gotten worse without an agreement.
>
> Our present strategic military situation is sound. Much of the criticism has focused on the imbalance in number of missiles between the U.S. and the Soviet Union. But, this only examines one aspect of the problem. To assess the overall balance it is necessary to consider those forces not in the agreement; our bomber force which is substantially larger and more effective than the Soviet bomber force, and our forward base systems.
>
> The quality of the weapons must also be weighed. We are confident we have a major advantage in nuclear weapons technology and in warhead accuracy. Also, with our MIRV's we have a two-to-one lead today in numbers of warheads and this lead will be maintained during the period of agreement, even if the Soviets develop and deploy MIRV's of their own.
>
> Then there are such factors as deployment characteristics. For example, because of the difference in geography and basing, it has been estimated that the Soviet Union requires three submarines for two of ours to be able to keep an equal number on station.
>
> When the total picture is viewed, our strategic forces are seen to be completely sufficient.

So we have both the assurance of the President and his chief spokesman on foreign affairs, Mr. Kissinger, to the effect that the present agreement places the United States at no strategic disadvantage. For what reason, therefore, should the Senate adopt language which would call the wisdom of the accords into question?

I think this is precisely what the Jackson language would do. Does the Senator agree?

Mr. FULBRIGHT. I agree completely with the Senator. And I think in that connection that it would be interesting to read into the record part of what Mr. Kissinger stated on May 26, 1972, while he was still in Moscow. This matter was fresh on his mind. I read from what he said in Moscow:

> The first point to make is that in an agreement that involves the central armaments on both sides, it is foolish or shortsighted to approach the negotiations from the point of view of gaining a unilateral advantage. Neither nation will possibly put its security and its survival at the hazard of its opponent and no agreement that brings disadvantage to either side can possibly last and can possibly bring about anything other than a new circle of insecurity. Therefore, the temptation that is ever present when agreements of this kind are analyzed as to who won is exceptionally inappropriate.

Mr. President, there is much more that was said in support of this position. What the Jackson amendment implies is that in this case the agreement was to the advantage of the Russians. And that this is what is so puzzling to all of us, that the messages from the White House—and I see no direct statement of the President—subscribe to that view. This is against human nature. I cannot believe that the White House believes the agreement was to the advantage of the Russians.

There is something behind the White House support of the amendment that does not meet the eye. This is why it is so necessary that there be some debate and some effort to clarify exactly what the situation is.

I personally still subscribe to the committee's view that this is a good agreement and that the reasons given earlier by the President and by Mr. Kissinger are sound, that it ought to be approved without any amendment.

After we approve the agreement, then we could take up, if someone wishes, the question of giving advice to the President under the advice and consent clause of the Constitution. If the Senator from Washington wishes to initiate a sense of the Senate resolution, I would certainly not object to it. Whether I would agree with what his views would be is another matter. But I strongly disagree with his effort to encumber this particular resolution approving the agreement with an amendment which raises doubts about the validity of the agreement itself. This undermines the agreement as the Senator so well put it. This is why it is so difficult to resolve this question of getting to a vote, because the sponsor of the amendment apparently wishes to bring about a vote very soon and quickly with a minimum amount of debate under controlled time. I cannot help believing that this is partly because if this matter were thoroughly understood it would raise serious questions in the minds of many Members as to whether it should be approved.

The Jackson Amendment sounds plausible on its face. He speaks of equality but he limits it only to equality in limited classes of weapons as he defines them.

Mr. CHURCH. Mr. President, I would like to explore with the Senator the lopsided concept of equality embraced in the Jackson amendment, because the distinguished Senator from Washington has so frequently emphasized equality as the reason why the Senate should adopt his amendment. If he has said once, he has said a hundred times, that all he is seeking is equality; who can be against that? Indeed, who can? Who is?

I have just quoted from the President and Mr. Kissinger to demonstrate that, in their judgment—and they are hardly uninformed—we have here an accord that fully protects the United States and gives no advantage to the Soviet Union.

But I would think, beyond anything that either the President or Mr. Kissinger have said, that no Member of the Senate would want to endorse or subscribe to some future accord with the Soviet Union on the subject of nuclear weapons which did not preserve equality, in terms of the overall nuclear strength of the two countries.

Indeed, it is hard for me to envision any kind of agreement being reached with the Soviet Union which did not seem to the two sides to observe that principle.

Having said that, and I want to get to the question of what the Senator from Washington means by "equality," which is the core of the argument. I subscribe to the principle of equality fully as much as the Senator from Washington, or any other Member of this body. Nevertheless, I would like to explore with the Senator from Arkansas the mystery of what happened to the doctrine of sufficiency.

A couple of years ago, it was the President, himself, who said that all we needed, insofar as our nuclear forces were concerned, was a sufficient deterrent; that when you reach the point where the nuclear arsensal has grown so large on either side that, in a full-scale thermonuclear exchange, both parties can be incinderized many times over, and the populations in both countries utterly destroyed, then what meaning do such terms as "equality," "preponderance," and "superiority" have any more? We are not talking about the kind of cannon fired at Waterloo. We are talking about weapons that have the awesome capacity of wiping out the entire populations of both the United States and the Soviet Union.

So I thought that a ray of light had finally begun to penetrate the fog and sophistry that surrounds the nuclear weapons argument, when the President of the United States said, 2 years ago, that all we need is a sufficient deterrent. That word "sufficiency" looked to me like a robust, healthy, pink-cheeked, new guest brought in, along with a gust of fresh air, through a door thrown open to the roundtable of high-nuclear strategy, heretofore surrounded by the generals who alone passed judgment on how much is enough.

But whatever happened to that young, robust, healthy, pink-cheeked new occupant at the table? He has disappeared. Presumably, he is dead. He has been interred, and not a single Senator, let alone anyone downtown, has even dropped a withered flower on his grave.

I ask, what was wrong with the doctrine of sufficiency? If we have a retaliatory force that can survive any first strike directed against us, and the surviving force possesses sufficient power to incinderize the Soviet Union, what more deterrent do we need? Why is not sufficiency enough?

Suppose the Senator from Arkansas, for a moment, were to personify the Soviet Union. And suppose the Senator from Idaho were to personify the United States. Both of us are in a closet together. The Senator from Arkansas holds a .45 caliber pistol at my temple and I hold a .38 caliber pistol at his temple. Both of us know, if he ever pulls the trigger of his pistol, I automatically pull mine. What difference does it make if mine is a .38 caliber pistol, the Senator from Arkansas is going to be just as dead as I am, if ever he pulls the trigger of his .45 caliber pistol.

None of the experts have ever told us why the doctrine of sufficiency was not sound. Nobody has ever explained why that young, new participant at the nuclear roundtable, was suddenly yanked away and buried in an unmarked grave.

Mr. FULBRIGHT. If the Senator will yield, that argument could go solely to the ICBM's, which is what the Senator from Washington is talking about. In other words, if you do exclude all other weapons except 1,054 ICBM's on one side and 1,618 on the other, it is as the distinguished Senator said with respect to the .38 and the .45 caliber pistol. But the argument proceeds beyond that and ignores aircraft carriers with all their nuclear arms, and capacity for delivery, and forward-based planes with thousands of warheads deliverable by fighter-bombers, and all the bomber force—these should not be considered at all.

As a matter of fact, if those are added to the other forces you get a great advantage in warheads, a deliverable advantage for destruction. So I think the Senator's analogy is correct. I regret the departure from the concept of sufficiency. There is something peculiar about this idea that the administration supports this amendment because it runs so counter to the things they said in support of it and so counter to the previous concept of sufficiency, which the Senator so well discussed. It does not add up. There is something fishy about this whole business. This has to be explored because it would be a great tragedy to leave an agreement as important as this in an ambiguous situation where the people of this country and, equally important, the people of Russia did not understand the meaning of the Jackson amendment and its effect on the basic agreement. It is very necessary that this be clarified.

Mr. SYMINGTON. Mr. President, will the Senator yield?

Mr. CHURCH. I would like to examine into this matter further, but at this time I yield to the Senator from Missouri.

Mr. FULBRIGHT. I yield to the Senator from Missouri for a question.

Mr. SYMINGTON. Thank you. I would comment and question.

Mr. FULBRIGHT. Very well.

Mr. SYMINGTON. I have been reading the debates and doing my best to understand this strange development.

It was stated recently on the floor that the nuclear capability of the United States in Europe is potentially limited so far as reaching the Soviet Union is concerned. We have approximately 40 air bases it was said, whereas the Soviets have some 600 IRBM's, and 100 of the latter could reach every one of these bases, we were told.

There is no reason why, however, if considered important enough, that we could not have some form of alert at far less cost, comparable to what was planned for the Strategic Air Force some time back when an air alert was considered important.

I have always felt that, with our forward base system in Europe, when one of our fighters could drop—with one refueling, in itself no problem—a nuclear weapon on Moscow many, many times more lethal than the Hiroshima bomb——

Mr. FULBRIGHT. What the Senator calls tactical bombing?

Mr. SYMINGTON. In the Battle of the Bulge, B–17 bombers, the largest we had in Europe, performed a tactical mission in aiding our troops in the Battle of the Bulge. The P–51, a short range fighter, when it left Iwo Jima at the end of the war to destroy plants in southern Japan, was performing a strategic mission. Therefore, the words "strategic" and "tactical" are secondary to what the plane does in the way of mission.

Mr. FULBRIGHT. The size and nature of the bomb is what makes it considered to be tactical or strategic.

Mr. SYMINGTON. The size of the modern bomb on a fighter would be many, many times stronger than the Hiroshima bomb, and the Hiroshima bomb killed, almost instantaneously, some 68,000 people. One could ask, how many people have to be killed before a weapon becomes strategic rather than tactical. If the criterion is destruction, certainly this bomb on our fighters would be a strategic weapon performing a strategic mission.

If we have that additional deterrent, that capacity, would it not be logical to include those fighter systems in any agreement on strategic force levels, regardless of whether we call said planes strategic or tactical? The Soviets have as much knowledge about this as we do. There is no secret about our true position in Europe.

Carrying the thought on further, if these forward air bases do not add to our nuclear deterrent capability, why do we waste billions of dollars of our taxpayers' money maintaining them? Surely we do not plan on some form of nuclear tactical war with such tremendously powerful nuclear weapons in Europe. Does anybody honestly think this is not part of our strategic picture? What would we think, what would be our position, if the Soviets had such a position against us, in countries on or close to our boundaries.

Mr. FULBRIGHT. Many of those bombs are under the direct control of this government. Not all of them are there dedicated to NATO so that we could not use them?

Mr. SYMINGTON. Very few are under any joint control. Nearly all are entirely under U.S. control.

Mr. FULBRIGHT. A statement has been made by the Senator from Washington that, in some way, these are dedicated to NATO and that we could not use them in our calculations because they are under NATO jurisdiction. That is only in regard to a few of them; is that not correct?

Mr. SYMINGTON. The Senator brings up an important point. If we arbitrarily eliminate these worldwide nuclear forces which to my knowledge, after some 30 years in this town directly connected with the subject of defense, I believe the Soviets will think, if we have all that and also want equality on ICBM's and SLBM's, that we are going for superiority, not just equality. We now have these, our nuclear weapons, in some 12 countries. If they are not to be considered part of our strategic assets, let us get them out promptly and save the taxpayers many billions in installation cost, as well as running the dangers involved in protecting such weapons with our troops. To me they are part of our strategic nuclear deterrent and should be considered so in any equation of comparison of United States-Soviet strength.

It is also important that the Soviets think about all this. We reacted very rapidly indeed when they tried to put nuclear missiles 90 miles from this country, but they know we have nuclear weapons in countries not 1 inch from their borders.

Why is not what is sauce for the goose also sauce for the gander? The Senator from Washington says the standard is equality, not superiority.

Mr. CHURCH. Mr. President, will the Senator yield for an observation?

Mr. FULBRIGHT. I yield.

Mr. CHURCH. I must say I have been unable to follow the argument of the Senator from Washington when he gets beyond the appealing generic terms of "equality" and "parity," in which we all concur. When it comes down to what the Senators means by these terms, I lose him. For example, just the other day we had a colloquy—it is in the Record for anyone to read—and I asked the Senator if a B–52 bomber was an intercontinental strategic weapon to be placed, in any future equation, on our side of the scale. He said yes, because the B–52 has a strategic capability; namely, it can reach the Soviet Union and deliver a warhead, and therefore has to be counted as a strategic weapon to be placed in the balance in any future agreement.

Now, it is true the B–52 has tactical capabilities, as well as strategic. We are using some 200 B–52's to deliver an incessant rain of bombs on Vietnam, and have done so for years, as the Senator well knows. But the fact that the B–52 has tactical capability should not prevent it from being placed in the equation as a strategic weapon, and I agree.

So then I asked the Senator from Washington, What about aircraft carries? We have around 15 aircraft carriers, and the Russians have none, except for helicopter carriers. Aircraft carriers can also approach the shores of the Soviet Union and launch aircraft that can travel at supersonic speeds and deliver nuclear bombs over the Soviet Union.

Mr. SYMINGTON. The Senator is ahead of me on that. I have read the questions he asked, also the constructive testimony he gave. As I understand it, the proponents of this amendment say they would not include aircraft carriers that have nuclear weapons capability as part of our strategic forces. What would they consider enemy aircraft carriers to be 500 miles off our coast, carriers that had supersonic planes and also missiles?

Mr. CHURCH. As I say, I cannot follow the logic of the Senator from Washington. On the one hand, he says B–52's, though they have tactical capability as well as strategic, should figure in the balance in any future agreement, but on the other hand, he says aircraft carriers should not, because he views them as tactical weapons primarily, even though they have strategic capability.

If it does not make sense to me, how is it ever going to make sense to the Russians, and what chance is there going to be of ever reaching any further accords

Mr. SYMINGTON. If they have only a tactical use, why are our carriers in the Mediterranean equipped with nuclear weapons?

Mr. CHURCH. The question answers itself. The test of whether they are part of our strategic force is whether they are capable of reaching the Soviet Union with nuclear warheads. Anybody who talks about equality and says, "Oh, but we exclude aircraft carriers," is not talking about equality at all. He is talking about a formula which is designed to assure the United States a preponderance of nuclear power in the future. The trouble with that is, as long as we insist upon a preponderance, we are not going to reach any further agreements.

Mr. FULBRIGHT. That is the main point that the Senator makes. This all adds up that if this amendment is adopted and the President follows it, if he should follow it, it would mean no more progress in SALT II, because the Russians cannot be expected to accept any such idea of equality, distorted as it is, as the Senator has shown.

Mr. CHURCH. All we need to ask ourselves is, if we reversed our position with that of the Russians, would we accept the Jackson concept of equality?

Mr. SYMINGTON. As I have read the Record over recent days, it has often been mentioned that Soviet IRBM's could knock out our bases in Europe, and therefore, the billions we have in those bases would be useless. But our bases are all over the world. They are not just in Europe.

What would be the answer about the bases that have on them our nuclear weapons which could not be knocked out by IRBM's in the Soviet Union? Should not they also be taken into consideration? Should not the number of locations of our nuclear weapons in the Far East, for example, be a part of our strategic position? If they should not, then why do we have them at all?

Mr. FULBRIGHT. And there are thousands of them.

Mr. SYMINGTON. It has already been announced that there are over 7,000 in Europe. Of course, all around the world there are a lot more than that.

During the debate on Friday, there was discussion of the Polaris-Poseidon submarine bases, in such places as Spain, Scotland and Guam. It was stated at one point that the Soviets do not need comparable submarine bases abroad, because they have an operational 3,000-mile missile. However the range of Poseidon is very close to 3,000 miles, so why then do we need these sub bases abroad?

In addition, it is now known that the so-called ULMS–1, the first Trident missile, would have a range of around 4,500 miles, and we are told by the experts that the Poseidon submarine can be retrofitted with the ULMS–1 missile. All the arguments seem to be built upon the importance of getting equality. Looking at this objectively, however, it would now appear we are asking for, not equality, but superiority. This can only guarantee trouble in any future SALT talks.

Mr. CHURCH. That is precisely the objective. It is the inevitable objective of the adoption of the Jackson language. It would cause the country, if the President were to adhere to it, to conform to guidelines that do not result in equality at all, but in inequality; and if we expect to make any further progress in bringing this nuclear arms race under control, then it is obvious that we are going to have to negotiate on the basis of true equality. That means we have to take the entire mix of strategic nuclear weapons on both sides, and put them on the scale. We cannot say, "No, put all of yours on the scales here, and we will put part of ours on the scales there," and expect to get an agreement.

Mr. SYMINGTON. Mr. President, let me make this observation, then I shall be through: Yesterday or Friday, when we were discussing our operations in Laos in conference with the House, a letter was produced which gave us the position of the President with respect to Laos.

That letter resulted in a decision which in my judgment was not the right decision with respect to our vast expenditures in Laos. But if the President can sign a letter about Laos, surely he can sign a letter that bears on the future of the world.

Mr. FULBRIGHT. With respect to Russia.

Mr. SYMINGTON. We are told by the Senator from Washington that the White House agrees with his position. But I put in the Record yesterday a statement which was printed in the State Department. That printed brochure said that, as of now, we have 6,000 nuclear warheads, the Soviet Union 2,500. It adds that, after taking into consideration the SALT talks, at the end of 5 years we will have 10,000 nuclear warheads, the Soviets 4,000.

I cannot believe the State Department would dare put that out unless they had checked first with the White House staff, Dr. Kissinger, and so forth. That has been characteristic of all such operations in the recent past.

Why is it not possible for us to receive a comparable letter from the President stating in effect that "The agreements which I arrived at in Moscow were not in the best interests of the United States, therefore I ask you to support the Jackson amendments"?

If it is correct, and I am sure the able Senator from Washington believes it correct, that the President does support his position, would it not be logical for him to express his support in writing. This problem affects the security of the world. Again, he expressed his opinion in writing with respect to the problem of Laos? Does not the able Senator agree?

Mr. FULBRIGHT. I certainly do. This is a much more important issue to the future of our country than whatever happens in Laos.

Mr. President, yesterday, August 14, there were exchanges between the Senator from Washington (Mr. Jackson) and Senators Pastore and Symington on the subject of the degree of support which the President or the White House has given the amendments which have been proposed by the Senator from Washington.

In an effort to clarify the situation, I wish to put a series of documents and statements in the Record so that Members of the Senate may satisfy themselves as to the degree of support which the President has given the Senator from Washington.

First, on August 3, the Committee on Foreign Relations received informally from the Department of State a copy of what was stated to be an amendment to Senate Joint Resolution 241 which the

Senator from Washington expected to offer.

Later on the same day, we received a copy of the proposed amendment from the office of Senator JACKSON, with the notation that the amendment was "to be proposed by Senator JACKSON, Senator SCOTT, and others."

I refer to this proposed amendment as Jackson version No. 1, and I ask unanimous consent that the proposed amendment, including a "Memorandum of Explanation," be printed in the RECORD at this point.

There being no objection, the proposed amendment was ordered to be printed in the RECORD, as follows:

[Jackson Amendment No. 1, Aug. 3]

S.J. RES. 241

Authorization of the President to approve an interim agreement between the United States and the Union of Soviet Socialist Republics

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the Government and the people of the United States ardently desire a stable international strategic balance that maintains peace and deters aggression. The Congress would consider action or deployment by the Soviet Union, having the effect of endangering the survivability of the strategic deterrent forces of the United States, whether or not such action or deployment was undertaken within the terms of the interim agreement referred to in section 2, to be contrary to the supreme national interests of the United States; the Congress recognizes the difficulty of maintaining a stable strategic balance in a period of rapidly developing technology; the Congress recognizes the principle of United States-Soviet Union equality reflected in the antiballistic missile treaty, and urges and requests the President to seek a future treaty that, inter alia, would not limit the United States to levels of intercontinental strategic forces inferior to the limits provided for the Soviet Union; and the Congress considers that the success of these agreements and the attainment of more permanent and comprehensive agreements are dependent upon the maintenance of a vigorous research and development and modernization program leading to a prudent strategic posture.

SEC. 2. The President is hereby authorized to approve on behalf of the United States the interim agreement between the United States of America and the Union of Soviet Socialist Republics on certain measures with respect to the limitation of strategic offensive arms, and the protocol related thereto, signed at Moscow on May 26, 1972, by Richard Nixon, President of the United States of America, and Leonid I. Brezhnev, General Secretary of the Central Committee of the Communist Party of the Soviet Union.

AUGUST 3, 1972.

MEMORANDUM OF EXPLANATION OF JACKSON AMENDMENT TO SENATE JOINT RESOLUTION 241, VERSION NO. 1

The Senate will soon have before it S.J. Res. 241 authorizing the President to sign the interim agreement on offensive weapons concluded in Moscow. It is our intention to offer an amendment to S.J. Res. 241 that, in addition to approving the agreement would express the view of the Congress with respect to the present agreements and our attitude toward further agreements in SALT II. In this effort we are joined by a bipartisan group of Senators.

Our amendment bears on three things: (1) the objective of equal limits on both countries in SALT II; (2) the survivability of our strategic deterrent under the terms of the SALT I agreement; (3) the importance of research, development and force modernization in a period of rapidly changing weapons technology.

1. THE OBJECTIVE OF EQUAL LIMITS IN SALT II

A. Our amendment notes the principle of U.S.-Soviet equality that is reflected in the identical limits imposed on both countries in the ABM treaty and urges the President to seek a future treaty that, *inter alia,* would provide for similarly equal limits on offensive forces.

B. We are confident that the Senate would not wish to see the United States undertake, in an international treaty, limits on U.S. defenses that are inferior to the levels permitted for the Soviet Union.

2. THE SURVIVABILITY OF THE U.S. DETERRENT UNDER SALT

A. Testimony before the Armed Services Committee and discussion with Administration officials has made clear the fact that the Soviets could, without actually breaking the terms of the interim agreement, create a strategic force that would leave major elements of the U.S. deterrent extremely vulnerable. Since the purpose of the SALT agreement is to reduce the threat to our deterrent and thereby increase strategic stability, our amendment merely puts the Soviets on notice that action or deployment endangering the strategic deterrent forces of the United States is contrary to our supreme national interests.

B. Soviet action or deployment that could have the effect of endangering the survivability of our deterrent forces might include such measures as extensive anti-silo MIRV deployments, massive retrofitting of existing Soviet silos with a view to increasing their lethality against our hardened strategic installations, etc.

3. RESEARCH, DEVELOPMENT AND MODERNIZATION

A. Our amendment adds language expressing the view of the Congress that our efforts to obtain more comprehensive agreements must be accompanied by a sound national program of research and development and modernization leading to a prudent strategic posture.

B. This last point in no way reflects on any procurement item, all of which will have been disposed of before the Senate takes up consideration of the SALT authorizing resolution.

Mr. FULBRIGHT. Jackson version No. 1 contained these words:

> The Congress would consider action or deployment by the Soviet Union, having the effect of endangering the survivability of the strategic deterrent forces of the United States, whether or not such action or deployment was undertaken within the terms of the interim agreement referred to in section 2, to be contrary to the supreme national interests of the United States.

Jackson version No. 1 was apparently circulated to various Members of the Senate who indicated they would join with Senator JACKSON in sponsoring the amendment.

I do not know whether Jackson version No. 1—either in its precise language, or the interpretation thereof—was ever approved by anyone in the White House, although I have heard references to the fact that Jackson version No. 1 did receive some form of White House approval.

There was such an uproar when the Jackson version No. 1 became public that its revision was necessary. Over the weekend of August 5 and 6, it was reported in the press that Senator JACKSON, working closely with the White House, had devised a new version of the Jackson amendment which I refer to as Jackson version No. 2.

It is Jackson version No. 2 which was introduced on August 7. It had at least the merit of omitting the sentence to which I earlier referred, thus toning down to some extent the impact which that earlier language might have had on future negotiations.

I am prone to believe that when the White House read the Jackson version No. 1, it was appalled and found it necessary to beat a hasty retreat from its support of the earlier version.

Even prior to the Senator's introduction of the Jackson version No. 2, the White House issued a statement, beginning:

> We are informed that Senator JACKSON will today present to the Senate his amendment to the resolution approving the Interim Agreement.

I ask unanimous consent that the White House statement of August 7 be printed in the RECORD at this point, along with a copy of the Jackson version No. 2 (amendment No. 1406).

There being no objection, the material was ordered to be printed in the RECORD, as follows:

WHITE HOUSE STATEMENT, AUGUST 7

We are informed that Senator Jackson will today present to the Senate his amendment to the resolution approving the Interim Agreement with the Soviet Union limiting strategic arms. He did so after consulting with the Administration regarding its wording.

Senator Jackson's purpose in which he is joined by Senators Scott, Allott and others is to insure the broadest possible understanding of and support for the agreement in the United States Senate.

The Administration is in sympathy with that purpose. In view of Senator Jackson's prestige as an authority on defense and strategic matters and his questions about some aspects of the Interim Agreement we are gratified at his willingness to support the agreement and we worked with him to that end.

The Jackson amendment is consistent with the undertakings in Moscow. It reflects what we believe to be broad Senate support for statements made by the Administration in connection with the understanding accompanying the agreements and previously transmitted to the Congress. It does not constitute a "reservation" or an "interpretation" to the agreement in any legal sense.

It is clearly the business of Congress to decide on the wording of the Joint Resolution of approval which we have requested. It is our hope that the resolution will receive the support of the maximum number of Senators.

We believe the Jackson amendment will help achieve that. The President also hopes that the Senate leadership will proceed now to take action on this matter without delay. Without timely and favorable action by the Congress on the Interim Agreement as well as the treaty the second phase of SALT negotiations will be delayed.

We should not lose the momentum which the Moscow agreements have given to our efforts to limit strategic arms.

The President is deeply appreciative of the prompt action of the Senate in giving its overwhelming approval to the ABM treaty.

S.J. RES. 241

On page 1, between lines 2 and 3, insert the following: "That the Government and the people of the United States ardently desire a stable international strategic balance that maintains peace and deters aggresson. The Congress supports the stated policy of the United States that, were a more complete strategic offensive arms agreement not achieved within the five years of the interim agreement, and were the survivability of the strategic deterrant forces of the United States to be threatened as a result of such failure, this could jeopardize the supreme national interests of the United States; the Congress recognizes the difficulty of maintaining a stable strategic balance in a period of rapidly developing technology; the Congress recognizes the principle of United States-Soviet Union equality reflected in the antiballisic missile treaty, and urges and requests the President to seek a future treaty that, inter alia, would not limit the United States to levels of intercontinental strategic forces inferior to the limits provided for the Soviet Union and the Congress considers that the success of these agreements and the attainment of more permanent and comprehensive agreements are dependent upon the maintenance of a vigorous research and development and modernization program leading to a prudent strategic posture.".

On page 1, line 3, strike out "That the" and insert in lieu thereof "SEC. 2. The".

Mr. FULBRIGHT. I quote further from this White House statement to indicate that on August 7, the White House thought the amendment unobjectionable.

The Jackson amendment is consistent with the undertakings in Moscow—It does not constitute a "reservation" or an "interpretation" to the agreement in any legal sense.

That White House statement was good for about 24 hours—until the White House began to read the interpretations the Senator from Washington and his colleague Senator ALLOTT began to put on the new language. The Senator from Washington explained his amendment to the Senate on August 7, at page 27050. The Senator from Colorado at a press conference of August 8 set forth his views, which I ask unanimous consent to have printed in the RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR GORDON ALLOTT

The three purposes of the Jackson-Allott amendment (1) it puts the Russians on notice that if the threat to the survivability of U.S. strategic forces is not limited by a follow-on agreement within five years, then our supreme national interest could be jeopardized, with all that implies.

(2) it calls upon the President to achieve a treaty involving numerical equality in the aggregate, taking account of throwweight. Technology cannot substitute for numbers. You cannot freeze technology. Therefore, we must have equality measured in terms of numbers and throwweight.

(3) it calls for vigorous research and development and modernization.

Mr. FULBRIGHT. On August 9, the White House spokesman found it necessary to clarify the situation again—to back away from what had seemed to be its August 7 unqualified support of the Jackson amendment.

Mr. Ziegler said:

What we have said is that we endorse the Jackson amendment and feel that that is consistent with our position, *but we do not endorse separate elaborations of that amendment*. We feel the amendment, as offered, speaks for itself. (Italic supplied.)

Mr. President, I ask unanimous consent that all relevant portions of the August 9 White House news conference be printed in the RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

Also, the President today is transmitting to the Congress, as required by law, a report on the status of negotiations with the States of New York and New Jersey regarding a Compact for the Hudson River Basin. The report is made by the Secretary of the Interior and copies of it are available for those of you who would like to pursue that story in the press office.

The President today is transmitting to the Congress the Seventh Annual Report of the Department of Housing and Urban Development. There will be a limited number of copies of that report available in the press office following the briefing.

Those are all the announcements that we have today.

There is one subject I would like to cover with you briefly this morning. It relates to the interim agreement on offensive weapons that was, as you know, agreed to between the President of the United States and the leaders of the Soviet Union during the President's visit to Moscow in May.

There has been some speculation, as I am sure you are aware, which emanates from discussions in the Senate with respect to the Jackson Amendment dealing with the offensive weapons interim agreement with the Soviet Union.

There have been reports of consultations here in Washington with Soviet officials with respect to the text of the Jackson Amendment, which, as you know, has been offered in the Senate. I think that point should be clarified.

In talking to Jerry, these reports may be attributed to Jerry's comments yesterday on the subject. It should be understood, and I think Jerry did point this out, that his comments were given in the context of the discussions held during the SALT I negotiations, the strategic arms limitation talks that were held prior to the Agreement reached in Moscow, and not in reference to discussions held here in Washington with Soviet officials regarding the language of the Jackson Amendment.

Q. Would you say that again? I am sorry, but I got lost. You said it should be understood that Jerry's comments——

Mr. ZIEGLER. Were given or made in the the context of discussions that were held during the strategic arms limitation talks, Bob, and not in relation to discussions held here in Washington following the Agreement reached in the Soviet Union.

In other words, Jerry was referring to the very thorough discussions that were held in Moscow, in the course of the talks, relating to the understandings which you recall we sent to the Senate.

Q. Ron, I asked the question at the time that elicited the response and the question had to do specifically with discussions of the Jackson Amendment. It had nothing to do with discussions held in Moscow or prior to that.

Mr. ZIEGLER. Will you hold your questions for a moment, so I can make my point?

The point I am making, so that it is clear in your mind, is that there were no consultations with officials of the Soviet Union regarding the language of the Jackson Amendment. That is the context in which you should take the White House remarks yesterday relating to the discussions of the understanding that were held in the Soviet Union and also during the course of the SALT talks.

The language of the Jackson Amendment is consistent with the language of the unilateral United States statement that developed during the discussions held in conjunction with the SALT I phase of the talks, which, as I mentioned before, were subsequently conveyed to the Congress at the time the Agreements were submitted for Congressional consideration.

Therefore, the Soviet Union was aware of the U.S. view and the matter which is contained in the Jackson Amendment and the Jackson Amendment represents a Congressional endorsement of views already presented by the Administration to the Soviet side.

So, the point I am making is that the Jackson Amendment is consistent with the unilateral statement made by the United States in relation to the interim offensive agreement. That unilateral statement which was submitted to the Senate was thoroughly discussed with the Soviet Union during the course of the strategic arms limitation talks and again in Moscow. So the Soviets were fully aware of the United States view on this matter which is also represented in the Jackson Amendment. The two are consistent.

Secondly, there has been considerable discussion about interpretations made by various Senators, including Senator Jackson, with respect to the language of his amendment. For example, Senator Jackson said the other day that his amendment excludes the consideration of European nuclear forces in future SALT negotiations for achieving equality of intercontinental strategic systems.

That interpretation given by Senator Jackson has given rise to the question as to whether or not the Administration supports that particular interpretation. The Administration's views of Senator Jackson's Amendment was stated by Jerry Warren on August 7th and at that time, he said we do not endorse any elaboration or interpretations of the language of that amendment.

In other words, what we have said is that we endorse the Jackson Amendment and feel that that is consistent with our position, but we do not endorse separate elaborations of that amendment. We feel the Amendment, as offered, speaks for itself.

It is our future view that the second phase of the strategic arms limitation negotiations will be the proper occasion to deal with the matters raised by Senator Jackson similar to the one I just referred to. The appropriate place to deal with those matters would be in the second phase of the strategic arms limitation talks.

Finally, I should say that the President believes that the fundamental issues relating to that Agreement have been fully aired. Of course, we welcomed this. We requested this. The important point to remember is that we want to proceed with the next phase of the strategic arms limitation negotiations. This, of course, required approval of the interim agreement which is now before Congress and approval by the Congress before they recess, so that preparation for the next phase of the SALT talks can go forward with that approval.

It is the President's strong hope that the interim agreement will now move to a vote in the Senate and that the support which he has requested from the Senate be acted on quickly.

Q. Ron, are you open for questions now?

Mr. ZIEGLER. Yes, Bob.

Q. You obviously have received some heat from the Soviet Union on this. Can you be a little more forthright in telling us exactly what transpired here because if I misunderstood Jerry—and I think perhaps a number of the others in this room did at the time—we are now being asked to roll back on the story, is that correct, because the Soviet Union has contacted you?

Mr. ZIEGLER. I think the point I want to make here, Bob, is that I don't know if misinterpretation was involved or not. I would not accept the premise of your statement that we have received, as you referred to in your question, and they are your words, "heat from the Soviet Union." Those are not my words.

I simply repeat them to say that is not the appropriate context for what I said. What we want to do this morning is to point out that, first of all, the Jackson Amendment is consistent with the unilateral statement that we have submitted to the Congress which you have copies of.

The United States unilateral statement which was talked about during the SALT talks and again in the Soviet Union and submitted to the Congress, we feel, is consistent with the Jackson Amendment which is being offered.

Based upon the fact that the Soviets understood our position as stated in the unilateral statement, they were already aware of our opinion and our position which is consistent with the Jackson Amendment.

Therefore, there was no need for consultation with Soviet officials on this matter and therefore there was no consultation with Soviet officials on the matter of the Jackson Amendment. That is the number one point I am making.

The second point I am making is that we feel that the Jackson Amendment is consistent and we feel there should be a Senate vote, which I think there will be soon so that we can receive Senate and Congressional endorsement of the interim agreement so that we can proceed with preparation of SALT 2.

What we are attempting to do this morning, Bob, is to put into proper context the discussion that has been held and to make sure that our position on this matter is clearly understood.

Q. You have not had any heat from the Soviet Union, to use Bob Pierpoint's phrase, that has impelled you to come out here and rewrite yesterday's briefing?

Mr. ZIEGLER. It is not an attempt to rewrite yesterday's briefing. It is an effort to put into perspective our position and attitude regarding the discussion that is occurring in the Senate.

Q. Nothing has happened in the intervening hours between yesterday's 11:00 o'clock briefing and now, other than the fact somebody here in the White House feels that there has been a little lack of perspective.

Mr. ZIEGLER. I am sorry, it was Monday afternoon's briefing, not yesterday's. Well, there have been stories written and there are continuing questions in the Congress as to what our position is.

I would say those events have happened and that is why I wanted to make the comments I made to you this morning.

Q. I don't quite understand this. You were saying that you don't agree with some of the elaborations offered by Senator Jackson himself.

Mr. ZIEGLER. And other Senators.

Q. Yes, and you specifically named one. Would you go over that again?

Mr. ZIEGLER. Apart from the Jackson Amendment, Senator Jackson, and I think some other Senators, as individual Senators, have elaborated on and given interpretations as to their feelings as to what the amendment means. I referred to one by Senator Jackson who said his amendment excludes the consideration of European nuclear forces in future SALT negotiations for achieving equality of intercontinental strategic systems.

The point I was making there is that we do not endorse any elaborations or interpretations of the language of that amendment. What we accept as consistent with the United States view is the Jackson Amendment itself.

Q. So we don't get hung up on semantics, could we substitute for "heat", an "inquiry from the Soviets"?

Mr. ZIEGLER. No, That would be an incorrect assumption. That is why I responded as I did to Bob Pierpoint's questions.

Q. Aside from the question of heat, has the American Government conveyed to the Soviet Union its contention that the Jackson Amendment is consistent with unilateral statements?

Mr. ZIEGLER. The point I was making is that the Soviet Union is already aware of that. They are aware of the Jackson Amendment and also our unilateral statement which has been widely reported on and is before the Congress.

Q. Have you been in touch with them, nevertheless, to point this out, to refresh their memory, if you will?

Mr. ZIEGLER. I am not prepared to talk about the contact we have with the Soviet Union. Those happen on a frequent basis.

The point I am making is that we had no consultation with Soviet officials regarding the Jackson Amendment specifically.

Q. Did Senator Jackson himself object to the suggestion that there may have been some consultation on the language?

Mr. ZIEGLER. No, not at all.

Q. I am a little puzzled as to why the Administration wanted the Jackson Amendment and backed it if, in fact, it did not change anything.

Mr. ZIEGLER. As we said at the time the President submitted the offensive interim agreement to the Congress, we did that for the purpose of having healthy discussions on the matter. He sought the views of the Congress on this interim agreement. He wanted their views.

We have had that discussion which the President called for and wanted. He wanted the views of the Senate on the matter which can only occur through debate and discussion on the subject. That has been held now. We note the points that are made in the course of that discussion, but we do that in the context which I have just stated.

Q. Aside from the Russians having been aware of our unilateral position on this, have they raised no objections? They have not been asked for any further consultation on the Jackson Amendment being accepted by the Administration?

Mr. ZIEGLER. There has been no official discussion with the Soviet Union in any way on any aspect of misunderstanding about the Jackson Amendment or anything of that sort. That is the point I am making because the unilateral statement of understanding which you have before you, or we have copies available for you, is consistent with the Jackson Amendment.

Q. So they raised no objection to its including in this Agreement?

Mr. ZIEGLER. That is a moot point. That was not even a point before us.

Q. Let me rephrase what I think Helen is trying to get at. Did the Soviet Union in any way get in touch with us seeking clarification of this entire situation after the Jackson Amendment was made public?

Mr. ZIEGLER. No. I think I said earlier there official? Was there any unofficial consultation on this.

Q. You said official. What do you mean by official? Was there any unofficial consultation on the matter?

Mr. ZIEGLER. You never have unofficial consultation on matters such as this.

Q. Why do you qualify it?

Mr. ZIEGLER. It was not meant as a qualification. It was meant to make a point. The statement this morning is not being offered for any other reason than to make sure that this matter is put into proper context and perspective because there has been some confusion that has surrounded the Jackson Amendment and some confusion about the United States position on this matter.

The Jackson Amendment, as I said earlier, is consistent with our unilateral statement of understanding. The Jackson Amendment and what is being discussed in the Senate now is consistent with the United States view. It is this step which will lead to the action which the President requested when he submitted the interim agreement to the Congress, and that is their thoughts, their discussions and also their approval and endorsement of the interim agreement.

We want that to go through the process in proper context and not through the process in the context of the fact that there was some misunderstanding or confusion that surrounded it because it is not that complicated.

Q. It was not the stories that were confusing. The Senators were confused as to what the Administration's position was, Fulbright, and others who felt the White House was being very ambiguous. Have you tried to convey what is truly the White House position?

Mr. ZIEGLER. We are doing that now in the course of Congressional contact with Members of the Senate.

Q. To go to the other part of your statement, your point that the elaboration of the Jackson Amendment by Senator Jackson himself and others—and you have twice cited the question of the European nuclear force.

Mr. ZIEGLER. I did that because I was requested to do it.

Q. Right. But are we to get the impression that you are saying that the elaboration such as what Senator Jackson has had to say about a European nuclear force would prejudge SALT 2 and limit the President's action?

Mr. ZIEGLER. Our position is that the Senators are free to state their views. When I make a statement about that amendment being consistent with our unilateral understanding, I am referring to the language of the Jackson Amendment. I am not referring to elaborations or interpretations of the amendment. It is our view, as I stated earlier, that the second phase of the SALT negotiations will be the proper occasion to deal with such matters as Senator Jackson raised and some of the other Senators have raised, not only to the matter I referred to in relation to the European nuclear forces, but also, for example, to forward base systems, etc.

Q. Then I rather get the impression that they are not disagreeing with the interpretation. Do you think that these elaborations would prejudge SALT 2 and limit the President's freedom of action?

Mr. ZIEGLER. We feel the appropriate place to deal with any expansion or discussion of this type should take place in SALT 2.

Q. Are you saying that if this misunderstanding persists that that could jeopardize those discussions in SALT 2 or complicate them unnecessarily in some way.

Mr. ZIEGLER. No, because I don't believe a misunderstanding does exist. What I am saying is that the Jackson Amendment which is now being considered, together with a resolution of support in the Senate, is consistent with the United States Government's view and would constitute support of the interim agreement.

The place to talk about any elaboration of or interpretations of the amendment, any interpretations of what should apply to the SALT 2 negotiations on offensive weapons, the proper place to explore those matters is at the negotiating table during SALT 2.

Q. If the Russians did not complain or Senator Jackson did not complain, will you tell me why the sensitivity about what could not have been much more than a line or two in the stories we wrote, that the White House had discussed this matter with the Soviet Union? What would be so wrong?

Mr. ZIEGLER. I think, as much as anything else when you are dealing with very complicated negotiations and specific documents of endorsement from the United States Senate that relate to very complicated negotiations that have not even gotten under way yet, we have an obligation and indeed a responsibility within the public record, as the Senate action goes in the public record, to make that record clear and as precise as we can in terms of what our view is at that given time.

That is what we are attempting to do this morning.

Q. Were there any contacts, whether initiated by the Soviets or the United States, between the two countries on the question of the elaborations?

Mr. ZIEGLER. Not that I am aware of.

Q. Ron, on this question of discussions between Senator Jackson and the White House, which apparently took place over the weekend, there were some NSC and Congressional leaders here. The Senator feels very strongly that his amendment guaranteed a right to equality of offensive weapons which is an interpretation you are rejecting. My question is: Did the Senator raise this so-called elaboration or interpretation with the NSC people and the Congressional liaison people with the White House over the weekend and if so, what did the White House tell him at that time?

Mr. ZIEGLER. Of course, we have had discussions with Senator Jackson about his amendment. My reference to the elaboration or interpretation that I made earlier does not relate to the specific language of the amendment.

Now whether or not those elaborations were discussed with him one way or another, I dont' know. But I want to make sure you are clear on this point. When I made reference to the fact that in a private elaboration of his amendment, Senator Jackson said that his amendment excludes a consideration of European nuclear forces in future SALT negotiations for achieving equality of intercontinental strategic systems, what I am saying there is that the United States does not endorse that elaboration.

The Senator has made that elaboration as others have also, as other Senators have made elaborations in terms of the amendment. We accept the amendment as consistent with the position that we have already taken. But any elaboration of the type I just referred to, we feel, is something that should be properly discussed and determined at the negotiating table as we proceed to SALT 2.

What I am saying is that we note those points. We note the discussion that has taken place and indeed, we encouraged it. Now what our position will be at the time the SALT 2 begins, I am not prepared to say. We have the process of preparation to proceed with.

Q. When do you expect SALT 2 to begin?

Mr. ZIEGLER. I would say in the near future.

Q. In October?

Mr. ZIEGLER. We have made reference to October. Perhaps it can be under way by that time.

Q. The suspicion, of course, lingers among some members of the Senate that there is a supposition here in the Jackson Amendment of equality, in addition to what Jackson himself said and that this is some subtle change in terms from the agreed unilateral statement in Moscow.

Are you now saying there is no suggestion of equality in line with the Jackson Amendment?

Mr. ZIEGLER. No. That is why I want you to be very careful on the use of that word. I would suggest that you reread the unilateral statement of understanding that we issued which basically says that we feel that we should proceed with a long-term agreement on offensive armaments and that as we proceed with the question of armament talks, that it is important the environment not change that has led to the agreements that we have reached at this point.

Q. Ron, when you say the future of the European nuclear forces ought to be determined in Phase 2, what do you mean with European nuclear forces? The umpteen thousand U.S. nuclear warheads deposited over there or the two European nuclear forces?

Mr. ZIEGLER. We don't mean anything by that. Those are questions that are reserved for step 2.

Q. What did Jackson say in his elaboration, European nuclear forces or European based nuclear forces?

Mr. ZIEGLER. European nuclear forces.

Q. Can you tell us what the President, his Cabinet and political advisers discussed last evening?

Mr. ZIEGLER. I am not prepared to give you an extensive rundown on that. I think Jerry told you yesterday that the President wanted to have the Cabinet up to Camp David for an informal evening. It was that. I think you will recall that in the same month of 1969, the President also had an informal dinner at Camp David. They talked about a lot of things during the course of the evening, legislation in the coming months ahead, the convention, the campaign. They talked about things that the Administration had accomplished. They had a very, very general far-ranging talk about things.

Mr. FULBRIGHT. Mr. President, I appreciate the comments of the Senator from New York and the Senator from Idaho on the critical question of what is equality.

With respect to the glib assumption that equality is self-evident, that everybody knows what it is, obviously, that is not true. There are many variations of what constitutes equality. The specific and detailed concept of equality that is involved in the Senator from Washington's view as to the meaning of his amendment is the question at issue.

I agree with the Senator from Idaho and the Senator from Missouri that if we accept Mr. JACKSON'S concept of equality, it means no further progress in any further SALT talks with the Russians.

I can imagine that the Senator from Washington feels so strongly, that his distaste and distrust of the Russians is so great, that he may think it is not in our interest to have any further agreement with the Russians, and that is his right. It is his privilege to feel that way. But I do not believe that is the feeling of the people of this country, and I certainly have been led to believe that it is not the feeling of the President of the United States. It is so important that this issue be carefully and fully explored. The Senate and the country should know that the Russians will be disposed to put an interpretation on the Jackson amendment, perhaps more drastic than the Senator from Idaho does. Russia is very likely to do so, in view of the long history of 25 years of the cold war. It will not be easy to overcome their suspicion.

Mr. CHURCH. Mr. President, will the Senator from Arkansas yield?

Mr. FULBRIGHT. I yield.

Mr. CHURCH. It has been called to my attention that the distinguished Senator from Mississippi (Mr. STENNIS), the chairman of the Armed Services Committee, whose knowledge of military affairs is great, addressed the Senate this morning. I want to quote from his address concerning his evaluation of the 5-year accord between the Soviet Union and the United States.

The Armed Services Committee held hearings, as did the Committee on Foreign Relations. Much testimony was taken. The Senator from Mississippi had this to say about his appraisal of the accords after he had evaluated all the testimony:

> Our SALT hearings strengthened my conviction that we now have a credible deterrent—that we have a force so strong that potential enemies would not risk attacking us.
>
> Our hearings also persuaded me that our deterrent will still be strong and wholly credible five years hence if we continue to modernize our weapons and improve our technology—as we are permitted to do under the agreements.
>
> Our hearings convinced me that we do have the means to know what the other side is doing while the treaty is in force.
>
> In short, I concluded that the treaty and the interim agreement are sound and that we can safely approve them as the basis for new negotiations aimed at tighter limitations on offensive strategic arms.

That is a quote directly from the address of the Senator from Mississippi (Mr. STENNIS) which represents the appraisal of the chairman of the Armed Services Committee on the accords.

He then goes on to refer to the Jackson amendment. His understanding of the Jackson amendment is expressed in the following words, again taken from the address of the distinguished Senator from Mississippi (Mr. STENNIS):

> Further, the present five year agreement gives certain numerical advantages to the Soviet Union based, in part at least, on technological advantages which we now enjoy. Those technological advantages cannot be assumed to continue for all time. A permanent treaty, therefore, must take this into account and balance the level of strategic forces on both sides by considering numbers of launchers, numbers of warheads, destructive power of weapons and potential growth within the terms of the treaty. This, as I understand it, is the aim of the second portion of the Jackson amendment.

I must say, this demonstrates the mischief done by adopting the Jackson language. The interpretation placed on it by the Senator from Mississippi is not, I dare say, the interpretation of its own author. The Senator from Mississippi does not say "intercontinental strategic forces," he says "strategic forces." Yet the Senator from Washington insists upon the limiting term, "intercontinental." That is quite a different concept.

The Senator from Mississippi says that in any future negotiation, the numbers of warheads should be taken into account. I have heard hardly any mention of the number of warheads in the argument presented by the Senator from Washington. In other words, see the confusion——

Mr. FULBRIGHT. Let me say that the other day, in an exchange, we mentioned warheads and the Senator from Washington specifically said, "Oh, those in Europe would not be counted." He says, "They are there but they should not be counted because they are subject to destruction." In other words, he dismisses them.

Mr. CHURCH. The point I wish to make is that every Senator may have a different interpretation of the Jackson amendment. It is clear that there is confusion as to its exact meaning between the author and the chairman of the

Armed Services Committee. All we will do, if we pass this amendment, is create a climate of suspicion, confusion, and distrust concerning the purposes of the Government of the United States.

The President himself has contributed to the confusion in a most disappointing way. This is his own agreement that he is in the act of sabotaging. If the Senate approves the Jackson amendment, then the confusion will be compounded. If we cannot agree among ourselves as to what it means, how can we expect the Russians to know? And, why should we create for ourselves more obstacles as we look ahead toward the second phase of these negotiations?

Everyone knows it will be difficult enough to reach an agreement that begins to reduce the heavy burden of nuclear weapons on either side. With vested interests on each side keeping the arms race alive, such negotiations are extremely difficult at best. Passing this amendment would create another obstacle for ourselves and greatly jeopardize the success of the upcoming SALT talks.

Mr. FULBRIGHT. I agree completely with the Senator from Idaho. He has described very well what is involved here.

I can only comment further that this agreement was 3 years in the process of negotiation. It was not suddenly thought up. The language agreed to was very thoroughly examined during that period, as the Senator well knows.

It seems to me very unwise for us, here within a few days of discussion of this matter, to undertake to vote on this amendment by the Senator from Washington, in view of the confusion that already obviously exists as to its meaning.

I may say, in that connection, that during the past 2 or 3 days—really, since last Friday, intermittently—but very strongly yesterday and today—there has been an effort to force a vote, to restrict the time.

The more I think of it and the more I hear the kind of discussion and information that the Senator from Idaho has just given the Senate, the more I think it is wise for us to take the time to try to understand what is involved and to enable the rest of the Senate and the country to understand the concern we have about the Jackson amendment.

There are some one-third of Senators legitimately and necessarily absent in connection with the Republican Convention. I do not think it is wise for them to be brought back, without having heard any of this debate, and to be asked to vote on the issue which will be presented to them as simple equality, that is, "You are for equality, or are you not?" That is all they will know. They will be told, when they come in, having heard no discussion, "Are you for or are you against equality?" They will all say, "Sure, I am for equality," and therefore they would vote for it.

I should like time to explain why some of my associates, including the Senator from Idaho, have felt that added time is required to focus on the national interest on this issue, and we have resisted an agreement for a very limited time to vote on this issue this week. That again does not mean we do not approve the basic interim agreement.

I repeat that the committee voted unanimously in favor of it. I am in favor of it. The Senator from Idaho is strongly in favor of it. However, we do not wish for it to be undermined in its validity by any quick and superficial examination and vote on it and attaching to it an amendment which undertakes indirectly to interpret it and to give guidance for the future. There is no place in the agreement at all for the amendment.

Mr. CHURCH. Mr. President, will the Senator yield?

Mr. FULBRIGHT. I yield for a question.

Mr. CHURCH. Mr. President, the Senator has referred to hasty and simplistic notions of equality that might easily mislead the Senate when it comes to voting on the Jackson amendment. I could not agree with the Senator more.

Some could be misled as a result of what is going on right now out in the Vice President's office. I was taken in there a few minutes ago and shown two models. One model is of the SS–9. It stands about this high, fully 2 feet off the table. It is a very menacing looking weapon. One is especially struck by the size of the scale model of the SS–9 when it is compared with the model, also to scale, of the Minuteman missile which sits next to it.

Senators are led into this room to look at these two models. The conclusion they easily could reach is that the Russians must certainly have an advantage over us because the SS–9 is so much larger than the Minuteman.

When I was shown this exhibit, I asked why we built the Minuteman so much smaller when we could have built a missile that is the equivalent of the SS–9.

Mr. FULBRIGHT. We have the Titan.

Mr. CHURCH. We have the technology to build a big missile. However, we choose to build a smaller missile. This was not because we were hoodwinked by the Russians. It was because we have a different strategic concept of the use of nuclear weapons than the Russians. They have put great store in the building of larger missiles with larger throw weight capacity, with larger nuclear warheads, while we have put emphasis upon a greater number of smaller warheads.

We had a reason for doing this. If a Senator walks into that room and looks at the two models and decides that there is an obvious inequality, he overlooks the fact that we decided as a matter of efficient utilization of nuclear strength that it is better to have many warheads that can blanket the Soviet Union and have a more complete devastating effect upon the target than to have fewer warheads that make larger holes. In other words, we prefer to make many smaller craters, each one being roughly the area of a city.

Many smaller craters can be more effectively used against an enemy in a nuclear exchange than fewer larger craters.

Mr. FULBRIGHT. The Senator is quite correct. The official analysis says that four 1-megaton weapons are equal approximately to one 16-megaton weapon. It is 4 to 1 more efficient and effective destructive capacity per megaton.

That is why we did it, because it is a more efficient way.

Mr. CHURCH. The very people who decided our course and told us that this is the most efficient way to develop our nuclear power—because it would result in more complete destruction of enemy cities, harbors, and population—are now showing us two models in the Vice President's room. The intention to show that their decision was in error and that the Russians now have an advantage because the SS–9 is so much larger than the Minuteman.

What they do not tell us is the information that I had printed in the RECORD of August 14 having to do with the number of deliverable warheads. That is the critical question. These charts appear on pages 28066 and 28067 of the RECORD. A very brief examination shows that the United States has an estimated 5,746 deliverable warheads in its strategic nuclear force now while the Soviet Union has less than half of that number or about 2,492.

The charts also show that by the end of the 5-year interval covered by the accords, the United States could increase the number of warheads to more than 10,000. If the Trident and B–1 bomber are built—and it looks as though they will be, for they have already been approved by the Congress—in the early 1980's we could have perhaps 14,564 deliverable warheads against 3,869 for the Soviet Union.

So, we begin with a 2-to-1 advantage. And we could conclude the 5-year period covered with about a 3–to-1 advantage. If we look forward into the 1980's, we could have a 5-to-1 advantage in the number of warheads of the type which our own military command has told us is the most efficient way to inflict the greatest possible damage upon the enemy.

For the life of me, I cannot see how it makes sense, in light of these figures, to argue that the Senate should adopt the Jackson amendment in order to assure us equality and parity with the Soviet Union in the future.

Mr. FULBRIGHT. I agree with the Senator. And I think there is an inherent inconsistency between the Jackson amendment and the agreement itself.

May I ask the Senator, since I have not been invited into the Vice President's room, whether the Vice President's room is now a substation of the National Security Council? Is it used for the purpose of influencing the votes of Senators? I have not been in there. Is this an exhibit hall?

Mr. CHURCH. Yes. I suggest to the Senator that he go and knock at the door and ask if they will let him in.

Mr. FULBRIGHT. Is that what the Senator did?

Mr. CHURCH. No. I was led by the hand.

Mr. FULBRIGHT. The Senator was invited in.

Mr. CHURCH. The Senator is correct.

Mr. FULBRIGHT. Mr. President, I

thought that was a ceremonial hall for the Vice President. However, it is now an exhibit hall for the National Security Council. Is that what it is now?

Mr. CHURCH. Apparently so.

Mr. FULBRIGHT. Mr. President, this is rather peculiar in view of the fact that officials of the National Security Council, including Mr. Kissinger, refuse to come to the Hill for committee hearings. Now instead of coming to the Hill to testify, they have the exhibits here and ask Senators into the Vice President's room so that they can see these models.

Mr. CHURCH. It is a very eloquent exhibit. If one does not ask questions it conveys the impression that the Russians are so far ahead that any of us would vote for the Jackson amendment. Of course, that impression does not bear up under more careful analysis.

Mr. FULBRIGHT. Do they have exhibits of the Poseidon, the B–1, and aircraft carriers?

Mr. CHURCH. Just the two missiles—the SS–9 and the Minuteman.

Mr. FULBRIGHT. They do not have a complete array of all the various missiles?

Mr. CHURCH. No.

Mr. FULBRIGHT. I suppose they would not promote their case if they did.

Mr. CHURCH. Apparently not.

Mr. FULBRIGHT. Does the Senator know if it is customary that that room is used for this purpose on all legislation?

Mr. CHURCH. I do not know.

Mr. FULBRIGHT. Has the Senator ever been invited there before?

Mr. CHURCH. I have never been invited before to see this kind of exhibit, but this suits the purpose of the administration.

Mr. FULBRIGHT. I did not know that room was provided for that purpose, an administration substation for lobbying the Senate. I do not think it was used for that purpose in the past. It used to be for ceremonial purposes. Is that correct?

Mr. CHURCH. That is correct, as far as I know.

Mr. FULBRIGHT. I wonder if we could have another room set aside for lobbyists on the other side so that we could have other witnesses, such as Mr. Panofsky and other witnesses come in. They could set up an exhibit.

Mr. CHURCH. The Senator knows that an effort of that kind would cause a great uproar.

Mr. FULBRIGHT. Is the Senator not for equality? Does not the Senator sustain the principle of equality in this area as well as in others?

Mr. CHURCH. I think the exhibit reflects the kind of argument the Senator from Washington is talking about in his amendment. It does not present the whole picture. Two missiles are shown to us as if these two missiles constituted the equation on the balance between the nuclear strategic strength of the United States and the Soviet Union.

The irony is that the very size of the Minuteman missile is the size prescribed to us by our military command because of their belief that a larger number of smaller warheads constituted the best method of inflicting maximum damage on the enemy.

Are they retreating from their own doctrine? Are they confessing they were in error? If so, we should know it. We have spent many billions of dollars adopting, approving, and financing the strategic recommendations of our own military command. It is a curious world, and it gets "curiouser and curiouser" as we examine more fully the implications of the Jackson amendment.

Mr. FULBRIGHT. I agree with the Senator. I think his discussion of this matter has done a great deal to sharpen the issue and enlighten my colleagues and the country with respect to what is involved in this issue.

Now, Mr. President, there are some other items I would like to discuss.

It strikes me that the views of the Senator from Washington and his associates completely ignore the significance of the ABM Treaty which we approved here just a few days ago. That treaty, as we know, was an undertaking without any dissent, or without any serious criticism, that each one is giving up voluntarily the effort to create a defense against the use of nuclear weapons. I think it is a very significant matter.

A very perspective writer said that we and the Russians had agreed to put our people and our cities as hostages to each other's nuclear capability. This, he wrote, would contribute more to a stable deterrence, a stable nuclear relationship between the two great powers than anything he could think of.

I think the Senator from Washington and his associates also ignore the statement of basic principles signed in Moscow by President Nixon and Mr. Brezhnev. Those general principles have not attracted a great deal of attention. In essence, however, they are indications of a mutual desire and intention on the part of our two great countries to cooperate in various fields of endeavor. I think those principles recognize a new attitude and approach on the part of the greatest military powers in the world.

Twenty-five years of antagonism and hostility have distinguished the cold war. I think those statements of a growing new relationship are extremely important.

I am afraid the Senator from Washington (Mr. JACKSON) is so blinded by his suspicions and hatred of the Russians that he is incapable of understanding the significance of these statements of principle, together with the ongoing negotiations for trade and other new relations. For example, within recent days there has been the sale of wheat. In the last statement which I saw, it is anticipated the Russians will purchase $1 billion worth of wheat from us in coming months. Then there is the move toward settlement of the lend-lease account and the possibility that we and the Russians may engage in joint ventures.

These new opportunities are described in this morning's New York Times in an article entitled " 'Promise' Seen by Peterson in Operations by Companies." I will read part of the article and ask unanimous consent that the entire article may be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

"PROMISE" SEEN BY PETERSON IN OPERATIONS BY COMPANIES

WASHINGTON, August 14.—Commerce Secretary Peter G. Peterson said today that he saw "great promise" in the possibility of American companies engaging in joint ventures with Soviet enterprises to exploit the Soviet Union's untapped energy and raw materials, such as natural gas, oil, platinum, copper, chrome, zinc and timber.

In the strongest Administration endorsement yet of joint ventures by which the Soviet Union could find the means to pay for its anticipated large-scale increases in imports from this country, Mr. Peterson said it was necessary to think in "large and unconventional terms."

Mr. Peterson's views were contained in a lengthy report on his recent visit to the Soviet Union that was released today. It was called "U.S.-Soviet Commercial Relationships in a New Era," and, in addition to his comments, contained explanatory material and tables about the Soviet economic system.

In a telephone interview, Mr. Peterson expanded on his report to disclose that the United States was giving considerable attention to the possibility of joint ventures to exploit the Soviet Union's vast natural gas reserves in western Siberia.

He said three American companies were presently engaged in talks with the Russians on possible ventures to export liquefied natural gas to the United States. One concern, the El Paso Natural Gas Company, was discussing collaboration with the Japanese to export liquefied gas to the United States West Coast from Soviet Far Eastern ports. Two others, Tenneco, Inc., and the Texas Eastern Transmission Corporation, were discussing the export of liquefied gas to the American East Coast via the port of Murmansk.

In addition, Mr. Peterson said, there were discussions with the Russians on the export to the United States of platinum because of the need for that metal in anti-pollution devices in automobiles.

The principal problem is to find the needed capital for these ventures. The natural-gas ventures would require capital inputs of more than $5-billion, Mr. Peterson said. This would exceed the ability of the United States Government's Export-Import Bank, and would require private investment as well.

In his report, Mr. Peterson listed many of the questions that were being asked now, such as how much of a return should American companies receive, and what recourse would there be against a failure of the Soviet side to live up to its commitments.

In summary, he said, "I believe that these types of joint projects are potentially the single most important product of the new commercial relationship in which the two largest economies in the world each adjust their ways of doing business to the mutual benefit of both."

He cited, in addition to natural gas and platinum, oil, copper, chrome, zinc and timber as possible areas. He also said other projects might include the manufacture of such products as fertilizers, farm implements and cellulose.

Mr. Peterson was in Moscow last month as head of the joint Soviet-American trade commission, negotiating a possible trade agreement. That pact has still not been approved, largely because of the inability of the two sides so far to compromise differences over the Soviet Union's lend-lease debts during World War II.

He gave a very optimistic outlook, however, for long-range prospects on trade based on mutual benefit to the two countries. The Russians, in recent weeks, have already indicated that they will buy $1-billion worth of agricultural products over the next 12 months, and have been purchasing industrial equipment as well.

Mr. FULBRIGHT. Mr. President, the article states in part:

> Commerce Secretary Peter G. Peterson said today that he saw "great promise" in the possibility of American companies engaging in joint ventures with Soviet enterprises to exploit the Soviet Union's untapped energy and raw materials, such as natural gas, oil, platinum, copper, chrome, zinc and timber.
>
> In the strongest Administration endorsement yet of joint ventures by which the Soviet Union could find the means to pay for its anticipated large-scale increases in imports from this country, Mr. Peterson said it was necessary to think in "large and unconventional terms."
>
> Mr. Peterson's views were contained in a lengthy report on his recent visit to the Soviet Union that was released today. It was called "U.S.-Soviet Commercial Relationships in a New Era," and, in addition to his comments, contained explanatory material and tables about the Soviet economic system.
>
> In addition, Mr. Peterson said, there were discussions with the Russians on the export to the United States of platinum because of the need for that metal in anti-pollution devices in automobiles.
>
> In summary, he said, "I believe that these types of joint projects are potentially the single most important product of the new commercial relationship in which the two largest economies in the world each adjust their ways of doing business to the mutual benefit of both."
>
> He cited, in addition to natural gas and platinum, oil, copper, chrome, zinc, and timber as possible areas. He also said other projects might include the manufacture of such products as fertilizers, farm implements and cellulose.
>
> He gave a very optimistic outlook, however, for long-range prospects on trade based on mutual benefit to the two countries. The Russians, in recent weeks, have already indicated that they will buy $1-billion worth of agricultural products over the next 12 months, and have been purchasing industrial equipment as well.

Some years ago—I suppose nearly 10 years ago—I entered into this effort to reach a compromise by submitting some advisory suggestions as to how we might settle the lend-lease accounts. At that time the Russians had offered $300 million; we had demanded $800 million, and the negotiations came to a stalemate. I suggested then if we would agree on $500 million as a comprimise, the $500 million to be advanced by the Russians for the purpose of creating a joint enterprise. Russia would agree to pay us the $500 million. It would be invested in a joint enterprise, similar to these described here; we would ultimately be paid out of the proceeds of the products of those joint enterprises so that in effect it would constitute no drain on the Soviets' balance of payments, but we would be paid from the new products of the joint enterprise.

I think there is great promise in movement in this direction. The point of it is that this program, as described by Mr. Peterson, it seems to me, is utterly inconsistent with the basic assumption of the Senator from Washington. The basic assumption of Mr. Jackson as is quite clear in his major statement, is that the Soviets are straining at the leash to take advtantage of every opportunity to increase their capacity to create a first strike capability.

His description of what they are going to do with MIRV's and many of the various weapons they will build is frightening, of course, and it is intended to be frightening to all of us so that we will support his amendment. But it is obviously inconsistent with the basic assumptions of the Peterson negotiations. You cannot have it both ways, Mr. President. If the Soviets are interested in joint ventures that involve large amounts of capital going over many years, how is it possible to assume at the same time, and as a part thereof, that they are making plans to do everything possible to do us in? It seems to me there must be some degree of confidence in their purpose if we are to go through with these joint ventures about which Mr. Peterson is so very optimistic.

As a nation we cannot proceed on these two tracks at the same time without creating great confusion and schizophrenia in our own policy.

Mr. President, I ask unanimous consent to yield to the Senator from Minnesota without losing my right to the floor, for the purpose of bringing up a conference report.

The PRESIDING OFFICER. Without objection, it is so ordered.

EQUAL EXPORT OPPORTUNITY ACT—CONFERENCE REPORT

Mr. MONDALE. Mr. President, I submit a report of the committee of conference on S. 3726, and ask for its immediate consideration.

The PRESIDING OFFICER. The report will be stated by title.

The assistant legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 3726) to extend and amend the Export Administration Act of 1969 to afford more equal export opportunity, to establish a Council on International Economic Policy, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by a majority of the conferees.

The PRESIDING OFFICER. Is there objection to the consideration of the conference report?

There being no objection, the Senate proceeded to consider the report, which reads as follows:

Conference Report

The committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 3726) to extend and amend the Export Administration Act of 1969 to afford more equal export opportunity, to establish a Council on International Economic Policy, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its disagreement to the amendment of the House to the text of the bill and agree to the same with an amendment as follows: In lieu of the matter proposed to be inserted by the House amendment insert the following:

TITLE I—AMENDMENTS TO THE EXPORT ADMINISTRATION ACT OF 1969

Sec. 101. This title may be cited as the "Equal Export Opportunity Act".

Sec. 102. Section 2(3) of the Export Administration Act of 1969 is amended by inserting before the period at the end thereof a comma and the following: "particularly when export restrictions applied by the United States are more extensive than export restrictions imposed by countries with which the United States has defense treaty commitments".

Sec. 103. Section 3 of the Export Administration Act of 1969 is amended by adding at the end thereof the following:

"(6) It is the policy of the United States that the desirability of subjecting, or continuing to subject, particular articles, materials, or supplies, including technical data or other information, to United States export controls should be subjected to review by and consultation with representatives of appropriate United States Government agencies and qualified experts from private industry."

Sec. 104. (a) Section 4(b) of the Export Administration Act of 1969 is amended—

(1) by inserting "(1)" after "(b)"; and

(2) by adding at the end thereof the following new paragraphs:

"(2) The Secretary of Commerce, in cooperation with appropriate United States Government departments and agencies and the appropriate technical advisory committees established under section 5(c), shall undertake an investigation to determine which articles, materials, and supplies, including technical data and other information, should no longer be subject to export controls because of their significance to the national security of the United States. Notwithstanding the provisions of paragraph (1) the President shall remove unilateral export controls on the export from the United States of articles, materials, or supplies, including technical data or other information, which he determines are available without restriction from sources outside the United States in significant quantities and comparable in quality to those produced in the United States, except that any such control may remain in effect if the President determines that adequate evidence has been presented to him demonstrating that the absence of such a control would prove detrimental to the national security of the United States. The nature of such evidence shall be included in the special report required by paragraph (4).

"(3) In conducting the investigation referred to in paragraph (2) and in taking the action required under such paragraph, the Secretary of Commerce shall give priority to those controls which apply to articles, materials, and supplies, including technical data and other information, for which there are significant potential export markets.

"(4) Not later than nine months after the date of enactment of the Equal Export Opportunity Act, the Secretary of Commerce shall submit to the President and to the Congress a special report of actions taken under paragraphs (2) and (3). Such report shall contain—

"(A) a list of any articles, materials and supplies, including technical data and other information, which are subject under this Act to export controls greater than those imposed by nations with which the United States has defense treaty commitments, and the reasons for such greater controls; and

"(B) a list of any procedures applicable to export licensing in the United States which may be or are claimed to be more burdensome than similar procedures utilized in nations with which the United States has defense treaty commitments, and the reasons for retaining such procedures in their present form.".

(b)(1) Section 4(e) of such Act is amended to read as follows:

"(e) The authority conferred by this section shall not be exercised with respect to any agricultural commodity, including fats and oils or animal hides or skins, without the approval of the Secretary of Agriculture. The Secretary of Agriculture shall not approve the exercise of such authority with respect to any such commodity during any period for which the supply of such commodity is determined by him to be in excess of the requirements of the domestic economy, except to the extent the President determines that such exercise of authority is required to effectuate the policies set forth in clause (B) or (C) of paragraph (2) of section 3 of this Act."

(2) Any rule, regulation, proclamation, or order issued after July 1, 1972, under section 4 of the Export Administration Act of 1969, exercising any authority conferred by such section with respect to any agricultural commodity, including fats and oils or animal hides or skins, shall cease to be effective upon the date of enactment of this Act.

Sec. 105. Section 5 of the Export Administration Act of 1969 is amended by adding at the end thereof the following:

"(c)(1) Upon written request by representatives of a substantial segment of any industry which produces articles, materials and supplies, including technical data and other information, which are subject to export controls or are being considered for such controls because of their significance to the national security of the United States, the Secretary of Commerce shall appoint a technical advisory committee for any grouping of such articles, materials, and supplies, including technical data and other information, which he determines is difficult to evaluate because of questions concerning technical matters, worldwide availability and actual utilization of production and technology, or licensing procedures. Each such committee shall consist of representatives of United States industry and government. No person serving on any such committee who is representative of industry shall serve on such committee for more than two consecutive years.

"(2) It shall be the duty and function of the technical advisory committees established under paragraph (1) to advise and assist the Secretary of Commerce and any other department, agency, or official of the Government of the United States to which the President has delegated power, authority, and discretion under section 4(d) with respect to actions designed to carry out the policy set forth in section 3 of this Act. Such committees shall be consulted with respect to questions involving technical matters, worldwide availability and actual utilization of production and technology, and licensing procedures which may affect the level of export controls applicable to any articles, materials, or supplies, including technical data or other information, and including those whose export is subject to multilateral controls undertaken with nations with which the United States has defense treaty commitments, for which the committees have expertise. Such committees shall also be consulted and kept fully informed of progress with respect to the investigation required by section 4(b)(2) of this Act. Nothing in this subsection shall prevent the Secretary from consulting, at any time, with any person representing industry or the general public regardless of whether such person is a member of a technical advisory committee. Members of the public shall be given a reasonable opportunity, pursuant to regulations prescribed by the Secretary of Commerce, to present evidence to such committees.

"(3) Upon request of any member of any such committee, the Secretary may, if he determines it appropriate, reimburse such member for travel, subsistence, and other necessary expenses incurred by him in connection with his duties as a member.

"(4) Each such committee shall elect a chairman, and shall meet at least every three months at the call of the Chairman, unless the Chairman determines, in consultation with the other members of the committee, that such a meeting is not necessary to achieve the purposes of this Act. Each such committee shall be terminated after a period of two years, unless extended by the Secretary for additional periods of two years. The Secretary shall consult each such committee with regard to such termination or extension of that committee."

Sec. 106. Section 14 of the Export Administration Act of 1969 is amended by striking out "August 1, 1971" and inserting in lieu thereof "June 30, 1974".

Sec. 107. Nothing in this title shall be construed to require the release or publication of information which is classified pursuant to Executive order or to affect the confidentiality safeguards provided in section 7(c) of the Export Administration Act of 1969.

Sec. 108. The provisions of this title take effect as of the close of July 31, 1972.

TITLE II—COUNCIL ON INTERNATIONAL ECONOMIC POLICY

SHORT TITLE

Sec. 201. This title may be cited as the "International Economic Policy Act of 1972".

STATEMENT OF PURPOSES

Sec. 202. It is the purpose of this title to provide for closer Federal interagency coordination in the development of a more rational and orderly international economic policy for the United States.

FINDINGS AND POLICY

Sec. 203. The Congress finds that there are many activities undertaken by various departments, agencies, and instrumentalities of the Federal Government which, in the aggregate, constitute the domestic and international economic policy of the United States. The Congress further finds that the objectives of the United States with respect to a sound and purposeful international economic policy can be better accomplished through the closer coordination of (1) domestic and foreign economic activity, and (2) in particular, that economic behavior which, taken together, constitutes United States international economic policy. Therefore this Act establishes a Council on International Economic Policy which will provide for—

(A) a clear top level focus for the full range of international economic issues; deal with international economic policies including trade, investment, balance of payments, and finance as a coherent whole;

(B) consistency between domestic and foreign economic policy; and

(C) close coordination with basic foreign policy objectives.

The Congress intends that the Council shall be provided with the opportunity to (i) investigate problems with respect to the coordination, implementation, and long-range development of international economic policy, and (ii) make appropriate findings and recommendations for the purpose of assisting in the development of a rational and orderly international economic policy for the United States.

CREATION OF COUNCIL ON INTERNATIONAL ECONOMIC POLICY

Sec. 204. There is created in the Executive Office of the President a Council on International Economic Policy (hereinafter referred to in this title as the "Council").

MEMBERSHIP

Sec. 205. The Council shall be composed of the following members and such additional members as the President may designate:

(1) The President.

(2) The Secretary of State.

(3) The Secretary of the Treasury.

(4) The Secretary of Defense.

(5) The Secretary of Agriculture.

(6) The Secretary of Commerce.

(7) The Secretary of Labor.

(8) The Director of the Office of Management and Budget.

(9) The Chairman of the Council of Economic Advisers.

(10) The Special Representative for Trade Negotiations.

The President shall be the Chairman of the Council and shall preside over the meetings of the Council; in his absence he may designate a member of the Council to preside in his place.

DUTIES OF THE COUNCIL

Sec. 206. Subject to the direction of the President, and in addition to performing such other functions as he may direct, the Council shall—

(1) Assist and advise the President in the preparation of the International Economic Report required under section 207.

(2) Review the activities and the policies of the United States Government which indirectly or directly relate to international economics and, for the purpose of making recommendations to the President in connection therewith, consider with some degree of specificity the substance and scope of the international economic policy of the United States, which consideration shall include examination of the economic activities of (A) the various agencies, departments, and instrumentalities of the Federal Government, (B) the several States, and (C) private industry.

(3) Collect, analyze, and evaluate authoritative information, current and prospective, concerning international economic matters. Such evaluations shall include but not be limited to the impact of international trade on the level, stability, and financial rewards for domestic labor and the impact of the transnational corporation on international trade flows.

(4) Consider policies and programs for coordinating the activities of all the departments and agencies of the United States with one another for the purpose of accomplishing a more consistent international economic policy, and make recommendations to the President in connection therewith.

(5) Continually assess the progress and effectiveness of Federal efforts to carry out a consistent international economic policy.

(6) Make recommendations to the President for domestic and foreign programs which will promote a more consistent international economic policy on the part of the United States and private industry. Recommendations under this paragraph shall include, but shall not be limited to, policy proposals relating to monetary mechanisms, foreign investment, trade, the balance of payments, foreign aid, taxes, international tourism and aviation, and international treaties and agreements relating to all such matters. In addition to other appropriate objectives, such policy proposals should be developed with a view toward—

(A) strengthening the United States competitive position in world trade;

(B) achieving equilibrium in international payment accounts of the United States;

(C) increasing exports of goods and services;

(D) protecting and improving the earnings of foreign investments consonant with the concepts of tax equity and the need for domestic investment;

(E) achieving freedom of movement of people, goods, capital, information, and technology on a reciprocal and worldwide basis;

(F) increasing the real employment and income of workers and consumers on the basis of international economic activity; and

(G) preserving the diversified industrial base of the United States.

REPORT

Sec. 207. (a) The President shall transmit to the Congress an annual report on the international economic position of the United States. Such report (hereinafter referred to as the "International Economic Report") shall be submitted not later than sixty days after the beginning of each regular session of the Congress, and shall include—

(1) information and statistics describing characteristics of international economic activity and identifying significant current and foreseeable trends and developments;

(2) a review of the international economic program of the Federal Government and a review of domestic and foreign economic conditions and other significant matters affecting the balance of international payments of the United States and of their effect on the international trade, investment, financial, and monetary position of the United States;

(3) a review of the impact of international voluntary standards, the foreign investments of United States based transnational firms, and the level of foreign wage rates on the level, stability, and financial reward for domestic employment; and

(4) a program for carrying out the policy objectives of this title, together with such recommendations for legislation as he may deem necessary or desirable.

(b) The President may transmit from time to time to the Congress reports supplementary to the International Economic Report, each of which may include such supplementary or revised recommendations as he may deem necessary or desirable to achieve the purposes and policy objectives set forth in this title.

EXECUTIVE DIRECTOR AND STAFF OF THE COUNCIL

SEC. 208. (a) The staff of the Council shall be headed by an Executive Director who shall be appointed by the President, and he shall be compensated at the rate now or hereafter provided for level II of the Executive Schedule (5 U.S.C. 5313). He shall keep the Committee on Banking, Housing and Urban Affairs of the Senate, the Committee on Banking and Currency of the House of Representatives, the Committee on Foreign Relations of the Senate, the Committee on Foreign Affairs of the House of Representatives, the Committee on Finance of the Senate, the Committee on Ways and Means of the House of Representatives, and the Joint Economic Committee fully and currently informed regarding the activities of the Council.

(b) (1) With the approval of the Council, the Executive Director may appoint and fix the compensation of such staff personnel as he deems necessary. Except as provided in paragraph (2), the staff of the Council shall be appointed subject to the provisions of title 5, United States Code, governing appointments in the competitive service, and shall be paid in accordance with the provisions of chapter 51 and subchapter III of chapter 53 of such title relating to classification and General Schedule pay rates.

(2) With the approval of the Council, the Executive Director may appoint and fix the compensation not to exceed the rate provided for level IV of the Federal Executive Salary Schedule, and appoint and fix the compensation of two officers at rates of basic compensation not to exceed the rate provided for level V of the Federal Executive Salary Schedule.

(c) With the approval of the Council, the Executive Director may procure temporary and intermittent services to the same extent as is authorized by section 3109 of title 5, United States Code, at rates not to exceed the daily equivalent of the rate provided for GS-18.

(d) Upon request of the Executive Director, the head of any Federal agency is authorized to detail, on a reimbursable basis, any of its personnel to the Council to assist it in carrying out its duties under this title.

SEC. 209. The provisions of this title shall expire on June 30, 1973, unless extended by legislation enacted by the Congress.

AUTHORIZATION FOR APPROPRIATIONS

SEC. 210. For the purpose of carrying out the provisions of this title, there are authorized to be appropriated not to exceed $1,400,000 for fiscal year 1973.

And the House agree to the same.

That the House recede from its amendment to the title of the bill.

THOMAS L. ASHLEY,
FERNAND J. ST GERMAIN,
WILLIAM B. WIDNALL,
ALBERT W. JOHNSON,
GARRY BROWN,
Managers on the Part of the House.

Mr. MONDALE. Mr. President, I also ask unanimous consent that requirement for printing the conference report as a Senate report be waived.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MONDALE. Mr. President, this measure returns from conference in almost identical form as was adopted by the Senate sometime back. It is a two-part measure, designed to promote American exports and increase employment here in the United States.

Title I of the bill amends the Export Administration Act and requires that the Secretary of Commerce move swiftly to end unilateral U.S. controls on the export of peaceful, nonstrategic goods. This amendment was largely the work of the distinguished Presiding Officer (Mr. TAFT).

I believe that these unilateral controls are largely self-defeating. Their removal would be particularly helpful to our high technology industries and will allow them to compete on a much more favorable basis in the rapidly growing Eastern European market.

Title II of this measure creates in the White House a Council on International Economic Policy. We are very hopeful this council can provide a better focus on the problems, as well as the solutions, which bear on the aggravating and difficult problems of the U.S. balance of trade.

I now yield to the distinguished ranking minority member of the Committee on Banking, Housing and Urban Affairs (Mr. BENNETT).

Mr. BENNETT. Mr. President, I would like to express my support for the conference report on S. 3726, containing amendments to the Export Administration Act. In addition to extending the authority of the act, the amendments more clearly define the policy of the Congress with regard to export controls, and establish by statute a Council on International Economic Policy in the Executive Office of the President for a period of about 10 months. Appropriations of $1,400,000 for funding its operations for fiscal year 1973 are also authorized. This Council will serve as an important coordinating mechanism for the more than 60 agencies now engaged in international economic affairs. The Council is established to review the policies of these agencies and make recommendations to the President for improving and assuring consistency in our international economic policy.

I believe that it is important to assure that there be no misunderstanding of the requirement that the Executive Director of the Council keep various committees of the Congress fully and currently informed of the activities of the Council. It is especially important so that a constructive and cooperative relationship may be maintained on international economic policy between the Congress and the executive branch, a relationship which is beneficial and which, I am sure, both are anxious to preserve.

As a member of the conference committee I can say that the conference committee considered this question at some length during the three sessions which were held on the bill. It was agreed that the "fully and currently informed" provision does not require the Executive Director of the Council to testify formally before congressional committees. While the conference committee deleted the requirement that the Executive Director be an Assistant to the President, it is certainly a possibility that the President would appoint a Presidential Assistant to that position. In such an event, it is not intended that the long-standing tradition that those who hold such a position have a personal, confidential staff relationship to the President and are not required to testify be altered. When the President seeks and receives advice from his assistants, both must have the assurance that their communications with each other will remain confidential. The conference committee specifically rejected a proposition that the Executive Director be required to testify. It also rejected a proposal that such an understanding be included in the statement of managers. This does not mean however, that the Council may operate without keeping the Congress fully informed of its activities.

The legislation specifically requires that the appropriate congressional committees be kept "fully and currently informed regarding the activities of the Council." Furthermore, this is a specific responsibility of the Executive Director of the Council.

I have been assured that the Executive Director will make himself available for informal meetings and briefings with members and committees of the Congress. Beyond that, of course, there are additional ways to keep the Congress appropriately informed. The annual report by the President on international economic matters which is required by the legislation, is one of those ways. In addition, those members of the Council who are heads of departments such as the Secretaries of State, Treasury, Agriculture, and Commerce will of course be available for testimony before various congressional committees.

On most matters of international economic policy, congressional action is necessary to effectuate policy, either by ratification of treaties, enactment of substantive legislation, by appropriation of funds, or extension of Presidential authority. There can be little doubt that the Congress will receive the information it needs from the Executive Director in order to carry out its responsibilities.

Equally as important as the need for the executive branch to cooperate with the Congress in order to obtain congressional cooperation for its recommendations is the congressional control retained in this legislation by providing a statutory life only until June 30 of next year. Assuming that this legislation is approved by the Congress this week and that it is accepted by the President, it is still necessary to obtain appropriations to fund the Council. By the time funding is received and the Council is staffed and becomes operative, its authorized life will be only several months. During that period, because of the Executive Branch's strong desire to have such a Council in order to properly coordinate international economic policies and realizing that if satisfactory cooperation is not forthcoming the Congress will likely not act to extend the life of the Council, I believe that we can expect the greatest effort on the part of the Executive Director to provide all of the information possible to the interested committees and Members of the Congress.

Mr. President, I look forward to good cooperation and a satisfactory relationship between the Congress and the Council. I believe that on such a basis, the Council can fulfill an important function for both the executive branch and for the Congress, and that the result will be better coordination in the development of international economic policy and better coordination of domestic and foreign economic policies.

I recommend that the Senate accept the conference report.

Mr. MONDALE. I thank the distinguished Senator from Utah for his support of this measure, and for his assistance in the consideration of the conference report now before the Senate.

Mr. President, I move the adoption of the conference report.

The PRESIDING OFFICER. The question is on agreeing to the conference report.

The report was agreed to.

DISTRICT OF COLUMBIA POLICE AND FIREMEN'S SALARY ACT—CONFERENCE REPORT

Mr. EAGLETON. Mr. President, I submit a report of the committee of conference on H.R. 15580, and ask for its immediate consideration.

The PRESIDING OFFICER (Mr. TAFT). The report will be stated by title.

The assistant legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 15580) to amend the District of Columbia Police and Firemen's Salary Act of 1958 to increase salaries, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by all the conferees.

The PRESIDING OFFICER. Is there objection to the consideration of the conference report?

There being no objection, the Senate proceeded to consider the report, which reads as follows:

CONFERENCE REPORT

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 15580) to amend the District of Columbia Police and Firemen's Salary Act of 1958 to increase salaries, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendment of the Senate and agree to the same with an amendment as follows:

In lieu of the matter proposed to be inserted by the Senate amendment insert the following:

TITLE I—AMENDMENTS TO DISTRICT OF COLUMBIA POLICE AND FIREMEN'S SALARY ACTS

SEC. 101. The salary schedule contained in section 101 of the District of Columbia Police and Firemen's Salary Act of 1958 (D.C. Code, sec. 4–823) is amended to read as follows:

"SALARY SCHEDULE

"Salary class and title	Service step— 1	2	3	4	5	6	7	8	9
Class 1: Fire private, police private	$10,000	$10,300	$10,800	$11,300	$12,100	$12,900	$12,400	$13,900	$14,400
Class 2: Fire inspector	11,400	12,100	12,800	13,500	14,300	14,900	15,600		
Class 3: Detective, assistant pilot, assistant marine engineer	12,500	13,125	13,750	14,375	15,000	15,625	16,250		
Class 4: Fire sergeant, police sergeant, detective sergeant	13,580	14,260	14,940	15,620	16,300	16,980			
Class 5: Fire lieutenant, police lieutenant	15,700	16,485	17,270	18,055	18,840				
Class 6: Marine engineer, pilot	17,150	18,005	18,860	19,715					
Class 7: Fire captain, police captain	18,600	19,530	20,480	21,390					
Class 8: Battalion fire chief, police inspector	21,560	22,640	23,720	24,800					
Class 9: Deputy fire chief, deputy chief of police	25,300	27,015	28,730	30,445					
Class 10: Assistant chief of police, assistant fire chief, commanding officer of the executive protective service, commanding officer of the U.S. Park Police	30,000	32,000	34,000						
Class 11: Fire chief, chief of police	34,700	36,800							"

SEC. 102. Section 101 of the District of Columbia Police and Firemen's Salary Act of 1958 (D.C. Code, sec. 4–823) is amended (1) by striking out "The" and inserting in lieu thereof "(a) Except as provided in subsection (b), the", and (2) by inserting after the salary schedule in that section the following:

"(b) Compensation may not be paid, by reason of any provision of this Act, at a rate in excess of the rate of basic pay for level V of the Executive Schedule contained in subchapter II of chapter 53 of title 5, United States Code."

SEC. 103. Section 201 of the District of Columbia Police and Firemen's Salary Act of 1958 (D.C. Code, sec. 4–824) is amended to read as follows:

"SEC. 201. The rates of basic compensation of officers and members in active service on the effective date of the District of Columbia Police and Firemen's Salary Act Amendments of 1972 shall be adjusted as follows:

"(1) Each officer or member receiving basic compensation immediately prior to such effective date at one of the scheduled service step rates of subclass (a) or (b) of salary class 1 in the salary schedule in effect on the day next preceding such effective date shall be placed in and receive basic compensation in salary class 1 in the salary schedule in effect on and after such date, and each such officer or member shall be placed at the respective service step in which he was serving immediately prior to such date. Each officer or member receiving basic compensation immediately prior to such date at one of the scheduled longevity step rates of subclass (a) or (b) of salary class 1 in the salary schedule in effect on the day next preceding such effective date shall be placed in and receive basic compensation in salary class 1 in the salary schedule in effect on and after such date, and each such officer or member shall be placed in a service step as follows:

"From—	To—
Class 1, subclass (a) or (b):	Class 1:
Longevity step A	Service step 7.
Longevity step B	Service step 8.
Longevity step C	Service step 9.

"(2) Each officer or member receiving basic compensation immediately prior to such effective date at one of the scheduled service step rates of subclass (a) or (b) of salary class 2 in the salary schedule in effect on the day next preceding such effective date shall be placed in and receive basic compensation in salary class 2 in the salary schedule in effect on and after such date, and each shall be placed at the respective service step in which he was serving immediately prior to such date. Each officer or member receiving basic compensation immediately prior to such date at one of the scheduled longevity step rates of subclass (a) or (b) of salary class 2 in the salary schedule in effect on the day next preceding such effective date shall be placed in and receive basic compensation in salary class 2 in the salary schedule in effect on and after such date, and each such officer or member shall be placed in a service step as follows:

"From—	To—
Class 2, subclass (a) or (b):	Class 2:
Longevity step A	Service step 5.
Longevity step B	Service step 6.
Longevity step C	Service step 7.

"(3) Each officer or member receiving basic compensation immediately prior to such effective date at one of the scheduled service step rates of salary class 3, 5, 6, 7, 8, or 9 in the salary schedule in effect on the day next preceding such effective date shall receive a rate of basic compensation at the corresponding scheduled service step and salary class in the salary schedule in effect on and after such date. Each officer or member receiving basic compensation immediately prior to such date at one of the scheduled longevity step rates of salary class 3, 5, 6, 7, 8, or 9 in the salary schedule in effect on the day next preceding such effective date shall receive basic compensation at the corresponding salary class in the salary schedule in effect on and after such date, and each shall be placed in a service step as follows:

"From—	To—
Class 3:	Class 3:
Longevity step A	Service step 5.
Longevity step B	Service step 6.
Longevity step C	Service step 7.

"From—	To—
Class 5:	Class 5:
Longevity steps A and B	Service step 5.

"From—	To—
Class 6, 7, 8, or 9:	Class 6, 7, 8, or 9:
Longevity steps A and B	Service step 4.

"(4) Each officer or member receiving basic compensation immediately prior to such effective date at one of the scheduled service step rates of subclass (a), (b), or (c) of salary class 4 in the salary schedule in effect on the day next preceding such effective date shall be placed in and receive basic compensation in salary class 4 in the salary schedule in effect on or after such date, and each shall be placed at the respective service step in which he was serving immediately prior to such date. Each officer or member receiving basic compensation immediately prior to such date at one of the scheduled longevity step rates of subclass (a), (b), or (c) of salary class 4 in the salary schedule in effect on the day next preceding such effective date shall be placed in and receive basic compensation in salary class 4 in the salary schedule in effect on and after such date, and each shall be placed in a service step as follows:

"From—	To—
Class 4, subclass (a), (b), or (c):	Class 4:
Longevity step A	Service step 5.
Longevity steps B and C	Service step 6.

"(5) Each officer or member receiving basic compensation immediately prior to such effective date at one of the scheduled service step rates of salary class 10 or 11 in the salary schedule in effect on the day next preceding such effective date shall receive a rate of basic compensation at the corresponding scheduled service step and salary class in the salary schedule in effect on and after such date, except that any such officer or member who immediately prior to such date was serving in service step 4 of salary class 10 or in service step 3 of salary class 11 shall be placed in and receive basic compensation in a service step as follows:

"From—	To—
Class 10:	Class 10:
Service step 4	Service step 3.

"From—	To—
Class 11:	Class 11:
Service step 3	Service step 2."

SEC. 104. Section 202 of the District of Columbia Police and Firemen's Salary Act of 1958 (D.C. Code, sec. 4–825) is amended to read as follows:

"SEC. 202. Each officer or member of the Metropolitan Police force, Executive Protective Service, and United States Park Police force assigned on or after the effective date of the District of Columbia Police and Firemen's Salary Act Amendments of 1972—

"(1) to perform the duty of a helicopter pilot, or

"(2) to render explosive devices ineffective or to otherwise dispose of such devices,

shall receive, in addition to his scheduled rate of basic compensation, $2,100 per annum so long as he remains in such assignment. The additional compensation authorized by this section shall be paid to an officer or member in the same manner as he is paid the basic compensation to which he is entitled. No officer or member who receives the additional compensation authorized by this section may receive additional compensation under section 302."

SEC. 105. (a) Section 203 of the District of Columbia Police and Firemen's Salary Act of 1958 (D.C. Code, sec. 4–826) is amended to read as follows:

"SEC. 203. The aide to the Fire Marshal shall be included as a Fire Inspector in salary class 2."

(b) Section 204 of the District of Columbia Police and Firemen's Salary Act of 1958 (D.C. Code sec. 4–826a) is repealed.

SEC. 106. Section 302 of the District of Columbia Police and Firemen's Salary Act of 1958 (D.C. Code. sec. 4–828) is amended to read as follows:

"SEC. 302. (a) The Commissioner of the District of Columbia, in the case of the Metropolitan Police force and the Fire Department of the District of Columbia, the Secretary of the Treasury, in the case of the Executive Protective Service, and the Secretary of the Interior, in the case of the United States Park Police force, are authorized to establish and determine, from time to time, the positions in salary classes 1, 2, and 4 to be included as technicians' positions.

"(b) Each officer or member—

"(1) who immediately prior to the effective date of the District of Columbia Police and Firemen's Salary Act Amendments of 1972—

"(A) was in a position assigned to subclass (b) of salary class 1 or 2 or subclass (c) of salary class 4, or

"(B) was in salary class 4 and was performing the duty of a dog handler, or

"(2) whose position is determined under subsection (a) to be included in salary class 1, 2, or 4 on or after such date as a technician's position,

shall on or after such date receive, in addition to his scheduled rate of basic compensation, $680 per annum. An officer or member described in paragraph (1)(A) or (2) shall receive the additional compensation authorized by this subsection until his position is determined under subsection (a) not to be included in salary class 1, 2, or 4 as a technician's position or until he no longer occupies such position, whichever occurs first. An officer or member described in paragraph (1)(B) shall receive such compensation so long as he performs the duty of a dog handler. If the position of dog handler is included under subsection (a) as a technician's position, an officer or member performing the duty of a dog handler may not receive both the additional compensation authorized for an officer or member occupying a technician's position and the additional compensation authorized for officers and members performing the duty of a dog handler.

"(c) Each officer or member who immediately prior to the effective date of the District of Columbia Police and Firemen's Salary Act Amendments of 1972 was assigned as a detective sergeant in subclass (b) of salary class 4 shall on or after such date, receive, in addition to his scheduled rate of basic compensation, $500 per annum so long as he remains in such assignment. Each officer or member who is promoted after such date to the rank of detective sergeant shall receive, in addition to his scheduled rate of basic compensation, $500 per annum so long as he remains in such assignment.

"(d) The additional compensation authorized by subsections (b) and (c) shall be paid to an officer or member in the same manner as he is paid the basic compensation to which he is entitled."

SEC. 107. Section 303 of the District of Columbia Police and Firemen's Salary Act of 1958 (D.C. Code, sec. 4–829) is amended to read as follows:

"SEC. 303. (a) Each officer and member, if he has a current performance rating of 'satisfactory' or better, shall have his service step adjusted in the following manner:

"(1) Each officer and member in service step 1, 2, or 3 of salary class 1 shall be advanced in compensation successively to the next higher service step at the beginning of the first pay period immediately subsequent to the completion of fifty-two calendar weeks of active service in his service step.

"(2) Each officer and member in service step 4 or 5 of salary class 1 shall be advanced in compensation successively to the next higher service step at the beginning of the first pay period immediately subsequent to the completion of one hundred and four calendar weeks of active service in his service step.

"(3) Each officer and member in service step 6, 7, or 8 of salary class 1 shall be advanced in compensation successively to the next higher service step at the beginning of the first pay period immediately subsequent to the completion of one hundred and fifty-six calendar weeks of active service in his service step.

"(4) Each officer and member in salary classes 2 through 11 who has not attained the maximum service step rate of compensation for the rank or title in which he is placed shall be advanced in compensation successively to the next higher service step rate for such rank or title at the beginning of the first pay period immediately subsequent to the completion of one hundred and four calendar weeks of active service in his service step, except that in the case of an officer or member in service step 4, 5, or 6 of salary class 2 or 3, service step 4 or 5 of salary class 4, and service step 4 of salary class 5, such officer or member shall be advanced successively to the next higher service step at the beginning of the first pay period immediately subsequent to the completion of the one hundred and fifty-six calendar weeks of active service in his service step.

"(b) As used in this title, the term 'calendar week of active service' includes all periods of leave with pay, and periods of nonpay status which do not cumulatively equal one basic workweek."

SEC. 108. Section 304 of the District of Columbia Police and Firemen's Salary Act of 1958 (D.C. Code, sec. 4–830) is amended to read as follows:

"SEC. 304. (a) Except as otherwise provided in subsection (b) of this section, any officer or member who is promoted or transferred to a higher salary class shall receive basic compensation at the lowest scheduled rate of such higher salary class which exceeds his existing scheduled rate of basic compensation by not less than one step increase of the next higher step of the salary class from which he is promoted or transferred.

"(b) Any officer or member receiving additional compensation as provided in section 302 of this Act who is promoted or transferred to a higher salary class shall receive basic compensation at the lowest scheduled rate of such higher class which exceeds his existing scheduled rate of basic compensation by at least the sum of one step increase of the next higher step of the salary class from which he is promoted or transferred and the amount of such additional compensation."

Sec. 109. Section 305 of the District of Columbia Police and Firemen's Salary Act of 1958 (D.C. Code, sec. 4–831) is amended by (1) striking out "Commissioners" and inserting in lieu thereof "Commissioner", and (2) striking out "or Subclass" immediately after "Class".

Sec. 110. Section 401 of the District of Columbia Police and Firemen's Salary Act of 1958 (D.C. Code, sec. 4–832) is amended to read as follows:

"Sec. 401. (a) (1) In recognition of long and faithful service, each officer and member in the active service on or after the effective date of the District of Columbia Police and Firemen's Salary Act Amendments of 1972 shall receive per annum, in addition to the rate of basic compensation prescribed in the salary schedule contained in section 101 of this Act, an amount computed in accordance with the following table:

"If an officer or member has completed at least:	He shall receive per annum an amount, fixed to the nearest dollar, equal to:
15 years of continuous service	5 per centum of the rate basic compensation prescribed for service step 1 of the salary class of such salary schedule which he occupies.
20 years of continuous service	10 per centum of such compensation.
25 years of continuous service	15 per centum of such compensation.
30 years of continuous service	20 per centum of such compensation.

"(2) For purposes of paragraph (1), continuous service as an officer or member includes any period of his service in the Armed Forces of the United States other than any period of such service (A) determined not to have been satisfactory service, (B) rendered before appointment as an officer or member, or (C) rendered after resignation as an officer or member.

"(3) Each officer and member shall receive additional compensation in accordance with paragraph (1) only as long as he remains in the active service. Such compensation shall be paid in the same manner as the basic compensation to which such officer or member is entitled, except that it shall not be subject to deduction and withholding for retirement and insurance, and shall not be considered as salary for the purpose of computing annuities pursuant to the Policemen and Firemen's Retirement and Disability Act and for the purpose of computing insurance coverage under the provisions of chapter 87 of title 5, United States Code.

"(b) Notwithstanding any other provision of this or any other law, individuals retired from active service prior to the effective date of the District of Columbia Police and Firemen's Salary Act Amendments of 1972, and who are entitled to receive a pension relief allowance or retirement compensation under the Policemen and Firemen's Retirement and Disability Act, shall not be entitled to receive an increase in their pension relief allowance or retirement compensation by reason of the enactment of this section.

"(c) Notwithstanding any other provision of this or any other law, each deputy chief of the Metropolitan Police force and of the Fire Department of the District of Columbia shall, upon completion of thirty years of continuous service on the police force or fire department, as the case may be, be placed in, and receive basic compensation at, the highest service step in the salary class to which his position is assigned in the salary schedule contained in section 101. For purposes of this subsection, in computing a deputy chief's continuous service on the police force or fire department, there shall be included any period of his service in the Armed Forces of the United States other than any period of such service—

"(1) determined not to have been satisfactory service,

"(2) rendered before appointment as an officer or member, or

"(3) rendered after resignation as an officer or member."

Sec. 111. Section 501 of the District of Columbia Police and Firemen's Salary Act od 1958 (D.C. Code, sec. 4–833) is amended by (1) adding "and the Executive Protective Service" immediately after "United States Park Police", and (2) striking out "or Sub-Classes" at the end of such section.

Sec. 112. The act approved May 25, 1926 (D.C. Code, sec. 4–131), is amended (1) by inserting "(a)" immediately after "That", and (2) by adding at the end thereof the following new subsection:

"(b) The Chief of Police of the Metropolitan Police force, the Commanding Officer of the Executive Protective Service, and the Commanding Officer of the United States Park Police force, are each authorized to provide a clothing allowance, not to exceed $300 in any one year, to an officer or member assigned to perform duties in 'plainclothes'. Such clothing allowance is not to be treated as part of the officer's or member's basic compensation and shall not be used for the purpose of computing his overtime, promotions, or retirement benefits. Such allowance for any officer or member may be discontinued at any time upon written notification by the authorizing official."

Sec. 113. Subsection (h) of the first section of the Act approved August 15, 1950 (D.C. Code, sec. 4–904(h)), is amended by striking out "class 1C" wherever it appears therein and inserting in lieu thereof "the salary class applicable to the Fire Chief and Chief of Police".

Sec. 114. Section 301 of the District of Columbia Police and Firemen's Salary Act of 1953 (D.C. Code, sec. 4–518) is amended—

(1) by striking out "Such" in the second sentence and inserting in lieu thereof "Except as otherwise provided in this section, such";

(2) by striking out the third sentence;

(3) by inserting "(a)" immediately after "Sec. 301." and by adding the following at the end thereof:

"(b) The increase prescribed by subsection (a) of this section in the pension relief allowance or retirement compensation received by an individual retired from active service before the effective date of the District of Columbia Police and Firemen's Salary Act Amendments of 1972 under the Policemen and Firemen's Retirement and Disability Act as a result of the increase in salary provided by the District of Columbia Police and Firemen's Salary Act Amendments of 1972 shall not be less than 17 per centum of such allowance or compensation.

"(c) Each individual retired from active service and entitled to receive a pension relief allowance or retirement compensation under the Policemen and Firemen's Retirement and Disability Act shall be entitled to receive, without making application therefor, with respect to each increase in salary, granted by any law which takes effect after the effective date of the District of Columbia Police and Firemen's Salary Act Amendments of 1972, to which he would be entitled if he were in active service, an increase in his pension relief allowance or retirement compensation computed as follows: His pension relief allowance or retirement compensation shall be increased by an amount equal to the product of such allowance or compensation and the per centum increase made by such law in the scheduled rate of compensation to which he would be entitled if he were in active service on the effective date of such increase in salary.

"(d) Each increase in pension relief allowance or retirement compensation made under this section because of an increase in salary shall take effect as of the first day of the first month following the effective date of such increase in salary."

Sec. 115. (a) Section 2 of the Act of September 8, 1960 (D.C. Code, sec. 4–823b) is repealed.

(b) Section 2 of the Act of October 24, 1962 (D.C. Code, sec. 4–823c) is repealed.

(c) Section 102 of the Act of September 2, 1964 (D.C. Code, sec. 4–823d) is repealed.

(d) Section 102 of the District of Columbia Policemen and Firemen's Salary Act Amendments of 1966 (D.C. Code, sec. 4–823d–1) is repealed.

(e) Section 2 of the District of Columbia Police and Firemen's Salary Act Amendments of 1968 (D.C. Code, sec. 4–823d–2) is repealed.

(f) Section 103 of the District of Columbia Police and Firemen's Salary Act Amendments of 1970 (D.C. Code, sec. 4–823d–3) is repealed.

Sec. 116. (a) Retroactive compensation or salary shall be paid by reason of the amendments made by this title only in the case of an individual in the service of the District of Columbia government or of the United States (including service in the Armed Forces of the United States) on the date of enactment of this Act, except that such retroactive compensation or salary shall be paid (1) to an officer or member of the Metropolitan Police force, the Fire Department of the District of Columbia, the United States Park Police force, or the Executive Protective Service, who retired during the period beginning on the first day of the first pay period which begins on or after May 1, 1972, and ending on the date of enactment of this Act for services rendered during such period, and (2) in accordance with the provisions of subchapter 8 of chapter 55 of title 5, United States Code (relating to settlement of accounts of deceased employees), for services rendered during the period beginning on the first day of the first pay period which begins on or after May 1, 1972, and ending on the date of enactment of this Act, by an officer or member who dies during such period.

(b) For the purposes of this section, service in the Armed Forces of the United States, in the case of an individual relieved from training and service in the Armed Forces of the United States or discharged from hospitalization following such training and service, shall include the period provided by law for the mandatory restoration of such individual to a position in or under the Federal Government or the municipal government of the District of Columbia.

(c) For the purpose of determining the amount of insurance for which an officer or member is eligible under the provisions of chapter 87 of title 5, United States Code (relating to government employees group life insurance), all changes in rates of compensation or salary which result from the enactment of this title shall be held and considered to be effective as of the date of enactment of this Act.

Sec. 117. (a) If an officer or member of the Metropolitan Police Force, the Fire Department of the District of Columbia, the Executive Protective Service, or the United States Park Police force engages in educational course work in police or fire science or administration and if he is eligible for payments or reimbursements under section 4109(a) (2) (C) of title 5 of the United States Code for tuition expenses for such course work, the Commissioner of the District of Columbia, the Secretary of the Treasury, and the Secretary of the Interior shall, in accordance with such section 4109(a)(2)(C), pay or reimburse each such officer and member under their jurisdiction for all his tuition expenses for such course work.

(b) Subsection (a) of this section shall take effect on the date of enactment of this Act.

SEC. 118. Except as provided in section 117 (b), the effective date of this title and the amendments made by this title shall be the first day of the first pay period beginning on or after May 1, 1972.

SEC. 119. This title may be cited as the "District of Columbia Police and Firemen's Salary Act Amendments of 1972".

TITLE II—POLICEMEN AND FIREMEN'S RETIREMENT AND DISABILITY ACT AMENDMENTS

SEC. 201. (a) The Policemen and Firemen's Retirement and Disability Act (section 12 of the Act of September 1, 1916, D.C. Code, sec. 4–521 et seq.) is amended as follows:

(1) Subparagraph (5)(B) of subsection (a) of such Act (D.C. Code, sec. 4–521) is amended by striking out "or" immediately after "residence".

(2) Paragraph (5) of subsection (c) of such Act (D.C. Code, sec. 4–523) is amended by adding at the end thereof the following new sentence: "No deposit shall be required for days of unused sick leave credited under subsection (h) of this section.".

(3) Subsection (h) of such Act (D.C. Code, sec. 4–528) is amended by adding at the end thereof the following new paragraph:

"(4) In computing an annuity under this subsection, the police or fire service of a member who has not retired prior to the effective date of this paragraph shall include, without regard to the limitation imposed by paragraph (3) of this subsection, the days of unused sick leave credited to him. Days of unused sick leave shall not be counted in determining a member's eligibility for an annuity under this subsection."

(4) The first paragraph of subsection (k) of such Act (D.C. Code, sec. 4–531) is amended to read as follows:

"(k)(1) If any member—

"(A) dies in the performance of duty and the Commissioner determines that (i) the member's death was the sole and direct result of a personal injury sustained while performing such duty, (ii) his death was not caused by his willful misconduct or by his intention to bring about his own death, and (iii) intoxication of the member was not the proximate cause of his death; and

"(B) is survived by a survivor, parent, or sibling, a lump sum payment of $50,000 shall be made to his survivor if the survivor received more than one-half of his support from such member or if such member is not survived by any survivor (including a survivor who did not receive more than one-half of his support from such member) to his parent or sibling if the parent or sibling received more than one-half of his support from such member. If such member is survived by more than one survivor entitled to receive such payment, each such survivor shall be entitled to receive an equal share of such payment; or if such member leaves no survivor and more than one parent or sibling who is entitled to receive such payment, each such parent or sibling shall be entitled to receive an equal share of such payment."

(b) The amendments made by paragraphs (1) and (4) of subsection (a) of this section shall be effective on and after November 1, 1970. The amendments made by paragraphs (2) and (3) of such subsection shall be effective on the first day of the first pay period beginning on or after the date of enactment of this title.

SEC. 202. (a) Section 3 of the Act of July 11, 1947 (D.C. Code, sec. 4–183a), is amended by striking out "on the effective date of this section".

(b) Section 4 of such Act (D.C. Code, sec. 4–183b) is amended by striking out "on September 22, 1959".

(c) The amendments made by this section shall take effect on the date of the enactment of this Act.

SEC. 203. (a) Subsection (m) of the Policemen and Firemen's Retirement and Disability Act (D.C. Code, sec. 4–533) is amended by inserting "(1)" after "(m)" and by adding at the end thereof the following:

"(2) If a member is retired under subsection (f) or (g) of this section and is employed on or after the effective date of the District of Columbia Police and Firemen's Salary Act Amendments of 1972, such member shall, in accordance with such regulations as the Commissioner shall prescribe, notify the Commissioner of the employment; and the Commissioner shall, as soon as practicable after the receipt of such notice, require each such member to undergo a medical examination (satisfactory to the Commissioner) of the disability upon which the member's retirement under such subsection is based."

(b) The Commissioner of the District of Columbia shall (1) promulgate the regulations required by paragraph (2) of subsection (m) of the Policemen and Firemen's Retirement and Disability Act not later than ninety days after the date of the enactment of this Act, and (2) give timely written notice to each member retired under subsection (f) or (g) of the Policemen and Firemen's Retirement and Disability Act of the promulgation of such regulations.

(c) This section shall take effect on the date of the enactment of this Act.

TITLE III—REVENUE FOR SALARY INCREASES

SEC. 301. (a)(1) Section 125 of the District of Columbia Sales Tax Act (D.C. Code, sec. 47–2602) is amended by striking out "4 per centum" in the matter preceding paragraph (1) and inserting in lieu thereof "5 per centum".

(2) Paragraphs (2) and (3) of such section 125 are each amended by striking out "5 per centum" and inserting in lieu thereof "6 per centum".

(3)(A) Paragraph (a) of section 127 of such Act (D.C. Code, sec. 47–2604(a)) is amended by striking out "and other than sales or charges for rooms, lodgings, or accommodations furnished to transients,".

(B) Paragraph (c) of such section is repealed.

(C) Paragraphs (a) and (b) of such section are redesignated as paragraphs (1) and (2), respectively.

(b)(1) Section 212 of the District of Columbia Use Tax Act (D.C. Code, sec. 47–2702) is amended by striking out "4 per centum" in the matter preceding paragraph (1) and inserting in lieu thereof "5 per centum".

(2) Paragraphs (2) and (3) of such section 212 are each amended by striking out "5 per centum" and inserting in lieu thereof "6 per centum".

(c) The amendments made by this section shall take effect on the first day of the first month which begins on or after the thirtieth day after the date of enactment of this Act.

And the Senate agree to the same.

THOMAS F. EAGLETON,
DANIEL K. INOUYE,
CHARLES McC. MATHIAS, Jr.,
Managers on the Part of the Senate.

JOHN L. McMILLAN,
EARLE CABELL,
W. S. (BILL) STUCKEY, Jr.,
ANCHER NELSEN,
JOEL T. BROYHILL,
Managers on the Part of the House.

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and the Senate at the Conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 15580) to amend the District of Columbia Police and Firemen's Salary Act of 1958 to increase salaries, and for other purposes, submit the following joint statement to the House and the Senate in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report:

RETROACTIVITY

Section 118 of the Senate amendment provided that salary increases will be effective beginning with the first pay period beginning on or after March 1, 1972. Section 117 of the House bill provided that salary increases will be effective beginning with the first pay period beginning on or after July 1, 1972. The conference substitute provides that salary increases will be effective beginning with the first pay period beginning on or after May 1, 1972.

LONGEVITY COMPENSATION IN COMPUTATION OF RETIREMENT ANNUITIES

Section 110 of the Senate amendment provided that total service longevity compensation would be included in the computation of the amount of the retirement annuity of an officer or member. Section 110 of the House bill provided that such compensation would not be included in computing the retirement annuity of an officer or member. The conference substitute adopts the House provision.

DEPUTY CHIEFS

Section 110 of the House bill retained the provision of existing law which provides that deputy chiefs with 30 years of continuous service shall be placed in, and receive basic compensation at, the highest step in the salary class to which the position of deputy chief is assigned. Section 110 of the Senate amendment repealed this provision of law. The conference substitute adopts the House provision.

EDUCATIONAL SUBSIDIES

Section 113 of the Senate amendment authorized the Commissioner of the District of Columbia in the case of the Metropolitan Police force and the Fire Department of the District of Columbia, the Secretary of the Treasury, in the case of the Executive Protective Service, and the Secretary of the Interior, in the case of the United States Park Police force, to pay additional compensation for successful completion by an officer or member of educational course work leading to a degree in police or fire science or administration. The additional annual compensation would be $200 for each 15 credit hours completed, except that such compensation could not exceed $1,600. The House bill contained no such provision. The conference substitute provides that if an officer or member is eligible to receive payment or reimbursement under section 4109 of title 5, United States Code, for his tuition expenses for educational course work in police or fire science or administration, such payment or reimbursement shall be increased to cover all such officer's or member's tuition expenses. Currently, 90 per centum of such tuition expenses are covered under section 4109.

SALARY USED IN COMPUTATION OF RETIREMENT ANNUITY

Section 201 of the House bill provided that the retirement annuity of officers and members who first came on active duty after July 9, 1972, would be based on the highest annual rate resulting from averaging his basic salary for any three years of continuous service. The retirement annuity of officers and members on active duty on July 9, 1972, would be based on the higher of (1) a three-year average of his salary, or (2) his pre-July 9, 1972, salary increased by 17 percent. The Senate amendment contained no such provision thus retaining existing law which provides that the retirement annuity of an officer or member is to be based on the basic salary of the officer or member in effect on the date of his retirement. The conference substitute adopts the Senate position, retaining existing law.

The conferees further agreed that the Commissioner of the District of Columbia should conduct a full and complete study of the feasibility and cost of, and the effect on morale of the officers and members as a result of, adopting a system of computing retirement annuities using a three-year average salary rate (as provided in the House bill). The conferees agreed that the results of the study should include the views and opinions of the Secretary of the Interior and the Secretary of the Treasury, and should be transmitted to the Congress within six months after the date of the enactment of the bill.

MEDICAL EXAMINATIONS FOR OFFICERS AND MEMBERS RETIRED FOR DISABILITY

Section 202 of the House bill provided that an officer or member who is retired for a disability and who on or after July 9, 1972, is employed shall notify the Commissioner of his employment and shall undergo such medical examination of his disability as the Commissioner may prescribe. The Senate amendment contained no such provision. The conference substitute adopts the House provision.

TREATMENT OF UNUSED SICK LEAVE

Sections 201(a) (2) and (3) of the Senate amendment authorized unused sick leave to be used in determining the amount of and optional retirement annuity of an officer or member. It was also provided that the days of unused sick leave shall not be counted in determining eligibility for an optional retirement annuity. The House bill contained no such provisions. The conference substitute adopts the Senate provisions.

SURVIVORS LUMP SUM BENEFIT

Section 201(a)(4) of the Senate amendment expanded eligibility for the $50,000 lump sum benefit payable upon the death of a member in the performance of duty to include a deceased member's parents and siblings who received more than one-half of their support from the deceased member. A parent or sibling would be eligible only if the deceased member is not survived by a spouse or child. The House bill contained no such provision. Existing law provides that only the spouse and the children who received more than one-half of their support from the deceased member are entitled to such benefit. The conference substitute adopts the Senate provision which is to take effect as of November 1, 1970.

RETIREMENT ANNUITY OF POLICE BAND DIRECTOR

Section 202 of the Senate amendment permitted the current police band director and his successors to retire under provisions of District of Columbia law which previously were limited to the band director in office in September of 1959. The House bill contained no such provision. The conference substitute adopts the Senate provision.

SALES TAX INCREASE

Section 302 of the Senate amendment increased the rate of the sales and use tax on laundry and dry cleaning services, sales of nonprescription drugs, and charges for textiles rentals from 2 percent to 5 percent. The House bill contained no such provisions. The conference substitute contains no such provisions.

INCREASE IN CIGARETTE TAX

Section 311 of the Senate amendment increased the tax on cigarettes from 4¢ per package to 6¢ per package. The House bill contained no such provison. The conference substitute contains no such provision.

THOMAS F. EAGLETON,
DANIEL K. INOUYE,
CHARLES McC. MATHIAS, Jr.,
Managers on the Part of the Senate.
JOHN L. McMILLAN,
EARLE CABELL,
W. S. (BILL) STUCKEY, Jr.,
ANCHER NELSEN,
JOEL T. BROYHILL,
Managers on the Part of the House.

Mr. EAGLETON. Mr. President, I ask unanimous consent that the printing of the conference report as a Senate report be waived.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. EAGLETON. I move the adoption of the conference report.

The PRESIDING OFFICER. The question is on agreeing to the conference report.

The report was agreed to.

QUORUM CALL

The PRESIDING OFFICER. What is the will of the Senate?

Mr. EAGLETON. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. FULBRIGHT. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

INTERIM AGREEMENT ON LIMITATION OF STRATEGIC OFFENSIVE WEAPONS

The Senate resumed the consideration of the joint resolution (S.J. Res. 241) authorizing the President to approve an interim agreement between the United States and the Union of Soviet Socialist Republics.

Mr. FULBRIGHT. Mr. President, I was just called out of the Chamber by members of the press who asked me to comment upon a statement made by the junior Senator from Washington. I cannot quote him exactly, but members of the press told me they have a tape recording of what he did say. But the purport of the Senator's statement was that he has evidence that in the course of the Administration's negotiations for the interim agreement which is now under consideration, the Russians lied to the President of the United States and, I assume, to the negotiators. I believe the press said it was to the President, with regard to the number of missile submarines, particularly the Y-class submarines, which I understand is the most modern of their submarines; that the Russians said they had under construction or in being 48; whereas, they only had 42.

It is, of course, a serious charge that a country has lied on a matter of this kind. I am not quite sure how significant it would have been in the final assessment as to what the overall mix would have been. But, in any case, I assume by the nature of press questions that they think this is a most serious charge. It raises very serious questions about the purposes of the junior Senator from Washington, whether he really is out to sabotage the approval of the interim agreement. I, of course, reserve judgment on that. I think that his proposal is inconsistent with a desire to go forward in SALT II.

But to make charges such as this reminds me somewhat of the effect of the U–2 incident on the Eisenhower conference with Khrushchev in Paris and the planned trip of President Eisenhower to Russia. It is always a source of great regret on my part that President Eisenhower did not go to Russia and did not make progress with Chairman Khrushchev in bringing about a detente with Russia at that time. I have often thought that we missed a great opportunity at that time to improve our relations. But now, for a second time, we appear to be on the road to improving our relations and I do not want to lose that road.

A few minutes ago, I read a press account of Mr. Peterson's highly optimistic report with regard to trade with Russia. I subscribe wholeheartedly to the need and his optimism. It would be a great tragedy if charges of the kind I have mentioned stir up the latent chauvinism and distrust of Russia to the point where the forward movement in the arms limitation agreements is stopped or diverted.

I shall ask the staff of the Committee on Foreign Relations to get in touch with the Central Intelligence Agency and ask them whether they have evidence of the charge made by the Senator from Washington.

Of course, I would hope that the President of the United States would take the occasion to clarify this situation—either explain it, deny it, or reconcile it. I do not know what he can do with it. He is in a position to know. I, obviously, am not in a position to say whether it is true or untrue. But the Committee on Foreign Relations will undertake to check on this report at the earliest opportunity.

MESSAGE FROM THE HOUSE

A message from the House of Representatives by Mr. Berry, one of its reading clerks, announced that the House had passed, without amendment, the following bills of the Senate:

S. 559. An act for the relief of Albina Lucio Z. Manlucu;

S. 889. An act to restore the postal service seniority of Elmer Erickson; and

S. 2704. An act for the relief of Rita Rosella Valleriani.

The message also announced that the House had agreed to the amendment of the Senate to the bill (H.R. 10676) for the relief of Lester L. Stiteler.

ENROLLED BILL PRESENTED

The Secretary of the Senate reported that today, August 15, 1972, he presented to the President of the United States the enrolled bill (S. 596) to require that international agreements other than treaties, hereafter entered into by the United States, be transmitted to the Congress within 60 days after the execution thereof.

SELECT COMMITTEE TO STUDY SECRET AND CONFIDENTIAL GOVERNMENT DOCUMENTS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar No. 974, S. Res. 299.

The PRESIDING OFFICER (Mr. TAFT). The resolution will be stated by title.

The legislative clerk read as follows:

A resolution (S. Res. 299) to establish a Select Committee to study questions related to secret and confidential government documents.

The PRESIDING OFFICER. Is there objection to the present consideration of the resolution?

There being no objection, the Senate proceeded to consider the resolution.

Mr. JAVITS. Mr. President, this measure was passed on the consent calendar last Friday, and at my request the action taken on it was vacated because the Senator from Nebraska (Mr. HRUSKA) wished to introduce a statement—I consider it a very important statement—respecting this measure, about which he had had serious doubts—and he still does.

He had not had an opportunity to prepare it, so we vacated the passage on the Consent Calendar.

Subsequently, the Senator from Nebraska inserted his statement, which will be found on page S13439 of the RECORD of August 14, 1972. We have talked with his office and he is agreed that the bill may now be passed, with his statement included in the RECORD.

So, Mr. President, I ask unanimous consent that the statement of the distinguished Senator from Nebraska (Mr. HRUSKA) with reference to Senate Resolution 299 be printed at this point in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

STATEMENT BY SENATOR HRUSKA

The substance and the desirability of S. Res. 299 have been considered in this body on two previous occasions. One was on May 8, 1972, beginning at page 28005 of the Congressional Record. A second occasion was June 22 at pages 21980 and following.

Those colloquys, chiefly between this Senator and the Senator from New York (Mr. Javits), resulted in the referral of the resolution to the Government Operations Committee for its study and recommendation by a day certain. It has now been returned to the Senate for further consideration.

Mr. President, the Government Operations Committee in its report now before us amended the original resolution to extend the time for reporting from this special committee to February 15, 1972. Otherwise, the text of the resolution remains as it was on June 22.

Reference to the Government Operations Committee accomplished one objective, namely, it resolved a rather discouraging aspect of the matter in the following fashion: Senate approval of the resolution had been sought on a virtually summary and expedited basis on the floor of the Senate. This undesirable effort was averted by the reference of the resolution to the Committee, whose report we now consider. This is in keeping with better, more deliberative, more established and more wholesome procedure.

Mr. President, my present position is that I shall defer to the judgment of the Government Operations Committee. I will not oppose the approval of the resolution, even though I find myself in respectful disagreement with the Committee's conclusions.

Objections which I voiced in June are still applicable. Some of them I shall restate and incorporate in these remarks.

The purpose of these present remarks is to make a record for future ventures of this kind into special or ad hoc committees some sound and wholesome reasons for preventing similar incursions into the provinces of standing committees with definitely assigned responsibilities.

Mr. President, the interest of this Senator in the general subject of secrecy, confidentiality and classification of government documents generally is of long-standing study and activity. My desires and goals are to render the development and the availability of these documents in an open and in a timely way consistent with the best interests of sound government. This means that there must be taken into consideration at least two fundamental doctrines: (I) Separation of Powers, and (II) Executive Privilege.

The history of both doctrines goes back to the beginnings of the Republic. I believe that the incorporation at this point of some of my remarks on June 22 will illustrate the reasons for my interest in S. Res. 299.

Mr. HRUSKA. I yield myself 10 minutes.

Mr. President, this resolution should be referred to a committee for regular processing. There are a number of reasons and elements that can be found in support of that statement.

It undertakes to establish a select committee to study and report on laws, rules and questions relating to secret, confidential, and classified Government documents. There was an inquiry into a specific situation as to the conduct of an individual Member of this body but the subject generally, basically, and fundamentally, has never been referred to or been considered by a committee.

The resolution contains no provision for funding. I do not know that that will be necessary but, at any rate, there is no provision or any consideration as to whether funding would be needed.

The subject is extensive. It is profound. It is complex. A cursory and fleeting examination and report by a short-lived select committee, as contemplated here, would necessarily be superficial and would serve no useful purpose.

The resolution, Mr. President, is a usurpation and an encroachment on the province and the jurisdiction of a standing committee, which would be fully justified in deeply resenting such intrusion. It is unseemly for the Senate to circumvent the functioning of the committee system in this fashion.

Now, Mr. President, it is suggested that the resolution arose and was brought about as a result of the closed-door session we had some weeks ago, when a Senator had received a document and breached, violated, imposed on, or exploited his immunity to the extent of publishing or seeking to publish that document. It presented a situation which would require, in the judgment of the Senator from New York and the cosponsors of this resolution, the collective judgment of the Senate as to what should be done in such a situation, and that a smaller body than the Senate itself would be requested for that purpose, the purpose being not to consider legislation, but this particular situation. As I understand it, that is the thrust of the argument made on behalf of the resolution.

Well, Mr. President, the leadership can undertake an informal discussion of this particular situation on its own, in its role as a leadership organization on both sides of the aisle. It can summon to its assistance and to counsel it any Member of the Senate that it wishes. It can call upon the chairman or the ranking members of committees if it wishes, and formulate some program or some proposal that it can bring forward before a future executive session of the Senate. That is entirely within its power and jurisdiction. It is its prerogative right now.

It is said now that we have to do something, that we have to have a crutch, that we have to have a resolution of substance here, something substantive.

Well, Mr. President, that is the province of a standing committee. I suggested that the leadership on its own can get together and formulate a proposition of any kind they wish as to the particular conduct of a particular Senator under particular situations. That they can do. Then he would debate that in the Senate, either in open or in executive session, and go on from there.

But when it is to formalize an organization known as a select committee for the purpose of dealing with matters of substance, and dealing with rules and classified regulations that in here in this situation, then we get into the province of a standing committee with its expertise and authority. I say again that the standing committee that would be entitled to it would have reason and ground to be resentful of that kind of usurpation and intrusion. I do not say that they have, Mr. President. I think they have justification for it. There was no resentment in the heart of the chairman of the Government Operations Committee when he considered this. There was no resentment on my part that we were not given the matter to discuss and consider in the Judiciary Committee, nor in the mind of the chairman of the Judiciary Committee himself. No one got mad. But the point is we are repudiating and circumventing the functioning of the committee system in this fashion.

Why should it be considered by a standing committee? Because a standing committee has also had some exposure to the problem.

I should like to call attention to the fact that we developed 600 printed pages of testimony in the Subcommittee on Separation of Powers last year dealing with this entire subject. There have been hearings held last March in the Armed Services Committee in the House on this, on a bill that would set up a commission for the purpose of getting at this problem, H.R. 9853.

Of course it is a very deep, profound, and complex problem. But these committees have already been exposed to it. They have developed expertise, knowledge and experience in it. It is they who should be considering anything that goes into a substantive proposal in the nature of a rule or a law, or an interpretation of the law, and bring it back to the Senate for the purpose of handling it.

Mr. President, the question is asked, "What committee is it, and is there a committee that can handle the conduct of Senators under circumstances of this kind?"

My suggestion to that is again that the leadership can formulate some proposition and make it fair and present the issue in a particular case of a particular Senator. That is within their power. That is within the purview of their legislative duties. With regard to conduct beyond that of an individual, rules for general application, that is within the jurisdiction of the Government Operations Committee.

Mr. President, that is the way to handle a situation of this kind. The leadership needs to be called in on the question concerning to whom the Senator wishes to assign the duty of inquiring into the conduct of a particular Senator under particular circumstances. But when we leave that point, then we have any number of committees, as has been suggested, that would be eligible to consider the study and any specific measure or proposal.

It could be the Armed Services Committee if it is a proposition dealing exclusively or heavily with military secrets or weaponry or strategy, or documents of that kind.

It could be the Foreign Relations Committee if treaties are involved or documents relating to treaties.

It could be the Judiciary Committee where internal security is a matter that has been assigned and delegated to the Subcommittee on Internal Security.

It could be the Government Operations Committee whose authority cuts across and covers all departments and their operation and performance.

That is why this matter should be referred to a committee and let the leadership develop its own devices for the purpose of dealing with a particular situation.

Senate Resolution 299, now pending before the Senate for final action, would establish a select committee to study questions related to secret and confidential Government documents. It has never been referred to any committee and contains no provisions for funding.

There is pending before the Committee on Government Operations, of which the distinguished senior Senator from Arkansas (Mr. McClellan) is chairman, a bill, S. 2965, to provide greater access to Government information, and for other purposes. Under its provisions, there would be established an independent disclosure board charged with the supervision and review of the entire Government classification system.

Senator McClellan is unable to be present today. In view of the close relationship in the subject matter of these measures, he believes it would be appropriate to consider them both at the same time. Accordingly, he has asked me, on his behalf, to request that the resolution be referred to the Committee on Government Operations. We have been informed that the Committee on Rules and Administration would have no objection to the reference.

So, pursuant to this request, Mr. President, I ask unanimous consent on behalf of the senior Senator from Arkansas (Mr. McClellan) that Senate Resolution 229 be referred to the Committee on Government Operations.

The substance and logic of the foregoing remarks remain applicable to this present situation. At a later time in the discussion on June 22, the Senator from California (Mr. Tunney) stated:

"Mr. President, I wonder if the Senator from Nebraska opposes the basic principle outlined in the resolution of the Senator from New York, that the Senate of the United States investigate through a delegation of authority to ten Senators or whatever number it might be, the various laws covering classification and the responsibilities of the individual Senators when matters that are classified come to them and their right to disclose such classified material to the American public.

"Does the Senator oppose the Senate, through a Committee, studying this matter and furnishing the Senate with some guidelines which individual Senators will be able to follow in the future?"

To this question by the Senator from California I made the following response:

"Mr. President, if the Senator will remember—perhaps he was not here when I made my remarks—I do not object to that. I think it would be notable for the majority leader, the minority leader, their assistants or deputies, any any number of Senators who want to get together for the purpose of counseling and deliberating on a matter, to go into that. That is fine. However, the matter they should consider would be the particular conduct of a particular Senator under particular circumstances, such as we considered in executive session some time ago.

"However, as soon as we formalize that kind of body and charge it with the responsibility to come here with their findings and recommendations not only with respect to that type of situation, but also recommendations on laws relating to secrecy, confidentiality, and classification of classified documents and so forth, when you do that or seek to do it, then you are intruding upon the jurisdiction and the province of the standing committee. It should not be so, and this Senate should not do that; they should not do that. It is a reflection on that committee that they were not asked. If you want to do something, ask them and let them do it.

"In my experience here, on at least three occasions, we have gone into this matter in depth in the Committee on the Judiciary. The first time, in 1957 and 1958, under the leadership of the late and very lamented Senator Tom Hennings of Missouri, we struggled with that problem for the greater part of the summer and into the next year and turned up doing nothing. Why? It is that type situation, as pointed out in the testimony of Assistant Attorney General Erickson before the Committee on Armed Services in the House, that the thrust and burden depends on executive and administrative action, and their good faith in setting up rules that will be reasonable and accommodate the Senate and the House as much as possible without compromising those portions by way of secrecy necessary to conduct this Nation's affairs properly.

"We got stalemated because we reached that situation. There may be penalties for disclosing classified documents. But on these other matters we reached that conclusion. Four or 5 years later we went back and we reached the same conclusion and the same result. I venture to say we will come to that same conclusion again.

"I differentiate that from the situation where a particular Senator, acting in a particular fashion with particular documents comes into the Senate and, in the view of some Senators, either violates his immunity, abuses or exploits it. Some Members of this body might not like that and might want to take action not only to deal with that situation but also similar situations, following the precedent set in that case. That is a different thing. For that purpose I say there should be an informal meeting of the leadership. They have certain powers and responsibilities. They should meet and come here with a position paper or two, and supporting documents, and then let the Members of the Senate act upon that case and not try to raise this entire field which is very complex, very extensive and very profound, and it has all kinds of implications and ramifications which can be dealt with most effectively and properly by a standing committee that has acquired through its years of experience and literature some experience in that field.

"This Senator went into great detail on the ramifications of this type of procedure when Senate Resolution 299 was called up at an earlier time. I refer the Senator to my statement on the Senate floor on May 8, 1972, beginning at page 28005. The reasons why I oppose this resolution are set out at some length there. I will not take the Senator's time to repeat them now."

Mr. President, the foregoing remarks should be sufficient to delineate the area involved and some of the considerations which go into the vast, massive, comprehensive and complex problem involved.

It would be my hope that these remarks together with the references made therein will be a foundation for considering any future and additional efforts to displace standing committees with declared and assigned powers and responsibilities by the formation of ad hoc or special committees which seem to invade that jurisdiction and that subject matter.

It is my hope that these remarks will serve that purpose.

Mr. JAVITS. Mr. President, under this resolution a committee of 10 Senators would be appointed, five from each party, under the leadership of the majority and minority leaders. The purpose of the committee simply would be to conduct a study and report to the Senate recommendations on questions relating to secrecy, confidentiality and classification of documents committed to the Senate or any Member and also to generally look at the laws and rules relating to secrecy and classification of Government documents.

We had an example of problems arising in this area in the case of the Senator from Alaska (Mr. Gravel). We all felt that there may be similar cases in the future, and it will be recalled that the entire issue was the subject of a secret session. I felt that I was more or less carrying out the will of the Senate that had been expressed at the secret session when I introduced this resolution shortly thereafter.

I wish to make it clear that the resolution does not give this Committee of Ten any legislative authority, nor does it prevent this committee from suggesting to the Senate that a measure be introduced or that a particular pending bill be passed. The jurisdiction of the standing committees of the Senate such as Government Operations or Judiciary, or other committees will not be affected by this committee. It simply is a way to get some advice as to what should be done about this vexing matter. The Senator from Nebraska (Mr. Hruska), when the matter was first debated, decided that he wished to refer the bill to the Government Operations Committee, a committee on which I am a member. It was so referred, with my agreement, with a date for reporting by August 7, 1972. The committee actually dealt with the matter on August 8 and found no objection to the resolution except that it directed me to amend it so that a report should be forthcoming to the Senate from the Committee of Ten on or before February 15, 1973. To demonstrate the committee's backing for that position, the Senator from North Carolina (Mr. Ervin), the chairman, the Senator from Illinois (Mr. Percy), the ranking minority member, joined me in that amendment.

I deeply appreciate the views and the feelings of the Senator from Nebraska (Mr. Hruska), and I am sure that they will receive a most profound consideration from this new ad hoc committee. I am very pleased and appreciative that the Senator has not interposed further objections so that the matter may now go forward and we may see what can be done along the lines contemplated by Senate Resolution 299.

Under all those circumstances, Mr. President, I hope that the Senate will look favorably on the resolution.

AMENDMENT NO. 1425

Mr. President, I call up my amendment No. 1425 and ask that it be stated.

The PRESIDING OFFICER (Mr. BENTSEN). The amendment will be stated.

The legislative clerk read as follows:

On page 2, line 2, after the comma, delete all that follows up to the first comma on line 3 and insert the following in lieu thereof: "by February 15, 1973,".

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from New York (Mr. JAVITS).

The amendment was agreed to.

The resolution, as amended, was agreed to, as follows:

S. RES. 299

Resolution to establish a select committee to study questions related to secret and confidential Government documents

Resolved, That there is hereby established a special ad hoc committee of the Senate to be composed of ten members, five from the majority and five from the minority. The majority leader shall be the chairman and the minority leader the cochairman. Of the remaining eight members, four will be appointed by the majority leader and four by the minority leader. Any member appointed under the provision of this resolution shall be exempt from the provisions of the Reorganization Act relating to limitations on committee service.

The committee shall conduct a study and report its findings and recommendations to the Senate, by February 15, 1973, on all questions relating to the secrecy, confidentiality, and classification of Government documents committed to the Senate, or any Member thereof, and propose guidelines with respect thereto; and, the laws and rules relating to secrecy, confidentiality, and classification, of Government documents, and the authority therefor.

Mr. JAVITS. Mr. President, I move that the vote by which the resolution was agreed to be reconsidered.

Mr. BUCKLEY. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

COMMENDATION OF SENATOR JOHN L. McCLELLAN ON HIS SERVICE AS CHAIRMAN OF THE COMMITTEE ON GOVERNMENT OPERATIONS

Mr. ERVIN. Mr. President, I ask unanimous consent for the immediate consideration of a resolution which is cosponsored by the Senator from Arkansas (Mr. FULBRIGHT) and, with the exception of Senator McCLELLAN, the entire membership of the Senate Committee on Government Operations.

Mr. ALLEN. I ask that the resolution be stated at length.

The PRESIDING OFFICER (Mr. COOK). The resolution will be read in full.

The legislative clerk read as follows:

S. RES. 355

Whereas Senator John L. McClellan has been a member of the Committee on Government Operations and its predecessor, the Committee on Expenditures in the Executive Departments, since January 14, 1943, longer than any other member, and has served as its chairman from January 10, 1949 to January 13, 1953, and from January 11, 1955 to August 2, 1972—longer than any other chairman; and

Whereas Senator McClellan was chairman of the Committee on Government Operations during years which saw a sweeping transformation and reorganization of the Government of the United States; and

Whereas Senator McClellan served as a member of the first and second Hoover Commissions, during which time he worked diligently to improve the structure and operation of the executive branch of the Government, and authored a number of bills to implement the Commission's recommendations, and

Whereas Senator McClellan was the author of the bill creating the General Services Administration gathering the Government's multi-billion-dollar business operations into one agency for greater efficiency and economy; and

Whereas Senator McClellan was the principal sponsor of the Federal Property and Administrative Services Act of 1949, which has provided for the donation of $8 billion worth of Federal surplus property to the States for health and educational purposes; and

Whereas Senator McClellan sponsored and managed the legislation that led to the enactment of the Budget and Accounting Act of 1950 which modernized the Government's budget and accounting procedures; and

Whereas Senator McClellan guided to enactment the legislation that created two major new executive departments—the Department of Housing and Urban Development, in 1965, and the Department of Transportation in 1966; and

Whereas Senator McClellan, as Chairman of the Permanent Subcommittee on Investigations of the Committee on Government Operations, has been acclaimed nationally as a vigorous, able and effective investigator and has won a reputation for judicial impartiality and fairness; and

Where as Senator McClellan conducted an investigation into corruption, gangsterism and racketeering and questionable financial practices in labor unions and anti-union practices by management which resulted in enactment of the landmark Welfare and Pension Plans Disclosure Act of 1958 and the Labor-Management Reporting and Disclosure Act of 1959; and

Whereas Senator McClellan investigated the operations of organized crime which led to the enactment of legislation to strengthen the hand of our law enforcement agencies in fighting the crime syndicates; and

Whereas Senator McClellan conducted a six year study of the development and production programs for the TFX aircraft which saved the Government and taxpayers untold millions of dollars; and

Whereas Senator McClellan resigned on August 2, 1972 as Chairman of the Committee on Government Operations to assume the Chairmanship of the Committee on Appropriations: Therefore, be it

Resolved, That the Senate expresses its warm affection for Senator McClellan, and its deep appreciation for his devotion to duty and for the outstanding service which he has rendered to the people of Arkansas, to the Committee on Government Operations, to the Senate and to the United States, by his great ability, initiative and statesmanship.

The PRESIDING OFFICER. Is there objection to the consideration of the resolution?

There being no objection, the Senate proceeded to consider Senate Resolution 355.

Mr. JACKSON. Mr. President, it has been my privilege to serve on the Committee on Government Operations since I received my first committee assignment in the Senate, in January, 1953, and ever since that time I have served next to the distinguished senior Senator from Arkansas (Mr. McCLELLAN).

I am very proud of that association. We have been through some real battles together. I recall that the first big battle was the famous Army-McCarthy hearings in 1954 and the activity preceding that. I have worked with Senator McCLELLAN subsequent to that time on the various investigations of the committee—and also, of course, in connection with the many other activities that are within the jurisdiction of the Committee on Government Operations.

This committee, especially the investigating side, requires a chairman who has the kind of judicial temperament possessed by the able and distinguished Senator from Arkansas. He is a cool, able, forthright legislator and lawyer. He is the kind of Senator with whom one can disagree without his being disagreeable. He is the kind of Senator who, when he gives his word, keeps it. He is a man of great integrity. He is a man who has commanded the respect of the people of the Nation in the handling of some of the most difficult investigative matters ever to come before Congress.

It has been a rare privilege to have served with him on that committee these past 20 years—this is the 20th year.

I want to join my colleagues—as I have in this resolution—in honoring him and commending him for the great service he has rendered to the Nation and to his great State of Arkansas.

We have to face many problems in this body; and life is much easier in this body when one has the opportunity to work with, associate with, and, yes on occasion disagree with—as he would expect it—a Senator of the character, the integrity, and the ability of JOHN L. McCLELLAN, of Arkansas.

I am confident that in his new capacity as chairman of the Committee on Appropriations and as ranking member of the Committee on Government Operations next to its distinguished chairman, the senior Senator from North Carolina (Mr. ERVIN), Senator McCLELLAN will continue to lend to the Senate, to the committee, and to the country the kind of service that makes us all proud to serve in this body.

Mr. ERVIN. Mr. President, my first assignment upon coming to the Senate, 18 years ago, was to the Committee on Government Operations, so I can testify in full measure to everything that the Senator from Washington has said.

Mr. CHURCH. I should like to add that I am very much pleased that this resolution honoring Senator McCLELLAN has been submitted.

It was my privilege to serve on the committee that Senator McCLELLAN headed some years ago which looked into rackets in industry and labor. I was then a freshman Senator. I always appreciated the fair treatment that Senator McCLELLAN extended to me and the education that that experience brought to me, which was largely due to the distinguished chairman of that select committee. I am indebted to him for what I learned in a comparatively brief time about proper Senate procedures and the fair handling of investigations.

So I am pleased to add my compliments to the Senator from Arkansas on this occasion, and I express my appreciation to the Senator from North Carolina for having submitted the resolution.

Mr. GURNEY. Mr. President, all of us are familiar with the outstanding record of service which Senator McClellan has achieved and which is outlined in this resolution of commendation. His service to the Nation and the Senate is reflected in the rollcall of his achievements. His name is historically associated with sound national leadership during the dangerous years of World War II, through the trying postwar confrontations, and throughout many years of peaceful domestic progress.

His record of accomplishment is indispensable to any discussion of the Committee on Expenditures in the Executive Departments, the Committee on Government Operations, the Hoover commissions and the permanent Subcommittee on Investigations. His role in the creation of the General Services Administration and in the passage of the Federal Property and Administrative Services Act of 1949 and the Budget and Accounting Act of 1950 point out his concern for efficiency and economy in Government; the creation of the Department of Housing and Urban Development and the Department of Transportation emphasize his concern for social justice and domestic needs; and his investigations into crime and into Government procurement contracts illustrate his basic concern for governmental honesty and integrity.

All of this is public record and is well recognized by Senators and by the informed citizens of the Nation. I should like, however, to supplement the resolution now before us by mentioning the fair and considerate treatment which Senator McClellan has consistently afforded both majority and minority members of the Committee on Government Operations and the permanent Subcommittee on Investigations while serving as chairman of those groups.

As a first-term Senator, sitting with the minority on those two committees, I have experienced firsthand many instances of courtesy and fair play which might not have been expected from a lesser man.

I believe these little known daily acts of character performed with no rewarding publicity or personal recognition, reflect the true nature of this great statesman and gentleman, even more than his public record of achievement.

I am pleased to have this opportunity to salute Senator John McClellan.

Mr. RIBICOFF. Mr. President, I join with my colleagues on the Government Operations Committee in commending Senator John McClellan on his 22 years of distinguished service as chairman of the committee.

It has been an honor for me to serve on the committee under the Senator's leadership for almost 10 years. This has been a period of great accomplishment under the able direction of Senator McClellan. Two new Government departments have been approved—Housing and Urban Development and Transportation. The Permanent Investigations Subcommittee, which he chairs, has also compiled a superb record of accomplishment, including the TFX investigation and the inquiry which led to the reform of military post exchanges.

Senator McClellan has proven to be a fair and wise chairman. He is a leader in the Senate and the Nation. The list of his achievements for his State and the country, as recorded in our resolution, is highly impressive.

Senator McClellan has served as chairman of the Government Operations Committee longer than any other Senator in the history of the committee. The Senate and the Nation owe a large debt of gratitude to this quiet man who has made such an outstanding record.

Though Senator McClellan now leaves the chairmanship of the committee, he will remain one of its members. This is indeed fortunate for I know we all look forward to his guidance on the many problems which come before us. I know he will remain a valued member of the committee for many years to come.

Mr. PERCY. Mr. President, I regret deeply that business elsewhere in the Senate prevented my being in the Chamber in order to hear the remarks of my valued colleagues regarding Senator McClellan.

I was proud to serve over the past few years on the committee with the Senator from Alabama (Mr. Allen), both of us as members of the Government Operations Committee, and to draft a resolution of appreciation and commendation to our distinguished past chairman for his services over a period of years to the Government Operations Committee.

I have served in the last 2 years as the ranking Republican member on that committee, and it has been my pleasure to work intimately with the Senator from Arkansas on the work of the committee, as well as serving with him on the Permanent Investigations Subcommittee of the Government Operations Committee.

I have seen his tenacity of purpose, I have seen his perseverance, I have seen his perception. He has been totally nonpartisan in the way that he has conducted the Government Operations Committee. I believe it is this imprint he has made on the committee's work that has been so valuable.

We have an oversight responsibility in connection with the entire Federal Government. We have the largest, the most effective, and the best trained investigative staff of any committee in the U.S. Senate. If there was one iota of partisanship in the conduct of our affairs, it would detract from the quality of our work. Whether it was under a Democratic or a Republican administration, the Senator from Arkansas carried forward his work in a nonpartisan way. I have greatly enjoyed working with Senator McClellan and deeply regret his leaving the chairmanship, but I am pleased that he will still stay as the ranking Democratic member of the committee. Also, of course, we will work closely with him in his capacity as Chairman of the Committee on Appropriations.

The resolution which the Senator from Alabama (Mr. Allen) and I have drawn, which has been presented and unanimously and enthusiastically approved by the Government Operations Committee, fully reflects my feelings about my distinguished friend and colleague Senator McClellan.

Mr. JAVITS. Mr. President, for some years I have been a member of the Committee on Government Operations and of its Subcommittee on Investigations, and its acting ranking minority member, until, as the result of a most admirable reform of the seniority rule, I yielded that post to the distinguished Senator from Illinois (Mr. Percy), as I now occupy a similar position on another legislative committee, the Committee on Labor and Public Welfare.

I pay great tribute to Senator McClellan. I believe I am in a unique position to do so, because not only can I testify that he is a splendid Senator, as shown by the tremendous record outlined in this resolution, but, so far as I am concerned, speaking in a very personal sense, he has been a most interesting colleague and friend.

It is well known that on many questions the Senator from Arkansas and I disagree in terms of policy. His views toward the situation of our country and the actions that our country ought to take are very understandable, considering his background and the views of the people of his State. The issues which affect the people of his State would naturally be very different from those which affect the people of mine. But I have rarely met a colleague who was more understanding, and not only tolerant of dissent, but willing to give dissenters every opportunity to be heard, realizing how much dissent is a part of the American scheme, and that is the conflict of ideas which ultimately produces the best policy.

Senator McClellan is personally solicitous in the provision of providing staff and other conveniences which a chairman may afford or withhold, giving the fullest opportunity for the development of the individual Senator in the work of the committee.

Notwithstanding his zeal in questioning witnesses and driving directly to what he felt was the best resolution of the public's business and the right of the public to know through the inquiries of congressional committees, he has been ever-sensitive to any suggestion respecting the consideration of matters in executive session before they are heard in public session. This was done so that we might be solicitous of the personal standing and reputation of individuals who might be charged and the individuals were then given an opportunity to appear and answer them.

In many other ways, he has shown not only great consideration but also great feeling for all the elements of the American system, and for that I pay him a personal and very warm tribute.

While Senator McClellan remains as a member of the Government Operations Committee, he relinquishes his chairmanship and moves onto a tremendous responsibility as chairman of the Committee on Appropriations, on which I also, for a time, had the honor to serve with him. I know that he will carry to that assignment the judicious consideration which has been so typical of him, as well as the evangelistic zeal which has heretofore distinguished him in committee and on the floor of the Senate. I think his elevation to the chairmanship augurs very well for the future of that fine committee.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution was unanimously agreed to.

The preamble was unanimously agreed to.

TRIBUTE TO THE LATE RALPH TYLER SMITH

Mr. PERCY. Mr. President, it is my sad task today to report the passing of our former colleague and friend, Ralph Tyler Smith, who served in this body as the junior Senator from Illinois from September 1969 to November 1970.

I extend my deepest sympathy to his beloved wife, Mary, and daughter, Sharon.

Ralph Tyler Smith loved politics and devoted much of his life to service to the people of Illinois. He was appointed by Illinois Gov. Richard Ogilvie to fill the unexpired term of the incomparable Everett McKinley Dirksen. All of the Members have can appreciate what an extraordinary role that was to fill, but I know we would all agree that Ralph Smith undertook it with courage and ability.

Mr. President, the funeral services will be in Alton, Ill., tomorrow afternoon at 2 p.m. I will be absent from the Senate for the purpose of speaking at the funeral service and will, of course, express deep regret, on behalf of all my colleagues, at his passing to his wife and to his immediate family.

Ralph Tyler Smith came to the Senate well prepared and well skilled in the art of legislation. First elected as a State representative in the Illinois General Assembly in 1954, Ralph was reelected to that office for seven consecutive terms. In 1963, he was elected majority whip of that body and in 1967, he was elevated to the position of speaker of the house. During his years in the Illinois Legislature, he developed into one of the most able masters of the art of State legislation that Illinois has ever seen.

In addition to his expertise as a legislator, Ralph Smith brought to the Senate a keen knowledge of the people of Illinois, whom he had served for so long in the State. He was active in his home community of Alton in the Presbyterian Church, the Greater Alton Association of Commerce, the American Legion, Veterans of Foreign Wars, the Alton-Wood River, Madison County and Illinois State Bar Associations, and many other organizations.

His political work for the Republican Party in Illinois was vast. He was the downstate campaign manager in the successful gubernatorial campaign of Gov. Richard B. Ogilvie in 1968 and in my own 1966 campaign for the Senate. Ralph Smith believed in the principles of the Republican Party and his efforts on behalf of the Party and its candidates in Illinois were unceasing. He was a tireless campaigner for his Republican colleagues, and, I might add, an effective one.

On many occasion Ralph Smith made known to our Governor and me that his life long ambition was to serve as a U.S. Senator.

In his brief term in the Senate Ralph Smith compiled a remarkable record. He lent his efforts to such diverse programs as the Coal Mine Safety Act, a $20,000 limitation crop control payments, the Water Quality Improvement Act, a 15 percent increase in social security benefits, the Crime Control Act of 1969, and the repeal of the Gulf of Tonkin resolution. The legislative experience he gathered in his many years of service in the Illinois Legislature served him well here in the U.S. Senate and enabled him to serve Illinoisans as effectively in this forum as he had in the Illinois State capital and became one of the most effective legislators of our time. In my judgment his services in the U.S. Senate were among the happiest and most rewarding of his life.

Mr. President, I know that I speak on behalf of all the people of Illinois when I say that we feel we have lost a good friend with the passing of Ralph Smith. He was a native Illinoisan whose primary interest in life was serving the best interests of the people of his State. I know that the Members of the Senate will want to join Mrs. Percy and our family in extending their condolences to Mrs. Smith and their daughter Sharon in this time of sorrow.

QUORUM CALL

Mr. JAVITS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR ADJOURNMENT TO 10 A.M. TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that when the Senate completes its business today, it stand in adjournment until 10 a.m. tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RECOGNITION OF SENATOR MOSS AND SENATOR TUNNEY TOMORROW; AND FOR TRANSACTION OF ROUTINE MORNING BUSINESS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that, following the remarks of the two leaders under the standing order tomorrow, the distinguished Senator from Utah (Mr. MOSS) be recognized for not to exceed 15 minutes; that he then be followed by the distinguished Senator from California (Mr. TUNNEY) for not to exceed 15 minutes; after which there be a period for the transaction of routine morning business for not to exceed 15 minutes, with statements therein limited to 3 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER TO RESUME THE UNFINISHED BUSINESS TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that, at the conclusion of routine morning business tomorrow, the Senate resume the consideration of the unfinished business, Senate Joint Resolution 241.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR REDUCTION OF TIME FOR CONSIDERATION OF H.R. 14896 TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent with respect to the agreement previously entered into regarding H.R. 14896, the school lunch bill, that time on the bill be reduced from 3 hours to 1½ hours; and that time on any amendments in the first degree be reduced from 1 hour, as previously ordered, to 40 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. May I say, Mr. President, that I have cleared this request, amending the time agreement on H.R. 14896, as previously entered, with the distinguished Senator from Minnesota (Mr. HUMPHREY), the distinguished Senator from Alabama (Mr. ALLEN), the distinguished Senator from Iowa (Mr. MILLER), and with other Senators on both sides of the aisle.

ORDER FOR CONSIDERATION OF NATIONAL SCHOOL LUNCH ACT AND LAYING ASIDE OF UNFINISHED BUSINESS TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that at no later than 2 p.m. tomorrow, it be in order for the distinguished majority leader or his designee temporarily to set aside the unfinished business (S.J. Res. 241) and proceed to the consideration of the National School Lunch Act, as amended, H.R. 14896, and that the unfinished business remain in a temporarily laid aside status until final disposition of H.R. 14896 or until the close of business tomorrow, whichever is the earlier.

The PRESIDING OFFICER. Without objection, it is so ordered.

EXTENSION OF TIME FOR COMMERCE COMMITTEE TO FILE REPORT ON S. 2483

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Committee on Commerce have until midnight

Wednesday to file its report on S. 2483, the Metric Conversion Act.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, may we have order in the Senate?

The PRESIDING OFFICER (Mr. BENTSEN). The Senate will be in order. The Senator from West Virginia may proceed.

Mr. ROBERT C. BYRD. Mr. President, I thank the Chair.

PROGRAM

Mr. ROBERT C. BYRD. Mr. President, the program for tomorrow is as follows:

The Senate will convene at 10 a.m. tomorrow. After the two leaders have been recognized under the standing order, the distinguished Senator from Utah (Mr. Moss) will be recognized for not to exceed 15 minutes; after which the distinguished junior Senator from California (Mr. TUNNEY) will be recognized for not to exceed 15 minutes; after which there will be a period for the transaction of routine morning business for not to exceed 15 minutes with statements therein limited to 3 minutes; at the conclusion of which the Chair will lay before the Senate the unfinished business, Senate Joint Resolution 241, a joint resolution authorizing the President to approve an interim agreement between the United States and the Union of Soviet Socialist Republics.

No agreements have been reached with respect to time thereon or with respect to time on any amendment thereto.

At no later than 2 p.m. under the prior order, the distinguished majority leader or his designee will call up H.R. 14896, the National School Lunch Act, on which there is a time agreement allowing 1½ hours on the bill, the time to be equally divided; 40 minutes on amendments in the first degree, the time to be equally divided; and 30 minutes on amendments in the second degree, the time to be equally divided.

Yea-and-nay votes will occur. We understand that at least five proposed amendments to the bill will be called up, each of which will very likely require a yea-and-nay vote.

Following the disposition of H.R. 14896, the National School Lunch Act on tomorrow, the Senate will resume the consideration of the unfinished business (S.J. Res. 241), the interim agreement, or will go to other business. In either case, yea-and-nay votes may occur.

ADJOURNMENT TO 10 A.M.

Mr. ROBERT C. BYRD. Mr. President, if there be no further business to come before the Senate, I move, in accordance with the previous order, that the Senate stand in adjournment until 10 a.m. tomorrow.

The motion was agreed to; and at 5:14 p.m. the Senate adjourned until tomorrow, Wednesday, August 16, 1972, at 10 a.m.

NOMINATIONS

Executive nominations received by the Senate August 15, 1972:

DIPLOMATIC AND FOREIGN SERVICE

Frank T. Bow, of Ohio, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Panama.

IN THE MARINE CORPS

The following-named (Naval Reserve Officer Training Corps) for permanent appointment to the grade of second lieutenant in the Marine Corps, subject to the qualifications therefor as provided by law:

Caldwell, John.

The following-named temporary disability retired officer for reappointment to the grade of lieutenant colonel in the Marine Corps, subject to the qualifications therefor as provided by law:

Gebsen, Clarence U., [redacted], USMC.

CONFIRMATIONS

Executive nominations confirmed by the Senate, August 15, 1972:

INTERNATIONAL ATOMIC ENERGY AGENCY

James R. Schlesinger, of Virginia, to be the Representative of the United States of America to the Sixteenth Session of the General Conference of the International Atomic Energy Agency.

The following-named persons to be Alternate Representatives of the United States of America to the Sixteenth Session of the General Conference of the International Atomic Energy Agency:

William O. Doub, of Maryland.
T. Keith Glennan, of Virginia.
Robert H. McBride, of New Hampshire.
Dwight J. Porter, of Nebraska.
James T. Ramey, of Illinois.
Herman Pollack, of Maryland.

HOUSE OF REPRESENTATIVES—*Tuesday, August 15, 1972*

The House met at 12 o'clock noon.

Rev. Wallace Chappell, McKendree United Methodist Church, Nashville, Tenn., offered the following prayer:

Eternal God, our Father, we are in Thy presence, conscious of the divisions that separate us: color, background, creed, party; yet we want to be made more conscious of those dedications that unite us: commitment to God, service to country, peace for humanity.

We want to be so aware of these lasting likenesses that the dedications will surpass the divisions, thus allowing us to contribute significantly to the brotherhood of our Nation and the freedom of our world. And this we pray in the name of Him who gave Himself for us all. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Without objection, the Journal stands approved.

There was no objection.

MESSAGES FROM THE PRESIDENT

Sundry messages in writing from the President of the United States were communicated to the House by Mr. Leonard, one of his secretaries, who also informed the House that on August 10, 1972, the President approved and signed bills of the House of the following titles:

H.R. 489. An act to approve an order of the Secretary of the Interior canceling irrigation charges against non-Indian-owned lands under the Modoc Point unit of the Klamath Indian irrigation project, Oregon.

H.R. 1682. An act to provide for deferment of construction charges payable by Westlands Water District attributable to lands of the Naval Air Station, Lemoore, Calif., included in said district, and for other purposes;

H.R. 5721. An act pertaining to the inheritance of enrolled members of the Confederated Tribes of the Warm Spring Reservation of Oregon;

H.R. 6745. An act to amend section 122 of title 28 of the United States Code to transfer certain counties of the central division of the judicial district of South Dakota;

H.R. 11350. An act to increase the limit on dues for U.S. membership in the International Criminal Police Organization;

H.R. 12979. An act to amend title 28, United States Code, to authorize the recall of retired commissioners of the U.S. Court of Claims for temporary assignments;

H.R. 13435. An act to increase the authorization for appropriation for continuing work in the Upper Colorado River Basin by the Secretary of the Interior;

H.R. 14108. An act to authorize appropriations for activities of the National Science Foundation, and for other purposes; and

H.R. 15418. An act making appropriations for the Department of the Interior and related agencies for the fiscal year ending June 30, 1973, and for other purposes.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Arrington, one of its clerks, announced that the Senate had passed a bill of the following title, in which the concurrence of the House is requested:

S. 3524. An act to extend the provisions of the Commercial Fisheries Research and Development Act of 1964, as amended.

The message also announced that the Vice President, pursuant to Public Law 92–352, appointed the following to the Commission on the Organization of the Government for the Conduct of Foreign Policy: Mr. SPONG and Mr. PEARSON, as members on the part of the Senate; and Mrs. Charles Engelhard and Mr. Frank C. P. McGlinn, as members from private life.

TRIBUTE TO REV. WALLACE CHAPPELL

(Mr. FULTON asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. FULTON. Mr. Speaker, it is with great pleasure and honor that the House today opened its business session with a prayer by one of Nashville's most distinguished clergymen, Rev. Wallace Chappell. Rev. Wallace Chappell is a pastor and noted author who is serving at McKendree Methodist Church in Nashville. He has been serving the needs of our community for approximately 13 years. During all of this time it has been my pleasure to have Reverend Chappell as my friend.

Reverend Chappell's family has been involved in bringing the gospel to the people for much longer than this period of time. His uncle, Rev. Clovis Chappell, served at Washington's Mount Vernon Methodist Church in the 1920's while also devoting time to the authoring of 36 books. Following this training, Rev. Wallace Chappell has written six books of his own, the best known of which is "Who Jesus Says You Are."

INTRODUCING A RESOLUTION ON STAFF APPOINTMENTS

(Mr. FRASER asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. FRASER. Mr. Speaker, I rise to speak about an internal problem in the House which may be the cause of some inconvenience today.

On the House Foreign Affairs Committee I serve as chairman of one of the subcommittees. An excellent staff member on my recommendation was hired by the committee to work with the subcommittee.

Toward the end of July our colleague from Ohio, Mr. Hays, as chairman of the House Administration Committee, deleted the name of this staff member when certifying the payroll for the House of Representatives for payment for the month of July.

Chairman Hays was apparently bothered by some of the work of the staff member. Specifically, the staff member had contacted another Member of the House to see if he wished to testify or submit a statement on behalf of a bill of which I was a sponsor and which was before a subcommittee which Mr. Hays chairs and on which I serve. Mr. Hays apparently regarded this action as an unwarranted interference with his subcommittee.

Neither the House Administration Committee nor the Foreign Affairs Committee authorized Chairman Hays to strike the name.

Two and one-half weeks have gone by without remedial action. Since the House will recess on Friday I am compelled to seek relief.

I am filing today a resolution for consideration by the Committee on Rules. A copy will appear at the end of my statement. You will note that the resolution deals also with the matter of appointments by the Speaker. I have not consulted with the Speaker on the provision, but include it because an equally serious problem—as I am informed—exists in the case of certain appointments he has submitted.

I apologize for the inconvenience which will occur in order to press for action on this matter. However, I am sure you would wish to protect your own employees from arbitrary action just as I seek to do.

Mr. Speaker, I will include a copy of the resolution in the Extensions of Remarks section for the information of the Members.

THE TERMS OF SURRENDER TO BARBARIC AGGRESSION

(Mr. BLACKBURN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BLACKBURN. Mr. Speaker, we have had reports in the past few days about envoys to Hanoi coming back and pronouncing they have found a solution to the war in Vietnam. Judging from the source of these reports and the nature of the terms offered, what they are really telling the American people is that we can surrender today on the same terms we could have surrendered 4 years ago.

Frankly, I do not expect us to surrender today, and I do not expect to surrender anytime in the future.

If these people want to do the United States a favor, they can advise their comrades in North Vietnam to withdraw their troops from South Vietnam and stop their barbaric aggression.

PRESIDENTIAL CANDIDATE GEORGE McGOVERN HAS ANSWERING TO DO TO THE AMERICAN PEOPLE

(Mr. THOMPSON of Georgia asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. THOMPSON of Georgia. Mr. Speaker, presidential candidate George McGovern has some answering to do to the American people concerning North Vietnam, Ramsey Clark, and Jane Fonda's attempts to use American POW's to influence the election of the President. Specifically, he needs to personally state whether he or any of his campaign staff gave instructions to actress Jane Fonda prior of after her trip to North Vietnam in which she engaged in propaganda broadcasts directed at American service personnel. Also, he needs to state whether or not his staff had contact with or gave instructions to Ramsey Clark prior to or after his visit to North Vietnam as part of an international Communist propaganda committee termed, "International Committee To Investigate U.S. War Crimes in Indochina."

The sequence of events is more than accidental. First, Jane Fonda in Paris said that if President Nixon were reelected, the POW's feared they would never be released. Then Ramsey Clark stated that should George McGovern be elected the POW's would be released on Inauguration Day.

I am astounded that neither of these so-called Americans would denounce the North Vietnamese for their refusal to comply with the provisions of the Geneva Convention or even approach the subject with them. Instead, they spouted a propaganda line soothing to the North Vietnamese and designed to promote the candidacy of George McGovern for President.

The people of America have a right to have George McGovern speak out as to whether his Senate or campaign staff counseled or advised either Fonda or Clark in this connection in an effort to help him in his poltical campaign.

REMARKS BY FORMER ATTORNEY GENERAL RAMSEY CLARK

(Mr. HUNT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HUNT. Mr. Speaker, Ramsey Clark, the former Attorney General of the United States of America, has returned from Hanoi, and he is again projecting the Communist line. It seems so strange to me that Mr. Clark is unable to address himself to the predicament of the people of South Vietnam and the atrocities that are being reported that have been committed by the North Vietnamese army, the invaders of South Vietnam.

He makes great issue about some holes in a dike, but makes no reference to the fact that the dikes are the main platforms of support for the North Vietnam artillery that has been shelling Hue and other cities of South Vietnam, causing considerable casualties among refugees and the civilian population there.

After hearing what Mr. Clark had to say last night, there is no wonder in my mind as to why the Justice Department under Ramsey Clark had such a dismal record. Hanoi should bestow the title of "propagandist minister without portfolio" upon Clark.

INTERNATIONAL EXPOSITION ON THE ENVIRONMENT—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, referred to the Committee on Foreign Affairs:

To the Congress of the United States;

In accordance with Public Law 91–269, I wish to inform the Congress today of current plans for the six-month International Exposition on the Environment to be held in Spokane, Washington in 1974.

This exposition will be a particularly welcomed event in America. The Spokane exposition and the 1976 Winter Olympics are now the only internationally recognized events scheduled for this country during our Bicentennial Era. In addition to stimulating trade and cultural exchanges, the exposition through its theme—"How Man Can Live, Work, and Play in Harmony with His Environment"—will also focus fresh attention on one of the most pressing concerns of our time.

In November 1970, Expo '74, the nonprofit corporation which is sponsoring the exposition and is responsible for its planning and operation, applied for Federal recognition of the exposition under the provisions of Public Law 91-269. After reviewing the plans of the sponsor, the Secretary of Commerce submitted to me the detailed report required under Section 2(a)(1) of Public Law 91-269 and recommended Federal recognition. A copy of the Secretary's report is transmitted herewith. In this report the Secretary indicated that the sponsor had fulfilled all of the requirements of that law and the regulations issued thereunder (15 CFR § 667).

The Secretary concluded that the environmental theme of the exposition was relevant to current national concerns and was appropriate to the exposition site. He also determined that the sponsors had obtained from the State of Washington, the local governments involved, business, and civic leaders of the region and others the financial and other support necessary to assure the successful development of the exposition.

The Secretary of State also reported under Section 2(a)(2) of Public Law 91-269 that the event qualified for registration by the Bureau of International Expositions as a Special Category event.

Based on these favorable reports, I advised the Secretaries of State and Commerce on October 15, 1971, that the exposition warranted Federal recognition as provided by statute. I also indicated that it was my intention to extend this Administration's fullest possible support to foster a successful event.

On November 24, 1971, upon request of the United States, the Bureau of International Expositions in Paris officially recognized the event as a Special Category exposition and approved its General Rules and Regulations by unanimous vote. At its meeting on May 16, 1972, the Bureau also established procedures for sanctioning the special rules and regulatons for the exposition.

On January 31, 1972, I issued a proclamation directing the Secretary of State to invite such foreign countries as he may consider appropriate to participate in this event. The Secretary issued those invitations through diplomatic channels on February 15, 1972. Thus far, Canada, the USSR, and Iran have accepted—and many other countries are now expected to accept. In that proclamation, I also indicated that I planned to appoint a United States Commissioner General to exercise the responsibility of the United States Government for fulfilment of the Convention Relating to International Expositions of November 22, 1928, as modified. Pending this appointment, I am designating the Secretary of Commerce to serve in that capacity on an acting basis. In addition, the Secretary is currently preparing a plan for Federal participation under Section 3 of Public Law 91-269, which I will transmit to the Congress at some later date.

RICHARD NIXON.

THE WHITE HOUSE, *August 15, 1972.*

CALL OF THE HOUSE

Mr. FRASER. Mr. Speaker, I make the point of order that a quorum is not present.

The SPEAKER. Evidently, a quorum is not present.

Mr. BYRNE of Pennsylvania. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The Clerk called the roll, and the following Members failed to answer to their names:

[Roll No. 322]

Abourezk
Abzug
Ashley
Baker
Barrett
Betts
Brasco
Carter
Chamberlain
Clancy

The SPEAKER. On this rollcall 366 Members have answered to their names, a quorum.

Without objection, further proceedings under the call will be dispensed with.

Mr. FRASER. Mr. Speaker, I do object to dispensing with further proceedings under the rollcall.

The SPEAKER. The question is on dispensing with further proceedings under the call.

The question was taken; and the Speaker announced that the ayes had it.

Mr. FRASER. Mr. Speaker, I object to the vote on the ground that a quorum was not present and make the point of order that a quorum is not present.

The SPEAKER. The Chair will remind the gentleman that the House has just established a quorum and there has been no intervening business. There is a quorum present. Under the call of the House a quorum is present.

The Clerk will read a message from the President.

FIFTH ANNUAL REPORT OF NATIONAL ADVISORY COUNCIL ON ECONOMIC OPPORTUNITY—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 92-342)

The SPEAKER laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, referred to the Committee on Education and Labor and ordered to be printed:

To the Congress of the United States:

Pursuant to Public Law 89-794, I have the honor to transmit herewith the Fifth Annual Report of the National Advisory Council on Economic Opportunity.

RICHARD NIXON.

THE WHITE HOUSE, *August 15, 1972.*

PRIVATE CALENDAR

The SPEAKER. This is the day for the call of the Private Calendar. The Clerk will call the first bill on the Calendar.

CALL OF THE HOUSE

Mr. FRASER. Mr. Speaker, I make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

Mr. YATES. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The SPEAKER. On this rollcall 362 Members have answered to their names, a quorum.

MOTION OFFERED BY MR. BOLAND

Mr. BOLAND. Mr. Speaker, I move that further proceedings under the call be dispensed with.

The motion was agreed to.

CONFERENCE REPORT ON H.R. 15580, DISTRICT OF COLUMBIA POLICE AND FIREMEN'S SALARY ACT

Mr. CABELL, on behalf of Mr. MCMILLAN, filed the following conference report and statement on the bill (H.R. 15580) to amend the District of Columbia Police and Firemen's Salary Act of 1958 to increase salaries, and for other purposes:

CONFERENCE REPORT (H. REPT. NO. 92-1340)

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 15580) to amend the District of Columbia Police and Firemen's Salary Act of 1958 to increase salaries, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendment of the Senate and agree to the same with an amendment as follows: In lieu of the matter proposed to be inserted by the Senate amendment insert the following:

TITLE I—AMENDMENTS TO DISTRICT OF COLUMBIA POLICE AND FIREMEN'S SALARY ACTS

SEC. 101. The salary schedule contained in section 101 of the District of Columbia Police and Firemen's Salary Act of 1958 (D.C. Code, sec. 4-823) is amended to read as follows:

"SALARY SCHEDULE

"Salary class and title	Service step— 1	2	3	4	5	6	7	8	9
Class 1: Fire private, police private	$10,000	$10,300	$10,800	$11,300	$12,100	$12,900	$13,400	$13,900	$14,400
Class 2: Fire inspector	11,400	12,100	12,800	13,500	14,200	14,900	15,600		
Class 3: Detective, assistant pilot, assistant marine engineer	12,500	13,125	13,750	14,375	15,000	15,625	16,250		
Class 4: Fire sergeant, police sergeant, detective sergeant	13,580	14,260	14,940	15,620	16,300	16,980			
Class 5: Fire lieutenant, police lieutenant	15,700	16,485	17,270	18,055	18,840				
Class 6: Marine engineer, pilot	17,150	18,005	18,860	19,715					
Class 7: Fire captain, police captain	18,600	19,530	20,460	21,390					
Class 8: Battalion fire chief, police inspector	21,560	22,640	23,720	24,800					
Class 9: Deputy fire chief, deputy chief of police	25,300	27,015	28,730	30,445					
Class 10: Assistant chief of police, assistant fire chief, commanding officer of the Executive Protective Service, commanding officer of the U.S. Park Police	30,000	32,000	34,000						
Class 11: Fire chief, chief of police	34,700	36,800							

SEC. 102. Section 101 of the District of Columbia Police and Firemen's Salary Act of 1958 (D.C. Code, sec. 4-823) is amended (1) by striking out "The" and inserting in lieu thereof "(a) Except as provided in subsection (b), the", and (2) by inserting after the salary schedule in that section the following:

"(b) Compensation may not be paid, by reason of any provision of this Act, at a rate in excess of the rate of basic pay for level V of the Executive Schedule contained in subchapter II of chapter 53 of title 5, United States Code."

SEC. 103. Section 201 of the District of Columbia Police and Firemen's Salary Act of 1958 (D.C. Code, sec. 4-824) is amended to read as follows:

"SEC. 201. The rates of basic compensation of officers and members in active service on the effective date of the District of Columbia Police and Firemen's Salary Act Amendments of 1972 shall be adjusted as follows:

"(1) Each officer or member receiving basic compensation immediately prior to such effective date at one of the scheduled service step rates of subclass (a) or (b) of salary class 1 in the salary schedule in effect on the day next preceding such effective date shall be placed in and receive basic compensation in salary class 1 in the salary schedule in effect on and after such date, and each such officer or member shall be placed at the respective service step in which he was serving immediately prior to such date. Each officer or member receiving basic compensation immediately prior to such date at one of the scheduled longevity step rates of subclass (a) or (b) of salary class 1 in the salary schedule in effect on the day next preceding such effective date shall be placed in and receive basic compensation in salary class 1 in the salary schedule in effect on and after such date, and each such officer or member shall be placed in a service step as follows:

"From—	To—
Class 1, subclass (a) or (b):	Class 1:
Longevity step A	Service step 7.
Longevity step B	Service step 8.
Longevity step C	Service step 9.

"(2) Each officer or member receiving basic compensation immediately prior to such effective date at one of the scheduled service step rates of subclass (a) or (b) of salary class 2 in the salary schedule in effect on the day next preceding such effective date shall be placed in and receive basic compensation in salary class 2 in the salary schedule in effect on and after such date, and each shall be placed at the respective service step in which he was serving immediately prior to such date. Each officer or member receiving basic compensation immediately prior to such date at one of the scheduled longevity step rates of subclass (a) or (b) of salary class 2 in the salary schedule in effect on the day next preceding such effective date shall be placed in and receive basic compensation in salary class 2 in the salary schedules in effect on and after such date, and each such officer or member shall be placed in a service step as follows:

"From—	To—
Class, subclass (a) or (b):	Class 2:
Longevity step A	Service step 5.
Longevity step B	Service step 6.
Longevity step C	Service step 7.

"(3) Each officer or member receiving basic compensation immediately prior to such effective date at one of the scheduled service step rates of salary class 3, 5, 6, 7, 8, or 9 in the salary schedule in effect on the day next preceding such effective date shall receive a rate of basic compensation at the corresponding scheduled service step and salary class in the salary schedule in effect on and after such date. Each officer or member receiving basic compensation immediately prior to such date at one of the scheduled longevity step rates of salary class, 3, 5, 6, 7, 8, or 9 in the salary schedule in effect on the day next preceding such effective date shall receive basic compensation at the corresponding salary class in the salary schedule in effect on and after such date, and each shall be placed in a service step as follows:

"From—	To—
Class 3:	Class 3:
Longevity step A	Service step 5.
Longevity step B	Service step 6.
Longevity step C	Service step 7.

"From—	To—
Class 5:	Class 5:
Longevity steps A and B	Service step 5.

"From—	To—
Class 6, 7, 8, and 9:	Class 6, 7, 8, or 9:
Longevity steps A and B	Service step 4.

"(4) Each officer or member receiving basic compensation immediately prior to such effective date at one of the scheduled service step rates of subclass (a), (b), or (c) of salary class 4 in the salary schedule in effect on the day next preceding such effective date shall be placed in and receive basic compensation in salary class 4 in the salary schedule in effect on or after such date, and each shall be placed at the respective service step in which he was serving immediately prior to such date. Each officer or member receiving basic compensation immediately prior to such date at one of the scheduled longevity step rates of subclass (a), (b), or (c) of salary class 4 in the salary schedule in effect on the day next preceding such effective date shall be placed in and receive basic compensation in salary class 4 in the salary schedule in effect on and after such date, and each shall be placed in a service step as follows:

"From—	To—
Class 4, subclass (a), (b), or (c):	Class 4:
Longevity step A	Service step 5.
Longevity steps B and C	Service step 6.

"(5) Each officer or member receiving basic compensation immediately prior to such effective date at one of the scheduled service step rates of salary class 10 or 11 in the salary schedule in effect on the day next preceding such effective date shall receive a rate of basic compensation at the corresponding scheduled service step and salary class in the salary schedule in effect on and after such date, except that any such officer or member who immediately prior to such date was serving in service step 4 of salary class 10 or in service step 3 of salary class 11 shall be placed in and receive basic compensation in a service step as follows:

"From—	To—
Class 10:	Class 10:
Service step 4	Service step 3.

"From—	To—
Class 11:	Class 11:
Service step 3	Service step 2."

SEC. 104. Section 202 of the District of Columbia Police and Firemen's Salary Act of 1958 (D.C. Code, sec. 4-825) is amended to read as follows:

"SEC. 202. Each officer or member of the Metropolitan Police force, Executive Protective Service, and United States Park Police force assigned on or after the effective date of the District of Columbia Police and Firemen's Salary Act Amendments of 1972—

"(1) to perform the duty of a helicopter pilot, or

"(2) to render explosive devices ineffective or to otherwise dispose of such devices. shall receive, in addition to his scheduled rate of basic compensation, $2,100 per annum so long as he remains in such assignment. The additional compensation authorized by this section shall be paid to an officer or member in the same manner as he is paid the basic compensation to which he is entitled. No officer or member who receives the additional compensation authorized by this section may receive additional compensation under section 302."

SEC. 105. (a) Section 203 of the District of Columbia Police and Firemen's Salary Act of 1958 (D.C. Code, sec. 4–826) is amended to read as follows:

"SEC. 203. The aide to the Fire Marshal shall be included as a Fire Inspector in salary class 2."

(b) Section 204 of the District of Columbia Police and Firemen's Salary Act of 1958 (D.C. Code, sec. 4–826a) is repealed.

SEC. 106. Section 302 of the District of Columbia Police and Firemen's Salary Act of 1958 (D.C. Code, sec. 4–828) is amended to read as follows:

"SEC. 302. (a) The Commissioner of the District of Columbia, in the case of the Metropolitan Police force and the Fire Department of the District of Columbia, the Secretary of the Treasury, in the case of the Executive Protective Service, and the Secretary of the Interior, in the case of the United States Park Police force, are authorized to establish and determine, from time to time, the positions in salary classes 1, 2, and 4 to be included as technicians' positions.

"(b) Each officer or member—

"(1) who immediately prior to the effective date of the District of Columbia Police and Firemen's Salary Act Amendments of 1972—

"(A) was in a position assigned to subclass (b) of salary class 1 or 2 or subclass (c) of salary class 4, or

"(B) was in salary class 4 and was performing the duty of a dog handler, or

"(2) whose position is determined under subsection (a) to be included in salary class 1, 2, or 4 on or after such date as a technician's position,

shall on or after such date receive, in addition to his scheduled rate of basic compensation, $680 per annum. An officer or member described in paragraph (1)(A) or (2) shall receive the additional compensation authorized by this subsection until his position is determined under subsection (a) not to be included in salary class 1, 2, or 4 as a technician's position or until he no longer occupies such position, whichever occurs first. An officer or member described in paragraph (1)(B) shall receive such compensation so long as he performs the duty of a dog handler. If the position of dog handler is included under subsection (a) as a technician's position, an officer or member performing the duty of a dog handler may not receive both the additional compensation authorized for an officer or member occupying a technician's position and the additional compensation authorized for officers and members performing the duty of a dog handler.

"(c) Each officer or member who immediately prior to the effective date of the District of Columbia Police and Firemen's Salary Act Amendments of 1972 was assigned as a detective sergeant in subclass (b) of salary class 4 shall on or after such date, receive, in addition to his scheduled rate of basic compensation, $500 per annum so long as he remains in such assignment. Each officer or member who is promoted after such date to the rank of detective sergeant shall receive, in addition to his scheduled rate of basic compensation, $500 per annum so long as he remains in such assignment.

"(d) The additional compensation authorized by subsections (b) and (c) shall be paid to an officer or member in the same manner as he is paid the basic compensation to which he is entitled."

SEC. 107. Section 303 of the District of Columbia Police and Firemen's Salary Act of 1958 (D.C. Code, sec. 4–829) is amended to read as follows:

"SEC. 303. (a) Each officer and member, if he has a current performance rating of 'satisfactory' or better, shall have his service step adjusted in the following manner:

"(1) Each officer and member in service step 1, 2, or 3 of salary class 1 shall be advanced in compensation successively to the next higher service step at the beginning of the first pay period immediately subsequent to the completion of fifty-two calendar weeks of active service in his service step.

"(2) Each officer and member in service step 4 or 5 of salary class 1 shall be advanced in compensation successively to the next higher service step at the beginning of the first pay period immediately subsequent to the completion of one hundred and four calendar weeks of active service in his service step.

"(3) Each officer and member in service step 6, 7, or 8 of salary class 1 shall be advanced in compensation successively to the next higher service step at the beginning of the first pay period immediately subsequent to the completion of one hundred and fifty-six calendar weeks of active service in his service step.

"(4) Each officer and member in salary classes 2 through 11 who has not attained the maximum service step, rate of compensation for the rank or title in which he is placed shall be advanced in compensation successively the the next higher service step rate for such rank or title at the beginning of the first pay period immediately subsequent to the completion of one hundred and four calendar weeks of active service in his service step, except that in the case of an officer or member in service step 4, 5, or 6 of salary class 2 or 3, service step 4 or 5 of salary class 4, and service step 4 of salary class 5, such officer or member shall be advanced successively to the next higher service step at the beginning of the first pay period immediately subsequent to the completion of one hundred and fifty-six calendar weeks of active service in his service step.

"(b) As used in this title, the term 'calendar week of active service' includes all periods of leave with pay, and periods of nonpay status which do not cumulatively equal one basic workweek."

SEC. 108. Section 304 of the District of Columbia Police and Firemen's Salary Act of 1958 (D.C. Code, sec. 4–830) is amended to read as follows:

"SEC. 304. (a) Except as otherwise provided in subsection (b) of this section, any officer or member who is promoted or transferred to a higher salary class shall receive basic compensation at the lowest scheduled rate of such higher salary class which exceeds his existing scheduled rate of basic compensation by not less than one step increase of the next higher step of the salary class from which he is promoted or transferred.

"(b) Any officer or member receiving additional compensation as provided in section 302 of this Act who is promoted or transferred to a higher salary class shall receive basic compensation at the lowest scheduled rate of such higher class which exceeds his existing scheduled rate of basic compensation by at least the sum of one step increase of the next higher step of the salary class from which he is promoted or transferred and the amount of such additional compensation."

SEC. 109. Section 305 of the District of Columbia Police and Firemen's Salary Act of 1958 (D.C. Code, sec. 4–831) is amended by (1) striking out "Commissioners" and inserting in lieu thereof "Commissioner", and (2) striking out "or Subclass" immediately after "Class".

SEC. 110. Section 401 of the District of Columbia Police and Firemen's Salary Act of 1958 (D.C. Code, sec. 4–832) is amended to read as follows:

"SEC. 401. (a) (1) In recognition of long and faithful service, each officer and member in the active service on or after the effective date of the District of Columbia Police and Firemen's Salary Act Amendments of 1972 shall receive per annum, in addition to the rate of basic compensation prescribed in the salary schedule contained in section 101 of this Act, an amount computed in accordance with the following table:

"If an officer or member has completed at least:	He shall receive per annum an amount, fixed to the nearest dollar, equal to:
15 years of continuous service	5 per centum of the rate of basic compensation prescribed for service step 1 of the salary class of such salary schedule which he occupies.
20 years of continuous service	10 per centum of such compensation.
25 years of continuous service	15 per centum of such compensation.
30 years of continuous service	20 per centum of such compensation.

"(2) For purposes of paragraph (1), continuous service as an officer or member includes any period of his service in the Armed Forces of the United States other than any period of such service (A) determined not to have been satisfactory service, (B) rendered before appointment as an officer or member, or (C) rendered after resignation as an officer or member.

"(3) Each officer and member shall receive additional compensation in accordance with paragraph (1) only as long as he remains in the active service. Such compensation shall be paid in the same manner as the basic compensation to which such officer or member is entitled, except that it shall not be subject to deduction and withholding for retirement and insurance, and shall not be considered as salary for the purpose of computing annuities pursuant to the Policemen and Firemen's Retirement and Disability Act and for the purpose of computing insurance coverage under the provisions of chapter 87 of title 5, United States Code.

"(b) Notwithstanding any other provision of this or any other law, individuals retired from active service prior to the effective date of the District of Columbia Police and Firemen's Salary Act Amendments of 1972, and who are entitled to receive a pension relief allowance or retiremrent compensation under the Policemen and Firemen's Retirement and Disability Act, shall not be entitled to receive an increase in their pension relief allowance or retirement compensation by reason of the enactment of this section.

"(c) Notwithstanding any other provision of this or any other law, each deputy chief of the Metropolitan Police force and of the Fire Department of the District of Columbia shall, upon completion of thirty years of continuous service on the police force or fire department, as the case may be, be placed in, and receive basic compensation at, the highest service step in the salary class to which his position is assigned in the salary schedule contained in section 101. For purposes of this subsection, in computing a deputy chief's continuous service on the police force or fire department, there shall be included any period of his service in the Armed Forces of the United States other than any period of such service—

"(1) determined not to have been satisfactory service,

"(2) rendered before appointment as an officer or member, or

"(3) rendered after resignation as an officer or member."

SEC. 111. Section 501 of the District of Columbia Police and Firemen's Salary Act of 1958 (D.C. Code, sec. 4–833), is amended by (1) adding "and the Executive Protective Service" immediately after "United States

Park Police", and (2) striking out "or Sub-Classes" at the end of such section.

SEC. 112. The Act approved May 25, 1926 (D.C. Code, sec. 4–131), is amended (1) by inserting "(a)" immediately after "That", and (2) by adding at the end thereof the following new subsection:

"(b) The Chief of Police of the Metropolitan Police force, the Commanding Officer of the Executive Protective Service, and the Commanding Officer of the United States Park Police force, are each authorized to provide a clothing allowance, not to exceed $300 in any one year, to an officer or member assigned to perform duties in 'plainclothes'. Such clothing allowance is not to be treated as part of the officer's or member's basic compensation and shall not be used for the purpose of computing his overtime, promotions, or retirement benefits. Such allowance for any officer or member may be discontinued at any time upon written notification by the authorizing official."

SEC. 113. Subsection (h) of the first section of the Act approved August 15, 1950 (D.C. Code, sec. 4–904(b), is amended by striking out "class 10" wherever it appears therein and inserting in lieu thereof "the salary class applicable to the Fire Chief and Chief of Police".

SEC. 114. Section 301 of the District of Columbia Police and Firemen's Salary Act of 1953 (D.C. Code, sec. 4–518) is amended—

(1) by striking out "Such" in the second sentence and inserting in lieu thereof "Except as otherwise provided in this section, such";

(2) by striking out the third sentence;

(3) by inserting "(a)" immediately after "SEC. 301." and by adding the following at the end thereof:

"(b) The increase prescribed by subsection (a) of this section in the pension relief allowance or retirement compensation received by an individual retired from active service before the effective date of the District of Columbia Police and Firemen's Salary Act Amendments of 1972 under the Policemen and Firemen's Retirement and Disability Act as a result of the increase in salary provided by the District of Columbia Police and Firemen's Salary Act Amendments of 1972 shall not be less than 17 per centum of such allowance or compensation.

"(c) Each individual retired from active service and entitled to receive a pension relief allowance or retirement compensation under the Policemen and Firemen's Retirement and Disability Act shall be entitled to receive, without making application therefor, with respect to each increase in salary, granted by any law which takes effect after the effective date of the District of Columbia Police and Firemen's Salary Act Amendments of 1972, to which he would be entitled if he were in active service, an increase in his pension relief allowance or retirement compensation computed as follows: His pension relief allowance or retirement compensation shall be increased by an amount equal to the product of such allowance or compensation and the per centum increase made by such law in the scheduled rate of compensation to which he would be entitled if he were in active service on the effective date of such increase in salary.

"(d) Each increase in pension relief allowance or retirement compensation made under this section because of an increase in salary shall take effect as of the first day of the first month following the effective date of such increase in salary."

SEC. 115. (a) Section 2 of the Act of September 8, 1960 (D.C. Code, sec. 4–823b) is repealed.

(b) Section 2 of the Act of October 24, 1962 (D.C. Code, sec. 4–823c) is repealed.

(c) Section 102 of the Act of September 2, 1964(D.C. Code, sec. 4–823d) is repealed.

(d) Section 102 of the District of Columbia Policemen and Firemen's Salary Act Amendments of 1966 (D.C. Code, sec. 4–823d–1) is repealed.

(e) Section 2 of the District of Columbia Police and Firemen's Salary Act Amendments of 1968 D.C. Code, sec. 4–823d–2) is repealed.

(f) Section 103 of the District of Columbia Police and Firemen's Salary Act Amendments of 1970 (D.C. Code, sec. 4–823–3) is repealed.

SEC. 116. (a) Retroactive compensation or salary shall be paid by reason of the amendments made by this title only in the case of an individual in the service of the District of Columbia government or of the United States (including service in the Armed Forces of the United States) on the date of enactment of this Act, except that such retroactive compensation or salary shall be paid (1) to an officer or member of the Metropolitan Police force, the Fire Department of the District of Columbia, the United States Park Police force, or the Executive Protective Service, who retired during the period beginning on the first day of the first pay period which begins on or after May 1, 1972, and ending on the date of enactment of this Act for services rendered during such period, and (2) in accordance with the provisions of subchapter 8 of chapter 55 of title 5, United States Code (relating to settlement of accounts of deceased employees), for services rendered during the period beginning on the first day of the first pay period which begins on or after May 1, 1972, and ending on the date of enactment of this Act, by an officer or member who dies during such period.

(b) For the purposes of this section, service in the Armed Forces of the United States, in the case of an individual relieved from training and service in the Armed Forces of the United States or discharged from hospitalization following such training and service, shall include the period provided by law for the mandatory restoration of such individual to a position in or under the Federal Government or the municipal government of the District of Columbia.

(c) For the purpose of determining the amount of insurance for which an officer or member is eligible under the provisions of chapter 87 of title 5, United States Code (relating to government employees group life insurance), all changes in rates of compensation or salary which result from the enactment of this title shall be held and considered to be effective as of the date of enactment of this Act.

SEC. 117. (a) If an officer or member of the Metropolitan Police Force, the Fire Department of the District of Columbia, the Executive Protective Service, or the United States Park Police force engages in educational course work in police or fire science or administration and if he is eligible for payments or reimbursements under section 4109(a)(2)(C) of title 5 of the United States Code for tuition expenses for such course work, the Commissioner of the District of Columbia, the Secretary of the Treasury, and the Secretary of the Interior shall, in accordance with such section 4109(a)(2)(C), pay or reimburse each such officer and member under their jurisdiction for all his tuition expenses for such course work.

SEC. 118. Except as provided in section 117 (b), the effective date of this title and the amendments made by this title shall be the first day of the first pay period beginning on or after May 1, 1972.

(b) Subsection (a) of this section shall take effect on the date of enactment of this Act.

SEC. 119. This title may be cited as the "District of Columbia Police and Firemen's Salary Act Amendments of 1972".

TITLE II—POLICEMEN AND FIREMEN'S RETIREMENT AND DISABILITY ACT AMENDMENTS

SEC. 201. (a) The Policemen and Firemen's Retirement and Disability Act (section 12 of the Act of September 1, 1916, D.C. Code, sec. 4–521 et seq.) is amended as follows:

(1) Subparagraph (5)(B) of subsection (a) of such Act (D.C. Code, sec. 4–521) is amended by striking out "or" immediately after "residence".

(2) Paragraph (5) of subsection (c) of such Act (D.C. Code, sec 4—523) is amended by adding at the end thereof the following new sentence: "No deposit shall be required for days of unused sick leave credited under subsection (h) of this section.".

(3) Subsection (h) of such Act (D.C. Code, sec. 4–528) is amended by adding at the end thereof the following new paragraph:

"(4) In computing an annuity under this subsection, the police or fire service of a member who has not retired prior to the effective date of this paragraph shall include, without regard to the limitation imposed by paragraph (3) of this subsection, the days of unused sick leave credited to him. Days of unused sick leave shall not be counted in determining a member's eligibility for an annuity under this subsection."

(4) The first paragraph of subsection (k) of such Act (D.C. Code, sec. 4–531) is amended to read as follows:

"(k)(1) If any member—

"(A) dies in the performance of duty and the Commissioner determines that (i) the member's death was the sole and direct result of a personal injury sustained while performing such duty, (ii) his death was not caused by his willful misconduct or by his intention to bring about his own death, and (iii) intoxication of the member was not the proximate cause of his death; and

"(B) is survived by a survivor, parent, or sibling,

a lump sum payment of $50,000 shall be made to his survivor if the survivor received more than one-half of his support from such member or if such member is not survived by any survivor (including a survivor who did not receive more than one-half of his support from such member), to his parent or sibling if the parent or sibling received more than one-half of his support from such member. If such member is survived by more than one survivor entitled to receive such payment, each such survivor shall be entitled to receive an equal share of such payment; or if such member leaves no survivor and more than one parent or sibling who is entitled to receive such payment, each such parent or sibling shall be entitled to receive an equal share of such payment."

(b) The amendments made by paragraphs (1) and (4) of subsection (a) of this section shall be effective on and after November 1, 1970. The amendments made by paragraphs (2) and (3) of such subsection shall be effective on the first day of the first pay period beginning on or after the date of enactment of this title.

SEC. 202. (a) Section 3 of the Act of July 11, 1947 (D.C. Code, sec. 4–183a), is amended by striking out "on the effective date of this section".

(b) Section 4 of such Act (D.C. Code, sec. 4–183b) is amended by striking out "on September 22, 1959".

(c) The amendments made by this section shall take effect on the date of the enactment of this Act.

SEC. 203. (a) Subsection (m) of the Policemen and Firemen's Retirement and Disability Act (D.C. Code, sec. 4–533) is amended by inserting "(1)" after "(m)" and by adding at the end thereof the following:

"(2) If a member is retired under subsection (f) or (g) of this section and is employed on or after the effective date of the District of Columbia Police and Firemen's Salary Act Amendments of 1972, such member shall, in accordance with such regulations as the Commissioner shall prescribe, notify the Commissioner of the employment; and the Commissioner shall, as soon as practicable after the receipt of such notice, require each such member to undergo a medical examination (satisfactory to the Commissioner) of the disability upon which the member's retirement under such subsection is based."

(b) The Commissioner of the District of Columbia shall (1) promulgate the regulations required by paragraph (2) of subsection (m) of the Policemen and Firemen's Retirement and Disability Act not later than ninety days after the date of the enactment of this Act, and (2) give timely written notice to each member retired under subsection (f) or (g) of the Policemen and Firemen's Retirement and Disability Act of the promulgation of such regulations.

(c) This section shall take effect on the date of the enactment of this Act.

TITLE III—REVENUE FOR SALARY INCREASES

SEC. 301. (a) (1) Section 125 of the District of Columbia Sales Tax Act (D.C. Code, sec. 47-2602) is amended by striking out "4 per centum" in the matter preceding paragraph (1) and inserting in lieu thereof "5 per centum".

(2) Paragraphs (2) and (3) of such section 125 are each amended by striking out "5 per centum" and inserting in lieu thereof "6 per centum".

(3) (A) Paragraph (a) of section 127 of such Act (D.C. Code, sec. 47-2604(a)) is amended by striking out "and other than sales or charges for rooms, lodgings, or accommodations furnished to transients,".

(B) Paragraph (c) of such section is repealed.

(C) Paragraphs (a) and (b) of such section are redesignated as paragraphs (1) and (2), respectively.

(b) (1) Section 212 of the District of Columbia Use Tax Act (D.C. Code, sec. 47-2702) is amended by striking out "4 per centum" in the matter preceding paragraph (1) and inserting in lieu thereof "5 per centum".

(2) Paragraphs (2) and (3) of such section 212 are each amended by striking out "5 per centum" and inserting in lieu thereof "6 per centum".

(c) The amendments made by this section shall take effect on the first day of the first month which begins on or after the thirtieth day after the date of enactment of this Act.

And the Senate agree to the same.

JOHN L. MCMILLAN,
EARLE CABELL,
W. S. (BILL) STUCKEY, Jr.,
ANCHER NELSEN,
JOEL T. BROYHILL,
Managers on the Part of the House.
THOMAS F. EAGLETON,
DANIEL K. INOUYE,
CHARLES MCC. MATHIAS, Jr.,
Managers on the Part of the Senate.

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and the Senate at the Conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 15580) to amend the District of Columbia Police and Firemen's Salary Act of 1958 to increase salaries, and for other purposes, submit the following joint statement to the House and the Senate in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report:

RETROACTIVITY

Section 118 of the Senate amendment provided that salary increases will be effective beginning with the first pay period beginning on or after March 1, 1972. Section 117 of the House bill provided that salary increases will be effective beginning with the first pay period beginning on or after July 1, 1972. The conference substitute provides that salary increases will be effective beginning with the first pay period beginning on or after May 1, 1972.

LONGEVITY COMPENSATION IN COMPUTATION OF RETIREMENT ANNUITIES

Section 110 of the Senate amendment provided that total service longevity compensation would be included in the computation of the amount of the retirement annuity of an officer or member. Section 110 of the House bill provided that such compensation would not be included in computing the retirement annuity of an officer or member. The conference substitute adopts the House provision.

DEPUTY CHIEFS

Section 110 of the House bill retained the provision of existing law which provides that deputy chiefs with 30 years of continuous service shall be placed in, and receive basic compensation at, the highest step in the salary class to which the position of deputy chief is assigned. Section 110 of the Senate amendment repealed this provision of law. The conference substitute adopts the House provision.

EDUCATIONAL SUBSIDIES

Section 113 of the Senate amendment authorized the Commissioner of the District of Columbia, in the case of the Metropolitan Police force and the Fire Department of the District of Columbia, the Secretary of the Treasury, in the case of the Executive Protective Service, and the Secretary of the Interior, in the case of the United States Park Police force, to pay additional compensation for successful completion by an officer or member of educational course work leading to a degree in police or fire science or administration. The additional annual compensation would be $200 fo each 15 credit hours completed except that such compensation could not exceed $1,600. The House bill contained no such provision. The conference substitute provides that if an officer or member is eligible to receive payment or reimbursement under section 4109 of title 5, United States Code, for his tuition expenses for educational course work in police or fire science or administration, such payment or reimbursement shall be increased to cover all such officer's or member's tuition expenses, Currently, 90 per centum of such tuition expenses are covered under section 4109.

SALARY USED IN COMPUTATION OF RETIREMENT ANNUITY

Section 201 of the House bill provided that the retirement annuity of officers and members who first came on active duty after July 9, 1972, would be based on the highest annual rate resulting from averaging his basic salary for any three years of continuous service. The retirement annuity of officers and members on active duty on July 9, 1972, would be based on the higher of (1) a three-year average of his salary, or (2) his pre-July 9, 1972, salary increased by 17 percent. The Senate amendment contained no such provision thus retaining existing law which provides that the retirement annuity of an officer or member is to be based on the basic salary of the officer or member in effect on the date of his retirement. The conference substitute adopts the Senate position, retaining existing law.

The conferees further agreed that the Commissioner of the District of Columbia should conduct a full and complete study of the feasibility and cost of, and the effect on morale of the officers and members as a result of, adopting a system of computing retirement annuities using a three-year average salary rate (as provided in the House bill). The conferees agreed that the results of the study should include the views and opinions of the Secretary of the Interior and the Secretary of the Treasury, and should be transmitted to the Congress within six months after the date of the enactment of the bill.

MEDICAL EXAMINATIONS FOR OFFICERS AND MEMBERS RETIRED FOR DISABILITY

Section 202 of the House bill provided that an officer or member who is retired for a disability and who on or after July 9, 1972, is employed shall notify the Commissioner of his employment and shall undergo such medical examinaton of his disability as the Commissioner may prescribe. The Senate amendment contained no such provision. The conference substitute adopts the House provision.

TREATMENT OF UNUSED SICK LEAVE

Sections 201(a) (2) and (3) of the Senate amendment authorized unused sick leave to be used in determining the amount of an optional retirement annuity of an officer or member. It was also provided that the days of unused sick leave shall not be counted in determining eligibility for an optional retirement annuity. The House bill contained no such provisions. The conference substitute adopts the Senate provisions.

SURVIVORS LUMP SUM BENEFIT

Section 201(a) (4) of the Senate amendment expanded eligibility for the $50,000 lump sum benefit payable upon the death of a member in the performance of duty to include a deceased member's parents and siblings who receive more than one-half of their support from the deceased member. A parent or sibling would be eligible only if the deceased member is not survived by a spouse or child. The House bill contained no such provision. Existing law provides that only the spouse and the children who received more than one-half of their support from the deceased member are entitled to such benefit. The conference substitute adopts the Senate provision which is to take effect as of November 1, 1970.

RETIREMENT ANNUITY OF POLICE BAND DIRECTOR

Section 202 of the Senate amendment permitted the current police band director and his successors to retire under provisions of District of Columbia law which previously were limited to the band director in office in September of 1959. The House bill contained no such provision. The conference substitute adopts the Senate provision.

SALES TAX INCREASE

Section 302 of the Senate amendment increased the rate of the sales and use tax on laundry and dry cleaning services, sales of nonprescription drugs, and charges for textiles rentals from 2 percent to 5 percent. The House bill contained no such provisions. The conference substitute contains no such provisions.

INCREASE IN CIGARETTE TAX

Section 311 of the Senate amendment increased the tax on cigarettes from 4¢ per package to 6¢ per package. The House bill contained no such provision. The conference substitute contains no such provision.

Ryan
Scheuer
Schmitz
Smith, Calif.
Stuckey
Veysey
Waldie
Wilson, Charles H.

The **SPEAKER**. On this rollcall 362 Members have answered to their names, a quorum.

By unanimous consent, further proceedings under the call were dispensed with.

PRIVATE CALENDAR

The **SPEAKER**. The Clerk will call the first bill on the Private Calendar.

MRS. ROSE THOMAS

The Clerk called the bill (H.R. 2067) for the relief of Mrs. Rose Thomas.

Mr. **GROSS**. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The **SPEAKER**. Is there objection to the request of the gentleman from Iowa?

There was no objection.

MARIA LUIGIA DI GIORGIO

The Clerk called the bill (H.R. 2070) for the relief of Maria Luigia Di Giorgio.

Mr. **GROSS**. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The **SPEAKER**. Is there objection to the request of the gentleman from Iowa?

There was no objection.

MRS. ANNA MARIA BALDINI DELA ROSA

The Clerk called the bill (H.R. 3713) for the relief of Mrs. Anna Maria Baldini Dela Rosa.

Mr. **ROUSSELOT**. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The **SPEAKER**. Is there objection to the request of the gentleman from California?

There was no objection.

CHARLES COLBATH

The Clerk called the bill (H.R. 4310) for the relief of Charles Colbath.

Mr. **HALL**. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The **SPEAKER**. Is there objection to the request of the gentleman from Missouri?

There was no objection.

MRS. CARMEN PRADO

The Clerk called the bill (H.R. 6108) for the relief of Mrs. Carmen Prado.

Mr. **GROSS**. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The **SPEAKER**. Is there objection to the request of the gentleman from Iowa?

There was no objection.

RENE PAULO ROHDEN-SOBRINHO

The Clerk called the bill (H.R. 5181) for the relief of Rene Paulo Rohden-Sobrinho.

Mr. **HALL**. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The **SPEAKER**. Is there objection to the request of the gentleman from Missouri?

There was no objection.

CATHERINE E. SPELL

The Clerk called the bill (H.R. 7312) for the relief of Catherine E. Spell.

Mr. **HALL**. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The **SPEAKER**. Is there objection to the request of the gentleman from Missouri?

There was no objection.

DONALD L. BULMER

The Clerk called the bill (H.R. 1994) for the relief of Donald L. Bulmer.

Mr. **GROSS**. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The **SPEAKER**. Is there objection to the request of the gentleman from Iowa?

There was no objection.

MRS. MARINA MUNOZ DE WYSS (NEE LOPEZ)

The Clerk called the bill (H.R. 5579) for the relief of Mrs. Marina Munoz de Wyss (nee Lopez).

Mr. **HALL**. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The **SPEAKER**. Is there objection to the request of the gentleman from Missouri?

There was no objection.

CARMEN MARIA PENA-GARCANO

The Clerk called the bill (H.R. 6342) for the relief of Carmen Maria Pena-Garcano.

Mr. **HALL**. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The **SPEAKER**. Is there objection to the request of the gentleman from Missouri?

There was no objection.

WILLIAM H. NICKERSON

The Clerk called the bill (H.R. 4064) for the relief of William H. Nickerson.

Mr. **HALL**. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The **SPEAKER**. Is there objection to the request of the gentleman from Missouri?

There was no objection.

ALBINA LUCIO Z. MANLUCU

The Clerk called the bill (S. 559) for the relief of Albina Lucio Z. Manlucu.

There being no objection, the Clerk read the bill as follows:

S. 559

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, for the purposes of the Immigration and Nationality Act, Albina Lucio Z. Manlucu shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this Act, upon payment of the required visa fee. Upon the granting of permanent residence to such alien as provided for in this Act, the Secretary of State shall instruct the proper officer to reduce by one number, during the current fiscal year or the fiscal year next following, the total number of immigrant visas and conditional entries which are made available to natives of the country of the alien's birth under paragraph (1) through (8) of section 203(a) of the Immigration and Nationality Act.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

MARGARIDA ALDORA CORREIA DOS REIS

The Clerk called the bill (H.R. 6504) for the relief of Margarida Aldora Correia dos Reis.

Mr. **ROUSSELOT**. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The **SPEAKER**. Is there objection to the request of the gentleman from California?

There was no objection.

EMILIA RUFFOLO

The Clerk called the bill (H.R. 10142) for the relief of Emilia Ruffolo.

Mr. **GROSS**. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The **SPEAKER**. Is there objection to the request of the gentleman from Iowa?

There was no objection.

DONALD P. LARIVIERE

The Clerk called the bill (H.R. 8952) for the relief of Donald P. Lariviere.

Mr. **ROUSSELOT**. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The **SPEAKER**. Is there objection to

the request of the gentleman from California?

There was no objection.

MR. AND MRS. JOHN F. FUENTES

The Clerk called the bill (H.R. 11045) for the relief of Mr. and Mrs. John F. Fuentes.

Mr. HALL. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Missouri?

There was no objection.

ARLINE LOADER AND MAURICE LOADER

The Clerk called the bill (S. 341) for the relief of Arline Loader and Maurice Loader.

Mr. HALL. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Missouri?

There was no objection.

FREDI ROBERT DREILICH

The Clerk called the bill (H.R. 2725) for the relief of Fredi Robert Dreilich.

Mr. ROUSSELOT. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

DENNIS YIANTOS

The Clerk called the bill (S. 65) for the relief of Dennis Yiantos.

Mr. GROSS. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Iowa?

There was no objection.

SGT. GARY L. RIVERS

The Clerk called the bill (H.R. 12638) for the relief of Sgt. Gary L. Rivers, U.S. Marine Corps, retired.

There being no objection, the Clerk read the bill as follows:

H.R. 12638

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That Sergeant Gary L. Rivers, United States Marine Corps, retired, is relieved of all liability for repayment to the United States of the sum of $1,147.41 representing the amount of overpayment of compensation from (1) overcrediting a variable reenlistment bonus of $675.60; (2) failure to liquidate a previous overpayment of $239.31; and (3) payment of $232.50 of allotments without corresponding deductions. In the audit and settlement of the accounts of any certifying or disbursing officer of the United States, full credit shall be given for the amount for which liability is relieved by this Act.

Sec. 2. (a) The Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to the said Sergeant Gary L. Rivers, the sum of any amounts received or withheld from him on account of the overpayments referred to in the first section of this Act.

(b) No part of the amount appropriated in this Act in excess of 10 per centum thereof shall be paid or delivered to or received by any agent or attorney on account of services rendered in connection with this claim, and the same shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this Act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

With the following committee amendments:

Page 1, line 5, strike "$1,147.41" and insert "$1,153.86".

Page 1, line 9, strike "and".

Page 1, line 10, after "deductions", insert "; and (4) failure to recoup a pro rata portion of reenlistment bonus and variable reenlistment bonus for a period of time lost, in the amount of $6.45".

Page 2, line 10, strike "in excess of 10 per centum thereof".

The committee amendments were agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

SEAVIEW ELECTRIC CO.

The Clerk called the resolution (H. Res. 943) to refer the bill (H.R. 3462) entitled "A bill for the relief of Seaview Electric Company" to the Chief Commissioner of the Court of Claims.

There being no objection, the Clerk read the resolution as follows:

H. Res. 943

Resolved, That H.R. 3462, entitled "A bill for the relief of Seaview Electric Company", together with all accompanying papers, is hereby referred to the Chief Commissioner of the Court of Claims pursuant to sections 1492 and 2509 of title 28, United States Code, for further proceedings in accordance with applicable law.

The resolution was agreed to.

ELMER ERICKSON

The Clerk called the bill (S. 889) to restore the postal service seniority of Elmer Erickson.

There being no objection, the Clerk read the bill as follows:

S. 889

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled. That, in the administration of the laws, rules, and regulations pertaining to the seniority rights of employees of the Post Office Department, Elmer O. Erickson, of Minneapolis, Minnesota, an employee of the postal service assigned to the Saint Paul and Aberdeen railway post office, Minnesota, shall be entitled to receive credit for service performed by him in the postal service during the period from August 12, 1940, through January 13, 1961, in like manner as if the provisions of sections 748.1 through 748.17 of the Postal Transportation Service seniority rules, Post Office Department Publication 31, dated August 18, 1958, under which certain employees who transfer from and later reenter an occupational group subject to such rules will have service seniority based upon the seniority they had attained before transferring from such group, had been applicable with respect to the said Elmer O. Erickson during the period from January 14, 1961, the date he transferred from the clerical group, which is the occupational group into which he and all other former employees of the Postal Transportation Service were placed when such Service was merged into the post offices, to April 29, 1961, the date he transferred to such group.

Sec. 2. In making any adjustment in salary level or step authorized by section 1 of this Act, no payment shall be made by the United States Postal Service for any period prior to the date of enactment of this Act.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

WILLIAM JOHN WEST

The Clerk called the bill (S. 2575) for the relief of William John West.

Mr. ROUSSELOT. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

RITA ROSELLA VALLERIANI

The Clerk called the bill (S. 2704) for the relief of Rita Rosella Valleriani.

There being no objection, the Clerk read the bill as follows:

S. 2704

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, for the purposes of sections 203(a)(1) and 204 of the Immigration and Nationality Act, Rita Rosella Valleriani shall be held and considered to be the natural-born alien daughter of Mr. and Mrs. Vincenzo Valleriani, citizens of the United States: *Provided,* That the parents, brothers, or sisters of the beneficiary shall not, by virtue of such relationship, be accorded any right, privilege, or status under the Immigration and Nationality Act.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

WALTER EDUARD KOENIG

The Clerk called the bill (H.R. 14173) for the relief of Walter Eduard Koenig.

There being no objection, the Clerk read the bill as follows:

H.R. 14173

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, in the administration of the Immigration and Nationality Act, Walter Eduard Koenig, shall be held and considered to have complied with the provisions of section 316 of that Act as they relate to residence and physical presence.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and motion to reconsider was laid on the table.

MRS. GAVINA A. PALACAY

The Clerk called the bill (H.R. 4646) for the relief of Mrs. Gavina A. Palacay.

Mr. HALL. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Missouri?

There was no objection.

MRS. PURITA PANINGBATAN BOHANNON

The Clerk called the bill (H.R. 10711) for the relief of Mrs. Purita Paningbatan Bohannon.

There being no objection, the Clerk read the bill as follows:

H.R. 10711

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, in the administration of the Immigration and Nationality Act, Mrs. Purita Paningbatan Bohannon, the widow of a United States citizen, shall be determined to be an immediate relative within the meaning of section 201(b) of that Act and the provisions of section 204 shall be inapplicable in her case.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

FLORA DATILES TABAYO

The Clerk called the bill (H.R. 10712) for the relief of Flora Datiles Tabayo.

There being no objection, the Clerk read the bill, as follows:

H.R. 10712

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, in the administration of the Immigration and Nationality Act, Flora Datiles Tabayo may be classified as a child within the meaning of section 101(b)(1)(F) of the Act, upon approval of a petition filed in her behalf by Mr. and Mrs. Jack Lee, citizens of the United States, pursuant to section 204 of the Act.

With the following committee amendments:

On page 1, line 7, strike out the language "citizens of the United States," and substitute in lieu thereof the following: a citizen of the United States and a lawfully resident alien, respectively.

On page 1, line 8, strike out the word "Act." and insert in lieu thereof the following: "Act: *Provided,* That the natural parents or brothers or sisters of the beneficiary shall not, by virtue of such relationship, be accorded any right, privilege, or status under the Immigration and Nationality Act."

The committee amendments were agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

JAY ALEXIS CALIGDONG SIAOTONG

The Clerk called the bill (H.R. 12204) for the relief of Jay Alexis Caligdong Siaotong.

There being no objection, the Clerk read the bill, as follows:

H.R. 12204

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, in the administration of the Immigration and Nationality Act, Jay Alexis Caligdong Siaotong may be classified as a child within the meaning of section 101(b)(1)(F) of the Act, upon approval of a petition filed in her behalf by Bautista and Coronacion Siaotong, citizens of the United States, pursuant to section 204 of the Act: *Provided,* That the natural parents or brothers or sisters of the beneficiary shall not, by virtue of such relationship, be accorded any right, privilege, or status under the Immigration and Nationality Act.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

ANKA KOSANOVIC

The Clerk called the bill (H.R. 1777) for the relief of Anka Kosanovic.

Mr. HALL. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Missouri?

There was no objection.

MARIA CAMILLA GIULIANI NIRO

The Clerk called the bill (H.R. 3899) for the relief of Maria Camilla Giuliani Niro.

There being no objection, the Clerk read the bill, as follows:

H.R. 3899

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the provisions of section 316(a) of the Immigration and Nationality Act as they relate to residence and physical presence requirements for naturalization, shall be inapplicable in the case of Maria Camilla Giuliani Niro.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

ROSITA E. HODAS

The Clerk called the bill (H.R. 5324) for the relief of Rosita E. Hodas.

There being no objection, the Clerk read the bill, as follows:

H.R. 5324

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, for the purposes of the Immigration and Nationality Act, Rosita E. Hodas shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this Act, upon payment of the required visa fee. Upon the granting of permanent residence to such alien as provided for in this Act, the Secretary of State shall instruct the proper officer to deduct the required number from the total number of immigrant visas and conditional entries which are made available to natives of the country of each alien's birth under paragraphs (1) through (8) of section 203(a) of the Immigration and Nationality Act.

With the following committee amendment:

Strike out all after the enacting clause and insert in lieu thereof the following:

"That, in the administration of the Immigration and Nationality Act, Rosia E. Hodas, the widow of a citizen of the United States, shall be held and considered to be within the purview of section 201(b) of that Act and the provisions of section 204 of such Act shall not be applicable in this case."

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

MRS. NGUYEN THI LE FINTLAND AND SUSAN FINTLAND

The Clerk called the bill (H.R. 5923) for the relief of Mrs. Nguyen Thi Le Fintland and Susan Fintland.

There being no objection, the Clerk read the bill, as follows:

H.R. 5923

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, for the purposes of the Immigration and Nationality Act, Nguyen Thi Le Fintland and Susan Fintland shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this Act, upon payment of the required visa fees. Upon the granting of permanent residence to such aliens as provided in this Act, the Secretary of State shall instruct the proper officer to deduct two numbers from the total number of immigrant visas and conditional entries which are made available to natives of the aliens' birth under paragraphs (1) through (8) of section 203(a) the Immigration and Nationality Act.

With the following committee amendment:

Strike out all after the enacting clause and insert in lieu thereof the following:

"That, in the administration of the Immigration and Nationality Act, Mrs. Nguyen Thi Le Fintland and Susan Fintland, the widow and stepdaughter, respectively, of a citizen of the United States, shall be held and considered to be within the purview of section 201(b) of that Act and the provisions of section 204 of such Act shall not be applicable in their cases."

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

Mr. ROUSSELOT. Mr. Speaker, I ask unanimous consent that the further call of the Private Calendar be dispensed with.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

DEFENSE DEPARTMENT BRIEFING ON VIETNAM

(Mr. PRICE of Illinois asked and was given permission to address the House for 1 minute, and to revise and extend his remarks.)

Mr. PRICE of Illinois. Mr. Speaker, I take this occasion to invite the Members, all Members of the House, to attend a briefing tomorrow morning at 10:30 in the committee room of the House Committee on Armed Services. At that time the Defense Department will brief the Members on the current situation in Vietnam.

CONTROVERSY OVER STAFF MEMBER OF THE COMMITTEE ON FOREIGN AFFAIRS

(Mr. HAYS asked and was given permission to address the House for 1 minute, and to revise and extend his remarks.)

Mr. HAYS. Mr. Speaker, by some strange coincidence, I did not get a copy of the letter which the gentleman from Minnesota (Mr. Fraser) circulated this morning telling his side of the little controversy about the staff member on the Committee on Foreign Affairs.

The truth of the matter is that the staff member was one of those created by the Hansen committee, of which I am a member. Apparently, some of these staff people think that they owe allegiance to nobody, and especially not the chairman of the full committee.

What this man was doing, as it was reported to me by the staff of the full committee, was arranging and scheduling hearings for my subcommittee, of which I am the chairman, without either consulting me or the chairman of the full committee.

But, be that as it may, I have agreed on my own initiative to sign his payroll for July. I am not going to do anything about August until the chairman of the full committee, the gentleman from Pennsylvania (Mr. Morgan) has a chance to talk with him, and to tell him—as I am told he is going to tell him—that he is to work for one subcommittee, and that subcommittee only, unless he clears it with the chairman of the full committee to work for another.

Mr. Speaker, while I am on this subject, let me say to the Members that the Committee on House Administration unanimously ordered me last week to write a letter, which is in the process of being prepared, to all chairmen, advising them that these extra staff people for subcommittee chairmen who were funded by the Committee on House Administration, and that they are under the ultimate responsibility of the chairman of the full committee.

I do not know whether it is true or not, but I have heard report and, in fact, I had one chairman, and I will not mention his name because he told me in confidence—he told me that two of the people he had signed on for last January, he had never seen or heard of since. He does not know whether they are in Washington and whether they are working or not.

Now the truth is—this House Administration Committee has to fund these extra jobs and we are going to be a little bit reluctant unless we know more about it.

Finally, I have no fear of going to the Rules Committee. But there are 1,700,000 flood victims waiting for this bill which was first on the calendar today and I am not willing for this matter to stand in the way of getting that bill passed even if Mr. Fraser is willing to hold it up by quorum calls.

But, if you folks in the House of Representatives want a rubber-stamp to be put on every payroll—you pass a law to that effect. Do not say that the chairman, as long as it is me, shall sign it because I do not rubberstamp anything. That is why the cafeterias were losing a half million dollars a year, because the payrolls were rubber-stamped every 2 weeks.

THE POWERS OF THE COMMITTEE ON HOUSE ADMINISTRATION

(Mr. OBEY asked and was given permission to address the House for 1 minute.)

Mr. OBEY. Mr. Speaker, I yield to the gentleman from Minnesota (Mr. Fraser).

Mr. FRASER. Mr. Speaker, I do not want to argue here the question of whether my staff employee, who is a hard-working employee, and who has done a good job, may have done something to which Mr. Hays could properly take offense or not.

My problem was, that regardless of what was involved, the first announcement I got from Mr. Hays was that my man had been fired by Mr. Hays acting in his capacity as chairman of the House Administration Committee.

Neither the rules of the House or the resolution on the contingent funds or any other statute provides the chairman with such power. The power to approve vouchers to pay committee employees resides in the full committee.

I am delighted that we have passed beyond the issue of getting the staff member paid. I apologize to the House for the inconvenience which occurred today, but the issue remains as to whether the chairman of the House Administration Committee should have the power to withhold approval of payment of the employees of committees, or payment of your telephone account, and disbursements from your other special allowances that come from the contingent fund, or refuse to approve the appointment by the Speaker or by other officers of the House to fill already authorized positions.

I believe that this question must be addressed by the House in the future and I hope the House will have an opportunity to do so.

INVESTIGATION OF NONESSENTIAL EMPLOYEES

(Mr. ANNUNZIO asked and was given permission to address the House for 1 minute.)

Mr. ANNUNZIO. Mr. Speaker, I would like the Members of the House to know, as a member of the House Administration Committee, that I was appointed by the chairman of that committee as chairman of a special committee to investigate nonessential employment in the four divisions that cover the House of Representatives.

In that capacity, the full chairman of the committee has given me complete authority to act.

I have frozen all jobs. We have not tried to fill any job and I want the Members to know that the people of the U.S. Civil Service Commission are making a study on every employee of this House as to their duties, their salaries, and their functions.

I want to commend the chairman of the House Administration Committee for taking this long needed step in this House. You and I know we have too many people who are around, they are faceless people and when this study is completed by the U.S. Civil Service Commission, I want the Members of the House to know that the appropriate action will be taken by me in making my recommendations to the chairman and to the committee, and we intend to save money wherever money is needed to be saved, as our distinguished chairman has done in the cafeteria and restaurants.

INVESTIGATION OF NONESSENTIAL EMPLOYEES

(Mr. SIKES asked and was given permission to address the House for 1 minute.)

Mr. SIKES. Mr. Speaker, I yield to the gentleman from Ohio (Mr. Hays).

Mr. HAYS. Mr. Speaker, I do not want to keep this going. There are two things I want to say.

First, as you know, Mr. Fraser had a minute earlier.

I think the gentleman from Illinois (Mr. Annunzio) inadvertently said "Members" of the House. What he meant to say is "staff officials" of the House and of the House itself.

The second thing is, I have not refused to sign any properly documented appointment by the Speaker or anybody else. I resent Mr. Fraser's dragging that in. It was not true. The facts of the matter are, when these documents came to my desk I was out of town and I simply do not allow the staff, as was the custom in the past, to use a rubber stamp and put my name on it. When I came back there were a couple of jobs that were supposed to be frozen. The Doorkeeper had tried to run around the House Administration Committee. He sent them upstairs first; they did not get signed; he took them to the Speaker and the Speaker and I sat down and ironed that matter out.

Mr. ANNUNZIO. Will the gentleman yield?

Mr. HAYS. I yield to the gentleman from Illinois.

Mr. ANNUNZIO. I thank the gentleman for making that correction, but I thought I said four divisions of the House, meaning the Clerk of the House of Representatives, the Postmaster, the

Sergeant at Arms, and the Doorkeeper, the divisions under the House. We have nothing to do with the staffs of Members of the House. That is strictly their business.

Mr. HAYS. I thank the gentleman.

LESTER L. STITELER

Mr. DONOHUE. Mr. Speaker, I ask unanimous consent to take from the Speaker's desk the bill (H.R. 10676) for the relief of Lester L. Stiteler, with a Senate amendment thereto, and concur in the Senate amendment.

The Clerk read the title of the bill.

The Clerk read the Senate amendment, as follows:

Page 1, line 4, strike out "comprise," and insert "compromise,".

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The Senate amendment was concurred in.

A motion to reconsider was laid on the table.

DISASTER RELIEF SUPPLEMENTAL APPROPRIATIONS, 1973

Mr. MAHON. Mr. Speaker, I call up the bill (H.R. 16254) making certain disaster relief supplemental appropriations for the fiscal year 1973, and for other purposes, and ask unanimous consent that the bill be considered in the House as in Committee of the Whole.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

The Clerk read the bill as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the following sums are appropriated, out of any money in the Treasury not otherwise appropriated, for the fiscal year ending June 30, 1973, and for other purposes, namely:

CHAPTER I

DEPARTMENT OF AGRICULTURE

FARMERS HOME ADMINISTRATION

For an additional amount for "Salaries and expenses," $1,800,000.

CHAPTER II

DEPARTMENT OF THE ARMY

CORPS OF ENGINEERS—CIVIL

CONSTRUCTION, GENERAL

For an additional amount for "Construction, general," $3,500,000, to remain available until expended.

FLOOD CONTROL AND COASTAL EMERGENCIES

For an additional amount for "Flood control and coastal emergencies," $26,000,000, to remain available until expended.

EXECUTIVE OFFICE OF THE PRESIDENT

APPALACHIAN REGIONAL DEVELOPMENT PROGRAMS

For an additional amount for "Appalachian regional development programs," $16,000,000, to remain available until expended.

CHAPTER III

DEPARTMENT OF COMMERCE

ECONOMIC DEVELOPMENT ADMINISTRATION

DEVELOPMENT FACILITIES

For an additional amount for "Development facilities," $30,000,000: *Provided,* That such additional amount shall not be subject to the restrictions of the last sentence of Section 105 of the Public Works and Economic Development Act of 1965, as amended.

PLANNING, TECHNICAL ASSISTANCE, AND RESEARCH

For an additional amount for "Planning, technical assistance, and research," $9,100,000.

OPERATIONS AND ADMINISTRATION

For an additional amount for "Operations and administration," $900,000.

SMALL BUSINESS ADMINISTRATION

SALARIES AND EXPENSES

For an additional amount for "Salaries and expenses," $20,000,000, to be transferred from the "Disaster loan fund."

DISASTER LOAN RELIEF

For additional capital for the "Disaster loan fund," authorized by the Small Business Act, as amended, $1,300,000,000, to remain available until expended.

CHAPTER IV

EXECUTIVE OFFICE OF THE PRESIDENT

DISASTER RELIEF

For an additional amount for "Disaster relief," $200,000,000, to remain available until expended: *Provided,* That not to exceed 3 per centum of the foregoing amount shall be available for administrative expenses.

CHAPTER V

GENERAL PROVISION

No part of any appropriation contained in this Act shall remain available for obligation beyond the current fiscal year unless expressly so provided herein.

Mr. MAHON. Mr. Speaker, I move to strike the last word.

(Mr. MAHON asked and was given permission to revise and extend his remarks, and to include certain tables and documentary material.)

Mr. MAHON. Mr. Speaker, the supplemental disaster relief appropriations required at this time are greater than at any time in the history of the Republic. Tropical storm Agnes caused unparalleled destruction in many areas of the Eastern United States.

The bill before us provides $1,587,300,000 for further assistance to disaster victims and to States and communities affected. The bill is made up of several chapters. The report is available to Members.

In addition to the $1.5 billion-plus in the pending bill, there was recently made available $200 million to the highway program, which makes a total of about $1.7 billion-plus. If you couple that to appropriations made otherwise for disaster relief, the total appropriation or other availability for this session is in excess of $2 billion.

Insofar as I know, there is no controversy in regard to the measure before us, and unless there are Members who are interested in particular questions, we can, I think, move along rather rapidly.

Of course, everyone has the opportunity to speak or to offer amendments. I would point out, as does the report, that we are providing the amounts requested by the President, plus $17.5 million additional. It seems to me to be the best that we can do under the circumstances. It may very well develop that as the progress of reconstruction progresses, that additional funds will be found necessary.

Mr. KAZEN. Mr. Speaker, will the gentleman yield for a question?

Mr. MAHON. I yield to the gentleman from Texas.

Mr. KAZEN. Mr. Speaker, yesterday the House concurred in the conference report on the disaster bill. Will these appropriations that are contained in this bill be used in furtherance of that law we passed yesterday?

Mr. MAHON. The funds are available under several laws for disaster relief and assistance in connection with the Agnes disaster. The broadening and liberalization of the programs represented by the additional legislation referred to, as I understand, may or may not have been fully anticipated in this appropriation. I doubt that anyone can say for certain at this time.

Mr. KAZEN. That precisely is my question, Mr. Speaker. In other words, Mr. Speaker, what I am interested in knowing is whether the moneys in this appropriation bill will cover the subject of the bill we passed last night.

Mr. MAHON. I would hope so, but if it does not the additional funds can be requested and provided.

Mr. KAZEN. Because, as the chairman knows, the bill we approved yesterday provides not only for the Agnes disaster but also for disasters going back to January 1, of 1972.

Mr. MAHON. The gentleman is correct.

Mr. KAZEN. The moneys in this bill are going toward solving the problems from January 1, 1972, to the present.

Mr. MAHON. This appropriation is a supplemental appropriation to cover all the disasters insofar as the funds will go, and if the funds are adequate it would cover all requirements that were anticipated or authorized by law.

Mr. KAZEN. I thank the chairman.

Mr. MAHON. That, I believe, is a fair interpretation.

Mr. LONG of Maryland. Mr. Speaker, will the gentleman yield?

Mr. MAHON. I yield to the gentleman from Maryland.

Mr. LONG of Maryland. Mr. Speaker, this is emergency legislation. We all realize the importance of it. Those of us who represent areas which were hard hit by this hurricane have had people coming to us wondering when they are going to get help and get relief. All over this country these questions are being asked. I would hope we could obtain a statement by the chairman of the sense of the Congress that, in view of the fact this supplemental appropriation is being passed, we expect relief to be provided expeditiously and efficiently.

Mr. MAHON. The gentleman is correct in that we need to provide the assistance as quickly as reasonably possible. The gentleman from Maryland has been insisting on a more expeditious and efficient handling of the program. He raised this matter some weeks ago when we had another bill providing supplemental funds for the program. I would say I shall do everything I can, and I want the record to show that the Congress expects these funds to be expended expeditiously in the interest of the flood sufferers. Of course, we want it done without waste or mismanagement.

Mr. LONG of Maryland. We should all thank the chairman for the expeditious way in which he has handled this legislation.

The SPEAKER. The time of the gentleman from Texas has expired.

(By unanimous consent, Mr. MAHON was allowed to proceed for 5 additional minutes.)

Mr. ROBISON of New York. Mr. Speaker, will the gentleman yield?

Mr. MAHON. I yield to the gentleman from New York.

Mr. ROBISON of New York. Mr. Speaker, in further reply to the question the chairman answered a moment ago, relative to the moneys in this bill and as far as the changes in the disaster relief program, broadly the bill we accepted the conference report on yesterday directs itself to homeowners and businessmen. I would point out to the chairman and my colleagues that this bill does approve $1.3 billion appropriations for the Small Business Administration, and a part of that will go to meet the costs of this program. How much that will be, I do not think anybody at the present time knows, but this would be the best estimate we have at the present time.

Mr. MAHON. I thank the gentleman for his contribution.

Mr. CORMAN. Mr. Speaker, will the gentleman yield?

Mr. MAHON. I yield to the gentleman from California.

Mr. CORMAN. Does the Appropriations Committee have any estimate as to the public property damage; that is, the property owned by the public which, as I understand it, is to be paid for in full by the Federal Government? Are there any estimates as to how much that obligation will be? That is exclusive of our obligation for losses to private individuals.

What is the public loss for which we will assume total responsibility?

Mr. MAHON. Some facts were developed on the matter in the hearings. I do not have the exact figures at my fingertips but of course there were vast losses in the public domain.

As Members know, $200 million has been made available not through this legislation but otherwise for the highway program.

The gentleman from Oklahoma (Mr. STEED) the chairman of the subcommittee handling the disaster relief part of the appropriation, might be able to supply some information.

Mr. STEED. Mr. Speaker, in the hearings this whole subject was gone into, and there was a preliminary report by the Office of Emergency Preparedness, which is shown on page 90 of the hearings. It gives by State the amounts that are estimated to be needed. It gives the totals. It lists the loss of life by States. It is rather detailed. It is all there, and I recommend that the gentleman refer to pages 90 through 96 of the hearings which have all the statistical information.

By way of elaboration, I would add a summary compiled from figures supplied by the Office of Emergency Preparedness:

Estimated losses caused by tropical storm Agnes

Estimated property loss (in 206 counties and 27 cities):	
(a) Public facilities (Federal, State, and local)	$700,000,000
(b) Business and industry	1,600,000,000
(c) Private (personal)	1,100,000,000
Total	3,400,000,000

Homes: damaged, 100,000, destroyed, 3,500.

Bridges: Damaged or destroyed, 515; estimated loss, $366,000,000.

Schools: Damaged or destroyed, 1,104; estimated loss, $62,700,000.

Persons unemployed as a result of Agnes, 88,520.

Lives lost, 118.

Mr. ABOUREZK. Mr. Speaker, will the gentleman yield?

Mr. MAHON. I yield to the gentleman from South Dakota.

Mr. ABOUREZK. I noticed the conferenct report spoke only of Hurricane Agnes and the results of that disaster. Does this money which is to be appropriated in this bill include any other disaster aside from Hurricane Agnes?

Mr. MAHON. Yes. It is an addition to funds available in the regular disaster appropriations. Each year we have disaster appropriations. We cannot anticipate in advance what disasters will occur. This adds to the funds. The funds will go principally for Hurricane Agnes, but if there are other disasters they will be available for disaster-type assistance.

Mr. ABOUREZK. In other words, this is not restricted and would be available for use in the South Dakota disaster?

Mr. MAHON. The gentleman is correct.

Mr. FLOOD. Mr. Speaker, I move to strike the requisite number of words.

Mr. Speaker, I come from the city of Wilkes-Barre, Pa. Need I say more?

Believe it or not, as Members know, my name is FLOOD. So this is a question of one Flood against another.

As Members will recall, just a few weeks ago the President sent to the Congress a request for an emergency disaster relief fund for Hurricane Agnes, of $100 million. In the Appropriations Committee I immediately amended that to make it $200 million, and that committee acted unanimously in favor, and so did this House and the Congress. That was just a few weeks ago, $200 million. Do you remember?

Then in a few weeks the President sent this request to the Congress for $1.7 billion. It will amount to $1.8 billion, as the chairman told us. That was acted on unanimously by the Appropriations Committee, as I am sure it will be by the House and the Congress today.

Mr. Speaker, in that part of my district alone damaged by this disaster, the greatest civil disaster, as I told you a month ago, in the history of the republic—do you hear that? The greatest civil disaster in the history of this republic. Let me boggle your minds. In my district alone damage undoubtedly will be $1 billion. Do you hear that? In my district alone. In the Agnes hurricane, I am speaking not at all of the other five States which were badly damaged and the District of Columbia.

Looking you in the eye now I tell you you are talking about damage of $5 billion. Do you hear? Just so you know. What you are doing we are grateful for and the speed at which you are doing it we are grateful for. More is going into my district now, this day, and has been going in the last 20 great disasters of all kinds in our history. All right now.

But this is a drop in the bucket as to what will be needed, I tell you. You are going to have to do this. The existing laws will not do. The scope of the laws will have to meet the scope of this disaster. Do you hear? The scope of the laws will have to meet the scope of this disaster. There will have to be something in the nature of a permanent disaster fund. How big? We do not know. How administered? We do not know. From what source the fund will come? We yet do not know. But this will have to be done. I am telling you. Do you hear? From now on. Not only to meet this emergency now but in the years ahead so that the administrative heads of the Government agencies and the Congress are prepared as they were not prepared to meet this one. We were not prepared.

The shock to the people and the individual businesses has been indescribable. I think you know now. I think you know now in the last couple of weeks. I think you know what I am talking about.

This will have to be done. A new concept, a new way, a new operation, to handle the flood plains by the Engineers and the responsible Federal agencies. Dams, dikes, dredging. All of these things. The experiences of the Chinese; yes—of the North Vietnamese, and of the north and south. You have heard about dikes; yes. The Dutch. Yes; we must borrow the knowledge of all these people who for a thousand years have done this. We will be 200 years in 4 years. We are just babes in the woods on preparing for and handling these natural disasters; babes in the woods. We cannot be any longer. We cannot be. We cannot be.

Just loans? What a great thing it is; yes. From 5½ percent and now down to 1 percent. Marvelous. Five-thousand-dollar forgiveness, marvelous.

The SPEAKER. The time of the gentleman has expired.

(By unanimous consent, Mr. FLOOD was allowed to proceed for 2 additional minutes.)

Mr. FLOOD. Great things the loans, but you must examine from now on the total loss of equities. The loans are great, but the equities are gone. With businesses, small businesses, and private homeowners and their possessions, their equities are wiped out. There is no equity. With additional mortgages and additional loans, you have to examine from now on the impact of grants and loans or a combination of both. It is a new thing. I know. You know.

I know, you know—I am talking to you in the Congress at Washington—that some new things will have to be done, and you will have to do them, right away.

All right, you ask me "what new things, Flood?" Well let me tell you—and let us begin right here, and I repeat for the purpose of emphasis, let us begin in the Wyoming Valley, in the heart of the greatest civic disaster in the history of the Republic. It is by far the most massive—we all know that.

What is needed is an integrated, coordinated, trained, on-the-alert, organization to sweep into an area in the wake of a disaster. This group must be held constantly on "yellow alert"—standing by like a wing of SAC bombers—ready to go on "red alert" at a moment's notice. And crack troops at that. Coordination must be established at all governmental levels—local, State, and Federal, and all of it integrated into the private organizations—the Red Cross, the Salvation Army, and the scores of other groups which make it their duty to end human suffering wherever they find it.

This Congress has done a great deal—1 percent interest rate, $5,000 forgiveness, massive appropriations—but it would be a grievous mistake to assume that this kind of emergency effort will lead to a happy ending for Wilkes-Barre and the other towns ravaged by the Susquehanna River. We must now move into a more subtle and newer phase of planning for the long haul. Now these are trick questions I am raising. Build up the dikes and dams? Can they be depended upon? Should the entire Wyoming Valley be rebuilt? A little perhaps—how much, we just do not know.

Now that the SBA loan provisions are almost law, the words on everyone's lips will be—"should we rebuild?" They are torn between rebuilding where they are now, or relocating. They have many questions, I have many questions, this body has many questions—the trouble is we all have precious little to guide us in answering them. This is unprecedented. The sad truth is that at the local, State, or Federal level, there is no satisfactory mechanism for planning and steering the complete recovery of such a huge and thoroughly devastated area as the Wyoming Valley. There ought to be one. Should it be public? Private? Public and private—that seems to be the answer. What must be made available to stricken communities is nothing less than the best technical talent and managerial expertise, coupled with all that the Federal agencies can provide. Instead of reacting with shock, surprise, disbelief, and depression—and this is what happens in a disaster—such a select "disaster action group" could swing into action with calm, with reason, with action.

What has happened in the Wyoming Valley must never happen again. Never again. Let us make this area a laboratory, a model in the end, for recovery planning for disasters of such huge magnitude. There is nothing to stop such a thing happening anywhere else—a new program can mean the difference.

At this point, I would like to read to you letters which I have sent recently which will give you a further idea of what I am talking about here—this is massive, beyond one government or one agency's capacity. On August 1, 1972, I sent the following letter to Lieutenant General Clarke, commanding general, U.S. Army Corps of Engineers:

Washington, D.C.,
August 1, 1972.

Lt. Gen. F. J. Clarke,
Chief of Engineers,
Department of the Army,
Washington, D.C.

Dear General Clarke: I have been advised that there is now established in Harrisburg, Pennsylvania, a District office of the United States Army Engineers.

I am not clear as to whether this is a brand new U.S. Army Engineers District office and, if so, its jurisdiction. In view of the fact that the disaster area on the Susquehanna in my District has been under the jurisdiction of the Baltimore District down through the years, and because of this history the Baltimore District office is closely identified with the Susquehanna River Basin Commission, I would like to know what will be the jurisdiction of the Harrisburg and Baltimore offices in this matter.

At the same time, as I am sure you well know better than I, the most thorough survey ever made by the Army Engineers in its history must now be made in the Susquehanna disaster area. I would like to know what plans the Army Engineers have in mind, beginning immediately to examine the whole spectrum of flood control, including the original and later abandoned dam proposals for upper New York State and Pennsylvania, the status of all existing dam constructions, the problem of the dredging of the river, especially through the Wyoming Valley area through the so-called Shickshinny Gorge—and if that phrase is not in your records, you can be sure it will be from now on—on the theory that the dredging of this Gorge below Wilkes-Barre in Shickshinny would prevent the back-up of the flood waters into the Wyoming Valley.

Now, with reference to the dikes, I want to know what the Engineers are thinking and talking about with reference to the dike system, particularly in the Wyoming Valley. Do you propose to continue the existing dike system? Are special inspections now being made of the existing system? Are repairs that are made merely temporary? What is the value of the existing system with temporary repairs in case of another unexpected high water level—not another catacylsm like Agnes, but any river rise approaching flood stage? What is the plan insofar as additional height for the dikes and extensive spreads at the base are concerned if the repairs are merely temporary now? What are the plans for immediate and full repair at once pending planned development extension or increasing the dikes system? What is your thinking with reference to recurring flooding in the surrounding countryside from rainfall and flash floods from tributaries which occur in many places and requires a constant elevation of the retaining walls? What about a secondary dike system—say half the height, more or less, and running parallel to the main dike, designed to localize and minimize damages of the primary dikes when breached? And what about a tertiary system of smaller dikes to control the levels of small streams and tributaries in the flood plan? In controlling the Susquehanna River floods before they happen with the high waters coming from upper New York State, can the Susquehanna River be diverted from a point near Towanda to connect with the west branch of the Susquehanna and join the southern branch in the vicinity of Muncy and Montoursville?

The flood waters everywhere deposited huge amounts of silt which must be dredged. In the dredging proposals, do you consider the removal of all islands in the river regardless of size?

Apart from the immediate losses, it is clear the floods produced a long-range physical damage. The enormous force of the water unleashed through the breaches in the primary dikes caused widespread erosion far beyond the obvious scouring and whirling effects near the breaks. What about the many breaches and what about the many washed-out pumping stations?

The prolonged inundation during and after the floods could have caused serious undermining of the primary dike system that may not show until late this summer or early fall. There is a possibility that the dike system has therefore been weakened, and there is the potential danger of immediate or future flooding, regardless of the height to which the water rises, although not necessarily, I repeat, another Agnes.

What about the practice of permitting municipalities along the river to drive their sewers through the dikes?

To what extent have you consulted with countries like Holland, China, and other nations historically renowned for their effective dike systems? What are your proposals with reference to the possibility of streets, roadways, or highways on the tops of new dike systems as is found in many places of the world, even in the Greater Washington Area?

What about the question of maintenance of the dikes—should this be left to local municipal authorities with the Engineers merely making periodic inspections? There should be grave doubts about this procedure, and the responsibility of inspection and maintenance should be that of the Federal Government.

What about the question of trees, shrubbery, and other such impediments on the face of the dike facing the river? What about riprapping the face of the dikes with stone or other materials?

As you know, the Army Engineers discovered that in 1946, the year of a very serious flood in Elmira, there was a flow of 130,000 cubic feet of water per second passing the city in the Chemung River which empties into the Susquehanna. According to the Army Engineers, that flood tide was felt to be so rare that when they later erected dikes they considered that amount of water flow to be a "1 in 1,000 years" situation. But in the great flood of 1972, preliminary estimates are that between 200,000 and 300,000 cubic feet of water per second passed through Elmira on the Chemung. I would like to be assured that the Army Engineers are now going to plan a flood control system in the disaster area which will take care of the amount of water flow for at least a thousand years.

I would like the details on the 2 dams which the Army Engineers ordered to be built on 2 tributaries of the Chemung. These 2 projects were to be built inside the Pennsylvania border. I would like a detailed report as to what protests were raised by Pennsylvania officials which held up the building of the dams and if they brought up the objection, "Why should we lose our tax base to benefit New Yorkers?" I would like the names of protesters, their titles, and verbatim statements as to the protests. I would like, as well, the history, with the dates, names of persons involved, and their addresses, of farmers and rural residents who were alleged to have stated they would not give up their lands for dams and dikes; and the statements of any County Commissioners or other officeholders in the area supporting such arguments.

While all of the above matters are of vital importance, and while this does not directly concern the Army Engineers—although I am sure it will interest them acutely, have you considered a more novel approach to this problem—that which involves man's ability to control the weather? The concept of "seeding" storm systems with silver iodine to remove some of their power while they are still at sea is, as you know, still under experimentation. So are several other potential means of fighting killer storms. The recent disaster provides plenty of evidence that this Federal project, known as "Stormfury," should be expedited on the same priority basis as assigned to finding the cure for certain diseases. A nation that can land a man on the moon ought to come up with a solution to this problem.

Sincerely yours,

DANIEL J. FLOOD,
Member of Congress.

On August 2, 1972, I sent the following letter to Mr. Elburt F. Osborn, Director, U.S. Bureau of Mines:

WASHINGTON, D.C.,
August 2, 1972.

Mr. ELBURT E. OSBORN,
Director, Bureau of Mines,
Department of the Interior,
Washington, D.C.

DEAR MR. OSBORN: As I am sure you know, during the early days of the flood disaster in the Wyoming Valley in my District, I was in touch with Joe Corgan, Chief of Division of Environment in your office, and John Shutack, District Manager of the Bureau of Mines in Wilkes-Barre, and they reported to me regularly with reference to surface and underground conditions as related to the flood situation.

Under the circumstances, it is imperative that a very special full and complete survey be made of the entire disaster area having to do with all underground conditions, water, surface support, erosion, and any and all problems which might directly or indirectly be affected by this catastrophic flood.

This report, of course, must also include a complete analysis of surface conditions, surface subsidence dangers, and all and any other matters which may affect directly or indirectly the surface of the disaster area.

In view of the magnitude of this disaster and the water levels which resulted in the disaster area of this part of the hard coal fields, I would like to be assured that your office can act fully and completely and immediately without legislation. If, however, you feel that the scope of the survey is such that legislation or special authority from the Congressional Committees concerned is necessary, be sure and let me know so that I can cooperate with you in seeing that your requests to these Committees are complied with without delay.

Sincerely yours,

DANIEL J. FLOOD,
Member of Congress.

On August 15, 1972, I sent the following letter to the Honorable Earl Butz, the Secretary of Agriculture:

WASHINGTON, D.C.,
August 15, 1972.

Hon. EARL L. BUTZ,
Secretary of Agriculture,
Washington, D.C.

DEAR MR. SECRETARY: I am sure you know of the devastation caused by Hurricane Agnes in Wilkes-Barre in the center of the disaster area in my District. It was unexpected and unforeseen—but it happened.

We are desperately trying to recoup our losses. At the same time, we are looking for reasons why it happened and solutions to prevent a recurrence.

There are various forms of flood control, but what I am interested in having your comments on is reforestation as a flood control. It is a known fact that hillsides without trees allow more water to run off faster.

I would like to know what regulations, if any, the Department of Agriculture has on stripping hillsides and denuding forests, especially in a watershed area—what enforcement powers do you have to uphold such regulations—what means are employed to educate the farmers about controlling floods on their farm lands—what is the Soil and Water Conservation Corps—what is its purpose and how is that purpose achieved. I would also like to know if the Department has a reforestation program and what it is all about.

Sincerely yours,

DANIEL J. FLOOD,
Member of Congress.

The above letters illustrate, if nothing else, what each and every one of you will face in time of a disaster.

Concern for these problems is not confined to the Wyoming Valley. They know what is happening in Wilkes-Barre in the entire Nation. On August 9, 1972, Mr. Frank Blewitt, managing editor of the Scranton Times, Scranton, Pa., in cooperation with my office, took a leading group of national news media—TV, radio, magazines, newspapers—throughout the disaster area. Their response—shock, dismay, "something must be done." I could not be there, but sent my legislative assistant, Richard Altman, a Wilkes-Barre native who lost his home in the flooding. On a walking tour of the area arranged by the Honorable Max Rosenn, U.S. circuit court judge, I am told the media's response to what was happening—mind you 7 weeks after the flood—was complete disbelief. Something must be done. Something new, untried. This public-private disaster action group.

An editorial in the Washington Sunday Star, written by Jim Welch, one of those who made the tour, appeared on August 13, 1972, and was entitled "Lessons on Agnes and the Wyoming Valley." It is much the same as I am pointing out to you today—something, and what it is should be determined by this body, must be done.

You may ask where this leaves the victims of the flooding. Much has been done to help these people. They have faith that much more will be done. We cannot disappoint that faith. They have faith that their homes and businesses will recover. We cannot disappoint that faith. They have faith that their lives and their children's lives will not be washed away in a freak quirk of nature's fury. And we cannot disappoint that faith. Above all they have an abiding faith in their Government and their God. This brings to mind several thoughts scribbled on parchment long ago:

> And God remembered Noah, and every living thing, and all that were with him in the ark: And God made a wind to pass over the earth, and the waters assuaged. . . . While the earth remains, seedtime and harvest, and cold and heat, and summer and winter, and day and night shall not cease.

We cannot disappoint that faith.

Mr. BOW. Mr. Speaker, I move to strike the last word.

Mr. Speaker, I heartily support this supplemental appropriation. We have great feelings for the people who are in the disaster areas, and we feel we have the responsibility to pass this bill as soon as possible. I endorse it, the minority endorses it, and I join with those who support it, and I hope that it will be used promptly, that there not be any red tape or any political efforts to make somebody look good or look bad, but that the funds will be used for the purpose for which they are appropriated, and that is for prompt relief for these unfortunate people in these disaster areas.

I hope that the bill will be passed unanimously.

Mr. CORMAN. Mr. Speaker, I move to strike the requisite number of words.

Mr. Speaker, I want to comment on the disaster legislation we passed yesterday. I hope that after we have some experience with this one that we will learn more than we learned from the earthquake in California. We did learn that the law was inadequate in some respects, and the law was much too loosely administered in other respects. There was a tremendous waste of the taxpayers' money without helping those who were most seriously injured.

Instead of correcting those errors we legislated to double waste and inequity in the disaster program. That is why I voted against the bill yesterday. I will vote for this appropriations bill today because, among other things, I presume it includes the money to repair the public damages to the sewer systems, water systems, and the streets. Those systems must be put back in order, and quickly, for the health and safety of the people in the ravaged areas. The people who have lost their homes must be given a chance to get back into their homes, and that as quickly as possible.

But the bill we passed yesterday is an invitation to fraud, and that is how it will be used. The little old lady who loses her home by having it float down the river will find no help in this bill. She will be told she cannot borrow the money to rebuild her home because she cannot pay it back. But the person whose rug is stained and who finds he lost $5,000 will be given that by the Treasury. And we will all hear, as Congressman Bow just said, "No redtape, get the money out fast." And that is precisely what will happen.

As soon as the first person on the block gets his $5,000 Christmas present the rest of the people will be down to get theirs. And you will find a year from now that the people who are in the worst economic conditions and who suffered the greatest loss will be looking you in the eye and saying, "What happened to those $3 or $4 or $5 billion?" I am already getting some of that.

I hope that some day we can carefully and thoughtfully revise the disaster program; some time when we are not faced with a disaster, and we will treat everybody with equity and see that the Federal largess is given according to the amount of damage suffered rather than on a kind of one-man, one-vote plan.

Mr. BROWN of Michigan. Mr. Speaker, will the gentleman yield?

Mr. CORMAN. I yield to the gentleman from Michigan.

Mr. BROWN of Michigan. Mr. Speaker, I wish to commend the gentleman for the courage of his expression. I think that the gentleman is absolutely right in that the authorizing legislation is not good legislation. I think we can all share the problems and sorrows and so on of those who have suffered damage and property loss from the disaster such as the one the gentleman has mentioned. But I think it is somewhat less than fully responsible for us to be legislating as we did in the authorizing legislation, because I fear, as the gentleman fears, that what happened in California will happen elsewhere unless there is much better administration, and even better legislation than presently exists.

Mr. CORMAN. I thank the gentleman.

Mr. ROUSSELOT. Mr. Speaker, will the gentleman yield?

Mr. CORMAN. I yield to my colleague from California.

Mr. ROUSSELOT. Mr. Speaker, I wish to associate myself with the remarks of the gentleman from California.

Much of the 1971 earthquake damage occurred in his district. He and the other gentleman from California (Mr. GOLDWATER) had a great number of these type cases of which Mr. CORMAN has spoken. People who sustained heavy damages by the earthquake did not always receive adequate remuneration for the kind of losses that were caused by the 1971 disaster, whereas there were whole neighborhoods of people who came in and took unfair advantage of the so-called forgiveness clause.

Then various groups and the news media pressured their Representatives and the Small Business Administration to give faster and faster service. Now in this current situation rather than really looking carefully at this legislation, as I think we should have done in our Committee on Banking and Currency. The whole House has rushed through authorizing legislation to help the people damaged by Hurricane Agnes.

We have again, in my opinion, not adequately considered some of the objections that the gentleman from California has properly raised. I think it is too bad that we tend to wait until a disaster occurs and then hurry up and rush ill-conceived legislative bills through because nobody in this body wants to be against people in distress. The Committee on Appropriations feels the pressure on them to try to do their part in appropriating the actual funds.

I think the gentleman is to be complimented for raising these issues once again and hopefully we will legislate more responsibly very soon. We must take a hard look at the so-called forgiveness clause which encourages, as I think the gentleman said, "outright fraud."

I compliment him for his remark.

Mr. CORMAN. Mr. Speaker, may I ask the gentleman from Texas one question?

We have talked a great deal about the $250 billion expenditure ceiling. The administration has urged that we adopt that and indicated any expenditures that go over the budget would have to be cut someplace else.

May I ask whether the administration had this money in the budget or whether this would exceed the $250 billion expenditure ceiling?

Mr. MAHON. These funds were not in the January budget. These funds, I believe, were in the recalculated budget that had to do with the President's statement on the $250 billion expenditure ceiling.

I think the gentleman from California agrees with me that the way to control expenditures in this country is to proceed carefully with authorizations and to proceed carefully with the appropriations.

But after we have made the money available, then it is up to the administration to manage the expenditure of the funds for the purposes for which they are appropriated. Very often the administration finds it possible to delay or extend the time.

Mr. MONAGAN. Mr. Speaker, I support H.R. 16254, which provides additional relief to the victims of hurricane and tropical storm Agnes, and to the victims of the South Dakota flood disaster.

The widespread devastation caused by Agnes affected the lives of thousands of our fellow Americans and caused millions of dollars of property damage. Many communities are still engaged in the tedious job of digging out.

Only through a fortuitous change of course by the storm was my own State of Connecticut spared the massive destruction which several of our sister States suffered, although our coastal municipalities received the full force of the storm with 7 inches of rain falling in a short period of time. This legislation will help these cities along the road to recovery. The people of Connecticut are fully aware of the damage which can suddenly be caused by normally docile, meandering streams and rivers breaking over their banks and spreading havoc throughout the surrounding area. We saw this in August and October of 1955 during the floods in which many lives were lost and millions of dollars of damage caused.

In the aftermath of those fateful months, people from other areas of the country came to the aid of Connecticut. Funds for emergency assistance were made available and since that time funds have been appropriated for dams, retaining walls, levees, and similar flood control structures which now protect our State from a recurrence of that devastation of 1955.

On Thursday of this week the culmination of the Naugatuck Valley flood control project is taking place with the dedication of the Ansonia-Derby link of this vital investment in the protection of the property and lives of the people of Connecticut. I have been assured by the Army Engineers that "the Naugatuck Valley now enjoys the highest degree of protection of any watershed of its size in the country" against storms such as Agnes and that if tropical storm Agnes had hit Connecticut with its full fury little, if any, flood damage would have occurred in the Naugatuck Valley.

The people of Connecticut fully appreciate what has been done for them and I take this opportunity to lend my support to the legislation which is before us today.

Mr. MAHON. Mr. Speaker, I move the previous question on the bill to final passage.

The previous question was ordered.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER. The question is on the passage of the bill.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. LONG of Maryland. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant-at-Arms will notify absent Members, and the Clerk will call the roll.

The question was taken; and there were—yeas 392, nays 0, not voting 40, as follows:

Mr. Leggett with Mrs. Dwyer.
Mr. Lennon with Mr. Carter.
Mr. Hagan with Mr. Keith.
Mr. McMillah with Mr. Edwards of Alabama.
Mr. Rarick with Mr. Michel.
Mr. Long of Louisiana with Mr. Betts.
Mr. Pelly with Mr. Schmitz.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

CONFERENCE REPORT ON S. 3726, EQUAL EXPORT OPPORTUNITY ACT AND INTERNATIONAL ECONOMIC POLICY ACT OF 1972

Mr. PATMAN submitted the following conference report and statement on the bill (S. 3726) to extend and amend the Export Administration Act of 1969 to afford more equal export opportunity, to establish a Council on International Economic Policy, and for other purposes:

Conference Report (H. Rept. No. 92-1342)

The committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 3726) to extend and amend the Export Administration Act of 1969 to afford more equal export opportunity, to establish a Council on International Economic Policy, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its disagreement to the amendment of the House to the text of the bill and agree to the same with an amendment as follows: In lieu of the matter proposed to be inserted by the House amendment insert the following:

TITLE I—AMENDMENTS TO THE EXPORT ADMINISTRATION ACT OF 1969

Sec. 101. This title may be cited as the "Equal Export Opportunity Act".

Sec. 102. Section 2(3) of the Export Administration Act of 1969 is amended by inserting before the period at the end thereof a comma and the following: "particularly when export restrictions applied by the United States are more extensive than export restrictions imposed by countries with which the United States has defense treaty commitments".

Sec. 103. Section 3 of the Export Administration Act of 1969 is amended by adding at the end thereof the following:

"(6) It is the policy of the United States that the desirability of subjecting, or continuing to subject, particular articles, materials, or supplies, including technical data or other information, to United States export controls should be subjected to review by and consultation with representatives of appropriate United States Government agencies and qualified experts from private industry."

Sec. 104. (a) Section 4(b) of the Export Administration Act of 1969 is amended—

(1) by inserting "(1)" after "(b)"; and

(2) by adding at the end thereof the following new paragraphs:

"(2) The Secretary of Commerce, in cooperation with appropriate United States Government departments and agencies and the appropriate technical advisory committees established under section 5(c), shall undertake an investigation to determine which articles, materials, and supplies, including technical data and other information, should no longer be subject to export controls because of their significance to the national security of the United States. Notwithstanding the provisions of paragraph (1), the President shall remove unilateral export controls on the export from the United States of articles, materials, or supplies, including technical data or other information, which he determines are available without restriction from sources outside the United States in significant quantities and comparable in quality to those produced in the United States, except that any such control may remain in effect if the President determines that adequate evidence has been presented to him demonstrating that the absence of such a control would prove detrimental to the national security of the United States. The nature of such evidence shall be included in the special report required by paragraph (4).

"(3) In conducting the invstigation referred to in paragraph (2) and in taking the action required under such paragraph, the Secretary of Commerce shall give priority to those controls which apply to articles, materials, and supplies, including technical data and other information, for which there are significant potential export markets.

"(4) Not later than nine months after the date of enactment of the Equal Export Opportunity Act, the Secretary of Commerce shall submit to the President and to the Congress a special report of actions taken under paragraphs (2) and (3). Such report shall contain—

"(A) a list of any articles, materials and supplies, including technical data and other information, which are subject under this Act to export controls greater than those imposed by nations with which the United States has defense treaty commitments and the reasons for such greater controls; and

"(B) a list of any procedures applicable to export licensing in the United States which may be or are claimed to be more burdensome than similar procedures utilized in nations with which the United States has defense treaty commitments, and the reasons for retaining such procedures in their present form.".

(b)(1) Section 4(e) of such Act is amended to read as follows:

"(e) The authority conferred by this section shall not be exercised with respect to any agricultural commodity, including fats and oils or animal hides or skins, without the approval of the Secretary of Agriculture. The Secretary of Agriculture shall not approve the exercise of such authority with respect to any such commodity during any period for which the supply of such commodity is determined by him to be in excess of the requirements of the domestic economy, except to the extent the President determines that such exercise of authority is required to effectuate the policies set forth in clause (B) or (C) of paragraph (2) of section 3 of this Act."

(2) Any rule, regulation, proclamation, or order issued after July 1, 1972, under section 4 of the Export Administration Act of 1969, exercising any authority conferred by such section with respect to any agricultural commodity, including fats and oils or animal hides or skins, shall cease to be effective upon the date of enactment of this Act.

Sec. 105. Section 5 of the Export Administration Act of 1969 is amended by adding at the end thereof the following:

"(c)(1) Upon written request by representatives of a substantial segment of any industry which produces articles, materials and supplies, including technical data and other information, which are subject to export controls or are being considered for such controls because of their significance to the national security of the United States, the Secretary of Commerce shall appoint a technical advisory committee for any grouping of such articles, materials, and supplies, including technical data and other information, which he determines is difficult to evaluate because of questions concerning technical matters, worldwide availability and actual utilization of production and technology, or licensing procedures. Each such committee shall consist of representatives of United States industry and government. No person serving on any such committee who is representative of industry shall serve on such committee for more than two consecutive years.

"(2) It shall be the duty and function of the technical advisory committees established under paragraph (1) to advise and assist the Secretary of Commerce and any other department, agency, or official of the Government of the United States to which the President has delegated power, authority, and discretion under section 4(d) with respect to actions designed to carry out the policy set forth in section 3 of this Act. Such committees shall be consulted with respect to questions involving technical matters, worldwide availability and actual utilization of production and technology, and licensing procedures which may affect the level of export controls applicable to any articles, materials, or supplies, including technical data or other information, and including those whose export is subject to multilateral controls undertaken with nations with which the United States has defense treaty commitments, for which the committees have expertise. Such committees shall also be consulted and kept fully informed of progress with respect to the investigation required by section 4(b)(2) of this Act. Nothing in this subsection shall prevent the Secretary from consulting, at any time, with any person representing industry or the general public regardless of whether such person is a member of a technical advisory committee. Members of the public shall be given a reasonable opportunity, pursuant to regulations prescribed by the Secretary of Commerce, to present evidence to such committees.

"(3) Upon request of any member of any such committee, the Secretary may, if he determines it appropriate, reimburse such member for travel, subsistence, and other necessary expenses incurred by him in connection with his duties as a member.

"(4) Each such committee shall elect a chairman, and shall meet at least every three months at the call of the Chairman, unless the Chairman determines, in consultation with the other members of the committee, that such a meeting is not necessary to achieve the purposes of this Act. Each such committee shall be terminated after a period of two years, unless extended by the Secretary for additional periods of two years. The Secretary shall consult each such committee with regard to such termination or extension of that committee."

SEC. 106. Section 14 of the Export Administration Act of 1969 is amended by striking out "August 1, 1972" and inserting in lieu thereof "June 30, 1974".

SEC. 107. Nothing in this title shall be construed to require the release or publication of information which is classified pursuant to Executive order or to affect the confidentiality safeguards provided in section 7(c) of the Export Administration Act of 1969.

SEC. 108. The provisions of this title take effect as of the close of July 31, 1972.

TITLE II—COUNCIL ON INTERNATIONAL ECONOMIC POLICY

SHORT TITLE

SEC. 201. This title may be cited as the "International Policy Act of 1972".

STATEMENT OF PURPOSES

SEC. 202. It is the purpose of this title to provide for closer Federal interagency coordination in the development of a more rational and orderly international economic policy for the United States.

FINDINGS AND POLICY

SEC. 203. The Congress finds that there are many activities undertaken by various departments, agencies, and instrumentalities of the Federal Government which, in the aggregate, constitute the domestic and international economic policy of the United States. The Congress further finds that the objectives of the United States with respect to a sound and purposeful international economic policy can be better accomplished through the closer coordination of (1) domestic and foreign economic activity, and (2) in particular, that economic behavior which, taken together, constitutes United States international economic policy. Therefore this Act establishes a Council on International Economic Policy which will provide for—

(A) a clear top level focus for the full range of international economic issues; deal with international economic policies including trade, investment, balance of payments, and finance as a coherent whole;

(B) consistency between domestic and foreign economic policy; and

(C) close coordination with basic foreign policy objectives.

The Congress intends that the Council shall be provided with the opportunity to (i) investigate problems with respect to the coordination, implementation, and long-range development of international economic policy, and (ii) make appropriate findings and recommendations for the purpose of assisting in the development of a rational and orderly international economic policy for the United States.

CREATION OF COUNCIL ON INTERNATIONAL ECONOMIC POLICY

SEC. 204. There is created in the Executive Office of the President a Council on International Economic Policy (hereinafter referred to in this title as the "Council").

MEMBERSHIP

SEC. 205. The Council shall be composed of the following members and such additional members as the President may designate:

(1) The President.
(2) The Secretary of State.
(3) The Secretary of the Treasury.
(4) The Secretary of Defense.
(5) The Secretary of Agriculture.
(6) The Secretary of Commerce.
(7) The Secretary of Labor.
(8) The Director of the Office of Management and Budget.
(9) The Chairman of the Council of Economic Advisers.
(10) The Special Representative for Trade Negotiations.

The President shall be the Chairman of the Council and shall preside over the meetings of the Council; in his absence he may designate a member of the Council to preside in his place.

DUTIES OF THE COUNCIL

SEC. 206. Subject to the direction of the President, and in addition to performing such other functions as he may direct, the Council shall—

(1) Assist and advise the President in the preparation of the International Economic Report required under section 207.

(2) Review the activities and the policies of the United States Government which indirectly or directly relate to international economics and, for the purpose of making recommendations to the President in connection therewith, consider with some degree of specificity the substance and scope of the international economic policy of the United States, which consideration shall include examination of the economic activities of (A) the various agencies, departments, and instrumentalities of the Federal Government, (B) the several States, and (C) private industry.

(3) Collect, analyze, and evaluate authoritative information, current and prospective, concerning international economic matters. Such evaluations shall include but not be limited to the impact of international trade on the level, stability, and financial rewards for domestic labor and the impact of the transnational corporation on international trade flows.

(4) Consider policies and programs for coordinating the activities of all the departments and agencies of the United States with one another for the purpose of accomplishing a more consistent international economic policy, and make recommendations to the President in connection therewith.

(5) Continually assess the progress and effectiveness of Federal efforts to carry out a consistent international economic policy; and

(6) Make recommendations to the President for domestic and foreign programs which will promote a more consistent international economic policy on the part of the United States and private industry. Recommendations under this paragraph shall include, but shall not be limited to, policy proposals relating to monetary mechanisms, foreign investment, trade, the balance of payments, foreign aid, taxes, international tourism and aviation, and international treaties and agreements relating to all such matters. In addition to other appropriate objectives, such policy proposals should be developed with a view toward—

(A) strengthening the United States competitive position in world trade;

(B) achieving equilibrium in international payment accounts of the United States;

(C) increasing exports of goods and services;

(D) protecting and improving the earnings of foreign investments consonant with the concepts of tax equity and the need for domestic investment;

(E) achieving freedom of movement of people, goods, capital, information, and technology on a reciprocal and worldwide basis;

(F) increasing the real employment and income of workers and consumers on the basis of international economic activity; and

(G) preserving the diversified industrial base of the United States.

REPORT

SEC. 207. (a) The President shall transmit to the Congress an annual report on the international economic position of the United States. Such report (hereinafter referred to as the "International Economic Report") shall be submitted not later than sixty days after the beginning of each regular session of the Congress, and shall include—

(1) information and statistics describing characteristics of international economic activity and identifying significant current and foreseeable trends and developments;

(2) a review of the international economic program of the Federal Government and a review of domestic and foreign economic conditions and other significant matters affecting the balance of international payments of the United States and of their effect on the international trade, investment, financial, and monetary position of the United States;

(3) a review of the impact of international voluntary standards, the foreign investments of United States based transnational firms, and the level of foreign wage rates on the level, stability, and financial reward for domestic employment; and

(4) a program for carrying out the policy objectives of this title, together with such

recommendations for legislation as he may deem necessary or desirable.

(b) The President may transmit from time to time to the Congress reports supplementary to the International Economic Report, each of which may include such supplementary or revised recommendations as he may deem necessary or desirable to achieve the purposes and policy objectives set forth in this title.

EXECUTIVE DIRECTOR AND STAFF OF THE COUNCIL

SEC. 208. (a) The staff of the Council shall be headed by an Executive Director who shall be appointed by the President, and he shall be compensated at the rate now or hereafter provided for level II of the Executive Schedule (5 U.S.C. 5313). He shall keep the Committee on Banking, Housing and Urban Affairs of the Senate, the Committee on Banking and Currency of the House of Representatives, the Committee on Foreign Relations of the Senate, the Committee on Foreign Affairs of the House of Representatives, the Committee on Finance of the Senate, the Committee on Ways and Means of the House of Representatives, and the Joint Economic Committee fully and currently informed regarding the activities of the Council.

(b)(1) With the approval of the Council, the Executive Director may appoint and fix the compensation of such staff personnel as he deems necessary. Except as provided in paragraph (2), the staff of the Council shall be appointed subject to the provisions of title 5, United States Code, governing appointments in the competitive service, and shall be paid in accordance with the provisions of chapter 51 and subchapter III of chapter 53 of such title relating to classification and General Schedule pay rates.

(2) With the approval of the Council, the Executive Director may appoint and fix the compensation of one officer at a rate of basic compensation not to exceed the rate provided for level IV of the Federal Executive Salary Schedule, and appoint and fix the compensation of two officers at rates of basic compensation not to exceed the rate provided for level V of the Federal Executive Salary Schedule.

(c) With the approval of the Council, the Executive Director may procure temporary and intermittent services to the same extent as is authorized by section 3109 of title 5, United States Code, at rates not to exceed the daily equivalent of the rate provided for GS-18.

(d) Upon request of the Executive Director, the head of any Federal agency is authorized to detail, on a reimbursable basis, any of its personnel to the Council to assist it in carrying out its duties under this title.

SEC. 209. The provisions of this title shall expire on June 30, 1973, unless extended by legislation enacted by the Congress.

AUTHORIZATION FOR APPROPRIATIONS

SEC. 210. For the purpose of carrying out the provisions of this title, there are authorized to be appropriated not to exceed $1,400,000 for fiscal year 1973.

And the House agree to the same.

That the House recede from its amendment to the title of the bill.

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and the Senate at the conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 3726) to extend and amend the Export Administration Act of 1969 to afford more equal export opportunity, to establish a Council on International Economic Policy, and for other purposes, submit the following joint statement to the House and the Senate in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report:

AMENDMENTS TO THE EXPORT ADMINISTRATION ACT OF 1969

Findings and policy

The Senate bill contained a provision which amended a finding that the unwarranted restriction of exports has a serious adverse effect on our balance of payments by adding language indicating that this is particularly the case when United States restrictions are more extensive than those imposed by countries with which the United States has defense treaty commitments.

The Senate bill also contained a provision stating that it is the policy of the United States that the review of United States export controls should involve consultation with representatives of appropriate United States government agencies and qualified experts from private industry.

The House amendments contained no similar provisions. The conferees adopted the Senate provisions.

Investigation by the Secretary of Commerce of items subject to export control

The Senate bill contained a provision which required the Secretary of Commerce to undertake an investigation to determine which items should no longer be subject to export controls because they are not significant to the national security of the United States. The provision also required the President to remove unilateral export controls on items he determines are available outside the United States in significant quantity and quality comparable to those produced in the United States, except when he determines that the absence of controls would prove detrimental to the national security of the United States.

The House amendments contained no similar provision. The conferees adopted the Senate provision.

Report by the Secretary of Commerce

The Senate bill required that the Secretary of Commerce report to the President and to the Congress not later than nine months after the date of enactment of the Act concerning steps which he has taken to reduce certain unilateral United States export controls. If he decides to continue unilateral controls on specific items, he must state the reasons for doing so.

The Senate bill further provided that the Secretary of Commerce shall report items and information subject to control procedures which are more burdensome than comparable procedures of other countries.

The House amendments contained no similar provision. The conferees adopted the Senate provision.

Technical advisory committees

The Senate bill contained a provision which required the Secretary of Commerce to establish technical advisory committees to assist in reducing both unilateral and multilateral export controls on peaceful, nonstrategic trade.

The House amendments contained no similar provision. The House receded to the Senate provision with an amendment which eliminated the requirement that the members of any such committee be compensated and substituted a provision which authorizes the Secretary of Commerce to reimburse any such member for travel and subsistence upon request of the member.

Confidentiality of business information

The Senate bill had a provision which stated that nothing in this Title should be construed to require the release or publication of information which is classified pursuant to executive order or already protected by other safeguards in the Export Administration Act of 1969.

The House amendments contained no similar provision. The conferees adopted the Senate provision.

Effective date

The Senate bill provided that the title was to take effect on July 31, 1972.

The House amendments provided for the effective date to be on the date of enactment of the Act.

The conferees adopted the Senate provision.

COUNCIL ON INTERNATIONAL ECONOMIC POLICY

The Senate bill contained a Title II which provided for the establishment of a Council on International Economic Policy. The purpose of this Council is to provide for closer interagency coordination in the development of United States international economic policy. This better coordination is found to be necessary because there are many departments and agencies of the Federal government operating in the international economic policy area, and because better coordination is needed between domestic and foreign economic policy.

The Council created in the Senate bill would be in the Executive Office of the President. Its membership includes the President and nine cabinet officers and executive office officials. The duties of the Council include advising and assisting the President in the preparation of an International Economic Report, reviewing the policies of the many agencies operating in the international economic policy area and making recommendations to the President for improving and making more consistent our international economic policy.

The Senate bill provided that the President, with the assistance of the Council, shall submit an annual International Economic Report to the Congress.

The Senate bill further provided for a Council staff to be headed by an Executive Director. The Executive Director would be required to keep the appropriate committees of both the House and the Senate fully and currently informed regarding the activities of the Council.

The Senate bill authorized $1,400,000 for the Council for fiscal year 1973 and provided that the legislation creating the Council shall expire on June 30, 1973 unless specifically extended by legislation enacted by the Congress.

The House amendments contained no similar provision. The House receded to the Senate provision with the following amendments:

1. In connection with the duty of the Council to review the activities and the policies of the United States government, there was stricken explicit reference to a specific international agreement and to specific trading partners. The conferees agreed that the re-

maining language was broad enough to allow the Council to review any such trade relationships.

2. In connection with the duty of the Council to make recommendations to the President, the conferees agreed to strike the word "existing" from the requirement that policy proposals be developed with a view toward "preserving the existing diversified industrial base of the United States."

3. In connection with the appointment of an Executive Director for the Council, it was agreed to delete the requirement that he be an Assistant to the President. The conferees agreed that the Executive Director shall be appointed by the President and shall be compensated at the rate provided for Level II of the Executive Schedule.

The conferees unanimously agreed that the work of the Council and the Report of the President shall include as their objectives—

1. strengthening the United States competitive position in world trade;

2. achieving equilibrium in international payment accounts of the United States;

3. increasing exports of goods and services;

4. protecting and improving the earnings of foreign investments consonant with the concepts of tax equity and the need for domestic investment;

5. achieving freedom of movement of people, goods, capital, information, and technology on a reciprocal and worldwide basis;

6. increasing the real employment and income of workers and consumers on the basis of international economic activity; and

7. preserving the diversified industrial base of the United States.

FURTHER CONTINUING APPROPRIATIONS, 1973

Mr. MAHON. Mr. Speaker, pursuant to the order of the House of Wednesday last, I call up the joint resolution (H.J. Res. 1278) making further continuing appropriations for the fiscal year 1973, and for other purposes, and ask unanimous consent that the joint resolution be considered in the House as in Committee of the Whole.

The Clerk read the title of the joint resolution.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

The Clerk read the joint resolution as follows:

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That clause (c) of section 102 of the joint resolution of July 1, 1972 (Public Law 92–334), is hereby amended by striking out "August 18, 1972" and inserting in lieu thereof "September 30, 1972 or the sine die adjournment of the second session of the Ninety-second Congress".

Mr. MAHON. Mr. Speaker, I move to strike out the last word.

Mr. Speaker, this continuing resolution would extend to September 30 or the sine die adjournment of this session, whichever comes first.

Of course, agencies and activities which are provided for in appropriation bills that are enacted and signed into law are no longer under the continuing resolution.

The report covers the details. There is nothing unusual about the pending resolution.

I believe the Congress has done a reasonably satisfactory job in expediting handling of appropriation bills at this session of the Congress.

Earlier this session, with respect to the fiscal year 1972, we passed four appropriation measures. Congress reduced the budget requests for new spending authority in those measures by $418 million.

There are 13 regular annual appropriation bills for the current fiscal year 1973. Nine of those 13 bills have cleared the Congress and gone to the President; four remain.

There will also be a closing supplemental bill.

Among the bills remaining is the State, Justice, Commerce, and Judiciary appropriation bill which has passed the House and the Senate but has not yet cleared conference.

Another remaining bill for which we have not had the annual authorization is the military construction appropriation bill. We hope to handle that during the first part of September.

Another is the defense appropriation bill. The related annual defense authorization bill has not cleared the Congress and thus we do not have authorization, but it is expected that early in September the House Committee on Appropriations, by the use of a special rule if a rule is granted, will bring before the House the appropriation bill for the Department of Defense.

As you know, the House and the Senate have passed the authorization bills but settlement of the differences between the House and the Senate has not yet taken place.

Then, we have the foreign assistance appropriation bill which we hope to present to the House by about mid-September. That, too, has been delayed for lack of authorization.

Then, of course, there will be a closing supplemental bill.

So it would now seem, from the standpoint of the appropriation bills, unless there are unforeseen difficulties, the business can be fully cleared by September 30, the expiration date of the pending continuing resolution.

Now, of course, this will not be easy to accomplish but it can, it seems to me, be accomplished.

It is not certain just what bills may be vetoed. It has been widely asserted that the Labor-HEW appropriation bill, which is far above the President's budget requests, will be vetoed. If that takes place, of course some delay would be brought about as it will be necessary to bring a new bill before the House, consider it, pass it, and have it considered by the other body and then it will have to go to conference. There will be some delay there. I would add that if it is vetoed, the activities involved would be continued under existing continuing resolution ground rules.

We do not, of course, know what bills may be vetoed, and of course there will be some delay in the event any of the bills are vetoed.

THE APPROPRIATION BILLS OF THE SESSION

Now, questions may arise as to how well or how poorly Congress has done in handling the appropriation bills at this session. On the four supplemental measures for fiscal 1972, we were below the budget requests, as I mentioned, by about $418 million.

When the work is all done this fall and we complete all the appropriation bills for fiscal 1973, I would not be at all surprised if the House has not provided, in total, something materially below the total of the budget requests, considered in those appropriation bills. I say that in spite of the fact that the Labor-HEW bill is very considerably above the budget requested. I am speaking of the annual appropriation bills only. And I refer only to the House. But even in respect to final action by Congress on the annual appropriation bills for 1973, when we consider all the measures which will be before us, it would seem to me that we might very well be about even-steven, in total, with the budget requests—perhaps a few hundred million below the total.

Much has been said about an overall expenditure limitation for the current fiscal year. The administration has available for expenditure many billions of dollars in addition to the new appropriations being made for this year. Unexpended Federal funds across the Government, for all purposes, at the beginning of this fiscal year totaled roughly $140 billion, in addition to perhaps $110 billion of balances in various trust funds. Of course, billions and billions of those funds could not be expended during the current fiscal year for various reasons, one being that many, many billions would not even be committed or obligated.

Controlling spending comes down to this: The way to reduce and control expenditures is to reduce and control the appropriations and to also slow down passage of legislation which mandates expenditures through nonappropriation bills. The budget has been seriously breached by three or four nonappropriation bills this year.

I may have more to say about this question at a later date.

The SPEAKER. The time of the gentleman from Texas has expired.

Mr. MAHON. Mr. Speaker, under leave to extend, I am including a table on the appropriation bills as they stand at this time with respect to fiscal 1973:

NEW BUDGET (OBLIGATIONAL) AUTHORITY IN THE APPROPRIATION BILLS FOR 1973—REVISED TO AUG. 15, 1972

[Note.—As to fiscal year 1973 amounts only]

Bill	Budget request considered	Approved	Change, (+) or (−)
In the House:			
1. Legislative	$433,627,004	$427,604,764	−$6,022,240
2. State-Justice-Commerce-Judiciary	4,687,988,600	4,587,104,350	−100,884,250
3. HUD-Space-Science-Veterans	20,173,185,000	19,718,490,000	−454,695,000
4. Transportation	2,909,181,095	2,791,614,095	−117,567,000
Advance 1974 appropriation	(131,181,000)	(131,181,000)	
5. District of Columbia (Federal funds)	343,306,000	332,306,000	−11,000,000
6. Labor-HEW	27,327,323,500	28,603,179,500	+1,275,856,000
7. Interior	2,520,340,000	2,529,558,200	+9,218,200

Total, bills cleared to the President	78,841,656,894	80,908,697,575	+2,067,040,681

COMPREHENSIVE BUDGET SCOREKEEPING REPORT

Mr. Speaker, I again add that the foregoing table relates only to the annual appropriation bills. Those bills do not encompass all actions—or inactions—that have an impact on the budget recommendations. In that connection, I would again call attention to the periodic budget "scorekeeping" reports issued by the staff of the Joint Committee on Reduction of Federal Expenditures. These reports are designed to keep tabs, currently, on what is happening in the legislative process to the budget recommendations of the President, both appropriationwise and expenditurewise, and on the revenue recommendations, and not only from actions in the revenue and appropriation bills but also in legislative bills that affect budget authority and expenditures—backdoor bills, bills that mandate expenditures, and so on.

Several such reports have been issued this year—the latest one as of August 4. Others will be forthcoming. Copies are sent to the office of each Member.

Mr. GROSS. Mr. Speaker, I move to strike the necessary number of words.

Mr. Speaker, I was intrigued by the gentleman's statement that there are only four or five appropriation bills remaining to be considered. On one hand he says that we can reasonably expect to get through by September 30, as provided in the continuing resolution.

Then the distinguished chairman seems to think he has some doubt about that. Would the gentleman care to clarify and make a prediction as to whether we can reasonably expect to have to join the campaigning absentees of the other body or be stuck here well into October?

Mr. MAHON. I, of course, do not know, but unless there is some extended controversy or delaying tactic of some kind relating to an end-the-war resolution or some other unanticipated and very controversial matter, it would seem to me that in the normal course of things the appropriation bills could be disposed of between September 5 and September 30. This would require considerable activity, I must say, but most of the hearings have been held and some of the bills tentatively marked up. If we can find a parliamentary way to proceed with foreign aid, the two defense bills, and the final supplemental bill, we should be able to make the deadline. We should have no difficulty in settling the State, Justice, Commerce, and Judiciary bills.

Mr. GROSS. Then the chairman of the Appropriations Committee, having had a great many years of experience in this body and having watched its workings, would see no reason why, with the appropriation bills cleared by September 30, there should be any sessions thereafter?

Mr. MAHON. From the standpoint of the Committee on Appropriations I am compelled to agree wholeheartedly with the gentleman. I would certainly hope we can finish our business in order that we can all return to our districts and visit with our people. I would hope, as I know the gentleman and most other Members of the House do, that we would not have a lameduck session after the November election. Generally, I think the Congress is proceeding with reasonable deliberation in most of these matters. We have taken time but we ought to take the time necessary.

Mr. GROSS. I could not agree with the gentleman more, that the last thing we need is a lameduck session of Congress on top of what we have already had. Moreover, the gentleman from Iowa would like to do a little fishing in the interim between November 7 and the convening of the next Congress, being fortunate enough to be reelected of course, but that is in the lap of the gods, too. I would like to go fishing even though I might have to fish through the ice.

Mr. MAHON. The gentleman knows that the apostle Peter was also a fisherman but he was to be a fisher of men.

Mr. GROSS. Just a minute. Let us keep our comparisons in perspective.

Mr. MAHON. I think most of us would like to visit with our constituents as frequently as possible and certainly between now and the November election.

Mr. GROSS. I hope the distinguished gentleman from Texas with his powers of persuasion will be able to carry on some effective missionary work with the Speaker, while the Republicans are conventioning, leading to an early end in September of this session of Congress.

Mr. MAHON. I thank the gentleman.

Mr. BOW. Mr. Speaker, I move to strike the necessary number of words.

Mr. Speaker, I believe this continuing resolution is necessary.

I am afraid the gentleman from Iowa, if he is interested at all in my observation, will find my distinguished chairman is a bit optimistic. I thought that this resolution might go until sine die instead of trying to get it as of September 30, but it is not always a pleasant thing to come in and ask for the continuing resolution.

I would be willing of course to bet, but we are not allowed to bet on the floor of the House, but I would wager a buckeye at least that we will be here for another continuing resolution after September 30.

Mr. GROSS. Mr. Speaker, will the gentleman yield?

Mr. BOW. I yield to the gentleman from Iowa.

Mr. GROSS. The gentleman from Iowa

is not much of a bettor and he would have little or no use for a buckeye. I hope the gentleman is wrong and I hope if he does make that kind of wager that he loses, because I can see no reason in the world why we should be in session during the month of October.

Mr. BOW. The gentleman knows it would not be the first time I have been wrong. This is one time I should like to be wrong, on this, but I just do not like to see people get their hopes up to be out of here by September 30, when we look at what is ahead of us and also realize there may be some delaying tactics in another body. I would suggest we do not get packed on September 30.

Mr. Speaker, as I said, I am in favor of this continuing resolution. I hope it will pass unanimously.

Mr. MAHON. Mr. Speaker, I move the previous question on the joint resolution to final passage.

The previous question was ordered.

The SPEAKER. The question is on the engrossment and third reading of the joint resolution.

The joint resolution was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER. The question is on the passage of the joint resolution.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. DELLENBACK. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members, and the Clerk will call the roll.

The question was taken; and there were—yeas 381, nays 8, not voting 43, as follows:

So the joint resolution was passed.

The Clerk announced the following pairs:

Mr. Hébert with Mr. Rhodes.

Mr. Rooney of New York with Mr. Betts.

Mr. Blanton with Mr. Baker.

Mr. Waldie with Mrs. Abzug.

Mr. Ryan with Mr. Carter.

Mr. Brasco with Mr. Lujan.

Mr. Hull with Mr. Lent.

Mr. Landrum with Mrs. Heckler of Massachusetts.

Mr. Passman with Mr. Clancy.

Mr. Edmondson with Mr. Conte.

Mr. Leggett with Mr. McCloskey.

Mr. Lennon with Mr. Keith.

Mr. Hagan with Mrs. Dwyer.

Mr. McMillan with Mr. Davis of Wisconsin.

Mr. Rarick with Mr. Schmitz.

Mr. Long of Louisiana with Mr. Pelly.

Mr. Abernethy with Mr. Edwards of Alabama.

Mr. Gallagher with Mr. Schneebeli.

Mr. Dowdy with Mr. Michel.

Mr. Roybal with Mr. Fish.

Mr. Mills of Arkansas with Mr. Frelinghuysen.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. MAHON. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the appropriation bill for disaster relief (H.R. 16254) passed this afternoon and on the continuing joint resolution (H.J. Res. 1278) just passed.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

CONFERENCE REPORT ON H.R. 9092, PAY OF GOVERNMENT PREVAILING RATE EMPLOYEES

Mr. HENDERSON. Mr. Speaker, I call up the conference report on the bill (H.R. 9092) to provide an equitable system for fixing and adjusting the rates of pay for prevailing rate employees of the Government, and for other purposes, and ask unanimous consent that the statement of the managers be read in lieu of the report.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

The Clerk read the statement.

(For conference report and statement, see proceedings of the House of August 1, 1972.)

Mr. HENDERSON (during the reading). Mr. Speaker, I ask unanimous consent to dispense with further reading of the statement.

The SPEAKER. Is there objection to

the request of the gentleman from North Carolina?

There was no objection.

Mr. HENDERSON. Mr. Speaker, the bill H.R. 9092, passed the House by a voice vote on July 28, 1971. On June 15, 1972, the Senate by voice vote passed H.R. 9092 with three substantive amendments.

The conference agreement contains only two substantive changes to the House-passed bill. These changes are as follows:

FEDERAL PREVAILING RATE ADVISORY COMMITTEE

The House bill established a Federal Prevailing Rate Advisory Committee, composed of 11 members, to study the prevailing rate system.

The Advisory Committee would be composed of five representatives of management and five representatives of Federal employee organizations, plus an independent Chairman to be appointed by the President for a 4-year term.

Nine of the 10 Advisory Committee members would be designated by the Chairman of the Civil Service Commission.

The conference agreement adopts the provisions of the House bill regarding the Federal Prevailing Rate Advisory Committee, except that the Chairman of the Advisory Committee will be appointed by the Chairman of the Civil Service Commission rather than by the President.

As was provided in the House bill, the Chairman of the Advisory Committee will be appointed for a 4-year term and may not hold any other office or position in the Federal Government or in the District of Columbia government.

EFFECTIVE DATE OF NEW FOURTH AND FIFTH PAY STEPS

One of the major changes in the prevailing rate system which is made by H.R. 9092 is to provide that each grade of a regular wage schedule for nonsupervisory prevailing rate employees shall have five steps instead of the present three steps.

Under the effective date section of the House bill, the provisions relating to the new fourth and fifth pay steps would have become effective on the first day of the first pay period which begins on or after the 90th day after the date of enactment.

The conference agreement provides that the provisions of the bill relating to the new forth and fifth pay steps shall not become effective until the first day of the first pay period commencing after: First, the date on which the President ceases to exercise his authority under the Economic Stabilization Act of 1970 to stabilize wages and salaries, or second, April 30, 1973, whichever date occurs first.

This change, of course, is made in recognition of the administration's existing program of economic restraint.

Mr. Speaker, I believe the bill H.R. 9092 represents very reasonable and equitable legislation. I urge adoption of the conference report.

Mr. Speaker, I am delighted to yield now to my distinguished colleague from Virginia.

Mr. ABBITT. Mr. Speaker, I take this time simply to congratulate the gentleman who has just presented this report, the chairman of the subcommittee, and the members of his subcommitte and the House conferees. They have done an outstanding job for people who have been long overworked, and I commend the gentleman and his subcommittee for a splendid job well done.

Mr. HENDERSON. I thank the gentleman for his comments. I recognize his longtime interest in the development of this legislation and in the system.

I hope we can move to adopt the conference report very shortly.

Mr. GROSS. Mr. Speaker, I yield 1 minute to the gentleman from Maryland (Mr. HOGAN).

Mr. HOGAN. Mr. Speaker, again, I find myself in the uncomfortable position of supporting legislation—the conference report on H.R. 9092—which is opposed by the President. I am hopeful that circumstances this time will allow him to sign this bill into law.

As I stated when this bill passed the House in 1970 and again in July 1971 enactment will go a long way toward assuring that Wage Board employees, so-called blue-collar workers, of the Federal Government, are in a pay position comparable with their counterparts in private industry.

It is my opinion, Mr. Speaker, that this upgrading and revision of the prevailing rate system is long overdue, and necessary if the Federal Government is going to compete with private industry for top-flight laborers and tradesmen.

This compromise bill is realistic, equitable, and just, and will provide necessary guidelines for Wage Board rates for many years to come.

I strongly urge passage of this legislation.

Mr. GROSS. Mr. Speaker, I yield myself 5 minutes.

Mr. Speaker, I oppose the conference report on this bill and urge that it be rejected. The differences between the Senate- and House-passed bills were relatively minor, and there was no way for the conferees to report an acceptable piece of legislation.

Mr. Speaker, I did not sign the conference report, and neither did any of the House Members who were conferees on this piece of legislation.

First, I think one point should be made very clear. There seems to be some attempt, whether intentional or not, to disguise this bill as a general pay raise for Federal blue-collar workers in order to treat these employees on an equitable basis with so-called white-collar employees. Such is not the case.

Under the existing system for fixing the pay of Wage Board employees, pay raises are continually being granted these workers in all wage areas throughout the United States. Before the wage-price guidelines, pay raises averaging over 8 percent were the rule. Pay raises equaling the 5.5-percent guidelines are now being given in most wage areas. In fact, the present Wage Board system is not only operating effectively, but it is maintaining the pay of these employees on a comparable basis with pay in the private sector.

What this bill actually does is destroy forever the prevailing rate concept—the existing system—which has operated successfully for more than 100 years to assure Wage Board employees full comparability with private industry employees. The bill replaces the existing three-step pay system with a five-step pay system, with the fifth step paying 12 percent more than local prevailing wages. Since most Wage Board employees would eventually go into the fifth step, the new system perpetually guarantees that most Wage Board employees around the country will be paid 12 percent higher pay rates than are paid by local private employers. The legislation would adopt the policy that the Federal Government will be the highest paying employer in any given wage area in the United States.

Mr. Speaker, the consequences of such a policy could be devastating. Certainly, there would ensue an inflationary wage spiral throughout the country that would be impossible to control. The Federal Government, by setting Federal wages 12 percent higher than local wages, would be inviting inflated pay demands nationwide from every trade, craft, and union. Employees in the private economy would be automatically forced into a continuing demand to catch up and to receive wages comparable to those received by Federal employees.

I would also point out that this bill will add an additional $180 million per year to the existing $4 billion Wage Board pay roll. It is a cost that is not budgeted. It will contribute to the existing budget deficit. It will definitely feed the fires of inflation.

There are additional reasons why this conference report should be rejected. The inclusion of so-called nonappropriated fund employees, the enactment of nationwide pay differentials for evening and night work, the one-half billion dollar additional increase in the unfunded liability of the civil service retirement system—these are but a few.

Mr. Speaker, by every objective standard, this is bad legislation. It is a much worse bill than was enacted in the last Congress—and which was vetoed by the President. It is a bill that definitely violates the President's message to the Congress on July 26 on fiscal discipline, in which he stated he would veto any bill coming to his desk which called for excessive spending threatening the Federal budget.

I sincerely urge that this conference report be rejected; otherwise, I would think the President will have no other course of action but to veto it.

Mr. HENDERSON. Mr. Speaker, will the gentleman yield?

Mr. GROSS. I am glad to yield to the gentleman from North Carolina.

Mr. HENDERSON. Mr. Speaker, I believe that the gentleman from Iowa inadvertently made a misstatement in his remarks; I believe the gentleman said that none of the Members who were House conferees signed the conference report. I am sure the gentleman from Iowa did not mean that.

Mr. GROSS. None of the minority members of the committee signed the conference report.

Mr. HENDERSON. All of the majority members signed the conference report.

Mr. GROSS. If I made that statement it will be corrected, and I thank the gentleman from North Carolina for correcting me.

Mr. ROUSSELOT. Mr. Speaker, the question on this conference report on H.R. 9092 is not whether we are in support of Federal blue collar workers because, we are, but rather do we favor a pay system that will allow, not a prevailing wage rate, but an actual wage rate of 12 percent above the prevailing rate for local private industry.

To vote "aye" means you approve of Federal employees receiving 12 percent above the rates of pay the craftsmen and tradesmen receive in your district. To vote "no" means you disapprove of this concept, and the corresponding inflationary effects.

Mr. Speaker, our present system of compensating Federal blue collar workers by paying them the local prevailing rates of pay of their counterparts in private industry has worked well, and we should not tamper with it.

I urge disapproval of the conference report on H.R. 9092.

Mr. HILLIS. Mr. Speaker, the conference report on H.R. 9092 is a fair compromise of the bills which passed the House and the Senate, and I support it.

While I still do have reservations concerning the inclusion of nonappropriated fund employees in the prevailing rate system, nevertheless, they, too, must be treated fairly. And, this bill will enact into law the principle of equal pay for equal work, and assure the Federal Government of being able to recruit and retain the best qualified tradesmen and craftsmen.

Mr. Speaker, the time has come to properly recognize our Federal blue collar workers and insure that they receive the same compensation as their counterpart in the private sector.

Mr. DULSKI. Mr. Speaker, I rise in support of the conference agreement on H.R. 9092. This legislation will establish a long-needed statutory system for fixing and adjusting rates of pay for prevailing rate employees of the Federal Government. There are approximately 600,000 Federal employees covered by this legislation.

I want to take this opportunity to express my appreciation to the gentleman from North Carolina (Mr. HENDERSON) and the other conferees, for their cooperation in working out the conference agreement. There really is only one significant difference between the conference agreement and the House-passed bill.

This difference is the effective date for the new fourth and fifth pay steps. The effective date under the House bill for the fourth step would have been the first day of the first pay period which begins on or after the 90th day after the date of enactment. The employees eligible for advancement on that date would go into the fourth step, and after serving the prescribed time for in-step service, would advance to the fifth step.

The conference agreement provides that these new steps shall not become effective until the first day of the first pay period commencing after the date on which the President ceases to exercise his authority under the Economic Stabilization Act of 1970, to stabilize wages and salaries, or April 30, 1973, whichever date occurs first.

This is not a significant delay as it extends only from 90 days after date of enactment to April 30, 1973, a matter of not more than 6 months. The major benefits that will accrue under this Act far offset this 6-month delay.

Approval of the conference report by the House, which I am convinced will be followed by approval of the legislation by the President, will result in enactment into law the long established principles and policies for setting the pay of prevailing rate employees.

In addition, it will make the following changes in the currenty operating system and procedures.

It will establish a Federal Prevailing Wage Advisory Committee consisting of 11 members, one of whom will be a full-time chairman appointed by the Chairman of the Civil Service Commission.

It will provide new wage schedules for five pay steps instead of the present three steps, with the fifth step rising to 112 percent of the prevailing wage.

It provides automatic step advancements after 26 weeks in step 1, 78 weeks in step 2, and 104 weeks in each of step 3 and step 4.

It provides a 7½-percent pay differential for nonovertime work during the second shift, 3 p.m. until midnight, and 10 percent for the third shift, 11 p.m. until 8 a.m.

It provides saved pay for 2 years for prevailing rate employees who are reduced in grade.

And the final major feature of this legislation will bring employees of nonappropriated fund activities of the Armed Forces, and employees of the Veterans' Canteen Service, under the prevailing rate system.

Mr. Speaker, I urge the adoption of the conference report.

Mr. HENDERSON. Mr. Speaker, I move the previous question on the conference report.

The previous question was ordered.

The conference report was agreed to.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. HENDERSON. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the conference report on the bill H.R. 9092.

The **SPEAKER.** Is there objection to the request of the gentleman from North Carolina?

There was no objection.

CONFERENCE REPORT ON H.R. 5065, AMENDING NATURAL GAS PIPELINE SAFETY ACT OF 1968

Mr. STAGGERS. Mr. Speaker, I call up the conference report on the bill (H.R. 5065) to amend the Natural Gas Pipeline Safety Act of 1968, and ask unanimous consent that the statement of the managers be read in lieu of the report.

The Clerk read the title of the bill.

The **SPEAKER.** Is there objection to the request of the gentleman from West Virginia (Mr. STAGGERS)?

There was no objection.

The Clerk read the statement.

(For conference report and statement, see proceedings of the House on August 9, 1972.)

The **SPEAKER.** The gentleman from West Virginia (Mr. STAGGERS) is recognized.

Mr. STAGGERS. Mr. Speaker, there were very few differences between the Senate and the House bills, and it took the conferees only a few minutes to iron out these differences. The House was able to accept most of the Senate amendments, and the Senate was willing to compromise on one of the principal provisions.

The House bill had provided that the Secretary of Transportation must pay to the States the grants-in-aid provided for in this legislation. The Senate bill left to the discretion of the Secretary whether such grants-in-aid payments should be made. The compromise language provides that the Secretary shall pay the grants-in-aid unless he determines that a particular State has failed to carry out the State safety program in a satisfactory manner.

The other Senate amendments agreed to by the conferees relate to the deadline which the States must meet to qualify under the legislation and to reports which the Secretary will be required to submit to the Congress.

Mr. Speaker, I urge the adoption of the report.

Mr. STAGGERS. Mr. Speaker, I move the previous question on the conference report.

The previous question was ordered.

The conference report was agreed to.

A motion to reconsider was laid on the table.

MOTOR VEHICLE SAFETY ACT

Mr. MATSUNAGA. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 1084 and ask for its immediate consideration.

The Clerk read the resolution as follows:

H. RES. 1084

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 15375) to amend the National Traffic and Motor Vehicle Safety Act of 1966 to authorize appropriations for fiscal year 1973. After general debate, which shall be confined to the bill and shall continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Interstate and Foreign Commerce, the bill shall be read for amendment under the five-minute rule. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

Mr. MATSUNAGA. Mr. Speaker, I yield 30 minutes to the gentleman from California (Mr. SMITH), pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 1084 provides an open rule with 1 hour of general debate for consideration of H.R. 15375 to amend the National Traffic and Motor Vehicle Act.

The purpose of H.R. 15375 is to authorize $37,461,000 for fiscal year 1973 to carry out the responsibilities and functions of the Department of Transportation under the act.

The legislation as introduced would have authorized $37 million, which was the Department's budget request. After hearings, however, the authorization was increased to $37,461,000, because of pay adjustments mandated by the Pay Act.

The funds are expected to be used as follows: $3.4 million for motor vehicle and equipment standards, $5.8 million for compliance and defects analysis, $22.7 million for research and analysis, $5.4 million for personnel and support cost.

Mr. Speaker, I urge the adoption of the rule.

Mr. SMITH of California. Mr. Speaker, I yield myself such time as I may consume.

Mr. SMITH of California. Mr. Speaker, in the interest of time I concur and associate myself with the remarks of the gentleman from Hawaii in explanation of the rule. I simply add, Mr. Speaker, that there are letters in the committee report from the Office of Management and Budget and Department of Transportation arguing for a different bill, H.R. 15111.

This would have amended the act and also provided an open-ended authorization, but the Interstate and Foreign Commerce Committee preferred not to give an open-ended authorization and therefore decided not to consider H.R. 15111 at that time. Instead, they recommended H.R. 15375. There are no minority reports in the committee report. The committee reported it by voice vote.

Mr. Speaker, I urge the adoption of House Resolution 1084.

Mr. MATSUNAGA. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

Mr. STAGGERS. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 15375) to amend the National Traffic and Motor Vehicle Safety Act of 1966 to authorize appropriations for fiscal year 1973.

The SPEAKER. The question is on the motion offered by the gentleman from West Virginia.

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill H.R. 15375, with Mr. BINGHAM in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

The CHAIRMAN. Under the rule, the gentleman from West Virginia (Mr. STAGGERS) will be recognized for 30 minutes, and the gentleman from North Carolina (Mr. BROYHILL) will be recognized for 30 minutes.

The Chair recognizes the gentleman from West Virginia (Mr. STAGGERS).

Mr. STAGGERS. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I rise in support of H.R. 15375—a bill to amend the National Traffic and Motor Vehicle Safety Act to authorize appropriations for fiscal year 1973.

This legislation proposes to authorize $37,461,000 for fiscal year 1973 to carry out functions and responsibilities under the Motor Vehicle Safety Act. This amount is equal to the Department of Transportation's budget request for fiscal year 1973, and represents a 20-percent increase over 1972 expenditures for the auto safety program.

In the last few years we are seeing real evidence that the legislative efforts of the Congress in motor vehicle and highway safety and the work of the National Highway Traffic Safety Administration are beginning to bear fruit. It is clear that safety standards have saved lives and that the overall rate of death and serious injury is declining. Preliminary statistics of 1972, however, indicate that the number of motor vehicle fatalities is on the rise. If statistical projections can be trusted, we will set an annual record in 1972 for highway deaths. Quite obviously we must increase our efforts to reverse this trend.

Let me say a brief word to explain why the committee recommends only a 1-year authorization in this legislation. In March of this year the Department of Transportation submitted proposed legislation which included an amendment to the National Traffic and Motor Vehicle Safety Act to allow an open-ended authorization for "such amounts as are necessary" to carry out the purposes of the act. It has been the consistent position of the Committee on Interstate and Foreign Commerce that our legislative oversight responsibilities preclude the giving of blanket authorizations. Accordingly, we asked the Department to submit cost estimates for the next 3 fiscal years. On June 5, 1972, the Department informed the committee that its requirements for fiscal years 1974 and 1975 have not yet been determined and only fiscal year 1973 data were available. Recognizing that the existing authorizing authority under the act would terminate on June 30, I introduced the bill, H.R. 15375, to extend the authorization for 1 additional year.

Hearings on the proposed 1-year extension were held and—after a minor amendment to take into account a pay act adjustment—the bill was reported unanimously by both the subcommittee and the full committee.

I am well aware that the administration and many Members have proposed important substantive amendments to the National Traffic and Motor Vehicle Safety Act. The committee has every intention to conduct thorough hearings on these proposals at the earliest possible date. At that time we are hopeful that the Department will be able to provide estimates of their budget requirements for fiscal years 1974 and 1975 so that we may extend the authorization to cover those years.

Mr. ROUSH. Mr. Chairman, will the gentleman yield?

Mr. STAGGERS. I yield to the gentleman from Indiana.

Mr. ROUSH. Mr. Chairman, I thank the chairman for yielding. I would like to make some comments regarding the bill before us today authorizing appropriations for fiscal 1973 to carry out functions and responsibilities under the National Traffic and Motor Vehicle Safety Act.

I intend to support this bill.

But I have also this day introduced a bill that would amend the bill before us to open the national driver register for certain special purposes. I am not offering this proposal as an amendment to the bill before us today because I realize that hearings have not been held on this proposal as yet. But the chairman of the House Interstate and Foreign Affairs Committee has introduced this same proposal and it has the endorsement of the Department of Transportation. Let me now explain the objective sought.

The national driver registration compilation maintained by the Department of Transportation contains the names of individuals whose driver's licenses have been terminated, or temporarily withdrawn. The names are supplied to the registry from the States. This is a list, then, of drivers guilty of serious violations of the law.

Under present law the release of register information is permitted only to a State, one of its political subdivisions or a Federal agency and only for the purpose of issuing a motor vehicle operator's license or permit. The bill I have introduced today would change the law in two respects.

First it would allow the State to enter the Register on request of an employer, like a moving company, which was considering hiring a driver. In this instance it is important to know if the prospective employee has a history of license suspensions or revocations based on a record of hazardous, unsafe, drunken driving and any convictions for these. Presently such information is not available from the National Registry. The employer could ask each State in which the job applicant is registered as a driver for such information, but that is time consuming and inadequate. There is no way the employer can know which States the applicant was registered in, unless that information is given by the prospective employee.

Second, in section 2(a)(3) of the bill I introduced today, information would become available from the Register to judges prior to their imposition of sentences on individuals convicted of offenses arising out of the unsafe operation of motor vehicles. Certainly judges should be allowed access to information available in the Register in order to be able to justly and properly sentence a violater. As a former county prosecuting attorney I found that previous license revocations, suspensions or driving conditions imposed on Indiana drivers when brought into court acted as a definite influence on judges in succeeding driving offenses. If the driver happened to be from Indiana his record was available, but if from another State, or if his or her license from another State had been revoked we had no ready access to this information. Again, as with employers, we could ask the States in question, if we knew about them.

I believe opening the National Driver Register in these two ways extremely important. This bill also recognizes the importance of privacy and thus requires the State to furnish at no cost to the individual involved, copies of any information furnished any potential employer.

My interest in this legislative proposal is that the goal of highway safety be better served in view of the fact that last year approximately 55,000 Americans lost their lives on our Nation's streets and highways as a result of motor vehicle accidents.

My special interest in this legislative proposal is that I believe it is one way to help drive the drunken driver from the streets. Research findings indicate that half of those 55,000 dead are the victims not of the automobile, but of alcohol. This means that 2,250 persons a month, 75 a day, one person every 20 minutes dies in motor accidents influenced by alcohol. The National Highway Traffic Safety Administration considers reducing this problem of the highest priority. So do I.

We have begun an important campaign in this country to make the automobiles we drive safer, less vulnerable on impact. We will finally reach a limit, technologically, in what we can do to make cars safe. The National Highway Traffic Safety Administration is also trying to educate the public on safety standards for drivers for this is equally important.

I also believe that we must make some legislative adjustments and that is why I have introduced this bill today. In the House Report accompanying H.R. 15375, which authorizes appropriations under the National Traffic and Motor Vehicle Safety Act, the committee noted that several important bills have been introduced which propose substantive amendments to the National Traffic and Motor Vehicle Safety Act and that the committee intends to conduct thorough hearings on these proposals "at the earliest possible date." I hope that the proposal I have discussed today will be among these.

Mr. STAGGERS. Mr. Chairman, I might say to the gentleman this could be taken under consideration next year. It is not in this bill in any way. We have to have another authorization next year, and at that time we will consider the amendments.

Mr. ROUSH. If the gentleman will yield further, I understand it will not pertain to this bill and I can understand the reasons why. I merely ask the question in order to express an opinion, I guess, to the effect that I think these are substantive matters and should be brought to the attention of the committee. More than 55,000 people died on the U.S. highways last year. In approximately half of those instances drinking drivers were involved.

Mr. STAGGERS. I realize that.

Mr. ROUSH. I hope some way or other this Congress might direct its attention to this highway safety problem which confronts us.

Mr. HALL. Mr. Chairman, will the gentleman yield?

Mr. STAGGERS. I yield to the gentleman from Missouri (Mr. HALL).

Mr. HALL. Mr. Chairman, I appreciate the distinguished chairman of the Committee on Interstate and Foreign Commerce yielding to me.

Mr. Chairman, I have read the report thoroughly. As one who does his homework and I hope is erroneously accused of being quick to criticize ofttimes, I want to compliment the committee thoroughly on the report, to say nothing of its decisions and actions. This is an unusually good report which demonstrates the concern for reducing the numbers of injuries and the numbers of accidents.

One has to drive only halfway across the Nation to understand why that is happening; namely, car production and probably unlicensed and incapable drivers who are driving longer cars faster than we can build the roads to accommodate them.

I am not sure we can legislate that out of existence, but I am very appreciative of the action and the function of the committee, and I certainly want to compliment the committee for continuing their effort, all of which has been funded for the amount appropriated and authorized in recent years with the exception of a very few tens of thousands of dollars, in the research and development necessary. Still they have not gone for the open-ended funding and runaway inflation characteristic of so many of the ideologists and "bleeding hearts." This is the epitome of responsible oversight and surveillance on the part of a standing committee of the legislative branch of our Government.

I believe the committee has quite properly taken a firm stance, and again I compliment the committee on its action. I intend to vote for this bill.

Mr. STAGGERS. I appreciate the words of the gentleman from Missouri.

Mr. BROYHILL of North Carolina. Mr. Chairman, I yield myself 5 minutes.

Mr. Chairman, the chairman of the full committee has given a very good explanation as to what this bill will do. It is a simple extension of this much needed program.

Also, as the gentleman explained, the bill as introduced was open-ended. DOT wanted an open-ended authorization, but the committee provided a 1-year extension with specific figures.

I might add that the budget requests are exactly the same as the amounts authorized in this legislation.

In partial answer to the question of the gentleman from Indiana, we had a very short discussion in the committee of all the amendments which were pending before the subcommittee at the time. There were a number of amendments pending. I should be delighted to go over these with the gentleman, if he would like to have me do so.

The amendment the gentleman was interested in was one of them. Of course, I do not know whether either of us will be back in the Congress next year, but if I am a member of this committee I can assure the gentleman from Indiana we will give very serious attention to the amendment he has proposed as well as to the amendments that have been proposed by the Secretary of Transportation.

It was felt by the subcommittee that in order to get this legislation through and to get some appropriations which are needed we should give a simple extension and not go into all these amendments at this particular time.

I might add that the appropriations for this program have not been considered yet and will possibly come up in an appropriation bill at a later date.

Mr. BURKE of Florida. Mr. Chairman, I rise in support of H.R. 15375, which, if enacted, will amend the National Traffic and Motor Vehicle Safety Act of 1966 to authorize appropriations for fiscal year 1973 in the amount of $37,461,000.

When the Congress in 1966 passed the National Traffic and Motor Vehicle Safety Act, it committed all of us in the United States to a program of reducing the annual toll of motor vehicle deaths and injuries on our highways, and although some progress has been made, yet the increasing number of automobiles and automobile users, makes it imperative for us to intensify our efforts to implement the work of the National Highway Traffic Safety Administration.

Although the rate of deaths and serious injury is declining, yet the absolute number of motor vehicle fatalities is rising. Motor vehicle fatalities present to us some gruesome figures. Through March 1972 they totaled 11,800 compared to 11,130 for the same period in 1971. Based on the past experience, the Department of Transportation projects a 1972 fatality total of 57,500 compared to 55,000 in 1971, an increase of 4.5 percent.

If these projected figures prove accurate, more Americans, young and old, will be killed in 1972 on the U.S. highways than have been killed in Vietnam during the entire war. To look at it in another way, Hollywood, Fla., the second largest city in my congressional district, has approximately 110,000 people. The projected number of traffic deaths on U.S. highways then will be more than one-half the population of the city of Hollywood, Fla. This slaughter is everyone's problem and this slaughter must be stopped.

Mr. Chairman, the authorization provided by this legislation represents an increase of approximately 20 percent over the 1972 expenditures for the auto safety program. Even though I advocate that Government expenditures be held at a minimum, if we are to fight inflation, yet to me our highway fatalities are a national disgrace.

One hears a lot of talk about reordering priorities and here is a perfect case in point. Last week Congress finished work on the Labor-HEW appropriation for fiscal year 1973 providing billions of dollars in Federal money on health programs. If we are, however, interested in saving lives through Federal programs, then this is the program because the yield from improved highway safety would go further dollar for dollar than that spent in the various health programs. Do not misunderstand me, because most health programs are good and necessary, but what I am trying to say is that more lives can be spared with improved automobile and highway safety programs than through any individual health program that has been proposed. If we had 57,500 people dying from a single disease in any one year the demand of the public to find a cure would be enormous. Yet people in our country accept highway deaths more complacently than death from any disease although death rides in the front seat with all of us when we take the wheel of our cars or when we sit as a passenger therein.

For this reason I support the passage of H.R. 15357 and ask my colleagues to vote in its favor.

Mr. STAGGERS. Mr. Chairman, I have no further requests for time.

Mr. BROYHILL of North Carolina. Mr. Chairman, I have no further requests for time.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 121 of the National Traffic and Motor Vehicle Safety Act of 1966 (15 U.S.C. 1409) is amended to read as follows:

"SEC. 121. There are authorized to be appropriated for the purpose of carrying out this Act, not to exceed $37,000,000 for the fiscal year 1973."

Mr. STAGGERS (during the reading). Mr. Chairman, I ask unanimous consent that the bill be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from West Virginia.

There was no objection.

COMMITTEE AMENDMENT

The CHAIRMAN. The Clerk will report the committee amendment.

The Clerk read as follows:

Committee amendment: On page 1, line 8, strike out "$37,000,000" and insert in lieu thereof $37,461,000".

The committee amendment was agreed to.

The CHAIRMAN. Under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. BINGHAM, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee having had under consideration the bill (H.R. 15375) to amend the National Traffic and Motor Vehicle Safety Act of 1966 to authorize appropriations for fiscal year 1973, pursuant to House Resolution 1084, he reported the bill back to the House with an amendment adopted by the Committee of the Whole.

The SPEAKER. Under the rule, the previous question is ordered.

The question is on the amendment.

The amendment was agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

PROVIDING FOR CONSIDERATION OF S. 3824, PUBLIC BROADCASTING CORPORATION AUTHORIZATION

Mr. MATSUNAGA. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 1086 and ask for its immediate consideration.

The Clerk read the resolution as follows:

H. RES. 1086

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (S. 3824) to authorize appropriations for the fiscal year 1973 for the Corporation for Public Broadcasting and for making grants for construction of noncommercial educational television or radio broadcasting facilities. After general debate, which shall be confined to the bill and shall continue not to exceed one hour to be equally divided and controlled by the chairman and ranking minority member of the Committee on Interstate and Foreign Commerce, the bill shall be read for amendment under the five-minute rule. It shall be in order to consider the amendment in the nature of a substitute recommended by the Committee on Interstate and Foreign Commerce now printed in the bill as an original bill for the purpose of amendment under the five-minute rule. At the conclusion of such consideration, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and any Member may demand a separate vote in the House on any amendment adopted in the Committee of the Whole to the bill or to the committee amendment in the nature of a substitute. The previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit with or without instructions.

The SPEAKER. The gentleman from Hawaii is recognized for 1 hour.

Mr. MATSUNAGA. Mr. Speaker, I yield 30 minutes to the gentleman from California (Mr. SMITH), pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 1086 provides for consideration of the bill, S. 3824, which would authorize fiscal year 1973 appropriations for the Corporation for Public Broadcasting and for making grants for construction of noncommercial educational television or radio broadcasting facilities. The resolution provides an open rule with 1 hour of general debate, the time to be equally divided and controlled by the chairman and ranking minority member of the Committee on Interstate and Foreign Commerce.

After general debate, the bill shall be read for amendment under the 5-minute rule. It shall be in order to consider the amendment in the nature of a substitute recommended by the Committee on Interstate and Foreign Commerce, now printed in S. 3824, as an original bill.

At the conclusion of consideration of S. 3824 under the 5-minute rule, the committee shall rise and report the bill to the House with such amendments as may have been adopted, and any Member may demand a separate vote in the House on any amendment adopted in the Committee of the Whole to the bill or to the committee amendment in the nature of a substitute.

Mr. Speaker, the Corporation for Public Broadcasting, a private, independent, nonprofit enterprise established under the Public Broadcasting Act of 1967, has effectively carried out its congressional mandate. Under the stewardship of a bipartisan board of 15 members, the Corporation has: First, helped to develop high quality programs for presentation over public television and radio stations, second, helped to establish and develop interconnection for such stations, third, helped to establish and develop systems of public broadcasting stations, and fourth, helped to assure the maximum freedom of noncommercial educational broadcasting systems and stations from interference with or control of program content or other activities.

S. 3824, as reported, would authorize the appropriation of $40 million for the Corporation's operational expenses for fiscal year 1973.

In addition, the bill authorizes an appropriation for payment to the corporation a further sum, not to exceed $5 million, to match dollar for dollar, contributions from non-Federal sources to the Corporation.

Mr. Speaker, S. 3824 would also authorize $25 million for the educational broadcasting facilities grant program. However, because prior legislation has already authorized $15 million for that program for fiscal year 1973, this particular provision of the pending bill would actually increase the grant program amount by only $10 million.

Mr. Speaker, I urge the adoption of House Resolution 1086 in order that S. 3824 may be considered.

Mr. SMITH of California. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, first I agree with the remarks made by the gentleman from Hawaii (Mr. MATSUNAGA) and associate myself with them in explanation of House Resolution 1086.

Mr. Speaker, I think this is a rather unique situation and a rather interesting situation because to some extent I believe we are legislating after the fact. You will remember, Mr. Speaker, we had the original bill here some time ago to extend for 2 years the Public Broadcasting Corporation, and I believe it had some $65 million in it rather than the $45 million.

The administration objected to the 2 years, and to the amount.

We had quite a bit of discussion about Sander Vanocur, and about some other individual, and it was quite an interesting operation. In any event, the President vetoed that bill on June 30, 1972.

I do not believe there was any effort to override the veto, and the Senate prepared this bill clearly in accordance with the request of the President of $45 million and for the 1-year extension.

I voted against the original bill, although I support the Public Broadcasting System. Then last week, Mr. Speaker, we had an appropriation conference report that had the $45 million in it. So we have already appropriated the $45 million.

So what we are going to do today is to make legal what we did last week in appropriating the money. I voted against the conference report on the appropriation because I thought it was against the rules. I did it technically, but on the bill here today, to make everything legal, I am going to vote for it, Mr. Speaker. I urge the adoption of the resolution and the bill so we can get the train back on the track legally and in accordance with the rules.

Mr. MATSUNAGA. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

PERMISSION FOR COMMITTEE ON RULES TO FILE CERTAIN REPORTS

Mr. MATSUNAGA. Mr. Speaker, I ask unanimous consent that the Committee on Rules may have until midnight tonight to file certain reports.

The **SPEAKER.** Is there objection to the request of the gentleman from Hawaii?

There was no objection.

PUBLIC BROADCASTING CORPORATION AUTHORIZATION

Mr. STAGGERS. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (S. 3824) to authorize appropriations for the fiscal year 1973 for the Corporation for Public Broadcasting and for making grants for construction of noncommercial educational television or radio broadcasting facilities.

The motion was agreed to.

The **SPEAKER.** The Chair appoints the gentleman from Connecticut (Mr. GIAIMO) to preside over the Committee of the Whole and asks the gentleman from New York (Mr. BINGHAM) to take the Chair temporarily.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration on the bill (S. 3824), with Mr. BINGHAM (Chairman pro tempore) in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

The **CHAIRMAN** pro tempore. Under the rule, the gentleman from West Virginia (Mr. STAGGERS) will be recognized for 30 minutes, and the gentleman from Florida (Mr. FREY) will be recognized for 30 minutes.

The Chair recognizes the gentleman from West Virginia (Mr. STAGGERS).

Mr. STAGGERS. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, the bill before the House does two things. It authorizes the appropriation of $45 million for the Corporation for Public Broadcasting for fiscal year 1973 and increases the authorization for grants for noncommercial educational broadcasting facilities for fiscal year 1973 from $15 million to $25 million. Although the committee has amended the Senate bill, the amendment is entirely technical in nature and the subtance of the House committee amendment is the same as the bill passed by the Senate.

As Members of the House will recall, Mr. Chairman, on April 11 of this year the House by a vote of 256 to 69 passed H.R. 13918 which among other things—

Authorized the Corporation for Public Broadcasting to promote the utilization and development of telecommunications facilities for the production and distribution of educational radio and television programs.

Required that at least 30 percent of the funds appropriated to CPB in each fiscal year be distributed to noncommercial educational broadcasting stations for use—in their discretion—in activities related to their local broadcast operation.

Authorized an appropriation to CPB of not to exceed $65 million for fiscal year 1973 and not to exceed $90 million for fiscal year 1974.

Provided for inclusion of the 15 member board of directors of CPB of five members who are chief executive staff officers of noncommercial educational broadcasting stations. All members of the board of directors are, and would continue to have been, appointed by the President, by and with the advice and consent of the Senate.

Increased from $15 million to $25 million the authorization for fiscal year 1973 for grants for acquisition and installation of noncommercial educational broadcasting facilities.

The Senate passed the House bill without amendment by a vote of 82 to 1 on June 22. On the last day before the Fourth of July recess began the President vetoed H.R. 13918.

Frankly, Mr. Chairman, I was shocked and terribly disappointed by the President's veto. There is no better investment in the future of this great Nation than education and H.R. 13918 would have provided education, information, and enlightenment not only for the young people in our schools but for everyone who has access to a television set which today, Mr. Chairman, includes just about every man, woman, and child in the United States.

Since H.R. 13918 was last acted upon in the House—June 1—several other events of great consequence to public broadcasting have taken place, Mr. Chairman.

Five members have been appointed to the board of directors of CPB. When they are joined by our former colleague here in the House, Thomas Curtis, as I think they soon will be, there will be a Republican majority on the CPB's board of directors for the first time since the corporation was organized.

The chairman of the board of CPB, Frank Pace, its president, John Macy, and Ralph Nicholson, the corporation's vice president, have all announced their resignations. Without digressing too far, Mr. Chairman, I would like to take this opportunity to commend these gentlemen for the job they have done. It has been superb. My hope is that their successors will do as well.

Last week the House in acting on the Labor-HEW appropriation bill (H.R. 15417) provided for the appropriation of $45 million for the CPB and $15 million for grants for noncommercial educational broadcasting facilities for fiscal year 1973.

Mr. Chairman, the bill before the House was introduced in the other body and passed by it on the fifth day after our return from the Fourth of July recess—July 21. As I have already said, it does nothing more than authorize $45 million for the CPB, and $25 million for grants for noncommercial educational broadcasting facilities, for fiscal year 1973. I have every confidence that the bill will be signed by the President.

Mr. Chairman, several amendments relating to the Corporation for Public Broadcasting were offered and two were adopted while H.R. 13918 was under consideration here in the House. It is my hope that S. 3824 will be passed by the House without amendment.

The Corporation will soon be operating under new leadership. I think its new leaders should be given at least a year to show what they can do without imposing restrictive amendments on the corporation.

Mr. Chairman, I urge Members of the House to pass S. 3824, as reported by the Interstate and Foreign Commerce Committee.

Mr. GROSS. Mr. Chairman, will the gentleman yield?

Mr. STAGGERS. I am very happy to yield to the gentleman from Iowa.

Mr. GROSS. Would the defeat of this authorizing legislation invalidate the appropriation, as approved by the House only a few days ago?

Mr. STAGGERS. I believe since the House has passed the appropriation, defeat of this bill would not invalidate the appropriation.

Mr. GROSS. Someone said here this afternoon that this legislation is merely to validate what the Appropriations Committee approved a few days ago but the gentleman does not think that defeat of this bill would invalidate the appropriation already made?

Mr. STAGGERS. We had this bill on the suspension calendar before the appropriation came up. The Appropriations Committee had the figures that we have in this bill for the CPB.

Then when we found we could not get to it under suspension, we had to get a rule and it was scheduled for today. As the gentleman from Iowa observes the appropriation bill was passed last week.

But, as I say, that is a debatable question.

I do urge the adoption of the bill, Mr. Chairman.

Mr. MACDONALD of Massachusetts. Mr. Chairman, will the gentleman yield?

Mr. STAGGERS. I yield to the gentleman from Massachusetts (Mr. MACDONALD), chairman of the subcommittee.

Mr. MACDONALD of Massachusetts. Mr. Chairman, I rise in support of this substitute bill rather reluctantly. But knowing that public broadcasting is needed in the country, I, of course, was in favor of the bill which came out of our committee. But, in the absence of any desire to override the President on this particular thing, which now is in the hands of the President and the Board which he has appointed, I ask all Members to support the bill as I intend to do.

Mr. Chairman, I rise in support of S. 3824, a bill to fund the Corporation for Public Broadcasting for fiscal year 1973 at a level of $45 million and to authorize up to $25 million for badly needed technical broadcasting facilities at the local TV and radio stations which broadcast noncommercial, educational programs.

For those of my colleagues who may not have followed the tortuous legislative history of the Public Broadcasting Act of 1972, it will suffice to refer them back to the President's veto of our original bipartisan bill which provided for a substantially higher level of funding, over a 2-year period instead of 1.

That veto did more than kill the bill. It triggered the resignation of John Macy, the president of the Corporation for Public Broadcasting. John Macy is a distinguished public servant who gave without reservation his skill, his talent, his patience, and his health to the proposition that it would be truly in the public interest of all the citizens of the United States if that incredible communications medium, television, offered a choice of program fare for our 50 million television homes. Mr. Macy did an outstanding job, and he will be missed.

Aside from paying tribute to the achievements of John Macy in building the structure that enabled public broadcasting to go in 3 short years for 165 educational TV stations, each going its own way on 165 shoestrings, to more than 200 interconnected stations with a number of first rate, professionally produced, national programs to lure viewers to their sometimes-hard-to-get channels, the business before the House is to maintain at least this minimal support for public broadcasting now, this year, this week.

I am certainly not happy with the options open to us, but those are the options—either pass this bill, or stop public broadcasting dead in its tracks.

I earnestly urge the House to pass S. 3824 without further delay, and without amendments that would nitpick and quibble and serve only to make the public broadcasting people more insecure and frightened of vague and formless threats to their existence.

Those threats have come, quite candidly, from the Office of Telecommunications Policy in the White House. That office has grown like Topsy, and as it has grown, so has its interpretation of its mandate. The policy that they have been setting is much more than policy dealing with the efficient use of the spectrum allocated to Government agencies, much more than dealing with foreign governments, much more than formulating proposals for the orderly development of such futuristic communications techniques as cable TV and satellites.

The policy that OTP has arrogated unto itself is a partisan policy. OTP decided, in all its cloistered wisdom, that public broadcasting might turn out to be something they tried to scare us by calling a "fourth network." Well, what is wrong with a fourth network, or a fifth, or a sixth? Networks are, after all, only a collection of stations who have learned the hard way that they should be interconnected so that important events can be covered on a real-time, simultaneous basis, or that programs distributed from a central source to all affiliated stations at the same time present clear advantages to their viewers and to themselves. Should not the noncommercial broadcasters have access to the same truth? Does it take a genius to perceive that more people will be educated—and absorbed—by watching "Sesame Street" or "Wives of Henry the Eighth" than by watching locally produced finger painting? Should not the hearings of the Senate Foreign Relations Committee be made available in prime time to all public broadcasting stations at once as was done by PBC when the commercial networks could not?

What can be wrong with offering the American people an alternative? The only thing that I can think of would be if that alternative should be Government-controlled, Government-approved, Government-dominated. But turn the coin over—if Government can scare public television away from presenting the important issues that concern the thinking citizen, at a time when he is able to watch that presentation on his TV set the Government's meddling will be directly responsible.

We must put a stop to this Government meddling. The Congress established the Corporation for Public Broadcasting. The administration has tightened the rein on them, but at least public broadcasting can still have some room to run if we pass this bill today. Next year they will be back with their track record, and I hope just as fervently as you that it is a good record.

One more thing: The track record for fiscal 1973 will be the administration's track record. There have been 11 appointments to the CPB board made by President Nixon; the new chairman will be from his party; the new chairman's first job will be to pick a new president to replace John Macy, and his first job will be to pick a new vice president to replace the man who resigned just a month ago. That is a lot of tough assignments, and having completed them, the administration's choices will be called upon to perform. The Congress will be watching that performance with great interest, I am sure. From this side of the aisle, we may even feel constrained to question the judgment of some CPB decision, just as our distinguished colleagues on the other side of the aisle have charged that crimes may have been committed by the choice of commentators or the presentation of programs by this theoretically independent corporation.

The point of the argument here is that Corporation for Public Broadcasting should be independent. It should be insulated from political pressure. It should be free to experiment and make occasional mistakes and bring television into a real golden age, an age where pandering to the lowest common denominator need not rule, where selling deodorants need not be the only criterion for putting on TV programs, where the Congress can look back on its wisdom in creating public broadcasting and say, "That was a good thing."

Mr. FREY. Mr. Chairman, when this bill came before the House a few weeks ago, there was considerable disagreement about the main provisions of the bill, especially the question of the 1- or 2-year authorization. Amendments were offered in various ways to limit the authorization and were defeated by very narrow margins. Many of the misgivings and dissatisfactions voiced here were also noted by the administration and its suggestion for a 1-year authorization allowing an increase of $10 million over 1972 levels, many people felt that this was a 30-percent increase, a very generous increase.

Of course feeling on the opposite side was evidenced by the vote.

Based upon the actions taken here during consideration of the original bill, it became obvious that there were considerably less than two-thirds needed to override a veto for the 2-year funding. Therefore, it is not surprising that when the President did veto it that there has been no attempt to override it.

I think it is important that we understand at this point also that the situation is a little bit different than it was before. I think at this point we had the resignations of the chairman of the board, the president and vice president of the corporation, and we will have new appointments to this. I believe also there are appointments to the number of 15 made to the board of directors. It also will have a different caste to it. I think it is only fair that we allow these people to look at the job they have to do and then to see what they accomplish.

I think to go ahead and change right now would not be fair to them, and certainly it would not be fair to public broadcasting. I also believe that in some way, as the gentleman from California (Mr. SMITH) said, we are beating a dead horse. The Committee on Appropriations has always acted on this. If we are to act today, if we are going to act today on the Senate bill which is basically like this, except for a few technical amendments, we are going to draw this business out until way after the recess, and I think for the good of public broadcasting, even if some in public broadcasting do not like this, they at least ought to know where they stand and what they are going to get.

I personally was hoping the 30 percent pass through provision that we had would be legislation, but the Public Broadcasting Corporation indicated this would be a policy.

I am glad to see that more money is going into facilities because we need them.

To summarize, it seems to me any act right now other than what is proposed would be to go back to the President and with the overwhelming vote in the Senate and the compromise in the House, I am in support of what we are doing. The only thing to do is to vote "yes" on this bill and take a hard look at it in our further deliberations next year.

Mr. STAGGERS. Mr. Chairman, I yield 3 minutes to the gentleman from Louisiana (Mr. WAGGONNER).

Mr. WAGGONNER. Mr. Chairman and members of the committee, several weeks ago when we considered this proposal which the President later vetoed, the controversy which surrounded that bill had to do with the actions of the people in public broadcasting. A number of us, myself included, felt that some of the salaries being paid were excessive. We offered an amendment which had the effect of controlling the salary, of course, of only one individual. We made an effort to limit the salaries of some of the people whose participation in the program production which is done for PBS under this. That particular amendment failed.

Another amendment was offered which had to do with prohibiting the participants in public broadcasting from doing and publishing political polls. I think by now that some of these people have begun to get the word that the Congress is not going to sit idly by or stand idly by and let public broadcasters be fully competitive with the private broadcasters, the networks. This is what I intended then, and this is what I intend now.

The chairman of the committee (Mr. STAGGERS) tells me that he has made it perfectly clear to these people that their days of political polling are over; that they had better put their house in order. This would be my recommendation with the understanding that we have—the original bill having been vetoed, that we pass this authorization for 1 year, that we get on with it. We have got next year, a new Congress, the 93d Congress, to write a new bill.

It could be a multiyear program, and if their performance is not such and the direction they take in the interim is wrong, then we are going to have to finish the job we started on the bill which was vetoed. I think we ought to pass this bill today.

Mr. GERALD R. FORD. Mr. Chairman, will the gentleman yield?

Mr. WAGGONNER. I yield to the distinguished minority leader.

Mr. GERALD R. FORD. Mr. Chairman, I appreciate the gentleman yielding.

Mr. Chairman, I intend to support the bill as it came from the committee. I think this is a good solution to a controversial and complicated matter. It is a 1-year extension. On the assurances that the gentleman from Louisiana has had, it seems to me that in the interval of 1 year we can adequately monitor the performance of the organization and its personnel. If they disappoint us, then the House as well as the other body will have an opportunity to work their will in the next Congress.

It seems to me this is a good compromise. I hope we do not change the bill. I hope that it is acceptable to the White House, and I understand it is. I think under the circumstances the best course of action is to pass this bill in its present form.

Mr. WAGGONNER. I agree with the gentleman from Michigan, the distinguished minority leader, and I urge that we pass the bill.

Mr. CABELL. Mr. Chairman, will the gentleman yield?

Mr. WAGGONNER. I yield to the gentleman from Texas.

Mr. CABELL. Mr. Chairman, I am very happy to associate myself with the remarks of the gentleman with reference to this bill. I subscribe to his thinking completely. I have never opposed the principle of public broadcasting. I think there is a place for it in the educational system, but I have been very critical of some of the programing that has been done. I have been critical of some of the boards of directors of the individual stations for abrogating their authority to the Washington setup, or wherever the headquarters might be, and for their negligence in not screening some of the activities of the respective stations.

I certainly hope that the fine remarks of the gentleman in the well will be heeded as well as the feeling of the House as I get it, and that in the coming year some of those difficulties can be eliminated.

Again I commend the gentleman in the well for his remarks.

Mr. WAGGONNER. I thank the gentleman from Texas.

The CHAIRMAN. The time of the gentleman from Louisiana has expired.

Mr. FREY. Mr. Chairman, I yield the gentleman from Louisiana 1 additional minute.

Mr. Chairman, will the gentleman yield?

Mr. WAGGONNER. I yield to the gentleman from Florida.

Mr. FREY. Mr. Chairman, I think the gentleman's statements about public broadcasting getting the message is extremely good. From the time of the last debate to the present the General Accounting Office has started an audit, as was discussed the last time. This is a significant step. It goes along with the remarks of the gentleman that we must be sure to get our money's worth. I think from the discussions in the committee as well as the debate today we can be assured this will be looked into in the future.

Mr. STAGGERS. Mr. Chairman, I yield to the gentleman from California, a member of the committee, such time as he may consume.

Mr. VAN DEERLIN. I thank the gentleman.

Mr. Chairman, I think some of the things that have been said illustrate the necessity of getting public broadcasting out from under the thumbs of politicians. This must become a truly independent arm of broadcasting to which the Government contributes, or it is nothing.

We have heard talk about "the message getting through" to public broadcasting licensees, and how we in Congress will be "keeping an eye" on the way those broadcasters behave between now and the time of our next authorizing legislation.

I find such talk both sinister and chilling. I do hope the administration, as it has been promising for 3 years, will come up with plans for the kind of ongoing funding that will assure the independence necessary for a truly useful educational and public broadcasting arm.

Mr. Chairman, I do not know who wrote the President's veto message, and I am inclined to wonder if Mr. Nixon even read it. I cannot believe he read both his veto message and the bill it purports to criticize.

Because in all the rhetoric over public broadcasting, Mr. Chairman, the administration has fuzzed over the issue of "localism." Thus far, they seem to be getting away with it.

Listening to young Dr. Whitehead and his allies, one would think that Congress and the Corporation for Public Broadcasting are bent on building an all-powerful "network" at the expense, financial and programatic, of local stations.

The facts are otherwise. In view of the misleading statements, I think the record should be very precise on this point.

H.R. 13918, the bill vetoed by the President, was actually far more generous to public broadcasting stations than either the administration's first proposals, or S. 3824, the stripped-down version we are passing this afternoon.

The legislation which Mr. Nixon vetoed would have authorized a total of $65 million the first year and $90 million the second. Of critical importance was the stipulation that at least 30 percent of the funds which went to CPB had to be passed along to public radio and TV stations for their own local purposes. This would have meant a minimum of $19.5 million the first year, $27 million in the following year, for use as local managers saw fit. And CPB gave assurances, in writing, that actual total outlays to stations would be higher than the minimums required by the proposed law.

By comparison, the administration seems tight-fisted, indeed, when we consider who is doing what for—or to—the local public broadcasting outlets. In its budget for the current fiscal year, the administration sought $45 million for CPB, of which $15 million would have been earmarked for local stations. At best, then, the administration would have provided at least $4.5 million less in operating funds for the local stations on which it lavishes such extravagant expressions of concern.

In the bricks-and-mortar department, the performance of this administration is just as sorry. Although $15 million had been initially authorized for the construction of public broadcast facilities, the administration this year asked only $13 million. Congress again tried to come to the rescue of financially strapped stations, by providing $25 million in H.R. 13918 for facilities. The bill before us today also would authorize $25 million for this purpose—further evidence of the concern of Congress.

H.R. 13918 originally proposed 5 years of funding for the stations and CPB. It was put forward because the administration had promised long range financing for public broadcasting year after year after year. But none came. So H.R. 13918 was offered and considered in open hearings by the Communications and Power Subcommittee. Then—and only then—did the administration come forward with a finance plan for public broadcasting and it consisted of a 1-year authorization for CPB at $45 million, with a rigid grant formula to stations which would have provided less funding to the stations than H.R. 13918 but would have been much more difficult to administer. The administration bill made no provision at all for vitally needed local broadcast facilities.

Would the administration come forward with even that bill had hearings not been scheduled for H.R. 13918? Probably not. If the administration had had its way, the program would have been allowed to go ahead in fiscal 1973 without a penny of increase. But the House subcommittee set the pace—and thus made possible a significant increase in CPB funds.

S. 3824 contains no new provisos for public broadcasting. It continues the enterprise basically as before. H.R. 13918 would have made some changes. As it came from the subcommittee, the bill would have given more control of public broadcasting to the local licensees. As I mentioned earlier, at least 30 percent of the funds would have been required to go to them, and five station managers would be on the CPB board. The law has always permitted these matters. But, as a result of the House subcommittee hearings and debate, and even before any bill had passed, the board of directors of the Corporation accepted the principle of more influence by the stations, and has already begun to consult with station managers on budgets and planning.

S. 3824 does include $25 million for station facilities grants. In the hearings called by the subcommittee to consider H.R. 13918, the stations made a persuasive case, and our subcommittee increased that $15 million to the $25 million in H.R. 13918. So S. 3824 fully follows the subcommittee recommendation in that regard, and even the administration is restrained in its opposition to this addition for local public broadcast station support.

I can only conclude, Mr. Chairman, that had the subcommittee not initiated action in its own bill, the situation for public broadcasting would have been far worse. S. 3824 represents some progress—not as much as many of us would like—but at least some progress.

The real question now lies ahead. The administration has promised to develop a long-range finance plan for presentation to the Congress. Inasmuch as they presented only a 1-year bill, Congress must assume that the administration's long-range plan is going to be presented for action by the next Congress in time to take effect for funding the stations and CPB in fiscal 1974—less than a year away. The next Congress certainly will want to consider these plans at length, as soon after the first of next year as possible. This would imply that such plans are even now under development. Will the administration share them with the subcommittee?

Funds for CPB for 1974 must also be in somebody's budget in the administration. What is planned? Should not the House subcommittee have some understanding of this at this time?

One thing is certain. There is nothing so far in the RECORD to indicate this administration is doing anything at all to enable public broadcasting to improve its stepchild status. Our per capita expenditures are $13.96 for commercial TV but still only 74 cents for public TV. Putting it another way, we spend 19 times as much for the commercial stuff. For the sake of comparison, the per capita outlay for noncommercial TV is $3.29 in Britain and $2.90 in Japan—despite the generally higher costs prevailing in the United States.

The Federal contribution to CPB for its first 4 years has totaled $78 million—well under the $100 million which the Carnegie Commission on Public Broadcasting had estimated was needed annually if CPB were to be fully viable.

All across the Nation the community and State public groups and agencies which are the licensees for the more than 700 public radio and TV stations have watched the Washington battle over Federal assistance for them. They learned the names of the agencies and Congressmen and where they stood on support for public broadcasting. Their voices were heard. Then when the President vetoed the Congress bill to help these local licensees and their national support agencies—and CPB—they and their local newspapers wanted to know why—and why their President had so little faith in them. They still do not know. And they must now go through the coming year far less well equipped to do the job than need be. But now they have learned who their friends are—and are not—and they will be looking forward to next year. So will the Congress.

Mr. STAGGERS. Mr. Chairman, I yield myself 1 minute.

Mr. Chairman, I would like to explain in connection with what the gentleman from Florida said, that on June 5 I wrote to the Comptroller General to ask him to audit the financial transactions of the Corporation for Public Broadcasting for fiscal year 1972. It has been started. We will have the results before the Congress before the next bill comes up. The letter to the Comptroller General reads as follows:

JUNE 5, 1972.

Hon. ELMER B. STAATS,
Comptroller General of the United States, General Accounting Office, Washington, D.C.

DEAR MR. STAATS: On Thursday of last week (June 1) the House of Representatives considered and passed H.R. 13918, a bill which, among other things, authorizes the appropriation of funds for fiscal years 1973 and 1974 for the Corporation for Public Broadcasting.

The Corporation is a private, non-profit corporation established pursuant to the Public Broadcasting Act of 1967 (Public Law 90–129). During its existence the Corporation has been principally funded with monies appropriated by the Federal Government. Section 396(1) of the Act (47 U.S.C. 396(1) provides that the accounts of the Corporation must be audited annually by independent accountants having certain prescribed qualifications. That section also authorizes an audit of the financial transactions of the Corporation by the General Accounting Office for any fiscal year during which Federal funds are available to finance any portion of the Corporation's activities.

During House consideration of H.R. 13918, I was informed that no audit of the Corporation has even been conducted by the General Accounting Office. In view of the substantial amounts of Federal funds being appropriated to the Corporation, I believe that an audit of the Corporation's financial transactions by the General Accounting Office is desirable. Accordingly, I request that the General Accounting Office conduct an audit of the financial transactions of the Corporation for Public Broadcasting for fiscal year 1972.

Sincerely yours,
HARLEY O. STAGGERS,
Member of Congress,
Chairman.

Mr. Chairman, I have no further requests for time.

Mr. FREY. Mr. Chairman, when the public broadcasting bill was here before the House a few weeks ago there was considerable disagreement about the wisdom of providing more than 1 year of authorization under all of the circumstances surrounding the operation of the corporation and its offshoots. Amendments offered in various ways to so limit the authorizations were defeated by very narrow margins. Many of the misgivings and dissatisfactions voiced here had also been noted by the administration and its suggestion was a 1-year authorization allowing an increase of $10 million over the 1972 levels. All things considered, this seemed not only adequate but generous.

Based upon the actions taken here during consideration of the original bill it is obvious that considerably less than two-thirds of the Members felt that 2-year funding was justified. It is therefore not surprising that the President saw fit to veto that measure and ask again that Congress come forth with a 1-year bill. The other body promptly took up and passed a very simple measure to extend the Public Broadcasting Corporation authorization for 1 year only and in the amounts suggested. Meanwhile the Appropriations Committees indicated that these same figures would be honored.

In going along with the action by the other body we do eliminate some changes in the operation of the corporation which the committee felt were desirable. The most important one had to do with the funneling of money through to the local stations for their use. The bill required that 30 percent of appropriated funds be passed through to the stations. Meanwhile the board of directors of the corporation has decided as a matter of policy to do so and has definitely announced its intention to follow through. For the time being at least there seems to be no great need for a legislative mandate on this subject. By next year a look at the experience of the stations with the new corporation policy may lead the committee to recommend a different requirement. With a 1-year authorization you will be certain to have a crack at it here also.

There are differences between the bill now before you and that passed by the Senate but they are technical and our bill reflects exactly what the other body intended to do. We are assured that they will be accepted and the bill can become law very soon, thereby providing authorizations for actions already decided upon by the Appropriations Committees.

I recommend that the House suspend the rules and pass this bill.

Mr. FRASER. Mr. Chairman, as Congress moves to consider appropriations for public broadcasting I think it is worth a look at the origin of our broadcasting system.

Public broadcasting began in the 1920's with high aspirations. The then Secretary of Commerce Herbert Hoover told Congress in 1924:

> Great as the development of radio distribution has been, we are probably only on the threshold of the development of one of the most important of human discoveries bearing on education, amusement, culture and business communication.

The need for broadcasters to serve the public was repeatedly emphasized. The Federal Radio Commission, established in 1929, made clear that the public interest required diversity of programs. It stated:

> The tastes, needs and desires of all substantial groups among the listening public should be met in some fair proportion, by a well-rounded program, in which entertainment, consisting of music of both classical and lighter grades, religion, education and instruction, important public events, discussions of public questions, weather, market reports, and news, and matters of interest to all members of the family find a place.

The promise of those days has not been fulfilled. While commercial television has made some excellent contributions, television today is far from what it could be. Increasingly, the networks have been victimized by the "numbers game" where the ratings become more important than the quality of the programing.

The extent of this victimization of the networks and the public is shown by the excessive amount of violence on the air. This phenomenon was criticized by the President's Commission on the Causes and Prevention of Violence. It was also the subject of a study by the Surgeon General's Advisory Committee on Television and Social Behavior. That committee, after sponsoring numerous research studies on the subject, presented its findings to the public in a six-volume report.

The Surgeon General stated to Congress:

> While the committee report is carefully phrased and qualified in language acceptable to social scientists, it is clear to me that the casual relationship between televised violence and antisocial behavior is sufficient to warrant appropriate and immediate remedial action. . . . (T)here comes a time when the data are sufficient to justify action. That time has come.

Another area of commercial broadcasting where a sense of responsibility has eroded is advertising. I am thinking in particular of the constant barrage of food advertisements which nutritionists say are contributing to the bad eating habits of our children. Over 60 percent of the advertising on children's television is food advertising and as a result the typical child is exposed to 8,000 food commercials a year. This is not advertising of solid nutritional food such as meat, potatoes, and vegetables. Rather the advertising is primarily of candy, sugary drinks, and other sweet foods of limited nutritional value.

Studies have shown the impact of such advertising on children and the persuasive power of children on family shopping habits. Nutritionists have called to the attention of Congress and the public the imbalance in the kinds of foods that are advertised on children's shows, saying that it "makes it impossible for a child not to go wrong." Yet this practice continues.

By the time the average child reaches 18, he will have spent more time watching television than attending school. If this amount of television is being watched by our children, let us at least see to it that some of the programs are worthwhile.

The Corporation for Public Broadcasting deserves a reasonable level of funding. On a very limited budget, it has produced such excellent shows for children as "Sesame Street" and "Misterogers Neighborhood." It can do much more.

Decent programing for our children is just one reason to support the Public Broadcasting Corporation. There are many others, including the need for more informational and cultural programs. But I think the need for better television for our children is compelling.

Unfortunately, President Nixon vetoed the bill Congress passed on June 22, providing a 2-year authorization of $165 million for the Public Broadcasting Corporation. I supported that bill. I believe the present bill before us, S. 3824, is by no means adequate. But in light of the President's veto, we must move to provide at least minimal financing for the Corporation. Congress must pass this bill with the commitment to give the Public Broadcasting Corporation in the future the funding it needs to help provide this country the kind of television it deserves.

Mr. FREY. Mr. Chairman, I have no further requests for time.

The CHAIRMAN pro tempore. Pursuant to the rule, the Clerk will now read the committee amendment in the nature of a substitute printed in the bill as an original bill for the purpose of amendment.

The Clerk read as follows:

> *Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled*, That (a) section 396(k)(1) of the Communications Act of 1934 is amended to read as follows:
>
> "(k)(1) There is authorized to be appropriated for expenses of the Corporation for the fiscal year ending June 30, 1973, the sum of $40,000,000."
>
> (b) Section 396(k)(2) of such Act is amended by striking out "1972" and inserting in lieu thereof "1973".
>
> SEC. 2. Section 391 of the Communications Act of 1934 is amended to read as follows:
>
> "AUTHORIZATION OF APPROPRIATIONS
>
> "SEC. 391. There are authorized to be appropriated for the fiscal year ending June 30, 1973, such sums, not to exceed $25,000,000, as may be necessary to carry out the purposes of section 390. Sums appropriated under this section shall remain available for payment of grants for projects for which applications, approved under section 392, have been submitted under such section prior to July 1, 1974."

Mr. STAGGERS (during the reading). Mr. Chairman, I ask unanimous consent that the committee amendment in the nature of a substitute be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from West Virginia?

There was no objection.

The CHAIRMAN pro tempore. Are there any amendments to be proposed to the committee amendment in the nature of a substitute? If not, the question is on the committee amendment in the nature of a substitute.

The committee amendment in the nature of a substitute was agreed to.

The CHAIRMAN pro tempore. Under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. BINGHAM, Chairman pro tempore of the Committee of the Whole House on the State of the Union, reported that that Committee having had under consideration the bill (S. 3824) to authorize appropriations for the fiscal year 1973 for the Corporation for Public Broadcasting and for making grants for construction of noncommercial educational television or radio broadcasting facilities, pursuant to House Resolution 1086, he reported the bill back to the House with an amendment adopted by the Committee of the Whole.

The SPEAKER. Under the rule, the previous question is ordered.

The question is on the amendment.

The amendment was agreed to.

The SPEAKER. The question is on the third reading of the bill.

The bill was ordered to be read a third time, and was read the third time.

The SPEAKER. The question is on the passage of the bill.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. PETTIS. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members, and the Clerk will call the roll.

The question was taken; and there were—yeas 377, nays 8, not voting 47, as follows:

[Roll No. 327]

Mr. Hull with Mr. Pelly.

Mr. Danielson with Mr. Schmitz.

Mr. Dingell with Mr. Dow.

Mr. Anderson of Tennessee with Mr. Satterfield.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. STAGGERS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to extend their remarks on the two bills just passed, H.R. 15375 and S. 3824.

The SPEAKER. Is there objection to the request of the gentleman from West Virginia?

There was no objection.

COMMUNICATION FROM THE CLERK OF THE HOUSE

The SPEAKER laid before the House the following communication from the Clerk of the House of Representatives:

U.S. HOUSE OF REPRESENTATIVES,
Washington, D.C., August 15, 1972.

The Honorable the SPEAKER,
House of Representatives.

DEAR SIR: On this date, I have been served, as Clerk of the U.S. House of Representatives, with a subpoena duces tecum that was issued by the United States District Court for the Western District of Pennsylvania. This subpoena appears to be in connection with the case of the United States of America v. Grand Jury Investigation.

This subpoena commands the Clerk of the House to appear in said United States District Court for the Western District of Pennsylvania at 10 A.M. on August 22, 1972, and requests certain House records that are outlined in the subpoena itself, which is attached hereto.

The rules and practices of the House of Representatives indicate that no official of the House may, either voluntarily or in obedience to a subpoena duces tecum, produce such papers without the consent of the House first being obtained. It is further indicated that he may not supply copies of certain of the documents and papers requested without such consent.

The subpoena in question is herewith attached, and the matter is presented for such action as the House in its wisdom may see fit to take.

With kind regards, I am
Sincerely,

W. PAT JENNINGS,
Clerk, U.S. House of Representatives.

The SPEAKER. The Clerk will read the subpena.

[In the U.S. District Court for the Western District of Pennsylvania]

SUBPENA TO PRODUCE DOCUMENT OR OBJECT

(United States of America v. Grand Jury Investigation)

To W. Pat Jennings, Clerk of the House, Longworth House Office Building, Washington, D.C.

You are hereby commanded to appear in the United States District Court for the Western District of Pennsylvania at 708 U.S. Post Office & Cthse. at 7th Ave. and Grant Street in the city of Pittsburgh on the 22nd day of August 1972 at 10:00 o'clock A.M. to testify in the case of United States Grand Jury Investigation.

This subpoena is issued upon application of the United States of America.

August 9, 1972. Blair A. Griffith, First Assistant U.S. Attorney.

BERNARD SHAFFT, *Clerk.*

Mr. BOGGS. Mr. Speaker, I offer a privileged resolution (H. Res. 1091) and ask for its immediate consideration.

The Clerk read the resolution as follows:

H. RES. 1091

Whereas in the Grand Jury Investigation pending in the United States District Court for the Western District of Pennsylvania, a subpena duces tecum was issued by the said court and addressed to W. Pat Jennings, Clerk of the House of Representatives, directing him to appear as a witness before the grand jury of the said court at 10 o'clock antemeridian on the 22nd day of August, 1972, and to bring with him certain papers and documents in the possession and under the control of the House of Representatives: Therefore be it

Resolved, That by the privileges of this House no evidence of a documentary character under the control and in the possession of the House of Representatives can, by the mandate of process of the ordinary courts of justice, be taken from such control or possession but by its permission; be it further

Resolved, That when it appears by the order of the court or of the judge thereof, or of any legal officer charged with the administration of the orders of such court or judge, that documentary evidence in the possession and under the control of the House is needful for use in any court of justice or before any judge or such legal officer, for the promotion of justice, this House will take such action thereon as will promote the ends of justice consistently with the privileges and rights of this House; be it further

Resolved, That W. Pat Jennings, Clerk of the House, or any officer or employee in his office whom he may designate, be authorized to appear at the place and before the grand jury in the subpena duces tecum beforehand, but shall not take with him any papers or documents on file in his office or under his control or in possession of the House of Representatives; be it further

Resolved, That when the said court determines upon the materiality and the relevancy of the papers and documents called for in the subpena duces tecum, then the said court, through any of its officers or agents, be authorized to attend with all proper parties to the proceeding and then always at any place under the orders and control of this House, and take copies of those requested papers and documents which are in possession or control of the said Clerk; and the Clerk is authorized to supply certified copies of such documents or papers in his possession or control that the court has found to be material and relevant and which the court or other proper officer thereof shall desire, so as, however, the possession of said documents and papers by the said Clerk shall not be disturbed, or the same shall not be removed from their place of file or custody under the said Clerk; and be it further

Resolved, That as a respectful answer to the subpena duces tecum a copy of these resolutions be submitted to the said court.

The resolution was agreed to.

A motion to reconsider was laid on the table.

PRIVILEGE OF THE HOUSE—GRAND JURY INVESTIGATION, U.S. DISTRICT COURT, WESTERN DISTRICT OF PENNSYLVANIA

Mr. PRICE of Illinois. Mr. Speaker, I rise to a question of the privileges of the House.

The SPEAKER. The gentleman will state the question of privilege of the House.

Mr. PRICE of Illinois. Mr. Speaker, in my capacity as chairman of the Committee on Standards of Official Conduct, I have been subpenaed to appear before the grand jury of the U.S. District Court for the Western District of Pennsylvania, on August 22, 1972, and to bring with me certain records of the Committee on Standards of Official Conduct. Under the rules and precedents of the House, I am unable to comply with the subpena duces tecum without the permission of the House being involved.

I therefore submit the matter for the consideration of the House.

The SPEAKER. The Clerk will read the subpena.

The Clerk read as follows:

[U.S. District Court for the Western District of Pennsylvania]

SUBPENA TO PRODUCE DOCUMENT OR OBJECT

(United States of America, Grand Jury Investigation)

To Melvin Price, Chairman, Committee on Standards of Official Conduct (House Ethics Committee), House of Representatives, Washington, D.C.

You are hereby commanded to appear in the United States District Court for the Western District of Pennsylvania, at 708 U.S. Post Office and Courthouse, 7th Avenue and Grant Streets, in the city of Pittsburgh, on the 22d day of August 1972, at 10 o'clock A.M., to testify in the case of United States Grand Jury Investigation and bring with you all affidavits submitted by current or past employees of Congressman J. Irving Whalley, referring to the existence or absence of salary kickbacks.

This subpena is issued upon application of the United States of America.

Mr. BOGGS. Mr. Speaker, I offer a privileged resolution (H. Res. 1092) and ask for its immediate consideration.

The Clerk read the resolution as follows:

H. RES. 1092

Whereas in the Grand Jury Investigation pending in the United States District Court for the Western District of Pennsylvania, a subpena duces tecum was issued by the said court and addressed to Honorable Melvin Price, Chairman of the Committee on Standards of Official Conduct of the U.S. House of Representatives, directing him to appear as a witness before the grand jury of the said court at 10 o'clock antemeridian on the 22nd day of August, 1972, and to bring with him certain documents in the possession and under the control of the House of Representatives: Therefore be it

Resolved, That by the privileges of this House no evidence of a documentary character under the control and in the possession of the House of Representatives can, by the mandate of process of the ordinary courts of justice, be taken from such control or possession but by its permission; be it further

Resolved, That when it appears by the order of the court or of the judge thereof, or of any legal officer charged with the administration of the orders of such court or judge, that documentary evidence in the possession and under the control of the House is needful for use in any court of justice or before any judge or such legal officer, for the promotion of justice, this House will take such action thereon as will promote the ends of justice consistently with the privileges and rights of this House; be it further

Resolved, That Honorable Melvin Price, Chairman of the Committee on Standards of Official Conduct, or any employee of that committee whom he may designate, be authorized to appear at the place and before the grand jury in the subpena duces tecum beforementioned, but shall not take with him any papers or documents on file in that committee or under his control or in possession of the House of Representatives; be it further

Resolved, That when the said court determines upon the materiality and relevancy of the papers and documents called for in the subpena duces tecum, then the said court, through any of its officers or agents, be authorized to attend with all proper parties to the proceeding and then always at any place under the orders and control of this House, and take copies of those requested papers and documents which are in possession or control of the said committee; and the Clerk of the House is authorized to supply certified copies of such documents or papers in the possession or control of the said committee that the court has found to be material and relevant and which the court or other proper officer thereof shall desire, so as, however, the possession of said documents and papers by the said committee shall not be disturbed or the same shall not be removed from their place of file or custody under the said committee; and be it further

Resolved, That as a respectful answer to the subpena duces tecum a copy of these resolutions be submitted to the said court.

The resolution was agreed to.

A motion to reconsider was laid on the table.

LEGISLATIVE PROGRAM

(Mr. BOGGS asked and was given permission to address the House for 1 minute.)

Mr. BOGGS. Mr. Speaker, I take this time to announce a change in the program for tomorrow.

The consumer product safety bill which was originally scheduled will not be considered and in place thereof we will consider the bill, H.R. 14847, to amend the Airport and Air Development Act of 1970, more commonly known as the head tax bill.

In addition to that, we hope to obtain unanimous consent to vote on the SALT interim agreement on Thursday.

Mr. Speaker, I ask unanimous consent that the vote on final passage of House Joint Resolution 1227, the SALT interim agreement be taken on Thursday instead of tomorrow.

The SPEAKER. Is there objection to the request of the gentleman from Louisiana?

Mr. HALL. Mr. Speaker, reserving the right to object, I have been contacted concerning the desirability of this unanimous-consent request in view of the fact that there is considerable colloquy in the RECORD involving the leadership as to not deferring the business of the House for primary elections and other valid excuses, but still trying to accommodate the Members where possible; in view of the fact that the sole reason for deferring such an important vote as the House's part in concurring in the SALT interim agreement; and in view of the fact that the gentleman from Missouri has also been invited to his State fair by his Governor and other officials and rejected it because in my view it is our elected and bounden duty to be on the floor of the Congress when we are officially in session, I am constrained to object, and I do object.

The SPEAKER. Objection is heard.

Mr. BOGGS. Proceeding under my 1-minute unanimous consent grant, I would like to announce that the program tomorrow otherwise will be as scheduled:

H.R. 16071, Public Works and Economic Development Act, will be considered first under an open rule with 2 hours of debate, and because of the objection of the gentleman from Missouri, the

SALT Agreement—House Joint Resolution 1227—will be considered and voted on tomorrow.

Finally, H.R. 14847, the airport head tax bill will be the last order of business.

RE ACTIVITIES OF JANE FONDA IN NORTH VIETNAM

(Mr. ICHORD asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. ICHORD. Mr. Speaker, late last week the Committee on Internal Security discussed, at some length, the question of whether or not to issue a subpena to the actress, Jane Fonda, with respect to broadcast statements she made over the Communist Radio Hanoi to our troops in Vietnam.

It was agreed by the committee that it would be best, at this time, to give the Justice Department time to complete its announced inquiry into the Fonda affair before considering any further course by the committee.

At the request of my colleagues on the committee, I addressed a letter which was hand-delivered Friday afternoon to Attorney General Kliendienst setting forth the committee's concern with this matter and our desire to have a report from the Justice Department by September 14 or an explanation from a representative of the Department on that date regarding what can and should be done with respect to Miss Fonda's activities in the capital of our enemy.

For the benefit of my colleagues in the House, Mr. Speaker, I include the contents of my letter to the Attorney General in the RECORD at this point:

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES, COMMITTEE ON INTERNAL SECURITY,
Washington, D.C., August 10, 1972.

Hon. RICHARD G. KLEINDIENST,
Attorney General of the United States, Department of Justice, Washington, D.C.

DEAR MR. ATTORNEY GENERAL: The Committee on Internal Security met this morning in executive session to consider a request that a subpoena be issued to require Jane Fonda to appear before the Committee in regard to her travel to North Vietnam and radio broadcasts to U.S. military forces during July 1972. During the meeting a number of reasons were expressed as a basis for opposition to the issuance of a subpoena. Important factors in the ultimate determination of the Committee were that the facts seemed to be already rather well-known, that the matter was under study by the Department of Justice and Fonda would be entitled to the full protection of the Fifth Amendment, that any such hearing might work to the prejudice of the Government in the event prosecution is undertaken and that the Committee's overriding interest is not in what additional information might be secured from Fonda, but rather in any insufficiency in the terms of the law or in its enforcement.

I am sure that you recognize the pernicious nature of Miss Fonda's statements to our servicemen, and the seriousness with which nearly all Members of Congress view her conduct. Although it might be fairly said that public support for American involvement in the Vietnam conflict is steadily declining, such aid and comfort to a nation with which we are engaged in hostilities is nevertheless condemned by the public. But whatever political or public reaction might obtain under the circumstances, I am sure you agree that the Department of Justice has a most solemn obligation to engage the full weight of the law against conduct which the Congress has made criminally punishable.

The Committee has reviewed the treason, sedition and other relevant statutes. It has also been informed of Fonda's travel itinerary, and has studied the transcripts of her broadcasts while recently in Hanoi. It is not difficult to perceive why a cry of treason has been raised. But if the burden of proof is too great for treason, would not a prima facie case exist under Section 2387 of Title 18, United States Code or even Section 2388, notwithstanding the jurisdictional limitation?

In discharging its responsibility to the Congress to insure that statutes within its oversight jurisdiction are being duly enforced by the Executive Branch, the Committee resolved that the staff investigation of Fonda's activities will continue, and in the event the Justice Department determines that the broadcasts of Jane Fonda from Hanoi during July 1972 do not constitute treason or sedition, or that her conduct cannot be reached by existing statute for any other reason, then the Department is requested to furnish a report to the Committee with recommendations for legislation which would be effective to impose criminal sanctions under similar circumstances in the future. Desiring to resolve the questions at an early date, but hoping to avoid an unreasonable burden upon the Department, the Committee voted to request that the report be submitted by September 14, or in the alternative, that a representative of the Department appear before the Committee on that date.

Your cooperation and assistance in providing an analysis of the federal criminal law vis-a-vis the recent conduct of Jane Fonda will indeed be appreciated. Would you please advise me as soon as possible whether the Department will furnish a report on or before the above date or will provide for the appearance of a representative so that arrangements can be made for a meeting of the Committee.

Sincerely,

RICHARD H. ICHORD,
Chairman.

LEGISLATION TO ASSURE THAT NO VETERAN LOSES ANY OF HIS PENSION DUE TO RECENT SOCIAL SECURITY INCREASE

(Mr. HILLIS asked and was given permission to address the House for 1 minute, and to revise and extend his remarks.)

Mr. HILLIS. Mr. Speaker, today I am happy to reintroduce, along with 58 cosponsors, legislation to assure that no veteran loses any of his pension due to the recent social security increase.

Most of us were happy to see social security benefits rise by 20 percent recently, because we all have thousands of senior citizens in our districts who badly need this assistance.

But provisions in current law will prevent retired veterans in our districts from benefiting much from that social security increase, since veterans pensions are based on income limits which include social security. When social security benefits are increased, veterans' pensions automatically drop.

This means that our Nation's veterans will benefit only partially from the recent 20-percent increase in social security—their income will rise slightly, while the income of other senior citizens will rise 20 percent.

More than 20,000 veterans at the upper-income limit will lose all their veterans pension unless remedial action is taken.

This means that a veteran and his wife, whose income is pushed above the $3,800 income limit by the recent social security increase, could lose all of their $33 monthly pension, bringing their income below $3,800. Most couples in this situation would be better off had no social security increase been passed. No wonder many of these veterans feel badly cheated.

In addition, there are 1.3 million veterans and widows who will see their pension reduced by an average of $8.71 monthly unless remedial action is taken. 211,827 single veterans will lose an average of $12.14 per month, while 466,948 veterans with dependents will lose an average of $9.46 per month. Some 525,000 veteran's widows will lose approximately $6.35 monthly.

A $12 or even $6 monthly loss of pension may not sound too critical, but when an elderly couple is living on a shoestring budget, as many of our veterans are, this small amount can make a big difference.

I personally do not believe social security should be counted in computing veterans pensions. They are both retirement incomes which the recipient has earned for two different reasons—it is like qualifying for two pension plans from two separate companies.

I plan to continue working in the Veterans' Affairs Committee toward changing this policy. However, for the immediate future, we need some kind of remedial legislation to assure that no veteran loses part of his pension when the social security increase takes effect September 1.

The bill I have sponsored, along with my 58 colleagues, will raise by $600 the limit on income which a veteran can earn without losing his pension. It will also increase the benefit formula for computing veterans' pensions. The pension base for a veteran with no dependents will be increased from $130 to $148 monthly; for a veteran with a dependent, from $140 to $158 monthly; for a widow with no child from $87 to $93 monthly; and for a widow with a child from $104 to $110 monthly.

I am certain you will agree that our veterans deserve to benefit at least as much as other senior citizens from the recent social security increase. Today I join 58 other Members from all segments of the political and geographical spectrum in asking all of our colleagues to give their full support to this bill and help expedite its enactment at the earliest possible date.

The full list of cosponsors is as follows:

Mr. Forsythe, Mr. Winn, Mr. Del Clawson, Mr. Eliberg, Mr. McDade, Mr. Thomson of Wisconsin, Mr. Gude, Mr. Sarbanes, Mr. Aspin, Mr. Quie, Mr. Hungate, Mrs. Abzug, Mr. Sisk, Mrs. Chisholm, Mr. Clark, Mr. Cleveland, Mr. Bennett, Mr. Tiernan, Mr. Young of Florida, Mr. Derwinski, Mr. Waldie, Mr. Gallagher, Mr. Fascell, Mr. Melcher, Mr. King, Mr. Myers, Mr. Sebelius, Mrs. Hansen, of Washington, Mr. Hastings, Mr. Veysey, Mr. Brinkley, Mr. Rangel, Mr. Bell, Mr. Hansen of Idaho, Mr. Jones of North Carolina, Mr. Helstoski, Mr. Danielson, Mr. Thone, Mr. Matsunaga, Mr. Taylor, Mr. Collier, Mr. Kemp, Mr. Hanna, Mr. Obey, Mr. Anderson of Tennessee, Mr. Scherle, Mr. Bray, Mr. O'Konski, Mr. Leggett, Mr. Charles H. Wilson, Mr. Addabbo, Mr. Johnson of Pennsylvania, Mr. Mollohan, Mr. Latta, Mr. Halpern, Mr. Cederberg, Mr. Duncan and Mr. Blanton.

UNFOUNDED CHARGES LEVELED AGAINST REPRESENTATIVE WAYNE ASPINALL

(Mr. STEIGER of Arizona asked and was given permission to address the House for 1 minute, and to revise and extend his remarks.)

Mr. STEIGER of Arizona. Mr. Speaker, in this biannual season of political rhetoric I am sincerely hopeful that these few words offered by me will not be obscured by the sheer volume of similar efforts by those who think differently than I, or my totally genuine concern not be mitigated by any cynical attitude presuming personal or political considerations.

I have served on the House Committee on the Interior and Insular Affairs for 6 years. As an inevitable result of this service I am very comfortable in expressing outrage at the totally unfair and ridiculous charges that have been repeatedly leveled at the chairman of the full committee, Wayne Aspinall.

He has been designated capriciously, unconscionably, and in absolute error as a "foe of conservationists," "a tool of public land permittees" and a whole lot more. He has been labled a member of the "Dirty Dozen," those Members of Congress who allegedly would destroy our environment. Recognizing all the inequities in the political process, I can simply not remain silent in the face of this blatent, ludicrous, and vicious lie. As a member of the opposition party to Wayne Aspinall, I have found myself in disagreement with him on occasion. But to overlook Mr. Aspinall's achievements in the fields of conservation—genuine—environmental protection and ecological concern is so damnable it simply must be stopped.

Under his leadership the Congress has passed the Wilderness Act, the wild rivers bill, national trails, and literally hundreds more. To allow the spleen of a few professional activists to be vented unchallenged is to do truth more harm than it deserves.

History will show that Wayne Aspinall was the lynch-pin that turned the Nation's concern for the environment from verbiage to solid, national action.

He is entitled to the respect and gratitude of those who are similarly concerned, not their meaningless, blind attacks.

CORPORATION FOR PUBLIC BROADCASTING

(Mr. TIERNAN asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. TIERNAN. Mr. Speaker, as you know, John Macy resigned last week as president of the Corporation for Public Broadcasting. All of us who have watched CPB grow from infancy into adolescence are grateful to this courageous and thoughtful public servant for his guidance of this most important addition to American broadcasting.

In resigning, Mr. Macy said:

> Contrary to views expressed in some quarters, it is my conviction that we have adhered to the intent of Congress in a faithful but creative fashion and that the groundwork which has been laid will form the foundation from which the evolutionary progress of this industry can be achieved.

In my view, it is John Macy's leadership that has brought about such a good beginning for CPB.

I would take issue with Mr. Macy on only one point. He indicates that "current trends in the development of the industry point toward the desirability of a change in leadership of the Corporation." It is not the leadership which must change, but rather the trends which currently make outstanding leadership—such as that of a John Macy—impossible.

The major step required to achieve this goal is the removal of the present administration and its stultifying veto on the progress of public broadcasting.

TWENTY-EIGHT NEW COSPONSORS FOR BILL TO ESTABLISH COUNCIL ON ENERGY POLICY

(Mr. VAN DEERLIN asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. VAN DEERLIN. Mr. Speaker, on behalf of our colleague (Mr. Keith) and myself, I am pleased today to reintroduce H.R. 15752, for establishing a Council on Energy Policy in the Executive Office of the President.

This afternoon we are joined by 27 Members as cosponsors, making a total of 71 who have signed this legislation since it was first offered last June 28.

The proposal, intended to provide an urgently needed focal point for setting governmental policies in the energy field, enjoys the broadest kind of bipartisan backing—as evidenced by the fact that the signers include 36 Democrats and 35 Republicans.

I understand there is the possibility of early action on a very similar bill in the other body. And it comes none too soon—responsibility for energy matters is now divided among 65 Executive agencies and 12 committees of Congress, while each day's news dispatches give evidence of a mounting energy crisis.

Let us act now to provide a new degree of guidance for conserving and expanding on the most precious of commodities—our energy fuels.

HEALTH CARE: A NATIONAL PRIORITY

(Mr. MURPHY of New York asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. MURPHY of New York. Mr. Speaker, comprehensive health care is the inherent right of every American, for good health is a prerequisite to the full realization of the opportunities for life, liberty, and the pursuit of happiness.

Society, thus, must guarantee each citizen quality health and medical attention. Traditionally, this responsibility has fallen to the individual practitioners and institutional providers, as well as to the organizations which furnish public protection from the high cost of unexpected illness.

The legislation I am introducing today, the Health Security Act of 1972, shifts the weight of the responsibility for assuring each American necessary health care to the Federal Government, and provides the means by which it can be satisfield.

The critical circumstances of the national health crisis dictate the necessity for realizing this shift. The fact is that many Americans are deprived of adequate health care. A glance at comparative statistics reveals a situation which is truly appalling, and it is incongruous that the richest and most technically sophisticated country in the world trails 12 nations in infant mortality rates, six in maternal mortality rates, 17 in life expectancy for males, and 10 in life expectancy for females. While the figures shock, they are a painfully accurate indicator of the unnecessary condition of health care in this Nation.

We are all subject today to a health care system which manifests prohibitively high costs. Skyrocketing hospital costs and soaring doctors' fees produce real anxiety in each of us, when we are faced with the necessities of routine examinations and minor medical needs. But the anxiety is minimal compared to the well-founded fear instilled in Americans in every income bracket that, should a catastrophic illness strike, financial disaster would almost certainly follow. Many self-supporting victims of disabling accidents and chronic illnesses, facing open ended liabilities for $100-a-day hospital rooms, thousands of dollars of laboratory costs, and precious surgeons' fees, meagerly protected by insurance policies with very limited commitments, have had their worst fears realized. And, each American lives in a perpetual state of insecurity, knowing that "There but for the grace of God go I."

While the problems of the delivery of health care, the manpower shortage and the resulting problems of distribution and accessibility, affect us all, they are particularly troublesome for certain groups of Americans and result in the relegation of some to second class citizenship. Those who live in obscure rural outposts, the ghetto poor, the disabled, and the aged are truly in this category.

If each American has the right to adequate health care, how can we justify the fact that in 130 primarily rural counties no medical care of any kind is available? Or that in East Harlem in New York, a barren plain in the midst of plenty, there is only one doctor for every 1,600 prospective patients? How can we permit circumstances to exist in which a crippled widow cannot get protection against catastrophic illness because she is disabled, a bad risk? Or a medicaid recipient is denied treatment because the doctor is afraid the patient cannot pay her share of the cost of his fee?

The answer is: We no longer can.

Nor can we afford to leave the problem of quality control unsolved. Although most institutions and practitioners strive to afford their patients proper care, there are no truly enforceable standards concerning "overdoctorization," unnecessary hospitalization, or irrelevant treatment. And, the consumer is particularly vulnerable to abuses such as these, for in his helpless ignorance he has no way of judging the quality of the care he receives.

Any objective review of the circumstances of the present national health care system makes one point very clear: Neither the providers nor the insurance companies have been able to afford every American comprehensive quality health care at a price he can pay. The crux of the problem, as I see it, is that the present health system has generated neither incentives, nor created the mechanisms for self-control, that would serve to influence either group to check rising medical costs, institute needed changes in the delivery of health care, or control the quality of medical attention.

Practitioners, plagued by an understandable conflict—forced to respond to rising income necessities in an inflating economy, and at the same time striving to maintain their professional commitment—have done little to meet the urgent need for reform. Unaffected by the natural incentives arising from the competition within most industries, due largely to the critical manpower shortage within the medical profession, physicians "arrange" their prices largely among themselves, locate in the more affluent and professionally attractive areas, and fail to provide measures for true quality control.

Institutions, such as hospitals and nursing homes, often suffer from similar problems. Leading administrators have not assumed the responsibility for instigating needed change. Like the medical professionals, they do not compete with their fellow institutions. Thus, they often operate inefficiently and uneconomically, and locate where they wish, rather than where they are most needed.

Insurance carriers are in the best position of all to effect the necessary changes in the system. But, they have not only failed to take advantage of their position, but shine as one of the true sources of the health care crisis. Reaping real benefits from the $75 billion a year health care market, they suffer from the same malady as the other sectors: A lack of true competition. While each carrier does compete with 1,800 other carriers, the result of this competition is that each strives to attract the most select, low-risk clientele, offer the least possible benefits cloaked in the most attractive and unintelligible vagueries, and pay the fewest possible claims. Preoccupied with meeting their high operating costs, salesmen's commissions and advertising expenses, and ladden with complicated administrative considerations, they have failed to represent the consumer's interests in the market. They offer truly inadequate protection against the high costs of medical care, and have failed to use the $15 billion they pay to providers each year to influence the control of costs, or improve the delivery and quality of health care in this country.

It is thus apparent that none of the private sectors, operating within the present health care system, are going to rise to challenge the viability of that system. Yet, it is crucial that this challenge be made. The Federal Government is best qualified to make and meet this challenge. Unaffected by conflicting interests, and ultimately accountable to the people, the Government can truly dedicate itself to assuring every American comprehensive quality health care.

The Health Security Act, which I am introducing today, creates the mechanism and provides the means whereby this can be accomplished. This bill substantially follows the Kennedy bill, and it establishes the blueprint for a federally administered program of national health care which will offer every American, regardless of his ability to pay, comprehensive services, including physician's services, inpatient and outpatient care, and essential supporting services such as podiatry and optometry. Replacing the private insurers, the Government would be responsible for financing essentially the entire health care system. The funds derived from a combination of payroll and general revenue taxes will be used to reimburse practitioners, pay for the services of hospital administrators and related personnel, costs of equipment, supplies, and so forth. The funds will also serve to support a system of controls and incentives designed to effect the changes necessary to alleviate the circumstances of the health care crisis.

Of all the bills offering answers to the national health problem, only the Health Security Act places positive and firm controls on costs. It does this by prospectively budgeting the amount of money available to cover health care of the entire population. Broken down by regions and areas of the country, the budget would be allocated among hospitals and other institutions as well as prepaid groups, such as health maintenance organizations, foundations, and providers who wish to be paid on a capitation or salaried basis. A pool would be left for physicians who choose to practice on a fee-for-service basis.

The budgets would be essentially absolute, thus providing a strong incentive for efficient and economical operation. Practitioners, reimbursed primarily for their services on a per capita basis, would be influenced to continue the trend toward the development of more efficacious and desirable group arrangements. Hospitals and other institutions, strictly budgeted, would be forced to work toward avoiding waste.

A most important aspect of the Health Security Act is that it provides the means for ultimately eliminating the problems of inaccessibility and poor distribution of resources. It would authorize allocations to be used to increase professional manpower and related health personnel, provide for stipends to be paid to practitioners to locate in remote and deprived areas, and provide financial support for institutions manifesting this same goal.

These measures would begin to effect an improved health delivery system which could respond to the new demands for competent national comprehensive health care.

The legislation also offers major assurances in the area of the quality control of health care. It would establish licensing requirements for participating practitioners, and require continuing education for health professionals. It would work toward the control of drug abuse. And, it would remove the financial incentive that has fostered unnecessary, irrelevant, and expensive treatment.

Critics of the Health Security Act attack the bill on the basis that while it strives to secure the consumer's right to comprehensive, quality health care, it unnecessarily restricts the freedom of the providers. This is patently untrue. The bill not only allows for unlimited pluralism in the manner of payment to physicians, patterns of practice, and methods of organization, but furnishes support and financial backing for experimentation and innovation. Far from infringing on the right of practitioners to practice, it releases them from cumbersome administrative and financial matters, freeing them to concentrate on the art of creative healing. In this sense, it creates a truly workable partnership of the public and private sectors.

The realization of a system which provides comprehensive health care for all is far too important a goal to allow it to be thwarted by the whims of the marketplace, the conflicting interests of private industry, or the special interests of a single profession. The Health Security Act strives to remove these obstacles and provide the means by which the ultimate end can be achieved.

THE TRANSPORTATION CRISIS

(Mr. ANNUNZIO asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. ANNUNZIO. Mr. Speaker, last Tuesday's Washington Post contained a timely editorial which pointed up the controversy being wrestled with in Congress. This is whether we need better transportation or just more highways.

The thrust of this significant editorial is that we seriously need to improve our transit systems for moving people in urban areas and not just build more and more express highways to do it. This thesis has my firm support, as I have often announced on the House floor and elsewhere. I agree that the Highway Trust Fund should be opened up to finance other means of moving people and goods. We certainly should not overlook the obvious necessity for providing the means of moving our goods as well as ourselves.

The Senate Public Works Committee proposal places some emphasis on the use of buses. The experiment now in progress to utilize a special bus lane for commuter purposes on the Shirley Highway has been evaluated a success, pointing the way for expanded future use in other areas. If this system is effective in reducing automobile use, it should be continued and planned for in future systems. But adequate planning should lean strongly to balanced systems—rail and subway systems included.

There is a wide variety of legislative proposals before the House and Senate which would help achieve the goal of balanced transportation systems, and reorient Federal transportation assistance policy toward allowing States and local governments greater choice in how such assistance shall be used. The sheer need for this approach is so clearly demonstrated and so widespread that the administration has drawn up and sent to Congress a proposal which would tap Federal Highway Funds for urban transit purposes.

In a more recent development, in the other Chamber, Senators KENNEDY and WEICKER, with numerous cosponsors, have introduced a bill to accomplish such a diversion, which is receiving considerable notice. This bill would make $2.3 billion in 1974 available from the highway trust fund for whatever transportation need the respective States or local governments can demonstrate. If the authorities consider that the greatest need is for urban and/or commuter systems, that is where their allocation could be spent. For the years after 1974, the amount so allocated would increase from $2.3 billion to $2.8 billion each year.

This proposal contains a formula for making the allocation among the States which provides for one-quarter of the amount on the basis of area of the State, one-quarter on the basis of total population, and, of major significance, the remaining half on the basis of populations of metropolitan areas within the State. To protect the States which are smaller in geographic size, the bill further provides that no State shall receive less than one-half of 1 percent of the total to be allocated on the basis of area.

There is no exact counterpart of this bill presently before the House. But the Committee on Banking and Currency of which I am privileged to serve is currently considering the omnibus 1972 housing and urban development bill which contains very important provisions regarding the urban mass transportation program. I have been very instrumental in developing what is title IX of the pending housing bill as approved by the Housing Subcommittee, where I urged the Members to adopt these provisions. We are authorizing, for the first time, Federal operating subsidies for our urban transit systems around the country, both large urban transit systems, such as our Chicago Transit Authority and small town bus operations. If enacted, such a program of operating subsidies would keep the fares of the Chicago Transit Authority from rising any higher than they already are, and would, in all likelihood, reduce the already burdensome fares which our citizens in Chicago must bear. This provision would also provide additional capital grant funds totaling $2.9 billion of new money so that our Chicago Transit Authority could complete its subway connection to O'Hare International Airport. Chicago is probably the only city in the United States that uses highway rights-of-way to build its subway lines. A continuing use of Federal highway trust funds, as well as funds from the urban mass transportation program can continue to make Chicago a leader in providing its citizens with safe, adequate, and responsible urban transportation.

[From the Washington Post, Aug. 8, 1972]

BETTER TRANSPORTATION OR JUST MORE HIGHWAYS?

The long, ferocious battle for control of federal highway policies and the $4-billion-per-year highway trust fund is now focused on the Senate Public Works Committee, where this year's major highway legislation will be considered this week. In contrast to its counterpart in the House, the Senate committee has generally resisted the more outrageous requests of the highway lobby in the past, and has been relatively responsive to the need to weigh the social and environmental costs of roads before construction starts. At a time when metropolitan transportation networks—including both clogged streets and creaky mass transit system—are under severe strain, the committee has the opportunity to exert strong leadership in redirecting federal policy from the old, single-minded emphasis on building highways to a new, more flexible approach to serving total transportation needs.

In response to growing pressure to open up the highway trust fund to finance other means of moving people and goods, a committee draft bill now circulating around town proposes to set aside at least $300 million per year "to encourage the development, improvement, and use" of public bus systems. These funds could be used for constructing bus lanes, fringe parking areas, and other useful facilities, and for the purchase of buses—but not for bus operating subsidies, and not for the purchase or operation of subways, commuter trains, streetcars or of anything else that runs on rails. Separate provisions would authorize an entirely new program of scenic roads, and push the states into a major effort to build bicycle lanes and trails.

In short, this is still very much a highway bill. The draft carefully steers away from any politically uncomfortable challenge to the oft-invoked sanctity of the highway trust fund, and leaves governors and mayors to scramble for bus subsidies and rapid rail transit aid before other congressional committees. Although it authorizes the creation of metropolitan regional transportation agencies, it denies those agencies a broad freedom to mix various modes of transportation. In this respect, the draft is more timid than the administration's proposals for bringing together urban highway and mass transit funds.

On the crucial question of planning procedures, the draft bill is alarming in its ambiguity. One of the greatest victories of the environmental movement has been the attainment of safeguards—requirements for public hearings, environmental impact statements, relocation programs, protection for parkways and historic structures, and the standing of citizens to sue—to keep highway bulldozers from demolishing other public values. The Public Works Committee has generally fostered such safeguards, but the draft bill proposes an entirely new alternative planning procedure which might enable states to wriggle out from under the detailed requirements of federal law. In addition, Senators Bentsen and Tower are pushing an amendment to permit the Texas highway department to proceed with a San Antonio project which has been blocked by federal courts. This move stirs up unhappy memories of the Three Sisters Bridge fights of the past. The committee and the Senate should resist both the moves to undermine the general protections now in force, and efforts to circumvent them by special exceptions.

An interesting bill introduced by Senators Kennedy and Weicker, with over 15 cosponsors, clarifies the choices now before the Senate. Without junking those highway projects already under way, the Kennedy-Weicker bill would permit state, local and regional governments to use future trust fund monies for either highways or mass transit, with the present environmental and relocation safeguards intact. This is a route toward sensible, comprehensive transportation planning which certainly should be explored.

SENATE JUDICIARY HEARINGS

(Mr. THOMPSON of Georgia asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. THOMPSON of Georgia. Mr. Speaker, Senator EDWARD KENNEDY has stated he is going to hold hearings Wednesday morning in the Judiciary Committee on the effect of U.S. bombing on civilians of North Vietnam. Upon learning of this I contacted his office and asked if I may be allowed to testify with regard to information I have concerning the effect on civilians injured by rocket and mortar attacks in South Vietnam by the North Vietnamese.

I have just been informed by Senator KENNEDY's office that under no circumstances will they allow anyone to testify who has not been in North Vietnam in the last 3 months and they will not expand the hearings to the injury of civilians in South Vietnam but only those in North Vietnam.

Mr. Speaker, it appears to me that this is strictly a propaganda effort, and the press and this Congress should be made aware of what the Judiciary Committee's subcommittee is attempting to do.

REPORT ON TRIP TO PEOPLE'S REPUBLIC OF CHINA

The SPEAKER. Under a previous order of the House the gentleman from Louisiana (Mr. BOGGS) is recognized for 1 hour.

Mr. BOGGS. Mr. Speaker, I asked for this order to make a brief report on the trip that the distinguished minority leader (Mr. GERALD R. FORD) and myself have recently completed to the People's Republic of China. I do not intend to take more than a very small amount of the time which has been allocated to both of us.

(Mr. BOGGS asked and was given permission to revise and extend his remarks and include the official report of Mr. GERALD R. FORD and Mr. BOGGS entitled "Impressions of the New China," an official House document.)

Mr. ALBERT. Mr. Speaker, will the gentleman yield?

Mr. BOGGS. I am happy to yield to the distinguished Speaker.

Mr. ALBERT. Mr. Speaker, I have had the privilege of hearing the distinguished majority leader and the distinguished minority leader's report to the President and I have read their report, which they have made to the President and a copy of which they gave to me.

I am very happy to have had a part in making this trip possible. I do not think the House of Representatives has ever been better represented on a foreign mission or in any other kind of mission than the representation which was given by the two distinguished leaders in this House. I think they have rendered a tremendous service to their country, to the House of Representatives and to our entire effort to bring about a more peaceful and a better understanding in the world.

My congratulations to both of the gentlemen.

Mr. BOGGS. I thank the distinguished Speaker.

I must say that without the Speaker, and I am sure the minority leader will agree with me, neither one of us would have had the privilege of making the trip. It was announced shortly after President Nixon's return from China that the distinguished majority leader and minority leader of the Senate would make a trip to the People's Republic of China. Thereupon the Speaker, representing the House of Representatives, the more populous body and the one we like to think of as more representative of the people of our country, insisted that the House should be represented. It was then that the President indicated through the channels of communication which he has to the Chinese Government that he would like to have Mr. GERALD R. FORD and myself visit China, and shortly thereafter we were officially invited by the Chinese.

Mr. Speaker, without your timely intervention, I would not be standing here today making this report.

Also I must say it was a great pleasure and privilege to travel to the People's Republic of China with my Republican colleague, the distinguished minority leader. I think it can be said without contradiction, and this will be evident from our report that we went not as the Republican leader or Democratic leader, although both our hosts and we were well aware of our party responsibilities, but as representatives of this body, the House of Representatives, and of the people of the United States.

Of course, I have always been very close to the minority leader personally, both he and his wife, and it was a great pleasure and privilege, indeed, to travel with him.

I might say we had a very fine group. I think it worthwhile to name those who went. Besides Mr. GERALD R. FORD and Mrs. Ford and Mrs. Boggs and me, we had:

Mr. William A. Brown, Deputy Director of the Office of Asian Communist Affairs, Department of State;

Dr. Freeman H. Cary, who is here with us as assistant attending physician to the Congress, and who was of great help to all of us;

Mr. Bryce N. Harlow, known to all of us as a former counselor to the President;

Robert T. Hartmann, legislative assistant to Mr. GERALD R. FORD;

Mr. Gary G. Hymel, my administrative assistant; and

The Honorable Harry Lee, U.S. magistrate of the eastern district of Louisiana.

Mr. Speaker, I might say Mr. Lee was the first Chinese-American official to return to the Chinese mainland since the revolution in 1949. Both his parents were born in China, and he had the great privilege of returning to the village where his parents were born and where he met with some relatives he did not know were alive.

We also had with us:

Mr. Frank Meyer, administrative assistant to Mr. GERALD R. FORD;

Mr. Paul A. Miltich, press secretary to Mr. FORD;

Mr. Day O. Mount, from the State Department;

Dr. Paul Sigmund, professor of political science, Princeton University; and

Mr. Eugene Theroux, special counsel to the Joint Economic Committee, also of my staff.

This staff group was one of the best ever put together. They made our trip and we are very grateful for their help, particularly in preparing the various reports.

Mr. Speaker, I shall make only a few observations and then I shall yield to the distinguished minority leader. I have already received permission to extend my remarks.

First off, even in a brief visit to China, some things are immediately self-evident. China is a huge country. One really does not realize how large it is until one gets there. It occupies exactly the same geographic position as we occupy on the opposite side of the globe.

Many of you will perhaps remember, as children growing up, your mother or father telling you that if you dug in the sand deeply enough you would eventually dig your way to China.

The minority leader recalled this experience in the course of a toast to Premier Chou En-lai, and, of course, it was received with great, good humor.

In truth and in fact, China is right below or right above us on this earth, whichever way one looks at it. Peking is at almost exactly the same latitude as Washington. Shanghai is at almost exactly the same latitude as my home city of New Orleans. Canton is at about the same latitude as Miami, Fla.

We traveled through much of China. We went to Shanghai and to Peking, and we went into the Manchurian cities of Shen Yang and Anshan. Ours was the first official American party to visit Manchuria since the revolution.

After Shen Yang and Anshan, we traveled to Canton. In all of these places we were well received. Most people living in these places had never seen an American, I am sure. A near majority of them were born after 1949 and have never known of America as more than a land of mystery. Yet, in all these places we were received uniformly with great hospitality and great friendliness.

I came away with the very firm conviction that there is tremendous good will on the part of the Chinese people toward the United States throughout the length and breadth of China.

There are a few other just general impressions.

China is seeking to develop a nation. For the first time, really, in centuries, the country is united. It is united under a form of government we disapprove of, and united under a discipline that we would not tolerate in a free society, but nevertheless united. This makes for enormous potential, to have 800 million people motivated and striving to build a country.

Aside from these cities we visited, we went to communes and factories. We saw a commune way up in the northern part of China producing rice, which astonished me. We produce rice in Louisiana, Arkansas, and Mississippi and California in this country, but one would never dream of producing rice in Minnesota. Yet that is about the latitude where we were in Manchuria, where they were producing rice.

Of course, it is not hard to understand how they do it. They produce all these plants in hot houses and transplant them by hand, one by one, plant by plant, out into the fields. Only in a country which has 800 million people could one contemplate or imagine that type of hand labor, on that scale, in the colder regions, in the production of food stuffs.

About 20,000 people who lived in this particular commune. They had every service. They had a hospital. They had primary schools and middle schools. They had a commissary, as we would call it, a grocery, dry goods and hardware store. They lived in what can be considered, by Chinese standards, reasonably good houses.

Each one of them had a garden spot which was intensively cultivated. I happen to have an interest in gardening, and I was amazed at how much they could produce in just very small plots. What was not needed for the family was sold at the commissary. That money was available as a part of the earnings of the peasants who worked in that particular commune.

Members might be interested in knowing, as far as production is concerned, that each commune was given an assignment.

This particular one had so many bushels or pounds of rice it has to produce and deliver to the state, but what was produced over and above that belonged to the members of the commune and were sold. The proceeds were then distributed to the people who belonged to the commune. Those who worked the hardest received the most. This is much like a free enterprise concept.

In addition, they have savings accounts and are paid interest on the savings accounts. They were proud of their savings accounts. I asked a lot of people, both in the workers communes in the cities and in agricultural communes in the country whether or not they had savings accounts, and most of them said yes.

The country is a very clean country. The government maintains a constant campaign against filth. It is amazing to see no cockroaches, or rats, or flies or mosquitoes which, in the past, I am told, plagued all of China.

The people themselves are astonishingly healthy. I am not sure our people would take the discipline they take in order to obtain this health. About 6:30 every morning bugles blow wherever you may be and usually some song, one of those associated with the regime, is played over a loudspeaker. That means you get up and have a half an hour, whether you are 2 years old or 80 years old, to engage in exercises and calisthenics.

Dr. Hall, you may be able to recommend a program like that. The schoolchildren not only have that half hour at 6:30 in the morning, but they have another half hour or maybe an hour in the afternoon for basketball or volleyball or football or soccer, as we call it. So the people are generally very healthy.

Medical services are available almost everywhere. We, of course, were quite astonished at acupuncture. We actually saw several operations. One was the removal of an ovarian cyst from a woman of about 30 years of age. Another was the removal of a thyroid tumor from a woman of about the same age. Another was a simple appendectomy, and others included extraction of wisdom teeth from young men and women. In all these operations, the only anesthetizing devices were the acupuncture needles. In the case of a woman with the cyst in her right ovary, needles were inserted on each side of the abdomen, and in each ankle, and that was all.

We talked with her during the course of the operation. She sipped tea and felt no pain. In a relatively short period of time after the stitches, she sat up.

The one with the thyroid tumor was up even more quickly, and the doctor said in this particular type of operation the use of acupuncture had several advantages in that the danger of severing a nerve that controls the vocal cords or nerves that control speech could be eliminated because they could keep the patient talking all the time they were performing the operation.

In any event, it is something I think American medical leaders should look at.

Finally, just one or two other observations, and I shall yield to my distinguished colleague.

Let me give you a rather dramatic moment, to my way of thinking. We celebrated, Mr. Ford and I and the rest of the members of our party, the 4th of July this year, 1972, in the city of Canton. We were, of course, the first official Americans to be there in that country on that day in 25 years. We had completed our journey through China, and we were much impressed with what we had seen.

But of course we were 8,000 miles from home, and we reflected on the greatness of this Republic that we represent, and the essential freedoms set forth in the Declaration of Independence on the 4th of July, 1776, and what they meant not only to Americans, but to people all over the earth who seek freedom in their lives and their work and politics. And yet—and I believe the minority leader will agree with me in this—we were concerned in that we saw in China a disciplined society, without any evident vice or corruption or prostitution, where 50 years ago many peasant families had to sell at least one girl into prostitution. In China, these problems are unheard of and undreamed of today; the drug trade and drug traffic is unknown—and yet 100 years ago a war was fought—the Opium War—because of the corruption of the Chinese people by some of our western friends.

We saw people dressing simply, without spending an enormous amount of money on material goods, being satisfied with the simple pleasures that make life worthwhile, but, most of all, we saw a disciplined people.

I think the great strength of the United States is the fact that we have different opinions and that we are not compelled to agree with one another. The idea that we should ever accept such a regimented society is something that each one of us would reject out of hand.

But I think it does point up a lesson that if we continue to be permissive in our country, or too permissive, and here comes a society that is dedicated, that is motivated, then down the road there could be a real question whether or not our country can continue to be a great power, successfully competing with that type of motivation and dedication.

Finally, there are many things that need doing in the course of normalizing relations with China. One is the establishment of better trade relations. We go into this at some length in our report.

As most of you know, I have served as chairman of the Subcommittee on Foreign Economic Policy of the Joint Economic Committee for a long time, and in my judgment there is a great opportunity for the opening of trade between our two nations, particularly in the high-technology areas. There has been a demonstration of that quite recently with the imminent Chinese purchase of the Boeing 707 jet aircraft from the United States rather than any aircraft purchase from Russia. There are so many things that they might receive in American machinery and technology and know-how that the opportunity is there to open trade with China.

I recommend appointment of a commercial commission similar to that which President Nixon established between our country and the Soviet Union. This could very well be in order with respect to the Peoples Republic of China. There are some other very important things in the general trade area that could be done to ease the tensions, such as the settlement of some of the claims that exist on both sides with respect to claimed private U.S. losses and frozen funds of the Chinese.

UNITED STATES-CHINA COMMERCIAL COMMISSION

One of the ways we can come to understand China better is through bilateral trade. I mentioned that some important steps in trade relations have already occurred—I am referring to the Chinese purchase of the RCA satellite ground station for the President's visit, the current negotiations for the purchase by China of Boeing 707 aircraft, and the approximately $5 million worth of Chinese goods purchased by American businessmen last spring at the Chinese trade fair in Canton. Even with these first encouraging steps, however, the level of Sino-American trade remains very small.

The most obvious reason for the relatively small amount of U.S. trade with China is, of course, nearly a quarter century of mutual isolation. In this period a variety of direct and indirect barriers to trade have grown up. These include our denial to each other of reciprocal most favored nation treatment; our own policies regarding export licensing and end-use; Chinese refusal to utilize American banking facilities, American seaports or American ships; and an absence of any agreements respecting air routes, commercial arbitration, patents and copyrights, reciprocal trade missions and trade fairs and, of course, the lack of diplomatic relations between our countries.

Naturally, these matters cannot be resolved overnight. The fact that no diplomatic relations exist between the United States and China makes progress especially difficult. Yet trade itself can help bring about more normal state relations.

I believe we can move forward on improving the climate for trade by establishing a public or quasi-public entity charged with exploring a resolution of these points I have mentioned. The language of the Shanghai joint communique encourages initiatives of this sort as a way of facilitating the development of trade.

As I indicated, a similar commission is now at work on United States-Soviet trade. That commission grew out of an agreement the President made on May 26 in Moscow, and some progress is evident in the form of the large private grain and petroleum agreements.

Another interesting precedent for such a Sino-American Commission is the agreement between the Chinese and Japanese which has enabled the Japanese to establish a commercial office in Peking. This has been done even though Japan not only does not have diplomatic relations with China but also recognizes, as we do, the Nationalist Government on Taiwan. A similar arrangement could be the product of efforts by the commission I am suggesting.

Finally, it is not only to produce a climate of understanding between us that the conditions for bilateral trade should be improved. China is a good potential customer for American technology and goods, but opportunities for American business will not be automatic. China is today able to turn to a number of other nations for these items: Japan, Germany, England, France, and the Soviet Union, for example. Thus, we must be competitive, and to be competitive we should begin to seek an improved political and economic climate.

As the conditions for bilateral trade improve, there hopefully will be opportunities for the United States to sell farm machinery and agricultural technology;

to sell techniques and perhaps whole plants we have developed for improved production of steel, fertilizer, computers, electronic products, chemicals, processed foods, petroleum, gas, and other minerals. In fact, since the range of current Chinese exports is relatively limited as far as the U.S. market is concerned, I believe we may look forward to a balance of trade measurably in our favor.

ACTION ON PRIVATE U.S. CLAIMS

The Foreign Claims Settlement Commission has certified nearly $196 million in 384 claims by private American citizens, businesses, and religious organizations as a result of China's seizure of American-owned property more than 2 decades ago. The other side of this coin is that the United States at that time froze millions of dollars in Chinese assets held in certain banking institutions. I believe that the time has come for our Government to sit down with the Chinese to seek progress on the claims of our citizens. At the same time, we should expect to discuss with the Chinese side the matter of Chinese assets frozen by the United States. Perhaps these discussions could take place using existing channels of communication with the Chinese. If not, I hope the President will constitute a special negotiating team to begin work on this matter. Not only do our citizens deserve some action on their claims, but the resolution of the matter of these claims and on the frozen Chinese assets can remove a current obstacle to trade and to normalized relations between our two countries.

We recognize the Taiwan problem. The Premier talked to us about that. I think the joint communique issued in February is one that both our nations can subscribe to. I think that all of us know that the Indochina war must be resolved, and resolved as quickly as possible.

But, most importantly of all, and this is a thought that I leave with you, after traveling this vast land and seeing these people working, I am convinced that the Chinese are not looking outward; they are looking inward. They want to build their own country.

They are not, today, looking toward capturing or overcoming or conquering some other nation, in my judgment. Therein, I think, lies great hope for mankind, because between the two, between the United States of America and the People's Republic of China, live one-third of all the peoples who live on earth.

If the gentleman from Michigan (Mr. GERALD R. FORD) and I have made any contribution to the normalization of relations between these two great nations, I think our trip has not been in vain.

Finally, let me say to you, my colleagues, and especially to you, Mr. Speaker, we are very grateful for the honor and high privilege of representing this body on that trip.

Now I yield to my friend, the gentleman from Michigan (Mr. GERALD R. FORD).

Mr. GERALD R. FORD. Mr. Speaker, I wish to express to my dear friend and colleague, the gentleman from Louisiana, the majority leader, my appreciation for his very kind and generous remarks.

Last week I had an appropriate occasion to indicate to him how I felt about the fine job that he did—and I would only reiterate today that in my judgment the United States could not have had better representation on this trip than that given by him on this trip to the Chinese People's Republic on behalf of the House of Representatives.

I would also like to express my deep gratitude to the distinguished Speaker of the House for without his role, the House of Representatives would not have had an opportunity to have two Members of this body to go to the People's Republic of China.

I believe what we did was constructive and I hope that the report which has been published as a House document will be read not only by the Members but by others because in it we make some observations and suggestions which in the long run I hope will be beneficial and helpful toward the normalization of relations between our two countries.

Let me take just a minute, if I may, to explain how the majority leader and I proceeded from the very beginning. We made a decision at the outset that we would make a joint report rather than separate reports, as our counterparts did in the other body.

The net result was that four members of the staff of the gentleman from Louisiana (Mr. BOGGS) and four members of my staff worked together, hand-in-glove. The report that we submitted to the President in writing and the report that has been prepared and made an official document is the handiwork of the gentleman from Louisiana (Mr. BOGGS) and myself and the eight members of our joint staff.

I believe both the report to the President and the report to the House are examples of very fine draftsmanship and substance. I hope at some later date the report to the President can likewise be made available to the membership as a whole.

In the report we set forth the itinerary. Incidentally we were the first Americans to go up to Manchuria in an official capacity. The two major cities in that area we visited were Shenyang and Anshan.

This was a part of China that had been occupied by the Japanese and had been the area that even in those early days was the industrial might of China—divided as it then was. Today it is the industrial base, and a very mighty industrial base with an even greater potential.

We saw firsthand a tremendous steel plant, which has become modernized. They do produce steel in great quantities, and they are becoming far, far more sophisticated in techniques and production methods.

It is interesting, however, that in China where we visited we were more graciously received and more warmly welcomed in Shen Yang and Anshan than we were in some of the other communities. Perhaps this was because in Canton, Shanghai, and Peking, foreigners are more prevalent. In the north where certainly no Americans have been such as we in an official capacity, we were a bit different and as a consequence the response to our presence was far warmer, as I saw it.

I would summarize very quickly some very broad observations. I think the Chinese people are clean, healthy, strong, industrious, disciplined, and highly motivated. I have no personal recollection of hunger; any aimless wandering around, whether in the city or in the country. I never saw a single beggar.

I saw no evidence of vice, corruption, prostitution, gambling. I am told, as the majority leader said, that in certain of the major seacoast towns in early centuries in China all of these conditions were very evident and very prevalent. I would say that the Chinese people appeared to be happy, generally busy, and purposeful. They seemed to be reasonably contented.

It was quite interesting, an incident that Mr. BOGGS did not mention, but one of the most dramatic things we saw, was a demonstration between Shen Yang and Anshan in a high voltage power station. Our hosts took us on top of what I think was a manmade hill, perhaps 100 or 200 feet high. We sat there on a hot, sunny day and saw several young ladies go up to these high voltage wires, move out on a trolleylike mechanism and prepare these high voltage lines for repair and actually carry out the repairing without any cutoff of 220,000 kilowatts of power. It was a fantastic demonstration.

I have checked subsequently since I have come back to the United States and since I am not an electrical engineer perhaps I do not describe it too adequately, but the technical people I have talked to here in America tell me they are not familiar with any comparable technique in the United States.

One interesting observation, these young ladies performed this very skillful technique, but there was a professional engineer who described it. In the course of his description he said that he had taught in one or more of their universities for a period of time, but under their procedure, under their way of life today people from the academic world after a period of time go back and work with the workers in the factories or in the fields, and people from other walks of life likewise after a period of time in their profession or their skilled occupation go back and work in the fields or in the factories for a period of several years.

This man indicated, this highly trained engineer who apparently developed this technique, that he had been able to develop it because he had left the academic world and gone back and worked with the people in the field who were the actual people who erected the transmission lines and did the other rather menial work.

As he was describing this experience I let my mind drift a bit and I hope I do not offend anybody—I do not intend to—but this does raise the question in my mind in America, if the system works so well there, should some of our professionals, should some of our intellectuals be given exposure to the workaday life and manual labor in our fields and in our factories? Maybe they in America could do a better job subsequently in the laboratory or in their classrooms if they have had this limited but periodic exposure to manual labor. Again I hope I do not offend anybody, but I did think as this man was describing this procedure, maybe some lawyers occasionally ought to leave the courtroom and go back to work in the fields or in the factories. They might do a better job in their profession. Yes, even maybe a politician or two might do a better job in the legislative branch if occasionally we want back to the field or to the factory.

And now, with the deepest of apologies, I might say to my friends in the news media it might be helpful and beneficial to them if they were to let themselves be exposed periodically to work in the fields or in the factories.

Obviously the Chinese think it works and perhaps we can learn something from this cross fertilization, if that is the phraseology.

I would like to reiterate one point that the gentleman from Louisiana made. We make such an observation in our report on page 4 at the top of the page. We in America are completely convinced that our system of government is right, and I agree, and I came back from the trip more convinced than ever that our system of government is the best. We believe in individuality, we believe in freedom, and a great many lives have been lost and a great many sacrifices have been made to preserve our Government plus individuality and freedom in America.

But as the gentleman from Louisiana indicated, he never saw and I never saw more dedication and more discipline than we observed in China. Whether it is achieved by government edict, and I suspect it may be, or whether it is achieved by some other motivation, they have it. As they grow from 800 million people to a billion people probably in two decades, and as we grow from 205 million to maybe 240 or 250 million, their society in the wrong hands could be a challenge and a threat to us and perhaps to other nations throughout the world.

I do not think it is true today because my impression of their leadership is one of responsibility. As the gentleman from Louisiana indicated they are preoccupied now with their internal problems. They want to catch up and they are working hard to do so.

But let me put it in a personal perspective, and I have talked this way at home with our four children. We have three boys aged 22, 20, and 16, and a girl 15. They are typical Americans. They have the same ideas that most young people at that age have. They have grown up in a more permissive society than I did, and certainly in a more permissive society than my parents did. Of course some of this permissiveness we have seen in the last few years has grown at a more accelerated rate than in past American history.

I am not concerned about competition today between our country and China, but I am concerned about the competition two decades from now, when my four children are going to be faced with a billion people in China who from toddlers to the most aged have had this dedication and discipline.

They have been indoctrinated with a total political dogma, contrary to ours. They have this spirit and this dedication and this discipline.

I believe our young people today, even with the growing permissiveness, so long as they are willing to sacrifice for individuality and freedom, can meet the challenge. But they cannot ignore it. That is the main thing; they cannot ignore it, because that competition is inevitable and it will be rugged.

I say again in closing, Mr. Speaker, I am deeply grateful not only for making it possible for us to go but also for the very kind and generous comments you made.

I thank the majority leader, his staff and my staff, and those others who accompanied us for the great contribution they made to what I believe was a very successful trip on behalf of the Nation, the President and the House of Representatives.

I hope and trust that if any Members of this body have questions they would like to ask now or at some later date they will feel free to do so.

Thank you very much.

Mr. BOGGS. Mr. Speaker, I include the joint report by the minority leader, Mr. Gerald R. Ford, and myself on our mission to the People's Republic of China, June 23 to July 7, 1972.

IMPRESSIONS OF THE NEW CHINA

(Joint report to the U.S. House of Representatives by Majority Leader Hale Boggs and Minority Leader Gerald R. Ford on Their Mission to the People's Republic of China, June 23 to July 7, 1972.)

INTRODUCTION

Our visit to the People's Republic of China, in behalf of the House of Representatives, was undertaken at the invitation of the quasi-governmental Chinese People's Institute of Foreign Affairs (CPIFA) and with the encouragement of President Nixon. It was only the third visit to China by elected American officials in nearly a quarter century, preceded only by the President in February this year and by Senators Mansfield and Scott in late April and early May.

Our mission had two principal objectives: first, to learn as much as possible about China—its leaders, its people, its economy, its international and domestic objectives for the President and the House of Representatives; second, to contribute to better relations between our two countries, an objective not only mutually advantageous to the Chinese and American peoples, but also contributory to the relaxation of tensions throughout Asia and the world.

We have reported in detail to the President both verbally and in writing. This report to our colleagues is an elaboration of our report to him.

We do not pose as experts on China, or on Sino-American relations. All that we report must be evaluated in light of the views of others in and out of government who have devoted themselves to a study of China. We recognize as well as anyone that in a mere ten days in the vastness of China, we could do little more than become aware of the enormous amount of information and understanding we lack about that land.

We are reminded of the blind men who sought to learn about an elephant, each coming away with a very different impression, and none with a complete account. In order to enhance the usefulness of our report, then, we have prepared this report jointly, assembling and comparing our recollections together as we traveled and worked together on this remarkable journey.

SUMMARY OF MAJOR IMPRESSIONS

The questions most often asked of us since our return have concerned our general impressions of China and its people.

We find the most striking first impressions an American receives today in China are these:

The people appear adequately fed, clothed and housed and therefore are relatively content. Related to this is a pervasive discipline and motivation in pursuit of national goals of class consciousness, increased production, Marxist-Leninist (Maoist) awareness and collective effort to upgrade the quality of life.

Preoccupied with their tremendous struggle to advance since 1949, the Chinese multitudes seem oblivious to the fact that they lack in their lives the political liberty, social mobility, and individual orientation that we cherish in the United States. We did not detect, nor did we sense any real dissent.

The parts of the New China that we saw in the eastern regions seem a land united and well on the move toward development—a remarkable achievement when it is recalled that China at the end of World War II was economically prostrate, politically riven and alone, its population demoralized, dispirited and despairing.

So widely shared has been the progress since 1949, so improved the lifestyle of the average Chinese, that these people living, by our standards in relative privation, give every impression of counting their blessings, grateful for even modest progress, not restive with only the bare necessities of food, clothing, shelter and health.

The cities we visited—Shanghai, Peking, Shen Yang, Anshan and Canton—are strikingly clean. There is virtually no litter. There are no flies. There are no dogs. No animals or poultry run loose. Most buildings are well maintained. The virtual absence of passenger cars and the silent gliding of large numbers of bicyclists give an air or orderliness and peace to the streets. Only Canton still reminds one of the congestion and disorder of earlier days, and even there without the human distress that once engulfed the streets of Chinese cities.

Not one member of our party reported seeing even one Chinese who appeared to be suffering from hunger, or exposure, or who appeared to be socially crippled, homeless, idle, or uncared for. In cities Americans saw years ago as dirty and crowded with the hungry and the ragged, the poor and the begging, the sick and the lame, we saw bustle, cleanliness, and a disciplined purposefulness.

Despite these positive impressions, there are troubling impressions as well. Chairman Mao Tse-tung, despite rare public appearances, is ubiquitous: his presence felt everywhere. Enormous color portraits of the Chairman are found atop major public buildings. His portrait adorns the walls of virtually all public rooms, factories, classrooms and homes we visited. Quotations from Mao's writing—usually exhorting the population to greater production or increased vigilance—are spread over gigantic banners hung from public buildings, or lettered in white on huge red billboards. Radios and public loudspeakers give forth an undeviating fare of martial music, political instruction, and songs whose themes ordinarily extol the nobility of peasant labor, the heroism of factory workers, the decency and courage of the people's liberation army, and the omnipresence of outside hostile forces.

No non-Chinese newspapers, books, films or magazines are anywhere in evidence. Instead, all Chinese books, newspapers and magazines are State produced. "Literature" appears to consist entirely of dogmatic collections of news, stories or poems whose unalterable themes are those of overcoming obstacles, exercising vigilance, and performing acts of heroism in the struggle to meet factory or farm production goals.

The individual is important only as a tiny part of the whole; there seems to be no place for individual freedom to dissent, to disagree; to seek, discover or pursue alternatives. The political discourse is a scramble toward the center to avoid the perilous extremes of "ultraleftism" or "ultra-rightism".

The highly organized system of child-care, from pre-school to afterschool—and the use of that system to inculcate in the children a veneration of the State and obedience to its leaders—is awesome in its possible implications for the future. Writing, art, music, dance, drama and even supervised play—all teach a complete devotion to the heroes, the tasks, the purposes and policies of the system.

Few observers have returned from China in recent months with impressions significantly different from these we have just mentioned. If we can assume these impressions are essentially correct, for the United States and the rest of the world the portents in the light of other known facts about China are no less than totally profound, and deserving of the most serious reflection by this Congress, our leaders, our institutions, and our people.

Time does not stand still. The world moves on, and changes. In less than two hundred years the United States moved from weak colonial status to the most powerful nation on earth.

China today is far from being powerful as compared to the United States and the Soviet Union. Her population of some 800 million needs to be fed, clothed, housed, cared for, occupied and satisfied, and this huge population is growing by some 20 million a year.

China's ability to meet its vase domestic needs requires all the energy, discipline and resourcefulness a people can bring to bear. It requires political stability at home. It requires freedom from external aggression, actual or even threatened, whether military, economic or cultural.

The views expressed to us by Chinese leaders that China is today preoccupied with her massive internal problems, that she has no present notions of international conquest or expansion, that her present aspiration is only to develop peacefully—these views we find credible for today.

We are therefore persuaded that, at present, the world has little to fear from China. On the other hand, from China's point of view, the world must be something of a threatening place.

But time will not stand still for China. No matter how weak she may be today relative to other nations, China is a land of vast human and natural resources.

If she can maintain political stability, if she can remain free from outside interference—what will China be like in another two or three short decades?

The answer is obvious. If she manages to achieve as she aspires, China in the next half century can emerge a self-sufficient power of a billion people—a nation whose agricultural output can provide for her population, whose industrial capacity can be enormous, whose military capability can be very substantial, with a people united in devotion and obedience to the State.

This last impression—of the reality of China's colossal potential—is perhaps the most vivid of our journey. As our small party traveled through that boundless land, this sense of a giant stirring, a dragon walking, gave us much to ponder.

There, in that nation where State-directed conformity produces unity of effort and purpose, and where self-indulgence and licentiousness of any kind are not tolerated, we reflected on our own country. We were troubled that, by contrast in our own nation, where people are free to live and work and choose and read and think and disagree as they please, there has been widespread division, discord and disillusionment and a pervasive permissiveness straining the fibres of our national character.

In China an American is brought to hope that we will always have the self-discipline which fired our ancestors. In our own land of liberty and abundance and power—with all the material advantages that China lacks—there have been corrosive trends that have grown as our fidelity to old virtues has waned.

In disciplined, unified China, American visitors will wonder if our self-indulgent free society will be able to compete effectively fifty years hence with this totalitarian State, possessed of a population which dwarfs our own, with equal or greater natural resources, and with total commitment to national goals.

Such are the questions that occurred to us as we made our way in the Middle Kingdom that is China.

NORMALIZING RELATIONS

Last February, the U.S. and Chinese stated that "progress toward the normalization of relations between China and the United States is in the interest of all countries," that normalization "contributes to the relaxation of tension in Asia and the world", and further, the Chinese noted that "the Taiwan question is the crucial question obstructing the normalization of relations between China and the United States."

In discussions of these and related points with Chinese leaders, we received the very clear impression that China remains most interested in improved State relations with the United States, just as we are with China.

We also can confirm that the Taiwan question appears to remain the "crucial question obstructing the normalization of relations." On this question, it is well to recall the United States position in the Shanghai Joint Communique last February as follows:

"The United States acknowledges that all Chinese on either side of the Taiwan strait maintain there is but one China and that Taiwan is a part of China. The United States does not challenge that position. It reaffirms its interest in a peaceful settlement of the Taiwan question by the Chinese themselves. With this prospect in mind, it affirms the ultimate objective of the withdrawal of all U.S. forces and military installations from Taiwan. In the meantime, it will progressively reduce its forces and military installations on Taiwan as the tension in the area diminishes."

Since the February Communique, American troop levels in Vietnam have been measurably reduced. In the same period—in fact in the very midst of our visit to China—the chiefs of state of North and South Korea met together in a promising beginning toward a relaxation of tension. Finally, there has been a state of relative calm in the Taiwan Strait during this same period. We view these as the kinds of developments which in time will allow a progressive reduction of our forces and military installations on Taiwan, and we are confident that, regardless of the political results next November, the United States will do its part to see that the process of normalizing United States-China relations can go forward.

We fully support peaceful resolution of the Taiwan question by the Chinese themselves, and recognize that this goal is complicated by the fact that diplomatic relations currently exist between the United States and the Nationalist Government of General Chiang Kai-Shek but do not exist with the People's Republic of China. How this question can be ultimately resolved we do not know, but we look forward to the day when all Chinese can be represented in Washington.

In this respect, we found that our continuing diplomatic relations with the Republic of China are for the People's Republic of China a particular barrier to normalized relations.

Chinese leaders called to our attention the fact that the war in Indochina is also an obstacle to improved relations between our countries. The Chinese position is well known. Fundamentally it is that Communist North Vietnam is a neighbor and friend whom China will not abandon. The Chinese insist that they have no territorial designs in Indochina, that they will not intervene in North Vietnamese affairs, and that they seek a neutral Indochina where no great power has hegemony.

Both of us support the systematic withdrawal and eventual end of U.S. involvement in Vietnam, and therefore we are optimistic that in reasonable time the Vietnam war will no longer obstruct the normalization of Sino-American relations.

Aside from the major questions of Taiwan and Vietnam, there are other ways in which progress toward normalized relations can proceed. These areas—trade and exchange of visits, for example—are discussed later in our report.

INDOCHINA

We have already mentioned that the conflict in Indochina obstructs improved relations with China. In our discussions with Chinese leaders we were not surprised to find that they regard the United States as the aggressor in Vietnam or that they expressed fraternal solidarity with the North Vietnamese. The Chinese view, as is well known is that the Vietnam conflict is a civil war whose roots are in mistaken United States foreign policy assumptions of the Dulles era.

It was also not surprising to us to hear that the Chinese will continue to give support to the North Vietnamese, although they laid considerable stress on their having not furnished combat ground troops.

The Chinese endeavored to persuade us that their challenge of domestic development is all-consuming; that they lack the ability and interest to wage external aggression; and that consequently we are mistaken if we are pursuing the conflict in Vietnam or maintaining military presence in Asia as part of a policy primarily intended to contain Chinese expansionism or subversion.

In reply to these views we reported to our hosts, and emphasized, that the American people and their leaders are in complete accord that the fighting in Vietnam should end, that American combat troops are being withdrawn and that the Vietnamese should peacefully determine their own future without outside interference.

We had extensive discussions with Premier Chou En-Lai on a number of subjects, including Indochina. At his specific request, we have reported his views on these matters to the President.

TAIWAN

To the Chinese leaders, Taiwan is simply a province yet to be "liberated". Among the most common slogans we noted on public walls, banners, billboards, and even children's jerseys was the slogan: "We will certainly liberate Taiwan." In the Shanghai Communique the Chinese reiterated their opposition to any form of "two-China" solution to the question of Taiwan.

Thus, as we have mentioned, the issue of Taiwan remains a major obstacle to the improvement of our relations with China. Although this problem must be solved by the Chinese themselves, it poses difficulties for the United States in view of our diplomatic relations and mutual defense treaty with Taiwan.

In this matter, as in Vietnam, we believe the Chief Executive in his conduct of foreign policy should have substantial latitude necessary to help, where he can, to bring the problem to a solution. Therefore we will reserve substantial public comment on this question. Here, as in Vietnam, we trust the

President will take into account the realities of the situation. We subscribe to the interest expressed by the U.S. side in the Joint Communique that the Chinese on each side of the Taiwan Strait will themselves settle this question.

In saying this we are not advocating "abandonment" of the Chinese on Taiwan. We simply recognize, as they do, that the situation which has existed for more than two decades has tended to create in the minds of many the inaccurate impression, to which neither the Nationalist Government nor the People's Republic of China subscribes, that there is not one China, but two.

The People's Republic of China uses such quasi-governmental organizations as the Chinese People's Institute of Foreign Affairs (CPIFA) and the China Council for the Promotion of International Trade (CCPIT) to advance Chinese interests where lack of diplomatic relations might otherwise be a barrier to international contact. Nevertheless, our hosts cited the Taiwan question on a number of occasions as an obstacle even to extensive people to people contact with us, and it is clear that the nature of our current relationship to Taiwan remains an obstacle to normalized Sino-U.S. relations. We therefore look forward to a resolution of this question.

SINO-SOVIET RELATIONS

Throughout their histories, China and Russia have been wary friends if not outright enemies. After 1949, we in the United States tended to regard the Sino-Soviet relationship as an international communist conspiracy to subvert and control the world. Yet, as we look back, we can see that sharp ideological differences and growing geopolitical hostility between China and the Soviet Union reduced the likelihood of their close cooperation in such a strategy.

By 1963, Sino-Soviet relations were publicly strained. In that year, for example, the Chinese newspaper People's Daily, in a significant editorial attack on Soviet policy and leadership, ridiculed Nikita Khrushchev as a "psalm-singing, table-thumping buffoon who belongs in the trash heap of history."

As early as 1960, of course, Soviet technicians and advisors resident in China to assist in industrial and agricultural development had been suddenly withdrawn. They left China with their plans, records and blueprints, leaving the Chinese understandably angry.

Today, normal State relations do exist between the U.S.S.R. and China. There is also a treaty of friendship between them. At the same time, Chinese and Soviet troops have clashed in bloody incidents along the border in Western China and over an island to which both lay claim in the Ussuri River north of Vladivostok. It is generally believed that the Soviets have more troops massed and more advanced weaponry poised along the border with China than they do in Europe. For its part, China, too, apparently has large numbers of troops deployed along the border.

In addition to their vigilance along the border with the U.S.S.R., the Chinese must be giving serious attention to the growth of Soviet influence in India—a nation with whom China also shares a common and disputed boundary.

Finally, the Soviets have helped supply, train and arm the North Vietnamese in an obvious effort to gain influence with still another nation bordering China.

These strains in Sino-Soviet relations suggest one of many possible reasons for current Chinese willingness to seek improved relations with the United States. Surely the Chinese are under no illusions that the long-standing and fundamental differences they have with us can be suddenly wiped away. Yet it is obviously in China's interest to work for a world in which there can be relatively peaceful relations with the United States. In developing her domestic economy, it would be exceedingly disruptive for the Chinese to be required to be in a constant state of preparation against possible military interference by both the United States and the U.S.S.R.

Our conclusion that the Chinese and the Soviets are in a period of mutual tension should not be taken to mean that we have nothing to fear from possible joint Sino-Soviet designs. Obviously, for example, there is even now cooperation between the Soviet Union and China in furnishing the supplies which North Vietnam is using to wage war. Chinese railroads are carrying Soviet equipment. Moreover, the Soviets are still trading with the Chinese; at Peking Airport we noticed that two new Soviet IL–62 aircraft were parked in front of the main terminal.

Our recommendation in view of heightened Sino-Soviet tension is simply that the United States should, in its self-interest, carry forward the policy of improved relations with China. At the same time, we must be aware that after nearly a quarter century of mutual isolation, the United States and China have much to learn about each other, and a long distance to travel together, before sturdy foundations of trust and good faith are laid. Therefore we must continue to remain defensively strong and alert.

U.S. PRISONERS IN CHINA

In view of the concern expressed to us by many people prior to our departure, we were particularly interested in pursuing with Chinese leaders the matter of U.S. prisoners held in China. The United States Government is aware that there are three individuals who are currently prisoners of the Chinese. They are John Downey, Major Philip Smith, U.S A.F., and Lt. Cmdr. Robert J. Flynn, U.S. Navy.

We appealed to Premier Chou En-lai and others on behalf of these men and their families, on humanitarian grounds, that they be accorded consideration with respect to treatment and release. We pointed out that favorable consideration by the Chinese would be an important indication to the American people of China's interest in normalizing relations.

Another high official with whom we met, Foreign Affairs Vice Minister Ch'iao Kuan-hua, made a special point of advising us that he thought Mr. Downey's mother would like to know that he is currently in good health. We were advised that Mr. Downey's case is different from that of Major Smith and Lt. Cmdr. Flynn, the two American fliers who were forced down over Hainan Island, and that the cases will be handled separately. Other than assurances that the Chinese would take note of our appeals it was not possible to obtain any further information or assurances about these three Americans.

In the context of our discussions regarding Mr. Downey and the two fliers, we also inquired about the truth of reports circulating in the United States from time to time that other Americans, captured in Indochina or elsewhere, are being held prisoner on Chinese soil. On this point the Chinese assured us that they are not aware of any Americans held in China other than the three just mentioned. Moreover, the Chinese explained that from now on, they expect to handle the matter of prisoners on a candid and above-board basis, utilizing the channels of communications that have evolved between our countries since the President's visit. We took this to be an assurance that the United States Government will be informed promptly if and when it develops that any other Americans are held on Chinese soil as prisoners or otherwise detained against their will.

TRADE

After informal trade discussions with political leaders and officials of the China Council for the Promotion of International Trade (CCPIT), it appears to us that the Chinese side is prepared to have trade between our countries develop in some measure, but slowly. We did not find among our hosts the same high degree of enthusiasm for early and measurable increases in trade which has stimulated the interest of American businessmen. Indeed, in pursuing the matter of mutual contact generally, we at no point found the Chinese more reserved than in talks respecting bilateral trade.

China's foreign trade policy is governed by three fundamental considerations: first, trade should be conducted on the basis of equality and mutual benefit; second, trade must complement domestic objective of self-reliance; third, the cost of imports should not exceed the proceeds from exports.

These points by no means rule out an increase in Sino-American trade. As long as China believes it can accelerate technological development by trade, for example, it will use foreign exchange gained in exports to purchase sophisticated technology. It can achieve a trade balance by State planning, offsetting a trade imbalance with one nation by trade with others. While China could finance high-cost, high-technology imports with long-term credit, we found no indication that the Chinese have significantly altered their vigorous resistance to debt financing.

There appear to be a number of areas in which opportunities exist for U.S. exports to China. Obviously, these include advanced aircraft and satellite support technology—items China has already purchased. Other areas, too, coincide with China's plans for development. These include farm machinery and techniques; iron and steel production; on- and off-shore mineral and gas extractive methods; chemical fertilizer production; chemical production; improved breeding stock; food processing techniques, computers, copiers, and so forth.

It is important for us to bear in mind regarding exports to China, however, that there are few items even in the category of advanced technology which China cannot obtain from other sources. Japan, Germany, France, Britain and the Soviet Union are all important Chinese trading partners. We must therefore be sufficiently competitive or Chinese business will go elsewhere. By the same token, Chinese goods which have a market in the United States are also generally available to us from other sources. These include a variety of foodstuffs, handicrafts, minerals, light manufactures, and soft goods. We are not, therefore, trading partners essential to each other.

On the other hand, there is important political significance to increased Sino-American trade. The exchange of goods, like the exchange of people, can be a bridge to better mutual understanding and improved political relations.

Among serious obstacles to increased trade is the absence of normal State relations, yet Japan and the Federal Republics of Germany, though lacking diplomatic relations with China, have a higher volume of trade than does France which recognizes Peking. Thus, though diplomatic ties with China may be a condition precedent to any dramatic increase in the range and volume of goods traded, this is not to say that some significant trade cannot occur before that event. Obviously, some trade can itself play an important part in bringing about diplomatic ties. The imminent purchase by China of Boeing aircraft is a good example of a large transaction which required official U.S.-Government participation, at least to the extent the grant of a federally issued export license was required to make the transaction possible.

Nevertheless, the Chinese seemed to be telling us that before too long, if trade relations are to improve, progress will have to be made in resolving a number of items: the conflict in Indochina; the status of our relationship to Taiwan; current tariff and non-tariff barriers; the current disagreements over frozen Chinese assets; claims of U.S. citizens for property seized by China; and U.S. policy respecting end-use and export licensing. Clearly further mutual effort must be given to the area of trade development and promotion.

We do not say that the Chinese are uninterested in pursuing trade with the United States. But it is important for us to bear in mind that the Chinese are very sensitive to the possibility of exploitation, and they are striving to be self-sufficient. In a recent speech the Chinese Vice Minister of Trade sounded a theme which we heard repeatedly during our visit, namely that "international trade should be based on equality and mutual benefit." In view of the experience of China in matters of trade with the West over the last 150 years, this is an understandable concern.

LAW AND JUSTICE

The legal system, an important part of any system of government, appears to be undergoing very fundamental experimentation. The legal profession itself has been abolished. Petty disputes and infractions are handled by the Revolutionary Committees in the communities in which the offenses or disputes occur. Behavior control seems to be based less on a fear of physical punishment or confinement than on persuasion, psychological pressures, public shaming and such re-education devices as political study and manual labor. There may be much for us to ponder with respect to the Chinese belief in the social re-educability of wayward citizens, and their claimed rejection of confinement in the rehabilitation process. There is also, unfortunately, a definite reluctance on the part of the Chinese to permit Western visitors access to information on their legal system as it relates to crime. While this is somewhat understandable in a society which is experimenting with the whole question of law and justice, we hope the Chinese will before long permit us to share in their search for better ways to deal with antisocial behavior.

POLITICAL STABILITY

In view of the complexity of the domestic Chinese political situation, a subject which has occupied the increasing attention of Sinologists in the West, we can offer only the most general observations.

Obviously, if the evident progress toward a united, productive and self-reliant China is to be sustained, there must be political stability, and whether such stability exists depends not only upon China's relations with its international neighbors, but perhaps more importantly on her ability to govern effectively at home.

As for the present, Chinese Communism appears fortunate to have among its senior leaders a man as worldly, tireless and adroit as Premier Chou En-lai. At an age when most men are relaxing in retirement, Chou seems a man of spring steel, abundant energy, high intelligence and great international sophistication. In giving credit to President Nixon for his bold initiative in opening the way for improved relations with China, we should not forget that Premier Chou and his associates were equally bold in that undertaking. The fact that a closed society which has made the United States anathema would be a party to this effort is as encouraging as it is remarkable. The Premier is certainly among the most seasoned and perceptive national leaders in the world today. The course of China's internal and external policies in the future will depend in large measure on how effective he is in transmitting his vigor and his outlook to younger leaders.

One final point is this: We have no way of calculating the political role played by the military in China today. It was not evident to us how much of a part the army has in provincial and municipal government. We were advised prior to our visit that military personnel occupy top positions in the provincial and municipal Revolutionary Committees, but we were unable to confirm this. It may be noteworthy, however, that we met only the nonmilitary Vice Chairmen, but never the military Chairmen, of these Revolutionary Committees. These Vice Chairmen were also men and women of apparent energy and ability.

The Revolutionary Committees at the provincial, municipal, commune and factory levels have been the principal organs of government since the Great Proletarian Cultural Revolution. These committees are composed of representatives of the army, party cadre and masses. The smallest unit is apparently the Neighborhood Committee, which is constituted at mass meetings. There has apparently been no national representative unit functioning since the National People's Congress last met in early 1965.

Our Chinese hosts, in discussion of current political topics involving the United States, invariably assured us that they did not want their comments to be construed as an intrusion in our internal affairs. This is subject to the interpretation that by our own questions and observations we should take care not to intrude in their internal affairs. Naturally we intended no such intrusion by our curiosity then, nor do we by this report.

Despite Mao's frequently quoted maxims to "trust the masses" and "serve the people," and despite the political forms evolved to "consult the masses," the system of government in China is a pyramid whose decisions are made at the top. Perhaps never in history have so many been ruled so completely by so few.

EXCHANGES

Among the activities which holds the most promise for developing understanding between our two countries is people-to-people contact and exchanges. The Shanghai Communique took specific note of this fact. Both sides agreed that "it is desirable to broaden the understanding between two peoples" and that each side would undertake to "facilitate the further development of such contact and exchanges" in such fields as science, technology, culture, sports and journalism.

Our own visit, which was as graciously hosted as a visit could be, is a tribute to the sincerity of the Chinese in encouraging contact. And other Members of Congress will no doubt be pleased to know that Chinese leaders at the highest levels expressed a willingness to host other American political leaders on a bipartisan basis so long as the time and personnel are available on the Chinese side to accommodate them.

This last point highlights two interesting facts: first, the Chinese not only favor increased contact with the West, they already appear to have a very ambitious program of hosting foreign guests. This activity naturally puts a strain on their ability to supply interpreters and provide transportation, housing and other services to visitors. Second, the interest the Chinese have in encouraging visits to their country is a measure of their confidence that, once exposed to the New China, a visitor genuinely interested in truth and objectivity will return home favorably impressed. This is not a misplaced confidence. As we have mentioned, the clean streets, the friendly and hardworking people, the rich agricultural areas and the throbbing industrial cities are testimony to the successes of the New China in welding a nation out of the chaotic post-war period.

While China favors increased people-to-people contact, she seems much more interested in hosting visitors than sending her own citizens to the United States. There are three reasons for this. First, our recognition of Taiwan troubles the Chinese to such an extent that China is reluctant to expose her citizens to possible embarrassment from criticism or ridicule by Americans or others who may question the legitimacy of their government. Second, there is a genuine fear of physical harm to Chinese citizens traveling in the United States. They have read our crime statistics. They are aware that the United Nations diplomat charged with the security of U.N. diplomats was himself mugged and robbed in New York. Finally, there may also be a reluctance on the part of the Chinese to expose their people to our way of life—political liberty, wealth, social mobility, and so forth.

The acceptance of the Chinese table tennis team in the United States has helped to dispel, we believe, the foregoing fears. Chinese leaders were unanimous in their appreciation for the warm and safe reception given their team, and we assured them that the American people will be equally courteous and enthusiastic hosts for other Chinese, whether official guests or visitors or a people-to-people basis.

Of all the areas of exchange, the Chinese appeared most interested in pursuing those in the medical field. This is an area in which the Chinese trade relations maxim of "equality and mutual benefit" has particular application. Chinese political as well as medical leaders expressed great interest in learning about American efforts in the fields of cancer, heart disease, and stroke. And, of course, the Chinese are justly proud of their remarkable achievements in acupuncture anesthesia and therapy. In this area, we have much to learn from each other for the ultimate benefit of our people, and so we are optimistic that contact in this area will be active.

In the field of journalism, the Chinese have been very cooperative in hosting American journalists and were especially so in hosting the media representatives who accompanied us. Naturally, there are more journalists who are seeking visas than the Chinese have yet accommodated, but this seems to be more a function of ability to handle numbers than any policy to restrict access of the American press corps. Our arrival in Peking, for example, was preceded by visits of journalists from The New York Times and the St. Louis Post-Dispatch, and a Washington Post journalist arrived during our mission.

The Taiwan question appears to be an obstacle to the establishment of news agencies in our respective countries, but we favor this and related steps toward improved communication, and we hope China will send more of her journalists to this country.

In the academic area, too, the Chinese seem reluctant to send students to American universities. This reluctance is related to the Taiwan question; China does not want her students exposed to harassment or ridicule at academic institutions which may also have Taiwan students enrolled. We sought to ease Chinese apprehensions on this point by stressing that we felt the atmosphere at U.S. colleges and universities would be one of interest, respect and hospitality to Chinese students and scholars. We also inquired about the possibility of long-term academic programs for American scholars in China. We did not get a great deal of encouragement on this point; the Chinese appear to favor shorter exchanges by more scholars rather than longer visits by a few.

We have mentioned our interest in sharing views with the Chinese on policy toward criminal elements. Perhaps exchanges of people working in this field would be possible.

We also favor programs which will bring our young people together; after all, it is with our youth and succeeding generations in mind that we seek friendship with China.

During our visit we were exposed to cultural and gymnastic programs which we believe would be very well received in the United States. Not only in table tennis do the Chinese excel. The music, dance and both traditional and contemporary gymnastic events were so excellently done that we encouraged the Chinese to consider sending such troupes to our country.

Finally, Chinese leaders expressed an interest in sharing information and possibly exchanging people in the area of anti-pollution activity.

Having been part of the exchange process ourselves, we appreciate its importance in broadening understanding and we hope for an increase in contact in both directions.

ECONOMY

There are few areas more difficult to gain hard information about in a short visit to China than the national economy. Either there is an inadequate mechanism for gathering economic statistics, or such statistics as are gathered are simply not in any systematic or forthcoming way divulged to the general public much less to foreign visitors.

In view of the paucity of economic data, we were particularly pleased to have had prior to our journey copies of the excellent study by the Joint Economic Committee entitled *People's Republic of China: An Economic Assessment*, released late in May of this year, and also the hearings on that study which occurred in June just before our departure. We took this study with us and distributed copies to Chinese officials. We hope that we may have some eventual response from the Chinese side as to their assessment of information in the study.

We can offer only these generalizations about the Chinese economy as a result of our visit:

Production, both agricultural and industrial, was set back measurably by the Great Proletarian Cultural Revolution. The Chinese candidly admit this, and they do so without much evident regret. They apparently believe that a production setback was an acceptable price to pay for ideological renewal. Even so, among the most common slogans found on banners and posters in the cities, in the countryside and in factories is the exhortation to "Unite To Win Still Bigger Victories and Increase Production." We were also frequently advised that while the Cultural Requently advised that while the Cultural Revolution was necessary, future ideological and economically disruptive form.

Wages of factory workers and peasants are very low by American standards, but then so are prices. We saw no evidence that families in which the husbands worked were wanting for the necessities of life and, since many families appear to have both parents as well as some children employed, there is even the opportunity to save for such "luxury" items as radios, sewing machines, electric fans and bicycles.

Department stores and food stores appear well stocked with merchandise and busy with shoppers. The range of color and design of clothing and fabric was somewhat surprising in view of reports that the Chinese tend to dress primarily in gray or blue clothing. Most people do, in fact, dress in clothing of those colors, but children's clothing and women's blouses are beginning to show signs of color and decorations. It is of interest, though, that the decoration at least on children's clothing often serves political ends—for example, one of our party bought a jersey for a toddler which bears the popular Chinese slogan, "We Will Certainly Liberate Taiwan!"

All tillable land is used for agriculture. Crops are planted not only in areas close to the cities and, for example, up to the edge of airstrips, but also within the city limits. Only in rare instances did we see land given over to the relative wastefulness of grass.

Working conditions for factory workers are in major respects close to uniform throughout China. At both a jeep production facility in Peking and an iron and steel works in Anshan, for example, the work week is six days, forty-eight hours, three shifts. Workers generally get one hour for lunch, though in the South the lunch hour is sometimes two hours. Retirement is at age sixty for men and fifty-five for women at seventy percent of salary. A worker's wage typically ranges in eight steps from approximately eighteen to fifty-five dollars a month. Housing for workers usually consists of small three-room apartments arranged in close proximity to the plants, and workers are charged two to five dollars a month rent. Day-care and week-care nurseries are available for children of workers at nominal charge. Medical care for workers is free, and children are covered for 50% of medical costs. Women are given fifty-six days maternity leave. The only vacation time with pay for workers occurs on the three or four national holidays, although some workers told us that they would be entitled to ten or twelve days of home leave to rejoin their families if their families resided a substantial distance away.

Working conditions for peasants working in communes are also, we were told, fairly uniform throughout China, varying only according to planting and harvest cycles. A typical day in the paddies and fields begins about six a.m. and continues to sundown with a long midday break for meals and relaxation. We visited two communes, the Red Star Commune near Peking and the August 1st Commune near Shen Yang. Each commune had its own nurseries, schools, medical facilities, machine shops, food and dry goods members share in the profit generated by their production. That is, the commune delivers a fixed percentage of its production to the State, deducts its own needs, then sells the balance to the State to earn revenue to purchase equipment and other necessities for the commune. Commune members share according to "work points" in the remaining balance of the proceeds. Also unlike factory workers, there seems from our limited observation to be a better chance for a commune member to own his own home. At both communes we met with homeowners who had built and furnished their own living unit from savings. Commune families we visited are also allowed to cultivate small vegetable plots and maintain a few ducks, chickens and pigs of their own. The sheer size of Chinese communes, if those we visited are typical, might surprise those Americans who have considered "living in a commune." The Red Star Commune has a population of 75,000 and the August 1st Commune has 20,000. Each commune is divided into households, then production brigades and finally into production teams. In the August 1st Commune for example there are 4,000 households, 15 production brigades and 73 production teams. This same August 1st Commune, though its primary production is rice, has 5,500 hogs, 800 work animals, and estimated million fish, 50,000 ducks, 63 tractors, 300 rubber wheeled carts, 87 wells, and 47 pump stations. A vast system of irrigation ditches carries water and fertilizer to the rice fields.

Looking to the future of China's economy, the fundamental reality seems to be that China has an immense and growing population to feed, clothe, house and care for, and that increased production is essential simply to keep pace with population pressures. Most projections show that the population of China will reach one billion by 1980.

This means that it is desirable for the pace of industrialization and of mechanization of agriculture to accelerate; it means that China must have political stability; and it means that the disruptions of the Cultural Revolution must not be repeated or not recur in such a form as will bring on a paralysis of industry or agriculture.

ENVIRONMENT

Air and water pollution appeared to be as much of a concern to the Chinese as to ourselves, and they expressed interest in U.S. efforts at control and abatement.

Air pollution is an evident problem in industrialized areas such as Anshan, Shanghai, and Canton. Black smoke pours from factory chimneys with little apparent effort underway to stop it. Moreover, we understand that all cities undergo marked increase in air pollution in the winter months when the general public burns large quantities of coal for heat.

Water pollution is much less of a problem, for two reasons. First, the level of industrialization is relatively low, and therefore there is relatively little discharge of industrial waste into waterways. Second, the Chinese do not to any significant degree discharge human waste into rivers and streams—instead, human waste is collected, treated and used as fertilizer. This latter is an excellent example of serving a two-fold purpose of keeping waterways clear and clean and, at the same time, recycling waste to meet another socially important purpose.

The absence of motor vehicles in any large numbers in Chinese cities produces another positive environmental result. Not only is air pollution potential reduced, but there is virtually no noise pollution. The nearly silent swish of hundreds of bicycles is a far more liveable sound than the racing of hundreds of engines and the honking of hundreds of horns. Another positive environmental effort made by the Chinese is in the area of flood control. Extensive networks of dikes and irrigation canals have been constructed to tame Nature and serve agricultural objectives.

The Chinese follow another public policy worthy of our attention, and that is their policy with respect to dogs. We read just prior to our journey of the controversy in New York City between dog owners and non-dog owners regarding the deposit of dog waste on public ways. In China, dogs are simply forbidden from cities completely—we saw no dogs at all in any city we visited. The prime reason for this is protection of the public health, but of course in China a dog is also a non-productive consumer which the society declines to indulge.

The anti-dog policy is related in philosophy to the famous "Four Pests" campaign instituted after 1949. This campaign was an effort to exterminate flies, rats, mosquitoes and sparrows on the ground that these four pests jeopardized the public health and robbed the country of food. It is well to remember, particularly when we consider the hurdles we ourselves face in improving public sanitation, that before 1949 Chinese cities were notorious for their filth. Communicable disease was spread by rats, flies and mosquitoes, and large quantities of crops stored wheat, rice and other foodstuffs were consumed by rats and sparrows. Today, as we witnessed, the streets are almost spotlessly clean, flies have almost totally disappeared, and we were assured that crop and grain storage levels prove that rats and sparrows have almost vanished. The campaign continues today; many of us noticed young boys and girls who, going on about play or other business, held a fly swatter over their shoulders, at the ready. Another example of the pollution consciousness of Chinese, of course, are the white cloth face masks one sees covering the nose and mouths of cyclists and pedestrians.

EDUCATION AND CULTURE

It was evident during our visit that cultural and educational life in China continues to feel the effects of the Great Proletarian Cultural Revolution which convulsed the country between 1966 and 1969. "Struggle, criticism and transformation" is still in progress in evolving policy for the arts and schools.

We attended two cultural performances in Manchuria and Canton, saw a film version of

The Peking Revolutionary Opera, "The White Haired Girl." We also visited two kindergartens, two secondary (Middle) schools, and one university. It appeared in these visits that cultural and educational life is being reestablished in China on the basis of Chairman Mao's injunction that literature and art and all intellectual life must be related to the needs and interests of workers, peasants, and soldiers. Mao Tse-tung's "Talks at the Yenan Forum on Literature and Art," published thirty years ago, was being widely studied at the time of our visit as a source of guidelines for literary and artistic expression.

On the stage and in films new or revised versions of productions of the Peking Revolutionary Opera combine a few traditional elements such as sword dances, with music that is vaguely reminiscent of Tschaikowsky and some first-rate ballet sequences to present highly moralistic and patriotic stories of peasant or workers heroes and heroines who are guided by Mao Tse-tung's thought to overcome the schemings of "class enemies," "despotic landlords," or Japanese invaders.

On the radio we heard little traditional music, with most musical programs restricted to excerpts from Peking Opera and a limited number of patriotic songs usually embodying specific references to Chairman Mao.

Foreign language bookstores contained only Marxist-Leninist ideological works and we were told that literary production had ceased during the Cultural Revolution. The classes in Chinese literature that we observed were devoted to the study of Mao's "Talks to the Yenan Forum" or to ancient classics.

We saw no one carrying or reading the Red Book of Quotations from Chairman Mao, but reference was often made to the application of Chairman Mao's thought to the solution of practical problems. Slogans or quotations from Mao writings appear on billboards, on the front of buildings, and on special red concrete slabs erected at the entrances to courtyards, factories, and agricultural communes.

In a noticeable contrast to contemporary America was the obvious de-emphasis of sex, not only because of the homogeneity of clothing but also because the official policy views romantic attachments as an interference and distraction from dedication to one's work. The contrast with contemporary America was even more striking when we asked a group of university students in Canton whether they had any "special" girl friends. They replied, "We are too young for that!" When we asked their ages, they turned out to be 21 to 23 years old. Official policy discourages marriage before the age of 25.

What was left of organized religion seems to have been a casualty of the Cultural Revolution's campaign against the "Four Olds"—old thinking, old habits, old customs, and old traditions—and we are told that the Red Guards had raided and closed the churches after arms were discovered in a church and evidence produced that a churchman was a spy. When we asked to attend church services in Shanghai we were told that no churches were functioning. We saw several closed churches in Peking and Canton, including the former Roman Catholic Cathedral which was said to be used as an office now. "The White Haired Girl" contained elements linking Buddhism to the rule of landlords in pre-1949 China.

The Government is using education and culture to create a unified people. To this end, while songs and dances from border areas and ethnic minorities are presented, all instruction as well as all stage productions are in Mandarin, even in the Cantonese-speaking areas of southern China. At a cultural production in Canton, for example, we were puzzled to see the Chinese characters for the words being sung on the stage flashed on the wall until we realized that nearly everyone in the audience was using them to understand what was being said. The written language is common, but spoken Cantonese and Mandarin are mutually incomprehensible. Some members of our party visited the Institute of Minorities in Peking where future leaders from such border areas as Tibet, Mongolia, and Hainan were being imbued with national values before returning to their native areas.

Since the Cultural Revolution, during which the universities and most secondary schools ceased instruction, the Chinese educational system has been reorganized and focused on the application of learning to the problems of peasants, workers, and soldiers—and on the direct exposure of students and teachers to those problems. Schooling has also been shortened and Mao Tse-tung's writings receive great emphasis at all levels.

The Chinese educational system begins with nurseries which are available to working mothers in the cities who have no relatives to care for their babies, from the time the children are three months old until the age of 3. The next stage is the nursery school for children from 3 to 7. We visited two such schools, one of which boarded children from six days a week at a cost of about $5 a month. Like the Children's Palaces in Shanghai and Peking (massive playground complexes in which thousands of children participate) they use music, art, dancing and sports to emphasize patriotic themes and the thought of Mao Tse-tung. We did not visit any primary schools but were told that primary schooling lasts six years.

We did visit two secondary schools (Middle Schools), one on a commune and the other in an urban industrial area. Where secondary schooling had before the Cultural Revolution been divided into two three-year sections with many students discontinuing their education at the end of what we would call junior high school, all students are expected to complete schooling which has now been shortened to three or four years. This is followed by two years of work in the factories or fields. The students in the urban secondary school we visited were older than they would normally be at that grade level, because their school was closed for two years during the Cultural Revolution. Their curriculum has been revised to include such subjects as agronomy (in an urban area), two hours a week of political studies, work in a shop attached to a nearby factory, and two months a year (one in summer and one in winter) of work in factories accompanied by their teachers. Classes are held from 8 a.m. until 4:30 p.m. six days a week so that the class time is not shortened excessively. We were particularly impressed by the level of the ninth grade English class which we observed, which was conducted entirely in that language and in which the students demonstrated a high level of proficiency. Despite the fact that Shenyang is near the Soviet Union we were told that half the students chose English as their language elective, the other half choosing Russian. All classes had a high level of political content. Art classes sketched heroes and heroines from the Revolutionary Opera and music classes sang songs of the People's Liberation Army or in praise of Mao Tse-tung.

The university we visited, Sun Yat-sen in Canton, was less impressive. The Cultural Revolution seemed to have done serious damage to higher education. All universities were closed down and professors sent to work for periods of six months to two years in factories or fields. Courses have been reduced in length from 5–6 years to 2–3 years, and small entering classes are composed of those who have spent at least two years in factories or fields or the army after Middle School, and who are recommended by their organizations. At Sun Yat-sen, only one class has been admitted since the Cultural Revolution, that one in December 1970. It is comprised of 550 students. Of that group, 90% are the children of peasants or workers and most of the rest came from the army. 20% are women. Half are members of the Communist Party and an additional 40% belong to the Communist Youth League (the Chinese equivalent of the Russian Komsomol). A new class of 800 students is about to enter and we were told that the percentage of party activists is equally high among them. The natural sciences library at the university appeared well-stocked with scientific books in English, French, German and Russian, as well as in Chinese, and a large variety of animal, bird and insect specimens were displayed in a university museum. It was a disappointment for us to be told here, however, as at other educational institutions we visited, that courses in political subjects were not in progress and therefore could not be visited.

We were told that the emphasis in instruction is placed upon self-study and group discussion, though we saw traditional style teaching being carried out. Despite press reports to the contrary, we were told that entrance examinations are being used in addition to secondary school records and recommendations, but a superficial impression was that the academic level of the university was not high. It should be noted that much of the technical education is carried out in specialized institutes which we did not see. The students received para-military training from the university and the army is represented here as elsewhere on a Revolutionary Committee which has run the university since the Cultural Revolution, and is supposed to include representatives of mass organizations as well. In the latter category we learned that each academic department has a worker assigned to it who is to advise the professors on the practical application of their teaching.

We interviewed a group of students in the dormitory where eight sleep in a large room on a double-deck bunks and study together at a large table as we entered, they were studying "Mao's Talks at the Yenan Forum." They told us that they were students of Chinese literature and were preparing to be literary critics. On a typical day they arise at 6 a.m., like everyone else in China it seemed, do calisthenics and eat breakfast. This is followed by classes from 7:30 until 11:30. After the usual noon break for lunch and a nap, they resume classes from 3 until 5:30 p.m. This is followed by calisthenics and dinner, study from 7:00 until 9:30 and lights out at 10 p.m.

A new element in Chinese education since the Cultural Revolution is a vast network of May 7th Cadre Schools for the education and re-education of people in positions of responsibilities. Party, governmental, organizational, and intellectual leaders are supposed to attend these schools for periods of 1–6 months (we found at least one instance of a person who had been in such a school for three years. These schools are named for the date of the statement by Mao creating such schools at the beginning of the Cultural Revolution and are located on agricultural communes or, less often, in factories. The May 7th schools combine manual labor with the study of the works of Mao, and intensive discussion is given to the application of his thoughts to practical problems, in particular those facing peasants and workers. Mornings are spent in the fields and afternoons are devoted to study and discussion of Mao's principal works, especially "On Practice," "On Contradictions," and "On the Correct Handling of Contradictions among the People." There is also study of extracts from the works of Marx, Engels, Lenin, and Stalin pictures of whom we saw in the back of classrooms while the ubiquitous picture of Mao was hung in front. Sometimes workers and peasants are interviewed or conduct class so that the "cadres" can learn about their problems. The schools operate to raise the level of political consciousness, to develop a sense of rededication to the ideals and thoughts of Mao, to prevent "elitism" among the middle level leadership and to re-educate, sometimes for rather long periods, those who appear to be inclined toward "revisionism." Here as elsewhere group pressures and psychological techniques are used which are not too far removed from those used by religious groups in the West.

It is understood that the leaders will return to those schools from time to time, but it was assumed by Chinese with whom we talked that this would not be enough to prevent the emergence of "revisionism." In the future further Cultural Revolutions but "in a different form" are seen as necessary. Whether they can be carried out without extremism and the adverse economic effects of the convulsion of 1966–69 no one would care to speculate.

FAMILY LIFE

It is well known that few societies have as great a traditional reverence for family ties as the Chinese. From our observations, there are serious strains on this tradition in China today, and they are primarily the result of the work patterns of the parents.

Today in China women enjoy, if that is the correct term, an equality with men. This means that they are politically and socially equal with men. They serve as members and officers of Revolutionary Committees from the neighborhood units upward. They also work side by side with men in the farms and factories of China. Only in the heaviest work at the most demanding jobs in the iron and steel plants at Anshan were women absent. But even there, in the hot, choking, dark and noisy caverns of industry, women could be found operating heavy equipment.

In the showcase communes and factories to which we were taken, we found no household where the wife and mother did not work at some job outside the home. We therefore assume not only that this is a widespread practice, but also that the employment of both parents is a practice favored and encouraged by the State.

As a consequence of this, children are in State care facilities for the most important years of their lives. From a physical care standpoint, these facilities for infants and pre-schoolers seem highly developed. The children seemed well-clothed, happy and sturdy. And the caretaker-to-child ratio seemed generally to be a very favorable four or five children to one adult. This is possible, of course, where the labor force is very large.

Many of these facilities are designed to care for children on a weekly basis, allowing the child to be with its parents only one day a week, since there is a six-day work week throughout the country. In other cases, children are deposited with the day care center at bed time and then picked up the following evening after work. Still other facilities, for older children, are set up to occupy and train youngsters after school.

In spite of the efficiency of this approach to child care, there are obvious grave implications. First of all, parents see their children far too infrequently. We sensed a certain sadness about this even among those parents who most vigorously praised the system. Second, the children at their most impressionable years are vulnerable subjects for active political indoctrination. "As the twig is bent," the saying goes, "so grows the tree." We witnessed the political education of children not yet three years old. In song and dance and art children are taught to give unquestioning gratitude and praise to the State and its leaders, to the army, the workers and peasants.

It is true that where grandparents live at home the children are often in their care. But the direction of State policy seems to be to employ all those who are able to work, and the upbringing of the children therefore falls to the State.

HEALTH AND MEDICAL CARE

People of all ages seemed well nourished and healthy. Most seemed to be involved in strenuous farm or city labor, but seemed to enjoy and thrive on hard work. Dental care, however, seemed deficient, and the high incidence of cigarette smoking suggested a general lack of knowledge about the potential harmful effects.

In understanding medical care and delivery the key word is *relative;* that is, relative to what it had been prior to 1949. With that in mind and not comparing it to Western standards, a better conception of their progress in health and medical care can be understood.

During the Great Proletarian Cultural Revolution, medical schools were closed and medical journals stopped printing. Since that time the concept of "Serve The People" has favored medical education and health care delivery so as to insure quantity, perhaps at the expense of quality. The main changes that have occurred are these:

Shortened length of medical school from 6 years to 3 years; paring the curriculum from 36 courses to 15.

The graduates are not given a diploma and must work in the community for 5 years before being considered for specialty training.

Students must spend time in the communities obtaining experience and training "Barefoot Doctors."

Students are selected for the study of medicine, after high school and 2 years of work, by their fellow commune or factory workers. Selection is based on their political motivation, intellect and proven willingness to work.

As at all levels of Chinese society, periodic physical work in the commune is demanded of medical students.

Former specialists are the backbone of the medical faculties.

Students must be single and may not marry.

Doctors start out at a salary of 32 yuan per month ($14.40), and may advance through 8 levels of pay based on political motivation, quality and quantity of work.

The entire post Cultural Revolution university program is in an experimental stage, since no class has yet graduated from this new program.

Nurses are trained only in hospitals. They have an 18-month training period, make $9.50 per month, and must also serve in local communities.

Barefoot Doctors are the backbone of the medical care system since 80% of the population is rural and agricultural. Their training period is only about 2 months, though it is updated weekly by additional one day training sessions in commune hospitals and periodically by an extended stay in a more advanced center. Barefoot Doctors are also selected by the commune.

Each factory, commune or farm has medical care readily available, albeit minimal at times. Each branch of medical training and care is a mixture of Western and traditional. In many respects this whole system resembles the concept of regional medical programs in this country.

Acupuncture, the remarkable technique for operation without anesthesia, was performed before Christ was born and we saw gold acupuncture needles dating back to 133 B.C. Its usefulness as a form of treatment remains uncertain, in the opinion of the American physician who accompanied our group. However the Chinese use it widely for therapeutic relief of headache, gall bladder disease, peptic ulcer, heart disease, deafness and a variety of other ills. We observed three major surgical operations—appendectomy, removal of an ovarian cyst and thyroid tumor—and three tooth extractions, performed using acupuncture anesthesia.

Acupuncture anesthesia, which was begun in late 50's appears to be a highly significant medical advance. Having seen it used for thyroid, ovarian, appendicidal and dental surgery, and having seen the patients, talking, drinking tea, eating orange slices during the procedure, and having observed the patients hop off the operating table at the conclusion of surgery impressed even the most doubting cynic. The technique of needle insertion is said to vary with each type case, but the needles may be stimulated electrically (6–9 volt DC at 90–120 cycles/min) or by up and down rotatory manual stimulation. Even chest surgery is possible without endotracheal tube by first introducing an artificial pneumotherax prior to surgery on the lung to be operated. The obvious advantages to acupuncture anethesia are:

Safety—no depressant anesthetics or liver toxins are needed.

Anesthesia can be given inside the operating room, thereby shortening the operation;

No recovery room time is needed—the patient has reacted at the end of surgery;

Less training and skill are needed by the anesthetist;

The patient is able to cooperate during surgery—i.e. talk during thyroid surgery (vocal cord), move during brain surgery and so forth.

There appeared to be less bleeding.

A commune doctor demonstrated the acupuncture technique on the hand of our delegation physician and the hand was anesthesized within 15–20 seconds. We understand that this form of anesthesia is now being used in at least three U.S. hospitals. Precise needle placement doesn't seem to matter for the anesthesia effect to be complete. The jamming of pain circuit transmission by needle—electric stimuli seems to be the most accepted theory, and we believe it will be a widely used technique in the United States before very long.

The hospitals themselves were clean and orderly, adequately staffed, not over crowded and properly located. By our standards their equipment was very antiquated—this observation includes operating room, X-ray, lab, wards, delivery, central supply, and so on. A surprisingly large number of the surgeons were women.

The Chinese diet, which consists of far lower quantities of animal fats and sugar than our own, combined with the exercise the Chinese get as they bike, walk and work at manual labor on the average far more than we do every day, has helped produce a population which is lean and strong in appearance.

ITINERARY

June 26

10:20 a.m.—Arrivals in Shanghai. Luncheon meeting with municipal and provincial officials.

1:20 p.m.—Departure for Peking.

4:00 p.m.—Arrival in Peking.

7:00 p.m.—Dinner hosted by the Chinese People's Institute of Foreign Affairs (CPIFA) and meeting with CPIFA officials.

June 27

Morning.—Palace Museum and Exhibition of Excavated Historical Relics.

Afternoon.—(1) Meeting with Mr. Chiao Kuan-hua, Vice Minister of Foreign Affairs; (2) The Central Institute for Nationalities;

(3) The Summer Palace; and (4) The Peking Zoo.

Evening.—Sports Performances.

June 28

Morning—(1) No. 3 Hospital of Peking Medical College (acupuncture anesthesia); (2) The Red Star People's Commune.

Afternoon.—(1) The Peking Arts and Crafts Factory; (2) The Peking Dongfanghong Automobile Plant; (3) Meeting with representatives of the China Council for the Promotion of International Trade.

Evening.—Meeting and Dinner with Premier Chou En-lai.

June 29

Morning and Afternoon.—The Great Wall and Ting Ling Museum.

8:00 p.m.—Departure for Shenyang.

9:30 p.m.—Arrival in Shenyang Meeting with municipal and provincial officials.

June 30

Morning.—Departure for Anshan—high tension live-line demonstration (on the way).

Afternoon.—Anshan Iron & Steel Works.

Evening.—Acrobatics Performances.

July 1

Morning.—Return to Shenyang—Rice-growing People's Commune (on the way).

Afternoon.—(1) Transformer Factory; (2) Middle school and Kindergarten; (3) School for Deaf and Mute and Kindergarten.

Evening.—Dinner with local officials.

July 2

8:30 a.m.—Return to Shanghai prevented due to adverse weather; aircraft diverted to Peking.

July 3

Morning.—Departure for Canton.

Afternoon.—Tour of Canton. Meetings with municipal and provincial officials.

Evening.—Dinner with local leaders.

July 4

Morning.—Sun Yat-sen University and Medical College.

Afternoon.—Workers Housing Complex, Middle School, Children's Palace.

Evening.—Cultural Performance by Canton Troupe; Fourth of July Dinner for CPIFA, hosted by Mr. Boggs and Mr. Ford.

July 5

Morning.—Departure for Hong Kong by rail.

HOSTS AND HOST ORGANIZATION

Our formal host in China was the Chinese People's Institute of Foreign Affairs (CPIFA). This is a quasi-governmental organization used to extend hospitality to persons, such as our party, from nations with which China does not have diplomatic relations. Premier Chou En-lai is Honorary Chairman of the CPIFA.

The gracious hospitality provided by the CPIFA included a remarkable successful effort to schedule in a very short time a wide variety of experiences in diverse places according to our interests and desires. As anyone who has had a part in arranging visits of this sort is aware, a high degree of skill and patience is essential, and our hosts never failed us. Our safety was assured with the great care of our drivers and, particularly, with the skill of our aircraft crew. Finally, of course, no account of our journey would be complete without testimonial to the extraordinary cuisine whose variety and excellence greeted us three times daily.

We would like to express our warmest thanks to the CPIFA, particularly to Chang Hsi-jo, President of the CPIFA, to Chou Pei-yuan, Vice President of the CPIFA, to Chou Ch'iu-yeh, Secretary General of the CPIFA, who accompanied us on our journey, to the CPIFA provincial and municipal representatives in the areas we visited, to our drivers, guides and guest-house staffs, and most especially to the uniformly friendly, helpful and competent young men and women who were assigned to us as interpreters. The warm feeling we developed for the people of China is in no small measure attributable to the unfailing good humor and uncommon courtesy of these individuals.

NEW CHINA NEWS AGENCY DISPATCHES

The following official dispatches were released by the New China News Agency in connection with our visit:

PEKING BANQUET WELCOMES HOUSE LEADERS BOGGS AND FORD

(S261946 Peking NCNA International Service in English 1935 GMT 26 Jun 72 B.)

PEKING, June 26, 1972 (Hsinhua).—The Chinese People's Institute of Foreign Affairs gave a banquet here this evening for Hale Boggs, Democratic leader of the U.S. House of Representatives, and Mrs. Boggs, and Gerald R. Ford, Republican leader of the House, and Mrs. Ford.

Among the guests at the banquet were members of their party: William A. Brown, Freeman Cary, Bryce Marlow, Robert Hartmann, Gary Hymel, Harry Lee, Frank Meyer, Paul A. Miltich, Day O. Mount, Paul Sigmund and Eugene A. Theroux.

Present were Kuo Mo-jo, Vice-Chairman of the Standing Committee of the National People's Congress; Chang Hsi-jo, President of the Chinese People's Institute of Foreign Affairs; Chiao Kuan-hua, Vice Foreign Minister; and Chou Pei-yuan, Vice-President of the Institute. Before the banquet, they met Hale Boggs and Gerald Ford and their wives and the other American guests and had a friendly talk with them.

Present at the banquet and meeting were Chou Wen-chin, Assistant Minister of Foreign Affairs, Ju Yu-chih and Lin Chiao-chih, members of the Standing Committee of the National People's Congress, and leading members of organizations concerned, including Chou Chiu-yeh, Yu Li-chun, Wang Ti-chen, Wang Tung, Wang Hsiao-i, Hu Hung-fan, Chien Ta-tung and Ma Yu-chen.

The American guests arrived here by air this afternoon on a visit to China at the invitation of the Chinese People's Institute of Foreign Affairs. They were met at the airport by Chou Pei-yuan and others. Chou Chiu-yeh, Secretary General of the host organization, had made a special trip to Shanghai to meet the American guests and accompanied them to Peking.

During their halt in Shanghai, the American guests were greeted at the airport by Geng Kuo-chu, council member of the host oragnization.

PREMIER CHOU EN-LAI HOSTS U.S. LEADERS

(Peking NCNA International Service in English 2047 GMT 28 Jun 72 B.)

PEKING, June 28, 1972 (Hsinhua).—Chou En-lai, premier of the State Council, Chang Hsi-jo, president of the Chinese People's Institute of Foreign Affairs, and Chiao Kuan-hua, vice-foreign minister, this evening hosted a dinner for Hale Boggs, Democratic leader of the U.S. House of Representatives, and Mrs. Boggs, and Gerald Ford, Republican House leader, and Mrs. Ford, and their party.

The members of their party attending the dinner were: William A. Brown, Freeman Cary, Bryce Harlow, Robert Hartmann, Gary Hymel, Harry Lee, Frank Moyer, Paul A. Miltich, Day O. Mount, Paul Sigmund, and Eugene A. Theroux.

Present at the banquet were Chou En-lai, vice-president of the Chinese People's Institute of Foreign Affairs, and leading members and staff members of organizations concerned Chou Chiu-yeh, Wang Ti-cheng, Wang Tung, Hu Hung-fan, Ma Yu-chen, Chi Chao-chu, Tzu Chung-yun and Chao Ching-tien.

After the banquet, Premier Chou En-lai and others met the U.S. House leaders and their party.

U.S. HOUSE LEADERS LEAVE PEKING FOR TOUR OF OTHER AREAS

(Peking NCNA International Service in English 1651 GMT 29 Jun 72 B.)

PEKING, June 29, 1972 (Hshinhua).—Hale Boggs, Democratic leader of the U.S. House of Representatives, and Mrs. Boggs, and Gerald Ford, Republican House leader, and Mrs. Ford, and their party left here by air this evening on a visit to other parts of China in the company of Chou chiu-yeh, secretary-general of the Chinese People's Institute of Foreign Affairs.

Seeing them off at the airport were Chou Pei-yuan, vice-president of the Chinese People's Institute of Foreign Affairs, and his wife; Hu Yu-chih, member of the standing committee of the national people's congress; and leading members of organizations concerned Wang Tung and Wang Tsiao-i.

BOGGS, FORD END VISIT, LEAVE CANTON FOR HOME

Peking NCNA International Service in English 1508 GMT 5 Jul 72 B.)

CANTON, July 5, 1972 (Hsinhua).—Hale Boggs, Democratic leader of the U.S. House of Representatives, and Mrs. Boggs, and Gerald Ford, and their party left here for home by train today at the end of a visit to China.

They were seen off at the railway station by Chou Chiu-yeh, secretary general, and Shao Yun-sheng, council member, of the Chinese People's Institute of Foreign Affairs; Kao Chao-lan, professor of Chungshan University; and leading members of Chinese organizations concerned, including Hu Hung-fan, Tsu Kuo-chen and Cheng Chien.

The U.S. guests arrived in Canton on the morning of July 3 after touring Peking, Shenyang and Anshan. They were honoured at a banquet given that evening by Wang Shou-tao, vice-chairman of the Kwangtung Provincial Revolutionary Committee.

While in Canton, the American guests visited a factory, a school and a children's palace and went sightseeing in the city. Hale Boggs and Mrs. Boggs, and Gerald Ford and Mrs. Ford gave a reciprocal banquet yesterday evening.

COMPOSITION OF THE DELEGATION

Majority Leader Hale Boggs and Mrs. Boggs.

Minority Leader Gerald R. Ford and Mrs. Ford.

Mr. William A. Brown, Deputy Director, Office of Asian Communist Affairs, Department of State.

Dr. Freeman H. Cary, Assistant Attending Physician to the Congress.

Mr. Bryce N. Harlow, Business Executive, former Counselor to the President, Aide to Mr. Ford.

Mr. Robert T. Hartman, Legislative Assistant to Mr. Ford.

Mr. Gary G. Hymel, Administrative Assistant to Mr. Boggs.

Honorable Harry Lee, United States Magistrate, Eastern District of Louisiana, Aide to Mr. Boggs.

Mr. Frank Meyer, Administrative Assistant to Mr. Ford.

Mr. Paul A. Miltich, Press Secretary to Mr. Ford.

Mr. Day O. Mount, Administrative Officer, Department of State.

Dr. Paul Sigmund, Professor of Political Science, Princeton University, Aide to Mr. Boggs.

Eugene A. Theroux, Esq., Special Council to the Joint Economic Committee, Aide to Mr. Boggs.

Mr. BOGGS. Mr. Speaker, I yield back the remainder of my time.

DISHONORING A GOOD NAME

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New Hampshire (Mr. Wyman) is recognized for 10 minutes.

Mr. WYMAN. Mr. Speaker, former Supreme Court Justice Tom Clark is a a good man. His contributions to this country on the judiciary and in the Bar Association have been substantial. His life has been dedicated to public service and he has earned public confidence and respect because of his record.

Not so with his errant son Ramsey, who, trading on his father's name, which was the main reason for his appointment to the high position of U.S. Attorney General some years back, now dishonors this name and disgraces his country as well in one fell swoop by knowingly giving aid and comfort to the Communist forces in North Vietnam.

There can be no question of Ramsey Clark's calculated intent to do just this. He had to design to travel to North Vietnam. He had to arrange the conferences with the Communist leaders there. He had to plan what he would say and reflect on it at length during the long trip home. And what he said by any standard was a mouthful of subversive garbage at a time when this country's Government is trying to end the war through negotiations with these same Communists.

Ramsey Clark said in Vietnam, among other things, that:

> I do know that in human terms the bombing I've seen is without justification no matter what the cause and purpose.

He also said in San Francisco on his return that:

> If we'd elect George McGovern President instead of President Nixon that they'd release some U.S. prisoners on January 20 and the remainder three months later!

How does he know this?

Because, he said, the Communists told him so.

Why did they tell him so?

Because they know McGovern has publicly committed himself to a policy of begging, not fighting, and to a massive reduction of existing U.S. military and naval capabilities if elected President.

Clark knows this too. At least he is not dumb. He is a former Cabinet officer, who knows exactly what he is doing and saying.

All of which makes the infamy of his conduct and statements all the greater.

It is a personal tragedy for Tom Clark, but it is also a truly disgusting exhibition of subversion in action—not because of criticism of the war—but because of actions deliberately taken and words deliberately chosen to encourage the enemy to continue to hold out on the chance McGovern may be elected in which event they would get what they want in South Vietnam without having to negotiate any commitments whatever.

Apparently it is to no avail to suggest that Ramsey Clark ought to be ashamed of himself for he is unashamed, unabashedly so.

This man's conduct is detrimental to negotiations for prisoner release and an end to the war that have been officially underway for many, many months now and he knows it.

It is too bad that Ramsey Clark felt he had to return to America at all, for the record of much of his public life demonstrates that in many respects he is working to divide and polarize this great country, whatever may be his perverted concept of a world revolution for a new social order.

His recent performance in Hanoi and San Francisco is a shocking, shameful, shabby exhibition of deliberate subversion whatever may be the motive. Combined with his subsequent public appeal for the election of a particular candidate for public office in November, it is exposed in an even more contemptible light as a politically motivated bit of grandstanding by an ex-Cabinet officer who perhaps aims for another Cabinet post should his man win election in November.

But trifling with the national security, undermining the national morale, helping the enemy's morale, and delaying an end to the war through official negotiations is a pretty high price to pay for a shot at another Cabinet post.

DISASTER RELIEF APPROPRIATIONS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Pennsylvania (Mr. Heinz) is recognized for 5 minutes.

Mr. HEINZ. Mr. Speaker, I rise to express my strong support of H.R. 16254. This bill, the supplemental appropriation for disaster relief will provide the assistance which is desperately needed by the flood victims of Hurricane Agnes. I am hopeful that the $1.5 billion appropriated by this legislation will help to relieve the despair which the victims of this disaster are experiencing. Although the passage of this legislation provides visible proof of Congress, deep concern for the welfare of the disaster victims, it does not relieve the Congress of its responsibility to safeguard the lives and property of the citizens of this country. Today's unanimous vote for this bill will help relieve the present suffering, but let us not forget that we must also take action to protect our citizens from future disasters.

This needed protection can only be guaranteed through the establishment of comprehensive statewide disaster preparedness plans. H.R. 16312, the Safe States Act of 1972, which I introduced on August 10, 1972 provides for the mandatory development of disaster preparedness plans which must be in compliance with minimum Federal standards formulated by the Office of Emergency Preparedness. This bill also provides that any State which does not meet these standards will not be eligible for any Federal disaster relief assistance. I feel that the stringent measures contained in this legislation are justified. The passage of H.R. 16254 will bring the total of new appropriations for disaster relief to $2 billion for fiscal year 1973. Therefore I believe that Congress is justified in insisting that needless loss of life and property damage does not occur as a result of a lack of preparedness on the part of the States. I urge my colleagues to review the provisions of the Safe State Act on page 27683 of the Congressional Record and to assist in bringing about the speedy enactment of this legislation.

LAIRD WITHHOLDS "REALISTIC" PRICE ON LITTON SHIPBUILDING PROGRAM

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Wisconsin (Mr. Aspin) is recognized for 5 minutes.

Mr. ASPIN. Mr. Speaker, Defense Secretary Melvin Laird is insisting that the Nixon administration will hold inflation below 3 percent this year and has forced the Navy to reduce by more than $90 million the estimated cost of Litton Industries' 30-ship DD-963 destroyer program.

Mr. Laird is guilty of using the make-believe dreams of success of the President's so-called fight against inflation as an excuse to withhold realistic estimates of the cost of this $2.1 billion destroyer program from the Congress.

Mr. Laird's silly and meaningless maneuver is outlined in a General Accounting Office report which I am publicly releasing today.

It should be noted, Mr. Speaker, that the wholesale price index is expected to rise 5.2 percent in 1972 and that wages in the shipbuilding industry may rise as much as 15 percent. But Mr. Laird insists that the Nixon administration will hold inflation below 3 percent.

Claiming that inflation will drop below 3 percent is a meaningless gesture that distorts the real cost of the program, particularly since both the contractor and the Navy agree that the cost will be at least $90 million higher than current estimates.

Litton Industries, the contractor, currently predicts that it will cost the Government $438 million in inflation charges to build the 30 high-speed destroyers that will be used to escort American attack aircraft carriers. But the Navy is being forced to keep its estimate down to $346.2 million and this is the figure officially reported to Congress.

It is this lack of realism in estimating costs that eventually results in billions of dollars of cost overruns which were recently reported by the GAO in a report on 77 major weapons systems.

In 1971 the Government paid Litton Industries more than $21 million in inflation charges despite the Navy's prediction that the cost would be less than $19 million. These inflation payments are based on Bureau of Labor Statistics' indexes which theoretically reflect increased costs in labor and material in a particular industry.

Mr. Speaker, it is becoming increasingly clear that this destroyer program is a disaster which probably will cost the taxpayers hundreds of millions of dollars in cost overruns.

Fortunately the Congress this year plans to cut more than $330 million from the Navy's $610-million request for seven of the 30 DD-963 destroyers. It is expected that the Navy will late this year or early next year decide whether to cancel the program or not.

"MANNY" RIDGELL DIES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Florida (Mr. PEPPER) is recognized for 5 minutes.

Mr. PEPPER. Mr. Speaker, I was deeply saddened to learn of the death of A. Emanuel "Manny" Ridgell last Sunday evening. Manny, serving as House Office Buildings Superintendent, was one of the Hill's most trusted and admired officials. Few men were as dedicated to their jobs as Manny, and it was his dedication to his job that made our jobs that much easier.

Manny was working on the Hill for 16 years before he received his appointment as superintendent. In 1932, at the age of 20, he began as a House messenger. He steadily moved up through the ranks and in 1947 he was appointed assistant superintendent, 1 year before he was promoted to superintendent. His career was marked by an outstanding performance of his duties and outstanding relationships with the Members. Besides having the responsibility of assigning office space to the Members, Manny's duties involved the maintenance, operation, and mechanical care of the House Office Buildings and the subway to the Capitol. In his 24 years on the job, he gained the respect of all the Members for his honesty and intelligence.

Manny was a model American—a good family man, a religious and hardworking person who sought to serve others. We who have worked with Manny over the years know of his quick wit and willingness to use it. In his sometimes thankless job of handling the whims of 436 Congressmen, this was a necessary element for maintaining an even and pleasant personality.

Mr. Speaker, I extend my deepest sympathy to the surviving members of his family—his wife, Mary, their daughter Sister Mary Ann, and their sons Charles and Father John Ridgell—and to his fellow citizens to whom he meant so much and who he so nobly served.

SOUTH AFRICA AND THE GENERAL AGREEMENT ON TARIFFS AND TRADE (GATT)

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Michigan (Mr. DIGGS) is recognized for 5 minutes.

Mr. DIGGS. Mr. Speaker, yesterday I wrote to the State Department about South Africa's persistent violation of the rules of GATT in maintaining and tightening its import quotas against foreign goods. I pointed out that their claim to having balance of payments problems was not justified, in view of the healthy surplus of the first half of 1972, and the use of this surplus to withhold South African gold from the free market, driving up the speculative price.

South Africa is already under great pressure from the international community, and I am concerned that the U.S. delegation at GATT should do nothing to defend South Africa. If it did, this would create a dangerous precedent for many other countries, which can claim to be at least as much in need of concessions as South Africa.

I also asked the State Department for confirmation that the United States will continue to support the International Court of Justice's opinion on South Africa's illegal occupation of Namibia, as it relates to South Africa's claim to represent Namibia in an international organization such as GATT. There, it benefits from most favored nation treatment for all exports from the international territory of Namibia. I pointed out that this is illegal and have asked to be informed on what action the U.S. delegation is taking to challenge South Africa on these grounds and to end its illegal representation of Namibia in GATT.

I wish to insert for the benefit of my colleagues the text of my letter to the State Department:

HOUSE OF REPRESENTATIVES,
Washington, D.C., August 14, 1972.

Hon. WILLIAM P. ROGERS,
Secretary of State,
Washington, D.C.

DEAR MR. SECRETARY: I wish to express my concern at the persistent violation of the rules of the General Agreement on Tariffs and Trade (GATT) by the Republic of South Africa. For a number of years, South Africa has been maintaining import quotas, as well as a range of other non-tariff barriers, which contravene the letter and the spirit of GATT. Of particular concern to the auto industry are the "local content" regulations for motor vehicles, which in effect have deprived the industry here of the South African export market, and forced the companies concerned to invest in assembly plants inside South Africa, where they are taking advantage of labor conditions that would be completely intolerable in the U.S. context. This is just one example of an important U.S. export item being excluded from the South African market, with a consequent loss of the balance of payments benefits, and of valuable jobs in certain industries.

Although at one time South Africa had exemption under Article XII of the General Agreement, which allowed the excuse of balance of payments difficulties to be used to justify import quotas, this defense had to be abandoned at the beginning of 1970. There was strong pressure on South Africa to dismantle its controls, and bilateral negotiations with the major trading partners were undertaken. However, it seems that South Africa was not prepared to offer any *quid pro quo* for the higher import tariffs that it was seeking, and the negotiations seems to have resulted in deadlock. Far from attempting to come to terms with the requirements of its trading partners under the Agreement, in November, 1971, South Africa imposed a very stringent tightening of the existing import quotas. This is a unilateral action which we cannot afford to condone, since it openly defies the understood norms of international trade; strongly inhibits U.S. exports to South Africa, especially of manufactured items; and provides a bad example which, if widely followed, would do great damage to the flow of international trade at a particularly difficult time for the U.S. balance of payments.

Although many members of GATT are from time to time in breach of the General Agreement, South Africa is a particularly persistent offender, and I am anxious that all appropriate pressures should be brought to bear on the country. I understand that the issue of its import restrictions, and application for balance of payments justification under Article XII, are under active consideration at the moment, and I should like to have an assurance from you that there will be no effort on the part of the U.S. delegation to reduce the already considerable pressure on South Africa, when its import restrictions come before the annual meeting in September.

Since the United States is a member of the balance of payments committee of GATT, this issue is clearly one that must be faced without equivocation. It would be illogical and inconsistent to allow South Africa to defy the rules, since the United States has recently benefited from the application of GATT sanctions. When the European Economic Community imposed obstacles on the import of chickens from the U.S., in line with its protectionist Common Agricultural Policy, the U.S. pressed hard within GATT for some redress. It obtained this, through the appropriate GATT processes, in the form of compensatory restrictions on certain items of European origin. In the case of the African states associated with the EEC through the Yaoundé Convention, the U.S. has made loud protests about the "reserve preferences" allocated to European goods by the African states, in return for the concessions which they have for their own products in the European market. This issue has been stressed out of all proportion to our concern about South Africa's violation of the principles of international trade.

The immediate issue is, of course, whether or not South Africa qualifies for exemption from the normal regulations because of balance of payments difficulties. There has already been strong objection to this claim by a number of countries, and the South Africans appear to be coming under increasing pressure on this. They have even announced their intention of abandoning this line. Looking at the facts of the situation, this is understandable. At the same time as South Africa is contending within GATT that balance of payments difficulties justify stringent import restrictions, it is using the healthy balance of payments which it has had since the beginning of this year in order to withhold newly-mined gold from the free market, thus driving the price even higher—to the detriment of international monetary arrangements, and particularly to the stability of the dollar. The U.S. Government cannot accept South Africa's use of a balance of payments surplus, within the context of the International Monetary Fund two-tier price system and its 1969 agreement with South Africa, while simultaneously allowing South Africa to plead balance of payments difficulties in order to extract concessions from GATT at our expense.

South Africa's balance of payments has been in surplus for the first two quarters of 1972, and this surplus is rising. Gold and foreign exchange reserves are rising steadily, and stood at R695.5m. (about $980m.) in mid-June. Dr. Diederichs, the Minister of Finance, told the South African Senate in June that the balance of payments was showing a favorable trend, and that further prospects, particularly on the export side, looked promising. He added that import control and devaluation had begun to show an effect on imports in recent months. If such a promising situation can be used to justify the degree of violation of GATT rules that South Africa is presently displaying, then the flood-gates would be opened for a large proportion of other GATT members to take the same line.

When the import quotas were tightened in November, 1971, the Minister of Economics, Mr. S. L. Muller, promised a full review in May. In late July, a certain easing of the controls was announced. However, the South African Ambassador in Geneva is reported as saying, "I feel that South Africa has gone as far as it can at present in relaxing its import restrictions." There is even a debate going on in South African business circles about the possibility of increasing the controls on some items.

I should, therefore, like to know the policy of the United States Government towards South Africa's position in GATT, with regard to the considerations mentioned above. If it should come to the point of threatening South Africa with suspension from the organization, can I assume that our delegation will support such a step?

There is a further point relating to South Africa's membership of GATT which I wish to raise. South Africa purports to represent Namibia in a number of international organizations. The United States supported U.N. General Assembly Resolution 2145 of 1966, and has accepted the Opinion of the International Court of Justice on this issue, affirming that South Africa's occupation of Namibia is illegal. As applied to GATT, therefore, South Africa has no legal right to represent Namibia, as it purports to do at the moment, and no right to obtain Most Favored Nation treatment for exports originating in Namibia. I should like to know what action the United States is taking to end South Africa's illegal representation of Namibia in GATT.

I would appreciate receiving, at an early date, a response to the points raised herein.

Sincerely,

CHARLES C. DIGGS, JR.,
Chairman, Subcommittee on Africa.

POLLUTION BILL TO AID SMALL BUSINESS AND THEIR EMPLOYEES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Massachusetts, (Mr. HARRINGTON) is recognized for 5 minutes.

Mr. HARRINGTON. Mr. Speaker, I am today introducing with 20 cosponsors a bill entitled the "Small Business Pollution Abatement Loan Assistance and Workers Readjustment Assistance Act."

The concept of the legislation is that small businesses should be able to receive some assistance in meeting the new—and much needed—stringent pollution standards. Small businesses which are required to tie into a municipal facility or to build their own pollution abatement facilities may not be able to do so without going out of business, and many of these marginal companies are in economically depressed areas. A second section of the bill provides that when a company goes out of business because it cannot obey the new pollution laws, the workers will receive adjustment assistance—100 percent of salary for 52 weeks, relocation allowances and job training.

Frankly, I do not believe that any of us in the Congress had intended to legislate small business out of existence, and it seems to me that the time has come to offer some safeguards to small businesses which are having difficulty obeying the new pollution laws.

The Council on Environmental Quality reported last week that the smaller firms, and not the large corporations, are jeopardized by inability to pay the cost of pollution control devices.

The Washington Evening Star and Daily News in an editorial last week cited this finding of the CEQ report and called for a creative national program to help these small businesses. The bill being introduced today is such a program.

The CEQ report estimates that for the industries studied, jobs lost range from 50,000 to 125,000 over the 1972–76 period.

Mr. Speaker, I would like at this point to quote directly from the CEQ report dealing with the problems of small businesses. The points made are well worth contemplating and the bill we are introducing today is a solid solution to the problem:

EXCERPTS FROM "THE ECONOMIC IMPACT OF POLLUTION CONTROL"—A SUMMARY OF RECENT STUDIES

MICROECONOMIC IMPACT

Accordingly, some firms will earn lower profits, some will curtail production, and some firms and plants will be forced to close.

There are approximately 12,000 plants currently operating in the industrial activities studies. Of these it is expected that approximately 800 would close in the normal course of business between 1972 and 1976. It would appear from the contractors' evaluations that an additional 200–300 will be forced to close because of pollution abatement requirements. Many of these additional closings would appear to involve plants that were vulnerable for other reasons and, hence, that were likely to have closed anyway a few years later.

These plant closings and production curtailments will have both direct and indirect impacts. The direct impacts include the loss of jobs and reduced value of equity. An indirect impact is that related (customer and supplier) firms will be forced to close or reduce production. For example, farms which have marketed their produce to a cannery that closed might be unable to find new markets for their produce. Another indirect impact is that the communities where such plants are located may suffer local recessions—an impact which will be most severe in one-plant towns.

The studies suggest that direct job loss attributable to environmental regulations in the affected industry activities examined may range from 50,000 to 125,000 jobs over the 1972–76 period. These figures represent approximately 1% to 4% of total employment in the industry activities studied. The direct average annual unemployment created in these industries represents .05% of the 1970 total national work force. However, the studies suggest that these estimates could be substantially higher if the economy is not at full employment.

While the total plant closings in the industries in which plant closings might have a community impact appear to be about 150, the data presented are not in sufficient detail to determine the number of these communities that will be significantly impacted.

It is important to note that the figures reported in the preceding paragraphs apply to the industrial activities studied; neither the positive nor negative impacts on other industrial activities have been included. However, in a general sense these other impacts are considered in the macroeconomic study.

FRUIT AND VEGETABLE CANNING AND FREEZING

In this case, up to half of the small plants in the industry, or one-third of all plants, were expected to be forced to close. Of the 1,200 plants included in the industry directory, therefore, 400 might be forced to close because of pollution abatement costs. Thus, the addition of pollution control costs was expected to lead to the additional closing of 100 plants, or 8.3% of the total. In addition, closing of the other plants was expected to occur some years earlier than otherwise.

It was estimated that the closing of 400 plants would result in the loss of jobs by approximately 28,000 employees. The disemployment created by the 100 plants that were estimated to close because of pollution controls would be one-fourth of that number of 7,000. Many of these would be in small towns and rural areas where reemployment would not be readily available.

PULP AND PAPER MILLS

It was estimated that an additional 60–65 mills would be forced to close with the imposition of abatement regulations. These additional closings were expected to result in the loss of 16,000 jobs by 1976. Many of the shut downs are likely to be in rural areas where they would have significant community impact.

A precedent has been set for the bill being introduced today. The Federal Water Pollution Control Act Amendments of 1972 which is still before the Conference Committee contains a provision originally introduced by former Congressman Morse and myself authorizing funds for loans to small businesses who without such assistance are likely to suffer substantial financial loss by complying with Federal water pollution guidelines. This is a good first step, and it seems but a logical extension to apply similar loan assistance provisions to assist compliance by small firms with any Federal or State pollution abatement requirements, whether they be air, noise, solid waste or water pollution problems.

This bill provides grants to small business to plan for the building of the facilities. Too often, the initial cost of the plans is prohibitive and businesses fail at the extent of that expenditure. These grants cannot exceed $100,000 or 100 percent of the cost. Once a plan has been accepted, the plant is eligible to receive a loan under the act. This loan will be at about 4 percent interest rate and for 30 years. If the EPA Administrator approved the plan, the Secretary of Labor is authorized to make loans not to exceed $500,000 or 100 percent of the cost of the project.

In the same vein, there will be marginal small plants which do close down because they are unable to meet the costs even with a loan. If that happens, the workers will be jobless through no fault of their own. Therefore, I am proposing a system of adjustment assistance which will provide workers with 100 percent of their salaries for 52 weeks after the plant closes and also with a relocation allowance and job retraining.

Workers over 60 years of age would be eligible for an additional 13 weeks of compensation.

The bill defines a small business as one which is independently owned and operated employing 1,000 or less persons.

I realize that the Public Works-EDA bill which we will consider tomorrow contains some provisions for aid to industries and assistance to workers. But these provisions fall far short of the program envisioned by the bill. The EDA bill provides only $100 million in loan money and no grant money for planning. Workers would be eligible for only 60 percent of their salaries. And, from what I can tell, none of the loan money may be used for the capital costs of tying into a municipal sewerage system—often a much less expensive way of cleaning up the environment.

The Public Works-EDA bill applies only to firms in depressed areas. But there are many firms in other areas of the Nation which have the same needs. Clearly the time has come for a national commitment to preserving small businesses and the environment at the same time. This bill if enacted would do just that.

I include at this point a brief analysis of the legislation:

ANALYSIS OF BILL

TITLE I—ASSISTANCE TO SMALL BUSINESSES

Under this act a small business firm is defined as a business concern which is independently owned and operated, and which employs not more than 1,000 employees.

Planning grants and loans

An application by a small business firm for a loan or planning grant should be filed with the Secretary of Labor. The Secretary of Labor must evaluate the application for a planning grant and act on it within 60 days after it is filed. Planning grants not to exceed $100,000 or 100 percent of the cost of preparing a plan would be available to qualifying small business firms.

If the Secretary of Labor approves the application for a planning grant, the small business firm would have 180 days to submit a plan. This plan must detail the Federal or State laws relating to pollution abatement with which the industry must comply, its proposals for meeting such requirements, and the estimated cost. The Administrator of the Environmental Protection Agency to whom the plan must ultimately be submitted to may assist the small business firm in preparing the plan.

The E.P.A. Administrator must approve or disapprove a plan within 30 days after it is submitted. If the E.P.A. Administrator approves the plan, the Secretary of Labor is authorized to make loans not to exceed $4,500,000 or 100 percent of the cost of the project. If the E.P.A. Administrator rejects the plan, the small business firm has 60 days to cure the defects. These loans may be made either directly or in cooperation with banks or other lenders.

It is unlawful under the act to use the loan funds for any purpose other than meeting the costs incurred by the small business firm in complying with State or Federal pollution abatement laws. Violators are subject to a $25,000 fine or imprisonment for 5 years, or both.

$4 billion is authorized to carry out this title.

TITLE II—ASSISTANCE TO WORKERS

In those cases where environmental necessities do force a marginal plant to shut down, the bill sets up a program under the auspices of the Secretary of Labor to assist the adversely affected workers.

Part A—Readjustment allowances

Readjustment allowances equal to the workers average weekly wage over the last six months of his employment are provided for. The amount of readjustment assistance that each worker receives however will be reduced by any amount of unemployment insurance he is receiving or training allowance under the Manpower Development and Training Act of 1962, or the Area Redevelopment Act. Subject to the following two exceptions, the readjustment allowance payments shall not exceed 52 weeks. Workers over 60 years of age would be eligible for an additional 13 weeks of compensation. Adversely affected workers who are in the process of completing training approved by the Secretary of Labor would be eligible for an additional 26 weeks of compensation.

Part B—Training

In order to assist these workers in securing new employment, the bill includes job training, counseling, and placement services. It is hoped that this will help such workers readjust with minimum reliance on adjustment payments. In those cases in which the training facilities are not within commuting distance of the worker's home, the Secretary of Labor is authorized to provide each individual not more than $5 a day to defray transportation and subsistence expenses. Any worker who without good cause refuses to accept or continue such job training shall not thereafter be entitled to readjustment allowances.

Relocation allowances

Relocation allowances include all reasonable and necessary moving expenses as determined by the Secretary of Labor. Three criteria must be satisfied in order for a worker to receive relocation allowances: the Secretary of Labor must determine that such worker cannot reasonably be expected to secure suitable employment in the surrounding area; the worker must obtain a bona fide offer of employment; and the employment must afford a reasonable expectation of long-term duration in the area in which he wishes to relocate.

Agreements with States

The Secretary of Labor is authorized to enter into agreements with any State, or State agency to receive applications for, and provide assistance, counseling and job training under this act.

THE PUBLIC WORKS AND ECONOMIC DEVELOPMENT ACT AMENDMENTS OF 1972

(Mr. HAMMERSCHMIDT asked and was given permission to extend his remarks at this point in the RECORD, and to include extraneous matter.)

Mr. HAMMERSCHMIDT. Mr. Speaker, on August 2, 1972, the Committee on Public Works ordered reported H.R. 16071, the Public Works and Economic Development Act Amendments of 1972. This legislation is expected to be considered on the floor this week.

One of the existing EDA programs to be expanded and improved by H.R. 16071 is the public works impact program—PWIP. The PWIP program was first added to this act in the 1971 amendments. It is designed to move ahead rapidly in areas which are eligible because of threatened or actual high unemployment, a concentration of low income, or substantial outmigration with combined direct grants and supplementary grants up to 100 percent of the cost of a project. The type of projects to be assisted concern basic public works projects which are ready to be constructed and hence create immediate useful work to the unemployed and underemployed in an eligible area.

EDA accepted this challenge and all of the initial fiscal year 1972 funds appropriated for this purpose, as well as the supplemental funds, had been totally obligated by spring of this year. These funds stimulated 203 projects which resulted in an estimate of almost 11,000 jobs. Seventy-six percent of these were filled by the unemployed or underemployed in the project area. All but four of the projects are either under construction or complete.

The speed with which EDA responded and the apparent success led to the committee's decision to expand this program in H.R. 16071.

Knowing of the Members' interest in the Public Works and Economic Development Act and in the public works impact program created under that act, I am herewith submitting the list of projects approved under the PWIP program for fiscal year 1972:

FISCAL YEAR APPROVED PWIP PROJECTS

Region	Number of projects	EDA cost	Total cost	Percent EDA funding	Estimated number of employees		Estimated man-months employment
					Unemployed/underemployed from project area	Total	
Atlantic	41	$13,032,700	$21,842,750	60	2,174	2,819	8,794
Southeastern	39	8,556,105	13,253,259	65	1,837	2,559	7,844
Rocky Mountain	19	5,043,400	5,874,000	86	588	900	2,823
Midwestern	28	7,127,400	9,487,500	75	802	1,075	4,370
Western	40	7,449,900	9,272,000	80	1,678	1,928	5,126
Southwestern	36	6,450,300	7,797,625	83	1,055	1,492	5,491
Total	203	47,659,805	67,527,134	71	8,134	10,773	34,448

Note: $\frac{\text{Estimated number of unemployed/underemployed from project area}}{\text{Estimated number of total employees}} = 76$ percent.

FISCAL YEAR 1972 APPROVED PWIP PROJECTS

NOTES

PWIP Projects Not Yet Under Construction:

1. Washington, D.C. 01-11-00570. Being redesigned for a larger gymnasium. Advertising scheduled for August 4, 1972. Bid Opening scheduled for Aug. 14, 1972.
2. Crow Indian, Reservation, Mont., 05-11-01275. Force account project, Indian Tribe changed administration—problems within tribe delaying project.
3. Logan, Ohio, 06-11-00830. Land acquisition problems.
4. Caldwell, Ohio, 06-11-00834. Land acquisition problems.

NATURAL GAS

(Mr. TIERNAN asked and was given permission to extend his remarks at this point in the Record and to include extraneous matter.)

Mr. TIERNAN. Mr. Speaker, on August 3, 1972, the Federal Power Commission released its "Statement of Policy Relating to Optional Procedure for Certificating New Producer Sales of Natural Gas."

Before analyzing the workings of the new giveaway, I should like to examine the assumptions made by the Commission in issuing the order.

The four Commissioners acted, they say, because of a "worsening of the gap between natural gas demand and supply." The data on which they base this judgment comes from two principal sources:

First, a report prepared by the Bureau of Natural Gas entitled: "National Supply and Demand 1971–1990." But the Commission is deceiving the public. It implies that the report was prepared independently by a Government bureau when in fact the data on which it is based is, by the Commission staff's own admission, supplied by the American Gas Association. And, although this trade association can hardly be considered a disinterested party, the Commission staff does not even spot check the figures for accuracy;

Second, from data supplied by the Future Requirements Committee. This group in which the Commission placed such unquestioning faith, is made up entirely of industry representatives.

Further, for increased prices to be justified by the Commission as a means of stimulating gas supply, the shortage would have to be shown to be price elastic. This the Commission has not done.

Clearly, no regulatory commission can fulfill its public interest responsibilities when its assumptions are so ill-considered and untested.

I am not saying that a shortage does not exist or that supply is inelastic with respect to price. I am maintaining that the Commission has no way of knowing the true situation. However, some figures recently referred to by Chairman Swidler of the New York Public Utlities Commission ought to compel the Commission to take a hard second look at industry claims:

INITIAL ANNUAL VOLUMES UNDER NEW INTERSTATE AND INTRASTATE CONTRACTS, LARGE PRODUCERS, PERMIAN BASIN AREA, 1966–70

[Billions of cubic feet at 14.65 p.s.i.a. and percent of total (in parentheses)]

Year	Interstate	Intrastate	Total
1966	149.0 (83.7)	29.0 (16.3)	178.0
1967	60.4 (78.2)	16.8 (21.8)	77.2
1968	20.0 (12.8)	136.1 (87.2)	156.1
1969	29.4 (16.7)	146.4 (83.3)	175.8
1970 (6 months)	10.3 (9.1)	103.1 (90.9)	113.4

These figures detail the dedication of newly committed natural gas to the interstate and intrastate markets.

What they show, in the words of Chairman Swidler, is that:

> In 1968, when the shortage of available gas first appeared, there took place a dramatic reversal of the relative position of the interstate and intrastate market.

An examination of these figures reveals that if the producers had continued to dedicate the same share of new gas during the entire period as it had in 1966 billions of additional cubic feet would have been available in interstate commerce.

I quite agree with Chairman Swidler when he says:

> What the data suggests is that the crisis has been caused in large measure by the diversion of gas to intrastate sales . . . which would otherwise have entered interstate pipelines.

The significant fact, I might add, is that much of the gas used intrastate is employed in low-priority uses like boiler fuel, when new customers in New England are being refused service.

Therefore, I strongly disagree with the FPC's action in this case. The appropriate solution would have been to seek statutory authority to regulate intrastate sales, with their clear and direct effect on interstate commerce, and to conduct an independent and thorough evaluation of the natural gas supply situation. Following this, the Commission would have been able to establish area rates which truly represented the public interest.

There is another aspect of this decision which is equally harmful to the public interest: the administrative procedure adopted by the Commission to deal with natural gas regulation.

Section 4 of the Natural Gas Act requires that—

> All rates, and charges made, demanded, or received by any natural gas company * * * shall be just and reasonable.

The Commission has historically seen fit to implement this phrase through cost, plus fair rate of return regulation using the mechanism of area rate proceedings. This procedure has been upheld by the Supreme Court and is generally conceded to avoid the unmanageable burden of individual proceedings for every application.

It permits a thorough investigation of the costs associated with producing natural gas in a manner that, properly employed, balances the interests of consumers and producers.

The new optional procedure, however, short-circuits this established method in favor of a showing that the price sought by the producer serves the public convenience and necessity. No longer will the price charged for natural gas be related to the cost of service.

If the Commission were to vigorously pursue regulation under the "public convenience and necessity" standard consumers might very well be protected. But anyone who is aware of the regulatory workload and the quality of utility regulation at the FPC knows that this loosely defined phrase may easily permit a completely legal robbery of the country's gas consumers. The Commission possesses neither the staff nor the desire to adequately protect the public under the new optional procedure.

Perhaps the most harmful aspect, though, is the exemption of the producers from refund obligations. Under the new rules, 6 months after the application for a rate exceeding the area rate ceiling has been filed, the producer is allowed to charge the higher rate without being obligated to refund the money should the Commission subsequently find the rates excessive. I might remark that this is akin to legalizing robbery if the thief manages to escape the authorities for 6 months.

I urge the Commission to reconsider this crucial policy decision and to replace it with one which truly serves the public interest. Such a policy would be a return to area rate regulation after a thorough investigation of the natural gas supply situation.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted as follows to:

Mrs. Abzug (at the request of Mr. O'Neill), for today, on account of illness.

Mr. Clancy (at the request of Mr. Gerald R. Ford), for August 14 through August 16, 1972, on account of a death in the family.

Mr. Lent (at the request of Mr. Gerald R. Ford), for August 16, on account of official business.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. Young of Florida) to revise and extend their remarks, and to include extraneous matter:)

Mr. Horton, on August 16, for 15 minutes.

Mr. Wyman, today, for 10 minutes.

Mr. Heinz, today, for 5 minutes.

(The following Members (at the request of Mr. Mazzoli), to revise and extend their remarks, and to include extraneous matter:)

Mr. Gonzalez, today, for 5 minutes.

Mr. Aspin, today, for 5 minutes.

Mr. Koch, today, for 5 minutes.

Mr. Pepper, today, for 5 minutes.

Mr. Diggs, today, for 5 minutes.

Mr. Harrington, today, for 5 minutes.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. Hammerschmidt, notwithstanding it exceeds two pages of the Record and is estimated by the Public Printer to cost $722.50.

Mr. Mahon to include tables and extraneous matter with his remarks made today on H.R. 16254 and House Joint Resolution 1278.

Mr. Rousselot to extend his remarks on the conference report on H.R. 9092 following Mr. Gross.

Mr. Hillis to extend his remarks on the conference report on H.R. 9092 following Mr. Rousselot.

Mr. Diggs and to include extraneous matter notwithstanding the fact that it exceeds two pages of the Record and is estimated by the Public Printer to cost $807.50.

Mr. Purcell.

Mr. Staggers, and to include a letter sent to the Comptroller General of the United States, during general debate on S. 3824.

(The following Members (at the request of Mr. Young of Florida), and to include extraneous matter:)

Mr. Findley.
Mr. McCloskey.
Mr. Archer.
Mr. Derwinski in two instances.
Mr. Dellenback.
Mr. Wyman in two instances.
Mr. Steiger of Arizona.
Mr. Bob Wilson in two instances.
Mr. Gerald R. Ford.
Mr. Collins of Texas in two instances.
Mr. Hosmer in two instances.
Mr. Shriver in two instances.
Mr. Schmitz in 10 instances.
Mr. Keating.
Mr. Gubser.
Mr. Hansen of Idaho in three instances.
Mr. Wyatt.
Mr. Burke of Florida.
Mr. Kemp in two instances.

(The following Members (at the request of Mr. Mazzoli), and to include extraneous matter:)

Mr. Rostenkowski in two instances.
Mr. Rarick in three instances.
Mr. Gonzalez in three instances.
Mr. Evins of Tennessee in two instances.
Mr. Roe in two instances.
Mr. Vanik in two instances.
Mr. Pucinski in five instances.
Mr. Badillo.
Mr. Rees.
Mr. Begich in four instances.
Mr. Dingell in two instances.
Mr. Steed.
Mr. Hungate in two instances.
Mr. Symington.
Mr. Reid.
Mr. Purcell in six instances.
Mr. Obey in six instances.
Mr. James V. Stanton in two instances.
Mr. Corman.
Mr. Annunzio in three instances.
Mr. Davis of Georgia in five instances.
Mr. Pike.

SENATE BILL REFERRED

A bill of the Senate of the following title was taken from the Speaker's table and, under the rule, referred as follows:

S. 3524. An act to extend the provisions of the Commercial Fisheries Research and Development Act of 1964, as amended, to the Committee on Merchant Marine and Fisheries.

ENROLLED BILLS SIGNED

Mr. HAYS, from the Committee on House Administration, reported that that committee had examined and found truly enrolled bills of the House of the following titles, which were thereupon signed by the Speaker:

H.R. 6957. An act to establish the Sawtooth National Recreation Area in the State of Idaho, to temporarily withdraw certain national forest land in the State of Idaho from the operation of the United States mining laws, and for other purposes;

H.R. 13324. An act to authorize appropriations for the fiscal year 1973 for certain maritime programs of the Department of Commerce, and for related purposes.

H.R. 15692. An act to authorize for a limited period additional loan assistance under the Small Business Act for disaster victims, to provide for a study and report to the Congress by the President setting forth recommendations for a comprehensive revision of disaster relief legislation, and for other purposes.

SENATE ENROLLED BILL SIGNED

The SPEAKER announced his signature to an enrolled bill of the Senate of the following title:

S. 596. An act to require that international agreements other than treaties, hereafter entered into by the United States, be transmitted to the Congress within 60 days after the execution thereof.

BILLS PRESENTED TO THE PRESIDENT

Mr. HAYS, from the Committee on House Administration, reported that that committee did on the following dates present to the President, for his approval, bills of the House of the following titles:

On August 14, 1972:

H.R. 2131. An act for the relief of the Howrey Lumber Co.;

H.R. 15417. An act making appropriations for the Departments of Labor, and Health, Education, and Welfare, and related agencies, for the fiscal year ending June 30, 1973, and for other purposes; and

H.R. 15586. An act making appropriations for public works for water and power development, including the Corps of Engineers—Civil, the Bureau of Reclamation, the Bonneville Power Administration and other power agencies of the Department of the Interior, the Appalachian regional development programs, the Federal Power Commission, the Tennessee Valley Authority, the Atomic Energy Commission, and related independent agencies and commissions for the fiscal year ending June 30, 1973, and for other purposes.

On August 15, 1972:

H.R. 6957. An act to establish the Sawtooth National Recreation Area in the State of Idaho, to temporarily withdraw certain national forest land in the State of Idaho from the operation of the U.S. mining laws, and for other purposes; and

H.R. 15692. An act to authorize for a limited period additional loan assistance under the Small Business Act for disaster victims, to provide for a study and report to the Congress by the President setting forth recommendations for a comprehensive revision of disaster relief legislation, and for other purposes.

ADJOURNMENT

Mr. MAZZOLI. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 6 o'clock and 7 minutes p.m.) the House adjourned until tomorrow, Wednesday, August 16, 1972, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

2252. A letter from the Secretary of the Air Force experimental, development, test, and research procurement actions of $50,000 or more during the 6 months ending June 30, 1972, pursuant to 10 U.S.C. 2357; to the Committee on Armed Services.

2253. A letter from the Assistant Secretary of the Interior, transmitting a draft of proposed legislation to amend the Wild and Scenic Rivers Act; to the Committee on Interior and Insular Affairs.

RECEIVED FROM THE COMPTROLLER GENERAL

2254. A letter from the Comptroller General of the United States, transmitting a report on Federal efforts to combat drug abuse; to the Committee on Government Operations.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. BROOKS: Joint Committee on Congressional Operations. Report on improving fiscal and budgetary information for the Congress (Rept. No. 92–1337). Referrd to the Committee of the Whole House on the State of the Union.

Mr. HOLIFIELD: Committee on Government Operations. Report on regulation of food additives—Nitrites and nitrates (Rept. No. 92–1338). Referred to the Committee of the Whole House on the State of the Union.

Mr. DULSKI: Committee on Post Office and Civil Service H.R. 11255. A bill to amend the age and service requirements for immediate retirement under subchapter III of chapter 83 of title 5, United States Code, and for other purposes; with amendments (Rept. No. 92–1339). Referred to the Committee of the Whole House on the State of the Union.

Mr. McMILLAN: Committee of conference. Conference report on H.R. 15580. (Rept. No. 92–1340). Ordered to be printed.

Mr. EVINS of Tennessee: Select Committee on Small Business. Report on small business and the Occupational Safety and Health Act of 1970 (Rept. No. 92–1341). Referred to the Committee of the Whole House on the State of the Union.

Mr. PATMAN: Committee of conference. Conference report on S. 3726. (Rept. No. 92–1342). Ordered to be printed.

Mr. YOUNG of Texas: Committee on Rules. House Resolution 1093. A resolution providing for the considerations of H.R. 13514. A bill to enable wheat producers, processors, and end-product manufacturers of wheat foods to work together to establish, finance, and administer a coordinated program of research, education, and promotion to maintain and expand markets for wheat and wheat products for use as human foods within the United States (Rept. No. 92–1343). Referred to the House Calendar.

Mr. COLMER: Committee on Rules. House Resolution 1094. A resolution providing for the consideration of conference reports on the same day reported (Rept. No. 92–1344). Referred to the House Calendar.

Mr. DELANEY: Committee on Rules. House Resolution 1095. A resolution providing for the consideration of H.R. 14847. A bill to amend the Airport and Airway Development Act of 1970 to increase from 50 to 75 percent the U.S. share of allowable project costs payable under such act; to amend the Federal

Aviation Act of 1958 to prohibit State taxation of the carriage of persons in air transportation; and for other purposes (Rept. No. 92–1345). Referred to the House Calendar.

Mr. SISK: Committee on Rules. House Resolution 1096. A resolution providing for the consideration of H.R. 12114. A bill to declare title to certain Federal lands in the State of Oregon to be in the United States in trust for the use and benefit of the Confederated Tribes of the Warm Springs Reservation of Oregon (Rept. No. 92–1346). Referred to the House Calendar.

Mr. PEPPER: Committee on Rules. House Resolution 1097. A resolution providing for the consideration of House Joint Resolution 1227. Joint resolution approving the acceptance by the President for the United States of the Interim Agreement Between the United States of America and the Union of Soviet Socialist Republics on Certain Measures With Respect to the Limitation of Strategic Offensive Arms (Rept. No. 92–1347). Referred to the House Calendar.

Mr. O'NEILL: Committee on Rules. House Resolution 1098. A resolution providing for the consideration of H.R. 16071. A bill to amend the Public Works and Economic Development Act of 1965 (Rept. No. 92–1348). Referred to the House Calendar.

PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. BROYHILL of Virginia:

H.R. 16355. A bill to repeal section 453(d) (5) of the Internal Revenue Code of 1954; to the Committee on Ways and Means.

Mr. EILBERG:

H.R. 16356. A bill to encourage and support the dissemination of news, opinion, scientific, cultural, and educational matter through the mails; to the Committee on Post Office and Civil Service.

By Mr. ESCH (for himself, Mr. Matsunaga, Mrs. Mink, Mr. Mailliard, Mr. Begich, Mr. Bell, Mr. Dellums, Mr. Charles H. Wilson, Mr. Leggett, Mr. Bob Wilson, Mr. Fish, Mrs. Abzug, Mr. Frenzel, Mr. Foley, Mr. Halpern, Mr. Rangel, Mr. Hansen of Idaho, Mr. Forsythe, Mr. Gude, Mr. Blackburn, and Mr. Steiger of Wisconsin):

H.R. 16357. A bill to provide for the use of certain funds to promote scholarly, cultural, and artistic activities between Japan and the United States, and for other purposes; to the Committee on Foreign Affairs.

By Mrs. GREEN of Oregon (for herself and Mr. Gubser):

H.R. 16358. A bill to provide for the establishment of a U.S. High Court of Settlement which shall have jurisdiction over certain labor disputes in industries and other enterprises affecting interstate commerce and the public interest; to the Committee on the Judiciary.

By Mr. HARRINGTON (for himself, Mrs. Abzug, Mr. Bell, Mr. Bingham, Mrs. Chisholm, Mr. Conte, Mr. Denholm, Mr. Drinan, Mr. Eilberg, Mr. Forsythe, Mr. Green of Pennsylvania, Mr. Halpern, Mr. Helstoski, Mrs. Hicks of Massachusetts, Mr. McCloskey, Mr. Obey, Mr. Podell, Mr. Rangel, and Mr. Charles H. Wilson):

H.R. 16359. A bill to authorize the Secretary of Labor to provide financial and other assistance to certain workers and small business firms to assist compliance with State or Federal pollution abatement requirements; to the Committee on Banking and Currency.

By Mr. HARRINGTON (for himself, Mr. Fraser, Mr. Obey, Mr. O'Konski, Mrs. Abzug, Mr. Anderson of Tennessee, Mr. Badillo, Mr Brademas, Mr. Burke of Massachusetts, Mr. Clay, Mr. Corman, Mr. Drinan, Mr. Edwards of California, Mr. Eilberg, Mr. Halpern, Mr. Hathaway, Mr. Hechler of West Virginia, and Mr. Helstoski):

H.R. 16360. A bill to require a study of the practices, policies, and procedures of all Government agencies relating to the availability of certain goods and services through Federal supply and service sources, to amend the Federal Property and Administrative Services Act of 1949 to permit certain grantees and contractors of Government agencies to procure certain goods and services through Federal supply and service sources, and for other purposes; to the Committee on Government Operations.

By Mr. HARRINGTON (for himself, Mr. Fraser, Mr. Obey, Mr. O'Konski, Mr. Hosmer, Mr. Jacobs, Mr. Jones of North Carolina, Mr. Kyros, Mr. Leggett, Mr. Madden, Mr. Mosher, Mr. Perkins, Mr. Podell, Mr. Rangel, Mr. Reuss, and Mr. Roy):

H.R. 16361. A bill to require a study of the practices, policies, and procedures of all Government agencies relating to the availability of certain goods and services through Federal supply and service sources, to amend the Federal Property and Administrative Services Act of 1949 to permit certain grantees and contractors of Government agencies to procure certain goods and services through Federal supply and service sources, and for other purposes; to the Committee on Government Operations.

By Mr. HARRINGTON (for himself, Mr. Fraser, Mr. Obey, Mr. O'Konski, Mr. Seiberling, Mr. Nix, Mr. Conte, Mr. Roe, Mr. Andrews of North Dakota, Mr. Adams, Mr. Runnels, and Mr. Ashley):

H.R. 16362. A bill to amend the Federal Property and Administrative Services Act of 1949 to provide for the use of excess property by certain grantees; to the Committee on Government Operations.

H.R. 16363. A bill to require a study of the practices, policies, and procedures of all Government agencies relating to the availability of certain goods and services through Federal supply and service sources, to amend the Federal Property and Administrative Services Act of 1949 to permit certain grantees and contractors of Government agencies to procure certain goods and services through Federal supply and service sources, and for other purposes; to the Committee on Government Operations.

By Mr. HARRINGTON (for himself, Mr. Fraser, Mr. Obey, Mr. O'Konski, Mrs. Abzug, Mr. Anderson of Tennessee, Mr. Badillo, Mr. Brademas, Mr. Burke of Massachusetts, Mr. Clay, Mr. Corman, Mr. Drinan, Mr. Edwards of California, Mr. Eilberg, Mr. Halpern, Mr. Gude, Mr. Frenzel, Mr. Hathaway, Mr. Hechler of West Virginia, and Mr. Helstoski):

H.R. 16364. A bill to amend the Federal Property and Administrative Service Act of 1949 to provide for the use of excess property by certain grantees; to the Committee on Government Operations.

By Mr. HARRINGTON (for himself, Mr. Fraser, Mr. Obey, Mr. O'Konski, Mr. Hosmer, Mr. Jacobs, Mr. Jones of North Carolina, Mr. Kyros, Mr. Leggett, Mr. Madden, Mr. Mazzoli, Mr. Mosher, Mr. Perkins, Mr. Pickle, Mr. Podell, Mr. Rangel, Mr. Reuss, and Mr. Roy):

H.R. 16365. A bill to amend the Federal Property and Administrative Services Act of 1949 to provide for the use of excess property by certain grantees; to the Committee on Government Operations.

By Mrs. HECKLER of Massachusetts:

H.R. 16366. A bill to authorize and request the President to issue annually a proclamation designating August 26 of each year as "Women's Rights Day"; to the Committee on the Judiciary.

By Mr. HILLIS (for himself, Mr. Forsythe, Mr. Winn, Mr. Del Clawson, Mr. Eilberg, Mr. McDade, Mr. Thomson of Wisconsin, Mr. Gude, Mr. Sarbanes, Mr. Aspin, Mr. Quie, Mr. Hungate, Mrs. Abzug, Mr. Sisk, Mrs. Chisholm, Mr. Clark, Mr. Cleveland, Mr. Bennett, Mr. Tiernan, Mr. Young of Florida, Mr. Derwinski, Mr. Waldie, Mr. Gallagher, Mr. Fascell, and Mr. Melcher):

H.R. 16367. A bill to amend title 38 of the United States Code to liberalize the provisions relating to payment of disability and death pension; to the Committee on Veterans' Affairs.

By Mr. HILLIS (for himself, Mr. King, Mr. Myers, Mr. Sebelius, Mrs. Hansen of Washington, Mr. Hastings, Mr. Veysey, Mr. Brinkley, Mr. Rangel, Mr. Bell, Mr. Hansen of Idaho, Mr. Jones of North Carolina, Mr. Helstoski, Mr. Danielson, Mr. Thone, Mr. Matsunaga, Mr. Taylor, Mr. Collier, Mr. Kemp, Mr. Hanna, Mr. Obey, Mr. Anderson of Tennessee, Mr. Scherle, Mr. Bray, and Mr. O'Konski):

H.R. 16368. A bill to amend title 38 of the United States Code to liberalize the provisions relating to payment of disability and death pension; to the Committee on Veterans' Affairs.

By Mr. HILLIS (for himself, Mr. Leggett, Mr. Charles H. Wilson, Mr. Addabbo, Mr. Johnson of Pennsylvania, Mr. Mollohan, Mr. Latta, Mr. Halpern, Mr. Cederberg, Mr. Duncan, and Mr. Blanton):

H.R. 16369. A bill to amend title 38 of the United States Code to liberalize the provisions relating to payment of disability and death pension; to the Committee on Veterans' Affairs.

By Mr. KASTENMEIER:

H.R. 16370. A bill to insure periodic congressional review of tax preferences, and other items which narrow the income tax base, by providing now for the termination over a 3-year period of existing provisions of these types; to the Committee on Ways and Means.

By Mr. MALLARY:

H.R. 16371. A bill to amend title 38 of the United States Code to provide that one-half of any social security benefit increases provided for by Public Law 92–336 be disregarded in determining eligibility for pension or compensation under such title; to the Committee on Veterans' Affairs.

By Mr. MURPHY of New York:

H.R. 16372. A bill to create a national system of health security; to the Committee on Ways and Means.

By Mr. NIX:

H.R. 16373. A bill to provide adequate mental health care and psychiatric care to all Americans; to the Committee on Ways and Means.

By Mr. REID:

H.R. 16374. A bill to prevent aircraft piracy by requiring the use of metal-detection devices to inspect all passengers and baggage boarding commercial aircraft in the United States; to the Committee on Interstate and Foreign Commerce.

By Mr. REID (for himself, Mr. Abourezk, Mr. Harrington, and Mr. Podell):

H.R. 16375. A bill to insure international cooperation in the prosecution or extradition to the United States of persons alleged to have committed aircraft piracy against the laws of the United States or international law; to the Committee on Interstate and Foreign Commerce.

By Mr. ROSENTHAL:

H.R. 16376. A bill to terminate the Airlines mutual aid agreement; to the Committee on Interstate and Foreign Commerce.

By Mr. ROUSH:

H.R. 16377. A bill to provide for the maintenance of a register listing the names of certain persons who have had their motor vehicle operator's licenses denied or withdrawn and to allow more efficient use of that information, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. ROYBAL:

H.R. 16378. A bill to provide for the establishment of a national cemetery in Los Angeles County in the State of California; to the Committee on Veterans' Affairs.

By Mr. St GERMAIN (for himself, Mr. Ashley, Mr. Bevill, Mr. Brown of Ohio, Mr. Collins of Illinois, Mr. Derwinski, Mrs. Hansen of Washington, Mr. Hechler of West Virginia, Mr. McCollister, Mr. Mollohan, Mr. Nichols, Mr. Rostenkowski, and Mr. Stokes):

H.R. 16379. A bill to authorize the Secretary of the Interior to establish national parks or national recreation areas in those States which presently do not have a national park or national recreation area; to the Committee on Interior and Insular Affairs.

By Mr. SCHWENGEL:

H.R. 16380. A bill to authorize the Secretary of Agriculture to encourage and assist the several States in carrying out a program of animal health research; to the Committee on Agriculture.

By Mr. VAN DEERLIN (for himself, Mr. Keith, Mr. Addabbo, Mr. Archer, Mr. Brasco, Mr. Brown of Michigan, Mr. Burke of Massachusetts, Mr. Daniel of Virginia, Mr. Danielson, Mr. Delaney, Mr. Denholm, Mr. Derwinski, Mr. du Pont, Mr. Eilberg, Mr. Forsythe, Mr. Heinz, Mr. Helstoski, Mrs. Hicks of Massachusetts, Mr. Hosmer, Mr. King, Mr. Lujan, Mr. McKevitt, Mr. Matsunaga, Mr. Mosher, and Mr. St Germain):

H.R. 16381. A bill establishing a Council on Energy Policy; to the Committee on Interstate and Foreign Commerce.

By Mr. VAN DEERLIN (for himself, Mr. Keith, Mr. Cleveland, Mr. Steele, Mr. Veysey, and Mr. Charles H. Wilson):

H.R. 16382. A bill establishing a Council on Energy Policy; to the Committee on Interstate and Foreign Commerce.

By Mr. PERKINS:

H.J. Res. 1286. Joint resolution to waive the requirements of section 431(b) of the General Education Provisions Act and section 495 of the Higher Education Act of 1965 in the case of rules, regulations, guidelines, instructions, and application forms for student loans under the guaranteed student loan program; to the Committee on Education and Labor.

By Mr. ROYBAL:

H. Con. Res. 686. Concurrent resolution expressing the sense of the Congress with respect to the accounting and return of all American prisoners in Southeast Asia; to the Committee on Foreign Affairs.

By Mr. FRASER:

H. Res. 1099. Resolution amending the rules of the House with respect to the jurisdiction of the Committee on House Administration; to the Committee on Rules.

By Mr. SISK (for himself, Mr. Bolling, Mr. Young of Texas, Mr. Smith of California, and Mr. Latta):

H. Res. 1100. Resolution to amend the Rules of the House of Representatives to provide for the use of electronic equipment, and for other purposes; to the Committee on Rules.

MEMORIALS

Under clause 4 of rule XXII,

419. The SPEAKER presented a memorial of the Legislature of the State of California, relative to the preservation and protection of an archaeological site, which was referred to the Committee on Interior and Insular Affairs.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BURTON:

H.R. 16383. A bill for the relief of Matias J. Rubang and his wife, Ignacia C. Rubang; to the Committee on the Judiciary.

By Mr. FASCELL:

H. Res. 1101. Resolution referring the bill H.R. 16353 entitled "A bill for the relief of the Cuban Truck & Equipment Company, its heirs and assigns" to the Chief Commissioner of the U.S. Court of Claims; to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

271. By the SPEAKER: Petition of Kenneth R. Statler, Richmond, Va. et al., relative to clemency for Lt. William L. Calley; to the Committee on Armed Services.

272. Also, petition of Mr. and Mrs. E. L. Adams, Greenville, S.C. et al., relative to the agreements negotiated by the President in Moscow; to the Committee on Foreign Affairs.

273. Also, petition of Mrs. Charles Quick, Baltimore, Md. et al., relative to victory in Vietnam; to the Committee on Foreign Affairs.

EXTENSIONS OF REMARKS

MONROE COUNTY CLERK CLOYCE MENEFEE

HON. WILLIAM L. HUNGATE

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 15, 1972

Mr. HUNGATE. Mr. Speaker, I would call to the attention of my colleagues Monroe County and its county clerk Cloyce Menefee of Holiday, Mo., in the Ninth District which recently received recognition in the Santa Barbara News-Press:

[From the Santa Barbara (Calif.) News-Press, July 24, 1972]

A Town's Tradition Works for McGovern

(By Kevin P. Phillips)

Paris, Mo.—Paris, France, and this small Missouri farm town are worlds apart. Here the phone booth in front of the county courthouse smells of hay and Purina chows, and Main Street looks like a Sinclair Lewis reject. No Confederate monument stands guard, but people hereabout fought with the South during the Civil War, and the drive-in movie down the road in Audrain County is named "Little Dixie."

In most ways, Paris, Mo., typifies the conservative, tradition-oriented U.S. countryside. Therefore, it may come as a shock that Paris—and Monroe County, Mo.—are almost certain to join Bella Abzug and Jerry Rubin in casting their November votes for Sen. George McGovern.

The reason? Quite simple. Monroe is Missouri's banner Democratic County. This northeastern part of the state, known as "Little Dixie," was settled between 1810 and 1830 by Virginians, Kentuckians, and Tennesseans. Counties, towns, streets, hotels: they all seem to be named for the "Virginia dynasty" of Thomas Jefferson, James Madison, and James Monroe. Pro-Confederate during the Civil War, Monroe County voted heavily Democratic thereafter. More recently, Monroe Countians have remained loyal enough that Catholic Al Smith beat Herbert Hoover 3:1 in 1928 and Adlai Stevenson whupped Dwight Eisenhower by the same ratio in 1956.

Not that local party leaders have much good to say about George McGovern. On the contrary. Even so, they shrug, "he's the Democratic nominee," and they expect to be able to carry the county for him in November. There is an important political lesson in this: that the wheels of American political realignment grind exceedingly slow. When the votes are finally counted next fall, George McGovern will undoubtedly owe a lot more of his support of plain old tradition than his young "New Politics" zealots suspect (or will admit). And similarly, the much touted "youth vote" will probably fall well short of the New Left's cohesive expectations.

Now for the converse. Any Nixon strategist driving through Monroe County—rural, conservative and Southern-oriented as it is—would have every reason to picture it as a snap for Richard Nixon to carry against a man like George McGovern. But the President got only 30 percent of the county vote in 1968, and local estimates credit him with just 35–40 percent in November. Under these circumstances, is the idea of a 1972 realignment valid?

I think so. Realignment in U.S. politics is mostly a matter of 7 percent in one county and 12 percent in another. To be sure, a few volatile constituencies will swing 25–50 percent on a single issue (especially the isolationist upper Farm Belt and the race-conscious Deep South). But by and large, America's major political shifts have been built on a nickel here and a dime here.

In this context, Monroe County does have a story to tell. First of all, local Democrats generally agree that some of George McGovern's views are quite unpopular. Privately, some will hint that a "disaster" could have occurred even in Monroe County if the South Dakotan hadn't selected Missouri's popular young Sen. Thomas Eagleton as his running mate.

Secondly, Democratic politics do expect Nixon to gain over 1968, inevitably setting a GOP presidential record in the process. More than ever before, the Republican Party is getting active—and organized—in Monroe County. If the national Democratic Party continues to move in the McGovern direction, local leaders admit, Monroe County will continue to move toward the GOP.

Third, current voter interest augurs well for President Nixon. Monroe, like other rural Missouri counties, does not have actual voter registration. On primary day or election day, people simply go to the polls and vote. As County Clerk Cloyce Menefee says, "everybody knows everybody," and judges are on hand to prevent the occasional fraud. Elderly and incapacitated persons can ask ahead of time for absentee ballots, and Menefee says that the "one abnormal circumstance" so far in 1972 is that the bulk of the absentee requests—for the first time ever—is coming from persons known to intend a Republican vote.

It doesn't add up to any big local upheaval. But that is the genius of the American political system. Slow change acts as a damper. In France, political revolution comes overnight in the streets of Paris, but in Paris, Missouri—and in the United States as a whole—it comes 7 percent and 12 percent at a time.

EARLY INTERVENTION AND LEARNING DISABILITIES

HON. ORVAL HANSEN

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 15, 1972

Mr. HANSEN of Idaho. Mr. Speaker, Dr. George A. Williams, a pediatrician from my hometown of Idaho Falls, was one of the featured speakers at the recent Idaho Early Childhood Conference which I sponsored to focus on the needs of young children. Dr. Willams delivered a timely and informative address on the impact of early intervention in learning disabilities, and I include his speech in the RECORD and commend it to the attention of my colleagues:

THE IMPACT OF EARLY INTERVENTION IN LEARNING DISABILITIES

(By Dr. George Williams)

This discussion is given from the basis of a psycho-educational child health therapist rather than as a pediatrician. For a more detailed outline and discussion of a child's health needs of our pediatric population, I refer you to the American Academy of Pediatrics excellent monograph entitled "Lengthening Shadows." My desire with this present discussion is to further us along the path to a better understanding of the causes, ramifications and treatment of learning disorders.

STATISTICS

If one would consider that an accurate extension of the term "Learning Disorder" would include and encompass all types of communication problems, then one would be able to appreciate the impact and meaning of our most recent statistics as follows. It is estimated that one-half of one percent of all live births yield a child who is mentally retarded. Approximately 10% of all school age children have some impediment to their learning. If this projected to the nation's population, then there are approximately 30 million people who have their learning ability compromised. Further analysis of these statistics show that 80% of these people are male and, interestingly, of the 20% who comprise the female group, psychological overlay is an important factor. The Justice Department has disclosed figures that indicate that 75% of their clients are either poor or nonreaders. Previous data has shown that if the child with the learning disability is detected by age eight, the chances of amelioration of all or majority of the difficulties are about 60–40. If he goes to puberty, which is only four years later, then only approximately 20% of these chidren will really be helped. These are not "perpetual" statistics but these pertain to only now, with our present day tools and our present "batting average." We *can* do infinitely better.

WHAT ARE OUR PROBLEMS?

1. Detection: We wait too late. 80% of all a child will learn is accomplished by the age of 6 (Bloom has estimated that 50% is learned by the age of 4). 60% of all a child will ever be able to accomplish physically has been accomplished by age 8. These physical abilities are important because they are one of our perceptual modalities and in part are a yardstick of our degree or maturation.

2. Labeling: Experience in the educational field alone has shown that we must label. We label our grades kindergarten, 1, 2, 3, 4, etc. We give grades A, B, C, D, E, etc. In fact an example of my own involvement in this was that of a student at the University of Florida Medical School. We did away with grades. We gave only passing or failing. However, it became readily apparent that there were some who were doing superior work so the grade of superior was added, and then, subsequently, the professors found that some people who were passing were only barely passing so the grade of "pass minus" was given, so we ended up with superior, pass, pass minus and fail, back to the old A, B, C, D method. But most importantly we label IQ wise. Very often a verbal test is given to ascertain the functioning IQ of a child but usually these children are non-verbal, normal children, that is, they are normal in all respects except that they score very poorly on verbal tests. The scores subsequently are low and the child is labeled as mentally retarded. With this he is injected into the educational system as a mentally retarded child and often he stays there until he is ejected out

3. We err *too* often: Very often one misses a diagnosis but more tragically is the fact that no one ever, or rarely, challenges the authorities, if they do, they are considered rabble rousers. For instance, the mother who knows that her child is normal but who beleaguers the school authorities to re-evaluate the child knowing that he should be in the regular classroom. All too often these mothers are right but the manner in which the children are evaluated is really not adequate. Just as too often, the child who has a relative amount of emotional overlay, is assumed to be able to do well if "he would only try". The root problem is not seen, that is, the specific problem that is causing this child's inability to learn and faced with failure time and time again, he then develops a reactive attitude toward it and then appears to be the troublemaker.

4. What can be done? We must update constantly our screening procedures, but we must screen and we must screen early. If we waited until age 5 or 6 to screen when our children have already learned 60% of all they will ever learn and have already learned it in a wrongly and/or inadequate manner, then they start out with two strikes against them. We must have kindergarten and pre-kindergarten screening and then we must have the facilities and educational therapists to educate these children. We must stop labeling and we must evaluate and re-evaluate constantly. We must challenge ourselves and our diagnoses and we must become part of a team. There is no room for an individual appraisal of these children. Each discipline is vital if a truly comprehensive and effective program is to be provided.

I would like to give an example of how a team approached the problem of Educable Mentally Retarded children. This team was located in the Fullerton Union High School District of Fullerton, California. This team consisted of a learning specialist, a psychologist, a teacher of the educable handicapped children, school nurse, a representative of the administration and a physician. Fullerton Union High School District consists of 7 high schools of 1500 to 2200 children per school, with an average of approximately 14,000 students to 20,000 students attending in any one given year. The special programs provided under the Department of Pupil services are designed and administered by Mr. Walter Retzlaff. The classes for the EMR receive their students primarily from a feeder system of the elementary and junior high school districts with additional students coming in as new referrals. On an intake evaluation the child is given regular IQ testing, utilizing the Wechsler Intelligence Scale for Children (WISC). Why, would one ask is this specific test given? Most M.R. have a verbal disability. The WISC will comprehensively evaluate those strengths in the performance areas. Specific nonverbal tests are given. If subtests on the WISC indicate an impression of unexpected deficiency in the communicative areas, then an Illinois Test for Psycho-Linguistic Abilities (I.T.P.A.) is given. By this means we specifically designate the areas of perceptual/communicative dysfunction elucidated and then educational therapy is started. This educational therapy is specifically tailored for each child and for each specific learning problem. These children will then advance to a transitional program. This has recently been more specifically called an integrated program in which the child enters into the regular program attending regular class with regular students, but he returns back to the MER classroom for specific help in his problem areas. The result of all this is that at graduation this child graduates as a high school graduate and is awarded a diploma rather than a certificate of completion. This is *Success!* Just as important as the intelligence testing, the child has been given a full care study including developmental history and with the utilization of the full committee involvement, the objectives of education and the needs of each individual are determined. This program was started in 1969-1970 school year and has involved since then a total of 355 students.

Now I would like to ask the question, specifically, to those present. Why is there no more interest and effort on the part of the state and national governments directed to this enormously vital area of child health? Why are some areas of our nation and even our state leaps and bounds ahead of others in incorporating and putting in to use in the school programs what we already know about learning problems in children? Why is one citizen and taxpayer given up-to-date scientific educational programs (though they are a rarity) while other children still learn under the circumstances and with the tools common at the turn of the century? I do not hesitate to criticize because my criticism is a challenge. Also, I have recommendations that I frequently and freely give and I am happy to use this meeting as a platform for such.

1. My first recommendation is for a kindergarten program, state and/or federally funded as a part of the regular educational profile available to each child. This must not be an extension of the nursery school and baby sitting programs, but an integral part of the learning process. Screening for this program should begin in the 3 and 4 year olds. We must recognize the mentally gifted early as well as the disabled. At this time the child should have available to him an educational program of which he may take advantage if it is the desire of the parent just as our programs are available now. Certainly, if a child's problem is detected early and if the parents are motivated, they will take advantage of the educational programs available to benefit their children whether it is an advanced or accelerated program for the mentally gifted or if it is a program tailor made to remediate the learning problems of the child that had been detected. Re-evaluations yearly until the child has entered into the educational

experience should greatly limit the number of children who will end up as educationally handicapped youngsters in their preteens.

2. When the child has begun his educational experience, he should not be labeled and hampered by artificial categories, e.g., MR, kindergarten, first grade, mentally gifted, etc., but he should have a *fluid* program through which he may move at the pace that he can best achieve his maximum. Grades only tantalize and punish the exceptional student and in the "regular" student grades indoctrinate them to score high, not necessarily learn.

3. I recommend a living wage for teachers commensurate with the responsibility not their worth. We pay them *less* than any other professional and most of our laborers. We must encourage excellence in our teachers and we must assist them in updating their techniques. As we motivate our children so must we motivate our teachers. We must have more and more educational therapists to deal with the exceptional student.

4. I recommend state workshops, district workshops, national workshops. We must disseminate what we know to the rest of our colleagues. We must constantly update ourselves. Less important is the huge umbrella of federal investigation into problems of children, if it is only going to stay in Washington. These people who investigate problems of children interpret the needs of the individual, provide programs and then delegate responsibiilty should be out in the fields, seeing what the problems really are. We must have local representatives in Washington telling our academicians what their problems are in their local communities. We must have these local people, teachers, therapists, physicians, not only available, but involved in the process of providing programs.

5. To challenge our programs there must be ongoing research just as in cancer or heart disease. We must look for the etiology of our disabilities as well as for their specific therapy.

COAST GUARD WEEK

HON. NICK BEGICH

OF ALASKA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 15, 1972

Mr. BEGICH. Mr. Speaker, a proclamation by Alaska State Governor William A. Egan emphasizes the close and effective relationship between the U.S. Coast Guard and the State of Alaska. August 4, 1790 marked the creation of the Coast Guard, and August 12, 1967, was the date that the town of Sitka welcomed the Alaska Patrol. Since the occasions fall so closely together, the week of July 31 through August 5, 1972, has been proclaimed as Coast Guard Week in Alaska.

The proclamation follows:

PROCLAMATION—COAST GUARD WEEK

One hundred and eighty-two years ago, on August 4, 1790, President George Washington signed into law a bill creating the young Nation's first sea-going military force. The act called for the establishment and support of ten cutters for the purpose of enforcing customs laws. Called the Revenue Cutter Service, the agency grew with the years, joining together with the Lifesaving Service, Lighthouse Service, and the Bureau of Marine Inspection and Navigation. Today this multi-missioned service is known as the United States Coast Guard.

Seventy-seven years after President Washington signed that bill, on August 12, 1867, the remote and rugged town of Sitka, located in the brand-new Alaska Purchase, welcomed the first in a long series of distinguished visitors. The Revenue Cutter Lincoln had arrived to establish a service that continues to this day—the Alaska Patrol.

These two anniversaries, falling as closely together as they do, emphasize the close and effective relationship that has always existed between the Coast Guard and the State of Alaska. From Barrow to Ketchikan, Coast Guardsmen of the Seventeenth District provide the search and rescue, law enforcement, marine safety, environmental protection, and aids to navigation services so essential to a state nearly surrounded by the sea.

With a new base at Kodiak, new helicopters at Kodiak and Annette, and new challenges from the Arctic Circle to Valdez, the Coast Guard in Alaska is entering a period of growth and development that matches perfectly the vigor and spirit of the Forty-ninth State.

Therefore, I, William A. Egan, Governor of Alaska, proclaim the week of July 31 through August 5, 1972, as Coast Guard Week in Alaska. It has been 182 years since the establishment of this proud service, and few realize as well as Alaskans how well it has lived up to its motto: "Semper Paratus"—Always Ready.

Dated this 28th day of July, 1972.

PUBLIC WORKS AND ECONOMIC DEVELOPMENT ACT AMENDMENTS OF 1972

HON. JOHN A. BLATNIK

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 15, 1972

Mr. BLATNIK. Mr. Speaker, on August 7 the Committee on Public Works reported favorably H.R. 16071, containing amendments to the Public Works and Economic Development Act of 1965. Subject to a rule being granted on H.R. 16071, this bill is scheduled for floor action on Wednesday of this week.

The continuing problem of high unemployment in the Nation, with almost 5 million of our citizens without jobs, makes H.R. 16071 of utmost importance at this time. The bill contains a number of very important provisions aimed at immediately reducing unemployment and at fostering long-term economic growth.

Included among these provisions is extension for an additional year, through fiscal 1974, of the existing economic development program, which is designed to assist in the long-term economic growth of depressed areas and regions of the Nation.

Also included in the bill is expansion of the highly successful program of public works acceleration enacted into law last year to help in providing immediate employment for the jobless through construction of badly needed public works projects.

H.R. 16071 also addresses several important areas of concern through new provisions designed to assist businesses threatened with shutdown and individuals who become unemployed because of standards and orders issued to improve the quality of our Nation's environment.

With permission, I would like to insert in the RECORD at this point a complete analysis of H.R. 16071 for Members to examine before the bill comes to the floor this week. The analysis is as follows:

H.R. 16071: SECTION-BY-SECTION ANALYSIS, PUBLIC WORKS AND ECONOMIC DEVELOPMENT ACT AMENDMENTS OF 1972

	Section of bill	Amends act section
Amends statement of purpose	2	
Would add 2 new sentences to the purpose clause to recognize that economic distress has brought about substantial migration which is frustrating orderly national growth and aggravating economic and social conditions in both rural areas and central cities, and that orderly growth should recognize economic disorders.		2.
Amends title I (public facility grants and supplementary grants).	3	3.
Technical amendment to correct reference to identify new section number for Public Works impact program criteria.	3(1)	101(a)(1)(D).
Reduces the required minimum non-Federal share of aggregate cost of a project from 20 percent to 10 percent.	3(2)	101(c).
Technical amendment to correct reference to identify new section number for areas designated under the public works impact program.	3(3)	101(c)
Deletes the sentence that requires that supplemental grant funds be for the sole purpose of increasing the Federal contribution above the fixed maximum portion of the cost of a project otherwise authorized by the applicable law.	3(4)	101(c)
Deletes the language that requires the Secretary, in determining the amount of the supplemental grant, to take into consideration the amount of user charges or other revenues a project may reasonably be expected to generate over and above costs for operation and maintenance.	3(5)	101(c)
Technical amendments to strike the phrase, "In addition to the assistance otherwise authorized" to eliminate possible inference that other assistance is authorized for the areas designated under this section.	3(6)	102(a)
Technical amendments to retain Appalachian assistance restrictions on projects approved under this title other than public works impact programs.	3(7)	104
Extends the annual authorization of $800,000,000 through fiscal year 1974 for projects under this title other than public works impact projects.	3(8)	105
Adds new sec. 107 to set out criteria for designation of "public works impact areas" and to authorize appropriations for public works impact program. Authorizes an annual appropriation up to $500,000,000 for fiscal years 1973 and 1974.	3(9)	
Amends title II (Public Facility Loans and Financial Assistance for Business Development).	4	
Extends annual authorization of $170,000,000 for assistance under this title for fiscal year 1974.	4(1)	201(c).
Amends catchline for business loan program to be "Financial Assistance for Business Development."	4(2)	202.
Rewrites subsection to include, in addition to what already is authorized in this section, new tools for guaranteeing loans and leases to private borrowers up to 90 percent of the outstanding balance of a loan and up to 90 percent of the remaining rental payments under a lease.	4(3)	202(a).
Includes guarantees under restrictions on financial assistance.	4(4)	202(b)(6).
Extends 25-year time limit on term of loans to include guarantees.	4(5)	202(b)(7)
Increases maximum Federal loan assistance participation under this section from 65 percent to 75 percent.	4(6)	202(b)(9)
Amends title III (Technical Assistance Research and Information).	5	

	Section of bill	Amends act section
Adds language to permit the Secretary to assist applicants in applying for assistance where the applicant does not possess the expertise or the ability to obtain the expertise necessary to perform the technical aspects of application.	5(1)	301(a)
Permits the Secretary to defray up to 100 percent of the economic development planning expenses of an Indian tribe.	5(2)	301(b)
Inserts a more accurate reference to planning and research grants authorized under the Federal highway laws.	5(3)	301(b)
Adds two new subsections: subsec. (g) is added to authorize assistance to States to: (1) prepare State OEDP's (2) provide State assistance to economic development districts; and (3) review district OEDP's in order to better coordinate planning on State and district levels. Subsec. (h) is added to authorize the Secretary to provide assistance to economic development districts to better coordinate planning between districts and local government and to provide financial assistance to districts that have the responsibility of Federal review process.	5(4)	301
Would redesignate sec. 302 as sec. 303. New 302 would authorize grants for the operation of vocational training facilities constructed with grants from title I of this act. Such grants may be made up to 75 percent of operation costs within any 2-year period during 5-year period beginning with the date of enactment of this amendment. Not more than $15,000,000 per year would be made available for this purpose.	5(5)	302
Extends authorization of $50,000,000 per fiscal year to carry out this title for fiscal year 1974.	5(6)	303
Amends title IV (Area and District Eligibility)	6	
Redefines special impact areas as both urban and rural communities suffering from low income, substantial unemployment, or threatened abrupt rise in unemployment.	6(1)	401 (a) (6)
Reduces economic development district requirement of two redevelopment areas to 1 redevelopment area.	6(2)	403(a)(1)(B)
Rewrites subparagraph to expand district criteria to require that each State approve district plans as being consistent with State plans and to require that approved district plans be furnished to the appropriate Regional Commission.	6(3)	403 (a) (1) (D)
Amends subpar. which presently limits "economic development centers" to areas with a population up to 250,000 to areas with a population up to 500,000.	6(4)	403(a) (2) (C)
Combines existing definition subsecs. (d) (e) and (f) into new subsection (d). New subsection (e) permits assistance to nonredevelopment areas within a district when such assistance would be of significant direct benefit to a redevelopment area in such district. New subsec. (f) assures a minimum of 5 years of administrative and planning grants up to 75 percent and 100 percent respectively, and provides a separate authorization of $20,000,000 per fiscal year for fiscal years 1973 and 1974 for such district funding.	6(5)	403(d) (e) (f)
Extends existing annual authorization of $50,000,000 for assistance to economical development centers and bonuses to redevelopment areas within districts through fiscal year 1974.	6(6)	403(g).
Amends title V (Regional Action Planning Commissions) Adds to the functions of the commission the requirement that commissions consider district plans be considered in developing comprehensive and coordinated plans and programs, and in establishing priorities in the region.	7(a) 7(a)(1)	503(a)(7).
Adds a new subsec. (f) to require commissions to provide for public participation in their planning process.	7(a)(2)	503.
Adds the payment of administrative expenses to the commissions' existing authority for technical and planning assistance.	7(a)(3)	505(a)(2).
Rewrites subsection to permit the Secretary to deduct such sums as are necessary for technical assistance provided by the Secretary to the Commissions, for expenses of the Federal cochairmen and staff, and for the Federal share of Commission expenses out of the appropriations to each regional commission but not to exceed 10 percent of such appropriation.	7(a)(4)	505(c).
Rewrites sec. 509(d) as 509(d)(1) to provide for the addition of a new subsec. (d)(2).	7(a)(5)	505(d).
Changes a 2-fiscal-year authorization for fiscal years 1972 and 1973 of $305,000,000 to a 1-fiscal-year authorization for fiscal year 1972 of $152,500,000.	7(a)(6)	509(d).
Technical amendment changing word "authorization" to "paragraph" to reflect new authorization paragraph" (2).	7(a)(7)	509(d)
Adds a new para. (2) to authorize for fiscal years 1973 and 1974 $100,000,000 annually for each regional commission with an economic plan approved by the Secretary and up to $20,000,000 annually for each regional commission without an approved economic plan.	7(a)(8)	509(d).
Rewrites sec. 511 as new subsec. 511(a) to add technical assistance grants to the activities that the Secretary and each Federal cochairman must coordinate. New subsec. 511(b) adds the requirement that each regional commission coordinate with districts within the region in preparing long-range regional overall economic development programs under sec. 503(a)(2) and in developing continuing comprehensive plans and programs and in establishing priorities as required under sec. 503(a)(7).	7(a)(9)	511.
A freestanding amendment which refers to sec. 7(a)(2) of the bill which declares that this section is not to be construed as affecting any plan or program developed or revised prior to the date of enactment of this legislation.	7(b)	
Amends title VII (Powers of Secretary).	8	
Includes in this paragraph guarantees made by the Secretary to authorize the Secretary to dispose of property and collect, compromise, or dispose of obligations held in connection with guarantees made by him.	8(1)	701(4)
Includes in this paragraph guarantees made by the Secretary to authorize the Secretary to extend the terms of guarantees for an additional period of not more than 10 years to aid in orderly liquidation.	8(2)	701(5)
Includes in this paragraph guarantees made by the Secretary to authorize the Secretary to deal with, alter, or sell real or personal property acquired by him in connection with guarantees made.	8(3)	701(6)
Includes in this paragraph guarantees made by the Secretary to authorize the Secretary to pursue to final collection claims against 3d parties in connection with guarantees made under the act.	8(4)	701(7)
Includes in this paragraph guarantees made by the Secretary to authorize the Secretary to take all actions desirable in administratively dealing with or realizing on guarantees made.	8(5)	701(9).
New title VIII—Environmental effects: Adds new sec. 801 authorizing $100,000,000 for the Secretary to provide to each individual certified as being unemployed as a result of an environmental standard or order assistance in the following manner: (1) Unemployment compensation equal to at least 60 percent of the individual's former weekly wage to be paid as long as he is unemployed or until he retires from the labor force but in no event more than 78 weeks; (2) Mortgage and rental payments up to 1 year for those individuals who have received notice of foreclosure on mortgage or eviction from principal place of residence; (3) Reemployment assistance authorized under other laws; (4) moving expenses for family and effects when unable to find employment at a reasonable distance but does find employment beyond such distance. Adds new sec. 802 to preserve jobs that otherwise would be lost as a result of the enforcement of environmental control legislation by providing long-term low-interest (30-year, 3 percent) loans to business enterprises for pollution control. Would authorize $100,000,000 annually for fiscal years 1973 and 1974 for this purpose.	9	
Amends sec. 2 of the act of July 6, 1970 (Public Law 91–304) as amended, to extend the moratorium on redevelopment area de-designation to June 1, 1974.	10	
Amends act to rename "economic development center" or "economic development centers" as "economic growth center" or "economic growth centers".	11	

MASSACRE IN BINHDINH

HON. BOB WILSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 15, 1972

Mr. BOB WILSON. Mr. Speaker, I include the following editorial from the Evening Star, published August 14, 1972:

AN EDITORIAL—MASSACRE IN BINHDINH

It is a fervently held article of liberal faith that if the United States will just get out of Indochina, all will be sweetness and light among the Vietnamese people, North and South, Communist and non-Communist. Those who chant this doxology ignore the execution of thousands of Vietnamese and flight of tens of thousands more when the Communists took over in the North in 1954. They ignore the mass graves containing the bodies of more than 2,600 South Vietnamese civilians murdered at Hue during the 1968 Tet offensive. So they should have no difficulty whatsoever in glossing over the less numerous casualities of the more calculated reign of terror which has taken place at Binhdinh province on the central coast of South Vietnam the past three months.

Binhdinh fell quickly to the North Vietnamese in early April and it was not until July that Saigon's forces launched a serious effort to retake it. So the Communists had plenty of time. There was no need to hurry, as there was in Hue in 1968, when American and South Vietnamese forces counterattacked within days of the city's fall.

According to intelligence reports and on-the-spot interviews with survivors, the Communists were extremely methodical. They rounded up hamlet and village chiefs, pacification workers, policemen, militiamen, teachers, doctors, nurses, clerical workers, literally anyone who had had any connection with the Saigon government. "People's courts" executed several hundred (perhaps as many as 500) and shipped an estimated 6,000 others off to "people's prisons" in remote areas of the Communist-held Anlao valley. Most of those killed apparently were executed by rifle fire but others were buried alive, beheaded or hacked to pieces.

None of this represents any new departure in tactics on Hanoi's part. Aside from the general massacres in the North in 1954 and in the South during the 1968 Tet offensive, the murder and kidnaping of South Vietnamese officials has been part and parcel of Communist "liberation" since the war began. In the past four and a half years, nearly 25,000 South Vietnamese civilians and officials have been executed by the North Vietnamese Communists and the Viet Cong.

There have, of course, been atrocities on the Allied side. But anyone who is still prepared to maintain that a Communist takeover in South Vietnam would not lead to a bloodbath of major dimensions is simply ignoring the evidence at hand. A politician like Senator McGovern, who advocates a quick and unilateral American withdrawal from Southeast Asia, need look no farther than the shallow graves of Binhdinh province to see where the policies he advocates would lead those who have placed their trust in the United States.

"THE NEW FRONTIER"

HON. JOHN W. DAVIS

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 15, 1972

Mr. DAVIS of Georgia. Mr. Speaker, I would like to bring to your attention and to the attention of all the Members of Congress a poem entitled "The New Frontier." This fine poem was written by Ronnie Ted Shiflett, a good friend and constituent from Rome, Ga. I am sure that we are all grateful to Ronnie Shiflett for his moving poem, dedicated to the memory of our late President John F. Kennedy, and I commend it for the edification and enjoyment of all as follows:

DEDICATED TO THE MEMORY OF OUR LATE PRESIDENT, JOHN F. KENNEDY

(By Ronnie Ted Shiflett)

The tides of time are drifting high
Above the earth to wash the sky
And one by one, each surging wave
Shall flow into a twilight bay

The tides of time are drifting high
Above the rocks along the shore
And one by one, each sweeping wave
Shall cleanse the sand forevermore

The tides of time are drifting high
Beyond this world of darkening sod
To send it's spray on yonder shore
And wash the face of God

The tides of time are drifting high
Beyond the old for a new frontier
And every wave shall wash away
Every dark and troublesome fear
From every weary heart that hears,
The tides of time are drifting high—

STAMPS THAT HONOR ILLINOIS

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 15, 1972

Mr. DERWINSKI. Mr. Speaker, Illinois, the eighth State to be admitted to the Union after the Original Thirteen, has played an important role in the history of our Republic. One of her sons was the civilian who led the Nation through the terrible conflict that threatened to permanently divide it, while another was the military leader who was in the forefront of the fight against the forces of disunion. Many other Illinoisans have had an influence that extended far beyond the borders of the State.

Mr. Speaker, as a member of the House Post Office and Civil Service Committee, I naturally maintain an interest in both the history and the new developments in the Postal Service, and I am pleased to direct the attention of the Members to a historic review of stamps issued which properly commemorates achievements relating to my home State of Illinois and its outstanding citizens.

The Post Office has, from time to time, beginning in 1866, issued stamps that pertain to Illinois individuals, organizations, and events. Knowing that philatelists and students of history are interested in such data, I am inserting a list of these issues in the RECORD.

The list follows:

The following stamps have honored Abraham Lincoln:

In 1866, 15 cents, black; 1869, 90 cents, carmine and black; 1870, 6 cents, carmine; 1890, 4 cents, dark brown; 1894, 4 cents, dark brown; 1902, 5 cents, blue; 1909, 2 cents, carmine; 1922, 3 cents, violet; 1938, 16 cents, black.

October 20, 1940; 3 cents, deep violet with "Emancipation," a statue of Lincoln and a slave, commemorates the 75th anniversary of the 13th amendment to the Constitution.

July 7, 1942: 5 cents, bright blue with Lincoln, Sun Yat-sen, and map of China, commemorates 5 years' resistance of the Chinese people to Japanese aggression.

November 19, 1948: 3 cents, bright blue with Lincoln and a quotation from his Gettysburg Address, commemorates the 85th anniversary of the address.

In 1954, 4 cents red violet.

August 27, 1958: 4 cents sepia with Lincoln and Stephen Arnold Douglas, another Illinoisan, debating, commemorates the centenary of the Lincoln-Douglas debates.

February 12, 1959, 1 cent green; February 27, 1959, 3 cents purple; and, May 30, 1959, 4 cents dark blue, commemorate the sesquicentennial of Lincoln's birth.

November 19, 1960: 4 cents magenta and green, contains a Lincoln quotation.

In 1960, 25 cents black and maroon airmail.

August 16, 1963: 5 cents dark blue, black, and red, commemorates the centenary of Lincoln's Emancipation Proclamation and contains a Lincoln quotation.

April 9, 1965: 5 cents Prussian blue and black, which contains a Lincoln quotation, commemorates the centenary of Gen. Robert E. Lee's surrender to Gen. Ulysses S. Grant at Appomattox Courthouse.

November 19, 1965: 4 cents black.

Besides the Lincoln stamp that was issued on April 9, 1965, the following postage stamps have honored Grant: 1890, 5 cents chocolate; 1894, 5 cents chocolate; 1903, 4 cents brown; 1923, 8 cents olive green; 1937, 3 cents purple with Gens. William T. Sherman and Philip H. Sheridan; 1938, 18 cents brown carmine.

The following stamps commemorate the World's Columbian Exposition that was held in Chicago from May 1 to October 30, 1893, in observance of the quadricentennial of the discovery of America by Christopher Columbus on October 12, 1492:

Columbus in sight of land, 1 cent deep blue; landing of Columbus, 2 cents violet; flagship of Columbus, 3 cents green; fleet of Columbus, 4 cents ultramarine; Columbus soliciting aid from Isabella, 5 cents chocolate; Columbus welcomed at Barcelona, 6 cents purple; Columbus restored to favor, 8 cents magenta; Columbus presenting natives, 10 cents black brown; Columbus announcing his discovery, 15 cents dark green; Columbus at La Rabida, 30 cents orange brown; recall of Columbus, 50 cents slate blue; Isabella pledging her jewels, $1 salmon; Columbus in chains, $2 brown red; Columbus describing his third voyage, $3 yellow green; Isabella and Columbus, $4 crimson lake; Columbus, $5 black.

Among the stamps that commemorate the Trans-Mississippi Exposition that was held in Omaha, Nebr., from June 1 to November 1, 1898, was the $2 orange brown which was issued June 17, 1898. Appearing on this stamp is the bridge across the Mississippi River that connected East St. Louis, Ill., and St. Louis, Mo.

The following stamps commemorate the Century of Progress International Exhibition that was held in Chicago during 1933, the centenary of the incorporation of Chicago as a city: May 25, 1933, 1 cent yellow green; restoration of Fort Dearborn, 3 cents violet; Federal building, Chicago, October 2, 1933, 50 cents green airmail issued in connection with the flight of the "Graf Zeppelin" in October 1933, to Miami, Akron, and Chicago, and from Chicago to Europe.

Other stamps of significance to Chicagoans and other Illinoisans include the following:

In 1940: 10 cents dark brown honors Jane Addams, social worker; 3 cents bright red violet honors Cyrus Hall McCormick, inventor; 5 cents ultramarine honors Frances Elizabeth Caroline Willard, who was president of Evanston College for Ladies until it merged with Northwestern University, when she became dean of that institution's woman's college.

February 23, 1955: 8-cent deep blue commemorates the 50th anniversary of the founding of Rotary International; a Chicagoan organized the first Rotary

Club in 1905 and the organization's headquarters are in Evanston, Ill.

August 27, 1959: 10-cent violet blue and bright red airmail commemorates the third Pan American Games, which were held in Chicago from August 27 to September 7, 1959.

September 14, 1959: 4-cent green commemorates the centenary of the American Dental Association, which has its headquarters in Chicago.

October 23, 1965: 5-cent pale blue, black, carmine, and violet blue honors Adlai Ewing Stevenson, who was Governor of Illinois from 1949 to 1953 and the Democratic candidate for President of the United States in 1952 and 1956.

June 8, 1966: 2-cent dark blue and gray honors Frank Lloyd Wright, Chicago architect who became internationally famous.

July 5, 1967: 5-cent blue, red, and black publicizes the search for peace, which was the theme of an essay contest for young men and women sponsored by Lions International on its 50th anniversary; the organization was founded June 7, 1917, in Chicago, where it has its headquarters.

February 12, 1968: 6-cent blue, gold, and pink commemorates the sesquicentennial of Illinois' admission to the Union.

The support-our-youth 6-cent red and blue stamp, which was issued during "National Youth Week" in 1968, was sponsored by the Benevolent and Protective Order of Elks as part of the lodge's centennial observance; its headquarters are in Chicago.

August 22, 1970: 6-cent black and olive bister honors Edgar Lee Masters, Chicago lawyer, who was famous for his poetic tribute to Ann Rutledge.

DIKE BOMBING AND JANE FONDA

HON. LAWRENCE J. HOGAN

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 15, 1972

Mr. HOGAN. Mr. Speaker, the press has recently given a great deal of time and attention to actress Jane Fonda's activities as a guest of the Hanoi Government. I am shocked and outraged by Miss Fonda's denunciation of her country, and her defense of our foes, and I see no difference between her actions and those of the World War II propagandists Axis Sally and Tokyo Rose.

Mr. Bertram Kalisch, of Brandywine, Md., agrees with me. The Washington Star-News printed his letter to the editor on July 31, 1972. For the information of my colleagues, I insert that letter into the RECORD.

The letter follows:

DIKE BOMBING AND JANE FONDA

SIR: By headlines such as "Dikes Bombed, Cleric Says" and "Reds Quote Jane Fonda" it is easy to see where the enemy gets its "aid and comfort" these days.

Apparently, Dr. Eugene Carson Blake of the World Council of Churches and Jane Fonda, Oscar winner and international babe in the woods, have joined the Anti Decatur Club with the perverted motto: "My country, always wrong!"

Blake, pontifically wrapped in his World Churches' mantle, quotes Hanoi news sources to declare that American explanations that "no bombing has occurred . . . must be . . . untrue."

While Miss Jane from Hanoi, says she saw bombed ruins "with my own eyes . . . and there are no military targets."

With such "prophetic" and "military" geniuses to advise us, all the President need do is call them to find out what's what. Of course, he may have to wait until these self-appointed know-it-alls call the Hanoi party line; but what are the facts to these fantasy fanatics?

Where were they when the Viet Cong were committing genocide in South Vietnam? Or when the "popular Red offensive" shelled cities for "terror effect" and caused thousands to flee south to avoid the Red shells and rockets?

Some day, may the cleric playing politics and the actress turned instant military expert meet in the Vietnam jungle and return to the primitive life of "Me Gene—you Jane" swinging from tree to tree.

They've already made monkeys of themselves, dancing to the tune of the Hanoi organ grinders.

BERTRAM KALISCH.

Brandywine, Md.

TEAMSTERS PENSION FUND AND ORGANIZED CRIME

HON. SAM STEIGER

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 15, 1972

Mr. STEIGER of Arizona. Mr. Speaker, yesterday the first part of the article entitled "Central States Pension Fund" appeared in the CONGRESSIONAL RECORD, today I would like to call your attention to the second part of the article: "Central States Pension Fund Loans in Michigan":

CENTRAL STATES PENSION FUND LOANS IN MICHIGAN

TALES OF FRAUD, KICKBACKS, AND THE MAFIA

Central States Pension Fund loans to businesses in Michigan do not involve the largest amounts loaned by the Fund, nor are they the most spectacular in any other way. In fact, what one could say with a great deal of certainty is that they are typical of the loans granted by the Pension Fund. In this respect, however, a "typical" loan by the Fund has come to include, in many cases, bankruptcy, fraud, kickbacks and the Mafia.

As near as can be determined, the first Pension Fund loan in Michigan was made in June, 1959 to the Park Plaza Motor Hotel in Birmingham, Michigan. The amount borrowed was $500,000. As of April, 1972—just about 13 years later—the balance was $202,335. Had that money been put in a savings account which paid 6% interest, the Fund would now have the original $500,000, plus $390,000 in interest.

A lengthy investigation by OVERDRIVE has discovered that there have been 27 Pension Fund loans made in Michigan, totaling over $32 million. As of April this year, the outstanding balance on these loans came to approximately $28 million. Among those who got money commitments from the central states pension fund are:

Pension fund money in Michigan

Fleetwing Terminal in Detroit—$300,000 in 1959. This money was lent even though, according to Pension Fund records, the company was in "a financial straitjacket." Even as far back as May, 1962, Fleetwing still owed the Fund a balance of $251,000.

In the same year, the Park Plaza Motor Hotel in Birmingham received a $500,000 loan. As already mentioned, a balance of over $202,000 is still outstanding.

Detroit's Henrose Hotel borrowed $1,600,000 in 1960, and was in financial trouble almost from the beginning. Almost no taxes, principal or interest was ever repaid, and Henrose finished its career in bankruptcy.

The Robinson office building in Detroit was the recipient of a $335,000 loan in 1959. Financial difficulties were run into as early as 1962, and the loan balance today is over $302,000.

Country club where the Mafia belongs

In 1961, the Hillcrest Country Club received a $75,000 loan commitment. Hillcrest is referred to, among many circles, as "The Country Club Where the Mafia Belongs." These members of Detroit's Mafia have been identified as having Class A memberships at Hillcrest: Michael Santo Polizzi, William (Black Bill) Tocco, Anthony and Vito Giacalone, Anthony Zerilli, and Ronald (The Enforcer) Morelli. Rubbing elbows with these members, say concerned law enforcement officials, are a number of judges.

Bancroft Nursing Home in Detroit borrowed $1,100,000 in 1962; in April, 1972, the balance was $439,000.

The same year was a lucky one for Transport Realty, which got an OK for $250,000. During the same period, the go-ahead was given to Detroit Harbor Terminal for $5 million, and Dearborn Machinery Moving for $1,250,000.

In 1963, St. Anne's Convalescent Center in Detroit borrowed $200,000. As of this year, $109,000 is still owed.

You pay the fund; it pays you

In the same year, Peoples Outfitting of Detroit received a $500,000 loan. To date, records indicate $355,000 is still owing. It is also interesting to note that the employees of this company are Teamsters members, and Peoples pays weekly amounts into the Pension Fund for the supposed benefit of these workers.

Jacob Kozloff, an "associate" of former Nevada Lt. Governor Cliff Jones, and who has been linked to the shadowy world of relationships between Bobby Baker and the Mafia, borrowed $243,000 from the Fund in 1964, and the business it was for went into bankruptcy before the loan was repaid.

Detroit's Curtis Steel Corporation also borrowed money in 1964. Their original loan of $150,000 is still $93,000 short of being repaid.

In 1965, Kirkwood General Hospital in Detroit received a $1,306,500 loan from the Fund. Between then and July, 1968, a series of Fund loans flowed to them, finally totaling $2,334,500. Four years later, they still owe over $2 million to the Fund.

A development called Professional Plaza in Detroit borrowed $4,860,000 in 1966. This year, they have managed to show a balance owed of more than was borrowed: $5,088,000.

The Shenandoah Golf Club in Detroit received $553,000 in 1968, and now owes $461,000 on it.

Another Detroit hospital—Northwest General—applied for and got a $1,426,333 loan in 1969; their balance is currently $1,229,707.

Half a million to Long Transportation

A face well-known to truckers in the midwest borrowed from the Fund in 1970: Wayne Long of Long Transportation in Detroit received a loan of $554,000. Two years later, he still owed $538,670 on it. Although it has been checked into, no one seems to be able to learn what the money was used for.

Another 1970 loan shows even less repayment. An outfit called A & C Promotions, Inc., borrowed $50,055 on a supper club in

Crystal Falls Early this year, they still owed $50,085 on the two-year old loan.

In apparent keeping with repayment schedules on loans made in 1970 is the H. F. Campbell Company in Detroit. Two years ago, they borrowed $2,300,000. This year, they still owe $2,185,880.

"High risk" but gets loan anyway

Built Right Center, Inc., of Detroit, for example, borrowed $120,000 from the Fund in April, 1971. This loan, it would be presumed, was made because the company was stable enough to pay back the loan, plus interest. However, records obtained from the Michigan Treasury Department show that Built Right's financial condition, just four months before the loan was made, left something to be desired.

One CPA who reviewed their tax form said that he considered them a "high risk," and that this was the type of business that "no bank in the United States would loan money to." Perhaps that is why Built Right owed—two years later—$141,903 on their $120,000 loan.

But, Built Right Center is not alone when it comes to being in shaky condition when borrowing money from the Fund.

Flint Motor Inn, located in Flint borrowed $1,425,000 in November, 1970. Treasury Department documents for the period prior to that (December 31, 1969) show that Flint Motor had $2 million in outstanding long term loans, $581,031 in currently due bills, and had just declared a deficit of $242,431. Yet Flint Motor Inn received their loan less than a year later. As of April, 1972, they still owed $1,383,888 on it.

Loan arranger is Mafia figure

Pension Fund loans have been made to Michigan companies controlled by the Mafia. One such company is the Home Juice Company in Detroit. In August, 1964, Home Juice received a $500,000 loan from the Fund. The loan, according to several sources, was obtained when Anthony Giacalone made the arrangements with Jimmy Hoffa. Anthony's brother, Vito, was an officer of Home Juice Company, Inc., when the loan was made. The parent corporation of Home Juice is located in Melrose Park, Illinois, and has subsidiaries in Peoria, Milwaukee and Tulsa. As of this year, Home Juice still owed the Fund $309,609 on the loan. Although this particular loan by itself doesn't deviate from the pattern of those previously mentioned, those involved in obtaining the loan and running the company, are noteworthy for their other activities.

Overdrive has discovered that the loan arranger—Anthony Giacalone—is one of the directors of the Mafia in Detroit, and is considered their chief enforcer. His arrest/conviction record shows charges of armed robbery, extortion, bribery, felonious assault and rape. Giacalone is considered to be "most important" in Detroit's Mafia structure.

In 1966, Anthony attended the Teamsters convention in Miami Beach as a guest of Jimmy Hoffa, no less. Hoffa commented on Giacalone's presence as "showing respect for a responsible union," and praised Anthony lavishly. Other information has been obtained showing that Anthony Giacalone donated $25,017 to Hoffa's son, James P., when he unsuccessfully ran for a seat in the Michigan House of Representatives. What was especially interesting about this was that it was three times the total officially reported by Hoffa as campaign expenses.

Vito Giacalone, on the other hand, is a lesser official in the Detroit Mafia. Vito is listed as a lieutenant in the area's organized crime structure, and a "specialist" in gambling operations. In addition, he is considered "as tough as his brother as an enforcer." Vito's arrest record shows 13 entries since 1940.

Who gets the kickback?

Surprising to some, but not unusual within the Teamsters Union, is the method by which Mid-City Development Corporation in Detroit obtained a loan in August, 1964, Mid-City, a real estate firm, sought a $1,250,000 loan, but was told that it could only have $1,075,000. The balance of $175,000, it was explained to Mid-City, would have to come off the top for various kickbacks, bribes, etc. This, of course, is in keeping with the longstanding Pension Fund rule of kickbacks being no less than 10% of the total of the loan.

Mid-City, looking for a cut-rate deal, decided to go for the $1,075,000 loan. The cost of obtaining this amount was more reasonable. By going to a less highly-placed corrupter named Samuel Marroso, Mid-City was only required to pay a $25,000 kickback. Although Marroso is not in the top ten when it comes to arranging Central States loans, his credentials are impeccable: he is an ex-convict and ex-Teamsters Business Agent (which some may claim is saying the same thing twice) and has been convicted of conspiracy to solicit and accept bribes, income tax evasion, transporting counterfeit bonds and parole violation.

Central States auditor agrees to kickback

The problem for Mid-City still remained, however, as they claimed they still needed the additional $175,000. The company then approached James (Jimmy Doyle) Plumeri, a Mafia official in New York, and asked if he could be of help in arranging a Central States loan through New York. The Detroit Maffa learned of this proposal, and became justifiably angry. After all, the agreement among Mafia families is that companies within their jurisdiction must deal with the nearest Mafia family; not go outside the area.

Plumeri (currently dead as the result of a Mafia execution) made a deal whereby Central States Pension Fund auditor David Wenger would receive a $5,000 kickback for arranging the loan.

The ensuing jurisdictional quarrel that resulted between the New York and Detroit Mafia about who would receive what kickback was brought to the attention of the Mafia National Advisory Group. They ruled that an arbitration must take place. This meeting was held in Pittsburgh, and referred by Frank Amato, second-in-command of the Pittsburgh Mafia. Representing the New York Mafia at the meeting were: Salvatore (Sally Burns) Granello, Edward (Eddie Buff) Lanzieri, and Salvatore Celebrino. Pittsburgh's representation included John Larocca, chief of organized crime in western Pennsyvlania, and Mafia members Frank J. Rosa, Joseph Sica and Gabriel Mannario. Detroit's viewpoint was put forward by Marroso and Dominic (Fat Dominic) Corrado.

After the dispute was thoroughly aired, the decision was made that the entire loan would be handled by the Detroit Mafia (including kickbacks). After the loan and kickbacks had been finalized, the New York Mafia would receive a percentage.

$1 Million to Mafia-controlled company

The loans made to another Michigan company are also an insight into Detroit's Mafia. A total of $1,210,000 has been borrowed by Valley Die Cast Corporation in Detroit. The three loans made to them occurred between October, 1963 and February, 1971.

Until 1967, the President of Valley Die was Michael Santo Polizzi, one of the Directors of the Detroit Mafia who specializes in gambling. By the time Polizzi left, $910,000 in Central States loans had gone to the company. Valley Die was sold to Dallas-based Intercontinental Industries, but it is believed by several sources that although Polizzi is not there, his influence is. Lending credence to that theory is the fact that the Secretary of Valley Die is attorney William Murray, who is also the Secretary of another company in which Polizzi is the president, Diversified Platers, Inc., Detroit. It has also been learned that Attorney Murray has represented Polizzi and Mike Rubino, another Detroit Mafia figure.

Polizzi was recently convicted in Los Angeles on 6 felony counts involving the Detroit's Mafia's obtaining a hidden interest in Las Vegas' Frontier Hotel, and then "skimming" profits from it. Two other Mafia figures were convicted with Polizzi in that trial: Anthony Zerilli, son of the chief of the Detroit Mafia and an official in his own right, and Anthony Giardano, head of the St. Louis Mafia.

Fruehauf and a felon in same club

An interesting sidelight discovered by Overdrive is that Polizzi is a member of the exclusive Grosse Pointe Hunt Club outside of Detroit. One official of the club was asked if Polizzi's membership would be revoked because of his recent convictions. No, we were told, a conviction does not prohibit membership; only activities which bring discredit to the club. That answer seems to say something about what "activities" are referred to, and we would be curious to have some examples. In order to learn what these "activities" might be, we attempted to contact one of the Directors of the Grosse Pointe Hunt Club. The one we called was Harvey C. Fruehauf, Jr.. of the Fruehauf Trailer Company (and also a neighbor of Polizzi). As might have been expected, Mr. Fruehauf was never in to us.

Two of the current Directors of Valley Die are also associated with Intercontinental Industries. These men—S. Mort Zimmerman and Amon DeNur—pleaded guilty this past January to a total of 5 felony charges involving securities.

Although Valley Die has borrowed $1,210,000 from the Fund, they still owe $793,663. How the money benefited Valley Die is certainly open to speculation. A recent tax form of Valley Die was obtained by Overdrive, and a financial expert who reviewed it and said that, based on what it showed the financial condition of the company to be, Valley Die should have gone out of business.

$4 million to Gil Mains

The most questionable and spectacular Fund loan in Michigan was that to Gil Mains Truck City in Dearborn. Within two years of the first loan, a series of events took place involving the diversion of Pension Fund money to buy a bank, siphoning it off for personal use, and non-payment of the loan with virtually no accounting as to where over $4 million went.

The main cast of characters involved in this colossal scheme are Gil Mains, former Detroit Lions football star who was president of the truck stop, and the truck stop's vice-president, Charles Kassab, who, together with his brother Frederick, is said to have been involved in some "very disreputable real estate deals."

Central States money diverted in bank scheme

Documents obtained by Overdrive show that out of the first two loans made to Truck City in April and May, 1967 totaling $3.5 million at least $770,659 was diverted and used to purchase a controlling stock interest in the Warren Bank in Warren, Michigan.

One law enforcement investigator went even further. He said that the trustees of the Central States Pension knew when the loans were being approved "that the money was to be diverted, not to be used by the company, but to buy stock in the Warren Bank." Also, he claimed, "some of the money was used to pay personal obligations and debts of Gil Mains and Charles Kassab."

A close review of numerous documents and records by Overdrive has led to the same conclusion.

Trying to trace the loan money

At the time that Truck City money was being used to buy Warren Bank stock, Truck City's vice-president Charles Kassab was on the Bank's Board of Directors, together with Thomas Moylan, a stockholder in Truck City. Other directors of the Warren Bank, and their backgrounds, are worth noting: William Romano, a state senator and co-owner of the Center Line Bar, where a number of gambling arrests have been made; David Lebenbom, Chairman of the Democratic Party of Wayne County; and George Parris, prosecutor of Macomb County whose prosecution practices have been called "questionable," and who has been seen in the company of Mafia figures.

At the same time that Truck City was buying Warren Bank stock, the directors were authorizing a series of loans. For example: within a month, Gil Mains personally borrowed $256,000. One month later, Gil Main's Truck City borrowed a total of $230,000. A short time later, Harold Kassab, a brother of the director, received a $115,000 loan, and Marvin Petrous, a relative of a Truck City stockholder, borrowed $15,000. Another borrower at this time was Donald Fitzsimmons, head of Accurate Freight in Detroit, and son of Frank Fitzsimmons, current head of the Teamsters Union. Fitzsimmons received a $5,000 loan. His involvement with Truck City should also be noted. Court records show that Don Fitzsimmons cashed a $475 NSF check there, and that another outfit of his, D.E.F. Associates, owes Truck City $15,360. D.E.F. Associates also laid 2 NSF checks on Truck City—one for $131.45 and another for $110.27.

While the transaction just referred to appears simple, the original information it was taken from is a complex tangle of documents requiring, finally, an elaborate chart to trace the flow of monies. These transactions are so incredibly intertwined, in fact, that investigators are still not certain where the money has gone involved in the stock purchases. The burning question, of course, is what really happened to the money received by Gil Mains and his company.

More money loaned after bankruptcy

At Truck City itself, even more money was changing hands. Between April 19, 1967 and August 23, 1968, Central States pumped $3,550,000 into Truck City. By January 10, 1969, Truck City filed bankruptcy, claiming liabilities of over $5 million, mostly in unpaid loans. Even after they filed bankruptcy, Central States dumped in another $578,-363.47.

Less than four months after the first loan was received, information obtained by OVERDRIVE shows that Truck City claimed a deficit of more than $850,000. But at the same time, another source provided documents showing that Truck City had a "substantial balance" in account 70093 in the Bank of Dearborn. In August, 1968, the first of an entire string of tax liens was filed against Truck City. Yet less than three weeks after the first tax lien, another Pension Fund loan was made to Truck City.

But perhaps the most intriguing question involving the millions in Truck City is contained in their financial statements, documents which have been studied in some detail by Overdrive's team of CPA's. As of November 30, 1968, according to these records, Truck City showed a deficit of $2,340,195. It would be virtually impossible, these experts say, for a truck stop to lose this kind of money—in a normal operation—within two years; especially when there were practically no payments on the massive amounts of money they were loaned.

Fraudulent books?

One hint lies in the $400,862.26 charged to "unamortized expenses capitalized in construction period." What this means, simply stated, is that the officers of Truck City supposedly had that much in expenses before the truck stop was opened. Or, was this simply a bookkeeping device to funnel out that money for other purposes?

We consulted a veteran auditor to explain how Truck City could have piled up these huge losses in such a short time. After examining the statements, he said,

"Well, if I were investigating this mess, the first thing I would do would be to trace this supposed $1,500,000 claimed to have been paid in for capital stock. I just can't believe it was ever paid in. If it was not paid in in hard money, then the losses would be fictitious, which would make sense to me."

To prove these inferences beyond a doubt, a lengthy and expensive audit would have to be undertaken to follow every dollar that was supposed to have come into Gil Mains Truck City, and every dollar that went out. Such an investigation would reach far beyond the boundaries of Truck City, and would take a team of crack auditors. For one reason or another, no investigative agency has undertaken this. Until they do, the saga of Gil Mains Truck City and the Central States Pension Fund will be merely one more unexplained episode in the continuing saga of Pension Fund loans.

GRAIN WAREHOUSE FAILURES

HON. PAUL FINDLEY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 15, 1972

Mr. FINDLEY. Mr. Speaker, farmers' grain deposits should be just as safe as money deposits in banks. In many cases they are not.

Where State law is inadequate, the Federal Government should assure farmers against losses from warehouse and elevator failure. Protection is now spotty and uncertain. Kansas, Nebraska, and several other States have good protection systems. In some States, such as Illinois, existing State law is inadequate. Still other States have no laws at all regulating grain warehouse storage.

The current U.S. Warehouse Act provides good protection where it is in effect. But participation in the Federal program is voluntary, and many warehousemen throughout the country choose not to ask for Federal licensing.

Because the need for protection for farmers is becoming increasingly more evident, I am surveying agricultural and grain trade leaders to determine the best legislative way to solve this problem.

The severity of the problem is demonstrated by the situation in Illinois. During the last year, 18 grain elevators have closed their doors, gone into bankruptcy, or lost their State licenses, resulting in more than $2 million in losses to farmers who had their grain stored in these elevators. One such failure in north central Illinois resulted in losses of over $900,000 to farmers in the immediate vicinity. Another in southern Illinois cost farmers over $300,000.

Illinois is not the only State experiencing these financial disasters for farmers. Similar cases have occurred in Indiana and Minnesota.

Because of market conditions and the need for orderly marketing practices, farmers cannot always wisely sell their grain when it is harvested. Prudence requires that they store it and wait for prices to rise to a level that will provide them a profit.

But when the elevator or warehouse where they have their grain stored fails, be it for poor business practices or outright criminal deception, the farmers are often left with only a percentage of the grain's worth, if anything at all.

One possible solution to this problem—that I am giving serious consideration—is the creation of a Federal Grain-in-storage Insurance Corporation modeled after the Federal Deposit Insurance Corporation. Deposit insurance has proven to be an effective means of protection for bank deposits. Because grain is money to farmers, Federal grain-in-storage insurance could protect their grain deposits in much the same way.

Another possibility is the establishment of a standards system similar to the current State-Federal meat inspection program. Under this approach, State governments would be required to meet minimum grain-storage standards established by Congress, or step aside for the Federal program.

The survey I have undertaken will hopefully determine the best legislative approach and solve this problem.

REPUBLICAN PARTY REFORM

HON. JOHN DELLENBACK

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 15, 1972

Mr. DELLENBACK. Mr. Speaker, I have recently had the opportunity to read the comments of one of our most promising freshmen Congressmen concerning reform of the Republican Party. At the age of only 33, Representative H. JOHN HEINZ III, of Pennsylvania, is the youngest Republican Member of Congress and we are fortunate that he can look forward to many years of rewarding public service.

Congressman HEINZ is currently deeply involved in efforts to reform the Republican Party's rules and procedures, and I am pleased to offer his remarks for each Member's attention:

> The Republican Party has its work cut out for it in the next four years as it attempts to open its doors and become truly the party of the people.
>
> If the Republican Party is to survive as a viable political force in this country, it must address itself to broadening its appeal among minority groups, women, young people, working men, and other citizens who consider themselves disenfranchised in the face of what they call big business, big money, and even bigger influences.
>
> The combined turning point and kick-off will come this month at the Republican National Convention in Miami Beach when the long needed reforms of the party will begin in earnest.
>
> As an elected delegate to that convention, I will have the opportunity to vote for, among other things, the Delegates and Oragnization (DO) Committee recommendation on convention reform to the Republican National Committee.
>
> This sincere and hard-working group

chaired by Republican committeewoman Rosemary Ginn of Missouri has made several recommendations in such areas as limiting convention floor demonstrations, favorite son nomination speeches, new ways to present the platform, and especially opening the doors in every state to those who wish to participate in the procedures that lead to nominating a Republican for the Presidency.

In essence, I find it easy to approve and support each of the DO Committee's recommendations, but would only add that there is considerably more to be done in order to effectively reform the Republican Party and have it emerge four years hence as the real democratic (with a lowercase "d") voice of the people.

I say four years hence because we must use the period between now and the 1976 convention to go beyond the DO Committee recommendations and open up the ranks of Republicanism to embrace everyone who cares about the nation and its future through the political process.

I find it shocking that Republicans can count only one female among its Congressional ranks, and worse, not one black. I am equally disturbed to realize that I, at 33, am the youngest Republican in Congress during a period in our nation's development when youth must and will be served and should be heard on Capitol Hill.

I am convinced that if we apply our energies and enthusiasm during the next four years to these and other areas of interest to us all, we will have these ethnic and racial minorities, these women, and these young people in Congress, and in the Republican Party, sharing their knowledge, sensitivity and training for the betterment of all the citizens of this nation.

We are indeed fortunate to have in President Richard Nixon a Republican incumbent in the White House. It is not inconceivable that Republicans could carry the majority of seats in the Congress in November.

To accomplish this, however, we must seek to bring the delegate election process closer to the local level and encourage more interest and participation.

One of the DO Committee's recommendations would do away with the present system of naming certain party officials as automatic delegates to the convention and open the door to any and all who wish to be considered for selection.

Also, approving delegate selection guidelines that endeavor to have full representation of men, women, youth, and minority groups, would further strengthen the party and move us closer to becoming the party of the people.

Over the years, the Republican Party has been suspect by some and has been charged with being supported by responding to only the moneyed influential of this nation.

We must diligently strive over the next four years to dispel this unfounded bias through reform and an open call for participation so that we have what President Nixon has said he would like the Republican Party to be, the party of the open door. Through that door will come the strength of our nation.

RESOLUTION CONCERNING STAFF APPOINTMENTS

HON. DONALD M. FRASER

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 15, 1972

Mr. FRASER. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following resolution which I referred to and submitted earlier today:

RESOLUTION

Resolved, that upon the adoption of this resolution the Rules of the House are hereby amended as follows:

The Committee on House Administration shall be deemed to have approved

(a) all claims or vouchers for payment for services rendered after June 30, 1972 by employees of the standing committees of the House, provided that such claim or voucher has been signed or certified by the Chairman of the standing committee concerned, and provided further that the Clerk shall determine that such claim or voucher is otherwise in compliance with the applicable laws, resolutions and rules of the House, and

(b) all appointments of employees after January 1, 1972 by the Speaker or any officer of the House to positions already authorized, provided that such appointment has been duly signed or certified by the Speaker or officer of the House, and provided further that the Clerk shall determine that such appointment is otherwise in conformity with the applicable laws, resolutions and rules of the House.

The Clerk shall accept and honor all such claims, vouchers or appointments as though they bore the signature of the Chairman of the Committee of House Administration.

This resolution shall remain in effect until the Committee on House Administration shall have adopted procedures in the standing rules of that Committee which shall be published which will assure the protection of the rights of Committees, Officers and Members of the House in the consideration by that Committee of appointments of employees to authorized positions or in auditing and allowing claims for the payment of obligations incurred at the direction of a Committee, Officer or Member of the House.

Upon the adoption by the Committee on House Administration of such rules the Committee on Rules shall examine the same and if they appear to be adequate, shall submit to the House a resolution providing that upon its adoption this resolution is repealed.

SBA AND VA ANNOUNCE NEW BUSINESS BENEFITS AND OPPORTUNITIES TO ASSIST VIETNAM VETERANS

HON. JOE L. EVINS

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 15, 1972

Mr. EVINS of Tennessee. Mr. Speaker, as chairman of the permanent Select Committee on Small Business, I am pleased to report that the Honorable Thomas S. Kleppe, Administrator of the Small Business Administration, and a former colleague in the House, recently announced jointly with Donald E. Johnson, Administrator of the Veterans Administration, three new areas of financial help and management training to Vietnam-era veterans.

Tom Kleppe has proven himself to be one of the most outstanding administrators of SBA and the steps taken under this newly announced program will give special assistance to our Vietnam veterans in an attempt to make up any disadvantages which they may suffer as a result of their service in the Nation's Armed Forces.

Because of the interest of my colleagues and the American people in this program, I would like to insert in the RECORD the press release issued by SBA on Tuesday, August 1, 1972.

The release follows:

VETERANS BENEFITS EXPANDED BY SBA

WASHINGTON, D.C., August 1.—The U.S. Small Business Administration has opened up three new areas of financial help and management training to Vietnam-era veterans, Administrator Thomas S. Kleppe announced today.

The announcement was made at a press conference held jointly with Administrator Donald E. Johnson of the Veterans' Administration.

The new assistance, which will make it easier for veterans to start and maintain businesses, is in response to President Nixon's recent call for renewed commitment by all Federal agencies toward men and women who will have served in the Armed Forces anywhere in the world during the Vietnam period, which began August 5, 1964. An estimated 5.8 million such veterans have returned to civilian life to date.

These veterans will now be eligible for business loans, Federal government contracts, and management assistance under SBA programs which previously were restricted to socially or economically disadvantaged persons.

"We have broadened our directives in order to give veterans the best possible break as they return to civilian life and enter the business community," Kleppe said. "They now can take advantage of the most liberal financing programs that we have."

Johnson termed the SBA action as "providing additional opportunity for young veterans to participate in the economic life of their communities and to reach the level of success we all wish for them."

Under the expanded programs, honorably discharged Vietnam-era veterans are now eligible for:

1. *Economic Opportunity Loans* (EOL) of up to $50,000 for 15 years at a low interest rate (under title IV of the Economic Opportunity Act of 1964).

Criteria for such loans are more liberal than in other SBA lending programs, although the veteran still will be required to satisfy certain credit and character requirements, and to furnish reasonable assurance that the loan will be repaid. Such loans are available to veterans who wish to expand an existing business or to establish a new business.

As with all SBA loans, the EOL program is predicated on the assumption that the veterans cannot obtain financial assistance through his bank or other normal lending channels at reasonable terms, or cannot obtain funds under SBA's regular business loan program.

Such a loan also assumes that the veteran does not have sufficient personal financial resources, i.e., is in a low-income status.

Applicants may be sole proprietorships, partnerships, or corporations. Where there are two or more principals, the veteran must own at least 50 percent of the business.

Since the Agency considers that proper management is necessary to a successful business, a condition of such a loan may require that the veteran undertake management training or counseling if it is necessary.

2. *Federal Government Contracts*, under the SBA program that obtains for small businesses a fair share of purchases made by the government for goods and services.

Again, under the same program that previously has applied only to minorities and other disadvantaged persons, veterans are now eligible for Federal contracts (under section 8(a) of the Small Business Act), commonly called "8(a)" contracts.

In such contracts, the SBA obtains from other Federal agencies prime contracts suitable for small businesses and subcontracts them to small firms.

Once a veteran's firm is approved by SBA as to its financial status and performance capability, the Agency then locates and awards contracts that fit the firm's capabilities.

3. Management and Technical Assistance from private management consulting companies contracted by SBA to provide such assistance (under provisions of section 406 of the Economic Opportunity Act of 1964). Such counseling was previously available only to socially or economically disadvantaged persons and those in high unemployment areas.

The new assistance announced today follows a previous agreement between SBA and VA last August to help veterans receive schooling and training necessary for eligibility for SBA loans.

The expanded programs are designed to provide special assistance to Vietnam-era veterans. Such veterans are also eligible to receive all standard SBA services for small business—equity financing, long-term loans, government contracts, management and technical training, surety bonds, certificates of competency, lines of credit, Federal regulation compliance, and other assistance.

Veterans interested in taking advantage of any SBA programs may apply in person, or telephone or write to their nearest SBA office. There are 85 such offices located in the principal cities of all 50 states and Puerto Rico and Guam:

LIST OF SBA FIELD OFFICES

Agana, Guam; Albany, New York; Albuquerque, New Mexico; Anchorage, Alaska; Atlanta, Georgia; Augusta, Maine; Baltimore, Maryland; Birmingham, Alabama; Boise, Idaho; Boston, Massachusetts;

Buffalo, New York; Casper, Wyoming; Charleston, West Virginia; Charlotte, North Carolina; Chicago, Illinois; Cincinnati, Ohio; Clarksburg, West Virginia; Cleveland, Ohio; Columbia, South Carolina; Columbus, Ohio;

Concord, New Hampshire; Corpus Christi, Texas; Dallas, Texas; Denver, Colorado; Des Moines, Iowa; Detroit, Michigan; Eau Claire, Wisconsin; El Paso, Texas; Fairbanks, Alaska;

Fargo, North Dakota; Fresno, California; Gulfport, Mississippi; Harlingen, Texas; Hartford, Connecticut; Hato Rey, Puerto Rico; Helena, Montana; Holyoke, Massachusetts; Honolulu, Hawaii; Houston, Texas;

Indianapolis, Indiana; Jackson, Mississippi; Jacksonville, Florida; Kansas City, Missouri; Knoxville, Tennessee; Las Cruces, New Mexico; Las Vegas, Nevada; Little Rock, Arkansas; Los Angeles, California; Louisville, Kentucky;

Lubbock, Texas; Madison, Wisconsin; Marquette, Michigan; Marshall, Texas; Memphis, Tennessee; Miami, Florida; Milwaukee, Wisconsin; Minneapolis, Minnesota; Montpelier, Vermont; Nashville, Tennessee;

Newark, New Jersey; New Orleans, Louisiana; New York, New York; Oklahoma City, Oklahoma; Omaha, Nebraska; Philadelphia, Pennsylvania; Phoenix, Arizona; Pittsurgh, Pennsylvania; Portland, Oregon; Providence, Rhode Island;

Richmond, Virginia; Rochester, New York; St. Louis, Missouri; Salt Lake City, Utah; San Antonio, Texas; San Diego, California; San Francisco, California; Seattle, Washington; Sioux Falls, South Dakota;

Spokane, Washington; Springfield, Illinois; Syracuse, New York; Tampa, Florida; Washington, District of Columbia; Wichita, Kansas; and Wilmington, Delaware.

LOW-COST HOUSING IN DEMAND

HON. WENDELL WYATT

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 15, 1972

Mr. WYATT. Mr. Speaker, the Honorable Terry D. Schrunk, mayor of Portland, Oreg., in a letter to me has outlined some very critical problems confronting the Housing Authority of Portland in its efforts to provide much needed low-cost housing and necessary services pertaining thereto. I am confident other housing authorities throughout the country are experiencing similar difficulties. It is urged that the Department of Housing and Urban Development take all possible action to help our various housing authorities alleviate their problems.

The letter follows:

CITY OF PORTLAND, OREG.,
July 28, 1972.

HON. WENDELL WYATT,
U.S. House of Representatives,
Washington, D.C.

DEAR WENDELL: This will acknowledge your letter of July 20, in which you enclose a letter from Norman Watson indicating that funds would be allocated to regional offices of HUD. The Seattle Regional Office received a total of $30,000. The Portland Area Office, which covers southern Washington, Idaho, and Oregon, received the total amount of $10,000, which was allocated to Idaho because of particular problems.

The total 1972 Housing Authority of Portland (HAP) operating expense for the year ending March 31, 1972, was $4,030,000 of which the federal subsidy for operation expenses was $1,116,536.

HAP estimated their total operating costs for 1973 at $4,912,150. This amount is to cover the increase in salaries negotiated by HUD for maintenance personnel. Also the salaries of administrative personnel to be in line with the City of Portland pay scale, the increased cost of material, services, etc.

However, our operating subsidy has been decreased from $1,116,536 in 1972 to $448,011 in 1973—a 60 percent reduction. This decrease in subsidy at the same time our costs are increasing forces us to revise our present budget to $4,155,000 with the following results:

(1) Laying off 32 personnel, 20 from our administrative staff and 12 from maintenance. This will cut down our services to people which will be very difficult, particularly for the elderly. It has been our practice to look in on each of our tenants once a day to see if they are alive and well.

(2) HAP will do no painting and it is unfortunate that this will have a geometric effect on deteriorating facilities. And it does not allow for sufficient material with which to make repairs.

(3) The Brooks amendment requires the tenant to pay no more than 25 percent of his income for rental, and in some instances, for example students with families, pay nothing at all. HAP is changing its policy in accordance with HUD requests to house only those persons with higher incomes. This policy change does not permit us to give proper attention to the destitute and in my opinion it is catastrophic that this should occur. It may have the effect on people who were developing the hope and desire to participate in our mainstream of life to lose confidence in the so-called establishment and express their frustration in the only way they know how—violence. This change also knocks out the objective of public housing, which as I understand it is to assist people to participate in our economy and to become whatever they wish within the limits of their own capacity.

(4) HAP is also taking $230,034 from its own reserves to carry through the current year on the revised budget. But they will be unable to do so again.

We are trying to make some additional funds available through the Public Employment Program (PEP) funds, especially to reinstate some security for the larger projects as well as in high-rise buildings for the elderly. I have the goal of $70,000 for HAP but to do this we will be taking away from others, such as our Park Bureau, city administration, etc.

I appreciate your past efforts to help us with our problems in this area, and I am confident you will continue.

Yours truly,

TERRY, *Mayor.*

WAKEFIELD SPEAKS ON ENERGY

HON. JAMES M. COLLINS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 15, 1972

Mr. COLLINS of Texas. Mr. Speaker, last week, Stephen A. Wakefield, the Deputy Assistant Secretary of Energy programs in the Interior Department made an informative speech in New York City. He was talking to the Civic Associates on Energy. New York City goes from one critical emergency to another. But the entire country should realize the magnitude of the energy crisis facing our country by 1980.

You will be interested in the remarks of Stephen Wakefield who is an authority on energy. Here are his remarks:

WAKEFIELD SPEAKS ON ENERGY

Despite a barrage of studies and pronouncements that there is a developing energy "crisis" in this Nation, there is little evidence of a general public awareness or concern with the energy situation. I believe the energy and fuels problems facing New York City and the East Coast are so much more severe and critical that they warrant a far more serious concern and greater attention than those of the Nation at large. Accordingly, I propose to share with you some of my thoughts and those of other responsible Government officials on the developing general energy situation, the near-term and long-term energy future facing New York and the East Coast and offer some views on the courses of action needed to help resolve the acute energy supply problems we envision for the area.

It has been amply and repeatedly demonstrated in the United States and other highly industrialized societies that an adequate and dependable supply of energy is essential to the economic progress and standard of living of all nations. There is an almost direct relationship between energy consumption and economic output as measured by Gross National Product (GNP). The growth in energy consumption and GNP have followed the same upward course for the past 50 years. Until about 1967 it lagged slightly below GNP but since then energy use has increased even faster than GNP. In order to sustain a healthy economy and provide jobs for our expanding work force, an annual growth rate of about 4 percent in GNP is needed. So, we must also contemplate the requirement for an energy growth rate of about the same magnitude. Actually, we estimate that energy demand will grow at an annual rate of about 3.6 percent to the end of the century. By 1985, annual gross energy consumption is expected to increase to about 133 quadrillion Btu. or about double the 1971 level of 69 quadrillion Btu.

Over the years, oil and gas have increasingly supplied the largest share of our energy needs at the expense of coal. In 1971, petroleum supplied 44 percent of our energy needs; nautral gas supplied 33 percent; coal, 18.3 percent; hydropower, 4.1 percent; and nuclear power, 0.6 percent. In the next three decades, nuclear power is expected to assume a greater share of the energy mix—about half of all electricity generated and one-quarter of total energy by the year 2000—at the expense of all the other sources. Despite the long promised arrival of significant contributions of nuclear energy, however, Interior still projects that fossil fuels will provide three-fourths of our energy requirements at the turn of the century.

In looking ahead, the supply situation for energy and fuels is not reassuring. Nuclear powerplant construction is behind schedule because of delays in equipment deliveries and environmental protection considerations. Since the *Calvert Cliffs* court decision 1 year ago, licensing of new facilities by the Atomic Energy Commission has almost ground to a halt. Whereas new plants can be operational in 4 or 5 years following the decision to build in many countries, utilities in the United States must plan for lead times twice as long. Coal is being forced out of markets it used to serve because of increasingly stringent antipollution regulations which have gone beyond the capabilities of technology available within the short timeframe established for implementation. Our domestic oil and natural gas wells are producing virtually at the limits of their capabilities and without a strong upsurge in domestic exploration and development activities, it is probable that we will see a decline in the production of these energy sources.

Given the lead times and technological developments required, we can only realistically look to oil and gas to meet the increased energy demands over the next 10 to 15 years. Within this limited alternative, we can anticipate a substantial increase in both importations of foreign oil and, while probably to a lesser amount, liquefied natural gas. The implications of becoming overly dependent upon sources of energy beyond our control should give every American cause for concern. These concerns become magnified when those foreign sources may be inherently insecure and unreliable.

In 1971, our total oil products demand was about 15 million barrels daily and imports accounted for about one-fourth of the total. Canada and Venezuela were the principal sources and North Africa and Middle East production supplied only about 5 percent, a mere trickle.

By 1985, we foresee a very drastic change in the relatively comfortable oil supply situation of today. In order to meet a petroleum demand in 1985 of some 25 to 27 million barrels per day, if present trends continue, we can contemplate a daily supply of only about 9 million barrels from the Lower 48 States and 2 million from the Alaskan North Slope. This leaves an enormous gap of some 14 to 16 million barrels a day—or more than half our needs. To compound the problem, we estimate that nearby Western Hemisphere sources can supply no more than 6 million barrels per day. Thus, like it or not, we must look to the politically unstable, troubled Eastern Hemisphere for some 8 to 10 million barrels or about 34 percent of our supply. Without North Slope oil available to us, this share increases to some 42 percent.

To you here in New York and those of us who live along the East Coast, the situation is even more ominous. This is the largest oil consuming area in the country, yet it has no significant production of its own. Last year it consumed about 6 million barrels per day of petroleum products, supplied by about 60 percent from Texas and Louisiana and 40 percent from imports. This situation will change rapidly to one of overwhelming dependence on imports. By 1985, this region may have to import some 9 million barrels per day from overseas, or approximately 20 shiploads a day by the largest tankers that can now enter East Coast ports.

This is the immediate outlook and we must face it for the next several years. Alternatives available to effect a major change in energy supply and lessen dependence on foreign oil imports all require long lead times. Nevertheless, we do not have to accept this as a permanent and worsening condiition.

We must choose among and act upon alternatives that will over the short-term minimize the growth of our dependence on foreign energy sources and in the long-term provide an enduring solution to our problems of insuring an adequate and secure supply of all our energy needs. And, we *do* have viable alternatives. We have billions of barrels of oil and hundreds of trillions of cubic feet of natural gas resources still in the ground which could be made available to American consumers. They simply are not being discovered and developed as fast as we are using them. Known coal resources are so great that they will last for hundreds of years at current and projected rates of consumption. The vast oil shale deposits of Colorado, Wyoming and Utah contain more hydrocarbons and can yield more oil than has so far been discovered in the Middle East. Time, money and a specific act of national will are required to perfect the technologies and establish the industries needed to recover and convert these vast resources into more acceptable and economic energy forms.

Beginning with specific actions that will pay off in the short run, we must expedite the movement of Alaskan North Slope oil to markets and utilize the already discovered 10 billion barrel reserves in this area. In May, Secretary Morton announced his decision to grant right-of-way permits for the needed Trans-Alaska pipeline. No permits will be issued until all legal requirements have been met. Then, the problems of reconciling oil development with environmental requirements will be resolved so that this long awaited and critically needed new domestic oil source will make its important contribution to our national oil supply. Thereafter, further exploration and development in the vast Arctic region will greatly expand the amount of domestic reserves that we can count on in subsequent years. Large reserves of natural gas also exist in this area and, although dependent upon oil production, should be available to Midwestern consumers later in this decade.

In the Lower 48 States, the Outer Continental Shelf, owned by the Federal Government, is the best remaining prospective territory for oil and gas development. Only around 5 million acres or less than 2 percent of the OCS has been leased to date. Yet, it now accounts for about 12 percent of our domestic oil and natural gas production and its share is continuing to grow. A key element of President Nixon's Clean Energy Message of June 1971, was his directive that oil and gas leasing on the OCS be expanded and accelerated. The Department of the Interior responded with a leasing schedule calling for two general lease sales per year for the next 5 years. The first scheduled sale was successfully challenged in court on environmental grounds with a resulting delay of at least 9 months. A new lease offering which we believe will stand up to any legal challenge has been prepared and is scheduled for September. A second lease sale has been tentatively set for December.

But these are only two sales involving less than a million acres off Louisiana. I personally believe we ought to be leasing more than a million acres each year for oil and gas prospetcing on the OCS and extend more intensive searches to other areas, including the Atlantic continental shelf. Nowhere is oil and gas needed more critically than on the Atlantic Coast.

Although there has been no production of oil or gas on the Atlantic Coastal Plain, geological evidence indicates that several areas along the coast have a potential for significant oil and gas deposits. The Association of Petroleum Geologists considers this potential to be as much as 19 billion barrels of recoverable oil and 46 trillion cubic feet of gas. Of course, these are speculations at this time but they support going forward now with explorations of the oil and gas potential of the region, particularly in light of sizable discoveries off of Nova Scotia.

It should be pointed out, however, that extremely vocal political opposition has arisen against any mention of offshore drilling in the Atlantic. Much of this opposition may be based on less than firm factual grounds. For example, any drilling would take place more than 30 miles from shore, thus out of sight of the beaches. Oil spills from offshore drilling are extremely rare. Only four major instances resulting in serious threats to the environment have occurred from over 16,000 offshore wells drilled in the United States and regulations and inspections have been tightened by the Geological Survey in the past 3 years. Offshore drilling accounts for only 2 percent of the oil in the oceans, according to a Coast Guard study, while tankers account for almost 30 percent. Fishing grounds off the Louisiana coast, both commercial and sport, have become among the world's most productive since the introduction of offshore drilling there. But perhaps of greatest importance is the fact that every barrel of oil that we can produce domestically is one less that we do not have to import and that much less reliance on foreign sources beyond our control.

In the long-term, the solution to our energy problems rests with the development of technologies that will improve efficiencies in the finding, developing, production, transportation, conversion and use of all energy sources. To date, continuous improvements in all these areas have made energy abundant and cheap in America and fueled its economic development.

Current technology is not keeping pace with the ever-increasing energy demand while at the same time providing the desired environmental protection. A whole series of new and improved technologies are needed. These include processes to provide clean fuels, develop marginal resources, improve conventional energy sources and develop new energy sources. All involve large commitments of capital to R&D programs and will require long periods of time to bring them from inception to commercial reality.

It is an appropriate national objective that a fertile climate for private invention and innovation be maintained and that the Government initiate and support R&D in technologies which are in the broad national interest, but which cannot or will not be done by the private sector. The need is clear but how can it best be done? Some have argued that energy R&D needs are so great, so urgent, and so costly that the Federal Government should take over, fund, and direct all major efforts through a single energy agency. Others have proposed a joint Government-industry corporation such as Comsat.

We believe that the answer lies in letting both Government and industry do those things it does best separately and cooperate in joint efforts where they are clearly needed. At one extreme is the high-risk, high-cost technology in which returns to private enterprise cannot be clearly foreseen in the reasonable future, while at the other extreme is the threshold R&D which can provide for a reasonable recovery of investment within a short period of time. In my view, Government must play the predominant role in the former and industry in the latter. Between these extremes the opportunity for a joint effort between the public and private sector is strongest and should be encouraged. The contribution of Government should be greatest at the pilotplant stage of development with the financial burden shifting toward industry as the project moves into its demonstration phase.

The efforts of the Department of the Interior in carrying out President Nixon's directions to accelerate the development of clean fuels from coal is a good example of what I mean. The President's Clean Energy Message contained the specific proposal that this effort be pursued as a jointly sponsored Government-industry undertaking. Industry has responded by pledging its part of the initial funding and an agreement was reached between the Department of the Interior and the American Gas Association for a cooperative program. We view this venture as a landmark in Government-industry teamwork in energy R&D and we hope it will lead to further efforts in meeting our national energy needs.

ELECTRONIC SENSING DEVICES

HON. OGDEN R. REID

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 15, 1972

Mr. REID. Mr. Speaker, I have today introduced legislation that will require that all airlines boarding passengers in the United States have, and use, effective electronic sensing devices or X-ray devices to detect concealed weapons carried by passengers or in luggage. It requires that these devices be installed by December 31, 1972, and imposes fines of up to $25,000 per violation for any airline that fails to install such devices or fails to use them in scanning boarding passengers and luggage.

This measure complements two earlier measures that I proposed. The first would close all U.S. airports to any international airline that continues to serve any nation that harbors an accused skyjacker. I am happy to report that this measure, which I first introduced on August 2 of this year, now has 51 cosponsors in the House. The second measure, which authorizes the President to shut off economic and military aid to any nation that refuses to prosecute or extradite air pirates, was adopted by the House as an amendment to the Foreign Assistance Act last week and is now in conference.

These are all tough measures. But the situation more than warrants tough and effective action. There are only two points at which we can safely act against air piracy; Before the skyjacker boards the plane with a weapon; and after the skyjacking has taken place—with swift, stern, and sure justice.

It may seem strange that legislation is necessary to compel airlines to install protective devices, which after all, are much in their own self-interest.

The hard fact is that today, almost exactly 2 years after President Nixon first called for "the use of electronic surveillance equipment—at all gateway airports and other appropriate airports in the United States" only five of the 36 U.S. airlines have installed enough devices to cover all departures. In fact, six of the 16 largest airlines had installed no devices whatsoever by last week.

I am appending to these remarks a chronology of events since the President issued his demand 2 years ago. From this it can be seen that both the Federal Aviation Administration and the Nation's airlines have been dragging their feet.

While skyjacking and skyjacking related deaths in 1972 are running 100 percent above 1971, the majority of U.S. airlines still refuse to install electronic devices and the FAA has repeatedly failed to exercise its authority to force them to act.

There already have been 28 skyjackings and four deaths in the first 7 months of this year as against 27 skyjackings and four deaths in the full 12 months of 1971. Ransom losses to date are running 650 percent above last year's losses, although this will be reduced to slightly more than 100 percent if Algeria returns the $1 million taken in the most recent skyjacking.

Apparently one reason for the airlines delay has been the hope that Congress will foot all or part of the bill for these devices, which are estimated to cost in total some $4 million for the relatively unsophisticated equipment now advocated by the FAA. The transportation appropriation which has been passed by the House and Senate would provide $3.5 million for this purpose. It only remains for the House to approve the conference report for this funding to be available.

The legislation that I am introducing makes one further important provision. It would require the airlines to install more sophisticated and more sensitive equipment than is now contemplated by the FAA and the airlines.

The device now in use, the magnetometer, is by no means adequate. Because of the way it operates, it is incapable of detecting about 25 percent of the weapons now manufactured.

There is more sophisticated equipment, metal detectors and X-ray devices, that would detect all such weapons, and my bill requires that these be used in place of the magnetometer.

The only apparent reason why metal detectors or X-ray devices have not already been installed is that they cost slightly more than the magnetometers. The range is approximately $1,500 to $2,000 for magnetometers as against $2,500 to $3,000 for metal detectors, for example.

The cost of providing 2,000 metal detectors, the number required to protect 2,800 gateways of the Nation's 530 airports is approximately $6 million. This breaks down to slightly less than 4 cents for each commercial passenger carried.

This is a cost we can afford. It is a cost we can ill-afford not to bear. So far, it is only luck that has prevented a catastrophe from occurring as a result of a skyjacking attempt.

It is within the power of Congress to see that effective action is taken to assure that we will not have to rely on luck any further. I believe that the legislation I have proposed will accomplish that goal.

As of possible interest to my colleagues, I am also appending to these remarks a summary of statistics relating to skyjacking incidents in 1972, a list of statistics on the effectiveness and cost of metal detecting devices, and a letter endorsing this legislation from the Air Lines Pilots Association:

GOVERNMENT ACTION TO PREVENT HIJACKINGS

September 11, 1970: President Nixon delivers his Anti-Air Piracy Message and voluntary security programs are initiated by the airlines.

September 30, 1971: Air Transportation Security Director, James Murphy, issues Notice 71-28 and Notice 71-29 which *propose* to amend the Federal Aviation Regulations. Interested parties are invited to comment on the proposed revisions before Dec. 29, 1971. Notice 71-28 primarily deals with protection against unauthorized access to air operations areas and identification of authorized persons and ground vehicles. Notice 71-29 deals with procedures, facilities, and or screening systems which prevent the carriage aboard aircraft any sabotage device or weapons or unauthorized access to the aircraft. Notice 71-29 also deals with procedures to assure that baggage is checked in by a responsible representative of the certificate holder and to prevent cargo and checked baggage from being loaded aboard its aircraft until cleared in accordance with security measures.

Interim: Seven hijackings took place and one pilot was killed. One hijacker extorted $200,000 from Northwest Airlines and two attempted extortion of $300,000 and $200,000 occurred where the hijacker was either overpowered or surrendered.

February 2, 1972: FAA Administrator, J. H. Shaffer, ordered the adoption of a screening system to prevent or deter the carriage aboard aircraft of sabotage devices or weapons in carry on baggage or on or about the persons of passengers. Air carriers and commercial operators were allowed 72 hours to implement the system.[1]

Interim: Eight hijackings took place in which three passengers were wounded. Three extortion attempts occured in the amounts of $1 million, $200,000, and $50,000.

March 7, 1972: FAA Administrator, J. H. Shaffer, *amended* the Federal Aviation Regulations, effective April 6, 1972, to require air carriers to submit for the approval of the Regional FAA Administrator a security program. In addition to the screening program ordered in February, three other elements were required of a security program: (1) prevent or deter unauthorized access to aircraft; (2) assure that baggage is checked in by a responsible agent or representative of the certificate holder; and (3) prevent cargo and checked baggage from being loaded aboard aircraft unless handled in accordance with security procedures.

---

[1] Two hijacking took place after Feb. 5, 1972 in which the hijacker was a "selectee" but he was not screened. Both United and PSA were fined $1,000 for violating the regulation that all selectees be screened.

Interim: Nineteen hijackings took place in which one passenger was killed and two were wounded. Two of the *eleven* extortion attempts were successful. In both successful extortions the planes were hijacked to Algeria—the $500,000 from the first was returned by the Algerian government after granting political asylum to the hijackers and the fate of the $1 million from the second hijacking is uncertain at this time as is the status of the hijackers. The unsuccessful extortions involved the following amounts: $500,000, $303,000, $200,000, $502,000, $50,000, $800,000, $450,000, $600,000, and $550,000.

August, 1972: FAA changes the screening system to require a body search of all selectees (either physical or by magnetometer) and a search of all their carry on baggage in addition to the previous requirement of proper identification. The recent hijacking to Algeria and the $1 million extortion prompted this revision.

August 17, 1972: Deadline for the filing of petitions to the Administrator appealing the FAA's modification of the air carrier's security program. Approximately 24 of the 36 carriers have had their programs approved as of 8/11/72.

1972 HIJACKING INCIDENTS

STATISTICS

Total number of hijackings in 1972	28
Total number of persons involved in 1972	39

	Hijacker profile not applied[1]	Hijacker profile applied	
		Did meet profile	Did not meet profile
Persons involved in hijacking incidents in 1972	17	17	5
Persons involved in hijacking incidents after the hijacker profile screening system was implemented	14	[2] 13	5

[1] Hijacker profile not applied in various circumstances: Hijacker forced his way aboard aircraft; type of flight (e.g. no screening on commuter flights); hijacker by-passed ticketing; screening not applied to round trip ticket holders; and conspirator involved but not aboard the plane.

[2] In the case of the McCoy hijacking (Apr. 7, 1972-United Airlines) and the Speck hijacking Apr. 9, 1972-PSA) the hijacker was designated as a selectee but was not screened, i.e. asked for proper identification. Both United and PSA were fined $1,000 each for failure to comply with the screening regulation

Weapons involved in 1972 incidents

	Number of incidents
Firearms:	
Real	20
Alleged	2
Explosive devices:	
Real	0
Alleged	11
Knife	3

HIJACKER PROFILE SCREENING SYSTEM

This system was implemented on Feb. 5, 1972, "to prevent or deter the carriage aboard aircraft of sabotage devices or weapons in carry-on baggage or on or about the persons of passengers. Certain individuals who met the "hijacker profile" were designated as "selectees." All selectees were cleared for boarding upon presentation of proper identification. In August the screening procedure was revised to include the search of the selectee's carry-on baggage and either a physical body search or a magnetometer search of the selectee, in addition to proper identification.

METAL DETECTING DEVICES—STATISTICS

Metal detecting devices:

(1) Magnetometers, range of detection: only ferrous metals (i.e. does *not* detect 20%–25% of all weapons); cost: $1,500–$2,000.

(2) Active metal detectors, range of detection: all ferrous and nonferrous metals; cost: $2,500–$3,000.

AIRPORT INFORMATION

Total number of airports	530
Total number of gates	2,800
Total number of passengers enplaned—1969	148,072,090

SUFFICIENT AIRPORT COVERAGE

Sufficient airport coverage would require at least one device at each airport and one device per every three gates at the airport. Therefore, approximately 2,000 metal detectors are required. The cost would be approximately $6 million, or $.04 per passenger who enplaned in 1969.

AIR LINE PILOTS ASSOCIATION,
Washington, D.C., August 15, 1972.

Hon. OGDEN REID,
House of Representatives,
Washington, D.C.

DEAR CONGRESSMAN REID: The 46,000 men and women of the Air Line Pilots Association applaud your aggressive moves to further tighten the defenses of our nation against the menace of air piracy.

While we are moving forward domestically with tighter security measures at airports, hijackers' havens overseas continue to lure aerial extortionists and political fanatics to their shores. The legislation you have proposed, when enacted, should go a long way toward closing these sanctuaries.

It is imperative that top-priority action be taken to thwart this rapidly escalating threat. If a criminal does manage to slip through an airport security screen, and he does manage to commandeer an airliner, there should be no place in the world where he can step off that plane without being arrested and tried under the stiffest possible penalties—or, preferably, returned to the country where the crime was committed for such punishment. Your bill represents a giant step forward toward achieving this goal.

ALPA fully supports the speedy passage of this legislation, which would call upon the President of the United States to impose hard-hitting economic blockades against nations that harbor or encourage air criminals.

We also note with much pleasure the favorable passage of your amendment to the Foreign Aid bill—an amendment that would deny U. S. assistance to nations that provide sanctuaries to sky pirates.

On behalf of the pilots and cabin attendants of ALPA, I assure you of our appreciation of and full support for your efforts.

Sincerely yours,
J. J. O'DONNELL, *President.*

MAN'S INHUMANITY TO MAN—HOW LONG?

HON. WILLIAM J. SCHERLE

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 15, 1972

Mr. SCHERLE. Mr. Speaker, a child asks: "Where is daddy?" A mother asks: "How is my son?" A wife asks: "Is my husband alive or dead?"

Communist North Vietnam is sadistically practicing spiritual and mental genocide on over 1,757 American prisoners of war and their families.

How long?

SPIRALING WELFARE COSTS IN THE DISTRICT OF COLUMBIA

HON. BILL ARCHER

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 15, 1972

Mr. ARCHER. Mr. Speaker, in recent months I have been investigating new avenues of possible reform designed to extricate the overburdened taxpayer from financing increasing welfare rolls. No doubt, there is one jurisdiction where Congress should center its efforts—the District of Columbia.

Mr. Joseph Yeldell, Director of the District of Columbia Department of Human Resources, recently responded to several questions I asked regarding welfare fraud, increases in the caseload of aid to families with dependent children, and changes in benefit amounts in the Nation's Capital.

His answers indicate that: First, Congress needs to beef up the Corporation Counsel's office to prosecute welfare fraud cases; second, welfare workers must be required to verbally explain to applicants and recipients more than once the penalties for welfare fraud; third, identification and a handwriting specimen must be required of all recipients before they can be allowed on the rolls; fourth, title 3, section 216 of the District of Columbia Code must be modified to increase subpena power in fraud cases; and fifth, social workers and welfare recipients need to know that welfare is not a "right."

I submit Mr. Yeldell's replies for my colleagues' attention:

MR. YELDELL'S REPLY

Question: What are the criteria for referring cases of fraud for prosecution? Can we explain why so few cases have been prosecuted?

Answer: The criteria for referring cases of fraud for prosecution are:

1. *Timeliness:* The Corporation Counsel's office has indicated that if a period of more than six months elapses from the time of the last occurrence of fraud to the date of the fraud referral to him for prosecution, the defendant's right to a speedy trial may be infringed upon.

2. *Amount:* The Corporation Counsel's office feels that if the amount of the fraud does not equal the dollar amount of the fraud penalty ($500.00 under Title 3, Section 216, of the D.C. Code), the case should not be prosecuted.

3. *Evidence:* Documentary evidence is preferred over verbal testimony. Handwriting on checks and documents is verified by the Metropolitan Police Department's Questioned Document Laboratory, using known samples of the defendant's writing.

4. *Availability:* Title 3, Section 216, of the D.C. Code, under which welfare fraud referrals are made, limits power to summon defendants and witnesses, and to subpeona records and documents, to District of Columbia boundaries.

5. *Hardship:* The personal circumstances of a defendant are carefully reviewed, because of the sympathy of the Court and juries to persons in destitute situations. Persons with large families, persons with physical handicaps, and cases in which unusual circumstances mitigate the offenses, are usually not

referred to the Corporation Counsel.

6. *Education:* Defendants who have been so inadequately educated that their ability to read and interpret the documents presented to them in the course of their applications for public assistance cannot be presumed to understand the consequences of signing a statement concerning their responsibilities to the agency in terms of resources and family composition.

7. *Intent:* A basic criterion of fraud is "Mens Rea" (State of Mind). If a review of the case does not reveal this important aspect of fraud, it is usually not referred because of the difficulty of successfully trying a case without strong evidence that the defendant intended to defraud the Government when the fraudulent action occurred. Only those cases which are blatantly fraudulent are referred for prosecution.

Some of the reasons for the relatively small number of prosecutions of welfare fraud are implicit in the profile of our referral criteria. In addition, the social and legislative climate toward the welfare program influences the reception of cases referred to the Corporation Counsel.

During the period 1968 to 1971 no cases of welfare fraud were prosecuted, although at times during that period the Corporation Counsel's office was holding as many as 150 welfare fraud referrals. An administrative change in attitude occurred in 1971, and welfare fraud cases referred to the Corporation Counsel's office are again being prosecuted.

The lead time to review, present, and collect evidence for successful prosecution is lengthy, particularly in obtaining the original public assistance checks from Government storage. A decision by the Corporation Counsel not to prosecute may occur at the time of trial, when considerable time and effort have already been expanded.

It should be made clear that the number of cases prosecuted by the Corporation Counsel's office is not lineally related to the number of cases referred by Agents of the Court Section, since the Agents are not involved in the ultimate decision to pursue Court prosecution.

Question: Explain the 7,029 increase in AFDC between FY 71 and 72.

Answer: There is no single cause for the increase. Among the variety of reasons are the following:

1. Increase in the number of applications. For the six months, July through December 1969, an average of 1,180 applications per month were received at 500 First Street, N.W.

For the six month period, July through December 1971, applications averaged 1,680 per month—an average increase of 500 per month or 6,000 per year.

About one-third of the applicants come in to the office on their own and the remainder are referred by relatives, friends and outside agencies. Clinics and hospitals are the largest single source of referral.

2. Community involvement. There is considerable outreach on the part of agencies, organizations and individuals, ranging from Welfare Rights to United Planning Organization to Settlement Houses, even to the extent of knocking on doors to inform people of the service of the Department.

The Department itself has been aggressive in meeting with community groups and agencies to explain its functions and operations.

3. The Department provides a wider range of services than ever before in its history and, therefore, meets the needs of many more District of Columbia residents.

4. Greatly increased publicity through the news media. Formerly this was limited mainly to newspapers, but now television and radio provide ever increasing coverage.

5. Revised policies. Through the courts and Federal regulations a number of very significant changes, such as the elimination of the residence requirement, have enabled more people to seek public assistance.

Other regulation changes over the past two fiscal years are:

a. The AFDC–UF Program was effective in the District of Columbia on August 3, 1970.

b. The AFDC-Supplementation of full-time earnings of mothers was effective by City Council regulation on April 1, 1971.

c. The Declaration method for determining and redetermining eligibility was begun on an agencywide basis May 1, 1970.

d. On August 1, 1970, the Standard for Requirements was updated to February 1970 cost of living.

e. The "Availability of a mother to accept employment" policy was rescinded effective September 7, 1970, as a result of a Department of Health, Education, and Welfare requirement.

f. Effective September 7, 1970, as a result of a Department of Health, Education, and Welfare mandate, mothers or caretaker relatives are not required as a condition of eligibility to name the father or take court action to obtain support.

g. Also on September 7, 1970, as a result of a Department of Health, Education, and Welfare requirement, military families receiving Class Q allotments may have their income supplemented by public assistance.

Effective December 7, 1970, the Congress amended the D.C. Public Assistance Act of 1962 (Public Law 87–807) changing the definition of legally responsible relatives from "the husband, wife, father, mother or adult child" to "spouse for spouse and parent for a child under the age of twenty-one".

6. There is a change in philosophy in that public assistance is viewed increasingly as a right and is consequently more acceptable to more people.

Question: Explain the 48,000 amount change. How many were increases and how many were decreases?

Answer: No actual count of the number of payment changes resulting in increased payments and the number resulting in decreased payments has ever been maintained. Based on the observation of the staff of the Payroll Branch, decreases and increases are about equally divided.

The principal reasons for a change in the public assistance payment are:

1. Change in living arrangements.
2. Addition or deletion of allowance for transportation or other special needs item.
3. Change in the amount of the resource available to the individual or family—as, for example, the 20 percent increase in Social Security benefits.
4. Change in the number of persons included in the payment.
5. Change in the allowance for a child when there is an age change.
6. Change to correct an underpayment or overpayment.
7. Addition of a work or training allowance.

TRIBUTE TO EMANUEL RIDGELL

HON. DAN ROSTENKOWSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 15, 1972

Mr. ROSTENKOWSKI. Mr. Speaker, on August 6, the House of Representatives lost a trusted friend and a devoted servant in Emanuel Ridgell, superintendent of the House Office Buildings.

Mr. Ridgell served the Congress for the past 40 years, beginning at the age of 20 as a messenger. He served as assistant superintendent of the House Office Buildings and was appointed superintendent on July 1, 1948. During the period of his service, "Manny" Ridgell exemplified the spirit of cooperation and congeniality which marks the true American. All of us who benefitted from Manny Ridgell's fairness and good judgment will miss him.

I wish to extend my deepest sympathy to the family of Manny Ridgell and assure them that he will not be forgotten by his friends in Congress.

COMMUNITY IMPACT ON COMMUNICATIONS MEDIA

HON. WILLIAM (BILL) CLAY

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 15, 1972

Mr. CLAY. Mr. Speaker, in March of this year, the Congressional Black Caucus conducted 2 days of public hearings on the mass media and the black community. The purpose was to study the effect and influence of the media on the formulation of opinions and attitudes in the black community, and to investigate the media's unwillingness to adequately increase minority employment at all levels.

On concluding these hearings, the caucus called for the establishment of watchdog committees to monitor the fairness of the media in the areas of hiring, entertainment and advertising, and to initiate license challenges and lawsuits to remedy discriminatory practices.

Recently, members of the black community of St. Louis have taken such actions against a local TV station and its actions in canceling the popular program "Black Journal". The group, known as the Friends of Black Journal, have charged KETC–TV, St. Louis, with discrimination in programing, employment and civil rights, and have called on the FCC to conduct a complete investigation.

In support of this community action, the National Urban League has issued a resolution to "marshal all resources within the hallows of the Urban League generally toward the immediate reality of black programing in public media", using the St. Louis action as a pilot project.

Mr. Speaker, I commend the actions of the Urban League, and extend my support to the St. Louis Chapter of the Friends of Black Journal. Further, to awaken others to the critical need for such actions, I submit this resolution, and the statement of the Friends of Black Journal, for the RECORD of today's proceedings.

FRIENDS OF BLACK JOURNAL,
St. Louis, Mo., August 4, 1972.

DEAR SIR: We, the Friends of Black Journal, are lodging the following complaints against the public broadcasting station KETC–TV Channel 9. These complaints are based on both factual information and our meager knowledge of the FCC regulations as they apply to public broadcasting.

We believe that the black community rights' have been violated in the following:

1. We believe that there has been the misuse of federal funds thereby violating HEW

guidelines for public broadcasting in educational television.

2. The practicing of discrimination against the black community in programming, employment, and civil rights.

3. We believe that the showing of lewd and immoral programs has been detrimental to the healthy psychological development of our children.

4. We believe that KETC-TV is guilty of promoting racism through their local program scheduling.

The Friends of Black Journal are calling for a complete investigation of these charges and complaints. Please notify us immediately in writing, of the actions you plan to take in regards to these charges.

Thank you.

Sincerely,

THE FRIENDS OF BLACK JOURNAL.

RESOLUTION SUBMITTED TO THE NATIONAL URBAN LEAGUE

Whereas Public media is the most obligated to respond to the needs/requests/demands of any national/local community it is licensed to serve;

Whereas the grounds for accountability is the direct result of the community's "tax dollars" providing the funds for the station's operation;

Whereas the accountability should hold fast across all sectors of these communities e.g. socio-economic, racial sectors;

Whereas any evidence contrary to the above statement represents an FCC violation and calls for a challenge by the affronted sector of the community regarding the legitimacy of said Public media; and

Whereas surveys of Public media programming prove that by and large, there is a *racist* approach to this accountability in regards to the Black Community on both the national and local level;

Be it resolved that this workshop will marshall all resources within the hallows of the Urban League generally toward the immediate reality of Black programming in Public media, and

support nationally efforts of Black communities who are challenging Public media and to challenge Public media in violation of FCC requirements as a League, and as a civil/human rights organization concerned with human development, the Urban League will also oppose racism in employment practices as it relates to Public media, and make St. Louis the League's pilot effort by actively supporting and assisting the St. Louis Chapter of Friends of Black Journal in its challenge of locally based Public media KETC-Channel 9, which has blatantly committed racist affronteries repeatedly against the Black community.

A REAL FOOD BARGAIN

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 15, 1972

Mr. DERWINSKI. Mr. Speaker, one of the hardest working Members of the House is our mild-mannered, intellectual colleague, H. R. GROSS of Iowa. I never cease to be amazed at the people around the country who know of and respect "H.R.," recognizing his determination to protect the taxpayer from the excesses and abuse of certain governmental programs.

It was, therefore, with special interest that I noted a column in the Lansing, Ill., Sun Journal of August 10, by Jim Alvord, managing editor of that newspaper, commenting upon one of "H.R.'s" disclosures of governmental programs gone awry.

The pertinent section of the column follows:

A REAL FOOD BARGAIN

A Republican Congressman from Iowa, H. R. Gross, made an interesting statement to the press last week concerning our pitiful welfare system. He explained that a hippie living in California can buy $28 worth of food stamps for 50¢. The crafty ones employ the following con game. They will buy exactly $27.51 worth of groceries and receive 49¢ in change (the maximum they can receive back on any purchase). The hippie then adds one penny to his change and has the 50¢ necessary to buy another $28 worth of groceries next week. The fourth week he sells his food stamps to friends for $15 cash.

Thus in one month he's paid 53¢ for $112 worth of stamps for which he gets $82.53 worth of food and $14.47 net profit in cash. Neat trick, but not too funny when you consider that the joke is on you, the taxpayer.

One food store owner verified the practice and added: "Can you imagine how this adds up when there are 15 of these kids living together all doing the same thing?" Surely the deep thinkers in Washington can come up with a better system than this.

BEVERLY HILLS TOASTMISTRESS CLUB

HON. THOMAS M. REES

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 15, 1972

Mr. REES. Mr. Speaker, in a society that offers its biggest reward to those who do things, I bring your attention to an educational organization dedicated to the art of performance, and communication and skills in organizational techniques. I speak of the International Toastmistress Clubs, and with specific regard to its affiliate, the Beverly Hills Toastmistress Club.

In September of this year, the Beverly Hills Toastmistress Club will celebrate its 30th anniversary having received its charter on September 21, 1942. The club, as its parent, the International Toastmistress Club, was formed for the purpose of providing educational programs designed for member self-improvement in skills of leadership and communication. Training is offered in club procedures, public speaking, and analytical listening. The opportunities afforded members by Toastmistress Club training are unlimited. They learn to communicate effectively and then continue to practice what they have learned. While learning to do so, they also learn to say so. The motto of the club is "to love our language and to use it with grace and facility."

Much of the success attained by the Beverly Hills Toastmistress Club is due in large measure to Mrs. Nan Warshaw in her capacity as professional evaluator. I believe the precepts of both the International Toastmistress Clubs and the Beverly Hills Chapter are exemplified in the words of International Toastmistress founder, Ernestine White:

If all of us, realizing our limitations, endeavor to do our best, or even slightly expand our limitations; and if we place our experiences at the disposal of all others through our Club and through the International Toastmistress Clubs, then no one can fathom the boundless possibilities and the great role this organization is destined to play in the history and progress and development of womankind.

CAPTIVE NATIONS WEEK

HON. HENRY HELSTOSKI

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 15, 1972

Mr. HELSTOSKI. Mr. Speaker, the week beginning July 17 was the week proclaimed by the President and observed in all of the United States as Captive Nations Week.

The resolution of Congress, adopted in 1959, expressed the principle of freedom for all persons and from its beginnings cooperated with the nations under the subjugation of Soviet imperialism.

The object of these celebrations and manifestations held during Captive Nations Week is to remind all of us living that the present world, divided between the free and the subjugated, will never attain peace.

And so, this and other tyrannies will not disappear from the political scene as long as there are wars ever bloodier and more and more ruthless—as long as there will be oppression, exploitation, plunder and the denial of basic human rights which is evident in the nations confined behind the Iron and Bamboo Curtains who cannot speak in the defense of their equitable rights and lawful causes.

It is the duty of the free people of America and other countries to strive to liberate the people of these captive nations through sensible and determined deeds and through proper governmental channels so that they can remove the yoke of subjugation in a peaceful manner.

The captive nations, whose governments are only temporary, showing the tendency to be anti-American; were, are, and will remain on friendly terms with the United States, and we expect from them a helping hand in our efforts to free them from alien oppression.

Let us do whatever we can so that the aggression and greed of the Communist imperialists be brought to a halt. Through our celebrations and manifestations we will give evidence that we not only value, but also understand their plight and also fully support their just endeavors to attain peace and full national freedom and independence.

Let our efforts help, that America the sole bastion of hope to free the captive nations, will fulfill its mission in the guidance of the people of the free world to help those who know only the leadership of an alien government in their daily lives.

The freedom-loving people of the captive nations look toward the United States to take the lead in bringing about their freedom and independence.

As Americans, we cannot stress the great importance for us to morally sustain the hope and faith of the captive peoples that they will once again regain their freedom. I hope that this memorable day will arrive soon.

RESULTS OF STATEWIDE SURVEY IN ILLINOIS ON STRATEGIC ARMS LIMITATION TREATY AND A PROPOSED AMENDMENT TO STRENGTHEN THE AGREEMENT

HON. ROMAN C. PUCINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 15, 1972

Mr. PUCINSKI. Mr. Speaker, as the House prepares to vote Wednesday on the Executive Agreement between the United States and the Soviet Union limiting offensive missile capacity of the two nations, I should like to present for my colleagues the results of a very extensive survey which I conducted in Illinois on this question.

This was a statewide survey in keeping with President Nixon's call for exhaustive public scrutiny of the nuclear arms agreement.

I am pleased to report we received replies from 102 counties—every county in the State.

The results show that while the people of Illinois have grave reservations about the offensive missile limitation agreement and voted it down by a vote of 69 percent against, to 31 percent for, those same respondents said that despite its shortcomings, both the treaty and agreement should be approved by Congress as the first step toward nuclear arms control. The vote was an overwhelming 81.1 percent for approval of the package to 18.9 percent against.

It is obvious, Mr. Speaker, that while our citizens have objection to the imbalance proposed in the offensive missile limitation, they feel we should approve the agreement as a first step toward nuclear arms control.

This poses a difficult question for Congress. I believe this dilemma can be helped toward solution by improving the executive agreement.

I believe Senator HENRY JACKSON has offered a reasonable amendment in the other body which would strengthen the proposed agreement and perhaps alleviate the fears of those who voted against approval.

I would hope we could offer Senator JACKSON's amendment here in the House and shall discuss the prospects of its approval when the measure comes before us Wednesday.

For the guidance of our House colleagues, I am placing in the RECORD today the results of my survey and also Senator JACKSON's proposed amendment. I am also including a brief summary of the amendment and a speech on the amendment which the Senator recently delivered.

I fully endorse addition of the amendment to the executive agreement in offensive missile limitation. I believe the amendment goes a long way toward protesting America's position and hope that before this agreement is finalized, the amendment will have been added by Congress.

Following are the results of my questionnaire:

STRATEGIC ARMS LIMITATION TREATY BETWEEN THE U.S. AND SOVIET UNION

	Yes	No
(A) The Treaty would limit each nation to no more than 200 defensive antiballistic missiles. Do you approve?	78.6	21.4
(B) The Treaty provides each nation shall distribute part of its 200 defensive missile quota around its own capital—Washington and Moscow—and the remainder around only 1 offensive missile launching site in each nation. Do you approve?	53.0	47.0
(C) Would you prefer the U.S. deploy its ABM's around our principal industrial centers (Chicago, Detroit, Pittsburgh, etc.) since most of Russia's industry is already near Moscow?	71.5	28.5
(D) An Executive Agreement limits U.S. offensive missile capacity to 1,054 intercontinental ballistic missiles and 41 missile-firing submarines, while Russia shall be permitted to develop her strength to 1,618 ICBM's and 42 missile-firing submarines. Do you approve?	31.0	69.0
(E) The Treaty permits "open sky" inspection. Do you believe we should insist on "ground inspection" to prevent cheating?	76.1	23.9
(F) Despite any shortcomings, do you believe these agreements should be approved by Congress as the first step toward nuclear arms control?	81.1	18.9

Following is the bipartisan amendment offered by Senator JACKSON and a statement of explanation:

S.J. RES. 241

On page 1, between lines 2 and 3, insert the following: "That the Government and the people of the United States ardently desire a stable international strategic balance that maintains peace and deters aggression. The Congress supports the stated policy of the United States that, were a more complete strategic offensive arms agreement not achieved within the five years of the interim agreement, and were the survivability of the strategic deterrent forces of the United States to be threatened as a result of such failure, this could jeopardize the supreme national interests of the United States; the Congress recognizes the difficulty of maintaining a stable strategic balance in a period of rapidly developing technology; the Congress recognize the principle of United States-Soviet Union equality reflected in the antiballistic missile treaty, and urges and requests the President to seek a future treaty that, inter alia, would not limit the United States to levels of intercontinental strategic forces inferior to the limits provided for the Soviet Union; and the Congress considers that the success of these agreements and the attainment of more permanent and comprehensive agreements are dependent upon the maintenance of a vigorous research and development and modernization program leading to a prudent strategic posture.".

On page 1, line 3, strike out "That the" and insert in lieu thereof "SEC. 2. The".

STATEMENT BY SENATOR HENRY M. JACKSON ON AMENDMENT TO SENATE JOINT RESOLUTION 241

The amendment I am introducing today with bipartisan support is a simple declaration of the policy of the Congress with respect to the future strategic relationship between the United States and the Soviet Union. It does three things:

First, it recognizes that the failure of the U.S. and the U.S.S.R. to achieve a treaty limiting the threat to the survivability of U.S. strategic deterrent forces could jeopardize our supreme national interests. Surely, we would all agree that our supreme national interests would be jeopardized if the survivability of our strategic forces were threatened. The language in which this Congressional policy is stated in the resolution differs from the language used in an earlier draft to make the same point. Far from being controversial, this is a policy to which the Administration committed itself during the SALT talks and which the Congress is here asked to join in supporting.

Second, my amendment puts the Congress on record in opposition to a follow-on SALT agreement in which the United States is limited to levels of intercontinental strategic forces inferior to the level accorded to the Soviet Union. In insisting on equality in any treaty to merge from SALT II, I am certain I am speaking for the good sense of the overwhelming majority of the American people. We should support the principle of equality on which the ABM treaty is based by applying it to offensive systems as well. We have, in the few brief years since the Kennedy Administration, gone from strategic superiority to parity to sufficiency (whatever that means) to interim sub-parity. We must not, and cannot accept strategic inferiority.

Moreover, in insisting that the limits to be negotiated in SALT II are confined to intercontinental strategic forces, the Senate would be strongly supporting the proper refusal of the President and our negotiators to compromise the interests of our European allies by including forces dedicated to their defense in the calculation of the overall U.S.-U.S.S.R. strategic balance.

Third, my amendment simply reaffirms the importance of research and development and force modernization leading to a prudent strategic posture.

I am confident that the Senate will give a solid vote of approval to this amendment expressing our determination to secure a stable future strategic relationship with the Soviet Union.

Many of my colleagues have argued for some time that the Senate ought to play a more significant role in the formulation of our foreign and defense policy. My amendment provides the Senate with an opportunity to join with the Administration as a full partner in the effort to broaden the understanding of as well as support for the interim agreement.

Following is an extensive speech given on this amendment by Senator JACKSON. I have asked the Senator if I may place it in the RECORD today as part of our discussion of the executive agreement. I am pleased to associate myself with his remarks for I know of no one more knowledgeable on this subject than my good friend from Washington, Senator HENRY JACKSON.

His remarks follow:

THE SENATE AND THE INTERIM AGREEMENT

(Statement by Senator HENRY M. JACKSON)

Mr. President, the Senate fully appreciates that it has before it an arms limitation measure of very great importance. Equally important, in my view, is how we in the Congress come to judge that agreement and how we convey our judgment to the Soviet Union, to our allies, to the Executive Branch and to the American people.

International agreements, this one included, have always had a dimension deeper than their words—a dimension that embodies hopes and expectations and reservations, all unwritten, and all of which reflect the blend of risks, doubts and assurances of which treaties are made. The present agreement, which rests to so remarkable a degree on statments with which the other party did not concur, has all of these in full measure.

SOME AMBIGUITIES RESOLVED

In an agreement that goes to the heart of America's security—our capacity to deter nuclear war—nothing is more important than a precise understanding of what the parties have agreed to. Precision can never weaken an arms control agreement, ambiguity can be a source of future tension.

From the moment the agreements were signed in Moscow, there were vague and conflicting reports about the contents of the accords. The press relied on confusing background briefings held in Moscow. Various statements and attachments, integral parts of the agreements, were not made public for weeks. Public figures issued statements of support before the terms of the accords were revealed or analyzed. High Administration spokesmen offered contradictory interpretations.

Thus, when the President finally submitted these agreements to the Congress, I was concerned that the Senate and the American people understand what we and the Russians could and could not do within their terms. The Senate Armed Services Commitee, under the distinguished chairmanship of my able friend the Senator from Mississippi, held extensive hearings on the military implications of the SALT accords during which we tried very hard to bring before the American people the terms, and the meaning of the terms, of the interim agreement and the ABM treaty. We endeavored to obtain a clear and consistent Administration position on key provisions—which is not always easy.

Let me illustrate the kinds of problems the Committee hearings had to address. Article I of the interim agreement obligates the parties not to build ICBM launchers after July 1, 1972. But nowhere in the agreement does there appear the number of ICBM's the Soviets are thereby permitted to have. Article II contains a prohibition against substituting "heavy" ICBM launchers for "light" ICBM launchers. But nowhere is there an agreed-upon bilateral definition of what a "heavy" ICBM is. Terms like "modernization" and "significant increase" were used in the agreement, but precise definitions of these terms are not provided.

Mr. President, although the texts of the treaty and the executive agreement contain few numbers many more numbers have been discussed in connection with the SALT accords. In the last several weeks we have heard these: 1,054; 1,618; 313; 41; 42; 62; 84; 710; 740; 656; 950; and zero. The crucial questions for the nation and for the cause of world peace is whether these numbers add up to stable parity or unstable inferiority. It may clear the air to discuss some of them.

(a) 1,054—this is the maximum number of land-based ICBM's that the United States is permitted to retain under the agreement.

(b) 1,618—this is the maximum number of land-based ICBM's that the Soviet Union is permitted to retain given *our understanding* of the agreement. I emphasize "our understanding" because the figure 1,618 is a U.S. intelligence estimate and not a Soviet supplied number. This vagueness on the Soviet part is most unfortunate and can only lead to uncertainty and possible tensions. The agreement would be much improved by the use of specific numbers on both sides.

(c) 710—this is the maximum number of submarine launched ballistic missiles that the United States is permitted to deploy under the agreement. It is arrived at by adding our present 656 Polaris/Poseidon missiles to our potential, under the agreement, to replace 54 of our Titan missiles with new submarine launched ballistic missiles.

(d) 950—this is the maximum number of submarine launched ballistic missiles that the Soviet Union is permitted to deploy under the agreement. To achieve this total the Soviets would retire their obsolete SS–7 and SS–8 ICBM's and replace them with new submarine based missiles. This would give the Soviets a total of 62 modern nuclear (Y-Class) submarines.

(e) 84—the total permissible number of Soviet missile firing submarines that can be deployed under the agreement. This is derived by adding 22 Soviet G-Class submarines to the 62 Y-Class submarines that they are permitted to construct.

(f) 44—the total permissible number of American missile firing submarines that can be deployed under the agreement. However, only 41 in actual fact are part of the U.S. deterrent in this period.

(g) 313—this is the maximum number of "heavy" ICBM's that the Soviet Union is permitted to deploy under the agreement. This again is a U.S. intelligence estimate. Not a confirmed Soviet figure. Each of these missiles can carry at least a 25 megaton warhead and perhaps, eventually, as much as 50 megatons. Of course the Soviets are free to replace single large warheads with many MIRV warheads per missile when they are able to do so.

(h) 0—this is the maximum number of "heavy" ICBM's that the United States is permitted to deploy under the agreement.

These numbers, Mr. President, are merely representative of the thrust of the agreements—which is to confer on the Soviet Union the authority to retain or deploy a number of weapons based on land and at sea that exceeds our own in every category, and by a 50% margin.

Now there will be some who argue that "numbers don't matter"—that both sides have "sufficiency" and that therefore the strategic balance is stable. How curious it is that the people who hold to the "numbers don't matter" doctrine are the same ones who believe that without an immediate arms control agreement the world is in danger of a great nuclear war. Either numbers matter or agreements don't—you can't have it both ways.

I have never seen an international agreement that depends so greatly on the attachment of unilateral statements. Clearly each of these unilateral statements reflects not U.S.-Soviet agreement but, on the contrary, a failure to reach agreement. In my view the interim agreement is substantially weakened as a result of the failures indicated by the resort to unilateral assertions with no legal standing. No long-term treaty covering these vital matters would be acceptable to me and, I suspect, to a majority of my colleagues, if it depended to the extent of the present agreement on unilateral statements. The fact that the present agreement runs for only five years mitigates a situation that would be intolerable in a future treaty. I believe that in expressing this view I am joined by Ambassador Smith who informed the Armed Services Committee that he expected provisions that could not be agreed upon in SALT I to be resolved on a bilateral basis in SALT II.

In seeking to establish clearly what the parties were permitted to do over the next five years and what they would be prohibited from doing—not all of which was self-evident—two points were of particular interest, and illustrate the complications that arise from vague language in the agreement and from negotiating not only against one's adversary but against self-imposed deadlines as well:

(1) Under the terms of the agreement, the Soviets are permitted to have *operational*, by July 1, 1972, 62 Polaris-type Y-Class submarines. The agreement is very explicit on this. Owing to a provision that could have constituted a serious loophole, the issue arose as to whether the Soviets might have additional such submarines *under construction*, but not yet operational, on July 1, 1977. Some witnesses, including Ambassador Smith and Chief of Naval Operations, Admiral Zumwalt, indicated that, technically, this was permissible. Were that the case, the Soviets could continue to turn out Y-Class submarines like sausages, 8 per year, with absolutely no perturbation of their deployment momentum.

Therefore, on July 24, I raised this problem with Secretary Laird in order to get the Administration position as understood at the highest levels. Secretary Laird said: "The protocol to the interim agreement specifies that the Soviet Union may have 950 SLBM launchers and not more than 62 modern ballistic missile submarines." Then Secretary Laird, speaking for the Administration, said: "In the event that during the period of the interim agreement they were to initiate construction of additional modern ballistic missile submarines beyond the number necessary to reach the total of 62, this could be done only as replacements [for older Y-Class submarines] and this would be under the procedures as specified under article 3 of the interim agreement. We would consider any new construction starts which were merely for the purpose of maintaining the momentum of the Soviet Union construction program to be contrary to the intent of the agreement."

This point is made equally clear in a colloquy between the Secretary and me. In order to understand the Administration view, I asked: "I take it that it is your judgment and the view of the President and the Administration that any attempt to use this ambiguity to build up—especially toward the end of this 5-year period—a pipeline of advanced Y-Class boats under construction—as a technical means of getting around the limit of 62 operational submarines, would be in clear violation of what we understand to be the agreement." Secretary Laird answered: "I would, and that would also apply to the United States."

(2) Another area of potential misunderstanding relates to the modernization of missile silos under the agreement. The agreement allows for the modernization of existing silo-launchers, but stipulates that, in the process of modernization, the dimensions of those silos cannot be significantly increased. In a further attachment to the agreement, a significant increase is defined as not greater than 15%.

Testimony from Administration witnesses on the meaning of these provisions was conflicting. Therefore, on July 24, I asked Secretary Laird for the definitive Administration position. He replied: "I would not go along with the interpretation that some Members of the Senate and House have given to that provision in which they read that the 10 to 15 percent increase in dimensions could allow an increase in both dimensions." I then asked: "Diameter and length?" Mr. Laird said: "Yes." He went on to say: "The major increase that would be possible under the agreement would be in any one silo dimension."

In order that there be no misunderstanding on this point, I want to cite the colloquy which followed this official policy declaration by Mr. Laird:

"Senator JACKSON. Do you reject the interpretation that an increase in both dimensions is allowable?

"Secretary LAIRD. I have always rejected that from the first day that the treaty and the agreement became public—the idea that both diameter and depth could be increased by as much as 15 percent.

"Senator JACKSON. It is the Administration's position that only one dimension of a silo can be increased?

"Secretary LAIRD. That is correct. That is the Administration's position.

"Senator Jackson. It cannot be both dimensions?

"Secretary Laird. It cannot be both diameter and depth."

THE MOMENTUM ARGUMENT OR HOW TO GO FORWARD WHILE STANDING IN PLACE

Mr. President, the present agreement is intended to slow the momentum of the build-up of Soviet offensive forces, a build-up that has taken the Soviets far beyond the force levels required for implementing a deterrent posture based on a simple notion of "assured destruction." My own examination and assessment of the appropriate intelligence data coupled with an analysis of the latitude granted under the terms of the agreement has brought me to the conclusion that, as a means of halting the Soviet momentum it is a failure and as a means of slowing Soviet momentum it accomplishes far less than has been claimed.

Mr. President, it is instructive to examine the comments made by the President and by his national security adviser, Dr. Kissinger, on the effect of the interim agreement. They add up to what I would call the "headache theory of treaty-making," according to which one signs an agreement not because it is good but because non-agreement is worse. That's about as close as public policy can come to beating your head against the wall because it feels so good when you stop. Listen to Dr. Kissinger:

"I do not deny that the initial reaction of some people will be to look at the gap in numbers. But once they understand . . . what the gap would be without this agreement . . . I believe that many of those who express some hesitation will come around."

Now, what I understand Dr. Kissinger to be saying is that those of us who are concerned at the gap in numbers in the interim agrement will be persuaded that a balance even more adverse to the United States would have resulted from a failure to reach the interim agreement. The President himself made this argument in his press conference of June 29, 1972 when he said:

"Had there been no arms control agreement, the Soviet Union had a program underway in the field of submarines which would have brought them up to over 90. The agreement limits them to 62.

"Had there been no arms control agreement—and this is the most important point—in the terms of offensive strategic weapons, the Soviet Union that has now passed us in offensive strategic weapons—they have 1,600; we have roughly 1,000—they would have built 1,000 more over the next 5 years. Now, under those circumstances, any President of the United States could see that in 5 years the United States would be hopelessly behind; our security would be threatened, our allies would be terrified, particularly in those areas, and our friends, like the Mideast, where the possibility of Soviet adventurism is considered to be rather great.

"Therefore, the arms contral agreement at least put a brake on new weapons."

So we have before us an agreement designed to see us through the next few years, the chief virtue of which is that life under it will be less dangerous, hopefully, than life without it. This may be a sufficient argument for the Senate giving approval to the interim agrement. It is not, in my view, a sufficient argument for allowing our approval to go unqualified, either by our recognition of the risks or the assertion of our own view of the future.

Understanding what the agreement does is of such importance that I raised the question of the extent to which it slows Soviet momentum on a number of occasions. For example, on July 19 I had the following exchange with General Ryan, Chief of Staff of the Air Force:

"Senator Jackson. One method of assessing the impact of the SALT accords on Soviet programs would be to compare what they are free to do under the agreement with what we have projected that they might have done in the absence of the agreement. Speaking generally, and without getting into precise estimates, how does the lower end of the spectrum of official estimates of the Soviet strategic offensive force for mid-1977 compare with the permitted Soviet force under the SALT accords?

"General Ryan. Roughly equivalent, Senator, lower end of the spectrum."

Again, on July 21, I put the same question to the Chief of Naval Operations.

Admiral Zumwalt, who, like General Ryan, is fully apprised of our intelligence projections. The Admiral answered:

"The lower end of the spectrum of the official estimates is lower than the force permitted under the SALT accords."

Mr. President, I ought to make clear for the record that I put the same question to both Ambassador Smith and General Allison of the SALT Delegation when they appeared before the Armed Services Committee on June 2. Both gentlemen declined to answer stating that security considerations precluded comment. Now, the figures in question are readily available to any Senator who wishes to judge for himself the extent to which the forward momentum of the Soviet build-up has been slowed by the interim agreement.

The Director of Defense Research and Engineering commented on this question of the impact of the interim agreement on Soviet deployment programs when he appeared before the Armed Services Committee in executive session on June 22, 1972. At that time Dr. Foster engaged in an important exchange with my good friend the Senator from Nevada:

"Senator Cannon. I want to turn for a moment to the discussion of momentum that Senator Jackson was talking about that both sides have in building strategic weapons and how that will change our relative strategic posture as a result of SALT. I think this is a subject which is relevant to a meaningful discussion of the role of the ABM in the NCA defense.

"The Interim Offensive Agreement limits both the United States and the Soviets to their present ICBM force, with allowances made for the Soviets to complete 90-odd silos now under construction. Therefore, the Soviets have slightly more than a 1.5 to 1 ratio of ICBM launchers and their numerical advantage is about 600.

"The interim agreement also allows the Soviets to build up to a 62-submarine force, an increase of about 40 or so from their present level of about 22 Yankee class.

"On the other hand, we are essentially frozen at a maximum of 44 submarines, only three more than our present level, and therefore, the agreement grants the Soviets the advantage of completing their current momentum in submarine building.

"Is that not basically correct?

"Dr. Foster. Yes, that is correct.

"Senator Cannon. Concerning the quid pro quo of the treaty and agreement, is it not true that the Soviets will not have to exercise restraint in their momentum, that is, they will not have to curtail their current building rate of production on submarines for at least 3 years and perhaps more?

"Dr. Foster. Yes, sir; that is correct.

"Senator Cannon. In other words, they will not be giving up anything in terms of momentum until at least 3 years from now and possibly 4 to 5.

"On the other hand, the United States has agreed to give up something this year, and that is work on three ABM sites at the Minuteman missile installations. In fact, we will actually be dismantling work already started at Malmstrom Air Force Base. Thus we are giving up something now whereas they might give up something 3 years from now, or then again they might not.

"Is that a correct assessment?

"Dr. Foster. Yes, that is correct."

Mr. President, I have tried to put in perspective the claim that the interim agreement halts the momentum of the Soviet build-up not to reflect adversely on the interim agreement, but to help the Senate form a judgment that bears directly on our policy with respect to SALT II. It is essential, in my view, that we enter the second phase of the SALT deliberations with a clear view of the emerging relationship between the United States and the Soviet Union and with the conviction that SALT II, whatever else it does, must assure equality between the parties on offensive intercontinental strategic arms. To insist on such equality with respect to offensive weapons is to require no more than was done, at Soviet insistence, with defensive weapons in the ABM treaty.

THE CASE FOR THE AMENDMENT

Mr. President, my amendment, which is broadly co-sponsored by a bipartisan group of Senators, deals with three issues: (1) the threat to the survivability of the U.S. strategic deterrent under the interim agreement; (2) the need for equality in any follow-up agreement on offensive intercontinental strategic weapons; and (3) the need for research, development and force modernization. These are issues that I have thoroughly discussed with the Administration, with the witnesses before the Armed Services Committee and, in many cases, with my colleagues in the Senate. It is my firm conviction that we ought to state our views with respect to these issues and I believe my amendment is a medium for the expression of views that I am confident are shared by a majority of my colleagues.

(1) The threat to the survivability of the U.S. strategic deterrent

Clearly any treaty that authorizes the latitude retained by the parties under this interim agreement contains certain risks. How severe those risks prove out to be depends less on the letter of the interim agreement than on the spirit of it. The simple fact is that the Soviets could, by pursuing an aggressive program of qualitative improvement to their offense, acquire the capability to destroy virtually the entire U.S. land-based deterrent force, missiles and bombers. This could be accomplished within the agreed number of launchers by such means as increasing the throw weight of the Soviet offensive force (already four times that of the United States), extensive MIRVing coupled with improved missile accuracy, etc. Since we would be prohibited by the agreement and treaty from a number of stabilizing responses, the strategic balance could deteriorate under the terms of the interim agreement.

The situation we face in this regard was developed, in part, in testimony by the Director of Defense Research and Engineering, Dr. John Foster, before the Committee on Armed Services on June 22. In response to a question put by my friend, the Senator from Ohio, Dr. Foster identified some potential sources of instability that are wholly within the terms of the interim agreement:

"Senator Saxbe. You state that Soviet exploitation of their numbers and throw-weight capabilities could adversely affect the strategic balance. Will you elaborate on that statement and indicate specifically how and when?

"Dr. Foster. I was referring simply to the fact that the Soviet strategic missile capability exceeds our own capability in both numbers and payload-carrying ability. In numbers of ICBM's alone, they exceed us by approximately 50%, and in payload capability by greater than 50%.

"If they were to exploit these numerically greater capabilities, such as by improving accuracy, resorting to MIRV, use of warheads having higher yield-to-weight ratios, upgrading their SAM's, or some combination of these and others, the strategic balance would be affected adversely. For example, with MIRV and accuracy improvements, the SS-9 force alone could be a severe threat to prelaunch survivability of our own land-based force. Or, other Soviet land-based missiles exist in sufficient numbers so that, with accuracy improvement, they could threaten our land-based force, leaving the SS-9 for other things—such as threatening our cities.

"You asked when this could occur. I am not able to answer when it will or if it will. Should they wish such a capability, it could be achieved in perhaps 3-5 years."

It is my great hope, Mr. President, that these developments will not occur, that the Soviet Union will recognize that the overriding intent of the interim agreement is to contain the threat to the survivability of our deterrent forces and that, consistent with this intent, they will refrain from programs that would undermine it.

What we have sought in our negotiations with the Soviets is a stable strategic relationship based on survivable strategic forces. Therefore, any action by the Soviets that threatens the survivability of our deterrent forces must be a source of great concern.

I pursued this problem with Secretary Laird on July 24, and I believe our colloquy on this subject is highly instructive:

"Senator Jackson. The intent of the agreements is to enhance our security by enhancing the survivability of our deterrent. So you would view Soviet behavior that threatens the survivability of our deterrent as a violation of the intent of the agreements?

"Secretary Laird. I would agree.

"Senator Jackson. If there is a pattern which threatens the survivability of our deterrent, you would treat that as a violation of the intent of the parties in making this agreement, would you not?

"Secretary Laird. I certainly would.

"Senator Jackson. For example, the replacement provision on submarines, which we have discussed, as a subterfuge for sustaining momentum——

"Secretary Laird. That is correct. We would interpret it the same way and it applies to us, too.

"Senator Jackson. That is, on a bilateral basis?

"Secretary Laird. That's right.

"Senator Jackson. An aggressive program, beyond modernization, to deploy silo-killing warheads which threatens the survivability of our Minuteman force—you would treat that in the same way?

"Secretary Laird. Yes, sir, and would recommend action if such a program were developed and tested."

Mr. President, Senators who share my view that the Senate ought to go on record in support of the policy of the United States to seek a follow-on agreement that limits the threat to the survivability of our deterrent forces will welcome my amendment. The first part does precisely that. It urges restraint on the part of the Soviet Union by indicating that a failure to achieve a threat-limiting agreement could jeopardize the supreme national interests of the United States. In so doing, the amendment takes account of the fact that while the interim agreement may have some slight effect on the rate of growth of the Soviet threat to the survivability of our deterrent, it does not halt it. Therefore, should the threat overtake the negotiation of a follow-on agreement at any time within the next five years, our supreme national interests could be jeopardized. I will be surprised, Mr. President, to learn that there is any substantial opposition to this view within the Senate.

(2) *Equality in SALT II*

Mr. President, I have elsewhere described the present agreement as providing the United States with "interim sub-parity." The agreement confers on the Soviets a 50% advantage in numbers of land and sea-based launchers and a 400% advantage in throw weight. Now, the argument is made that this enormous disparity in numbers of launchers and throw weight is offset by superior technology and numbers of warheads on our side. There is a certain limited truth to this claim. It is not an enduring truth: for while numbers are limited under the agreement, technology is not. It stands to reason, therefore, that in the long run "superior" technology cannot be relied upon to offset inferior numbers.

The inability of technology to compensate for numbers is not only true in general but is, in the present case, true for specific reasons as well. The greatest part of our presumed technological advantage lies in our lead over the Soviets in the development and deployment of MIRV warheads on our missile forces. This lead is not one that can be maintained at anything approaching our current margin. On the contrary, when the Soviets develop a MIRV capability—and they are expected to do so at "any moment"—the combination of that capability and their vastly superior throw weight will give them, given time and effort on their part, superiority in numbers of warheads.

There is an enormous volume of misinformation on the subject of alleged U.S. advantages arising from technology and geography. There is no doubt that in the long run technology will tend toward equalization. How well I remember those who argued that the Soviets would require a decade or more to catch up with the United States in developing hydrogen weapons. The same sort of scientists who today argue that we can rest comfortably with inferior numbers of launchers because of an unbridgeable advantage in technology miscalculated by about 9½ out of 10 years back in 1947. The Russians, of course, were only months behind us, and our scientists were behind the eight ball.

As to geography I have heard it argued—the Chairman of the Foreign Relations Committee made the case himself last week—that owing to our possession of forward bases for our submarine fleet we need fewer submarines than the Soviets in order to maintain on-station times equal to theirs. Now, sea-based strategic forces are assuming increasing importance so it is essential that we be correct on this point. Despite some statements to the contrary, the geographical asymmetries favor the Soviet submarine fleet and not our own. With the increased range such as that of the Soviet SSNX-8 submarine launched missile the importance of forward bases is greatly diminished. Russian submarines will be on-station with respect to a large number of U.S. targets within one day's travel time from Murmansk or Petropavlovsk. This is not substantially different from the situation of our submarines operating out of their forward bases. What is more important, however, is that the Russians have a very large land mass between our submarines and their vulnerable points while we do not: most of the U.S. points that are targets for Soviet submarine launched missiles are coastal or near-coastal.

So there is little substance to the claim that we are in a favorable geographical situation.

The point I wish to make, Mr. President, is that, over the long run, there is no substitute for equal numbers of launchers taking account of throw weight differentials. I believe that the Senate should join with our negotiators and Administration spokesmen in rejecting, for the future, the sort of disparities that we have agreed to, on an interim basis, in the present agreement. And in so doing I believe that we ought to insist that the principle that was applied in the case of the ABM treaty—the principle of equality on which the Russians insisted—ought to be applied to a treaty on offensive weapons.

I was concerned, Mr. President, that our consent to the interim agreement, containing, as it does, the wide disparities to which I have referred, might be misunderstood as reflecting on the acceptability of such disparities in a follow-on treaty. In order to make the record clear I asked a number of witnesses before the Armed Services Committee to comment on this issue.

On July 18, I ask Ambassador Gerard Smith, the Director of the Arms Control and Disarmament Agency and head of our SALT Delegation: "Would the present Interim Agreement be acceptable as a permament agreement?" Ambassador Smith repeild: "Not to me." I then directed the same question to other members of the SALT Delegation. Former Deputy Secretary of Defense and now Assistant to the Secretary of Defense for SALT, Mr. Paul Nitze, said: "No." General Royal Allison, a member of the delegation and Assistant to the Chairman of the Joint Chiefs of Staff for Strategic Arms Negotiations, also said "No."

On July 24, I directed a similar question to Secretary Laird, with respect to whether a SALT II agreement should continue the numerical relationships established in the interim agreement. Secretary Laird, speaking for the Administration, said: "I would hope that in these negotiations we could move in the direction of equality as far as numbers and also as far as some of the other important areas dealing with offensive strategic weapon systems. I feel that this should be a very important thrust of our negotiations because this is very basic to the continued support of the obligations that we have undertaken with our friends and allies throughout the world in order to prevent the possibility of a nuclear exchange in the future."

Chief of Naval Operations, Admiral Zumwalt, testified:

"It is my view that in SALT II, we must achieve an equality of numbers. Just as the Soviets insisted on symmetry with regard to the ABM treaty, if we are going to go into a permament treaty on the strategic side, I think we absolutely must insist on symmetry."

I know of on one in a responsible position in the Administration who is in disagreement with this widely expressed view.

My amendment provides the Senate with an opportunity to declare itself in favor of equality in a follow-on agreement and I am certain that in view of the basic good sense of that position and the overwhelming testimony before us we will act to affirm it.

Mr. President, the question of what is to be included in the computation of equal forces in a follow-on agreement is related to the difficult issue of our forward deployments in Europe which are dedicated to the defense of our European allies and which are at sea.

The intent of my amendment as it bears on this matter is, I believe, perfectly clear and straightforward. In stating that "the Congress recognizes the principle of United States-Soviet Union equality reflected in the anti-ballistic missile treaty" and that accordingly "the Congress requests the President to seek a future treaty that, *inter alia*, would not limit the United States to levels of intercontinental strategic forces inferior to the limits provided for the Soviet Union" it is unmistakably clear that so-called forward based systems, which are not intercontinental, should not be included in that calculation of equality. It is my view, and the intent of the pending amendment, that any eventual treaty must recognize the necessity that the intercontinental strategic forces of the U.S. and the U.S.S.R., by which I mean to include ICBM's, submarine-launched nuclear missiles, and intercontinental range bombers of the two powers, should bear an equal relationship to one another. This says nothing about the eventual role of or disposition of the issue of forward based systems.

With regard to the question of forward based systems it has been my understanding, as clearly set forth by representatives of the Administration in testimony before the Senate, that the U.S. has refused to negotiate the issue of forward based systems in a bilateral U.S.-U.S.S.R. negotiation. I understand that this position was based on the entirely justifiable view that such systems are part and parcel of our alliance defense commitment and could not appropriately be considered without satisfactory alliance participation. I fully support the Administration's views on this matter and there is nothing in my amendment which in any way contradicts that position.

(3) *Research, development, modernization*

My amendment, in its final sentences, simply points to the need for a vigorous program of research, development and modernization leading to a prudent strategic posture. I wish to emphasize that adoption of this language is not intended to bear upon the wisdom of any particular procurement item. Decisions on procurement ought to be taken on a case by case basis. So while it is useful for the Senate to go on record to the effect that we must continue our efforts in the research, development and modernization area, Senators can rest assured that this does not constitute an endorsement of any particular weapons system or any particular research and development effort. I emphasize this, Mr. President, because I would not wish Senators to gain the impression that in voting for my amendment they are committing themselves to any future action on procurement items.

Mr. President, I began my remarks by observing that international agreements always involve unwritten hopes and expectations and reservations. Sometimes it helps to set them down. In the present case I hope, and I am sure my colleagues share this hope, that a follow-on agreement will limit the threat to the survivability of our strategic deterrent forces. It is, in my view, well to underline this hope by language that lets the Soviets know that a failure to achieve this result would jeopardize our supreme national interests. My amendment does that.

I fully expect that our negotiators at SALT II will insist upon equality just as the Soviets insisted upon equality in the ABM treaty. The issue of whether the present agreement adds up to equality is beside the point; and there will be differences of opinion on that. But what I am certain we can agree on is the necessity that we *not* accept in SALT II levels of intercontinental strategic weapons that are inferior to the levels of intercontinental forces permitted for the Soviet Union. My amendment does that.

Finally, I am confident that the Senate would wish to reaffirm its confidence in the importance of our research and development efforts.

Mr. President, the overriding hope and expectation of all of us is that the SALT deliberations will eventually produce a treaty that will assure the survivability, and therefore the credibility, of our deterrent posture. Such a treaty would be an enormous step toward world peace.

Mr. President, I want to see the Senate of the United States play a full and equal role in the effort to bring about such a treaty. The place to start is by giving our advice as well as our consent to the present agreement. We have an obligation to give direction to the future efforts of the government on SALT policy. I believe that direction must be toward survivable forces and toward equality. I am confident the Senate shares this view and that it will act to support my amendment.

I hope, Mr. Speaker, that we in the House will make our contribution toward perfecting this Executive agreement by accepting the amendment being offered by Senator JACKSON.

FOREIGN FISHING ACTIVITIES OFF ALASKA

HON. NICK BEGICH

OF ALASKA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 15, 1972

Mr. BEGICH. Mr. Speaker, today I am inserting in the RECORD a copy of the monthy summary—Juy 1972—concerning the foreign fishing activity which is taking place off the coast of Alaska.

As indicated in this report, the number of Japanese vessels engaged in fisheries off Alaska rose to a peak of 470 vessels in early July. This was due to the presence of elements of the annual Japanese high seas salmon gillnet expedition in the Alaska region.

The number of Soviet vessels increased from 25 to 30 during the month of July, and South Korean vessels remained at four stern trawlers. I certainly hope this type of information will be of interest and perhaps helpful, in some instances, to my colleagues:

MONTHLY SUMMARY OF FOREIGN FISHING ACTIVITIES OFF ALASKA, JULY 1972

SOVIET

The number of Soviet vessels engaged in fisheries off Alaska increased from 25 to 30 in July. Twenty-three Soviet vessels were engaged in fisheries off Alaska in July 1971.

Groundfish trawl fishery

The number of trawlers fishing for groundfish along the Continental Shelf edge in the Bering Sea increased slightly from 12 to 14. The fleet was divided with 6 medium trawlers fishing northwest of the Pribilof Islands and 8 medium trawlers fishing north of the Fox Islands in the eastern Aleutian Islands.

Ocean perch fishery

The Soviet ocean perch fishery off Alaska remained at a relatively low level during the month of July. A fleet of 11 stern trawlers fished off Kodiak Island in the central Gulf of Alaska, 2 stern trawlers fished in the far western Aleutians, and 2 stern trawlers fished in the eastern Aleutian Islands.

JAPANESE

The number of Japanese vessels engaged in fisheries off Alaska rose to a peak of 470 vessels in early July. This was due to the presence of elements of the annual Japanese high seas salmon gillnet expedition in the Alaskan region, and was similar to the number of vessels present in July 1971.

Pacific Ocean perch fishery

The number of stern trawlers fishing for ocean perch in the Gulf of Alaska varied between 13 and 10, and the fishery was widespread ranging from off southeast Alaska to the Shumagin Islands in the western Gulf. Continuing to fish for ocean perch along the Aleutian Island chain were 15 to 20 stern trawlers. Fishing was centered in the Seguam-Amukta Passes area in the central Aleutians with scattered activity in the far western and eastern Aleutians.

Fish meat, fish meal and oil fishery

Six factory ship fleets composed of a total of 105 trawlers continued to fish primarily for Alaska pollock on the Continental Shelf northwest of the Pribilof Islands in the central Bering Sea.

Groundfish trawl fishery

Fishing for groundfish along the Continental Shelf edge in the Bering Sea were about 15 independent stern trawlers. The vessels fishing primarily for Alaska pollock were scattered from Unimak Pass in the eastern Bering Sea to the northwest of the Pribilof Islands in the central Bering Sea.

Crab fishery

Two Japanese factory ship fleets continued fishing primarily for tanner crab with pots in the Bering Sea. One fleet remained north of the Alaska Peninsula in the eastern Bering Sea, the other fleet shifted from the area to the vicinity of the Pribilof Islands in the central Bering Sea at midmonth.

Approximately five independent processing catcher vessels are fishing for tanner crab with pots far northwest of the Pribilof Islands west of 175 degrees West longitude. This small independent fishery took place in 1971 and is outside of the area covered by the U.S.-Japanese crab treaty.

Longline fishery

The number of longline vessels fishing for sablefish in the Gulf of Alaska remained at 10 throughout July. The fishery was widespread with vessels ranging from off southeast Alaska to south of Kodiak Island in the central Gulf.

Snail fishery

Three vessels fishing with pots for sea snails continued to operate on the Continental Shelf northwest of the Pribilof Islands. The fishery was expected to terminate at the end of July.

Salmon fishery

In early July seven factory ship fleets composed of about 233 gillnet vessels fished for salmon in the Alaskan area. By mid-July four factory ship fleets composed of about 131 gillnetters remained in the Alaskan area in the northern central Bering Sea. By the end of July, the Japanese terminated their high seas salmon fishing expedition as the quota had been reached. The ten fleets fished approximately one week longer this year to reach their assigned catch targets due to rough sea conditions during the early part of the season. The poor weather conditions prevented the Japanese from making good catches of red salmon during the peak period of the run. The small amount of red salmon catch and the extended period of operation will probably result in marginal profits this season.

SOUTH KOREAN

The number of South Korean vessels fishing off Alaska remained at four stern trawlers during July. During the month two trawlers fished for Alaska pollock northwest of the Pribilof Islands in the central Bering Sea and two vessels fished for pollock and ocean perch south of Kodiak Island in the central Gulf of Alaska. By late July, the two vessels fishing south of Kodiak shifted operations to the eastern Aleutian Islands.

SHARKS AND MERCURY

HON. DAVID R. OBEY

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 15, 1972

Mr. OBEY. Mr. Speaker, in a broadcast heard here this morning, radio Australia newsreel reported that the

State of Victoria has banned the sale of the region's leading seafood—the meat of school sharks—because of high mercury levels.

In American terms, it is the equivalent of banning hamburger, and it is thus worthy of note by those who contend that the Food and Drug Administration is being arbitrary in setting a limit of 0.5 parts per million for mercury in fish sold here.

The school shark, used principally in fish and chips, comprises 70 percent of the seafood consumed in Victoria. The Australian shark catch last year totaled 16 million pounds, of which 6.2 million pounds came from Victoria's waters.

Under the ban, school sharks more than 28 inches long may neither be caught nor sold for human consumption. It is termed a serious blow to a multimillion dollar industry.

Allowing for difficulties of radio reception, it seems from this morning's account that the study of mercury levels in school sharks began in April, and that levels as high as 2 parts per million were found in some of the 480 specimens tested.

Whatever its outcome, the ban on the school shark—Galeorhinus Australis—by the Victorian minister of health shows that concern about the possible effect of mercury levels on human health is not confined to a few Swedish scientists and the FDA.

EARLY CHILDHOOD CONFERENCE

HON. ORVAL HANSEN

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 15, 1972

Mr. HANSEN of Idaho. Mr. Speaker, earlier this year in Boise, Idaho, I sponsored a conference on early childhood to focus on a timely and important subject by providing information and understanding about the needs of young children.

The day-long conference fulfilled a dream I had had for some time because of my very strong interest in young children and young children's programs. In recent months there has been a good deal of misunderstanding and a fair amount of mythology about young children and about the role we can play in helping to shape their lives in a positive way. Therefore, in order to bring some light into some of these dark corners, in order to build the base of public understanding about how children grow and develop, I felt there was a need for such a forum where we could disseminate some of the results of the growing body of research that is accumulating—a forum where we could examine some of the issues, very real issues that ought to be discussed and debated, and one that perhaps could provide a kind of foundation of knowledge and understanding on which we can build meaningful efforts.

I was particularly honored that Dr. Edward F. Zigler, then director of the Office of Child Development of the Department of Health, Education, and Welfare, accepted my invitation to keynote the symposium. Also featured at the conference was Dr. Bettye M. Caldwell, director of the Center for Early Development and Education in Little Rock, Ark., along with a number of Idahoans who are specialists and experts in the early childhood field.

As part of my remarks, I would like to include excerpts from the first Idaho Early Childhood Conference:

OPENING REMARKS OF CONGRESSMAN ORVAL HANSEN OF IDAHO

We are here today to discuss the needs of very young children—those under age six—and who should meet those needs in today's rapidly changing society.

The traditional self-sufficient extended family is today more of a memory or a myth than a reality. Instead, we see that the nuclear family dominates the scene—two parents and their two or three children. They are on their own as far as raising their children is concerned.

Throughout the 1960's and now in the 1970's, we have seen the number of mothers taking full-time jobs outside the home steadily increase. This may be due to a change in values or it may be due to the press of economic conditions. But whatever the cause, we now have to face the fact that a third of all mothers in the U.S. with children younger than age six are in the workforce, and half of all mothers with children younger than eighteen are working. The total numbers involved are staggering. As of a year ago, there were 4,327,000 mothers in the labor force with children younger than age six; they had a total of 5,649,000 children. Most of these children, some 4.8 million, came from families with both mother and father present.

What is happening to these children while their mothers are at work? This is what we are here today to discuss. Labor Department statistics tell us that there are less than a million licensed places in daycare centers and family daycare homes. The rest of the 4.6 million children whose mothers work are cared for in their own homes by relatives or babysitters, in someone else's home, or in an unlicensed group care facility. The quality of services they receive range from dismal to superb. The challenge that this problem raises is a real one. It will not go away just because we do not feel that mothers should not be working. The reality is that they are, and will do so in the future in even greater numbers. Today, therefore, we will address ourselves to the question of what our response to their children should be.

But our concern for the early childhood period goes beyond the obvious problems associated with families with working mothers. Through research, we are coming to realize the vital importance of the early years—from the prenatal period through age six. This concern is evidenced in many ways. Only 8 states, for example, require kindergarten programs, but across the United States, some 82 percent of the 5-year-olds and 29% of the 4-year-olds are actually enrolled in such programs. Obviously the parents of these children feel that something important can be gained from early education. The speakers later today will describe in detail the many ways in which these early years are of crucial importance to a child's mental, physical and social growth.

As legislation pertaining to child development programs was debated in Congress, one could not help but notice that a number of speeches were made emphasizing the importance of the family. The implication was that in some way the existence of child development programs would result in a deterioration of the family structure as we know, or imagine, it today.

I think these speakers got things backwards. The family is changing today, regardless of whether or not such programs are instituted. We have the option of responding, or not responding to this change. I am one of those who believes that we need to take whatever steps are appropriate to make sure that each child has the opportunity to realize his full potential. If his parents can handle this job on their own, fine. But if they need help, if they want advice, if they feel that their children need special services, then we should be ready to respond to these needs.

I have heard it said that child development programs will supplant the family. I believe that we can develop programs that will supplement it. I hope that after today's meeting, we will all have a clearer idea of how this can be done.

I would like to close with an idea expressed by Urie Bronfenbrenner. He asked, "How can we judge the worth of a society?" His answer: by the concern of one generation for the next. "If the children and youth of a nation are afforded opportunity to develop their capacities to the fullest, if they are given the knowledge to understand the world and the wisdom to change it, then the prospects for the future are bright. In contrast, a society which neglects its children, however well it may function in other respects, risks eventual disorganization and demise."

REMARKS BY IDAHO GOVERNOR CECIL D. ANDRUS

Congressman Hansen, Dr. Zigler, and distinguished guests: It is indeed a pleasure to have the opportunity to address you today on one of our most pressing social questions; that of adequate care for our youngest citizens. While this question has always been with us, and to a limited extent we have tried to cope with it, the magnitude of the problems involved appear to only now begin to be recognized and understood.

Undoubtedly, we could present many causes for the increase in problems in providing adequate services to our children. One, which must be a predominant factor, is many parents are no longer in the home. By this I don't just mean we are suffering problems due to one parent households, but 31% of the mothers in Idaho with children below the age of six years work.

51% of the mothers with children six to seventeen years of age work. Almost 37% more of the working age females in Idaho were employed in 1970 than in 1960. Women in Idaho now constitute 35% of the total work force. This trend indicates a radical social change for our country and presents the problems we now face and to which we must find solutions.

Through our recently created Idaho office of child development, we have been able to gather more accurate data than has ever been complied before on the problems facing children in our state. I would like to take this opportunity to outline some of those problems.

Of the 77,000 preschoolers in the state, 8,500 live in financially impoverished environments and another 6,200 are handicapped or potentially handicapped. Of those facilities in Idaho offering day care, about 60% provide only custodial care; another 33% provide custodial and education; and only 7% are full developmental programs. Only in those publicly sponsored programs is significant consideration given to the ability of the parents to pay for the services provided.

We have further found that the highest day care demand is for programs containing an educational component. Fifty percent of the existing programs could not supply enough slots to meet this demand, while the demand for merely custodial services exceeded capacity in only 12% of the centers.

We have found the median cost for operating day care facilities in Idaho at the present level of development is between 500 and 600 dollars per year. This is about 700 dollars below the Federal estimate necessary to meet minimal program standards. There are virtually no comprehensive preventative programs for children between the ages of 0 and 3 in the State of Idaho.

Preliminary data gathered by the Office of Child Development indicates only about 3% of our preschool children are receiving any kind of day care center services. Thus, about 10% of the working mothers are able to utilize day care center services. The rest must make other arrangements.

We have found that about one-third of the presently operating facilities would not provide services for special children, such as handicapped children. Thus, the need for the child from the disadvantaged home and children with handicapping conditions is acute. It is estimated that about 3,500 migrant children between the ages of 0 and 6 are in the State during the year. Of these, almost one-half are in families having established residency in the State. We also know that we have in excess of 600 Indian children below 6 years of age in the State, most of whom could utilize developmental day care services. Large sections of the State have no full-time pediatric services at all.

These are some of the problems with which we are confronted in the area of child development, especially early childhood development. Many of these problems have been with us a long time. Many of them generate out of adverse economic circumstances. Others are related to racial prejudice. But all seem to be magnified by this radical social change, this new affluence that has parents out of the home most of the time.

Whether or not we want to admit it, one of the greatest causes of our present problems is the breakdown of the basic, traditional, family unit. We must now rededicate ourselves to the solving of these problems and to the strengthening of the family unit.

In the past year, the State of Idaho has engaged, as many of you are aware, in an effort to cope with our predicament. Through the help of the National Office of Child Development and Dr. Zigler personally, we have created an office of Child Development, which is now in the process of analyzing in detail our problems and developing solutions. The office is additionally attempting to bring about more public recognition and understanding of the situation. The meeting that the Congressman has put together this morning is an outstanding vehicle for just that topic. Those of you that are in attendance here and have been to others, think back five years ago at the meetings you attended and the number in attendance as compared to the number here this morning.

In the last year we have transferred the Mental Retardation and Child Development Centers to the Department of Public Assistance. Under new leadership we will now be able to expand the services delivered by the Child Development Centers immensely.

The Department of Public Assistance has and is continuing to extend and expand social services. All eligible recipient children will soon receive periodic physical and mental examinations.

They will not only receive examinations but they will also receive improved services to meet any deficiencies found by those examinations. Of significant importance here will be a massive effort to provide adequate optometric services, including glasses for all who need them. Public assistance has amended its State plan so as to be able to take advantage of considerably more Federal funds, with a minimum amount of State or local matching money, for expanded services to eligible recipients. This presents us with a new potential in the provision of adequate day care services for a large portion of the children of the State. But it is only a potential until we are able to develop it.

In another area, we have been able to take advantage of funds provided by the Emergency Employment Act and have placed over 100 kindergarten teachers throughout the State of Idaho. While the future of this program is still in question and the legislature has still failed to fund a State supported kindergarten program, this has filled a significant gap in the universe of needs of Idaho children.

But we still must recognize we are only in the beginning stages of dealing with the problem on a statewide level. Your meeting today will present an opportunity to delve more thoroughly into the problems we are facing. I commend you for your involvement and your interest, and thank Orval for putting together this first Idaho Early Childhood Conference. We need your ideas as to how best develop programs to solve our early childhood problems. We need your help in generating the support necessary to provide for adequate federal and state financing of these much-needed services.

I hope your deliberations will bring about these ideas and answers to our problems. I stand ready to help implement any feasible recommendations you develop.

I thank you.

IN RECOGNITION OF JESSE KUHAULUA, HAWAII NATIVE SON, FIRST NON-JAPANESE TO EVER WIN A JAPAN SUMO ASSOCIATION TOURNAMENT

HON. SPARK M. MATSUNAGA

OF HAWAII

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 15, 1972

Mr. MATSUNAGA. Mr. Speaker, of all the sports of Japan, none holds a more honored position in the native culture then the art of sumo wrestling. Those other than native Japanese who have been involved in this art are few, not only because of the special physical requirements, but also because of the desire, determination, and mental fortitude that are necessary.

Eight years ago Jesse Kuhaulua left Happy Valley, Maui, Hawaii, to study the art of sumo under masters in Japan. On August 22, he will return, himself a master of this foreign art. His recent upset victory at the Japan Sumo Association tournament ot Nagoya, Japan, has stunned the sumo world and brought joy and honor to the people of Hawaii. Jesse Kuhaulua is the first non-Japanese ever to win a Japan Sumo Association tournament, and we are proud that he calls Hawaii home.

I offer for the RECORD several articles from the Honolulu Star-Bulletin and Advertiser which explain more fully the pride that the people of Hawaii have in this "local boy" who made so very, very good:

THE JESSE KUHAULUA STORY

The story of Jesse Kuhaulua is a story of success through desire and fortitude.

It's a story that should be told and retold in Hawaii to inspire our Island athletes that they, too, can attain national and international success through determination and perseverance.

Too often our Island athletes have failed because they lacked determination.

Jesse Kuhaulua of Happy Valley, Maui, won the championship of the most recent Japan Sumo Association tournament at Nagoya through guts and dedication.

His victory stunned the sumo world. It was totally unexpected.

The huge Hawaiian had not done well in the last several tournaments. He had had his ups and downs—more of the latter—and many experts were inclined to believe that he had seen his better days and that he would have to retire before long. But the experts had not figured on Kuhaulua's pride and desire to make good.

It is Jesse's ambition to attain the rank of ohzeki—champion—before bowing out. Ohzeki is only one rank below grand champion.

"It is difficult to become a grand champion, but I think it is possible to become an ohzeki," Jesse said on one of his visits to Honolulu after he graduated from the novice class.

JESSE TURNED TO SUMO WRESTLING TO IMPROVE HIS FOOTBALL PLAYING

(By Robert Johnson)

WAILUKU, MAUI.—The story of Maui is that Jesse Kuhaulua, a frail broth of a lad of 260 pounds, took up sumo wrestling so he could improve his football playing ability.

It was a good move. He not only became a better grid player, but he became one of the greatest sumo wrestlers in the world, a recent winner of one of Japan's biggest sumo tournaments.

"I recommended Jesse for sumo training as part of his training for high school football when he was about 14 or 15 years old," says Isamu Ogasawara of Pukalani, a retired Maui Pine employe. "But he already was a pretty good size, about 260 pounds."

Ogasawara said that by Jesse's third year, "he really was good. He used to practice more than anybody else.

"So I took him to Honolulu to see the sumo there and told him to practice with the professionals from Japan. One of those big sumo managers spotted him and asked if he would like to try out in Japan. At first Jesse said he didn't know if he wanted to, just like a kid.

"But after he practiced with the professionals about a half hour he came to me and said he thought he would go. He already had confidence that when he hit them he could take care of them."

It is now eight years later and Jesse will be coming home soon—the conquering hero from a foreign land.

He has announced he'll be back in Hawaii Aug. 22—and already huge celebrations as being planned for him in Honolulu and on Maui.

Jesse didn't have to go to Japan to become a hero, however. He was that in prep football here.

"He was, of course, the biggest boy in the Maui Interscholastic football League," says Wayne Tanaka, veteran Maui News sports editor.

"He didn't need to know the plays. He just went through the middle. He also was good at running conversions—right through the middle."

Kuhaulua was so big that he has been turned down by the draft twice since he went to Japan.

"Nobody doubted his strength or ability when he went to Japan," said Tanaka. "But they were pessimistic if he'd be able to withstand the hard training and homesickness."

The Maui Sumo Kyokai, along with other community and Hawaiian groups, plans a large reception for Jesse when he returns to Hawaii. Mayor Elmer Cravalho has sent Jesse a message of "deep appreciation for the recognition you have brought our beloved Islands."

When he gets here, Jesse will be mobbed at the Kahului Airport. He has been mobbed here before—and now he's bigger than ever.

TRIBUTE TO RICHARD L. MAHER, DEAN OF OHIO POLITICAL WRITERS

HON. JAMES V. STANTON

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 15, 1972

Mr. JAMES V. STANTON. Mr. Speaker, on August 10, Richard L. Maher, who was an institution in Cleveland politics and journalism, passed away due to a serious heart ailment. As shown by his 40 years of remarkable service as political editor of the Cleveland Press, Dick Maher loved American politics and understood well the complex processes by which the people of this country choose their leaders. Although he recognized there are many shortcomings in our democratic system, he also knew that our system will serve the needs of the people, and that all of the phonies and the self-seekers in public life would eventually be rooted out. His faith in our people and in our institutions never wavered, and so he was able to perform his task of reporting and analyzing political news with superhuman energy.

Despite the large role of politics in his life, Dick Maher found time to serve his community in yet other ways. He was extremely active in the Catholic Charities Corporation and in other church functions.

But it will be for his contributions to the political affairs of our community that Dick Maher will most be remembered. All of us in public life know a few selfless, generous, and dedicated men who uplift the level of politics and make us proud to be involved in the political activity of this Nation. Dick Maher was such a man, and he will be sorely missed.

I would like to insert into the RECORD several newspaper articles describing the achievements of Richard Maher:

[From the Cleveland Press, Aug. 11, 1972]

RICHARD L. MAHER

Even though he had not been in The Press office for some time because of illness, it seems difficult to accept the fact that death has taken Richard L. Maher.

For Dick Maher was always possessed of immense energy; his capacity for work was practically boundless. On election days this acknowledged dean of Ohio political writers was a source of wonder to his colleagues.

He would bat out stories all day long, work far into the night and then, with just a catnap, be back at his typewriter turning out his incisive reports of the election news—and what it all meant.

During his nearly 40 years of covering politics for this newspaper, Dick made an army of friends both in and out of the political arena. He was an eminently fair reporter, one who always enjoyed the confidence of those he wrote about.

Whatever his personal politics were, he kept them strictly to himself, not letting them slant or color his objective news reporting. It was this scrupulous fairness that won him the complete trust of those he wrote about and made him the outstanding political reporter he was.

Dick Maher lived and breathed politics. When not working at the job, he loved to sit around with friends and swap stories about the great men and little fishes in the political pond. Younger reporters got an education just listening to Dick spin yarns about the men and events he had covered in a span of four decades.

He was a prominent Catholic layman, at one time president of the Catholic Charities Corp., and he gave to this work much of his indefatigable energy. He was justly proud of the fact that Pope John XXIII had decorated him with the rank of Knight of St. Gregory 10 years ago and that, a few years later, he was granted a private audience with Pope Paul VI.

Dick's friends at The Press—and every one of us here was his friend—extend their sympathies to his family. He was respected by his colleagues for his professional abilities and much loved for his outstanding qualities. All of us will miss him sorely.

[From the Cleveland Press, Aug. 11, 1972]

MAHER SERVICES WILL BE MONDAY

Richard L. Maher, dean of Ohio political writers and for 40 years politics editor of The Press, died at 5:50 p.m. yesterday at St. John Hospital.

Mr. Maher had a heart attack last Thanksgiving Day, and had been disabled since then. He returned Wednesday to the hospital after being at home for some months.

To the last Mr. Maher held the hope that he could return to his job at The Press and to his many other interests, civic and church. His family was visiting him when his death came.

Services will be held at 11:30 a.m. Monday in St. Raphael Catholic Church, 525 Dover Rd., Bay Village.

Friends may call from 2 to 5 and 7 to 9 p.m. tomorrow and Sunday at Corrigan funeral home, 20820 Lorain Rd., Fairview Park.

Mr. Maher astonished younger reporters with his prolific reporting and writing, his unbounded enthusiasm for his job.

Considered an elder statesman among political writers through his four decades on the beat, he appeared always busy but never too occupied to assist fellow staff members with their writing problems. His contacts with important people were unlimited.

He traveled the campaign trails with Presidential nominees Herbert Hoover, Franklin D. Roosevelt, Alf Landon, Wendell Wilkie, Thomas E. Dewey, Harry S. Truman, Adlai Stevenson, Dwight D. Eisenhower, Richard M. Nixon, John F. Kennedy, Barry Goldwater, Lyndon B. Johnson, Hubert H. Humphrey and George Wallace.

He covered every major national political convention from 1936.

He knew and wrote about every Ohio governor from time of Vic Donahey, every U.S. Senator from Ohio beginning with Atlee Pomerene and all Cleveland mayors starting with Ray T. Miller.

His personal acquaintances include literally hundreds of other politicians, including councilmen, ward leaders and precinct committeemen.

In a world of political smoke-filled back rooms, Dick Maher did not smoke. He did not drink either, and many of the politicians who did both thought he was unusual when, in joining a toast with them, he chose tomato juice. And no one ever heard him use profanity.

Mr. Maher was widely praised by members of all factions for his unbiased reporting. One of his fondest recollections was his unusual relationship with the late Harry L. Davis when Davis was mayor.

"I could always walk into his office, even when The Press was blasting him," he recalled.

In 1964, the Ohio Legislature passed a resolution naming Dick Maher dean of correspondents in Columbus and citing him for "forecasting election results with an uncanny accuracy."

The resolution further stated, "His unprejudiced and analytical writing . . . has won for him an enviable national reputation." He was a life member of the Ohio Legislature Correspondent Assn.

A prominent Catholic layman, Mr. Maher was a founder of St. Raphael Catholic Church in Bay Village and later served as co-chairman of the parish administration board.

He was president of the Catholic Charities Corp. from 1966 through 1968 and later served as a member of the executive committee.

In 1948 he was named "Catholic Man of the Year" by the Knights of Columbus, at that time the youngest man ever to be chosen for the award. In 1965 he was honored at a dinner of the Knights for 40 years of service to that organization.

Pope John XXIII decorated him with the rank of Knight of St. Gregory in 1962 and three years later he was among a select few granted a private audience with Pope Paul VI.

Among his numerous other honors were the Award of Merit from the Ripon Club, oldest Republican organization in Greater Cleveland, and the Duo Decim Award bestowed by the Catholic Youth organization.

Mr. Maher was a board member of the Cleveland chapter, National Conference of Christians and Jews, and a past president of the Downtown Catholic Club, a non-profit trust fund. He served a year as chairman of the Teen-Agers March for St. Jude Children's Research Center.

Born Jan. 27, 1903, in Kane, Pa., Mr. Maher came to Cleveland with his family in 1913. He attended West High School, graduating in 1921 as class valedictorian. He later studied at Cleveland Law School.

His newspaper career began in 1924 as an office boy with the old Cleveland News. He left to be a general assignment reporter for the Lima Republican Gazette and returned to the News to serve as assistant city editor.

He left that paper in 1928 to join The Press, serving as a rewrite man for two years before becoming an assistant city editor. He was named politics editor in 1932.

Among Mr. Maher's political souvenirs are a copy of "Profiles in Courage" autographed by the then Sen. John F. Kennedy and an original volume of Tom L. Johnson's "My Story."

At Christmas of 1968, Mrs. Robert F. Kennedy sent copies of her favorite RFK photograph to newsmen who had traveled with him before his assassination during the primaries. Mr. Maher's copy read, "For Richard Maher with Christmas wishes from Ethel."

The following year Mr. Maher and Press photographer Bernie Noble traveled to Gettysburg, Pa. to do an article on Gen. Eisenhower. The interview turned out to be the last any Cleveland newsman would have with the ex-President. One of the pictures Noble took on that occasion became Mrs. Eisenhower's favorite portrait of her husband and it is used on a U.S. postage stamp.

On June 16 Mr. Maher was signally honored by Cleveland chapter of Sigma Delta Chi, professional journalistic society, which presented him its Distinguished Service Award for his outstanding contributions to journalism and also to the community through church and civic service.

Mr. Maher and his wife Lucile observed their 42d wedding anniversary on Jan. 27.

He is survived by his wife and their four children, Lucile, Helen, Francis R., Thomas P., and Edward J., and seven grandchildren.

Also surviving him are a brother, James J. Maher, and two sisters—Mary Elizabeth Smith and Dorothy Rose Dremann.

The family residence is at 26826 Bruce Rd., Bay Village.

[From the Cleveland Plain Dealer, Aug. 14, 1972]

RICHARD L. MAHER

Over the years that Richard L. Maher worked as politics editor of the Cleveland Press he won the respect of politicians and newsmen not only for his ability as a journalist but also for his high principles.

Mr. Maher, who died Thursday evening, deservedly was considered the dean of Ohio politics writers. Until this year he had covered every major national political convention since 1936. Mr. Maher was almost as much of a political figure in Ohio as the politicians themselves.

Despite the long hours Mr. Maher spent on the campaign trail, he always managed to find spare time to volunteer to church and charitable organizations. With his death the Press lost a good reporter and Cleveland a good citizen.

[From the Cleveland Plain Dealer, Aug. 11, 1972]

RICHARD L. MAHER DIES; PRESS POLITICS WRITER FOR 40 YEARS

Richard Leo Maher, 69, political writer for the Cleveland Press for 40 years, died yesterday at St. John's Hospital.

Mr. Maher was taken to the hospital Wednesday and died at 5:50 p.m. yesterday. He had suffered a heart attack last November.

The short, soft-spoken Mr. Maher was known, respected and sometimes feared by several generations of politicians. He never drank, smoked or cursed and therefore was considered odd by the politicians who did all of those things.

Mr. Maher was born Jan. 27, 1903, in Kane, Pa., and came to Cleveland's West Side when he was still very young. He was graduated from West High School and studied briefly at the old Marshall Law School.

He began his newspaper career in 1921 on the staff of the Cleveland News and worked as a reporter there for several years before becoming an assistant city editor.

In 1928, Mr. Maher went to the Press and was named that paper's political writer in 1932.

Over the course of his 50-year career Mr. Maher had received many journalistic honors. He received a Cleveland Newspaper Guild award in 1940 for coverage of the presidential campaign and won another Guild award in 1959 in the best-single-news-story category. Two months ago, Sigma Delta Chi gave him its outstanding journalist award.

Mr. Maher, a Catholic, was a member of the Knights of Columbus for nearly 45 years and served two years in the 1930s as grand knight of the Cleveland Council. He also served for several years as a district deputy, in charge of several East Side K of C councils.

Mr. Maher was a fourth degree knight, the highest possible, and a member of their Order of the Alhambra.

He served for many years on the Catholic Charities Board of the Diocese of Cleveland. In 1965 and 1966 he was general chairman of the fund drive.

For his services to the church, Mr. Maher was named a Knight of St. Gregory by Pope John XXIII on April 28, 1963.

In 1948, Mr. Maher had been named Catholic Man of the Year in Cleveland.

Mr. Maher also was a charter member of St. Raphael Catholic Church in Bay Village.

He is survived by his wife of 40 years, the former Lucile T. Thompson, a daughter, Lucile H. of Nashville, Tenn.; sons, Francis R., Thomas P. and Edward J., all of Cleveland; a brother James J.; and sisters, Dorothy Dremann of Meadville, Pa., and Mary Smith.

Funeral arrangements are to be announced.

THE ARMY CAREER OF STAN SMITH

HON. OTIS G. PIKE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 15, 1972

Mr. PIKE. Mr. Speaker, yesterday I indicated to you that I would have some further remarks on the Army's famed tennis player Stanley R. Smith. Today I wish to present my views on the role permitted Specialist Smith by the Secretary of the Army.

Maj. Willis Johnson, chief of the Army's sports office, has said:

> Stan Smith is unique. He isn't a soldier in the original concept of soldiering. Smith is a national asset.

Mr. Speaker, it burns me to hear the Army refer to Stan Smith as "unique" when other men drafted with him in December of 1970 went into the service of their country prepared to risk their life and limb in Southeast Asia. It is a sad occasion when the Secretary of the Army permits a "national asset" to spend his Army career flying around the world playing in international tennis tournaments designed to benefit his outside income and standing as a professional tennis player while other men are dying.

For the U.S. Army to have a professional tennis player on its payroll is a grave disservice to both the armed services and the people of this Nation. Stan Smith's Army career as a world tournament tennis player has done nothing for a sports program designed to improve the physical conditioning of the Army's forces by individual participation in athletic competition.

SEVENTY PERCENT OF VIETNAM GI'S BACK NIXON

HON. WILLIAM L. SPRINGER

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 15, 1972

Mr. SPRINGER. Mr. Speaker, a couple of weeks ago when I was home, I visited with my nephew who is just a plain enlisted GI flying helicopters in Vietnam.

This is the first time I had seen him since graduation from high school. He had appeared to me then just a gawky, stringy, and rather awkward 18-year-old. I was amazed at the transformation that had come about in his physical appearance in 2 years. I will have to admit I was simply amazed at his increased ability to think for himself and to come to some logical conclusion based on the facts as he saw them.

As I was leaving, he said to me:

> Uncle Bill, if you leave Vietnam without getting some kind of a settlement under which those people can live in South Vietnam, the two million who fought there, including myself, will never forget it nor ever forgive you.

He further said:

> I know there are ex-Vietnam veterans throwing away medals and marching in anti-Vietnam parades, but I can assure you they do not speak for the average guy who went to Vietnam. We don't want any of that, "going to Hanoi to beg" for the return of our prisoners. In any final settlement, we expect them to be honorably returned and any President who tries to do less than that will be losing a lot of mileage at the next polls.

Mr. Speaker, I have been turning those words over in my mind for 2 weeks and some way or other I could not forget them. I kept wondering if my nephew was an unusual Vietnam soldier or was mistaking the trend of the times. But one thing I have seen gives some significance to my nephew's words. This is the report in today's Washington Post from the Associated Press, "70 Percent of Saigon GI's Back Nixon in Poll." I do not know whether this is significant or not, but at least I think my colleagues will want to read it with some interest. It shows that 70 percent of the votes in a straw poll at the USO headquarters at Saigon were for President Nixon. Senator McGOVERN got 16 percent; 11 percent were undecided, and there was a 3-percent write-in vote mostly for George Wallace. The significant part of this poll indicates that those both over and under 25 overwhelmingly supported the President. I herewith attach the poll as given in this morning's Washington Post:

SEVENTY PERCENT OF SAIGON GI'S BACK NIXON IN POLL

SAIGON, August 13.—President Nixon was the overwhelming election choice of 1,051 American servicemen who visited the Saigon downtown USO club July 16–30.

The USO said its straw poll gave Nixon 70 per cent of the votes and the Democratic candidate, Sen. George McGovern, 16 per cent. Eleven per cent were undecided and a 3 per cent written vote went mostly to Gov. George Wallace of Alabama. As of July 27, there were 46,000 U.S. servicemen in Vietnam.

Nixon ran strongest with voters over 25, winning 79 per cent of their votes against McGovern's 10 per cent, with 8 per cent undecided and 3 per cent write-ins.

THE OTHER SIDE OF NIXONOMICS

HON. GERALD R. FORD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 15, 1972

Mr. GERALD R. FORD. Mr. Speaker, an administration always runs on its record. Republicans welcome examination of the Nixon administration's record on the issue of prosperity, whether the opposition sneeringly refers to the administration's economic policy as "Nixonomics" or not. In that connection, Mr. Speaker, I commend to all of my House colleagues a reading of an editorial which appeared in the August 8 edition of the Detroit News. The editorial follows:

THE OTHER SIDE OF NIXONOMICS

Now that Senator George McGovern has finally put his own political house in order, he is attacking the structure of "Nixonomics," the term Democrats sneeringly apply to the economic policies of the Nixon administration. So, it might be interesting to look at the charges and the facts and see who sneers last.

Nixonomics, says McGovern, is deliberately throwing people out of work.

This issue ends in a draw. True, more people are out of work; unemployment is up by 2 million. However, the Nixon administration has also presided over an economy in which some 5 million more people are working than in 1968. This increase in the numbers working has occurred despite the Vietnam and defense spending cutbacks.

The fact that unemployment has also increased is undeniably unfortunate. The combination of recession and rapid growth in the numbers of people seeking work for the first time was not completely offset. Yet, the unemployment rate during the Nixon years hit a peak of only 5.9 percent, which is not bad for recessions, especially when contrasted with unemployment rates of 6.7 percent, 5.5 percent and 5.7 percent during the Democratic years 1961–63. While no one can point with pride to the current unemployment rate, it does not smack of "deliberate" attempts to "throw" people out of work. And demogoguery won't put anyone back to work.

Nixonomics, says McGovern, sees the American worker as an enemy.

Although this is the "popular" concept, the facts refute it. In 1968, average weekly earnings in manufacturing (expressed in 1967 dollars) were $117.57. In April, 1972, the figure was $122.84 (also in 1967 dollars). Today, the real purchasing power of the factory worker's paycheck is about 5 percent better than it was four years ago, despite recession. Under the Democrats, these wages increased less than 2 percent from 1966 through 1968 because real gains of the early 1960's were dissipated by the skyrocketing inflation of the Democratic administration. It is just this kind of inflation the Democrats promise again.

Time and time again, the nation has been lured by Democratic promises that end up punishing the economy and the American worker with it. They promised both guns and butter. But we couldn't have it, at least not without inflation and an income tax surcharge that came too late. Now McGovern gloats about a higher minimum wage and promises a job for everyone. We can't have that either, not without finding hundreds of thousands of new jobs for those displaced by higher wage laws and not without inflation that robs the purchasing power of higher wages or large tax increases to pay people in government projects.

The fulfillment of this promise is years away and then only if the economy is run properly in the meantime.

Nixonomics is not a sugar coated pill. Neither is reality. Demonomics, on the other hand, always promises cherry-tasting medicine but leaves the patient with side-effects worse than the disease.

TRIBUTE TO THE LATE L. S. "SLIM" JOHNSTON, SHERIFF IN RANDALL COUNTY, TEX.

HON. GRAHAM PURCELL

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 15, 1972

Mr. PURCELL. Mr. Speaker, Slim Johnston, "Mr. Law and Order" for 20 years in Randall County, Tex., passed away Monday. With his death the people of Randall County—as well as the entire Texas Panhandle—lost a friend and a strong warrior for the cause of justice.

Sheriff Johnston, a tall man in stature, stood even taller in the eyes of the people he served. His integrity and devotion to duty earned him respect and admiration. His compassion blended with firm authority made him a sheriff whose fame was nationwide. "Slim" Johnston loved his job.

Northwest Texas will mourn his passing, Mr. Speaker, but let us pay tribute to his achievements and give thanks for his passing along our way.

As the attached article from the Amarillo Daily News indicates, "Slim" Johnston was able to accomplish what others have only aspired toward—he left the world a better place for his having been here.

The article follows:

RANDALL SHERIFF IS DEAD

(By Ann Marcy)

CANYON.—The tall, soft-spoken sheriff who won more friends than enemies in 20 years in Randall County office is dead.

L. S. "Slim" Johnston, 65, of Canyon, died of lung cancer shortly after noon today at Neblett Memorial Hospital.

He ran for office three times before unseating the incumbent, the late M. E. Cantrell, in 1952 and never faced another opponent at the ballot box.

"It would be a waste of time," commented a member of the opposing political party.

He had gotten the idea of running for sheriff while serving a two-year term on the commissioners court between 1946 and 1948.

Johnston and his wife, the former Miss Flossie Hale who had been his high school sweetheart, came to the Panhandle in 1927 from Eskota, 10 miles east of Sweetwater where he had worked at training polo ponies.

The sheriff made the trip alone, with all his farming household goods and livestock, in a 40-foot immigrant car on the Texas and Pacific Railroad and the Santa Fe Railway, settling initially near Happy.

Although sheriff, he never forgot his love of horses and at one time raised registered Appaloosas, Quarter Horses and thoroughbreds on a "little place" near Umbarger. Racks of trophies represented his success in the area.

He was instrumental in forming the Randall Sheriff's Posse and was the traditional parade master on every parade occasion.

Not long after moving to the Happy area, he acquired the nickname "Slim" even before his neighbors knew his name.

Times became so hard on the dry-land farm during the Depression that be began commuting daily to work at the zinc smelter in Amarillo—swearing, he once said, that one good crop and be would move to town.

The good crop came in '42 and he became a farmer on the side and a blacksmith and welder primarily.

When he was elected sheriff, he wasted no time before he started learning the job.

Even before taking office Jan. 1, 1963, he attended the Department of Public Safety School at Austin. Later he was invited to attend the Federal Bureau of Investigation Academy, where he also graduated, and he regularly attended retraining sessions.

Two incidents among many stand out in his career.

In 1956, he backtracked Robert Floyd Chapman, whose slashed unidentified body had been found in the county, to Phoenix, Ariz., and built a murder case against Clarence Edward Young—and gave away the $1,000 reward.

And on Christmas morning in 1960, he faced three armed suspects in the murder of Robert Potter, assistant chief of police in Tulia, on a lonely country road—in what he later called "a Mexican standoff that just doesn't happen in real life," and won without a fight when deputies arrived.

For that, be was awarded the Six-Gun Award of the Panhandle Press Association.

That was one of the few occasions he later recalled when he drew a gun on a suspect. He never had to fire it at a person and neither have his deputies ever shot any one, he said recently.

"I don't hire men who have to use force to get people to do like they say," he once said, in explanation. "There's always a way to slip around and get people to do like you want."

"A law enforcement officer has got to be in control of himself and he's got to know what is right," he said.

When he filed for re-election in December, 1971, he claimed for Randall County one of the lowest crime rates in the State and attributed success in the field to cooperation of all officers and the backing of the people. He had also stressed inter agency cooperation as a necessity in law enforcement.

Johnston had served as president of the United Peace Officers of America, which supports Boys Ranch, and as a vice president of the Sheriffs Association of Texas.

He was unopposed as a candidate for reelection in November, having won the Democratic primary also without an opponent.

Survivors includes his wife, Flossie of Canyon; two sons, Lowell and Harold.

DIFFERENT INTEREST RATE FOR NATURAL DISASTERS

HON. JAMES C. CORMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 15, 1972

Mr. CORMAN. Mr. Speaker, yesterday as the House considered the conference report on H.R. 15692, legislation to reduce the interest rate on Small Business Administration disaster loans, I cast the only dissenting vote. My decision to vote against adoption of the conference report was based on the unfairness of a flat forgiveness.

The provisions of the Disaster Relief Act of 1970 call for a forgiveness clause of $2,500. H.R. 15692 contains a two-step forgiveness feature. For victims of 1971 natural disasters the forgiveness is $2,500 with an interest rate of 3 percent. A different scale has been established for those who suffer from natural disasters in 1972: a forgiveness clause of $5,000 with an interest rate of 1 percent.

The flat forgiveness is unrealistic, unfair and much too expensive. SBA officials have estimated the total incremental cost of H.R. 15692 to be $831,248,000. It is to be noted however that Congressman FLOOD estimates the damage in his district alone at $1 billion. It is shocking that the administration has proposed that we not only double the forgiveness clause and eliminate the first $500 of repayment. The first step toward equitable treatment for all should be the elimination of the basic forgiveness provision.

The proposed forgiveness arrangement does not address itself to the differing amounts of damage suffered by disaster victims. Irrespective of the amount of damage suffered, everyone is now eligible to receive the same $5,000 grant. Under the provisions of this legislation a person with $50,000 in damages receives the same amount forgiven as the person who has had $5,000 in damages.

It would seem to me that this legislation could be far more equitable by adjusting the amount of forgiveness according to the amount of damage sustained. The person with a verifiable $5,000 loss should not be handed the same across-the-board benefits as those who suffered $50,000 in damages. Further, such a proposal would reduce the incentive for fraud.

It is hard to control a program like this. The amount of damage to the house or loss of personal property is difficult to check. The generous provisions contained in Public Law 91–606 have, in the past, encouraged homeowners to inflate their estimates of property damage and seek Government assistance when they have little or no valid claim. It is human nature for people to claim damages up to the amount of the current forgiveness. Often they are aided and abetted by contractors who want to perform the work on their homes. Obviously, if one suffers any damage at all, it is to his advantage to get $5,000 worth of repair to his home.

The 1971 California earthquake demonstrated that the disaster relief program handles disasters with the maximum of inefficiency and a modicum of fairness. The nightmarish problems my constituents had in obtaining loans showed me that the 1970 Disaster Relief Act is particularly unworkable in the case of a major disaster.

In some instances immediately following the California earthquake people 60 and 70 years old could not borrow money from the Small Business Administration to repair their homes because they could not demonstrate an ability to repay. The demand for a credit rating in an emergency like this is shocking. Nature does not choose according to income level whom it will devastate.

I share the feelings of my colleagues that it is desirable to take a hard look at the question of disaster relief. H.R. 15692 perpetuates the deficiencies in the present law and creates some additional ones. The present law, Public Law 91–606, is inadequate and unfair, but compounding the errors of the law is totally unreasonable.

"A GIFT OF HOPE, LOVE AND LIFE"—A NOTEWORTHY PROJECT SPONSORED AT CUBBERLEY HIGH SCHOOL, PALO ALTO, CALIF.

HON. CHARLES S. GUBSER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 15, 1972

Mr. GUBSER. Mr. Speaker, at Cubberley High School in Palo Alto, Calif., shortly before the end of last year's school term, a great leader, Coach Bob Peters, submitted to a public haircut and shave. This was significant not as a means of turning against long hair and beards but for a much more important reason. It was the beginning of a great movement which I hope will spread nationally. It was the beginning of a positive expressive by young people of an attitude against war in the form of a gift to Children's Medical Relief International, an organization which specializes in the rehabilitation of disabled Vietnamese war children.

Coach Peters had conducted a vote among students as to whether he should shed his hair and beard or should not. Those who favored a visit to the school by the local barber won by a small margin but in the meantime the fee for casting votes raised more than $1,500.

Since then the group has conducted a series of car washes, maintained carnival booths, held a dance, and a weight lifting contest, all of which collected money for a very worthwhile cause.

Coach Bob Peters has written me as follows:

> . . . We are tired of self-defeating, destructive kinds of protest which serve only to antagonize and alienate the very people who are in a position to do something about that which we are so deeply concerned. We are only hoping that our "Gift" will bring vivid realization to all the world the fact that innocent children are maimed and disfigured from the indiscriminate consequences of war. Political beliefs regarding whether or not we should be in Vietnam are not of a major concern in relation to this "protest," for it is only war itself and the unutterable consequences of it that we are challenging.
>
> "We strongly believe in the premise that *all* must work together for peace and not fight amongst themselves in the name of it. Ninety-five percent of the nation's high school and college population have been publically misrepresented by less than five percent who "throw rocks at cops and bricks through windows," hypocritically, in the name of peace.
>
> We are calling our movement "A Gift of Hope, Love and Life,"

Mr. Speaker, I have been privileged to make a very small contribution to this worthwhile cause and I sincerely hope that others across the country will support the movement, help it spread, and contribute to it. I believe Coach Bob Peters is entitled to great commendation for the guidance he has provided young people. Through his efforts the intense feeling against all kinds of war is channeled into constructive activity.

LAETRILE: THE CANCER FIGHTER WASHINGTON WILL NOT TEST

HON. JOHN G. SCHMITZ

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 15, 1972

Mr. SCHMITZ. Mr. Speaker, a letter to Congressman LOUIS FREY, JR., from Dr. Dean Burk, head of the cytochemistry section, National Cancer Institute, May 30, 1972, said:

> In spite of the aforementioned Food and Drug Administration (FDA) prohibition of Laetrile in interstate commerce, there are well over 1000 cancer-afflicted persons in this country using Laetrile for cancer treatment and amelioration, and a goodly number of noncancer persons using it merely with prevention of development of cancer in view, and these various persons include M.D. physicians as well as laity. I have had considerable personal experience in this regard, for in the past year alone at least 750 persons, including more than 50 physicians, have contacted me for information on the use and availability of Laetrile, and I know of others with approximately the same quantitative extent of similar experience. In over 20 countries of the world, well over 5000 cancer patients have been treated with Laetrile, with, significantly, no demonstrable noteworthy clinical contraindication of its use either alone or in conjunction with virtually any other anticancer agents, chemotherapeutic, radiological, or surgical. Laetrile at physician-prescribed dosages is nontoxic by a factor of 100–1000 times when compared to essentially all anticancer drugs now used with FDA approval . . .
>
> Although the foregoing Laetrile utilization in this country is proceeding, as indicated, in spite of FDA prohibition, it is even more so because of unwarranted FDA procedures, and lack of FDA scientific and medical justification for its stand, extending to probably unconstitutionality, concerning which many thousands of cancer-afflicted persons and their relatives and physicians are rapidly becoming aware.

In the case of other drugs and medicines removed from the market, as discussed in my newsletter of July 26, 1972, at least some medical tests were cited to show "ineffectiveness." But in the case of the anticancer agent Laetrile, the Food and Drug Administration refuses even to make clinical tests. They have ruled Laetrile out because it does not fall within an arbitrary definition that any anticancer drug must be toxic—that is, to some extent poisonous to healthy cells as well as cancer cells. Incredible as it may seem, some medical bureaucrats have simply decided that no nontoxic substance can ever help cancer patients, and therefore all such substances are to be automatically excluded from the market and no medical evidence in their favor is even to be considered.

If there had been an equivalent of the Food and Drug Administration a century or more ago, it might well have banned, at an enormous cost in human suffering and mortality, both antiseptics and anesthetics, which were strongly opposed by influential elements in the medical community of that day.

This is not a matter of "quackery," panaceas or "secret remedies." The head of the cytochemistry section of the National Cancer Institute is hardly a quack. Far from objecting to testing, or blocking it, this is what Laetrile advocates are asking for, while the supposedly "scientific" medical establishment is refusing to make the experiments which are the very basis of the scientific method.

I have introduced H.R. 12092 which would override the arbitrary FDA dictate against testing nontoxic anticancer agents and require that this testing be undertaken. This would seem the least that should be done in light of the evidence that Dr. Burk and others have assembled showing that Laetrile can prolong and in some cases save the lives of cancer victims, and the generally agreed upon fact that it does no harm to the patient, while conventional toxic anticancer drugs often have serious side effects precisely because they are toxic.

Millions of dollars are to be spent under the authority of recently passed legislation to search for better treatment or cures for cancer. It would seem that a little of all that money ought to be allotted to find out if Laetrile might be what they are looking for.

DIPLOMACY PROS GRADE AGNEW AS AN ASSET

HON. J. HERBERT BURKE

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 15, 1972

Mr. BURKE of Florida. Mr. Speaker, with vice-presidential candidates so much in the news lately, it is interesting to learn what people of other countries think of the men proposed as candidates as well as the opinions of the American people. For this reason I thought my colleagues might be interested in reading Richard Wilson's column from the Washington Evening Star and Daily News for Monday, August 14, 1972, "Diplomacy Pros Grade Agnew as an Asset."

As a member of the world family of nations, it is important that the No. 2 man in our country be a man who commands respect and admiration from representatives of other sovereign states with whom he must work. We are fortunate to have such a man in the office of Vice President today.

The article follows:

DIPLOMACY PROS GRADE AGNEW AS AN ASSET

(By Richard Wilson)

An assessment of Vice President Agnew by the New York Times, as a dunce who had learned nothing in the vice presidency, and who as an emissary abroad was a "jet-propelled embarrassment," is of special interest. The interest grows out of the fact that vice presidential candidates are prominent this year and Senator McGovern has finally put over as his choice a cultivated fellow-Marylander, Sargent Shriver, who was ambassador to France and is thus presumed to be able to give a good account of himself in world affairs.

If Agnew were in fact a jet-propelled embarrassment to this country, that should certainly be taken into account in judging whether he ought to remain in direct succession to the presidency. Who would know better than some of the hardened career foreign service types in the State Department who are traditionally sensitive to the intrusion of bungling politicians in their delicate affairs? They do not agree with the harsh judgment on Agnew.

Such people did not successfully hide their distaste for gauche behavior by Lyndon B. Johnson on his travels abroad. Nor did they withhold criticism of Nixon on similar missions when they thought he deserved it.

The showmanship quality (Nixon's kitchen debate with Khrushchev, Johnson's Pakistani camel driver) annoyed and embarrassed some. The absence of showmanship in Agnew's travels is all the more noteworthy.

On two occasions, one of the highest ranking and most respected of foreign service officers, whose career extends back through six administrations, wrote to Agnew to commend him on his behavior and actions abroad. This officer has never previously been moved to write to a traveling vice president.

Another foreign service officer of 15 years experience, who has been involved in eight presidential or vice presidential visits to foreign countries, had nothing but praise for Agnew. This praise was confined not merely to Agnew's ceremonial functions, which he conducted with reserve, dignity and aplomb, but included matters of substance.

An example of the latter was Agnew's scheduled 45-minute conference with President Chung Hee Park of Korea which extended into a six-hour session reflecting fears that the Pueblo incident and the current withdrawal of an American division reflected the hidden U.S. intention to leave Korea in the lurch. Agnew got on the phone to Washington and before he left Korea matters were straightened out to Park's satisfaction.

The criticism of Agnew as a jet-propelled embarrassment evidently grows in part from two or three incidents which may have embarrassed his critics but did not similarly affect President Nixon and Secretary of State William P. Rogers. One was Agnew's visit in 1971 to his father's homeland, Greece, where he identified himself with the "overriding importance" of continued military support to the regime of Premier George Papadopoulos. This may have been contrary to the foreign policy of the New York Times, but not to the established foreign policy of the United States.

On another occasion, after visiting Africa, Agnew said that querulous and complaining American black leaders could learn much from the dynamic leadership of three heads of state he met in Africa, including Congo President Joseph D. Mobuto. This offended the Rev. Jesse Jackson of Chicago, the man who ousted Mayor Daley from the Democratic national convention, but it did not upset President Mobuto or Secretary Rogers. It also contended that Agnew went out to a game preserve in Africa to witness love-making among the rhinos. The foreign service types at the State Department are not much interested in whether or not that is true.

They are more interested in the fact that Agnew actually reads and studies the voluminous reports and analyses they supply him, and that he is particularly sensitive to nuances of behavior in a foreign land which might unwillingly offend. They stress that Agnew listens attentively, respectfully and responsively to foreign leaders and can cite no instance of the blunt saying of the unsayable that makes Agnew so popular in some quarters at home and unpopular in others.

This is not to say that nearly four years in the Vice Presidency and some extensive world travel have made this former county executive and governor into a foreign affairs genius. But it can be said that Agnew's missions abroad, on balance, have gratified the foreign service professionals. He has been tested in some very delicate and difficult situations, such as Japan's reaction to American policy, and, on the whole, is considered by the professionals to have made a constructive contribution to the improvement of America's world relationships. Secretary Rogers is also highly favorable in his assessment of Agnew's performance.

NEW TRADE RELATIONSHIP WITH THE SOVIET UNION

HON. WILLIAM S. MOORHEAD

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 15, 1972

Mr. MOORHEAD. Mr. Speaker, on May 18, I introduced legislation (H.R. 15075) designed to normalize and expand our trade relations with the Soviet Union. The purpose was twofold—to bring mutual benefit to both our economies and to pave the way for new understandings for a more peaceful world.

The Soviets have made significant overtures to the United States for a closer economic relationship. The following article from the August 10 edition of the Washington Evening Star and Daily News describes the most recent developments in agricultural trade which I think are of major importance:

SOVIET GRAIN DEAL NOW ESTIMATED AT $1 BILLION

(By Bernard Gwertzman)

The Agriculture Department estimates that the Soviet Union will purchase $1 billion worth of farm products over the next 12 months. That far exceeds previous estimates, and would boost Soviet-American trade to unprecedented heights.

The latest forecast was compiled by top department officials on the basis of talks in recent days with private commercial dealers negotiating with the Russians, as well as from reports from Moscow indicating that the Soviet Union will suffer from a second bad harvest this fall. The spring harvest also was not good.

HALT IN WHEAT

The projection of a billion dollars in sales over the next year goes far beyond the $200 million in grains which Moscow committed itself to purchase as part of a $750 million, three-year deal announced by the White House on July 8.

Agriculture Department officials said that about $500 million of the total billion-dollar sales will probably be in wheat. The rest probably will be in corn, sorghum, rye, barley, oats and soybeans, the Agriculture Department estimated.

Department officials said that an American company, Cook Grains of Memphis, Tenn., has just about wrapped up the first soybean sale to the Russians—one million tons—valued approximately at $100 million.

These products are used in producing animal feeds; soybeans in particular are valued for their high protein content, useful for the growth of cattle.

Under the current Soviet five-year economic plan, Moscow is committed to a 25 percent increase in protein consumption, to be achieved principally through an increase in the amount of meat and dairy products in the Soviet diet.

The large sales to the Soviet Union will cause a severe imbalance in trade between the two countries. Some officials here believe that the Russians may have to sell gold on the world market to cover the heavy agricultural purchases.

THE HERALD-NEWS REPORTS ON ANTI-U.S. PROPAGANDA FILMS

HON. ROBERT A. ROE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 15, 1972

Mr. ROE. Mr. Speaker, the following series of news articles by the distinguished newspaper correspondent Phillip Chen which recently appeared in one of New Jersey's most prestigious newspapers, the Herald-News, brings public focus on firms selling anti-U.S. propaganda films. The revelations of this series of startling news articles received considerable attention and reaction from constituents in my congressional district.

The newspaper reporter's job is not an easy task and is, as we all know, a great public trust. Correspondent Phillip Chen's own personal crusade in the objectivity of his reporting is most stimulating in that he is always seeking to ferret out that fine line between propaganda and the truth. The Herald-News of Passaic, N.J., is, indeed, performing a great public service in their ever constant vigil to keep our citizenry alerted and informed in a most constructive responsible way.

Their publication of Phil Chen's excellent series of news articles alerting the Nation's conscience and resolve to the threat of anti-U.S. propaganda sources helps to insure the full disclosure of all facts, so necessary to achieving unbiased, unslanted news coverage—all responding to the ideals and responsibilities of a representative democracy which has historically made America the great country of refuge and promise that she has symbolized throughout the centuries for all peoples—and particularly the oppressed and needy—of all nations of the world.

It gives me great pleasure to join with the Herald-News in bringing these writings of Mr. Chen to your attention for your review and consideration.

The news articles are as follow:

[From the Passaic (N.J.) Herald-News, May 8, 1972]

Firm Sells Anti-U.S. Films

(By Philip Chen)

For $35, a viewer can get a kick out of seeing the military ridiculed in "The Selling of the Pentagon," a 54-minute film put together in 1971 by CBS.

"Time Is Running Out," a film which condemns "U.S. atrocities" in Indochina, can be seen for $25.

"But Inside North Vietnam," a color film shot by Felix Greene, the British left-wing journalist, costs $125, and "China!", another Greene production, goes for $135.

All these so-called documentary films, plus scores of other short-subject films, can be rented (or bought for a higher price) from a little-known company called the American Documentary Films Inc. in New York.

ADF films, which propagandize radical and leftist causes, are viewed nationally, according to company officials. "Churches and colleges are our largest groups," one said.

An investigation of American Documentary Films by The Herald-News disclosed a number of facts, including the finding that it is doing business with organizations heavily dominated by Communists.

Its films, most of which are produced by independents and ADF cameramen, include a few network products.

PURE PROPAGANDA

A source familiar with the ADF operation told The Herald-News these so-called "documentary films" are pure "propaganda" serving radical, anti-establishment and revolutionary causes.

"They're very subtle about it, but they're in it to express a point of view. They try to influence the young people, who I think, are poorly equipped to recognize propaganda when they see it," the source said.

Some of the ADG films are being shown in New Jersey, mostly by radical groups that include the Peace Education Association of New Jersey. Colleges generally shun ADF products, although several, including William Paterson College, have heard about the film.

The Communist within ADF management ranks is Michael Myerson, 32, a member of the ADF board of directors and coordinator of a Cuban film festival ADF recently sponsored in New York.

The festival was shut down when Treasury men raided the theater and seized the film the firm was showing.

A rebel and an agitator, Myerson has been involved in radical student movements in California and has held the post of international secretary of the W.E.B. DuBois Club, a Marxist study group.

Sworn testimony before the House Committee on Internal Security identified Myerson as a member of the Peace Commission of the New York State Communist Party, USA. He visited North Vietnam in 1965 and was made an "honorary nephew" of Ho Chi Minh, the North Vietnam Communist chieftain.

Repeated attempts by The Herald-News to reach Myerson for an interview have been unsuccessful.

Jerry Stoll, a 45-year-old activist who heads the ADF board of directors, is also not available for an interview.

Founded in San Francisco in 1966, American Documentary Films opened its New York office in 1968. The ADF 1972 catalogue advances the firm as a non-profit organization, but the non-profit status seems to be largely self-proclaimed.

The Internal Revenue Service in New York and in Washington, D.C. could find no record of ever granting the firm tax-exempt status. An IRS spokesman said all ADF receipts are subject to federal taxation.

NEW YORK STARTS PROBE

The New York State Attorney General's Office has begun an investigation into ADF for failing to file annual financial statements.

Herbert Wallenstein, who heads the charitable fraud bureau, said ADF is required by law to file annual reports because it is soliciting funds from the public. ADF has not filed a report since it opened for business in New York, Wallenstein said.

In its 1972 catalogue, ADF lists more than 20 political organizations, which it said, are involved in the production of ADF films.

Two of them are the New Mobilization Committee for Peace in Vietnam and the People's Coalition for Peace and Justice. Both have been identified by the House Committee on Internal Security as being under Communist influence.

According to testimony before the committee in 1970–71, the New Mobilization Committee has operated from its inception with "significant Communist support."

"The national leadership of the New Mobilization Committee includes several key activists who have been shown either by public source data or by committee investigation to be or to have been members of such diverse Communist groups as the Communist Party, USA; W.E.B. DuBois Clubs of America; Labor Youth League; Revolutionary Workers Party; Young Socialist Alliance, and Student Mobilization Committee."

As to the Peoples Coalition group, Rep. Richard H. Ichord. D-Mo., who heads the house committee, had this to say:

". . . the committee received considerable documentary evidence and testimony establishing the significant presence of Communist Party, USA, in PCPJ . . ."

The Cuban Film Festival, an ADF project, opened April 24 at the Olympia Theater, New York City.

It closed down the next day, after agents from the Treasury Department seized a Cuban film, "Days of Water," on grounds that ADF had failed to obtain a license to bring the film into the U.S.

NO LICENSE

"We saw an ad in the paper, checked our files and realized we had not licensed it. We then went and seized the film," a spokesman for the department's Foreign Assets Control in Washington, D.C. said.

The spokesman said failing to obtain a permit constituted a violation of the Trading with the Enemy Act, which is punishable by a 10-year prison term and a $10,000 fine, and the Anti-Smuggling Act, which carries a penalty of five years in jail and a $10,000 fine, both upon conviction.

The spokesman declined to go into specifics of the case, but he gave indication that the department wanted to know how ADF got the film into the country and what kind of financial arrangements it made with the Cuban producer.

"They don't seem to be very cooperative," he stated. "We're now after all of their films."

In a release issued from his New York office, Myerson called the seizure "illegal" and a "harassment." ADF president Stoll claimed his firm has cooperated with the Treasury Department and opened its files to "demonstrate the absence of financial ties to Cuba."

[From the Passaic (N.J.) Herald News, May 9, 1972]

Myerson "Honorary Nephew" of Ho

(By Philip Chen)

Michael Eugene Myerson, a director of the American Documentary Films, has served rebel causes for at least a decade, government records indicate.

Myerson, 32, was an agitator, an organizer, a writer and a world traveler.

A 1965 trip to North Vietnam brought him an unexpected bonus: he was made honorary nephew of Ho Chi Minh, the North Vietnam Communist boss. Since his return, he has sported a Viet Cong cap and carried a Viet Cong flag at demonstrations protesting the war in Vietnam.

The specific date of Myerson's joining American Documentary Films could not be ascertained.

Myerson, however, was not among the original officers when ADF filed its incorporation papers in New York in 1968. His name turned up in recent ADF letterheads as the third-ranked director in the nine-member board of directors, after Jerry Stoll, president and chairman, and Miss Kay Anderson, who runs the New York film distribution center.

Myerson, according to testimony given at a 1968 hearing before the House Committee on Un-American Activities, was born in Washington, D.C. The committee reports gave the following biographical sketch.

"He (Myerson) gained his first solid experience at agitation as a member and later chairman of SLATE, a radical student organization at the University of California. From organizing protests against ROTC and the House Committee on Un-American Activities, Myerson graduated to the leadership of the U.S. delegation to the 1962 Communist World Youth Festival.

"After the festival, Myerson filed a number of reports on it from abroad. No information is available on his whereabouts or activities from then until the fall of 1963, when he turned up in San Francisco.

"On Nov. 3, 1963, Myerson was arrested at a demonstration at Mel's Drive-In. He was charged with disturbing the peace and trespassing. Myerson identified himself as co-chairman of the Ad Hoc Committee Against Discrimination.

"In 1964, Myerson was busy helping organize the W.E.B. DuBois Clubs. The People's World reported that Myerson was a leading participant in the coastwide conference of socialist-oriented young people sponsored by the W.E.B. DuBois Clubs of San Francisco, San Francisco State College, Berkeley, West Los Angeles, and the Youth Action Union of Los Angeles, held March 21–22, 1964.

"The national founding convention for the W.E.B. DuBois Clubs was held in June, 1964. Myerson was a member of the national coordinating committee for the convention and a staff member of The Convener, official newsletter for the national coordinating committee.

"He was subsequently appointed West Coast Representaive for the W.E.B. DuBois Clubs of America (DCA).

"In Jan. 1965, the DCA published a pamphlet by Myerson entitled 'The United States War in Vietnam.' It was reviewed in the CPUSA's (Communist Party, USA) monthly propaganda organ New World Review as a 'useful account of our aggressive war in Vietnam.'

"In May 1965, Myerson was given the post of international secretary for the DCA. In July, he attended the Communist World Peace Congress at Helsinki, Finland.

"He and DCA member Harold Supriano, with Chris Koch, an announcer for radio station WBAI, and freelance writer Richard Ward, sought out members of the North Vietnamese Peace Committee at the congress and requested permission to visit North Vietnam.

"The invitation from North Vietnam was extended and the four spent the last week of August and the first week in September in North Vietnam.

"Myerson was made a honorary nephew of Ho Chi Minh and since he returned to the United States, he has sported a Viet Cong cap and carried a Viet Cong flag at demonstrations protesting the war in Vietnam.

"In 1966, Michael Myerson joined the staff of the Communist Party publishing house, International Publishers.

"Mike Myerson is currently director of the Tri-Continental Information Center in New York City, He has held that post since the formation of the center was announced in the spring of 1967.

"The declared intention of the Tri-Continental is to propagandise on behalf of national liberation movements fighting throughout the world against U.S. colonialism and neo-colonialism."

In a study of a radical group called the New Mobilization Committee to End the War in Vietnam, the House Internal Security Committee further identified Myerson as a member of the Peace Commission of the New York State Communist Party.

The house staff study said Myerson attended a meeting in Cambridge, Mass., on Oct. 13, 1968, called by the New Mobilization group to discuss, among other things, the house hearings on the involvement of New Mobilization in the Democratic National Convention disruptions, the presidential election and proposed activities in Washington during inauguration.

The Herald-News has made several attempts to reach Myerson for an interview, but none proved successful.

[From the Passaic (N.J.) Herald News, May 10, 1972]

HOUSE ON 84TH STREET: PROPAGANDA STOREHOUSE

(By Philip Chen)

Secreted in the basement of a weather-beaten building at 336 W. 84th St., New York, is the headquarters of the American Documentary Films, Inc.—a well stocked film lab.

Here, hundreds of 16 mm films are stored, their subject matter curving from the left to the far left.

For a price, the films can be rented or bought.

ADF officials are poor conversationalists. The president, Jerry Stoll, and a member of its board of directors, Michael Myerson, refused to meet with a Herald-News reporter.

Miss Kay Anderson, who said she heads the ADF East Coast distribution network, refused to discuss company finances or answer questions about ADF film sources or to reveal its customers list.

"Are you a Communist organization?" she was asked.

"We are a non-profit organization," she answered.

Miss Anderson, a shapely 28-year-old brunette, was asked the question again. After a moment of hesitation, she replied: "No."

"Do you draw funds from Communist sources?" Miss Anderson was asked.

"Not that I know of," she said.

Records obtained by The Herald-News indicated that the firm is doing business with organizations that have been identified by the House Committee on Internal Security as being dominated by Communists and that Myerson in fact has been a member of the Peace Communist of the New York State Communist Party.

American Documentary Films got its start in San Francisco in 1966. Its first production was "Sons and Daughters," a 90-minute film assailing the U.S. involvement in Indochina.

Its New York office began operation in 1968.

According to available data the firm spent $120,000 in film production, all of which except for $16,000 came from small contributions, community fund-raising efforts and film rental and sales incomes.

Of the $16,000, the Episcopal Church contributed $7,000 in 1969 for the shooting of a film about "Huey Newton," the militant Black Panther Party chieftain.

The United Church of Christ gave $4,000 in 1968, but its officers in New York could find no record of the grant. Jim Richards, who heads the Office of Communications, said the grant could have been made by any of the 50 church conferences throughout the country.

The same answer was provided by the American Friends Service Committee, a Quaker group that gave ADF a $3,500 grant in 1966.

The Rev. Richard R. Fernandez of the Clergy and Laymen Concerned About Vietnam, on anti-war organizations confirmed a 1968 grant of $1,500. He said it was for the making of a film about a CBS correspondent, David Schoenbrun.

Promotional literature put out by ADF claimed that its films have been viewed by more than 1 million persons in the U.S. and a minimum of 7 million persons have seen its films overseas, both in theaters and on television.

The assets of ADF as of 1971 were listed at $41,000 and its liabilities, $40,562.

As of 1971, ADFs New York office booked $1,400 worth of films a week and its San Francisco office, $550 a week. ADF officials estimated that it cost the firm $9,692.30 for every million viewers.

Currently, ADF film inventory carries 190 titles, according to Miss Anderson. Rental fees start at $15, but they go as high as $115.

Outright sales price range from $70 to $650.

Sample titles include "Listen Whitey," which claims to represent the black community's response to the assassination of Dr. Martin Luther King; "Dr. Spock and his Babies," an antiwar picture, and "Defense vs. Domestic Needs," which depicts the military-industrial complex.

Asked why ADF films follow a leftist line, Miss Anderson denied the firm follows a radical dogma. "We have no political lines," she claimed.

A 1966 graduate of Oregon State University, Miss Anderson explained the firm tries to provide an "alternate media" for the distribution of films that are shunned by the commercial media.

She conceded that most of the ADF films are "controversial," but she insisted that the public should have access to "something other than those offered in theaters and by commercial television networks.

"I think it's a very good idea. An alternate media is very important," she said.

THE ADMINISTRATION AND ISRAEL

HON. SEYMOUR HALPERN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 15, 1972

Mr. HALPERN. Mr. Speaker, the gallant people of the State of Israel have fought and have died for their right to exist in a hostile world. Their determination and courage serve as a beacon to freedom-loving nations around the globe. All too often the American people forget the crisis situation which daily faces the inhabitants of this tiny nation. Fear of invasion, attack, and embargo are a constant threat to the peace and security of the State of Israel.

Since Israel's creation in 1948, it has had close ties with the United States. As a Congressman, I strongly support the administration's actions in the Middle East and its efforts to preserve the sovereignty of the State of Israel. Recently I came across an excellent article in Newsweek magazine by columnist Stewart Alsop, summarizing U.S. policy toward Israel during the past few years.

I commend this article to my colleagues.

[From the Newsweek magazine, July 10, 1972]

ISRAEL

(By Stewart Alsop)

WASHINGTON.—It has been reported that most of the Israeli leadership including Prime Minister Golda Meir, favors the re-election of President Nixon. This report has, of course, been denied. It is, of course, true.

It has also been reported that the pro-Nixon views of the Israeli leaders have been explicitly conveyed to important members of the U.S. Jewish community. This report has also been denied. It is also true.

The interesting question is: Why?

The best way to answer that question is to go back to September 1970. In that month, though very few Americans were aware of it, there occurred the most dangerous crisis of the Nixon Presidency. On Saturday and Sunday, Sept. 19 and 20, a Syrian force of 250 Soviet-made tanks poured across the border into Jordan.

There was no doubt at all that the invasion was masterminded by the Russians—Russian advisers controlled the Syrian Army down to battalion level, though the advisers prudently left the tank force at the border. There was no doubt, either, about tne object of the invasion. It was to dethrone Jordan's moderate King Hussein, and replace him with a fedayeen-dominated, pro-Soviet regime dedicated to the destruction of Israel.

On Monday, Sept. 21, Israel's Ambassador Rabin got a call from the White House. What could the Israelis do to halt the invasion, and what would they be willing to do? Rabin replied that he thought he knew the answer to both questions, but that he would check to make sure, and call back.

DEEDS, NOT WORDS

He did so shortly, with both answers. The Israelis were absolutely confident that their own forces, operating from the Golan Heights, could capture or destroy the entire Syrian invading force. As for the second question, the Israelis were entirely willing to take the risks involved, on condition only that the American Government make it clear to the Soviets that the U.S. would vigorously oppose any Soviet-sponsored counteraction, at the Suez Canal or elsewhere.

President Nixon unhesitatingly made this commitment. It was then mutually agreed that, if the Syrian invading force crossed a line between Irbid and Amman, thus threatening the Jordanian capital, the Israelis would move.

At this point a nervous State Department urged immediate diplomatic approaches to Moscow, the major NATO powers, and Cairo. The President issued a stern order—absolutely no communication with Moscow or any other capital. There would be, not words, but deeds.

One of the five U.S. divisions stationed in Germany was ordered on full alert, and so was the elite 82nd Airborne Division in the United States. Secret arrangements were made with the Greek Government to provide staging areas and base support in case of a move by U.S. troops.

A FLEET MOVES EAST

At the same time, the U.S. Sixth Fleet in the Mediterranean was heavily reinforced with aircraft carriers and their attendant task forces. The Sixth Fleet was rapidly built up from its normal on-station strength to no less than five carrier task forces. This very formidable naval force began to redeploy toward the eastern Mediterranean.

The eyes of Soviet intelligence, watching from Tangiers and Gibraltar, saw the ships funneling through the Straits. Ambassador Dobrynin being absent, Soviet minister counselor Vorontsov hurried round to the State Department. On White House orders, he was coolly informed that the Syrian invasion endangered world peace, and that if the Syrian tank force failed to turn back, the danger would become acute.

On Sept. 22, after a Jordanian counterattack, the lead tanks in the Syrian force made a 180-degree turn. Within the next few days, the whole Syrian invading force scuttled back across the border. Thus ended the most dangerous crisis of recent years. Like the Cuban missile crisis, it involved the risk of direct confrontation between the nuclear giants. But the decisions were made in total secrecy, and there was no public drama like President Kennedy's address to the nation. So most Americans were—and still are—blissfully unaware that an immensely dangerous crisis had taken place.

The Israeli leaders, of course, were very much aware of the crisis, and of how President Nixon had responded to it. That awareness largely explains Ambassador Rabin's recent undiplomatic statement on Israeli radio: "While we appreciate support in the form of words we are getting from one camp, we must prefer the support in the form of deeds we are getting from the other camp." Consider the lessons of the crisis, as they must appear through Israeli eyes, and it is not hard to see what Rabin had in mind.

The 1970 crisis underlined an unpleasant fact. Almost all the bases and staging areas that used to be open to American forces, in the 1958 Lebanon crisis, for example, are now closed—Turkey, Malta, Libya, Spain, Lebanon itself. The Italian ports might have been used, but only *in extremis*, without the permission and against the wishes of the Italian Government. "Greece is our last filling station," one policymaker has remarked. Senator McGovern would close the last filling station. He has said that he would immediately withdraw all aid from the present reactionary Greek regime. The Greeks would, of course, retaliate.

Under the McGovern defense program, there would be, not five, but two U.S. divisions left in Europe, with only eight divisions at home. Moreover, McGovern plans to reduce the U.S. carrier task forces from fourteen to six. Only half the carriers are on station at any one time, so a President McGovern could not possibly put five task forces into the Mediterranean on short notice. Under the McGovern naval program, in fact, the Soviet Mediterranean fleet, already challenging the Sixth Fleet, would unquestionably become the dominant force in the Mediterranean. In such circumstances—as the Israelis are well aware—the United States would be capable of words, but precious few deeds.

THE ISSUE OF EXISTENCE

President Nixon certainly took a hair-raising risk in 1970, and it is at least debatable whether the risk was worth taking in the coldly calculated U.S. national interest. Mr. Nixon made an enormous commitment to Israel and gained no comparable commitment in return. But it does not require much perception to see why the Israelis would much prefer a re-elected President Nixon to a President McGovern.

The Israelis have one single-minded preoccupation—the continued existence of Israel. To that end, as Rabin said, American deeds are much to be preferred to American words. This understandable preoccupation may be one reason—and a not unimportant one—for the last-minute revolt against the nomination of George McGovern.

PROPOSED AMENDMENT TO EQUAL EDUCATIONAL OPPORTUNITIES ACT

HON. HERMAN BADILLO

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 15, 1972

Mr. BADILLO. Mr. Speaker, I am taking this opportunity to advise our colleagues that when H.R. 13915, the so-called Equal Educational Opportunities Act, is brought to the floor this week I will offer an amendment aimed at providing quality integrated education by removing unfair barriers to equal housing opportunities.

The amendment will be offered to title IV of this legislation, which deals with the remedies a Federal court, department or agency may employ to alleviate a denial of equal educational opportunity. To the list of remedies enunciated in title IV, my amendment would add two:

First. The removal of land-use barriers, such as zoning and building codes, to development of low- and moderate-income housing; and

Second. The actual construction of low- and moderate-income housing.

The rationale for this amendment is clear. It is no secret that a major underlying cause of segregation in our schools is the segregation in housing patterns—a segregation caused primarily by the discriminatory use of zoning codes, building codes and other land-use devices to prevent development of housing for lower income families.

A bill which talks of equal educational opportunity without addressing itself to equal housing opportunity is a fraud and particularly so when it so drastically restricts the Federal courts, departments, and agencies from moving effectively to alleviate segregation as H.R. 13915 does.

So that our colleagues may be fully informed as to the arguments I shall present in support of this amendment, I include herewith the text of my separate views on H.R. 13915, as well as a timely and enlightening article on the success of housing integration and its impact on education in Shaker Heights, Ohio. This article appeared in the New York Times of last Sunday and I strongly commend it to the attention of our colleagues.

The material follows:

SEPARATE VIEWS OF MR. BADILLO TO H.R. 13915

It is well documented that one of the major underlying causes of unequal educational opportunity in the United States is segregation in housing and the continued existence of land-use barriers to equal opportunity in housing. Any legislation that attempts to deal with one problem without coming to grips with the other is bound to be an exercise in futility. As the 1966 Coleman Report on Equality of Educational Opportunity observed, the home and neighborhood environment of the student—as well as the racial and economic mix of his classmates—has more effect on his educational achievement than the quality of the school he attends.

The Congress has the moral and legal obligation to take the initiative to end the perpetuation of segregation in education by eliminating those factors contributing to it. As one witness very pointedly testified during hearings on this measure:

". . . The segregated communities which produce segregated neighborhood schools are not the result of private actions alone, but are also the result of public laws . . . which help to keep Blacks out of some communities, thus effectively locking them into others. Because communities segregated are the creation of public law, it is important that Congress recognize its responsibility to correct the existing state of *de jure* residential segregation."

Thus, during consideration of H.R. 13915, I offered an amendment which provided that the removal of land-use barriers, such as planning, zoning, subdivision control, building codes or permits, to the development of low and moderate income housing and the construction of new low and moderate income housing should be utilized as remedies for the denial of equal educational opportunities. The committee had an opportunity to give real meaning to the vast amount of rhetoric we have heard about equal opportunity. Had the majority of my colleagues on the committee believed in integrated education and simply opposed busing on some other grounds, they should have supported my amendment as it would remove those housing barriers which have prevented the integration of our schools. Regrettably, this did not occur.

Nevertheless, the fact that segregated education is a direct and undeniable consequence of segregated housing still remains. In supporting my amendment our very able colleague from New York, Mrs. Chisholm, discussed a summary of all court cases on zoning from 1966 through 1971. As Mrs. Chisholm pointed out, it was clearly shown in all cases, with one exception, that one of the barriers which exist in our educational institutions had to do with the deliberate segregation practices in urban housing. Certainly, the argument that the desegregation in housing is one of the most important remedies to bring about equal educational opportunity is still very valid.

There is no question but that desegregation in schools must be accomplished without further delay—we have already delayed a century or so too long! Either this segregation must be overcome by busing or redistricting or by making possible the construction of low and moderate income houses in communities which currently exclude such housing. By supporting the proposal I have presented the Congress has the opportunity to make a meaningful commitment for equality of educational opportunities as well as that to the neighborhood school.

Unless some affirmative and substantive steps are taken to insure and guarantee without equivocation that all children have truly equal educational opportunities this country will proceed toward a policy of educational apartheid and deny a large segment of the student population an education which will prepare them to participate in our society on a fair and equal basis with their peers. By relegating these youngsters to second-class educations, they are doomed to second-class citizenship and an existence outside the mainstream of American life.

[From the New York Times, Aug. 13, 1972]

INTEGRATION: ONE WAY TO AVOID BUSING

(By Richard J. Margolis)

Busing schoolchildren across racial boundaries is now a standard weapon in the desegregationists' meager arsenal. But for all the rhetoric it has inspired on both sides, busing does not challenge traditional patterns of neighborhood segregation. In fact, as fair-housing partisans have observed, by accepting such neighborhood divisions as fixed features on the social landscape, busing programs tend to ratify segregationist custom.

What are the viable alternatives to busing? Authorities in Shaker Heights, Ohio, have come up with one that seems to be working. Some time ago they decided to concentrate not on busing but on integrating neighborhoods. Integrated neighborhoods would mean, of course, integrated neighborhood elementary schools.

A decade ago, Shaker Heights, an attractive, affluent suburb of Cleveland, was almost entirely white. Today, 15 per cent of the 36,000 residents and about 25 per cent of the public school population are black. A large segment of the community has been and is Jewish.

Unlike many other communities that have experienced racial strife in their integration efforts. Shaker Heights has had relatively little bitterness or disruption—probably because the transformation has been carefully shaped and encouraged by community leaders. The town may be the only one in America that spends a sizable sum—$100,000 each year—to promote racial integration within its neighborhoods.

An unusual aspect of the program is that the Board of Education contributes $35,000 of the total sum; the remaining $65,000 comes from the City Council. The money goes toward support of the town's official fair-housing enterprise, known as the Shaker Communities Office.

The reasoning for the Board of Education's participation was explained recently by John H. Lawson, Superintendent of Schools:

"We want quality education, and that includes preparing children for life in a multiracial society. You can't do that until your schools are integrated, and you can't integrate the schools until you've integrated the housing."

Much of the money goes to the Shaker Communities' staff—one full-time executive and 12 part-time "coordinators." The agency is essentially a placement operation: The staff helps to locate black families in homes in predominantly white neighborhoods, and white families in neighborhoods that would otherwise be heavily, perhaps totally, black. Most residents of Shaker Heights, both white and black, think this latter function is crucial.

Many black families from Cleveland began moving into sections of Shaker Heights bordering the city in the mid-1960's. In one neighborhood, for example, the number of house sales to black families climbed from 13 one year to 65 three years later. It soon became obvious that if no one interfered, several large sections of Shaker Heights would be entirely black within a decade.

"Let's face it," Mayor Paul Jones told the citizenry at the time, "integration is here to stay. We had better deal with it properly."

So the community integration program was begun. The town banned the use of "for sale" signs on houses, hoping thereby to quell activities among blockbusting realtors and panic among white residents. Various neighborhood associations were organized to work on the problem. And in 1967 the town officially made its first appropriation toward the continuing stabilization effort.

The "natural," or neighborhood, integration is reflected, of course, in the trend toward a more equitable racial mix in the schools. Only in Moreland, where the neighborhood population is mostly black, has the school board felt compelled to fall back on a busing plan—which is voluntary—to achieve the objective.

Not everyone in Shaker Heights is hooked on integration, but the opposition has been weak and unorganized. For instance, the opposition has not prevented integrationists on the City Council and the Board of Education from being re-elected regularly by thumping majorities.

Some parents complain, however, that the schools display greater zeal for integration than for education. To which School Superintendent Lawson replies: "We've been accused of lowering our standards. That just isn't true. Before we started integrating, only 80 per cent of our graduates went on to college; now, it's 90 per cent. And last year we had more National Merit Scholarship finalists than any other public high school in the nation."

What little real resentment the housing program has drawn seems to have come mainly from real estate agents who feel that Shaker Communities is robbing them of their rightful commissions. "Basically," Armin Guggenheim, a realtor, said recently of the agency and its staff, "they are a publicly subsidized agency in competition with private business. They are also non-licensed. I think they will soon go out of business."

Lucille Anderson, the program's director, replies: "We try to bring friendly brokers into the picture, and of course we don't take commissions ourselves. But I realize it's a delicate matter."

A more serious criticism, perhaps comes from blacks who think Shaker Communities concentrates too much on stabilization efforts in neighborhoods like Moreland and too little on integrating neighborhoods that remain overwhelmingly white. Mrs. Anderson agrees. "The trouble is," she says, "those houses cost more than most black families can afford. The real solution is to get other suburbs to open up." (Prices in Shaker Heights range from $17,000 to $120,000; the more expensive the housing, the whiter the neighborhood.)

JOE BARTLETT REFLECTS ON CONVENTIONS

HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 15, 1972

Mr. KEMP. Mr. Speaker, following the 1968 national conventions, and in the wake of the wide public debate that ensued, The Hatchet Encounter, a publication of George Washington University, devoted a special issue to the discussion of the American political scene.

The October 1968, edition carried contributions of national leaders of both political parties, and provided an interesting commentary on matters politic.

Our own House Minority Clerk, Joe Bartlett, even then a veteran of 20 years of service to Republican national conventions, was invited to reflect on this process of posturing our national political contests.

In light of the continuing controversy about the convention system, Mr. Bartlett's observations provide an interesting perspective which I commend to your consideration:

SYSTEM REFLECTS FERVOR, APATHY

(By Joseph Bartlett)

Political conventions have been the target of pronounced criticism in this campaign year of 1968. The essence of frequent charges is that conventions do not serve the ends of democracy; that they do not result in the selection of the most popular candidates.

Perhaps there is a better way to arrive at a choice of nominees. Certainly, the convention process is not perfect.

However, before we trade it for some other process, we ought to at least know what we are giving up.

Much of the faultfinding concerning political conventions arises, it seems to me, from a misunderstanding of the very nature and purpose of such occasions.

Let us seek a focus by first conceding what a party convention is not: it is not a free-for-all public-wide popularity contest, as a preliminary to the general election.

Many Americans apparently have the notion that a convention is such a contest. Others have argued that it ought to be.

Before we conclude what we might wish a convention to be, let us consider what it probably is intended to be, within the framework of our political party system, and its contribution to representative government.

Is not a political convention, in fact, a caucus for the rather exclusive participation of party leaders and representative party members, to determine the policies and principles (i.e.: platform) which shall characterize that party, and to select the standard-bearers (nominees) who will personify that party in the ensuring general election?

A convention is, then, necessarily a gathering of the "pros" of a political party.

The general public has been such an intimate onlooker in recent years, thanks to modern communications, that many have presumed a proprietary interest in the business of a political party to which they claim no affiliation and to which they offer no allegiance.

To a lesser degree, it is charged, that, these "pros" do not even represent the rank and file of their own party faithful. Certainly, they should. However, the charge of inordinate influence by certain party "prime movers," does not deny the fact that almost all party leaders are chosen by an elective process among the members of the party, to whom they must, in turn, be responsible. If what they do in the name of the party is not pleasing to a majority of those they represent, they will not long remain in a position of influence.

"Hogwash!" the cynics would cry, and point to some political "boss" who seems to contradict such "idealistic naivete." But they would beg to argue the validity of the whole doctrine of "elected representation," of which political conventions are only one part. A convention is a caucus of leaders who are, more or less, realistically representative, or it is nothing. In whatever places this thesis may be imperfect in practices, here should the remedy come first!

For our entire concept of electing representatives to perform in behalf of the electorate, relies upon the free flow of favor from the people, to their leaders, and back again.

Accordingly, we would accept that political conventions are conducted by "pros," possessed of the aggregate power of the sum of their followers.

If we understand, then, that this is the nature and purpose of political conventions, we can go on to examine some of the specific criticisms in a more realistic context.

Many of the faults we hear arise directly from the very size of these conclaves. The Republican convention at Miami this year seated 1,333 delegates and alternates. The

Democrats meeting in Chicago gave similar credentials to 5,134!

If the U.S. Congress can manage with 435 Representatives, is it not reasonable to suppose that a party convention might get along with, say, twice that number? At most, 1000.

One reason for increasing the ranks at a convention is to reward those states which have performed effectively on behalf of the party. Allowing relatively larger delegations to those states is consistent with the convention concept, and is as it should be.

However, a less defensible (if no less politic) reason for the growth in numbers within the delegations, has been the insatiable demand to "balance" the delegations between the sexes, the factions, the fictions, and the follies. A case could be made that this has, instead, produced imbalance. Unquestionably, it has produced big conventions.

If we are to hope to decrease the number of delegates, it will be all the more important that each be chosen primarily because of his qualifications to best represent the interests of all his constituent party members, not some special grouping.

Many criticisms may be heard concerning various aspects of convention programming. Much of it, too, is attributable to misunderstanding. All activities should, of course, be oriented to the important fundamental purpose of the convention.

Entertainment is an enjoyable, and sometimes invaluable, part of programming. However, needless to say, it is not the purpose of a political convention to entertain!

The importance of the media, especially television, to the portrayal of convention events can hardly be over-emphasized. It is as vital to these significant events, as a well-informed electorate to democracy. As such, it bears an awesome responsibility to the public. At very great expense to their own industry, the TV networks provided imaginative programming of the conventions which the public demonstrated, by listener ratings, they wanted to witness. How well those of TV lived up to their awesome responsibilities has been the subject of endless criticisms, in which I choose not to engage.

The "live" TV camera is a relatively recent entry into the convention scene. Even in my brief convention experience of two decades. I have watched it grow from an infant to a giant; from an awkward intruder to a sophisticated partner.

To those who would point to its undeniable shortcomings, I would remind of its growth.

One problem not peculiar to any medium, any more than any other segment of such a huge organization, is that of continuity of subsequent conventions. That is: profiting from mistakes once made, rather than just repeating them every four years.

In some respects, four years is quite a long time. Few party national chairmen survive to manage a second convention. The turnover among officialdom is remarkable (may I remind you of our earlier thesis!) And man's memory is fallible.

Records of precedents retained by staff employees of the committees must surely be invaluable in prescribing the planning for such an event. The party chairman puts the myriad matters of convention machinery together, and just as we approach the climax of circumstances, he steps to the side and hands the reins of responsibility over to the convention chairman. Yet, neither chairman can really take command of events, but must respond, as he should, to conform to the will of the convention.

Part of the chairman's problem is identifying that "will." As is part of that problem, the identifying of the legitimate delegates.

In the pandemonium of present conventions, one hardly knows for sure whether he is hearing from the duly constituted delegates or from some extraneous encroachers.

I ask you: would not demonstrations on the floor of the convention, for instance, be more meaningful and reflective, if such activities were limited to the delegates themselves? Would this not help preserve the real purpose of the convention? Would this not serve the ends of representative democracy?

Some will, I suppose, say "no." Some will remember a Wendell Willkie. Some will hold that a McCarthy or a Rockefeller was denied his due of democracy.

Of them, I would ask a re-thinking of the nature, the purpose and even the recent history of political events.

Those who have prevailed are seldom critics of the convention system. Those who have failed are, as a rule, equally unobjective.

Changes will come, as they always do. If those changes are to be improvements, we must understand what we are changing and why we want to change it.

In our time, the strong two-party system has appeared to serve our Republic well. The political convention has seemed to serve the purposes of each political party in its roll and responsibilities within our representative society.

It is a flexible system; it is an accommodating arrangement among free men. That it may reflect indifference as faithfully as it does public fervor, is not necessarily to its discredit, is it? So let us work to perfect it to achieve our ends within that framework of democratic interaction, but let us grant to none a license to do injury to these traditions just because they feel that they have been frustrated in their ideas of what ought to be.

Imperfect as it is, it is still the best system yet devised by man—and, I sincerely believe, well worth our patriotic patience and loyal service.

TELEPHONE PRIVACY XXXIII

HON. LES ASPIN

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 15, 1972

Mr. ASPIN. Mr. Speaker, I reintroduced the telephone privacy bill on May 10, 1972, with a total of 48 cosponsors.

This bill would give individuals the right to indicate to the telephone company if they do not wish to be commercially solicited over the telephone. Commercial firms wanting to solicit business over the phone would then be required to obtain from the phone company a list of customers who opted for the commercial prohibition. The FCC would also be given the option of requiring the phone company, instead of supplying a list, to put an asterisk by the name of those individuals in the phone book who have chosen to invoke the commercial solicitation ban.

Those not covered by the legislation would be charities and other nonprofit groups, political candidates or organizations, and opinion polltakers. Also not covered would be debt collection agencies or any other individual or companies with whom the individual has an existing contract or debt.

I have received an enormous amount of correspondence on this legislation from all over the country. Today, I am placing a 31st sampling of these letters into the RECORD, since they describe far more vividly than I possibly could, the need for this legislation.

These letters follow—the names have been omitted:

WILMETTE, ILL.

DEAR MR. ASPIN: Your bill, HR 14884, is a most welcome sight. Nuisance phone calls have become an increasing aggravation and going "unlisted" seemed like the only alternative. That is a nuisance to everyone else, however. My husband and I heartily support your efforts.

_____, _____.

ST. CHARLES, ILL., *July 25, 1972.*

Re: H.R.-14884
Hon. LES ASPIN,
House Office Building,
Washington, D.C.

DEAR MR. ASPIN: Rather recently I heard that you and several cosponsors introduced the above captioned to keep nuisances off our phones. By now the bill may either be defeated or passed. However, if it will do any good, I would like to have you know that I feel such a bill is long overdue.

There are many of my friends who have "unlisted" numbers in order to avoid these obnoxious invasions by telephone solicitors. But these rascals (the solicitors) have another method of approach. In order that they not miss a single listing in a given area, they dial the prefix numbers and then start with 0001 and go all the way through to 9999. Of course, they don't know the name of the person who answers so they immediately ask "to whom am I speaking" after determining that they have reached the number previously dialed. I have heard many complaints about this.

Now I would like to make a suggestion—not in solving the above mentioned problem but about broadening this bill. As you know, mail advertising has reached ridiculous proportions. Before bringing in the mail each day, I find it necessary to first stop by the garbage can and dispose of about half of it. I would like to see your bill include the same limitations on mail polluters as it would on phone polluters.

Respectfully,

_____ _____.

WINNETKA, ILL., *July 23, 1972.*

SIR: Please support bill # HR-14884 preventing unwanted telephone solicitation.

Thank you,

_____ _____.

TYLER, TEX., *August 27, 1972.*

Congressman LES ASPIN,
Washington, D.C.

CONGRESSMAN ASPIN: I fully support your Telephone Privacy Act and I hope you will do everything in your power to get it passed.

Sincerely,

_____ _____.

NORTHBROOK, ILL., *July 27, 1972.*

Mr. LES ASPIN,
House Office Building,
Washington, D.C.

DEAR MR. ASPIN: Illinois Bell Telephone Company gave me your name in connection with a bill that is in the House about telephone solicitations.

If I may, I'd like to voice an opinion that I'm sure is a prominent problem to all telephone owners . . . that of the annoyance of telephone solicitors. I can honestly say that I am anti-solicitation minded!

For example, yesterday evening, some young representative called . . . after informing her that I was not interested, she called back 8 times, not once or twice, mind you, but 8 times. Not only is this annoying, but it is absolutely uncalled for. I did call the Northbrook Police because I thought it was possibly a prankster. Well, they really have their hands tied is such a situation and could be of no immediate help. So, early this morning, I called the Illinois Bell Telephone Company and they informed me that they were aware of some of the solicitors and what areas they are working in, but could not give out any names. However, in the future, I was told that I should try to get the name of the company and then report it to Illinois Bell. Well, Mr. Aspin, who wants to listen to a lousy sales pitch over the phone at 8:30 at night, (or at any time for that matter)? Certainly not I!

I am very interested in your bill involving anti-solicitation and if there are any questionnaires, personal viewpoint statements, or a way in which I might help, please do not hesitate to write to me. If you have any literature on this subject, I would be most happy to receive it.

Thanks again for listening . . . I'm so furiously mad at these peoplefi that it's hard for me to write without using four-letter words.

Sincerely,

———, ———.

ARLAND PARK, ILL., *July 21, 1972.*

Hon. LES ASPIN,
U.S. House of Representatives,
Washington, D.C.

DEAR REPRESENTATIVE ASPIN: I wish to commend you on your sponsorship of H.R. 14884 which would give me a chance to be rid of nuisance telephone calls. I sincerely hope it passes.

Sincerely,

———, ———.

CHILD CARE IN THE 1970'S

HON. ORVAL HANSEN

OF IDAHO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 15, 1972

Mr. HANSEN of Idaho. Mr. Speaker, keynoting the Early Childhood Conference I sponsored in Idaho this spring was Dr. Edward F. Zigler, then Director of the Office of Child Development of the Department of Health, Education, and Welfare. Dr. Zigler is one of the Nation's most articulate spokesmen and respected authorities on young children, and his very direct and thought-provoking address set the tone for a stimulating and informative conference. I would like to include portions of Dr. Zigler's remarks in the RECORD:

CHILD CARE IN THE 1970's

(By Dr. Edward Zigler)

Thank you Congressman. So many people have mentioned my coming to Idaho as though it were the last thing that a person would want to do. Actually, it's a beautiful state and the people here are lovely, and I've had a wonderful time. However, I must confess that this is an invitation that I probably would have sought out had it not been offered to me. I'd like to tell you why.

At the White House Conference on Children in 1970, a rather bleak picture was painted of our nation's treatment of children; and in all candor, I must say that that picture is in many ways the truth. We do not treat the children of this nation as well as we should. In fact, one of the forums came up with a statement which is unfortunately too true: namely, in our nation, too often, children come last.

However, in this generally pessimistic picture there are bright spots, and in my estimation one of the brightest spots is in Idaho. I met with your Governor in Washington. We had a very productive meeting, and it was clear to me that he is a man who cares about children. I was delighted to have the opportunity to talk with him. I've had meetings, too, with your Congressman, Orval Hansen, and I know from personal experience the stellar role that he has played, both in his official capacity on the Education and Labor Committee, and in his public utterances and in the energy that he is willing to expend in behalf of all of the nation's children. When I meet men such as these, I say to myself "There's hope. These are the elected officials of the state of Idaho; these are people who care. If these two men represent the will of the people of the state of Idaho, then I am perfectly convinced that in this state, children will come first."

I want to talk to you today about two major types of programs that I see to be most relevant for our childrens' needs in the 70's. The first type of program can be classified as preventive or compensatory education programs for those children who can be helped by them. While I would cite the Head Start program in terms of a national effort, I would also allude to the many experimental programs, such as Bettye Caldwell's important effort in Arkansas, and others around the country.

The second type of program that I think our nation is going to emphasize is day care programs for children of working mothers. The children of such mothers may or may not be in need of the type of compensatory, remedial, or preventive efforts that are needed by the children in the first category.

It must be noted, in discussing early childhood intervention programs, that the value of such efforts is being seriously questioned. This questioning goes well beyond Jensen's blanket indictment that compensatory education has failed. The criticisms are being raised as a result of some rather fine-grained analyses of compensatory education programs by learned investigators who can hardly be considered hostile towards preschool intervention efforts. I refer to the paper by Carl Bereiter, himself one of the early leaders in the area of early childhood education. My old friend and colleague at Harvard, Larry Kohlberg, has analyzed the value of compensatory education and comes down somewhat on the negative side. Sheldon White, also at Harvard, has also assessed early childhood compensatory programs and we find in his paper a questioning attitude toward the value of such programs.

Since the single largest compensatory program in the country is Head Start, much of the discussion about the value of compensatory education centers about the question of whether Head Start has succeeded or failed. This is an important question to answer, because we have looked to Head Start for guidance as to the direction that future efforts should take.

There is little question that the early euphoria has given way to a rather pessimistic view in many quarters concerning the value of Head Start. It was only seven years ago that Head Start was the "Sesame Street" of 1965 and not enough good things could be said about it. However since then, we had a very damaging evaluation study with which I'm sure many of you are familiar, the Westinghouse Report, which was used in many quarters as evidence that no lasting benefits are achieved by the Head Start effort. We've seen this negativism concerning the program reflected in the popular press. I remember addressing an NAEYC meeting shortly after coming to Washington 2 years ago, and somebody handed me a "U.S. News and World Report" story. It said an unnamed White House official states that "Head Start is clearly a failure. It is nothing but a babysitting service for welfare mothers." Needless to say, I could never track down that particular White House source but there it was in the "U.S. News and World Report."

It's interesting to me that people who attack intervention efforts in general cite Head Start now by name. The recent book *"The I.Q. Question,"* and liberal segments of the intellectual community, have come down pretty hard on Head Start. In a recent issue of "The New Republic," hardly a rightwing enemy of liberal efforts, Martin Mayer, the well-known author and social critic, passes off Head Start in a word or two as clearly a failure.

I would like to go on record as stating that Head Start is certainly the largest and most important social action experiment mounted in behalf of needy children in the history of our nation. There can be little question that it has produced real benefits. The problem is that we treat so many of our social action programs as fads: we love them too much when they are young, and we despise them too much when they get old. (Although it's hard to think of a program seven years old as very ancient).

But let's look at the record. A central part of Head Start is its health and nutrition components—never touched upon in the Westinghouse Report, never mentioned by its critics. When you talk about preventive education, about compensatory education, about developmental education, you're talking about the total development of the child. What is more important to the learning of the child, to the quality of his life, to determining what he can become, than his physical health and well being?

Over the years, we have discovered some 35 percent of the Head Start children suffer from an identifiable physical defect. We also know that 75 percent of these children are provided with the kind of follow-up medical treatment required to correct these deficiencies. We are talking about taking care of literally hundreds of thousands of children. Head Start continues to be the single largest delivery system of health services to poor children in this nation.

In addition, Head Start has pioneered a unique phenomenon which is instrumental in correcting the cognitive and social problems of our nation's children that interfere with their optimal development. I am referring to parent involvement. Experts alone will not make our children whole and well. The most important source determining the development of the child continues to be the nature of the home. Programs conducted in isolation from the home, and without the involvement of the parents, will inevitably fail.

Who pioneered the entire concept of parent involvement? Who ever heard of parent involvement before 1965? Head Start made parent involvement a reality, and it is that impetus that has lead to the spread of this concept to other programs, such as Title I of the Elementary and Secondary Education Act and other national and state programs. The thing that I have noticed, which is important to both the quality of family life and to the child itself, is the sense of integrity that is gained by the parent who has a real role in Head Start, or the school program, or any other program that deals with his or her children. Taking parents into our confidence, making partners of them rather than beating them as an alien force, gives these parents a new sense of dignity, a sense of worth, convincing them that we "experts" appreciate their importance. Many of these parents never had a sense that what they did made a difference in their child's life. Once we show that we take seriously their role in helping their own children and in the policy making of our programs, we see in these parents a new-found sense of dignity and worth. I cannot stress too highly what this means to the developing child. The early years are indeed important, and the child who is surrounded by a parent or parents who feel that they are worthless, soon gets the notion that he too, is worthless. Parents who feel they have a sense of worth, a sense of dignity, a sense of being able to impact their childrens' environment, produce children who also have this same sense of worth and capability.

Another aspect of Head Start which has gone unnoticed by its critics is the fact that it has been an important social force in our society. While everybody quotes the Westinghouse Report, I have yet to see the popular press pick up an account of one of the most important social evaluations of the last ten years, namely the Kirschner Report. This report clearly indicates that in communities where there is a Head Start Center, the entire community is becoming mobilized around the needs of children. We discovered that, in 58 cities where there was a Head Start program, over 1500 identifiable changes for the better could be found in the educational and health care of children in those cities.

Another aspect of the Head Start program in which we should take great pride is the fact that we took many thousands—9,000 to be correct—people from the ghettos, from the barrios, from the impoverished areas of this nation, and from Indian reservations and we placed these people in college training. Right now there are 9,000 people who have either completed or will complete AA degrees or BA degrees in the area of early childhood education. At the same time, by pulling themselves up, they will also provide a resource that this nation badly needs, namely, individuals who are trained to work with young children.

Another aspect of the program which often seems to be overshadowed by the Westinghouse Report is the unassailable fact that Head Start children, as compared to children who have not experienced the program, are superior on cognitive measures as well as personality and motivational measures by the end of the Head Start experience. This evidence has appeared in 95 out of 100 studies. It is true that once the two groups enter elementary school there is often a loss in the superiority of the Head Start children. To my mind, one clear reading of this type of evidence is that it represents more of an indictment of the elementary schools of this nation than it does of the Head Start program.

I am pleased to have something new to unveil to you this morning. I haven't mentioned it yet, although word has crept up to the Hill, and unfortunately an old friend of mine in Congress accused me of sitting on some data when actually all I have been doing is making sure that we do not report anything without having it carefully criticized by people who hold alternative points of view. But I can tell you this morning that we will release to the nation within the next six weeks or so, a compendium of longitudinal studies of Head Start. (You must remember that the Westinghouse Report was not a longitudinal study. It did not follow Head Start and comparable non-Head Start children for three years.)

We went around the country and found investigators who themselves had followed Head Start children for several years. We found eight such projects from which I think we can draw certain conclusions. First of all, these reports, taken *in toto*, indicate that the picture is not nearly as dark as the Westinghouse Report indicated in terms of the lasting gains of the Head Start program. Many of these programs found that the superiority of the Head Start children was maintained over the comparable children into the third and even the fourth grade. The gains were not huge and I'm not going to tell you that if we just "inoculate" a child for a year in Head Start, we can forget the rest of his life. But it certainly paints a different picture from the one painted by the Westinghouse Report.

Furthermore, there are two clear findings in these reports that make good common sense, fit all the developmental theories I know anything about, and also show us how we must move in the future. They show that the magnitude of the gain that was maintained rested upon two factors. One was the involvement of the parents in the program. Did the parents on their own do something with their own children that build upon what was happening to the children in the centers? It makes good sense that if a child had one set of experiences for three or four hours a day, and a totally different set for the other ten or twelve waking hours, you're not going to get much impact. But if the parent learns how to interact with the child in the same constructive way that is being carried out in the child care center you begin getting impact because the child has continuous support and interactions of a sort that produce optimal growth and development.

There was a second factor that we could have all predicted back in 1965. The maximal payoff in the Head Start program comes if the school follows up the Head Start program with another compensatory effort that builds upon the skills of the child, rather than simply dumping him back into the conventional type of educational program.

After telling you about this essentially positive view that I have of Head Start, I think that it is appropriate for me to point out to you that Head Start does have some important practical and conceptual problems. I point this out because I think it's important that we learn from experimental efforts such as Head Start. It's important that we be honest in telling Congressmen and Governors and Presidents what we can do and what we cannot do, and most importantly what have we learned. Only in this way can we make efforts in behalf of children in the future that will be even more effective. One thing that we have learned from our own monitoring reports, is that Head Start around the nation continues to be a very mixed bag. In certain communities, it's very good, in many communities it's mediocre, and in some communities around this nation, it is extremely poor. In my estimation, in terms of the quality of what we're delivering, Head Start continues to be a dream unrealized.

One of the factors our monitoring efforts indicated was that many of the Head Start teachers who actually take care of children day in and day out are not knowledgeable concerning the nature of the developing child. Stated most bluntly, many people taking care of children in Head Start centers simply do not know what they are doing.

This evidence tells me which way we have to move in the future. The rock upon which we must build all early childhood programs in the center rests on the nature of the relationship between the important adults in that center and the child, and the nature of their interaction. If you have adults, women and men, who understand child development, who have had some training and some sensitivity to what a child is all about, you will get results, and it's that simple.

There were other problems with Head Start and I'm afraid they continue to plague us. The whole program got caught up in cognitive emphasis very, very quickly. The idea became that Head Start is intended to make everybody brilliant, we have to have I.Q. measures all over the place, and we'd better get in there and measure those quotients. Head Start *was* set up to improve the cognition of children. Cognition is important. But it became over-emphasized in my estimation, and to make the matter even worse, it became wedded to what I can only refer to as the naive environmentalism which was particularly rampant in 1965 and which is declining today.

It would appear that we held Piaget and Werner and other European cognitive theorists at arms' length for decades, but in the good old American tradition, once we discovered Piaget, we discovered him with a vengeance! There are a number of historical strands that all came together in 1965 making improved cognition the thing to aim for. It seemed as if we forgot the rest of the child that is really very imporant in determining what that child is to become.

Ladies and gentlemen, children are not equivalent to I.Q. scores. Nor is their everyday social competence equivalent to their I.Q. scores. Unfortunately we have state hospitals, penitentiaries, welfare rolls, still peopled with individuals of quite high intelligence. However, partially because of the cognitive emphasis and measurement problems, as well, the I.Q. score became the primary indicator of success or failure. It appeared that the goal of Head Start was the production of a cadre of geniuses to evenually man the professorial posts at Harvard, Yale, and Princeton. We must never get into that bag again. It is my opinion that what we are doing in this country is continually crucifying our children on a cross of I.Q. There are bright children. There are less than bright children. There are some children that are not bright at all. They're all worthy children, they're all deserving of our love, they're all deserving of our best efforts to ensure their healthy development.

The goal of Head Start programs and all remedial programs should be to produce socially competent human beings. We should begin appreciating the fact that the entire range of cognitive abilities is represented in every socioeconomic group. Furthermore, we must be aware that we are not going to repeal the biological law of human variability. What we must remember is that just about every child in our society, with the exception of the very severely handicapped, can adapt to our society, can contribute to our society. Our problem is not so much in making everyone brilliant as it is in making everyone use the intelligence that they have.

In my own reviews, my own research, my own analysis of the problem, I have at least convinced myself, and hopefully a few others, that one of the most serious problems with our economically disadvantaged children is not in the sphere of cognitive development at all, but rather in the sphere of social and emotional development. My own research has certainly indicated that most of these children suffer not so much from stupidity as from the fact that they don't have the motivational structure that permits them to use the intelligence that they have. These children have motivational needs which simply get in the way of their cognitive performance, their school performance, and their job performance later in life; until we can teach these children to relate to others, to view themselves and others in a positive way and to begin setting up certain goals for themselves that are realistic and productive and, positive, all of the cognitive training that moves them to the Piaget stages are not going to have the effects that we would like them to have.

Again, I'm not opposed to cognitive development; it is a very critical factor in social competence, but let us rediscover the whole child; let's begin establishing programs for young children in this country that work just as seriously on the motivational and social structure of these children as it now does on developing their cognition and their I.Q. scores.

We have to approach these children honestly. Let's say that we are never going to ensure that every child's score on any measure is above the mean as a result of our programs. We must, therefore, approach decision makers honestly with what we can honestly do, and one of the reasons that I emphasize the social and motivational system so much is because all of my reading of the literature leads me to believe that that system, which is so important in determining social competence, is much more malleable, is much more changeable, than is the cognitive system which does also reflect a variety of biological and environmental experiences. It is very difficult to raise permanently the rate of cognitive development of individuals. I'm not saying that it can't be done, but I am saying that it is much easier to change a child's attitudes, motives, goals, and affective features—which are just as important in determining what that child is going to become—as to change his cognitive features.

MAPLE HEIGHTS, OHIO, CITY COUNCIL CALLS FOR ACTION ON FOOD PRICES

HON. JAMES V. STANTON

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 15, 1972

Mr. JAMES V. STANTON. Mr. Speaker, in establishing the phase II economic policy, President Nixon stated that the program could be successful only with the cooperation and vigilance of all citizens. The city council of Maple Heights, Ohio, has complied with this request by calling attention to the serious problem of rising food prices, and the difficulties encountered by consumers in attempting to check base prices.

I urge the Cost of Living Council to act to alleviate these conditions, and should the administration fail to act, the appropriate committees of Congress should seriously consider enacting legislation in this area.

The text of the resolution of the Maple Heights City Council, and an article on it which appeared in the Maple Heights Press, follow:

A RESOLUTION MEMORIALIZING THE PRESIDENT OF THE UNITED STATES, AND OTHERS, TO CREATE GREATER AWARENESS TO CURRENT PRICE INFORMATION BY EXTENDING PRICE CRITERIA TO FOOD PRODUCTS, AND REQUIRING BASE PRICE INFORMATION POSTED ADJACENT TO CURRENT PRICES

Whereas, the Wage Price Freeze set out to relieve the working man of the erosion of his income caused by inflation; and

Whereas, the Wage Price Freeze brought about stabilization for a period of time; and

Whereas, since the Wage Price Freeze has been in effect, prices of some commodities are still out of hand and prices are still increasing at a highly inflationary rate and

Whereas, specifically, this includes food prices which have never been subject to control and as a result have skyrocketed beyond the bounds of what the seasonal fluctuations of the marketplace would be; and

Whereas, since the law relative to posting price lists has caused them to be posted in remote or inconspicuous places thereby not permitting our people to be readily aware of what the base prices are, so that complaints to the Federal Office of Stabilization are not being made in the volume that they should be, due to the lack of awareness on the part of the people. Now, therefore, be it

Resolved by the Council of the City of Maple Heights, State of Ohio:

Section 1. It is requested that base price information be required to be posted adjacent to the current price information in an effort to create greater awareness among our citizenry and better permit our citizens to report noncompliance with Price Stabilization Laws.

Section 2. Be it further *resolved*, that the price stabilization criteria be further extended to food products (meats, vegetables, etc.) since these prices mostly affect all citizens, especially the middle and lower income; and since they have risen far beyond the two and one-half percent objective established for increased prices.

Section 3. The Clerk of Council is hereby instructed to forward certified copies of this Resolution to the President of the United States, Senator Robert Taft, Senator William B. Saxbe, Congressman James V. Stanton, Ralph Nader and the Directors of Economic Stabilization in Cleveland and Washington, D.C.

Section 4. This Resolution shall be in full force immediately upon passage.

Passed: August 2, 1972.

[From the Maple Heights Press, Aug. 10, 1972]

FOOD PRICES RISE; COUNCIL ASKS NIXON TO TAKE STEPS

Because they don't believe the objectives of Phase II's Wage Price Freeze are being uniformly enforced and because they feel the public should be made more aware of food prices, Maple Heights Council has forwarded a resolution to that affect to President Nixon.

Councilman James Timko, noting that the federal government has the controls and not the city, cited "food prices skyrocketing out of control" as one reason for this legislation.

He hoped that a federal government regulation requiring posting of base food prices next to—instead of "remote or inconspicuous places"—current prices would create an awareness of the "highly inflationary rate" in the public which could pressure for food prices to be subject to the same 2½ percent guidelines as other products.

Copies of the resolution were sent to the President, Senators Robert Taft and William Saxbe, Congressman James Stanton, Ralph Nader and the directors of Economic Stabilization in Cleveland and Washington, D.C.

David Roth, 5524 Elmwood, had his own answer. "The only reason prices are high is because people are willing to pay these amounts. It's not the fault of anyone, but everyone, he told city council.

Wholesale food prices went up last month and have risen up 3.2 percent last month and have risen 12.9 percent in the last 12 months.

ALASKA STATE FAIR FOR 1972

HON. NICK BEGICH

OF ALASKA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 15, 1972

Mr. BEGICH. Mr. Speaker, an annual fair for Alaska has been designated the official Alaska State Fair for 1972. This fair, at Tanana, will communicate the diversity of Alaska; its culture, history, resources, and attractions. Since the fair plays such a vital role in the lives of Alaskan citizens, this year's theme will be "Alaskans All." I enclose the recent proclamation of Alaska State Gov. William A. Egan commemorating the Alaska State Fair:

PROCLAMATION: ALASKA STATE FAIR FOR 1972

By legislative direction, the Governor of Alaska annually designates one of the State's regional agricultural and industrial fairs as the official "Alaska State Fair."

"Alaskans All" has been chosen as the theme for the 1972 Alaska State Fair. This theme communicates the diversity of Alaska; its culture, history, resources, attractions, as it recognizes the common bond that unites us all—our dedication to the future of the great State of Alaska.

Exhibit entry in the fair is open to all the people of Alaska. Exhibit divisions are offered in agriculture, livestock, homemaking arts, 4-H Club work, handicrafts, Alaskan native arts and crafts, wild mushrooms, berries, youth, and education. Substantial prize premiums and awards are offered for winning exhibits.

Modern day fairs are great communicators for individual interests and pride of accomplishment. Based on the traditional farm and home skills of an agricultural nation, fairs have expanded to reflect wider community and educational issues.

Two out of every three Alaskans take part in fair activities annually, thus indicating the vital role played by fairs in the lives of our citizens.

Therefore, I, William A. Egan, Governor of Alaska, officially designate the Tanana Fair as the Alaska State Fair for 1972 and invite all citizens and visitors to "come to the Fair."

Dated this 27th day of July, 1972.

THE CENTENNIAL CELEBRATION OF THE CATHOLIC KOLPING SOCIETY OF AMERICA

HON. ROMAN C. PUCINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 15, 1972

Mr. PUCINSKI. Mr. Speaker, the Catholic Kolping Society of America will hold its national convention in Chicago from September 1 to 4. At this time the society will mark its 100th year.

The Kolping Society is dedicated to making this "a better world through better people." Many charitable works and community projects are assisted by the Kolping Society. During its earliest days, the Kolping Society of America served a huge number of immigrants—often providing shelter, jobs, and opportunities to learn English. Today, the same spirit of helping those in need guides the Kolping Society.

Mr. Speaker, in order that other Members of Congress may be made aware of their significant contributions during the last 100 years, I provide the following history of the Catholic Kolping Society of America.

THE CATHOLIC KOLPING SOCIETY

Adolph Kolping was born in Germany in 1813. He was ordained a priest in 1845. In 1849 he founded the Kolping Society to help young journeymen. At this time Germany was the process of transformation into the age of Industrialization.

He went about Germany, writing, preaching and organizing. Society after Society was established. Kolping Houses were his way of shaping and molding young men to become good Christians, good citizens and respectable family men. Kolping knew that the family was the most important foundation for a good society. His work spread. Today there are Kolping Societies, not only in Germany, but in twelve cities of the United States, many cities in Canada and in countries throughout the world.

In 1872 a Kolping Society was founded in Chicago. It is the oldest Kolping Society in the United States. This year at the National Convention of the Catholic Kolping Societies of America, September 1–2–3–4– in Chicago, we will celebrate the hundreth Anniversary Centennial of the Chicago Kolping Society. The motto of this Convention is "a Better World Through Better People".

In its early years the Chicago Kolping Society served the great numbers of immigrants newly arrived in the United States. It provided homes for these young men, where the ideals of Father Kolping were instilled. It helped them to find jobs in their new land. Classes in English were taught.

After World War II, the Chicago Kolping Society was actively involved in work with the Refugees and Displaced Persons. The Society worked closely with the Catholic Charities to help solve this monumental task. After World War II, there was another period of time which saw many immigrants from all over the world arriving in the United States. Many who settled in Chicago were helped by the Society.

After the Hungarian Revolution the Chicago Kolping Society opened its doors to hundreds of young Hungarian boys who had fled their native land to freedom in America. Once again the Society went quietly about its work of helping the new arrivals become established in their new land. This process was repeated again after the cuban revolution, when once again hundreds of Cuban Refugees found a helping hand through the Chicago Kolping Society.

In 198 the Chicago Kolping Society moved from its location on Oakdale Avenue to the present location at 5826 N. Elston Avenue, Chicago. No longer does the Kolping House serve as a boarding house for young men, but during the years 1872–1968, over 25,000 young men lived in the Chicago Kolping House.

Now the Kolping work consists primarily of various charitable works and community projects. We are very proud to be the sponsors of a Boy Scout Troup for Handicapped Boys. Kolping Societies sponsor 4–H Groups, work with orphanages and others in need.

And the work which Father Kolping so strongly advocated, the strengthening of family life, through Christian Brotherhood, is carried out through our various programs. Instilled with the ideals of Father Kolping, a Kolping Member is a good Christian, a useful, production member of his community, and a good citizen of his country.

Kolping members indeed are endeavoring to create "a better world through better people."

NATURAL BEAUTY OF HAWAIIAN ORCHIDS REFLECTS PAINSTAKING EFFORTS BY MAN

HON. SPARK M. MATSUNAGA

OF HAWAII

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 15, 1972

Mr. MATSUNAGA. Mr. Speaker, the Hawaiian orchid is, by its very nature, a symbol of beauty which has captured the imagination of floral fanciers throughout the world. Its special radiance and attendent mystique are qualities which bespeak of an extraordinary creation of nature.

Yet the common vision of beautiful orchids growing wild in the State of Hawaii greatly belies man's personal contribution to nature's handiwork through experimentation with new hybrids and years of painstaking labor. The magnificent panoply of velvety colors and textures which characterize the Hawaiian orchid reflects a level of human-care almost unknown in this modern age. Some of the famous cattleyas, for example, will not flower until their ninth year after planting of the seed. Preparation for the germination of these seeds is an art in itself.

For a highly interesting account of the process of orchid-growing in Hawaii, I recommend to my colleagues a reading of the following article, which appeared in a recent issue of the Honolulu Star-Bulletin.

The article follows:

An Orchid Is an Orchid Is—

(By Loretta Robinson)

Orchids may grow wild in the state of Hawaii, but the riot of velvet colors produced in the hybrids happens only after years of painstaking labor.

Some of the cattleyas, grown from seed, won't flower until the plant is well into its ninth year.

Neither is the process of getting them started a simple one.

On their Waianae orchid farm, Helen and Masatoshi Miyamoto include in their orchid-growing equipment pressure cookers, agar (a gelatinous substance made from seaweed), beakers, Chlorox bottles and tiny one-inch clay pots.

Contamination of the seeds is avoided at all costs.

The beakers in which they are grown are put through the pressure-cooked process, then covered and stored in a sterilized cabinet. Mrs. Miyamoto also sterilizes her hands and the glass box in which she works.

For nourishment during this sterile start, the orchids feed on an agar base which Mrs. Miyamoto cooks herself. Working from a recipe that might almost look like a human dessert—without the fertilizer—she includes coconut milk, tomato juice, Japanese katen and sugar.

After planting, the parentage of each bottle is recorded as carefully as it might be for any pure-bred race horse. The beakers are then corked with cotton and covered with aluminum foil, not to be opened for the next 10 months.

They are, however, still checked every day for possible contamination. If any mold appears the contents of the whole beaker is discarded.

When the test-tube phase is over, the plants, rarely larger than an inch in height, are transferred either to three-inch community pots or individual one-inch pots. Working with a long wire hook like a ship-in-a-bottle builder, Mrs. Miyamoto handles each plant separately.

Only when the orchids finally bloom can the results of their work be assessed.

"Each seed pod is supposed to be the same genetically," Mr. Miyamoto explained, "but the genes of all the seeds can make over a million combinations."

In spite of the amount of expertise they have accumulated, Mrs. Miyamoto admitted that when they first started a nursery—as a hobby—"We were just collecting, buying and killing plants."

They were living in Honolulu then and Mr. Miyamoto who was working as an automobile mechanic.

The way his wife tells it, growing orchids was her hobby and he got involved. The way he tells it, he picked up the interest from his father who was a gardener on the Damon Estate in Moanalua Valley.

A short course in orchid culture at the University of Hawaii taught him the basic techniques he uses now. "That's where I learned to plant seed by the symbiotic method on sterile media," he recalled. "I also read the different publications available. They were very limited them."

"When we started germinating our own plants we were forced to sell," Mrs. Hiyamoto said and laughed.

That was about when her husband began working only part-time as a mechanic to devote more time to orchids.

Mr. Miyamoto, in addition to handling his own business, became the official photographer for the Honolulu Orchid Society, and then for the American Orchid Society Awards Committee.

He has since dropped that because he "doesn't have enough time" after spending 10 or 12 hours a day watering, potting, tending and mailing his plants.

"It is not a profitable business," he said, "but the friends we have made make it worth it." In his guest book there are signatures from Israel, Egypt, Germany, Japan, Thailand, Africa and Canada and even New Jersey.

"Orchid-growing is all over, in parts we wouldn't believe it would be possible, including Alaska. They have to have heated houses in all temperate climates," he said.

Miyamoto is generous with his advice, which could be why even the experts make regular visits to his farm.

This week he'll be displaying 50 of his plants in the HIC orchid show, and he'll also be working in the sales booth.

For amateur orchid-growers he offered a few solid tips for plant shopping:

For one, although "you can grow almost any orchids grown on the Islands, the dendrobiums and cattleyas would do much better in drier areas."

On the other hand, members of the vandaceous family—vanda, ascocenda and phalaenopsis—will grow in hot areas, but will do better at higher elevations or cooler parts of the Islands.

The reason is that "dendrobiums cannot take too much water," Mr. Miyamoto explained. "Any plants with pseudo-bulbs as they have store water. The vandaceous group has no bulbs."

As far as sunshine is concerned, he said, most varieties of dendrobiums prefer full sunshine. Vandas and cattleyas like partial shade and the phalaenopsis even more shade.

For the shade-lovers, the early morning sun is best, he advised. "Mid-afternoon sun is much hotter and burns the plants. If a plant is heated gradually all day it is not so bad."

Although the cattleyas with their lush blossoms are Miyamoto's favorites, he admitted that they do have the disadvantage of blooming only once a year. The same is true of dendrobiums.

A new development, the ascocenda, a fairly new hybrid, does make it possible to have blooming orchids almost all year around.

"It is also suitable for small growing areas. It does not grow into a huge plant," Miyamoto said.

COMMON CAUSE

HON. WILLIAM L. HUNGATE

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Tuesday, August 15, 1972

Mr. HUNGATE. Mr. Speaker, in light of my colleagues discussion of Common

Cause on Tuesday, July 18, on page 24139, I would like to bring to their attention part I of three parts of an article on the same subject:

CAUSE WITHOUT A REBEL

(By Robert Sherrill)

It isn't the apocalytic sales pitch that guarantees success. It's the aroma of something special—a kind of sweatless sincerity—that exudes from the salesman. Your ordinary evangelist may say the same thing, but he just doesn't get the results that Billy Graham commands when he shouts, "Today the whole world is on fire! . . . The flames are licking all around our world—the roof is about to cave in . . ." etc. And when Ralph Nader warns, "This is not the time to fool around, wasting countless hours watching television or chitchatting . . . not when the future of civilization is at stake," he draws a much more universal and much more profound response than virtually the same admonition does when it comes from Lester Maddox.

Whatever singular quality it is that accounts for the difference, John W. Gardner certainly has it. If he had been an actor back in the days when Hollywood considered a potted palm in a hotel lobby the height of elegance, Gardner would have been cast as a don, an Episcopal minister or a banker. His voice and manner are right. And even though the idea packaged by his voice and manner may be stunningly naive ("Why, the peace movement alone is as hard a political force as the oil lobby!"), the people believe in him.

So he is a first-rate apocalyptic salesman. "The nation is in deep trouble," he intoned in 1970, and nearly a quarter of a million people trembled and began sending in their $15 to join his organization. Common Cause—called a people's lobby and dedicated to promoting "housing, employment, education, health, consumer protection, environment, law enforcement, administration of justice [and the] reordering of national priorities and Governmental reform." A pretty big order for Common Cause's two full-time professional lobbyists to handle, you must admit, but for the moment let's not talk critically.

Common Cause is remarkable for a number of reasons. For one thing, its size. Even if nothing great emerges from it, Gardner will have put his tidy mark on history, for in slightly more than a year he pulled together an organization exceeded in size by only two dozen labor unions. Each person who paid his $15 hoped that it would be used to save his Government's soul, and the fact that even one 800th of the citizenry—fresh from five years of L.B.J. and four years of R.M.N.—believed salvation possible is also truly remarkable.

The third remarkable thing about Common Cause is that despite its many absurdities it's still quite appealing. Common Cause propagandists are uncommonly pious and windy and boastful about their work, and they are also quite inaccurate. They claim to have done much more than they really have done; they claim to be much more powerful than they really are; they offer as their very own ideas that were old long before Common Cause came into existence. In short, like all politico-evangelistic movements, Common Cause has its share of quackery and deceit. Yet, on balance, the nation is better off because Gardner goes around chanting his doleful quasi sermons, and it's probably also accurate to say that Common Cause has girded the loins of the timid taxpaying citizen in a fashion no other organization has done in recent years.

The worst mistake that one could possibly make would be to think of Gardner as a radical reformer. His philosophy has received the seal of approval of *Reader's Digest*, where nine of his speeches and essays have appeared in the past decade—seven more times than J. Edgar Hoover was chosen—and of *Fortune* magazine, which once admiringly published excerpts from two Gardner books it quite accurately described as "moral tracts."

The idea that the public should seize certain corporations horrifies him. Having been kept by the largess of the Carnegie riches for 19 years, Gardner puts much trust in America's "great families." He apparently believes in spreading political power evenly over the people (although he once said of the political process, "It is not essential that *everyone* participate. As a matter of fact, if everyone suddenly did, the society would fly apart!") as long as democracy is not equated with a more equitable distribution of money. When I suggested to him that the most necessary reform needed in this country is a redistribution of wealth, he became quite angry, ridiculed this as "one of those big round phrases that sound great" and eventually broke off our discussion by calling me "arrogant—and, if you don't mind my saying so, snotty."

One of Gardner's aides later explained that Gardner avoids talking about redistribution of wealth because "it does scare off some people who aren't sure if it's their wealth you're talking about."

There are certain people of considerable wealth whom he has indeed taken great pains not to frighten away, for they have helped keep him in business as a modest reformer since 1968. The two major do-gooding operations Gardner has headed are the Urban Coalition (along with its lobbying counterpart, the Urban Coalition Action Council) and Common Cause.

The Urban Coalition was generously bankrolled by corporations such as those whose executives have served on the Urban Coalition board: Litton Industries, the Aluminum Company of America, the Chase Manhattan Bank, A. T. & T., Boise Cascade Corporation, General Motors Corporation.

And when he started Common Cause, he tapped the same kind of personal and corporate pockets—John D. Rockefeller III, John Hay Whitney, Arthur Krim, Sol Linowitz, the Watsons of IBM, Time Inc., Ford Motor Company, Norton Simon.

Like the true reformer, Gardner thinks he has a stronger character and purer heart than other men. He has said that politicians who seek an "alliance with the masses" may be just "power-hungry men"; but of course *he* wouldn't misuse Common Cause's mass alliance. Likewise, though he believes the corporate dollar corrupts politics, he also believes Common Cause is immune from such corruption. I asked how he can be so sure, but he didn't like the question. And when I asked if he did not in fact represent "the establishment," he became so irritated he refused to discuss it.

Of course, he does represent the establishment. He's sort of the lay chaplain of *Fortune's* 500. "Businessmen respect him, especially big businessmen," a close friend of Gardner's once said. "Maybe it's because the bigger the businessman is, the more idealistic he's apt to be." Maybe. And maybe they like him because they are convinced Gardner will never let his reform movement get out of hand. After all, he has always mingled easily and worked closely and sympathetically with the corporate world. He has served as a consultant to the Pentagon, helped put together the Rand Corporation's nonprofit System Development Corporation, served on the board of directors of such corporations as Shell Oil, American Airlines, Time Inc. and the New York Telephone Company.

Understandably, *Time* considered Gardner's sentiments worthy of being published as an essay in 1969 when he wrote of the Top People: "Contemporary critics often appear to believe that the smothering of individuality is a consequence of intentional decisions by people at the top. Right-wingers blame Government leaders, left-wingers blame corporate leaders. But the modern leader is always in some measure caught in the system. To a considerable degree, the system determines how and when he will exercise power. The queen bee is as much a prisoner of the system as is any other in the hive."

It wasn't clear, as is often the case with Gardner's essays and speeches, just what he was getting at. What system outside Government and the corporate world did he have in mind as the villain? Could it be some mysterious system originating with the Lower Classes?

If one were to judge Common Cause only from the list of "sample" members distributed by the organization's publicity office, one would have to conclude that nobody can get in unless his name has appeared frequently on the front page, society page, movie page or financial page. Everyone on the list is somebody: Mrs. Dean Acheson, Winthrop Aldrich, Hugh Auchincloss, Ralph Bellamy, S. I. Hayakawa, Fredric March, Gregory Peck, Dr. Jonas Salk. Well, you get the idea.

And from some of the names, one might wonder just how common a cause can get. There is Thomas ("Tommy the Cork") Corcoran, for example, one of Washington's best wheeler-dealer lobbyists, whose career reached a high point of sorts a few years back when a Congressional committee investigated the way he went about getting a natural-gas rate increase through the Federal Power Commission. And there is the gentleman so well remembered at Attica prison, Governor Nelson Rockefeller, whose idea of democracy is sometimes illustrated by running a highway through your front room and sometimes by withholding money from needy insane asylums. And there is Robert McNamara, whose efforts on behalf of international peace need no explanation here. (Remember, please, the officials of Common Cause—not I—have singled out these names for your special attention.)

But in fact the membership, like the hierarchy, is a mixture of the middle class and up. Balancing chairman Gardner at the top is president Jack Conway, an assistant to Walther Reuther for many years, and old labor organizer and a crafty lobbyist. And if the establishment-oriented membership is not exactly balanced by honest progressives, at least it is diluted, as will be shown later on.

No effort is made to disguise the elitist atmosphere that surrounds Gardner, an atmosphere to which he contributes with little anecdotes, such as one he told an admiring audience in Washington. It started out like this: "I remember once when I was walking down the waterfront in San Francisco—*not something I normally do*—and a limousine [not just a plain car] coming in my direction slowed down and a lady stuck her head out the window and said, 'Keep up the good work, Mr. Gardner!' "

Nice members appreciate those subtle assurances of good taste.

The Common Cause staff contributes its share to this atmosphere. In a press release about the visit of Wheelock Whitney, a prominent liberal Republican from Minnesota, to the Washington offices, the note of *noblesse oblige* was right on top: "[Whitney] was tremendously impressed. He did not have an appointment with Mr. Gardner, but Mr. Gardner met him and even gave him a personal tour of the office."

HOUSE OF REPRESENTATIVES—*Wednesday, August 16, 1972*

The House met at 12 o'clock noon.

The Chaplain, Rev. Edward G. Latch, D.D., offered the following prayer:

See that none render evil for evil, but ever follow that which is good, both among yourselves and to all men.—I Thessalonians 5: 15.

Eternal Father, as we bow in Thy presence, grant that Thy grace may so possess our hearts that our words may be generous, our ways gentle, and our work gratifying to Thee.

Cleanse us from all unrighteousness and fill us with Thy spirit that we may think clearly, speak wisely, and live nobly as we labor for the good of our country and for peace in our world.

In Thy holy name we pray. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Without objection, the Journal stands approved.

There was no objection.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Arrington, one of its clerks, announced that the Senate had passed a bill of the following title, in which the concurrence of the House is requested:

S. 2806. An act to authorize appropriations for additional costs of land acquisition for the national park system.

The message also announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 3726) entitled "An act to extend and amend the Export Administration Act of 1969 to afford more equal export opportunity, to establish a Council on International Economic Policy, and for other purposes."

The message also announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 15097) entitled "An act making appropriations for the Department of Transportation and related agencies for the fiscal year ending June 30, 1973, and for other purposes."

The message also announced that the Senate agreed to the amendment of the House to the amendment of the Senate numbered 3 to the foregoing bill.

The message also announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 15580) entitled "An act to amend the District of Columbia Police and Firemen's Salary Act of 1958 to increase salaries, and for other purposes."

ADDITIONAL LEGISLATIVE PROGRAM

(Mr. BOGGS asked and was given permission to address the House for 1 minute.)

Mr. BOGGS. Mr. Speaker, I take this time to announce to the House that later in the day a resolution will be called up suspending the 3-day rule for the consideration of conference reports. This is necessary in order to consider conference reports between now and the recess of the Congress.

A DOUBLE STANDARD FOR GENERALS AND COAL MINERS?

(Mr. HECHLER of West Virginia asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. HECHLER of West Virginia. Mr. Speaker, is there a double standard for generals and coal miners?

There has been some mumbling and grumbling by certain high administration officials, including former Secretary of the Treasury John Connally, that payments for coal miners' black lung may exceed the budget.

The New York Times of August 11 carries a report of the medical record of retiring Air Force Gen. John D. Lavelle. It seems that General Lavelle has been awarded 70 percent disability for emphysema, a heart murmur, and a back problem. According to the New York Times account:

> A copy of a "pulmonary function study" performed by Air Force doctors on General Lavelle April 3, four days before he retired, showed the vital capacity of his lungs, which is the total amount of air that can be exhaled, to be 101 percent of normal.
>
> A second test was conducted to measure the amount of air that could be expelled in one second. The general obtained a rating of 72 on this test.
>
> According to the sixth edition of Harrison's Principles of Internal Medicine, a score of 69 is considered normal for a man of General Lavelle's age. The general's score on this test also exceeded the Air Force's own standard score of 70, which must be met by pilots before they can qualify for flight duty.

There are thousands of coal miners who have pneumoconiosis from the inhalation of coal dust into their lungs who cannot collect compensation. The Congress has recognized this problem and passed a new law in May of this year to enable many of these disabled miners to qualify. It is outrageous that the administration now wants to establish a double standard for generals and coal miners. Why should General Lavelle get a fat, tax-free retirement, claiming he has disabling emphysema while playing tennis every day, and the coal miner gasping for breath is told that to pay him would unbalance the budget?

THE PRESIDENT'S VIEWS ON GUN CONTROL

(Mr. GUDE asked and was given permission to address the House for 1 minute, to revise and extend his remarks, and include extraneous matter.)

Mr. GUDE. Mr. Speaker, as the sponsor of H.R. 12077, a bill to ban the sale of domestic Saturday night specials—the cheap handguns which are widely used in robberies, murders, and other violent crimes—I was pleased to note that President Nixon has urged the House of Representatives to pass legislation outlawing these weapons. For the information of my colleagues and the public I will insert at this point an article from the Washington Post of August 11, 1972, on this matter.

NIXON URGES HOUSE TO PASS HANDGUN BILL

> The White House yesterday urged the House of Representatives to act this year on Senate-passed legislation to ban the sale of the cheap, easily concealed guns called "Saturday night specials."
>
> Ronald L. Ziegler, presidential press secretary, did not specifically endorse the measure approved Wednesday by the Senate but said President Nixon "supports elimination of Saturday night specials."
>
> Declining to deal directly with the specifics of the Senate bill, he said Mr. Nixon believes legislation "should be worded in such a way as not to penalize the many legitimate sportsmen and target shooters.
>
> In a CBS interview, Sen. Edward M. Kennedy (D-Mass), who unsuccessfully sought to require licensing and registration of gun owners and certain firearms, said "it defies reason, it defies rationality" not to do so.

ONE THOUSAND PERCENT BACKING

(Mr. HALL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HALL. Mr. Speaker. in the morning mail I received a form letter from the Democrat nominee for President of the United States. He suggested that I give him "my heart and my hand, along with a $25 campaign contribution."

Mr. Speaker, I regret that I am unable to comply with the Senator's request for I fear that if by some remote chance he would be elected, he would not only have my heart and my hand, but my wallet, my security, my freedom, and my scalp, to say nothing of other vital and treasured although vestigal parts of my anatomy.

Mr. Speaker, the only reply that I can make to the Senator is that while I do not choose to contribute to his campaign, I can offer him the same kind of "1,000 percent backing" that he gave the junior Senator from Missouri, who was one of his eight or 10 choices for vice president.

OUR FAILURE TO PROTECT THE PUBLIC INTEREST ON THE FEDERAL RESERVE SYSTEM

Mr. PATMAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PATMAN. Mr. Speaker, later in today's Record, I shall discuss in some detail the failures of the Congress and the Nixon administration to protect the public on monetary policy.

Many Americans question how it is possible for their elected representatives to allow a Federal agency—the Federal Reserve System—to operate without an audit by the General Accounting Office and without coming to Congress for appropriations. The constituents of Members of this House are asking how we could allow this agency to continue to retain Government securities which have been paid for once by the credit of the United States.

These bonds—approaching $71 billion—should be retired and subtracted from the national debt. Instead, the U.S. Treasury continues to pay interest to the tune of $4 billion annually on these bonds and the Federal Reserve uses this slush fund to finance its far-flung operations and to ignore the will of the people and their elected representatives.

APPOINTMENT OF CONFEREES ON S. 1819, RELOCATION ASSISTANCE

Mr. KLUCZYNSKI. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (S. 1819) to amend the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 to provide for minimum Federal payments after July 1, 1972, for relocation assistance made available under federally assisted programs and for an extension of the effective date of the act, with House amendments thereto, insist on the House amendments, and agree to the conference requested by the Senate.

The SPEAKER. Is there objection to the request of the gentleman from Illinois? The Chair hears none, and appoints the following conferees: Messrs. Kluczynski, Wright, Collins of Illinois, Harsha, and Don H. Clausen.

CONSIDERATION OF CONFERENCE REPORTS ON THE SAME DAY REPORTED

Mr. COLMER. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 1094 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. Res. 1094

Resolved, That during the remainder of this week it shall be in order to consider conference reports the same day reported, notwithstanding the provisions of clause 2, rule XXVIII.

PARLIAMENTARY INQUIRY

Mr. GROSS. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state the parliamentary inquiry.

Mr. GROSS. Mr. Speaker, when was permission granted for the filing of this rule?

The SPEAKER. The Chair will advise the gentleman that the resolution was reported yesterday.

The gentleman from Mississippi (Mr. Colmer) is recognized for 1 hour.

Mr. COLMER. Mr. Speaker, I yield the usual 30 minutes to the able and distinguished gentleman from California (Mr. Smith), pending which I yield myself such time as I may consume.

CALL OF THE HOUSE

Mr. GROSS. Mr. Speaker, I make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

Mr. BOGGS. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The Clerk called the roll, and the following Members failed to answer to their names:

[Roll No. 328]

Abourezk
Anderson, Tenn.
Badillo
Baker
Baring
Betts
Blanton
Carney
Carter
Chamberlain
Clancy
Clark
Clay
Conte
Conyers
Curlin
Davis, Wis.
Dellums
Dennis
Dingell
Dowdy
Dwyer
Edmondson
Edwards, Ala.
Esch
Frelinghuysen
Galifianakis
Gallagher
Goldwater
Gray
Hagan
Harrington
Harvey
Hawkins
Hébert
Heckler, Mass.
Hogan
Hull
Jarman
Keith
Kyros
Landrum
Leggett
Lennon
Lent
Long, La.
McCloskey
McMillan
Michel
Murphy, N.Y.
Nichols
O'Neill
Passman
Pelly
Pryor, Ark.
Rarick
Reid
Rhodes
Riegle
Rooney, N.Y.
Rousselot
Ryan
Schmitz
Springer
Staggers
Teague, Calif.
Teague, Tex.
Ullman
Veysey
Waldie

The SPEAKER. On this rollcall 362 Members have answered to their names, a quorum.

By unanimous consent, further proceedings under the call were dispensed with.

CONSIDERATION OF CONFERENCE REPORTS ON THE SAME DAY REPORTED

The SPEAKER. The gentleman from Mississippi (Mr. Colmer), is recognized for 1 hour.

Mr. COLMER. Mr. Speaker, I believe just before the quorum call, I had yielded the usual 30 minutes to the minority, to the able and distinguished gentleman from California (Mr. Smith); pending which, Mr. Speaker, I yield myself such brief time as I may consume.

Mr. Speaker, this resolution is a simple resolution providing for a simple objective, namely, to permit the House in these 2 or 3 remaining days of the session prior to our taking a vacation beginning at the end of this week, to wit, Friday, to consider conference reports without having to wait the prerequisite number of days required under the rules of the House and that is all there is to it. From my point of view, I always prefer the orderly procedure, but you cannot eat your cake and have it, too. We are either going to have to go through the procedure of waiving the 3-day rule, or we are going to have to remain in session past the recess date, or we are going to have to let these conference reports go over; it is just that simple.

I yield to my friend from Massachusetts (Mr. Burke).

Mr. BURKE of Massachusetts. I should like to ask my good friend, the chairman of the Rules Committee, if there is any expectation of that "fat cat" cattle baron bill coming in here before we recess as a conference committee report.

Mr. COLMER. I am always happy to cooperate with my good friend from Massachusetts, but I am sure he would not want me to mislead him. I can only answer that question by simply saying I have no knowledge whatever on the subject of what conference reports will be called up.

Mr. BURKE of Massachusetts. I just wish to point out to my good friend here that I understand from the rumors that I hear from the page boys outside—and that is the most reliable source of informaton one can find around here—that this "fat cat" cattle baron bill will be coming in here, and the Members are not going to have too much of a chance to read what the conference committee has done. If that is so, very reluctantly I will have to oppose the gentleman's motion here today, because up in the Northeast section of this country we have hundreds of people who are losing their jobs in the tanneries of America as a result of their closing, because the cattle people of this country are sending their best hides overseas and we are getting the lower end of the barrel.

I do not see how we in the eastern part of this country can support this rule if this is going to take place.

We find the administration, Mr. Speaker, in two positions. In one position the Secretary of Commerce is assuring the hide people that he is taking care of them; he has got this restriction on a 1971 level; and in the other position we have got the Secretary of Commerce assuring the cattle people that they are going to be taken care of because they are going to remove the restrictions on exports.

Mr. Speaker, I do not think that we can act on the gentleman's motion here today in a fair and equitable way in view of the unemployment situation in this country, and in view of the fact that the cattle producers of this country are presently organizing—presently organizing—great campaign committees; and you and I know what they want to do. I do not think we should rush this through, and I certainly oppose the motion of the gentleman, the chairman of the Rules Committee.

Mr. SMITH of California. Mr. Speaker,

I yield myself such time as I may consume.

Mr. Speaker, the matter was heard in executive session yesterday in the Rules Committee. I supported it in the Rules Committee. I find myself a little bit confused, Mr. Speaker, because I thought we were trying to expedite the matters which were, for the most part, noncontroversial conference reports.

Now the first thing I am told here today is that some of the Members apparently have objection to S. 3726, the Export Administration Act extension, which I think would probably be the first measure called up. I think probably the gentleman from Massachusetts (Mr. BURKE) was just talking about that. In addition to that of course all the matters that could be brought up are listed on pages 4, 5, 6, 7, 8, and 9 of the calendar. As best I can determine in looking over them, we could possibly have H.R. 13089, national accelerated reforestation, that was filed in the House on August 14; possibly H.R. 15495, military procurement authorization, 1973, if they get the conference report in, and of course that is very important. I just mentioned S. 3796, Export Administration Act extension. Then there could be H.R. 15641, military construction authorization, 1973, and that, too, Mr. Speaker, is very important. Then we have this one which would be eligible if this resolution passes, H.R. 15580, District of Columbia police and firemen salary increases, filed in the House on August 15.

Mr. BURKE of Massachusetts. Mr. Speaker, will the gentleman yield?

Mr. SMITH of California. I yield to the gentleman from Massachusetts.

Mr. BURKE of Massachusetts. Mr. Speaker, I want to point out to the gentleman I am not opposed to this resolution if we can have the assurance of the leadership that this export bill is not going to be taken up before we leave here.

Mr. SMITH of California. That is something I have no control over. This is simply a matter of the individual's own opinion as to our procedure when we try to dispose of as much as we can. The Republicans hope we can get out of here Friday night so we can have our convention, so I will leave the situation up to the individual Members. I am sure I speak correctly when I say the gentleman from Michigan (Mr. GERALD R. FORD), our minority leader, supports this resolution.

Mr. GERALD R. FORD. Mr. Speaker, will the gentleman yield?

Mr. SMITH of California. I yield to the gentleman from Michigan.

Mr. GERALD R. FORD. Mr. Speaker, let me respond. I do support the resolution and I do wish to point out there are certain matters that in my judgment and in the judgment of others do require some action prior to when we recess or adjourn by Friday. I do not think it is an unreasonable request. Therefore I intend to support the resolution.

Mr. SMITH of California. Mr. Speaker, I thank the gentleman.

Mr. Speaker, I have three requests for time.

I yield 5 minutes to the gentleman from Georgia (Mr. BLACKBURN).

Mr. BLACKBURN. Mr. Speaker, I rise in opposition to this resolution. We have heard everyone speaking in favor of it saying, well, we do not need to observe all these procedures because we are getting into the closing hours of the session and we have so much necessary legislation that must be dealt with. Therefore we have the kind of resolution which we are now told is necessary.

Gentlemen, I am reminded of the words of, I believe, Mr. Justice Holmes, who was dealing with a lawsuit. A lawyer brought his case to the Supreme Court. He said, "Well, I have been thrown out of court on just a mere technicality, just a matter of procedure which I failed to observe in filing my lawsuit. I was maybe a little bit too late but why should my client lose his rights because I have slipped up on a procedural defect?" Justice Holmes made this observation, that is as applicable today as it was then, it seems to me. He said: "Law without form is chaos."

I have noticed a tendency in the House of Representatives during the 6 years I have been here that when we get into the closing hours of any session chaos becomes the order of the day and we begin to waive such technicalities as that which suggests all Members should know what we are voting on before we vote. Then we find ourselves saddled with laws we have to explain much later when we go back to our people.

It has been brought up that we must have some of these laws or it will create hardship in the country. If such procedures are needed, let us deal with them on a unanimous-consent request basis. Members of this House are responsible individuals. If they recognize a genuine need for some legislation and see that the country will suffer for some reason, we are not going to have opposition; but, we are going to have opposition when we have controversial matters which should be explained before they are passed.

I will say to the gentleman from Massachusetts that the reason this general resolution is being sought in advance is because it is known there will be opposition when this Export Administration Act extension is brought up. This is a typical example of what we find in the closing hours of Congress. The Banking and Currency Committee has a bill providing much needed authority for the President, which is going to expire shortly.

The conferees have attached a provision which the House has rejected: they have attached a provision to require the establishment of a council for advising the President on international economic matters.

We debated this matter very thoroughly several weeks ago. We pointed out that there are some 650 councils in existence now, and it was very questionable as to why we needed to establish a new bureaucracy, with their never-ending requests for funds.

Yes, there is a great deal of controversy attached to this measure, and the House, very roughly, I would say, by three out of four, judging by the voice vote, was opposed to the establishment of this council.

But, with the typical conference type of fashion, the conferees of the House Banking and Currency Committee have submitted to the will of the Senate.

Gentlemen, what is involved here is the integrity of the House of Representatives itself. Is there a need for a House of Representatives? Do we need to go through the exercise of debating and voting on resolutions and amendments to bills, when every time we go to conference at the other end of the hall we accept anything the Senate throws in our direction?

Gentlemen, if this were not a matter about which I have such strong feelings, I assure you I would not be here resisting this motion today; but we have to resist this resolution, to pass the message through to the Senate and to anybody else who happens to be in earshot that the House of Representatives is not going to be run over roughshod.

Mr. Speaker, I urge the rejection of this resolution.

Mr. SMITH of California. Mr. Speaker, I yield 5 minutes to the gentleman from Missouri (Mr. HALL).

Mr. HALL. Mr. Speaker, I am firmly in opposition to this resolution. I speak as the chairman of the minority Committee on the Consent Calendar Objectors and also as a member of the Joint Committee on Continued Congressional Operations.

This is the kind of a rule that brings chaos at the end of, or as we approach the end of any session, or adjournment sine die, by agreement between the two bodies.

We have tried to cooperate by allowing long lists of extra unanimous-consent requests to be brought up during this past week. Indeed, I will remind the Members that we have allowed, by unanimous consent, an extra day for suspension of the rules, on the calendar this week.

As the previous speaker said, any thinking Member will allow these things in good faith if a need is demonstrated, but this proposal gives carte blanche elimination of orderly process and foretells chaos. Many of us truly do our homework and read these bills and reports in advance. This resolution obviously waives all points of order, by definition. There is no opportunity for prior study. We obviate the 3-day rule for printing prior to consideration, as developed by the Joint Commission on the Reorganization of the Congress.

There must be an undue fear of denial of unanimous-consent requests.

We would be legislating in the dark on controversial legislation, to be sure.

There is an available and easy way to do this. We can do it by a two-thirds vote under a rule of suspension at any time, if not granted on a unanimous-consent request. This rule, of course, only requires a simple majority, and therein lies the subterfuge of bringing it about this way.

I repeat it defies the representative process and will lead to every elected Member obviating his elected and bounden duties, by legislating in the dark.

There is no emergency need for most of these proposals. If so, that can be handled, and the legislation should be covered under a procedure that goes both ways.

In the old days the Committee on Rules often "pocketed" legislation that should not embarrass all of the individually elected legislators by being brought prematurely to the floor. So this type of legislation, to be properly considered and voted on with a "yea" vote, should be so constructed and drafted that it would regulate stopping some of the bad legislation or conferenc reports that need not come before us as an emergency prior to the recess, yet open the door for emergency and good reports.

This does neither. It simply opens the door to a blind, dark alley for legislating without the Members having an opportunity to see what the managers on the part of the House have agreed to, or how many times we have receded to the other body.

Mr. Speaker, we are simply putting the "ring in the nose" of the House of Representatives to be led by the other body in this Congress, and as the people's representatives we should not do it. I recommend a strong vote against House Resolution 1094, Mr. Speaker, and I yield back the balance of my time.

Mr. SMITH of California. Mr. Speaker, I yield 3 minutes to the gentleman from Iowa (Mr. GROSS).

Mr. GROSS. Mr. Speaker, this resolution simply means that the chairman or someone in charge of a conference report can walk through any door of the House with the conference papers in his hand, obtain recognition of the Speaker, and without prior notification to anyone else call the conference report up with no information in the hands of the Members. The House then has the opportunity, on a sight-unseen basis, to reject or accept the conference report.

The proponents of this resolution contend it is necessary to expedite the business of the House. They ignore the reason why at this late date they feel they must resort to this kind of drastic action to expedite the business of the House. Where, for instance, was the Export Administration extension bill until this late date in this session? The statutory date expired, I believe, on August 1. Everyone on the Committee on Banking and Currency, including the chairman, knew the act would expire on August 1. They knew that weeks and months ago. Where was the committee that it did not bring this bill out long ago so that we would not be confronted with this kind of a situation on the House floor whereby it is proposed that the rules of the House be raped in behalf of expedition?

Mr. Speaker, I hope this resolution is defeated.

Mr. SMITH of California. Mr. Speaker, I yield 3 minutes to the gentleman from Ohio (Mr. WYLIE).

Mr. WYLIE. Mr. Speaker, I rise in opposition to this resolution, which would waive the 3-day requirement for the consideration of conference reports.

It is important to remember that a conference report often contains very complex provisions which have been considered by the other body and not necessarily by this body or previously rejected by this body.

The 3-day interim period is provided in the rules of the House for a very, very important reason, so that the Members of this body can consider the substance of a conference report and be informed on what is in it.

Now, a resolution of this type is frequently adopted at the end of a session when there is very little time remaining before adjournment sine die. That is not the situation before us today. We will be back after the recess, and there is still ample time to consider anything which is in any of these conference reports we are trying to rush through today.

Mr. Speaker, I have a feeling that the real reason for the adoption of this rule is to rush through the bill to which Congressman BLACKBURN referred (H.R. 15989), a bill to establish a Council on International Economic Policy.

The House has receded and concurred in the Senate amendments to H.R. 15989 as we almost always do in conference with the other body and the other body has acted on the conference report already, which precludes us from doing anything but voting the conference report up or down. All we can do is say yes or no. I object to that, especially in view of the fact that title I of the House bill was overwhelmingly rejected by this body.

I refer to the remarks of Senator MONDALE when he presented the conference report yesterday.

> Mr. President, this measure returns from conference in almost identical form as was adopted by the Senate some time back.

So what did they do? They adopted the conference report, of course, by a voice vote.

I therefore strongly urge defeat of this resolution so that the House can consider the various conference reports in a responsible manner and not in haste.

Mr. HALL. Mr. Speaker, will the gentleman yield?

Mr. WYLIE. I yield to the gentleman from Missouri.

Mr. HALL. Mr. Speaker, I would like to associate myself with the remarks of the gentleman from Ohio, and commend the gentleman. As usual he thinks and speaks well to matters of proved principle. Surely every Member of this House is keenly aware of the fact that within the rules of the House there is a technique if the sine die adjournment has been firmly set, where any reasonable procedures could be handled in the terminal 6 days.

Mr. WYLIE. Mr. Speaker, I thank the gentleman for his supporting remarks.

Mr. SMITH of California. Mr. Speaker, I yield 4 minutes to the distinguished minority leader, the gentleman from Michigan (Mr. GERALD R. FORD).

Mr. GERALD R. FORD. Mr. Speaker, let me say as emphatically as I can, and I think my record bears it out, that I stand as strongly as anybody in this body for the rights and the privileges of the House of Representatives vis-a-vis the other body. I do not think we have capitulated. We have lost some, but there has not been a capitulation. There are some measures that are in the wings where I, along with others, will continue to fight for the views and the decisions of this body vis-a-vis the other body.

The real problem we are confronted with today is this one legislative proposal, the conference report from the Committee on Banking and Currency.

The gentleman from Georgia and my friend, the gentleman from Ohio, had strong feelings, and those strong feelings against that legislation were in the committee report when this legislation came before us, and they were joined in the supplemental views and the additional views by the gentleman from California (Mr. ROUSSELOT).

Let me say that when that legislation was before the House, to refresh your memories, I joined with them to a degree in opposing one or more amendments, as I recall, proposed by the gentleman from Iowa (Mr. CULVER). Unfortunately, from our viewpoint, we lost those amendments and as a consequence then the choice was: did we want section 2, or a title II that had been amended stricken from the bill with title I remaining? And the conscious decision was made by the House that with the Culver amendment or amendments that the title should be stricken.

The gentleman from California, the gentleman from Ohio, and the gentleman from Georgia know that I personally, for whatever impact that had, was for title II as it came from the committee. And I add parenthetically a majority of the Members on this side of the aisle in the committee favored title II as it came out of the committee.

Mr. BURKE of Massachusetts. Mr. Speaker, will the gentleman yield?

Mr. GERALD R. FORD. If the gentleman will permit me to finish, I will yield to the gentleman in a moment.

Mr. Speaker, I would hope that some other alternative would be arrived at for the consideration of this conference report before we recess or adjourn on Friday. I hope that maybe some negotiations might result that would permit the consideration of this conference report either tomorrow or Friday. But I do not want this one issue to becloud the possibility of the consideration prior to Friday of any other conference report or conference reports that may be essential to the proper functioning of our Government in the 3 weeks while we will be in recess.

Mr. BURKE of Massachusetts. Mr. Speaker, will the gentleman yield?

Mr. GERALD R. FORD. I am glad to yield to the gentleman from Massachusetts.

Mr. BURKE of Massachusetts. Mr. Speaker, I would like to point out to the minority leader the reason I am objecting today is not only to protect my right, but also protect the rights of two of my colleagues from New England who sit on the other side of the aisle, the two gentlemen from New Hampshire who have strong feelings on this legislation. I do not think that they would relish it any more than I would to find this conference committee report coming in here not knowing what is in the bill and finding their constituencies being left bereft of any representation as a result of this hasty action.

The SPEAKER. The time of the gentleman from Michigan has expired.

Mr. SMITH of California. Mr. Speaker, I yield 2 additional minutes to the gentleman from Michigan.

Mr. BURKE of Massachusetts. The gentlemen from New Hampshire (Mr. CLEVELAND and Mr. WYMAN) have very, very strong feelings on this legislation, and I do not think they would relish it any more than I do to find out that the hide bill was being rushed through here in the closing days.

I know, speaking for the gentleman from New Hampshire (Mr. CLEVELAND) that he would stay here till hell freezes over to fight this legislation.

And I believe the same is true for the gentleman from New Hampshire (Mr. WYMAN).

So I hope that the minority leader will take into consideration the Members on his side of the aisle who also have some real problems in this area.

Mr. CLEVELAND. Mr. Speaker, I thank the gentleman from Massachusetts (Mr. BURKE) for his remarks. My colleague Mr. WYMAN and I are indeed dedicated to the fight to protect the shoe industry and other industries from unfair trade. I urge the defeat of this resolution. Three days are little enough time to consider complex conference reports. The passage of this resolution would be a retreat from efforts to reform congressional procedures.

Mr. HALL. Mr. Speaker, will the gentleman yield?

Mr. GERALD F. FORD. I yield to the gentleman from Missouri (Mr. HALL).

Mr. HALL. Mr. Speaker, I appreciate the gentleman, my leader, yielding to me.

I do not want to take much of his time. I think I was in identically the same position he was in, when we gave consideration to this bill in the House. But I think that avoids the issue. The issue before us now is House Resolution 1094, and not whether we consider the trade export bill. I happen to be in favor of that in general, but I can see why some of the Members would be against the method by which it is coming up. But, the issue here is whether we open up all bills and conference reports without a chance to study same. The fact of the matter, and the thing that has not been said, is that the trade export bill including—or without—the Export Trade Advisory Council has expired and is going forward in the Department of Commerce and the administration under the War Powers Act, and they can survive on that until we get back. Therefore, this is a poor excuse and a thinly disguised excuse for the purpose of waiving all the rules for bringing up any conference report sight unseen, during the balance of the week.

Mr. STEIGER of Wisconsin. Mr. Speaker, will the gentleman yield?

Mr. GERALD R. FORD. I yield to the gentleman from Wisconsin.

Mr. STEIGER of Wisconsin. Mr. Speaker, I appreciate very much the gentleman yielding.

Mr. Speaker, I want to associate myself with the remarks of the gentleman from Missouri and the gentleman from Massachusetts (Mr. BURKE).

The conferees of both Houses of the Congress are meeting this afternoon at 2 o'clock on the Office of Economic Opportunity Act extention.

We could finish that conference report today. Yet if we adopt this rule, we would enable that conference report to be be brought up almost at once.

The SPEAKER. The time of the gentleman from Michigan has expired.

Mr. SMITH of California. Mr. Speaker, I yield 1 more minute to the gentleman from Michigan.

Mr. STEIGER of Wisconsin. So I would have to say in all honesty to the gentleman from Michigan that I would not want to see us get bogged down on the export-import question, and lose sight of the fact that there are other conferences on other bills and the Members of the House would be precluded with the adoption of this resolution from knowing what is in these bills, and I think they should have that right. I urge rejection of this resolution.

Mr. COLMER. Mr. Speaker, I yield 3 minutes to the gentlewoman from Oregon (Mrs. GREEN).

Mrs. GREEN of Oregon. Mr. Speaker, I thank the distinguished gentleman from Mississippi for yielding me this time.

Mr. Speaker, it seems to me even 3 days does not really give an adequate amount of time to consider a very complicated and long conference report. I hesitate to think how much consideration Members could give to various expenditures in a multibillion-dollar bill if the rule allows the conference report to be considered the same day it is signed.

I am getting a little bit weary hearing just about tax reform. We can have all the tax reform everyone wants, but if we do not have the time and the opportunity to exercise some judgment on how all those tax dollars are spent—we still will not solve our social problems.

It seems to me the other side of that coin of "tax reform" is "spending reform," and I wish those who are talking so much about tax reform would give equal consideration to spending reform. Conceding that many Members would like some reform, how much can one do without a conference report in advance.

When we had the HEW conference report, as I recall, it came back from conference with over $2 billion more than the original House bill.

When we had the higher education conference report, some of the highest figures of the Senate bill and some of the highest figures in the House bill that were possible under the rules were approved by the conferees. So we had the increased authorization.

Now I suggest that there is another conference that may be completed today or tomorrow and that is on the OEO conference report—the war on poverty legislation.

This resolution, as I understand it, allows the conference report to be considered the same day it is finished. We might not even have the opportunity to read what the conferees recommend.

If I have ever seen any reckless spending, it is in the OEO program over the years. This program desperately needs "spending reform." I suggest three things to my colleagues: that perhaps this year because of the presidential and vice-presidential races—there just might be an added interest between now and next November 7 on the part of constituents about what has been and is being spent in OEO. I think I do not need to elaborate. I would suggest that maybe there will be much closer scrutiny of the OEO programs from 1964 to now than any of us imagined prior to Miami and the mini-convention.

I suggest that everyone who is running for offices this November ought to have a right to find out what is in that conference report on the war on poverty before they are required to vote on it on the floor of the House. The recent publicized European travel of 60-some young recipients of poverty funds is just one of the countless examples of what I am talking about in needed "spending reform." Millions or hundreds of millions wasted in Office of Education or OEO deprives others of benefits Congress has promised. Millions wasted or actually misspent on contracts and grants in HEW and OEO mean that legitimate services are not provided. So if we are interested in some kind of "spending reform," it does seem to me that we ought not to allow conference reports to come in and the Members given insufficient time to study such complicated legislation and then be expected to give or deny approval with no opportunity to indicate priorities or even to know how well the conferees defended the House position.

Mr. DENT. Mr. Speaker, will the gentlewoman from Oregon yield?

Mrs. GREEN of Oregon. I yield to the gentleman from Pennsylvania.

Mr. DENT. Mr. Speaker, I thank the gentlewoman for yielding.

I might say this is a good discussion and probably one that is good for the soul as well as for the mind. It is not the first time we have attempted this. We have attempted it many times in the past since I have been a Member of Congress, but some of the issues of this year came to the point where we have had an awakening, a new awakening as to why Congress should be more responsible to itself.

For instance, not too many days ago this House refused me, as a chairman of a committee, the right to even go to conference because I could not in good conscience commit myself to a program preordained by the House. Now we are talking about taking conference reports and putting them through without anybody knowing anything that is in them. Three days is little enough time.

Just this week the weakness of our position was shown when we swallowed the Senate amendment to the disaster relief bill, which not in any minute measure of responsibility should have ever allowed us to say that we counted as a disaster—as a disaster—the slowing up of the manufacturing of munitions because of the SALT talks and tied it to a bill where no person in this House in good conscience could really vote against relief for the flood victims of Pennsylvania and Ohio and Maryland, and other States. Yet our hands were tied. We had no say in this House. We have now put on record that we consider any move to cut down the making of munitions to be a compensable disaster in this country. The taxpayers are going to have to pay for that kind of disaster from now on.

We should have more time and a better understanding of what is going on. I admit that there is a weakness in our conferences when we go to the Senate. I have been on many of them.

I have had to take many Senate provisions in order to save some part of what the House wanted. You cannot understand unless you have served on these committees and conferences the strength of the Senate in its peculiar position. They do not have the same kind of operation we do. One Republican Member speaks for the whole Republican conference; one Democratic Member speaks for the whole Democratic conference. Sometimes it is not even the Member who expresses the Senate position. Our House conferees speak and fight for each provision, each to his belief.

This is the style that we have to combat, and we should not condemn House conferees too severely. The Senate reinstituted into the conference report the Council Commission, and they took away from the House the right to interrogate the members of that Commission. We have the right to interrogate into what they intended to do and what they were doing. By taking this conference report without time to read and study its contents is setting aside all of the House efforts to eliminate both the Commission and immunity of its members from interrogation. If that is what we are going to have to buy without debate, without knowledge, and without argument, I think it is very much wrong.

Mrs. GREEN of Oregon. Mr. Speaker, I yield back the remainder of my time.

Mr. COLMER. Mr. Speaker, I yield 2 minutes to the gentleman from Massachusetts (Mr. BURKE).

Mr. BURKE of Massachusetts. Mr. Speaker, one of the House's first orders of business today appears to be House Resolution 1094, reported favorably in record time by the Rules Committee yesterday afternoon making it an order for the balance of this week to consider conference reports without compliance to the 3-day rule.

I know that time is ticking by on this week. Today is Wednesday and another convention is almost upon us and beyond that, election day and various State primaries. There is so much legislation that remains to be considered by both Houses—legislation vital to so many people that there is an understandable pressure to try to accomplish as much as possible in the remaining day or two this week. What I fear most is best exemplified by the resolution before us today—that there is going to be a rush to pass legislation willy-nilly in pellmell fashion without due deliberation. These days just before conventions and election or before an adjournment or a recess probably have been responsible for more bad, hastily thought out legislation than anything else I can think of. We should be wary of making more mistakes like this today.

What this resolution is allowing the House to do today is to suspend the provisions of the Legislative Reorganization Act which was designed to prevent legislating in haste without proper time for due consideration and deliberation by each and every Member of the House of the legislation before us. In other words, we are defeating the very purpose of the act itself. What was the point in passing the act if every time the pressure begins to build up before a recess or an adjournment, a simple majority can suspend the rules to railroad through in record time far-reaching legislation?

Now, if there were some vital bills that absolutely had to pass before this Congress recesses for the Republican Convention, I would be prepared to consider such emergency cases on their merit after listening to a strong argument for suspending the rules. But, we have not heard such a plea today. To my understanding, there is nothing in the conference stage that is likely to be presented to us which could not wait another 2 weeks where failure to act precipitously would imperil the security or well-being of this Nation. Instead, what we seem to have is legislation as usual, routine legislation which could well have been considered several weeks ago more calmly, more deliberately. At times I think there are those who deliberately schedule controversial conference reports for rushed sessions such as these last few days before recess so that the full glare of publicity and careful study cannot be focused on the legislation in question.

I am referring particularly to the conference report which this resolution seems designed to cover to provide special treatment and that is the conference report on S. 3726, the Equal Export Opportunity Act and International Economic Policy Act of 1972. This has to be one of the most poorly conceived and drafted bills to come before the House this session. We were treated to the spectacle of having the bill largely rewritten on the floor of this House, much of the rewriting done by members of the committee which rushed it through executive sessions. The statutory creation of yet another agency in the Federal Government; namely, the Council on International Economic Policy, was carefully considered on the floor of this House just a few days ago and after considerable rewriting and restricting and attempts to make it more responsible to Congress, instead of creating yet another agency in the White House with no responsibility to answer to anyone other than the President, the House decided that statutory recognition was not really necessary and deleted the whole title from the bill before it.

What are we treated to in this conference report? We are treated to the spectacle where the conferees went ahead and simply receded to the Senate and put right back into the bill that which the House rejected—with this important difference—with no strings attached and no recognition of the limitations put upon the agency by the House while the title was still in the bill. Lately, there has been much controversy over moves in the House to instruct conferees. I have been unwilling to go along with such instructions in the past, but if this is an example of how conferees protect the interests of the House, then I am afraid instructing conferees may well be the wave of the future in this body.

Gentlemen, we are going to be asked to approve today, probably on a voice vote, a conference report that until yesterday afternoon was not available to a single Member of this House unless by the chairman of the committee in question and his close intimates on the committee. I know, my office tried to get this report because many of those provisions are far reaching indeed and are of vital economic interest to my constituents and the shoe industry across the country. However, I was told at every turn the report was not available. And thus, what are we treated to today? In this morning's RECORD we find spread before us for the first time four pages of conference report constituting one of the biggest cave-ins in recent memory. The whole atmosphere of secrecy surrounding this particular conference report, given the magnitude of the changes and their economic implications, can only strike me as repugnant and legislative railroading of the worst variety. They are trying to jam this thing down our throats. My suspicions are aroused. I detect a distinct odor which seems to suggest that the powerful cattle industry and the international free trade lobby are really behind the efforts to railroad this thing through the House today or tomorrow.

At a time when the country's balance of payments and trade is at its lowest point in 100 years, we find statutory recognition for a council whose instructions are to protect and improve the earnings of foreign investments. If this is not giving official blessing by Congress to the present unbridled growth and concentration of economic power in the hands of a few multinational corporations, I do not know what it is. Tying employment to international economic activity where there has been floundering for so long will apparently be another assignment for the council. Greater freedom of capital movement, irrespective of its impact on the domestic economy seems to be the order of the day. In short, I question not only the need for yet another agency but specifically the need for an agency with these guidelines. What this country needs now is serious, in-depth detailed hearings on this country's trade policies, not hastily drafted legislation such as that before us today.

In conclusion, Mr. Speaker, I am convinced the more I read this conference report that there would be much to be gained by postponing consideration of the report in question until a later date and how much harm were to be gained if it were rushed through this House today or tomorrow. The issues are of vital importance and not something to be passed casually over on a sunny afternoon before recessing for a convention. I am convinced the Legislative Reorganization Act had such situations as this in mind when it was drafted and I, for one, hope that the House today will not suspend its provisions to permit such fancy footwork as contained in this conference report.

Mr. Speaker, I am not going to take the 2 minutes. I merely want to point out to this House that in addition to that export bill that is over there, there are several other conference committee reports that could come in here and affect the economy of your districts. I am only asking for assurances from the leadership that the trade export bill will not come in here in the rush of adjournment for the week, or recess, so that we have time to look over what the conference committee has done. This is not only true of this particular bill I am interested in, but of several other bills that are buried in those conference committees. You could very well be committing political suicide by voting for this resolution.

Mr. COLMER. Mr. Speaker, I yield 2 minutes to the gentleman from Texas (Mr. PATMAN).

Mr. PATMAN. Mr. Speaker, the Export Control Act expired August 1. This, of course, would renew the Export Control Act. It is not contemplated by the Banking and Currency Committee to bring up the conference report until Thursday afternoon after the antibusing bill has been disposed of even though this resolution should pass, or Friday morning, but it is necessary that we dispose of that legislation in some way. I will just state we do not expect to bring it up before Thursday afternoon or Friday, even if this rule were to pass.

Mr. BURKE of Massachusetts. Mr. Speaker, will the gentleman yield?

Mr. COLMER. I yield to the gentleman from Massachusetts.

Mr. BURKE of Massachusetts. Mr. Speaker, actually what the gentleman is telling the House is that he will not bring it up until after many, many quorum calls and other calls will be made in the House before they get to this bill. We are likely to be here until Saturday midnight before the gentleman comes in with that bill.

Mr. PATMAN. That is a decision for the gentleman.

Mr. BURKE of Massachusetts. It is not my decision. It is a decision for many, many Members here who object to these steamroller tactics. All we are asking for is a little bit of fairness to those of us who have a problem of unemployment in our districts so we may be able to look at this conference report and have a chance to study it and be able to debate intelligently.

Mr. PATMAN. It was in the RECORD yesterday morning. There are no steamroller tactics intended or contemplated. Every Member will be treated fairly. It is not contemplated to have rollcalls to filibuster. We are not going to have rollcalls, so the gentleman is in error on that.

Mr. BURKE of Massachusetts. I assure the gentleman there will be rollcalls and quorum calls.

Mr. GERALD R. FORD. Mr. Speaker, will the gentleman yield?

Mr. PATMAN. I yield to the gentleman from Michigan.

Mr. GERALD R. FORD. Mr. Speaker, let me reiterate or clarify in my own words what I believe the gentleman said, that if this resolution passes he does not intend to bring up the conference report on the export control bill until the conclusion of the House action on the antibusing legislation, whenever that might take place.

Mr. PATMAN. That is correct.

Mr. COLMER. Mr. Speaker, I yield myself such further time as I may consume.

Mr. Speaker, we have heard a great deal of talk about this resolution today. This is a resolution which I thought was a very simple matter and it was intended to achieve one objective. It is a simple matter. What we must do here is to make a decision as to whether we are going to complete our calendar by Friday night or whether we are not going to complete it in time for the scheduled recess.

I want to reiterate what I said in the beginning. This is frankly no skin off my back and I do not want anybody, even in spite of my friend, the gentleman from Massachusetts, who talks about steamrolling, to feel that I am steamrolling. I am merely serving here at the request of the Speaker, as a chore boy, to bring this matter to the attention of the House and let the House decide. Frankly I do not give a hoorah what decision is made. If the Members want to stay here until Saturday, if this matter is regarded as being that important, I will be here Saturday. We will just go right along, but we have got to make this decision now as to whether we are going to waive the 3-day rule or not.

Mr. BURKE of Massachusetts. Mr. Speaker, will the gentleman yield?

Mr. COLMER. I yield to my friend, the gentleman from Massachusetts.

Mr. BURKE of Massachusetts. Mr. Speaker, I never accused my friend, the gentleman from Mississippi, of steamrolling tactics.

In fact, he is the last man in the House who would be guilty of such action.

Mr. COLMER. I accept that.

Mr. BURKE of Massachusetts. I am not accusing him. I like my good friend. He has been the greatest chairman of the Rules Committee since Judge Smith. I would not accuse him, because he is the fairest man in the House.

Mr. COLMER. Before I yield to my friend from Iowa, I have to respond to this dubious accolade I just received.

I want to say that I appreciate this great compliment the gentleman paid me, particularly since I happen to be the only chairman of the Rules Committee since my great friend, that great statesman, Judge Smith, retired. I appreciate that.

In response, and in the same spirit, I would like to say to my friend—and I hope I do not offend anyone whose name I might mention—the gentleman from Massachusetts has been the greatest campaign manager of any candidate for the Presidency prior to the Massachusetts primary.

Mr. BURKE of Massachusetts. Mr. Speaker, will the gentleman yield?

Mr. COLMER. I am sorry; there must be an end to this someplace. We will finish this later.

Mr. Speaker, I now yield to my friend from Iowa, my great leader, a man whom I frequently follow.

Mr. GROSS. If we can get this discussion out of politics and back on the track, I should like to ask if the gentleman is giving us the official word of the leadership of the House that, unless this resolution is adopted, we will be in session this coming Saturday and next week. Is that what the gentleman is saying?

Mr. COLMER. What I am saying to my friend is that this is my understanding. I am not authorized to speak for the leadership. It is my understanding that this matter has to be disposed of before we recess.

Mr. GROSS. What matter?

Mr. COLMER. The conference report that the gentleman and so many others have been talking about here.

Mr. GROSS. I am not limiting my opposition to this rule, and it is not limited to the conference report from the Committee on Banking and Currency. The chairman of that committee knew that law would expire on August 1. The chairman could have had a bill on the House floor weeks ago.

I continue to wonder if we are being threatened that, unless we pass this specific resolution here today, we will be kept in session next week. This word I would like to have from the lips of the leadership.

Mr. COLMER. That is where the gentleman will have to get it, because I am not authorized to speak for the leadership.

Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER. The question is on the resolution.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. BURKE of Massachusetts. Mr.

Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members, and the Clerk will call the roll.

The question was taken; and there were—yeas 159, nays 223, not voting 50, as follows:

So the resolution was rejected.

The Clerk announced the following pairs:

Mr. Hébert with Mr. Rhodes.

Mr. Rooney of New York with Mr. Frelinghuysen.

Mrs. Hansen of Washington with Mrs. Dwyer.

Mr. Staggers with Mr. Davis of Wisconsin.

Mr. O'Neill with Mr. Conte.

Mr. Nichols with Mr. Edwards of Alabama.

Mr. Clay with Mr. Ryan.

Mr. Edmondson with Mr. Clancy.

Mr. Hagan with Mr. Keith.

Mr. Lennon with Mr. Betts.

Mr. Leggett with Mr. Harvey.

Mr. Hull with Mr. Baker.

Mr. Waldie with Mr. Hogan.

Mr. Harrington with Mrs. Heckler of Massachusetts.

Mr. Anderson of Tennessee with Mr. Lent.

Mr. Abourezk with Mr. Badillo.

Mr. Carney with Mr. Michel.

Mr. Landrum with Mr. Carter.

Mr. Passman with Mr. Riegle.

Mr. McMillan with Mr. Chamberlain.

Mr. Rarick with Mr. Pelly.

Mr. Long of Louisiana with Mr. Rousselot.

Mr. Gallagher with Mr. McCloskey.

Mr. Springer with Mr. Schmitz.

Messrs. JAMES V. STANTON, ROY, PURCELL, POAGE, SCHERLE, and ROBERTS changed their votes from "nay" to "yea."

Mrs. GRIFFITHS and Messrs. RODINO, PATTEN, TAYLOR, and SKUBITZ changed their votes from "yea" to "nay."

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States was communicated to the House by Mr. Geisler, one of his secretaries, who also informed the House that on August 14, 1972, the President approved and signed bills of the House of the following titles:

H.R. 631. An act for the relief of the village of River Forest, Ill.;

H.R. 15093. An act making appropriations for the Department of Housing and Urban Development; for space, science, veterans, and certain other independent executive agencies, boards, commissions, corporations, and offices for the fiscal year ending June 30, 1973, and for other purposes; and

H.R. 15635. An act to assist elementary and secondary schools, community agencies, and other public and nonprofit private agencies to prevent juvenile delinquency, and for other purposes.

APPOINTMENT OF CONFEREES ON H.R. 12652, COMMISSION ON CIVIL RIGHTS

Mr. CELLER. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 12652) to extend the life of the Commission on Civil Rights, to expand the jurisdiction of the Commission to include discrimination because of sex, to authorize appropriations for the Commission, and for other purposes, with Senate amendments thereto, disagree with the Senate amendments, and request a conference with the Senate thereon.

The SPEAKER. Is there objection to the request of the gentleman from New York? The Chair hears none, and appoints the following conferees: Messrs. CELLER, BROOKS, HUNGATE, MCCULLOCH, and HUTCHINSON.

CONFERENCE REPORT ON S. 3323, NATIONAL HEART, BLOOD VESSEL, LUNG, AND BLOOD ACT OF 1972

Mr. MACDONALD of Massachusetts (on behalf of Mr. STAGGERS) filed the following conference report and statement on the bill (S. 3323) to amend the Public Health Service Act to enlarge the authority of the National Heart and Lung Institute in order to advance the national attack against diseases of the heart and blood vessels, the lungs, and blood, and for other purposes:

CONFERENCE REPORT (H. REPT. No 92-1349)

The committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 3323) to amend the Public Health Service Act to enlarge the authority of the National Heart and Lung Institute in order to advance the national attack against diseases of the heart and blood vessels, the lungs, and blood, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its disagreement to the amendment of the House and agree to the same with an amendment as follows: In lieu of the matter proposed to be inserted by the House amendment insert the following:

SHORT TITLE

SECTION 1. This Act may be cited as the "National Heart, Blood Vessel, Lung, and Blood Act of 1972".

FINDINGS AND DECLARATION OF PURPOSES

SEC. 2. (a) Congress finds and declares that—

(1) diseases of the heart and blood vessels collectively cause more than half of all the deaths each year in the United States and the combined effect of the disabilities and deaths from such diseases is having a major social and economic impact on the Nation;

(2) elimination of heart and blood vessel diseases as significant causes of disability and death could increase the average American's life expectancy by about eleven years and could provide for annual savings to the economy in lost wages, productivity, and costs of medical care of more than $30,000,000,000 per year;

(3) chronic lung diseases have been gaining steadily in recent years as important causes of disability and death, with emphysema alone being the fastest rising cause of death in the United States;

(4) chronic respiratory diseases affect an estimated ten million Americans, emphysema an estimated one million, chronic bronchitis an estimated four million, and asthma an estimated five million;

(5) thrombosis (the formation of blood clots in the vessels) may cause, directly or in combination with other problems, many deaths and disabilities from heart disease and stroke which can now be prevented;

(6) blood and blood products are essential human resources whose value in saving life and promoting health cannot be assessed in terms of dollars;

(7) the provision of prompt and effective emergency medical services utilizing to the fullest extent possible advances in transportation and communications and other electronic systems and specially trained professional and paraprofessional health care personnel can reduce substantially the number of fatalities and severe disabilities due to critical illnesses in connection with heart, blood vessel, lung, and blood diseases; and

(8) the greatest potential for advancement against heart, blood vessel, lung, and blood diseases lies in the National Heart and Lung Institute, but advancement against such diseases depends not only on the research programs of that Institute but also on the research programs of other research institutes of the National Institutes of Health.

(b) It is the purpose of this Act to enlarge the authority of the National Heart and Lung Institute in order to advance the national attack upon heart, blood vessel, lung, and blood diseases.

HEART, BLOOD VESSEL, LUNG, AND BLOOD DISEASE PROGRAMS

SEC. 3. Part B of title IV of the Public Health Service Act is amended (1) by redesignating section 413 as section 419A, (2) by redesignating section 414 as section 418, and (3) by adding after section 412 the following new sections:

"NATIONAL HEART, BLOOD VESSEL, LUNG, AND BLOOD DISEASE PROGRAM

"SEC. 413. (a) The Director of the Institute, with the advice of the Council, shall develop a plan for a National Heart, Blood Vessel, Lung, and Blood Disease Program (hereafter in this part referred to as the 'Program') to expand, intensify, and coordinate the activities of the Institute respecting heart, blood vessel, lung, and blood diseases (including its activities under section 412) and shall carry out the Program in accordance with such plan. The Program shall be coordinated with the other research institutes of the National Institutes of Health to the extent that they have responsibilities respecting such diseases and shall provide for—

"(1) investigation into the epidemiology, etiology, and prevention of all forms and aspects of heart, blood vessel, lung, and blood diseases, including investigations into the social, environmental, behavioral, nutritional, biological, and genetic determinants and influences involved in the epidemiology, etiology, and prevention of such diseases;

"(2) studies and research into the basic biological processes and mechanisms involved in the underlying normal and abnormal heart, blood vessel, lung, and blood phenomena;

"(3) research into the development, trial, and evaluation of techniques, drugs, and devices (including computers) used in, and approaches to, the diagnosis, treatment (including emergency medical service), and prevention of heart, blood vessel, lung, and blood diseases and the rehabilitation of patients suffering from such diseases;

"(4) establishment of programs that will focus and apply scientific and technological efforts involving biological, physical, and engineering sciences to all facets of heart, blood vessel, lung, and blood diseases with emphasis on refinement, development, and evaluation of technological devices that will assist, replace, or monitor vital organs and improve instrumentation for detection, diagnosis, and treatment of those diseases;

"(5) establishment of programs for the conduct and direction of field studies, large-scale testing and evaluation, and demonstration of preventive, diagnostic, therapeutic, and rehabilitative approaches to, and emergency medical services for, such diseases;

"(6) studies and research into blood diseases and blood, and into the use of blood for clinical purposes and all aspects of the management of its resources in this country, including the collection, preservation, fractionalization, and distribution of it and its products;

"(7) the education and training of scientists, clinicians, and educators, in fields and specialties (including computer sciences) requisite to the conduct of programs respecting heart, blood vessel, lung, and blood diseases;

"(8) public and professional education relating to all aspects of such diseases and the use of blood and blood products and the management of blood resources;

"(9) establishment of programs for study and research into heart, blood vessel, lung, and blood diseases of children (including cystic fibrosis, hyaline membrane, and hemolytic and hemophilic diseases) and for the development and demonstration of diagnostic, treatment, and preventive approaches to these diseases; and

"(10) establishment of programs for study, research, development, demonstrations and evaluation of emergency medical services for people who become critically ill in connection with heart, blood vessel, lung, or blood diseases, which programs shall include programs for (A) the training of paraprofessionals in (i) emergency treatment procedures, and (ii) utilization and operation of emergency medical equipment, (B) the development and operation of (i) mobile critical care units (including helicopters and other airborne units where appropriate), (ii) radio, telecommunications, and other means of communications, and (iii) electronic monitoring systems, and (C) the coordination with other community services and agencies in the joint use of all forms of emergency vehicles, communications systems, and other appropriate services.

The Program shall give special emphasis to the continued development in the Institute of programs relating to atherosclerosis, hypertension, thrombosis, and congenital abnormalities of the blood vessels as causes of stroke, and to effective coordination of such programs with related stroke programs in the National Institute of Neurological Diseases and Stroke.

"(b)(1) The plan required by subsection (a) of this section shall (A) be developed within one hundred and eighty days after the effective date of this section, (B) be transmitted to the Congress, and (C) set out the Institute's staff requirements to carry out the Program and recommendations for appropriations for the Program.

"(2) The Director of the Institute shall, as soon as practicable after the end of each calendar year, prepare in consultation with the Council and submit to the President for transmittal to the Congress a report on the activities, progress, and accomplishments under the Program during the preceding calendar year and a plan for the Program during the next five years.

"(c) In carrying out the Program, the Director of the Institute, under policies established by the Director of the National Institutes of Health and after consultation with the Council and without regard to any other provision of this Act, may—

"(1) if authorized by the Council, obtain (in accordance with section 3109 of title 5, United States Code, but without regard to the limitation in such section on the number of days or the period of such service) the services of not more than fifty experts or consultants who have scientific or professional qualifications;

"(2) acquire, construct, improve, repair, operate, and maintain heart, blood vessel, lung, and blood disease laboratory, research, training, and other necessary facilities and equipment, and related accommodations as may be necessary, and such other real or personal property (including patents) as the Director deems necessary; and acquire, without regard to the Act of March 3, 1877 (40 U.S.C. 34), by lease or otherwise, through the Administrator of General Services, buildings or parts of buildings in the District of Columbia or communities located adjacent to the District of Columbia for the use of the Institute for a period not to exceed ten years; and

"(3) enter into such contracts, leases, cooperative agreements, or other transactions, without regard to sections 3648 and 3709 of the Revised Statutes of the United States (31 U.S.C. 529, 41 U.S.C. 5), as may be necessary in the conduct of his functions, with any public agency, or with any person, firm, association, corporation, or educational institution.

"(d) There shall be in the Institute an Assistant Director for Health Information Programs who shall be appointed by the Director of the Institute. The Director of the Institute, acting through the Assistant Director for Health Information Programs, shall conduct a program to provide the public and the health professions with health information with regard to cardiovascular and pulmonary diseases. In the conduct of such program, special emphasis shall be placed upon dissemination of information regarding diet, exercise, stress, hypertension, cigarette smoking, weight control, and other factors affecting the prevention of arteriosclerosis and other cardiovascular diseases and of pulmonary diseases.

"HEART, BLOOD VESSEL, LUNG, AND BLOOD DISEASE PREVENTION AND CONTROL PROGRAMS

"SEC. 414. (a) The Director of the Institute, under policies established by the Director of the National Institutes of Health and after consultation with the Council, shall establish programs as necessary for cooperation with other Federal health agencies, State, local, and regional public health agencies, and nonprofit private health agencies in the diagnosis, prevention, and treatment (including the provision of emergency medical services) of heart, blood vessel, lung, and blood diseases, appropriately emphasizing the prevention, diagnosis, and treatment of such diseases of children.

"(b) There is authorized to be appropriated to carry out this section $25,000,000 for the fiscal year ending June 30, 1973, $35,000,000 for the fiscal year ending June 30, 1974, and $45,000,000 for the fiscal year ending June 30, 1975.

"NATIONAL RESEARCH AND DEMONSTRATION CENTERS FOR HEART, BLOOD VESSEL, LUNG, AND BLOOD DISEASES

"SEC. 415. (a) (1) The Director of the Institute may provide for the development of—

"(A) fifteen new centers for basic and clinical research into, training in, and demonstration of, advanced diagnostic, prevention, and treatment methods (including methods of providing emergency medical services) for heart, blood vessel, and blood diseases; and

"(B) fifteen new centers for basic and clinical research into, training in, and demonstration of, advanced diagnostic, prevention, and treatment methods (including methods of providing emergency medical services) for chronic lung diseases (including bronchitis, emphysema, asthma, cystic fibrosis, and other lung diseases of children).

"(2) The centers developed under paragraph (1) (A) shall, in addition to being utilized for research, training, and demonstrations, be utilized for the following prevention programs for cardiovascular diseases:

"(A) Programs to develop improved methods of detecting individuals with a high risk of developing cardiovascular disease.

"(B) Programs to develop improved methods of intervention against those factors which cause individuals to have a high risk of developing such disease.

"(C) Programs to develop health professions and allied health professions personnel highly skilled in the prevention of such disease.

"(D) Programs to develop improved methods of providing emergency medical services for persons with such disease.

"(3) Centers developed under this subsection may be supported under subsection (b) or under any other applicable provision of law. The research, training, and demonstration activities carried out through any such center may relate to any one or more of the diseases referred to in paragraph (1) of this subsection.

"(b) The Director of the Institute, under policies established by the Director of the National Institutes of Health and after consultation with the Council, may enter into cooperative agreements with public or nonprofit private agencies or institutions to pay all or part of the cost of planning, establishing, or strengthening, and providing basic operating support for, existing or new centers (including centers established under subsection (a)) for basic or clinical research into, training in, and demonstration of, advanced diagnostic, prevention, and treatment methods for heart, blood vessel, lung, or blood diseases. Funds paid to centers under cooperative agreements under this subsection may be used for—

"(1) construction, notwithstanding section 405,

"(2) staffing and other basic operating costs, including such patient care costs as are required for research,

"(3) training, including training for allied health professions personnel, and

"(4) demonstration purposes.

The aggregate of payments (other than payments for construction) made to any center under such an agreement may not exceed $5,000,000 in any year. Support of a center under this subsection may be for a period of not to exceed five years and may be extended by the Director of the Institute for additional periods of not more than five years each, after review of the operations of such center by an appropriate scientific review group established by the Director. As used in this section, the term 'construction' does not include the acquisition of land.

"INTERAGENCY TECHNICAL COMMITTEE

"SEC. 416. (a) The Secretary shall establish an Interagency Technical Committee on Heart, Blood Vessel, Lung and Blood Diseases and Blood Resources which shall be responsible for coordinating those aspects of all Federal health programs and activities relating to heart, blood vessel, lung, and blood diseases and to blood resources to assure the adequacy and technical soundness of such programs and activities and to provide for the full communication and exchange of information necessary to maintain adequate coordination of such programs and activities.

"(b) The Director of the Institute shall serve as Chairman of the Committee and the Committee shall include representation from all Federal departments and agencies whose programs involve health functions or responsibilities as determined by the Secretary.

"NATIONAL HEART AND LUNG ADVISORY COUNCIL

SEC. 417. (a) There is established in the Institute a National Heart and Lung Advisory Council to be composed of twenty-three members as follows:

"(1) The Secretary, the Director of the National Institutes of Health, the Director of the Office of Science and Technology, and the chief medical officer of the Veterans' Administration (or their designees), and a medical officer designated by the Secretary of Defense, shall be ex officio members of the Council.

"(2) Eighteen members appointed by the Secretary.

Eleven of the appointed members shall be selected from among the leading medical or scientific authorities who are skilled in the sciences relating to diseases of the heart, blood vessels, lungs, and blood; two of the appointed members shall be selected from persons enrolled in residency programs providing training in heart, blood vessel, lung, or blood diseases; and five of the appointed members shall be selected from members of the general public who are leaders in the fields of fundamental or medical sciences or in public affairs.

"(b) (1) Each appointed member of the Council shall be appointed for a term of four years, except that—

"(A) any member appointed to fill a vacancy occurring prior to the expiration of the term for which his predecessor was appointed shall be appointed for the remainder of such term; and

"(B) of the members first appointed after the effective date of this section, five shall be appointed for a term of four years, five shall be appointed for a term of three years, five shall be appointed for a term of two years, and three shall be appointed for a term of one year, as designated by the Secretary at the time of appointment.

Appointed members may serve after the expiration of their terms until their successors have taken office.

"(2) A vacancy in the Council shall not affect its activities, and twelve members of the Council shall constitute a quorum.

"(3) The Council shall supersede the existing National Advisory Heart Council appointed under section 217, and the appointed members of the National Advisory Heart Council serving on the effective date of this section shall serve as additional members of the National Heart and Lung Advisory Council for the duration of their terms then existing, or for such shorter time as the Secretary may prescribe.

"(4) Members of the Council who are not officers or employees of the United States shall receive for each day they are engaged in the performance of the functions of the Council compensation at rates not to exceed the daily equivalent of the annual rate in effect for grade GS-18 of the General Schedule, including traveltime; and all members, while so serving away from their homes or regular places of business, may be allowed travel expenses, including per diem in lieu of subsistence, in the same manner as such expenses are authorized by section 5703 of title 5, United States Code, for persons in the Government service employed intermittently.

"(c) The Secretary (or his designee) shall be the Chairman of the Council.

"(d) The Director of the Institute shall (1) designate a member of the staff of the Institute to act as Executive Secretary of the Council, and (2) make available to the Council such staff, information, and other assistance as it may require to carry out its functions.

"(e) The Council shall meet at the call of the Chairman, but not less often than four times a year."

AUTHORIZATION OF APPROPRIATIONS FOR PART B OF TITLE IV OF THE PUBLIC HEALTH SERVICE ACT

SEC. 4. Part B of title IV of the Public Health Service Act is amended by adding at the end thereof the following new section:

"AUTHORIZATION OF APPROPRIATIONS

"SEC. 419B. For the purpose of carrying out this part (other than section 414), there is authorized to be appropriated $375,000,000 for the fiscal year ending June 30, 1973, $425,000,000 for the fiscal year ending June 30, 1974, and $475,000,000 for the fiscal year ending June 30, 1975. Of the sums appropriated under this section for any fiscal year, not less than 15 per centum of such sums shall be reserved for programs under this part respecting diseases of the lung and not less than 15 per centum of such sums shall be reserved for programs under this part for programs respecting diseases of the blood."

AUTHORITY OF THE DIRECTOR OF THE NATIONAL HEART AND LUNG INSTITUTE TO APPROVE GRANTS

SEC. 5. Section 419A of the Public Health Service Act (as so redesignated by section 3 of this Act) is amended—

(1) by striking out "grants-in-aid" in subsection (a) and inserting in lieu thereof "except as provided in subsection (c), grants-in-aid"; and

(2) by adding after subsection (b) the following new subsection:

"(c) Under procedures approved by the Director of the National Institutes of Health, the Director of the National Heart and Lung Institute may approve grants under this Act for research and training in heart, blood vessel, lung, and blood diseases—

"(1) in amounts not to exceed $35,000 after appropriate review for scientific merit but without review and recommendation by the Council, and

"(2) in amounts exceeding $35,000 after appropriate review for scientific merit and recommendation for approval by the council."

CONFORMING AMENDMENTS TO PART B OF TITLE IV OF THE PUBLIC HEALTH SERVICE ACT

SEC. 6. (a) Section 411 of the Public Health Service Act is amended by striking out "National Heart Institute" and inserting in lieu thereof "National Heart and Lung Institute".

(b) Section 412 of such Act is amended—

(1) by striking out "heart" each place it occurs (except in the heading) and inserting in lieu thereof "heart, blood vessel, lung, and blood";

(2) by striking out "Surgeon General" and inserting in lieu thereof "Secretary";

(3) by striking out "National Advisory Heart Council" and inserting in lieu thereof "National Heart and Lung Advisory Council";

(4) by redesignating paragraphs (a), (b), (c), (d), (e), (f), and (g) as paragraphs (1), (2), (3), (4), (5), (6), and (7), respectively; and

(5) by amending the section heading to read as follows:

"RESEARCH AND TRAINING IN DISEASES OF THE HEART, BLOOD VESSELS, LUNG, AND BLOOD"

(c) Section 418 of such Act (as so redesignated by section 3 of this Act) is amended—

(1) by inserting "(a)" immediately after "SEC. 418." and by adding at the end thereof the following new subsection:

"(b) (1) The Council shall advise and assist the Director of the Institute with respect to the Program established under section 413. The Council may hold such hearings, take such testimony, and sit and act at such times and places, as the Council deems advisable to investigate programs and activities of the Program.

"(2) The Council shall submit a report to the President for transmittal to the Congress not later than January 31 of each year on the progress of the Program toward the accomplishment of its objectives."

(2) by striking out "Surgeon General" each place it occurs (except paragraph (f)) and inserting in lieu thereof "Secretary";

(3) by striking out "heart" each place it occurs and inserting in lieu thereof "heart, blood vessel, lung, and blood";

(4) by striking out "Surgeon General" in paragraph (f) and inserting in lieu thereof "Secretary, the Director of the National Institutes of Health, and the Director of the National Heart and Lung Institute"; and

(5) by redesignating paragraphs (a), (b), (c), (d), (e), and (f) as paragraphs (1), (2), (3), (4), (5), and (6), respectively.

(d) Section 419A of such Act (as so redesignated by section 3 of this Act) is amended—

(1) in subsection (a), by (A) striking out "Surgeon General" and inserting in lieu thereof "Secretary", and (B) striking out "heart" and inserting in lieu thereof "heart, blood vessel, lung, and blood"; and

(2) in subsection (b), by (A) striking out "The Surgeon General shall recommend to the Secretary acceptance of conditional gifts, pursuant to section 501," and inserting in lieu thereof "The Secretary may, in accordance with section 501, accept conditional gifts", and (B) striking out "heart" and inserting in lieu thereof "heart, blood vessel, lung, and blood".

(e) The heading for part B of such Act is amended to read as follows:

"PART B—NATIONAL HEART AND LUNG INSTITUTE"

CONFORMING AMENDMENTS TO OTHER PROVISIONS OF THE PUBLIC HEALTH SERVICE ACT

SEC. 7. (a) Section 217 of such Act is amended—

(1) by striking out "the National Advisory Heart Council," each place it occurs in subsection (a);

(2) by striking out "heart diseases" in subsection (a) and by striking out "heart," in subsection (b).

(b) Sections 301(d) and 301(i) of such Act are each amended by striking out "National Advisory Heart Council" and inserting in lieu thereof "National Heart and Lung Advisory Council".

REPORT TO CONGRESS

SEC. 8. The Secretary of Health, Education, and Welfare shall carry out a review of all administrative processes under which the National Heart, Blood Vessel, Lung, and Blood Disease Program, established under part B of title IV of the Public Health Service Act, will operate, including the processes of advisory council and peer group reviews, in order to assure the most expeditious accomplishment of the objectives of the Program. Within one year of the date of enactment of this Act, the Secretary shall submit a report to the Congress of the findings of such review and the actions taken to facilitate the conduct of the Program, together with recommendations for any needed legislative changes.

EFFECTIVE DATE

SEC. 9. This Act and the amendments made by this Act shall take effect sixty days after the date of enactment of this Act or on such prior date after the date of enactment of this Act as the President shall prescribe and publish in the Federal Register.

And the House agree to the same.

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and the Senate at the conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 3323) to amend the Public Health Service Act to enlarge the authority of the National Heart and Lung Institute in order to advance the national attack against diseases of the heart and blood vessels, the lungs, and blood, and for other purposes, submit the following joint statement to the House and the Senate in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report:

I.—FINDINGS AND DECLARATIONS OF PURPOSE

(1) In certain instances in the bill and the amendments to part B of title IV of the Public Health Service Act, the Senate bill refers to "cardiovascular and pulmonary diseases".

In general, the House amendment substitutes "heart, blood vessel, and lung diseases" for "cardiovascular and pulmonary diseases".

The conference substitute adopts the terminology of the House amendment.

(2) The Senate bill contains a finding with regard to utilization of emergency medical services.

The House amendment has no comparable finding.

The conference substitute adopts the provision of the Senate bill.

(3) The Senate bill contains a finding with regard to the potential for advancement against diseases of the heart and blood vessels, the lungs, and blood in the National Heart and Lung Institute.

The House amendment is the same as the Senate finding, but also emphasizes the roles played by other research institutes within the National Institutes of Health.

The conference substitute adopts the provision of the House amendment.

II.—HEART, BLOOD VESSEL, LUNG, AND BLOOD DISEASE PROGRAMS

(1) The Senate bill does not require the National Heart, Blood Vessel, Lung, and Blood Disease Program to be coordinated with other relevant programs in the National Institutes of Health.

The House amendment requires the Director of the Institute to carry out the Program in coordination with other relevant programs within the National Institutes of Health.

The conference substitute adopts the provision of the House amendment.

(2) The Senate bill requires research into the development, trial, and evaluation of techniques, drugs, and devices used in, and approaches to, the diagnosis, prevention, and treatment of the diseases and includes a reference to emergency medical services as a form of treatment.

The House amendment is similar to the Senate bill, except that it includes a reference to computers as a type of device and contains no reference to emergency medical services.

The conference substitute includes the references in the Senate bill and in the House amendment.

(3) The Senate bill establishes programs to refine, develop, and evaluate technological devices and instrumentation for diagnosis, detection, and treatment of cardiovascular, pulmonary, and related diseases.

The House amendment has no comparable provision.

The conference substitute adopts the provision of the Senate bill, conforming the terminology to the House amendment.

(4) The Senate bill provides for the establishment of centers for testing, evaluation, and demonstration of preventive, diagnostic, therapeutic, and rehabilitative approaches (including emergency medical services) to cardiovascular and pulmonary diseases.

The House amendment is similar except that it does not authorize the establishment of centers and it contains no reference to emergency medical services.

The conference substitute adopts the provision of the House amendment but with a reference to emergency medical services.

(5) The Senate bill provides for studies and research into blood diseases such as sickle cell anemia and hemophilia.

The House amendment is similar to the Senate bill except that it does not specifically refer to sickle cell anemia and hemophilia.

The conference substitute adopts the provision of the House amendment. The conferees gave serious consideration to including in the legislation the reference to sickle cell anemia and hemophilia. The deletion of such reference in the conference substitute does not in any way exclude the study of such diseases from the scope of this legislation. In fact, it is the intention of the conferees that such studies and research include sickle cell anemia, hemophilia, Cooley's anemia, and similar diseases of the blood.

(6) The Senate bill provides for the education and training of scientists, clinicians, and educators in fields and specialties relevant to programs under this legislation.

The House amendment is similar to the Senate bill except that it does not include the education of educators, and refers to computer sciences as a speciality for which education and training is authorized.

The conference substitute combines the provision of the Senate bill and the House amendment.

(7) The Senate bill provides for the establishment of programs and centers for study and research with regard to cardiovascular, pulmonary, and blood diseases of children.

The House amendment provides for the establishment of only programs for such study and research.

The conference substitute adopts the provision of the House amendment.

(8) The Senate bill provides for programs for the study, research, development, demonstrations, and evaluation of emergency medical services for persons who sustain critical illnesses in connection with heart, blood vessel, lung, or blood diseases, including training and related programs.

The House amendment is similar, except that it does not provide for the establishment of development and demonstration programs and contains no reference to training and related programs.

The conference substitute adopts the provisions of the Senate bill.

(9) The House amendment specifies that the National Heart, Blood Vessel, Lung, and Blood Disease Program shall give special emphasis to programs in the National Heart and Lung Institute dealing with the underlying causes of stroke and to coordination with related programs at the National Institute of Neurological Diseases and Stroke.

The Senate bill has no comparable provision.

The conference substitute adopts the provision of the House amendment.

(10) The House amendment provides that the Director of the National Heart and Lung Institute shall carry out the program in accordance with policies established by the Director of the National Institutes of Health.

The Senate bill has no comparable provision.

The conference substitute adopts the provision of the House amendment.

(11) The Senate bill authorizes the Director of the National Heart and Lung Institute to acquire, construct, improve, repair, operate, and maintain cardiovascular and pulmonary disease centers, laboratories, research, training, and other necessary facilities and equipment.

The House amendment is similar, except that it does not give authority for centers and for training facilities and equipment. In addition, it makes it clear that the authority may be exercised in connection with blood disease activities.

The conference substitute adopts the provision of the House amendment, except that the authority for training facilities and equipment is included. The conferees intend that training programs conducted with the use of facilities and equipment authorized by this provision are not to be considered as substitutes for training programs authorized by title VII or VIII of the public Health Service Act.

(12) The Senate bill establishes an Office of Heart and Lung Health Education within the Department of Health, Education, and Welfare.

The House amendment requires the Director of the National Heart and Lung Institute to conduct an information program for the public and health professions with regard to cardiovascular and pulmonary diseases.

The conference substitute adopts the provision of the House amendment, except that it establishes in the Institute the position of Assistant Director for Health Information through whom the program authorized by this provision is to be carried out.

III. HEART, BLOOD VESSEL, LUNG, AND BLOOD DISEASE PREVENTION, AND CONTROL PROGRAMS

(1) The Senate bill includes a reference to emergency medical services as a form of treatment.

The House amendment does not include such a reference.

The conference substitute adopts the provision of the Senate bill.

(2) The Senate bill provides in a separate provision for the establishment of 10 model cardiovascular disease prevention clinics in the United States for the purpose of—

(1) improving methods of detecting high risk individuals;

(2) improving methods of intervention against risk factors;

(3) developing cardiovascular disease manpower; and

(4) developing improved methods of providing emergency medical services.

The House amendment contains no comparable provision.

The conference substitute contains no separate provision for the establishment of such clinics but includes their prevention functions as an additional specific responsibility for the research, training, and demonstration centers authorized by the new section 415 of the Public Health Service Act (see item IV *infra*).

(3) The Senate bill authorizes appropriations for heart, blood vessel, lung, and blood disease prevention and control programs of $30 million for fiscal year 1973; $40 million for fiscal year 1974; and $50 million for fiscal year 1975.

The House amendment authorizes appropriations for similar programs of $20 million in fiscal year 1973; $30 million for fiscal year 1974; and $40 million for fiscal year 1975.

The conference substitute authorizes appropriations for such programs of $25 million for fiscal year 1973; $35 million for fiscal year 1974; and $45 million for fiscal year 1975.

IV.—NATIONAL RESEARCH AND DEMONSTRATION CENTERS FOR HEART, BLOOD VESSEL, LUNG, AND BLOOD DISEASES

(1) The Senate bill authorizes the development of 15 new research, training, and demonstration centers for advanced diagnosis and treatment methods for cardiovascular diseases, and also authorizes the development of 15 new centers for such activities regarding chromic pulmonary diseases. Emergency medical services are referred to as a type of treatment method which may be included in programs of such centers.

The House amendment is similar, except that the centers may be used for prevention methods and there is no specific reference to emergency medical services.

The conference substitute combines the provisions of the Senate bill and the House amendment.

(2) The House amendment permits such centers to be utilized in connection with activities respecting any of the diseases with which this legislation is concerned.

The Senate bill contains no comparable provision.

The conference substitute adopts the provision of the House amendment.

(3) The House amendment makes it clear that such centers may be used for basic as well as clinical research.

The Senate bill contains no comparable provision.

The conference substitute adopts the provision of the House amendment.

V.—CONSTRUCTION

The House amendment specifically states that the term "construction" does not include the acquisition of land.

The Senate bill contains no comparable provision.

The conference substitute adopts the provision of the House amendment.

VI.—NATIONAL HEART AND LUNG ADVISORY COUNCIL

(1) The Senate bill establishes a National Heart and Lung Advisory Council consisting of 23 members. The Secretary, the Director of the National Institutes of Health, the Director of the Office of Science and Technology, the chief medical officer of the Veterans' Administration, and a medical officer designated by the Secretary of Defense are to be ex officio members of the Council. In addition there are to be 18 members appointed by the Secretary. Of the appointed members not more than 12 shall be medical or scientific authorities in relevant disciplines and not more than eight shall be members of the general public.

The House amendment also establishes such a Council, except that the Directors of NIH and OST are not included as ex officio members and of the appointed members nine shall be medical or scientific authorities; two shall be enrolled in relevant residency programs; and seven shall be members of the general public and leaders in their fields.

The conference substitute adopts the provision of the Senate bill, except that of the appointed members 11 shall be medical and scientific authorities in relevant disciplines; two shall be enrolled in relevant residency programs; and five shall be members of the general public and leaders in their fields.

(2) The Senate bill provides that a quorum of the Council shall consist of 12 members.

The House amendment provides that a quorum of the Council shall consist of 11 members.

The conference substitute adopts the provision of the Senate bill.

(3) The Senate bill provides that the Chairman of the Council shall be appointed by the Secretary of Health, Education, and Welfare from among the members of the Council and shall serve for 2 years.

The House amendment provides that the Secretary of Health, Education, and Welfare, or his designee, shall be Chairman of the Council.

The conference substitute adopts the provision of the House amendment.

(4) The Senate amendment provides that the Council shall meet at the call of the Director of the National Heart and Lung Institute or the Chairman.

The House amendment provides that the Council shall meet at the call of the Chairman.

The conference substitute adopts the provision of the House amendment.

VII.—AUTHORIZATION OF APPROPRIATIONS

(1) The Senate bill authorizes appropriation for this legislation (exclusive of section 414) of $400 million for fiscal year 1973; $450 million for fiscal year 1974; and $500 million for fiscal year 1975.

The House amendment authorizes appropriations for this legislation (exclusive of section 414) of $350 million for fiscal year 1973; $400 million for fiscal year 1974; and $450 million for fiscal year 1975.

The conference substitute authorizes appropriations for this legislation (exclusive of section 414) of $375 million for fiscal year 1973; $425 million for fiscal year 1974; and $475 million for fiscal year 1975.

(2) The Senate bill provides that not less than 20 percent of the funds annually appropriated under this section shall be reserved for programs in diseases of the lung and not less than 20 percent for programs in diseases of the blood. In addition the Secretary of Health, Education, and Welfare has discretionary authority to transfer not more than 10 percent of the allotted funds from any program or activity under part B of title

IV of the Public Health Service Act to any other program or activity under the same title.

The House amendment has no comparable provisions.

The conference substitute provides that of the funds annually appropriated under this section not less than 15 percent shall be reserved for programs in diseases of the lung and not less than 15 percent shall be reserved for programs in diseases of the blood.

CONFERENCE REPORT ON H.R. 2, UNIFORMED SERVICES HEALTH PROFESSIONS REVITALIZATION ACT

Mr. PRICE of Illinois (on behalf of Mr. HÉBERT) filed the following conference report and statement on the bill (H.R. 2) to establish a Uniformed Services University of the Health Sciences and to provide scholarships to selected persons for education in medicine, dentistry, and other health professions, and for other purposes:

CONFERENCE REPORT (H. REPT. No. 92–1350)

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 2) to establish a Uniformed Services University of the Health Sciences and to provide scholarships to selected persons for education in medicine, dentistry, and other health professions, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendment of the Senate to the text of the bill and agree to the same with an amendment as follows: In lieu of the matter proposed to be inserted by the Senate amendment to the text of the bill insert the following:

That this Act may be cited as the "Uniformed Services Health Professions Revitalization Act of 1972".

SEC. 2. (a) Title 10, United States Code, is amended by adding the following new chapters after chapter 103:

"CHAPTER 104.—UNIFORMED SERVICES UNIVERSITY OF THE HEALTH SCIENCES

"Sec.
"2112. Establishment.
"2113. Board of regents.
"2114. Students: selection; status; obligation.
"2115. Graduates: limitation on number electing to perform civilian Federal duty.
"2116. Reports to Congress.
"2117. Authorization for appropriations.

"§ 2112. Establishment

"(a) There is hereby authorized to be established within 25 miles of the District of Columbia a Uniformed Services University of the Health Sciences (hereinafter referred to as the 'University'), at a site or sites to be selected by the Secretary of Defense, with authority to grant appropriate advanced degrees. It shall be so organized as to graduate not less than 100 medical students annually, with the first class graduating not later than 10 years after the date of the enactment of this chapter.

"(b) Except as provided in subsection (a), the numbers of persons to be graduated from the University shall be prescribed by the Secretary of Defense.

"(c) The development of the University may be by such phases as the Secretary of Defense may prescribe, subject to the requirements of subsection (a).

"§ 2113. Board of Regents

"(a) The business of the University shall be conducted by a Board of Regents (hereinafter referred to as the 'Board') with funds appropriated for and provided by the Department of Defense. The Board shall consist of—

"(1) nine persons outstanding in the fields of health and health education who shall be appointed from civilian life by the President, by and with the advice and consent of the Senate;

"(2) the Secretary of Defense, or his designee, who shall be an ex officio member;

"(3) the surgeons general of the uniformed services, who shall be ex officio members; and

"(4) the person referred to in subsection (d).

"(b) The term of office of each member of the Board (other than ex officio members) shall be six years except that—

"(1) any member appointed to fill a vacancy occurring before the expiration of the term for which his predecessor was appointed shall be appointed for the remainder of such term; and

"(2) the terms of office of the members first taking office shall expire, as designated by the President at the time of the appointment, three at the end of two years, three at the end of four years, and three at the end of six years.

"(c) One of the members of the Board (other than an ex officio member) shall be designated by the President as Chairman. He shall be the presiding officer of the Board.

"(d) The Board shall appoint a Dean of the University (hereinafter referred to as the 'Dean') who shall also serve as a nonvoting ex officio member of the Board.

"(e) Members of the Board (other than ex officio members) while attending conferences or meetings or while otherwise performing their duties as members shall be entitled to receive compensation at a rate to be fixed by the Secretary of Defense, but not exceeding $100 per diem and shall also be entitled to receive an allowance for necessary travel expenses while so serving away from their place of residence.

"(f) The Board, after considering the recommendations of the Dean, shall obtain the services of such military and civilian professors, instructors, and administrative and other employees as may be necessary to operate the University. Civilian members of the faculty and staff shall be employed under salary schedules and granted retirement and other related benefits prescribed by the Secretary of Defense so as to place the employees of the University on a comparable basis with the employees of fully accredited schools of the health professions within the vicinity of the District of Columbia. The Board may confer academic titles, as appropriate, upon military and civilian members of the faculty. The military members of the faculty shall include a professor of military, naval, or air science as the Board may determine.

"(g) The Board is authorized to negotiate agreements with agencies of the Federal Government to utilize on a reimbursable basis appropriate existing Federal medical resources located in or near the District of Columbia. Under such agreements the facilities concerned will retain their identities and basic missions. The Board is also authorized to negotiate affiliation agreements with an accredited university or universities in or near the District of Columbia. Such agreements may include provisions for payments for educational services provided students participating in Department of Defense educational programs. The Board may also, subject to the approval of the Secretary of Defense, enter into an agreement under which the University would become part of a national university of health sciences should such an institution be established in the vicinity of the District of Columbia.

"(h) The Board may establish postdoctoral, postgraduate, and technological institutes.

"(i) The Board shall also establish programs in continuing medical education for military members of the health professions to the end that high standards of health care may be maintained within the military medical services.

"§ 2114. Students: selection; status; obligation

"(a) Students at the University shall be selected under procedures prescribed by the Secretary of Defense. In so prescribing, the Secretary shall consider the recommendations of the Board. However, selection procedures prescribed by the Secretary of Defense shall emphasize the basic requirement that students demonstrate sincere motivation and dedication to a career in the uniformed services (as defined in section 1072(1) of this title).

"(b) Students shall be commissioned officers of a uniform service as determined under regulations prescribed by the Secretary of Defense after consulting with the Secretary of Health, Education, and Welfare. Notwithstanding any other provision of law, they shall serve on active duty in pay grade O-1 with full pay and allowances of that grade, but shall not be counted against any prescribed military strengths. Upon graduation they shall be appointed in a regular component, if qualified, unless they are covered by section 2115 of this title. Students who graduate shall be required, except as provided in section 2115 of this title, to serve thereafter on active duty under such regulations as the Secretary of Defense or the Secretary of Health, Education, and Welfare, as appropriate, may prescribe for not less than seven years, unless sooner released. The service credit exclusions specified in section 2126 of this title shall apply to students covered by this section.

"(c) A period of time spent in military intern or residency training shall not be creditable in satisfying an active duty obligation imposed by this section.

"(d) A member of the program who, under regulations prescribed by the Secretary of Defense, is dropped from the program for deficiency in conduct or studies, or for other reasons, may be required to perform active duty in an appropriate military capacity in accordance with the active duty obligation imposed by this section. In no case shall any such member be required to serve on active duty for any period in excess of a period equal to the period he participated in the program, except that in no case may any such member be required to serve on active duty less than one year.

"2115. Graduates: limitation on number electing to perform civilian Federal duty

"Not more than 20 percent of the graduates of any one class at the University may agree in writing to perform civilian Federal duty for not less than seven years following the completion of their professional education in lieu of active duty in a uniformed service.

Such persons shall be released from active duty upon the completion of their professional education. The location and type of their duty shall be determined by the Secretary of Defense after consultation with the heads of Federal agencies concerned.

"§ 2116. Reports to Congress

"The Secretary of Defense shall report periodically to the Committees on Armed Services of the Senate and House of Representatives on the feasibility of establishing educational institutions similar or identical to the University at any other locations he deems appropriate. The last such report shall be submitted by June 30, 1976.

"§ 2117. Authorization for appropriations

"There is hereby authorized to be appropriated to the Department of Defense for the planning, construction, development, improvement, operation, and maintenance of the University, and to otherwise accomplish the purposes of this title, for the fiscal year beginning July 1, 1972, the sum of $15,000,000, and for each fiscal year thereafter such sum as may be authorized in the annual military construction authorization Act for such year.

"Chapter 105—ARMED FORCES HEALTH PROFESSIONS SCHOLARSHIP PROGRAM

"Sec.
"2120. Definitions.
"2121. Establishment.
"2122. Eligibility for participation.
"2123. Members of the program; active duty obligation; failure to complete training; release from program.
"2124. Members of the program; numbers appointed.
"2125. Members of the program; exclusion from authorized strengths.
"2126. Members of the program; service credit.
"2127. Contracts for scholarships; payments.

"§ 2120. Definitions

"In this chapter—

"(1) 'Program' means the Armed Forces Health Professions Scholarship program provided for in this chapter.

"(2) 'Member of the program' means a person appointed a commissioned officer in a reserve component of the armed forces who is enrolled in the Armed Forces Health Professions Scholarship program.

"(3) 'Course of study' means education received at an accredited college, university, or institution in medicine, dentistry, or other health profession, leading, respectively, to a degree related to the health professions as determined under regulations prescribed by the Secretary of Defense.

"§ 2121. Establishment

"(a) For the purpose of obtaining adequate numbers of commissioned officers on active duty who are qualified in the various health professions, the Secretary of each military department, under regulations prescribed by the Secretary of Defense, may establish and maintain a health professions scholarship program for his department.

"(b) The program shall consist of courses of study in designated health professions, with obligatory periods of military training.

"(c) Persons participating in the program shall be commissioned officers in reserve components of the armed forces. Members of the program shall serve on active duty in pay grade O-1 with full pay and allowances of that grade for a period of 45 days during each year of participation in the program. They shall be detailed as students at accredited civilian institutions, located in the United States or Puerto Rico, for the purpose of acquiring knowledge or training in a designated health profession. In addition, members of the program shall, under regulations prescribed by the Secretary of Defense, receive military and professional training and instruction.

"(d) Except when serving on active duty pursuant to subsection (c), a member of the program shall be entitled to a stipend at the rate of $400 per month.

"§ 2122. Eligibility for participation

"To be eligible for participation as a member of the program, a person must be a citizen of the United States and must—

"(1) be accepted for admission to, or enrolled in, an institution in a course of study, as that term is defined in section 2120(3) of this title;

"(2) sign an agreement that unless sooner separated he will—

"(A) complete the educational phase of the program;

"(B) accept an appropriate reappointment or designation within his military service, if tendered, based upon his health profession, following satisfactory completion of the program;

"(C) participate in the intern program of his service if selected for such participation;

"(D) participate in the residency program of his service, if selected, or be released from active duty for the period required to undergo civilian residency if selected for such training; and

"(E) because of his sincere motivation and dedication to a career in the uniformed services, participate in military training while he is in the program, under regulations prescribed by the Secretary of Defense; and

"(3) meet the requirements for appointment as a commissioned officer.

"§ 2123. Members of the program: active duty obligation; failure to complete training; release from program

"(a) A member of the program incurs an active duty obligation. The amount of his obligation shall be determined under regulations prescribed by the Secretary of Defense, but those regulations may not provide for a period of obligation of less than one year for each year of participation in the program.

"(b) A period of time spent in military intern or residency training shall not be creditable in satisfying an active duty obligation imposed by this section.

"(c) A member of the program who, under regulations prescribed by the Secretary of Defense, is dropped from the program for deficiency in conduct or studies, or for other reasons, may be required to perform active duty in an appropriate military capacity in accordance with the active duty obligation imposed by this section.

"(d) The Secretary of a military department, under regulations prescribed by the Secretary of Defense, may relieve a member of the program who is dropped from the program from any active duty obligation imposed by this section, but such relief shall not relieve him from any military obligation imposed by any other law.

"(e) Any member of the program relieved of his active duty obligation under this chapter before the completion of such obligation may, under regulations prescribed by the Secretary of Defense, be assigned to an area of health manpower shortage designated by the Secretary of Health, Education, and Welfare for a period equal to the period of obligation from which he was relieved.

"§ 2124. Members of the program: numbers appointed

"The number of persons who may be designated as members of the program for training in each health profession shall be as prescribed by the Secretary of Defense, except that the total number of persons so designated in all of the programs authorized by this chapter shall not, at any time, exceed 5,000.

"§ 2125. Members of the program: exclusion from authorized strengths

"Notwithstanding any other provision of law, members of the program shall not be counted against any prescribed military strengths.

"§ 2126. Members of the program: service credit

"Service performed while a member of the program shall not be counted—

"(1) in determining eligibility for retirement other than by reason of a physical disability incurred while on active duty as a member of the program; or

"(2) in computing years of service creditable under section 205, other than subsection (a)(7) and (8), of title 37.

"§ 2127. Contracts for scholarships: payments

"(a) The Secretary of Defense may provide for the payment of all educational expenses incurred by a member of the program, including tuition, fees, books, and laboratory expenses. Such payments, however, shall be limited to those educational expenses normally incurred by students at the institution and in the health profession concerned who are not members of the program.

"(b) The Secretary of Defense may contract with an accredited civilian educational institution for the payment of tuition and other educational expenses of members of the program authorized by this chapter. Payment to such institutions may be made without regard to section 3648 of the Revised Statutes (31 U.S.C. 529).

"(c) Payments made under subsection (b) shall not cover any expenses other than those covered by subsection (a).

"(d) When the Secretary of Defense determines, under regulations prescribed by the Secretary of Health, Education, and Welfare, that an accredited civilian educational institution has increased its total enrollment for the sole purpose of accepting members of the program covered by this chapter, he may provide under a contract with such an institution for additional payments to cover the portion of the increased costs of the additional enrollment which are not covered by the institution's normal tuition and fees."

(b) The table of chapters at the beginning of subtitle A and at the beginning of part III of such subtitle of title 10, United States Code, are each amended by adding

"104. Uniformed Services University of Health Sciences.......... 2112
"105. Armed Forces Health Professions Scholarship Program.. 2120"

immediately below

"103. Senior Reserve Officers' Training Corps.................. 2101."

And the Senate agree to the same.

That the Senate recede from its amendment to the title of the bill.

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and Senate at the conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 2), to establish a Uniformed Services University of the Health Sciences and provide scholarships to selected persons for education in medicine, dentistry, and other health professions, submit the following joint statement to the House and the Senate in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report:

BACKGROUND

The House of Representatives, on November 3, 1971, by a vote of 351 Yeas to 31 Nays, passed and sent to the Senate the bill H.R. 2.

The Senate, on June 6, 1972, amended H.R. 2 by striking all after the enacting clause and substituting new language in the form of an amendment.

As a consequence of the Senate action, there existed a number of major differences in the House and Senate versions of H.R. 2. Each of these substantive differences are identified below, together with an explanation of the action taken thereon in the conference to resolve the differences.

Difference No. 1—The Uniformed Services University of the Health Sciences

Under the House-passed bill, authority was provided to establish the university within a radius of 25 miles of the District of Columbia. The university would be so organized as to graduate not less than 100 medical students annually, with the first class graduating not less than ten years after enactment of the legislation.

The Senate amendment deleted authority for the establishment of a Uniformed Services University of the Health Sciences, and substituted a provision providing for "a feasibility study" to determine the desirability of establishing such a university as provided in the House language. The "feasibility study" proposed by the Senate amendment was essentially designed to re-examine the entire proposal as contained in the House-passed bill. In accordance with the Senate language, the study was to be conducted by the Secretary of Defense and the results reported back to the President and the Congress not later than one year after the date of enactment of the Act.

A detailed explanation of the differing views of the respective legislative bodies on this issue is available in House Report 92–524 and Senate Report 92–827.

Both the House and Senate conferees were adamant in supporting the respective positions of both bodies as regards this very crucial issue. However, the House conferees. among other things, pointed out that a feasibility study as recommended by the Senate would serve no effective purpose since this subject had been more than adequately reviewed and studied both within and outside the Department of Defense.

House conferees also called attention to the strong endorsement for the establishment of a Uniformed Services University of the Health Sciences provided by the Secretary of Defense. Because of the pertinency of the Secretary's views on this subject, and since they coincide with those of the House conferees, a portion of his statement is set out below:

"As ranking member of the Health, Education, and Welfare Appropriations Committee and Defense Committee, I joined with you in support of the establishment of a Uniformed Services University of the Health Sciences. Since leaving the Congress and taking on the responsibilities as Secretary of Defense, my personal support for this legislation has been strengthened. The urgent need still exists for the establishment of a Uniformed Services University of the Health Sciences to make the military medical departments producers of physicians and members of other health professions rather than merely large-scale consumers of scarce categories of health personnel. It would also add significantly to the total number of members of the health professions available in the national medical manpower pool. It would afford us a means of attracting a significant number of members of the health professions into the military departments. It would also greatly assist us in retaining highly qualified members of the health professions, for we have concluded that one of the most important retention factors for physicians and other members of the health professions is the opportunity of functioning in a professional environment of the highest caliber. The proposed university would contribute measurably toward the attainment of that environment by providing academic teaching positions for military health professionals and university cooperation in establishing and monitoring training programs throughout the military departments. Ultimately, we would expect that it would result in improved medical care and treatment of all beneficiaries of our health care system.

I am still convinced that the establishment of such an institution will provide the professional stimulus to staunch the annual severe losses of military physicians and other health professionals that we have experienced in recent years. I personally continue to believe that it would become the cornerstone of the foundation we need to attain an all-volunteer medical force."

The Senate conferees, on the other hand, disagreed with the House conferees' views and questioned the overall philosophy embodied in the principle of establishing a university of this type entirely supported by Federal funds. The Senate conferees pointed out their concern over the apparent lack of any clear consensus in the government and the health professions as to the need and desirability of establishing such a university.

Notwithstanding the strong representations made by the Senate conferees on this issue, the Senate conferees ultimately receded from their position with an amendment which reduced the first-year authorization for funding for design, planning, construction, et cetera, for the university to $15,000,000 rather than the $20,000,000 contained in the House-passed bill. Also the amendment would require future line item annual authorizations before appropriations for construction could be provided in subsequent years.

Difference No. 2—Scholarship program and benefits

Under the House-passed bill, the Armed Forces would have been authorized a medical scholarship training program in the health professions under which a maximum of 5,000 scholarships, at any one time, would be provided to enable persons to attend civilian schools providing training in medical, dental, and allied health disciplines. Under the House version of the scholarship program, the full cost of the student's school tuition and fees would be paid by the Federal government and such students would serve on active duty as reserve officers in Grade O–1 (Second Lieutenant/Ensign).

The Senate version of the scholarship program provided:

A. The full cost of the student's medical school tuition and fees be paid by the Federal government (same as House version).

B. Each student serve on inactive duty as a Reserve officer in Grade O–1 (2nd Lt./Ensign) except for 45 days per year when he would serve on active duty in Grade O–1.

C. Each student receive a monthly stipend of $400 except when he is on active duty when he would receive the full pay and allowances of Grade O–1. Under the Senate version a student with dependents would receive in pay and allowances about $5,285 per year and one without dependents $5,235 (in addition to medical school tuition and fees).

After considerable discussion, the House conferees agreed to the Senate version of the scholarship program with the qualification that in the event the $400 monthly stipend would not be adequate to attract the number and quality of students essential to the program, both the House and Senate Committees on Armed Services will give serious consideration to the desirability of increasing this stipend by appropriate legislation.

The House therefore recedes and accepts the Senate provisions on this issue.

Difference No. 3—Scholarship student attending a university which either disestablished ROTC or barred armed services' recruiters from its campus

The House version of H.R. 2 contained a provision which prohibited the detailing of scholarship students to any institution of higher learning if that institution had adopted a policy which bars recruiting personnel of any of the Armed Forces from the premises of that institution, or if such institution of higher learning had directed the disestablishment of Reserve Officer Training Corps units at the institution despite the desire of the Armed Forces to continue such training at the institution.

The Senate version of H.R. 2 permitted a scholarship student to attend such schools.

The House conferees believe that the schools in question should not receive any benefits under this legislation from the Department of Defense either directly or indirectly in view of the apparent policy of the institutions to divorce themselves completely from any affiliation with the Armed Forces of the United States. However, the Senate conferees were of the view that adoption of the House prohibition would have a serious impact on the Department's ability to attract the numbers and quality of students required by the scholarship program. The Senate conferees pointed out that approximately 9% of all students now attending medical schools are in schools which would be directly affected by this prohibition. Therefore, they argued that notwithstanding the merits or demerits of the principle embodied in the House prohibition, they believe that the overriding urgency of the physician shortage problem required elimination of the House prohibition.

The House conferees therefore reluctantly receded and concurred in the Senate action.

Difference No. 4—Statutory numerical limitations on promotion of medical and dental officers to general and flag officer rank

The House version of H.R. 2 removed all the statutory numerical limitations on the promotion of medical and dental officers to general and flag officer rank. This action was taken to provide the Armed Services with additional career incentives for medical and dental officers.

The Senate did not concur in this House action, although it conceded that increased promotion opportunity was essential for officers in the Medical and Dental Corps. The Senate report therefore requires the Department of Defense to study the question of increased promotion opportunities for medical and dental officers and to report the findings of the Department to the responsible legislative Committees not later than January 1, 1973.

In view of the adamant position of the Senate conferees on this issue, the House conferees reluctantly receded with the understanding that the respective Committees on Armed Services would, if necessary, take early legislative action on this problem shortly after the convening of the 93d Congress.

Difference No. 5—Length of Scholarship program

Under the House version of H. R. 2, the scholarship program was limited to courses of study of not more than four years' duration.

Under the Senate version of H. R. 2, courses of study could extend to as much as six years' duration.

The Senate conferees pointed out that recent changes and innovations in medical training, and medical school curricula, have resulted in some courses, for example, requiring as much as six years for the completion of training for a medical degree. Therefore, the Senate conferees urged that the language be made sufficiently flexible to encompass these innovations in medical training as well as others that might occur in future years.

The House concurred with the Senate conferees, and therefore receded without amendment to accept the Senate provision in this regard.

Difference No. 6—Technical changes

The House-Senate conferees also considered and made several technical changes to both the House and Senate versions of H. R. 2 in accordance with recommendations made by the Department of Defense. None of these changes are substantive in nature, and therefore require no explanation.

During the discussion of the provisions relating to the establishment of the Uniformed Services University of the Health Sciences, it was the general consensus of the conferees that the provisions, as written, should remain deliberately broad so as to provide the Secretary of Defense and the Board of Regents, in establishing and administering the university, sufficient executive authority to ensure the kind of administrative flexibility that will be necessary to make this the finest medical school in the world in the shortest possible time.

DIRECTING SECRETARY OF DEFENSE TO FURNISH INFORMATION WITH RESPECT TO U.S. OPERATIONS IN NORTH VIETNAM

Mr. PRICE of Illinois. Mr. Speaker, I call up House Resolution 1078 and ask for its immediate consideration.

The Clerk read the resolution as follows:

H. Res. 1078

Resolved, That the Secretary of Defense, to the extent not incompatible with the public interest, is directed to furnish to the House of Representatives, not later than seven days following the adoption of this resolution, the following information with respect to the American bombing and naval bombardment of North Vietnam since March 1, 1972:

1. number of sorties flown and types and tonnage of ordnance used each month;
2. after action reports and bomb damage assessments, both written and photographic;
3. specific descriptions and photographic evidence of all damage to (a) the primary and secondary dike and hydraulic systems of North Vietnam, and (b) villages and cities of North Vietnam.

MOTION TO TABLE OFFERED BY MR. PRICE OF ILLINOIS

Mr. PRICE of Illinois. Mr. Speaker, in view of the fact that this resolution was adversely reported by the House Committee on Armed Services by a rollcall vote of 27 to 5, I move to lay House Resolution 1078 on the table.

The SPEAKER. The question is on the motion offered by the gentleman from Illinois (Mr. Price).

The motion to table was agreed to.

DIRECTING SECRETARY OF DEFENSE TO FURNISH INFORMATION CONCERNING MILITARY OPERATIONS IN NORTH VIETNAM

Mr. PRICE of Illinois. Mr. Speaker, I call up House Resolution 1079 and ask for its immediate consideration.

The Clerk read the resolution as follows:

H. Res. 1079

Resolved, That the Secretary of Defense, to the extent not incompatible with the public interest, is directed to furnish to the House of Representatives, not later than seven days following the adoption of this resolution:

1. maps showing the location of all known or suspected prisoner-of-war camps in North Vietnam;
2. maps showing the location of all bombing strikes and naval bombardments against North Vietnam for the period March 1, 1972, to date;
3. the rules of engagement promulgated for the bombing of North Vietnam from March 1, 1972, to date, and a description of the procedures, policies, and actions taken by American Armed Forces for the purpose of assuring the avoidance of danger to American prisoners of war.

MOTION TO TABLE OFFERED BY MR. PRICE OF ILLINOIS

Mr. PRICE of Illinois. Mr. Speaker, in view of the fact that this resolution was ordered adversely reported to the House on a vote of 31 to 1 by the House Armed Services Committee, I move to lay House Resolution 1079 on the table.

The SPEAKER. The question is on the motion offered by the gentleman from Illinois (Mr. Price).

The motion to table was agreed to.

A motion to reconsider the votes by which action was taken on both motions to table was laid on the table.

PROVIDING FOR CONSIDERATION OF H.R. 16071, PUBLIC WORKS AND ECONOMIC DEVELOPMENT ACT AMENDMENTS OF 1971

Mr. YOUNG of Texas. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 1098 and ask its immediate consideration.

The Clerk read the resolution as follows:

H. Res. 1098

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 16071) to amend the Public Works and Economic Development Act of 1965. After general debate, which shall be confined to the bill and shall continue not to exceed two hours, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Public Works, the bill shall be read for amendment under the five-minute rule. It shall be in order to consider the amendment in the nature of a substitute recommended by the Committee on Public Works now printed in the bill as an original bill for the purpose of amendment under the five-minute rule, and all points of order against sections 3 and 5 of said substitute are hereby waived for failure to comply with the provisions of clause 4, rule XXI. At the conclusion of such consideration, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and any Member may demand a separate vote in the House on any amendment adopted in the Committee of the Whole to the bill or to the committee amendment in the nature of a substitute. The previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motionto recommit with or without instructions.

Mr. YOUNG of Texas. Mr. Speaker, I yield 30 minutes to the distinguished gentleman from Tennessee (Mr. Quillen) pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 1098 provides an open rule with 2 hours of general debate for consideration of H.R. 16071 to amend the Public Works and Economic Development Act. It shall be in order to consider the committee substitute as an original bill for the purpose of amendment and, because of reappropriations, points of order are waived against sections 3 and 5 for failure to comply with clause 4 of rule XXI.

The purpose of H.R. 16071 is to make improving amendments to the existing law and to extend the economic programs for an additional year—to June 30, 1974.

Changes are made in a number of areas including: grants and supplementary grants for public facilities, the public works impact program, business development, technical assistance, vocational training facilities, coordination, special impact programs in urban and rural areas.

A new title is added entitled "Environmental Effects," which is designed to provide assistance to individuals who are unemployed because of Federal actions to improve the environment.

The moratorium on dedesignation of redevelopment areas is extended to June 1, 1974.

A number of changes are made to improve the administration of the economic development program and authorizations for funding these programs through fiscal year 1974 are included to provide for their continued operation.

The total authorization in the bill is $3,177,500,000.

Mr. Speaker, I urge the adoption of the rule in order that the legislation may be considered.

Mr. GROSS. Mr. Speaker, will the gentleman yield?

Mr. YOUNG of Texas. I yield to the gentleman from Iowa.

Mr. GROSS. Mr. Speaker, I thank the gentleman for yielding.

Could the gentleman say upon whose request the waiver of the points of order was granted?

Mr. YOUNG of Texas. I am not certain, but I believe the matter came up in executive session, and it was pointed out that the Parliamentarian indicated that points of order would have to be waived to section 3 and section 5, because of reappropriations in the authorization bill. That is my recollection.

Mr. GROSS. Is the gentleman saying then by way of an answer that the waiver of points of order to section 3 and section 5 was not requested by the committee but was requested by the Parliamentarian?

Mr. YOUNG of Texas. That is my recollection, but I am not clear on it. But I believe it was pointed out by the chairman of our committee, the gentleman from Mississippi (Mr. Colmer), that the Parliamentarian had indicated that points of order would have to be waived to section 3 and section 5, or they would be subject to a point of order.

In any event, though, the motion to grant the rule did contain a provision that points of order would be waived to section 3 and section 5—I do know that.

Mr. GROSS. Mr. Speaker, will the gentleman yield further?

Mr. YOUNG of Texas. Certainly; I would be glad to yield to the gentleman from Iowa.

Mr. GROSS. I do not want to be disrespectful, but has the Rules Committee become the handmaiden of the Parliamentarian? I am surprised that, if a waiver of points of order was necessary, the committee did not request the waiver.

Mr. QUILLEN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the gentleman from Texas (Mr. Young) has pointed out the main provisions in this resolution.

The primary purpose of H.R. 16071 is to extend the Public Works and Economic Development Act for 1 year through fiscal year 1974. The existing law authorizes funds through fiscal year 1973. This bill also includes additional authorization for fiscal year 1973.

The object of the programs authorized in this bill is to provide Federal assistance to economically depressed areas. In order to achieve this goal, the bill provides technical assistance, public facility grants, business loans and vocational training.

One controversial provision in this bill is in a new title dealing with environmental effects. Section 801 provides assistance to individuals who lose their jobs as a result of Federal actions to improve the environment. Such individuals who have worked at least 26 of the 78 preceding weeks in the plant or industry affected, will be eligible for benefits. The benefits include, first, unemployment compensation equal to 60 percent of a worker's former weekly wage until he is reemployed or retires, for a period of up to 78 weeks, second, temporary mortgage or rental payment assistance in hardship cases, and third, moving expenses to a new job if the worker is unable to find work in the vicinity of his previous home, but does find a job elsewhere.

The total of new costs in this bill is $3,177,500,000, of which $977,500,000 is for additional funding in fiscal year 1973, and $2,200,000,000 is for total funding in fiscal year 1974.

There are no departmental letters in the Committee report.

Mr. Speaker, I reserve the balance of my time.

Mr. YOUNG of Texas. Mr. Speaker, I yield 5 minutes to the gentleman from Indiana (Mr. Madden).

Mr. MADDEN. Mr. Speaker, this legislation which was reported out of the Committee on Public Works under the chairmanship of Congressman John Blatnik, is probably one of the most outstanding bills to aid the American economy that has been presented to the Congress in many years.

The Rules Committee reported unanimously on a rule to consider this bill. It is a multi-billion dollar public works bill which will greatly stimulate our economy and eventually give employment to many of our unemployed and increase the buying power of millions of our people throughout the Nation. It will help the construction industry, including building trades, which suffers from an unemployment rate double the national average which is now over 6 percent of the Nation's working force. Chairman Morgan of the Foreign Affairs Committee yesterday testified before the Rules Committee that $1,300 billion has been spent on the military and defense here and over the globe since World War II—about $100 billion on foreign aid in the same period of time. We should now start spending a small fraction of our taxes on local problems.

This legislation will also aid in the urban localities in the construction of public necessities such as water purification plants, sewage treatment systems, libraries, police stations, community centers, street lighting, public transportation and airport facilities, hospital construction, warehouses, traffic congestion, and so forth.

This legislation has the support of business and construction contractors. Labor organizations have been calling for an expanding accelerated public works construction program for several years.

This bill would provide grants for State and local governments to initiate and speed up public investment projects in areas of high unemployment. American workers realize that unemployment depression and our most critical economic problems stem from inadequate public facilities which are much needed in every metropolitan area throughout the Nation. Over 100 Members of Congress from both parties are cosponsoring this legislation for the benefit of our economic recovery and which should affect our prosperity after the legislation is enacted and grants are set aside to the various localities requesting financial aid for projects.

The accelerated public works program provides 80 percent construction grants to local governments in high unemployment and special impacted areas. These programs are important as they provide help on two fronts by assisting local government in building much needed public works facilities such as sewage treatment plants, transportation, facilities for health problems and provides immediate employment to persons in the building trades which are about the hardest hit groups by unemployment.

During the last session of Congress I was one of the sponsors and supporters of the legislation known as the "accelerated public works project" which would have given the Nation an earlier start to combat depression and unemployment but the bill was vetoed by the President. At that time this bill passed the House by a vote of 320 to 67. The veto by the President of this bill created such strong criticism and opposition that the administration reconsidered and cooperated on a more modified bill.

The older Members of Congress vividly remember the depression in the early 1930's. I well remember that immediately previous to the devastating stock market crash of 1929, corporations, big business, banks, and so forth, were reaping great benefits; profits, prices were rising rapidly; and unemployment was increasing yearly until millions of American workers and their families were without money to purchase the necessities of life, including adequate food supplies. This inflation was the cause of bringing the Nation into the most devastating economic turmoil, creating discontented elements that were marching on Washington demanding relief for the unemployed and the destitute. It was only through the miraculous cooperation of big business, Government, and labor under the leadership of Franklin D. Roosevelt during the middle and late 1930's that our Government was saved from economic destruction.

Today we are reading about the fabulous profits of industry, conglomerates, business cartels, banks, insurance companies, and so forth, and the same unemployment scourge is now creeping up which, if not curbed, will result in another crash of our economy similar to the early 1930's.

This legislation, if enacted without crippling amendments, will be the first major step to restore employment and keep our factories and industries operating and return prosperity to the Nation.

I do hope the Congress will enact this legislation by a large majority vote and the President will not repeat his veto of the last major public works bill which indirectly helped to create our present unemployment and economic dilemma.

Mr. YOUNG of Texas. Mr. Speaker, I yield such time as he may consume to the distinguished gentleman from Florida (Mr. Sikes).

Mr. SIKES. Mr. Speaker, I consider it a very fortunate thing that the House is to consider this bill. The rule should be approved, and the bill should be adopted overwhelmingly. There is a need throughout the Nation for sound public works projects. Obviously, in many communities there is a serious problem of unemployment. The two will work hand in glove to give us needed programs and better economic conditions. They will help to give employment to skilled people who particularly need work. We talk about taking people off welfare; we talk about substituting work for welfare. This is a work program for people who are skilled but who are unable to find work and who want to work. I strongly approve it.

In other words, Mr. Speaker, we have before us today the vehicle whereby we can come to grips with the growing problem of unemployment in America.

For a long time we have been hearing about programs which increase the drain on public funds for those who refuse to work, but we have heard far too little about plans to provide work for those trained and willing to work. That is the object of the bill now before us.

This is not the first time we have been down this road, Mr. Speaker. Last June the President vetoed a similar proposal which would have provided $2 billion for an accelerated public works program. As a result of that veto, public projects which need building have gone unbuilt and men who seek work have been denied that work solely because the Federal Government did not make the necessary funds available.

It is a shame—the shame of us all—that we have allowed so much discussion of welfare programs for those unwilling to work while devoting so little time and attention to the creation of jobs for those who need and want work.

Sewer systems, water-purification projects, hospitals, nursing homes, libraries, schools, public buildings, community projects, and recreational facilities are badly needed in this country. No member of this body could say there is not a need in every congressional district in America for projects such as I have mentioned. Certainly, few Members of this body can say there is full employment in every district.

While the proposal before us today will not return full employment to our country, it will go a long way toward helping those in the brick-and-mortar trades who have been especially hard hit by unemployment.

We have heard the fear expressed that the accelerated public works proposal now under consideration would create some kind of WPA monster. I ask, Mr. Speaker, what was wrong with the WPA. It provided jobs for people and badly needed permanent facilities for our Nation. True, the program was conceived at a time of great stress in America, but I suggest it was unemployment that was the monster, not the program conceived with which to deal with it.

We face a situation today similar in many respects. Unemployment continues to be a problem in many areas of the Nation while sorely needed public programs go begging. The Congress should accept responsibility to provide the means whereby these two segments of public need are brought together—the need for facilities and the need of men for work.

The proposal now before us, frankly, falls short of what I believe we need in this regard. But it is a realistic program. The fiscal year soon will be half gone but much good can still be accomplished. A larger program very probably would produce a presidential veto.

So let us get on with the business of making available to as many citizens as possible the opportunity for meaningful, honest work. What is proposed here today is an expenditure of public funds for the highest goals, providing jobs and the construction of needed public works facilities.

This is not the time to tarry over detail or be stampeded into an alley of fear because a few among us throw up specters. I repeat, Mr. Speaker, it was not the WPA which was bad. It was the situation which required the creation of a WPA.

Times have not changed. The Congress in the 1930's met the challenge and the Nation recovered from that crisis. Now we face another crisis and this Congress must meet that challenge.

I urge approval of the accelerated public works proposal now before us so that Americans can get back to work.

Mr. YOUNG of Texas. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid upon the table.

SHORESIDE VISITORS' FACILITIES AT THE U.S.S. "ARIZONA" MEMORIAL

Mr. BYRNE of Pennsylvania. Mr. Speaker, I ask unanimous consent for immediate consideration of the bill (H.R. 16201) to authorize the Secretary of the Navy to construct and provide shoreside facilities for the education and convenience of visitors to the U.S.S. *Arizona* Memorial at Pearl Harbor and to transfer responsibility for their operation and maintenance to the National Park Service.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

The Clerk read the bill as follows:

H.R. 16201

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Navy is authorized to provide for the construction, establishment, and maintenance of permanent shoreside facilities (including, but not limited to, a theater and museum) within the Pearl Harbor Naval Base, Hawaii, to provide for the education and convenience of visitors to the United States Ship Arizona Memorial.

SEC. 2. The Secretary of the Navy, after consultation called for in section 3 hereof, may include and display in the theater and museum such personal property, relics, documents, memorabilia, films, and exhibits as he deems appropriate to assist visitors to enhance their understanding of the history and American interest in the Pacific Ocean areas, and to deepen their appreciation of the great heroism and patriotism of the men who lost their lives at Pearl Harbor on December 7, 1941, and in the Pacific Ocean areas during World War II.

SEC. 3. In carrying out his duties under this Act, including (but not limited to) the planning, construction, equipping, and furnishing of the shoreside facilities, the Secretary of the Navy is authorized to consult with, seek the advice and assistance of, and receive and accept gifts from, any interested individuals, agencies, groups, or organizations, including the Pacific War Memorial Commission of the State of Hawaii.

SEC. 4. The Secretary of the Navy is authorized to consult and negotiate with the Secretary of the Interior for the transfer of responsibility to the National Park Service, Department of Interior, for the maintenance and operation of the shoreside facilities immediately upon completion of their construction.

SEC. 5. There is authorized to be appropriated a sum not to exceed $2,500,000 for the planning, construction, equipping, and furnishing of the shoreside facilities authorized in section 1 hereof.

Mr. BYRNE of Pennsylvania. Mr. Speaker, the purpose of H.R. 16201 is to authorize the Secretary of the Navy to construct and provide shoreside facilities for the education and convenience of visitors to the U.S.S. *Arizona* Memorial at Pearl Harbor and to transfer the responsibility for their operation and maintenance to the National Park Service. H.R. 16201 describes the facilities as including, but not limited to, a theater and museum to provide for the education and convenience of visitors to the Arizona Memorial. Additionally, the Secretary of the Navy may include and display in the theater and museum such personal property, relics, documents, memorabilia, films, and exhibits as he deems appropriate. H.R. 16201 authorizes the sum of $2,500,000 for the planning, construction, equipping, and furnishing of the shoreside facilities. On April 23, 1970 hearings were conducted at the end of which a decision was made to defer action pending further investigation of the operation and maintenance of the proposed facilities. Hearings were again held in March 1972 and August 1972 on other bills which were introduced in the 92d Congress which were almost identical to the ones introduced in the 91st Congress. The Navy currently provides for visitor transportation to and from the Arizona Memorial as well as its regular maintenance at a cost of approximately $95,000 annually. It is estimated that if the facilities described in this bill are erected, additional funding would be required upon completion of the facilities for maintenance and additional personnel salaries. The total cost is estimated to be about $162,000 annually. The bill passed by the committee authorizes the Secretary of the Navy to construct and negotiate with the Secretary of the Interior for the transfer of responsibility to the National Park Service for the maintenance and operation of the shoreside facilities immediately upon the completion of their construction.

The hearings conducted in the 92d Congress by this committee were based upon H.R. 11723 which indicated a clear intention to charge the Secretary of the Navy with the responsibility for both construction and maintenance, as well as operation, of the facilities. The Department of the Navy, on behalf of the Department of Defense, did not recommend enactment of any bill with that proviso. The Department of the Interior, in their report of August 1, 1972, on H.R. 11723, urged deferral of further action until more study could be conducted jointly with the Navy. This committee, even in view of the Navy position and the Department of the Interior position, recommends enactment of H.R. 16201.

Mr. MATSUNAGA. Mr. Speaker, as one who helped to establish the U.S.S.

Arizona Memorial itself, I rise in support of H.R. 16201, which would authorize the construction, operation, and maintenance of much-needed shoreside facilities for the education and convenience of visitors to the Arizona Memorial at Pearl Harbor, Hawaii.

Ten years have passed since Congress authorized the construction of a memorial at the site of the U.S.S. *Arizona*, "in honor and in commemoration of the members of the Armed Forces of the United States who gave their lives to their country during the attack on Pearl Harbor, Hawaii, on December 7, 1941." (Public Law 87-210.)

In 1962, I was a member of the Pacific War Memorial Commission which was charged with the responsibility, among other things, of raising funds for the construction of the memorial in part through public subscription. The U.S.S. Arizona Memorial, first opened to the public in 1962, has truly become a national shrine. Erected over the sunken hull of the U.S.S. *Arizona*, the memorial is dedicated to all those who died in the Pearl Harbor attack, particularly the 1,177 men killed from the *Arizona* itself, most of whose bodies remain entombed in the ship's hull to this day. These brave men hailed from nearly every State in the Union and from Guam, the Philippine Islands, and Canada.

It is not surprising, therefore, to find that Americans in increasing numbers are making the pilgrimage to the watery shrine and spending a few moments in silent meditation at the gleaming white monument. More than 4 million visitors, from every State in the Union, have taken the short boat trip to the memorial since it opened. Ten years ago the memorial had only 62,000 visitors via Navy boats. Last year, that figure had risen to 367,816, with an approximately equal number visiting by commercial tour boats—bringing the total to nearly three-fourths of a million visitors in 1971.

Not only were the visitors impressive in their increase in numbers, but also in their diverse geographical origins. Many foreign countries were represented, predominantly, and perhaps ironically, Japan. Moreover, every State had its share of visitors.

Despite this rapid and staggering increase of visitors, the memorial itself remains adequate to handle the load. However, shoreside facilities are painfully inadequate. Perhaps because of the nature of their visit to Pearl Harbor and the touch of solemnity associated with it, visitors to the Arizona Memorial have been observed patiently waiting in line for lengthy periods of time, exposed to Hawaiian rain as well as sunshine, for the opportunity to make the short boat trip from the landing to the memorial.

The growing problem of inadequate facilities on shore to accommodate the burgeoning number of visitors led me and certain cosponsors to introduce the legislation which is now before this body. H.R. 16201 authorizes $2.5 million for the construction of a theater, museum, and other visitor conveniences by the Secretary of the Navy. After completion, these facilities would be maintained and operated by the National Park Service.

The proposed shoreside facilities would serve as a memorial not only to our fallen heroes at Pearl Harbor, but also to our fighting men who spanned the vast reaches of the Pacific and displayed the same courage and personal sacrifice as that of the men who went to their watery graves on December 7, 1941. It would be fitting, in this larger context, for the visitor at Pearl Harbor to gain, first in the theater-museum, a meaningful perspective of World War II in the Pacific, and then to proceed to the Arizona Memorial, which he will then view with infinitely greater understanding and appreciation. A visitor would have the opportunity to learn about Pearl Harbor and the war in the Pacific, just as he does at other national shrines, such as Valley Forge, Fort McHenry, the Alamo, Fort Sumter, and Gettysburg.

Mr. Speaker, H.R. 16201 and the related bills are important legislation, with impact and significance for all of America and, indeed, the world. Over three decades have pased since the atack on Pearl Harbor, making this an appropriate time to begin this project which, by recalling the horrors of war, would serve as a reminder of the desperate need to preserve peace.

I strongly urge favorable consideration of H.R. 16201.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

TO REMOVE RESTRICTIONS FROM DEED TO COLUMBIA MILITARY ACADEMY

Mr. BYRNE of Pennsylvania. Mr. Speaker, I ask unanimous consent for the immediate consideration of the bill (H.R. 16251) to release the conditions in a deed with respect to certain property heretofore conveyed by the United States to the Columbia Military Academy and its successors.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

The Clerk read the bill as follows:

H.R. 16251

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the provisions and conditions in the deed of conveyance from the Assistant Secretary of War, dated May 10, 1904, to the Columbia Military Academy, and its successors, of record in book 105, page 495, Register's Office, Maury County, Tennessee, restricting use of the property conveyed therein for educational purposes only, providing for prescribing of rules and regulations by the Secretary of War, providing for revision of title to the United States under specified circumstances and providing for use for military purposes on demand of the President, shall be released and free simple title to the property, free of such provisions and conditions, shall vest in the Columbia Military Academy, a Tennessee corporation, the charter of which is of record in Charter Book B, page 487 in such Register's Office, upon payment of $10,000 in cash by such Academy to the United States as provided for in section 2 of Public Law 71-529 (46 Stat. 1009-1010).

Mr. BYRNE of Pennsylvania. Mr. Speaker, the purpose of the bill is to release the provisions and conditions contained in the deed of conveyance from the Assistant Secretary of War dated May 10, 1904, to the Columbia Military Academy and its successors, of record in book 105, page 495, Register's Office, Maury County, Tenn., and to vest fee simple title to the property, free of such provisions and conditions in the Columbia Military Academy School.

The property involved comprises approximately 67 acres of land near Columbia in Maury County, Tenn., acquired by the United States in 1888 for the establishment of the Columbia Arsenal. The purchase price of $15,250 was paid by citizens of Maury County. In 1901 the arsenal was abandoned.

The act of April 23, 1904 (33 Stat. 296) authorized and directed the Secretary of War to convey the Columbia Arsenal property to "Columbia Military Academy, an educational corporation organized under the laws of the State of Tennessee, and its successors," with the proviso that the estate shall continue so long as the property shall be used for educational purposes only and in conformity with other terms of the act including the following:

> (a) The Secretary of War shall have visitation privileges and the right to prescribe the military curriculum of the school; upon failure of the school to comply with rules and regulations prescribed by the Secretary or other terms of the act, the Secretary is authorized to declare the estate has determined and the property shall revert to the United States, in which event the Secretary of War is authorized to take possession of the property on behalf of the United States.
>
> (b) The United States shall have the right to use the property for military purposes at any time upon demand by the President of the United States.

The above-mentioned deed of conveyance to Columbia Military Academy, issued pursuant to this act and described in the bill, contained these provisions and terms.

By deed dated April 20, 1905, Columbia Military Academy conveyed the above-described property under the same terms and conditions to the Columbia Military Academy, a Tennessee corporation, the charter of which is recorded in Charter Book B, page 487, Register's Office, Maury County, Tenn.

The Department of the Army has no requirement for use of the former Columbia Arsenal property. To the contrary, authority has existed since 1928 for the extinguishment of all rights therein reserved to the United States. By the act of May 26, 1928 (45 Stat. 766), the Secretary of War was authorized to sell to the Columbia Military Academy all rights reserved to the United States in the deed of May 10, 1904, and the act of April 23, 1904, for a consideration not less than the appraised value of the land alone. This statute was repealed by the act of July 3, 1930 (46 Stat. 1009) which substantially restated the 1928 act, and reduced the purchase price to a sum of $10,000. Due to the school's financial difficulties, a sale was never consummated. However, the authority to sell still exists.

I urge your support for this legislation.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. BYRNE of Pennsylvania. Mr. Speaker, I ask unanimous consent that all Members have 5 days in which to extend their remarks on the two bills just passed.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

APPOINTMENT OF STUDENTS AT STATE MARITIME ACADEMIES AND COLLEGES AS U.S. NAVAL RESERVE MIDSHIPMEN

Mr. FISHER. Mr. Speaker, I ask unanimous consent for the immediate consideration of the bill (H.R. 16233) to amend the Maritime Academy Act of 1958 in order to authorize the Secretary of the Navy to appoint students at State maritime academies and colleges as Reserve midshipmen in the United States Navy, and for other purposes.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

The Clerk read the bill, as follows:

H.R. 16233

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Maritime Academy Act of 1958 (46 U.S.C. 1381 et seq.) is amended by adding the following new section:

"RESERVE STATUS OF STUDENTS

"SEC. 11. Students appointed to any maritime academy or college which is assisted under any provisions of this Act may be appointed by the Secretary of the Navy as Reserve midshipmen in the United States Navy and may be commissioned as Reserve ensigns in the United States Navy upon graduation from the academy or college."

Mr. FISHER. Mr. Speaker, the purpose of this legislation is to enable the Secretary of the Navy to appoint students enrolled at any maritime academy or college which is assisted under the provisions of the Maritime Academy Act of 1958 as Reserve midshipmen in the U.S. Navy and to appoint them as Reserve ensigns in the U.S. Navy upon their graduation. This would provide equal treatment for students of the State maritime academies as that now provided for students at the U.S. Merchant Marine Academy at Kings Point, N.Y.

Prior to passage of the most recent draft law amendments on Septmeber 28, 1971, students enrolled at State maritime academies received draft exemption status. However, the passage of that law resulted in a change in draft exemption for maritime cadets along with other college students. The proposed legislation would permit State maritime academy or college students to affiliate with the U.S. Naval Reserve as midshipmen and thus receive draft exempt status, thereby permitting them to complete their maritime education. Upon graduation, midshipmen would be commissioned in the Naval Reserve and given the option of serving on active duty with the Navy or sailing on their licenses with the merchant marine.

There are presently six State maritime academies receiving assistance under the Maritime Academy Act of 1958. Five of these schools supply approximately 350 commissioned officers in the Naval Reserve each year.

The schools, their location and average enrollment are:

	Students
Texas Maritime Academy of Texas A. & M. University, Galveston, Tex	90
California Maritime Academy, Vallejo, Calif	225

Great Lakes Maritime Academy in Michigan: A new school which will not qualify since baccalaureate degrees are not granted.

These schools under the Maritime Academy Act of 1958 may receive assistance from the Federal Government for maintenance and support of the schools not to exceed $75,000 per grant period that must be matched by State aid. Students enrolled in the schools may receive up to $600 per academic year for uniforms, textbooks, and subsistence.

It is anticipated that approximately 1,000 students from these five schools will apply and be processed annually if the legislation is enacted at a minimal annual cost of approximately $25,000. The cost will not result in increased budgetary requirements for the Department of Defense.

We urge favorable consideration of this legislation. Its enactment will enable young men enrolled in State maritime academies and colleges to complete their education without interruption and will result in increased numbers of well-qualified officers for the naval and merchant marine services.

Mr. BRAY. Mr. Speaker, for many years the graduates of the State maritime academies in the United States have made valuable contributions not only to the merchant marine service but also the U.S. Navy—particularly during time of national emergency and war. In June of 1941 the Secretary of the Navy established a classification of midshipmen, Merchant Marine Reserve, which resulted in the commissioning of many Naval Reserve officers with deck and engineering qualifications who rendered outstanding service during World War II and during the Korean conflict. In addition, those officers who did not serve on active duty for the Navy were commissioned in the Naval Reserve and through their service in the merchant marine established a splendid record in logistical transportation at sea around the world.

In the intervening years from 1953 when appointment in the Merchant Marine Reserve was no longer authorized by law, the cadets at the State merchant marine academies served without military reserve status. While there were attempts to revive the merchant marine midshipmen reserve program, the situation did not become critical until the draft legislation of 1971, which resulted in merchant marine cadets along with other college students losing their deferred status. Accordingly, a number of bills were introduced in Congress which would revive the Naval Reserve midshipmen program in the State maritime academies to duplicate the Naval Reserve program existing at the U.S. Merchant Marine Academy at Kings Point, N.Y. H.R. 16233 is the final product of these efforts.

At the present time there are five State merchant marine academies authorized to grant baccalaureate degrees. Thus, their students are eligible for the program proposed by this legislation whereby the Secretary of the Navy could appoint the undergraduates as midshipmen, U.S. Naval Reserve and subsequently consider them for appointment by the President as ensign, U.S. Naval Reserve upon graduation.

The Federal Government shows a continuing interest in the progress of these schools and the success of the undergraduate programs through assistance rendered under the provisions of the Maritime Academy Act of 1958. Thus, as is the case of the Reserve Officers Training Corps programs, the Federal Government has good reason to promote the successful completion of the undergraduate work of all students in these State maritime academies. Thus, I urge upon my colleagues their support of this legislation.

Mr. HATHAWAY. Mr. Speaker, I rise today to speak in support of H.R. 16233. This bill will exempt State maritime academy students from the draft, by amending the Martime Academy Act of 1958 to authorize the Secretary of the Navy to appoint students of State maritime academies as Reserve midshipmen in the U.S. Navy.

This legislation is urgently needed to correct an inequity which has arisen with the elimination of student deferments under the new selective service law passed by this Congress last September.

That change meant that students at the Maine Maritime Academy and other State maritime academies lost their right to deferment from the draft during their course of training—a right which is held by students at the other service academies, such as the U.S. Naval Academy at Annapolis and the U.S. Merchant Marine Academy at Kings Point.

Students at the Maine Maritime Academy and the other academies undergo the same training and education by the U.S. Navy as do these other students.

Furthermore, the State maritime academy student must, as a condition of his acceptance, sign a contract with the Maritime Administration stating that he agrees "At an appropriate time, prior to my graduation to apply for a commission as an ensign in the U.S. Naval Reserve and to accept such commission if tendered." Thus he is in a position similar to that of the cadet at the U.S. Maritime Academy at Kings Point, but without the attendant benefit of being by law exempt from the draft.

Since September 1971, my office has received a number of anxious letters from Maine Maritime Academy students, and from their parents, all asking why a man who has already committed himself to a course of training in naval science and a possible service obligation subsequently should now be made subject to the draft.

They ask why their studies and careers should be curtailed prematurely to fill a draft quota, when it is in the country's interest as well as their own that they complete the course before fulfilling their military obligation. They ask why they are treated differently from their peers at other service academies. They say that the situation is unjust and must be changed.

I agree with them, and I am determined that this problem must be remedied.

It was my own firm belief, as well as a tenet of national policy, that this country must maintain a strong merchant marine. The Maine Maritime Academy and other State Maritime Academies have established a solid tradition of turning out capable and well-trained officers for our merchant marine fleet. Anything that threatens these academies threatens that fleet as well, and the loss of the student draft exemption is a serious threat to attracting and retaining able students.

Several months ago, I joined with Members from affected States and other interested Members to introduce legislation specifically exempting State maritime academy students from the draft.

I commend the House Armed Services Committee for acting so swiftly on this bill, after receiving favorable reports from the affected Federal agencies.

Now I call on my colleagues in the House to pass H.R. 16233, so that the inequities now suffered by State maritime academy students will re rectified.

Mr. BIAGGI. Mr. Speaker, I rise in support of this bill for which I have been working during the last year. I want to commend the Committee on Armed Services and its distinguished chairman as well as the gentleman from Texas (Mr. FISHER) for recognizing the need for this legislation. I also want to thank my many colleagues who joined in cosponsoring this measure.

The bill, which would authorize the Secretary to appoint cadets of the State maritime academies as midshipmen in the U.S. Naval Reserve, simply recognized the longstanding contribution that these institutions have made to the defense of this Nation. In times of war, they have been quick to respond to the call for more trained men. In the recent Vietnam war buildup, these schools increased their capability at the request of the Department of Commerce to meet the need to supply our troops in Southeast Asia.

Moreover, the cadets graduating from these schools go on to serve the Government and private industry in the many martime-related fields such as oceanography, the marine sciences, navigation, and transportation. As efforts are made to restore America's merchant fleet to its proper place in world commerce, more well-trained officers will be needed.

The cadets at these schools go through 4 years of rigorous military and maritime training. They are instructed by active duty Navy personnel assigned to the schools. They wear uniforms and are required to meet all the standards of the Armed Forces. Also, they participate in shipboard training cruises each year. They differ from cadets at the Federal Academy in only two areas: They are not designated midshipmen and they do not receive a 100-percent subsidy of their education.

When these men go to sea upon graduation as required, they are among the best trained in the Navy or the merchant marine.

By providing this authorization, these cadets will be assured that they will be able to continue their education and training without interruption by the draft. Moreover, it will be a recognition of their close affiliation with the Navy and their important role in the defense of this Nation.

This measure will assure a steady flow of top-grade merchant marine and Naval Reserve officers from these schools. I have been closely associated with the New York State University Maritime College at Fort Schuyler and can attest without reservation to the excellence of their program and of the cadets at the school.

I urge my colleagues to approve the measure and hope that the other body will take swift action as well.

Mr. MONAGAN. Mr. Speaker, I support H.R. 16233 which would amend the Maritime Academy Act of 1958 to provide that students at State maritime academies and colleges may be appointed by the Secretary of the Navy as Reserve midshipmen in the U.S. Navy and to commission them as Reserve ensigns in the U.S. Navy upon their graduation from the academy or college. This legislation is similar to H.R 13166 which I introduced earlier this year.

In November 1971, a constituent of mine brought to my attention and protested the fact that cadets attending State maritime academies are eligible for the draft while cadets attending the U.S. Merchant Marine Academy at Kings Point, N.Y., are deferred from being drafted even though the cadets attending State maritime academies receive the same training and have the same service obligations. The Assistant Secretary of the Navy for Manpower and Reserve Affairs, James E. Johnson, has stated:

> As cadets in the U.S. Maritime Service, and as members of a quasi-military organization, they are required to take naval science courses and accept U.S. Naval Reserve Commissions upon graduation. They appear, from the viewpoint of the Navy, to be entitled to deferments in much the same manner as midshipmen at the U.S. Merchant Marine Academy.

This inconsistent and inequitable situation came about with the passage of the draft amendments of 1971 to the Military Selective Service Act of 1967. Deferral authority for undergraduate students was restored to the President and subsequently college deferrals were not extended. Cadets at State maritime colleges and academies had been deferred from induction as college students prior to the enactment of 1971 draft amendments.

Mr. Speaker, this legislation, in permitting the Secretary of the Navy to appoint maritime academy students as Reserve midshipmen in the U.S. Navy and to commission them as Reserve ensigns in the U.S. Navy upon their graduation from the academy or college, will restore that lost deferred treatment of these cadets. They will be treated on an equal basis with the cadets at the U.S. Merchant Marine Academy.

It will also help to insure that our Nation will have an adequate number of qualified naval officers in those times of need such as World War II and the Korean conflict when graduates of these State maritime academies and colleges served with distinction both in the Navy and in our merchant marine fleet.

I urge my colleagues to join with me in support of this legislation to effectively remedy the inconsistent and inequitable selective service treatment of cadets in State maritime academies and colleges.

Mr. TERRY. Mr. Speaker, the legislation we are about to consider, H.R. 16233, is designed to remedy one of the unfortunate inequities of the Selective Service System.

The bill would amend the Maritime Act of 1968 to authorize students at State maritime academies to be designated midshipmen in the U.S. Naval Reserve by the Secretary of the Navy. Such designation would confer upon State maritime students the same status as midshipmen at the U.S. Merchant Marine Academy at King's Point, thus entitling them to the same 1-D classification before the Selective Service.

Students at State maritime academies lost their draft deferments when general student deferments were abolished. These students go through a 4-year military training program and are trained by active duty Navy personnel. After graduating, they accept commissions as ensigns in the U.S. Naval Reserve with an accompanying service obligation. It is, therefore, grossly unfair that these students at State maritime institutions are subject to the draft, while midshipmen at the Federal Merchant Marine Academy are deferred.

There are State maritime academies located in New York, Michigan, California, Texas, Maine, and Massachusetts. Their cadets are highly trained and qualified individuals and are a very important source of naval reserve officers. They are already serving their country admirably as part of the Naval Reserve; their eligibility for the draft is unnecessary and unfair.

I thus urge my colleagues to act favorably on H.R. 16233 and thereby give State maritime cadets the consideration they well deserve.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. FISHER. Mr. Speaker, I ask unanimous consent that all Members may have

5 legislative days in which to extend their remarks on the bill H.R. 16233.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

PUBLIC WORKS AND ECONOMIC DEVELOPMENT ACT AMENDMENTS OF 1972

Mr. JOHNSON of California. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 16071) to amend the Public Works and Economic Development Act of 1965.

The SPEAKER. The question is on the motion offered by the gentleman from California.

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill H.R. 16071, with Mr. SLACK in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

The CHAIRMAN. Under the rule, the gentleman from California (Mr. JOHNSON) will be recognized for 1 hour and the gentleman from Arkansas (Mr. HAMMERSCHMIDT) will be recognized for 1 hour.

The Chair recognizes the gentleman from California.

Mr. JOHNSON of California. Mr. Chairman, I yield such time as he may consume to the chairman of the full committee, the gentleman from Minnesota (Mr. BLATNIK).

Mr. BLATNIK. Mr. Chairman, I appreciate the gentleman from California yielding. He is the House floor manager for this bill. I think this is an excellent bill. I want to commend the Members on both sides of the aisle and I will call on them later to explain the bill. I compliment them for their contribution in making possible the bringing of this legislation to the floor. There was nearly unanimous support for this bill in the full Public Works Committee, with one minor exception.

Mr Chairman, amendment of the Public Works and Economic Development Act (H.R. 16071) which we are acting upon today, is of vital importance to the economic well-being of the Nation.

This bill contains a number of much-needed provisions aimed at speeding recovery from the current recession and at building a sound base for our future economic growth. Among these provisions are increased funding authority for accelerated public works, new mechanisms for coordinating economic development programs, assistance to individuals who lose their jobs because of Federal environmental quality standards, and funding for implementing long-range programs prepared by the Regional Economic Development Commissions.

After passage of H.R. 16071, $4 billion would be authorized for these vital economic development programs—$2.2 billion for fiscal 1973 and $2.2 billion for fiscal 1974.

Of the $2.2 billion available for fiscal 1973, $1,222,500,000 is already authorized under current law; $977,500,000 is new money authorized by H.R. 16071.

The entire $2.2 billion authorized for fiscal 1974 is new money, bringing total new authorizations in H.R. 16071 to $3,177,500,000.

Included in these new authorizations is $500 million per fiscal year for fiscal years 1973 and 1974 for an expanded accelerated public works program.

On April 22, 1971, the Public Works Committee brought a large-scale accelerated public works program before the House. This program, passed by the Congress, was subsequently vetoed by the President.

At the time of the veto, the Nation had approximately five million unemployed—despite the existence of a large backlog of public works projects in communities across the land.

Today, well over a year later, the unemployment picture is virtually unchanged. We still have almost five million unemployed as well as a large backlog of badly needed public works projects, such as nursing homes, road improvements, public buildings and the like.

The President's economic program, which was supposed to reduce unemployment to 5 percent—an unacceptably high goal—by December 1971 has not succeeded. In fact, it has been more than 2 years since unemployment was below 5 percent.

A small-scale version of our original accelerated public works program, which was signed into law, on the other hand, has operated very well during the past year, putting thousands of people to work.

For these reasons, the Public Works Committee has again brought before the House a measure which will put people to work quickly on construction of public works projects, utilizing resources now used for unemployment compensation and public assistance payments for gainful employment in constructing badly needed public facilities.

We are currently spending $1.5 billion per month for welfare and $500 million per month for unemployment compensation. This totals to $24 billion per year—$18 billion for welfare and $6 billion for unemployment compensation.

This money—$24 billion per year—is being used to pay people not to work. In contrast, under H.R. 16071, we could pay out some of this money to people for performing meaningful work on construction of all kinds of public facilities in communities across the Nation.

Under H.R. 16071, we can put people on the job instead of on the dole.

H.R. 16071 includes a number of mechanisms for strengthening coordination among the governmental units which work to bring about economic development in lagging areas.

The bill would help assure that State economic development programs mesh with those of sub-State economic development districts and local communities, as well as with those of the multi-State regional economic development commissions. Coordination would be accomplished by a number of mechanisms such as providing funds for review by States of development district programs and review by districts of local projects.

Another problem dealt with in this bill is that of unemployment caused by Federal environmental quality standards and orders.

Implementation of environmental quality standards may in some instances lead to closing of a plant and loss of employment by workers. This is a severe burden placed on certain individuals by the Federal Government, and the Federal Government has a responsibility to assist those individuals during the time of hardship.

For this reason, provisions are included in H.R. 16071, to provide unemployment compensation, mortgage or rental payments, moving expenses and reemployment assistance for workers who lost their jobs because of Federal environmental quality standards and orders.

H.R. 16071 provides funds for implementation of plans prepared by the regional commissions created by title V of the Public Works and Economic Development Act.

There were five such commissions formed to foster economic development in lagging areas of the Nation when the act was first implemented, and two more commissions have recently been designated. Four of the original commissions have now completed the long-range economic development programs required by the act. These programs are now ready to be funded.

It is of vital importance to the entire Nation, as well as to the people of these regions, that the long-range programs now completed be provided with funds for implementation. Only through such implementation will the economically lagging regions served by these commissions be brought into the mainstream of the Nation's economy, to the benefit both of the people of the regions and the entire Nation.

H.R. 16071 is not a panacea for all the economic ills of the Nation. But the bill will make a direct and effective attack on many of our economic problems. Its acceptance is vital to the best interests of the Nation.

Mr. LATTA. Will the gentleman yield?

Mr. BLATNIK. Now I am pleased to yield to the gentleman.

Mr. LATTA. I thank the gentleman for yielding.

I want to congratulate him and his committee for bringing this legislation forward. I think it is needed as are some of the revisions.

I take this time just to ask a couple of questions about some matters discussed by the gentleman, particularly planning and construction grants for sewage treatment and water treatment facilities in smaller communities.

Yesterday when this matter was before the Committee on Rules I raised this question, and I raise it now so that the people administering the program can have no doubt as to what the committee and this Congress intends this legislation to accomplish.

I ask the gentleman if it is not his

intention and the committee's intention in this legislation to see to it that planning money is provided in this bill for communities and especially the smaller communities to go forward with their water and sewage treatment facilities so that they can attract industry and provide jobs for their people.

Without planning grants from the Federal Government, many of these communities cannot go forward with these needed projects. Technical assistance certainly includes planning grants.

Mr. BLATNIK. Yes. I have discussed this with the gentleman, and I believe he is raising a very valid point.

My interpretation is that technical assistance includes planning and planning is therefore covered and eligible for funds. The intent of the law is clear. I make this statement for the record in support of the gentleman's position.

I certainly construe planning money to be equally eligible.

Mr. LATTA. I am certainly pleased that the chairman has emphasized this point, as there has been some misinterpretations in this regard in the department. I have a case in my district, which I pointed out to the chairman and the committee, where they were giving priority to what the Department considers "technical assistance" over planning grants. I find nothing in this legislation which gives the Department the authority to do this.

If we are going to keep people in our small communities and out of our crowded cities, they will have to have water and sewer to attract industry to provide jobs for their people. If they do not have the financial capability to sell bonds to finance such projects, then we must assist them. I am pleased to hear the chairman say that he interprets the law as I do.

I hope during the amendment stage of the bill, we could further clarify this matter so that there can be no misunderstanding downtown.

Mr. BLATNIK. I can only interpret it that way, and I strongly support that position.

Mr. LATTA. I thank the gentleman.

Mr. JONES of Alabama. Mr. Chairman, will the gentleman yield?

Mr. BLATNIK. I yield to the gentleman from Alabama.

Mr. JONES of Alabama. Mr. Chairman, I might say that historically we have assumed technical assistance to include planning, and that is the law. Let me refer the gentleman to page 22 of the report where the gentleman will see in section 301, subsection (a), that it says:

> Such assistance shall include project planning and feasibility studies, management and operational assistance, and studies evaluating the need of—

And so forth. So this would include planning within technical assistance.

Mr. LATTA. Mr. Chairman, if the gentleman will yield a little further, I would say that that has always been my interpretation of the law, but apparently some of the Department are attempting to give it their own interpretation.

Mr. JONES of Alabama. If the gentlemen will yield further, I hope that our discussion here will dispel any notion that planning is not included in technical assistance.

Mr. LATTA. I thank the gentleman.

Mr. BERGLAND. Mr. Chairman, will the gentleman yield?

Mr. BLATNIK. I yield to the gentleman from Minnesota.

Mr. BERGLAND. Mr. Chairman, I was pleased to have an opportunity to cosponsor H.R. 16071 and would like at this time to thank my colleague, JOHN McFALL, for his interest—and I might say perseverance—in seeing that the accelerated public works impact program remained an active issue—despite last year's veto by the President. I would also like to commend my colleague from Minnesota, Chairman JOHN BLATNIK, for the good work of the Public Works Committee in clearing the way for the full House membership to have the opportunity to consider increasing the APW impact program funding and extend its life for another year.

As a freshman Congressman, I have had the privilege and opportunity to cast my vote for and even lend my name to a number of legislative programs designed to improve the living conditions in our rural areas—many of which are economically distressed areas. H.R. 16071 is a bill designed to do just this.

The accelerated public works program provides 80-percent construction grants to local governments in high unemployment "special impact" areas. It makes possible—in providing these grants—the building of a much-needed sewage treatment plant, a community center, or a fire station. The APW program could be an answer to those mayors and community leaders who have written, phoned, or met with me seeking Federal funds to assist them in providing these facilities—facilities their limited local resources cannot provide.

And so, I urge your favorable vote on H.R. 16071—not only because it provides a tool to fight the serious unemployment problem—but because it provides a tool as well for revitalizing our rural areas—making them a better place in which to live.

Mr. BLATNIK. Mr. Chairman, I want to congratulate the gentleman for his fine cooperation and his unstinting support of this legislation throughout the course of the hearings. The gentleman has been of invaluable help.

Mr. GROSS. Mr. Chairman, will the gentleman yield?

Mr. BLATNIK. I will be pleased to yield to the gentleman from Iowa.

Mr. GROSS. I thank the gentleman for yielding.

I would ask the gentleman if there is anything in the fine print of this bill that would permit the use of any of the funds authorized to be used to build a convention center or a sports arena in the city of Washington, D.C.?

Mr. BLATNIK. I would state to the gentleman from Iowa that there is nothing whatsoever in the bill even remotely related to any convention center or any arena for sports.

Mr. GROSS. Not even under section 202 of this bill?

Mr. JONES of Alabama. Mr. Chairman, if the gentleman will yield, not only in that section, but in any other section any more than there is to provide for a pavilion in Waterloo, Iowa.

Mr. GROSS. I beg the gentleman's pardon?

Mr. JONES of Alabama. The gentleman from Iowa asked whether or not there was some hidden language for the bicentennial celebration in Washington, or any other place, and I said no, not even in Waterloo, Iowa.

Mr. GROSS. Mr. Chairman, will the gentleman yield further?

Mr. BLATNIK. I yield further to the gentleman from Iowa.

Mr. GROSS. Mr. Chairman, I was not aware that any request had been made by the people in Waterloo, Iowa, for a pavilion, and I might add that they do not crawl on their hands and knees seeking alms as they do in Washington, D.C.

Mr. JONES of Alabama. I might add that we have had as many requests from Washington, D.C., in that respect as we have had from Waterloo, Iowa, and that is none.

Mr. GROSS. If the gentleman will yield still further where is the legislation that would provide for a convention center for Washington, D.C. Is that not before the Committee on Public Works?

Mr. BLATNIK. If I may respond to the gentleman from Iowa, it is before us, it is in the Subcommittee on Public Buildings of the Committee on Public Works.

Mr. GROSS. The gentleman from Alabama (Mr. JONES) would say he stands corrected, would he not?

Mr. JONES of Alabama. It is not in this bill.

Mr. GROSS. It is not in this bill, but it is before the Committee on Public Works.

Mr. JONES of Alabama. I am sure that the gentleman from Iowa (Mr. GROSS) realizes that in the Committee on Public Works we have numerous requests.

Mr. GROSS. I would hope that the answer I seem to get from the gentleman, when he says that not all such requests are rewarded, is that the so-called convention center in Washington, D.C., will be accorded a fast rejection.

Mr. JONES of Alabama. I cannot make any prediction about that, but I am quite sure that in whatever form the measure comes before the House, it will be in a proper form where the gentleman from Iowa can fully discuss it.

Mr. BLATNIK. Mr. Chairman, that concludes my statement.

Mr. HAMMERSCHMIDT. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I rise in support of H.R. 16071 as reported by the Committee on Public Works. Efforts to improve the Public Works and Economic Development Act were begun with this session of Congress and the committee has worked diligently, and generally in bipartsan fashion, in determining the need for improvements to this legislation. In 15 days of hearings, 125 witnesses testified in support of this program and urged its improvement and increased funding.

We have before us the product of over 7 months effort aimed at strengthening this program's attack on those areas in our Nation which do not enjoy the same degree of prosperity being experienced by other areas in our Nation. This legislation attacks joblessness and low income with a long-range planned approach and at the same time provides immediate useful work through its public works impact program.

PUBLIC WORKS IMPACT PROGRAM

I would like to speak, Mr. Chairman, to a few of the features this bill would provide. I have just referred to the public works impact programs being administered under the act. This program was added in the 1971 amendments to provide immediate useful work to unemployed and underemployed in areas of threatened or high unemployment, a concentration of low income, or substantial outmigration. The committee intended that combined grants and supplementary grants up to 100 percent of the cost of a project be expeditiously made available to such areas.

EDA accepted the challenge that this program demanded so that by spring of this year all of the fiscal year 1972 funds appropriated for this purpose, as well as the supplemental funds appropriated, had been totally obligated. From the 203 approved projects under this program, an estimate of almost 11,000 jobs resulted, 76 percent of which were filled by the unemployed or underemployed in the area.

I submitted for the RECORD a list of these projects and the job estimates by State. This list can be found in the CONGRESSIONAL RECORD for August 15, 1972, on pages 28305 through 28309.

In H.R. 16071, the committee expanded the public works impact program by providing a separate section for its criteria, administration and authorization.

ECONOMIC DEVELOPMENT DISTRICTS

Some of the most enthusiastic testimony before our committee dealt with the success stories of the economic development districts. Each of these multicounty grassroots organizations have usually managed to pull together within the framework of a locally organized board of directors, a cross section of government, business, labor, industry, and other diverse interests to devote themselves to joint planning and programing aimed at developing the economic potential of an area. The committee was advised that in some instances adjoining county officials had not been cooperative or conversant—with one another—on matters that vitally affected each area's interest in economic growth until they became board members for an economic development district.

Since the enactment of this legislation in 1965, the number of these districts has grown to the point that today over 100 are designated and funded with the very real prospect of this figure being doubled. In fiscal year 1972, $5½ million was funded for administrative and planning for these districts and the need is ever growing. That amount represents a very small investment indeed when compared to the economy of proper planning and the knowledge of what programs are available to increase economic viability and from whom, which service is performed by the district staff for each community within its boundary.

The multicounty district concept has received the approval of and is being utilized by the Departments of Housing and Urban Development and Health, Education, and Welfare, as well as for programs under LEAA and OEO. Many such districts have been designated by the State in which they are located to carry out the A–95 review process.

In fact, so widely accepted is this principle of local representation that over 40 States have subdivided into sub-State regions or districts. In addition, almost 100 districts are waiting to be designated and funded as economic development districts and would be so designated now were sufficient funding available.

For these reasons, H.R. 16071 would provide for the first time a separate annual authorization of $20 million for district planning and administrative expenses. Under current law, such district costs are allocated from funding for all technical assistance and research under the act and the growing success of the districts has placed an increasing burden on that appropriation.

In addition, the bill would reduce the current requirement from two or more redevelopment areas for the creation of a district to one redevelopment area. This would permit greater flexibility in putting together the best combination of counties in a district. In some cases it would permit the desirable effect of having economic development district boundaries coterminous with sub-State regional boundaries. It would further permit expansion of the district program and would bring districts to isolated single redevelopment areas.

When redevelopment areas, designated as such usually because of high unemployment or low income, make sufficient economic recovery to be dedesignated, the success of the program is demonstrated. However. an adverse side effect may easily take place. A district which is struggling to get organized may find one of its required redevelopment areas suddenly dedesignated which results in the termination of the district before it has had an opportunity to become functional enough to support itself.

To provide for this eventuality, H.R. 16071 would permit a designated district to be eligible for a minimum of 5 years, the duration of a realistic planning cycle, for grants for administrative and planning expenses up to 75 and 100 percent, respectively, the same rate as provided under current law.

EDA grant and loan assistance may, under current law, be made only to projects in redevelopment areas or designated economic growth centers within a district. Frequently, however, projects which would be of significant benefit in alleviating the problems of these needy areas cannot be undertaken because they would be located outside the redevelopment area. H.R. 16071 would ease such rigid geographical limitation by providing that grant and loan assistance may be provided to those parts of an economic development district when such assistance would be of significant direct benefit to a redevelopment area within that district.

TITLE V REGIONS

H.R. 16071 would expand the funding for the Regional Action Planning Commissions—the so-called title V regions—to authorize $100 million annually for fiscal years 1973 and 1974 for each regional commission with an approved plan and $20 million for each regional commission without an approved plan. Five of these regional commissions were designated in 1966—Ozarks, New England, Upper Great Lakes, Four Corners, and Coastal Plains—and two were designated this year—Old West and Pacific Northwest. Four of the original five regions have their comprehensive long-range economic plans approved, and are eligible for the annual $100 million authorization for fiscal years 1973 and 1974. The other three regions would be eligible for $20 million annually for fiscal years 1973 and 1974. Upon approval of the plans of these three regions they would be eligible for the $100 million authorization.

The difference in the authorization for regions lies in the fact that when much time is invested in preparing and having approved a region's blueprint to upgrade its lagging economic areas, it is then ready to carry out this plan with the help of adequate funding. The $100 million authorization appears to be realistic enough when compared with the appropriation for the Appalachian region which has, for the last three fiscal years, exceeded $100 million annually, exclusive of highway appropriations. Highway appropriations alone have averaged for the Appalachian region over the past 3 fiscal years $175 million annually. Title V regions, however, have averaged over the same period an appropriation of less than $34 million annually and that amount to be divided among all five regions.

Testimony during the committee hearings revealed that the regional commissions desired to fund some portion of administrative expenses of the economic development districts within their boundaries in order to better coordinate their planning activities with those of the regions. It was further revealed that interpretation of the existing law precluded such regional assistance to districts. To overcome this objection, H.R. 16071 would clearly authorize regional commissions to pay administrative expenses to further the purposes of this act.

Mr. Chairman, I highly commend the distinguished acting chairman of our subcommittee hearings, the gentleman from South Carolina (Mr. DORN) as well as our acting chairman today, the gentleman from California (Mr. JOHNSON) and, of course, our chairman of the full committee, the gentleman from Minnesota (Mr. BLATNIK).

Mr. Chairman, I warn the Members of this House there is a section—Section 801—that has not yet been discussed that speaks to unemployment compensation benefits to people who have been adversely affected by Federal rulings on environmental matters as they pertain to loss of jobs through plant closings. I am sure that will be expounded on by other members of the committee, but I want to warn the Members that this is a sleeper. It should not be in this bill for many reasons. For now I will only state that I know of no hearings that were held on that section.

Mr. HARSHA. Mr. Chairman, will the gentleman yield?

Mr. HAMMERSCHMIDT. I yield to the ranking minority member of the committee, the distinguished gentleman from Ohio (Mr. Harsha).

Mr. HARSHA. I thank the distinguished gentleman for yielding.

I want to congratulate the distinguished gentleman from Arkansas, the ranking minority member of the subcommittee and the other members of the minority, the gentleman from New Hampshire (Mr. Cleveland), and the gentleman from North Carolina (Mr. Mizell) who participated in the handling of this bill. I think they have done a really effective job. They labored for many tedious hours in marking up the bill and they have brought forth a bill which I think represents the consensus of the members of the Public Works Committee.

To be sure there are provisions in this bill which do not particularly appeal to me as part of this legislation. There are amendments which other members of the committee wanted to incorporate into the bill but which were not. Therefore, there are parts of the bill that do not appeal to them. But I think the legislation by and large is an effort to resolve a problem through a compromise in the best interests of a program that has been highly successful throughout a number of years, particularly in the last several years since it has been administered by Assistant Secretary Podesta.

For several years now the administration has been assisting areas which are in economic decline throughout this country. They have attempted to aid these areas through assistance to develop their capabilities and capital structures in order that these communities can have better facilities, and their people better standards of living so that they can enjoy some of the good life enjoyed by other communities in the Nation.

Past experience has shown that through the investment by the Federal Government in these programs, many communities which would not otherwise have been able to do so, have become able to construct the necessary water and sewer lines, industrial parks and training centers, hospitals and the like, which will enable them to participate to some small degree in the economic progress made by the rest of the country over the last several years.

I think this has been one of our most successful Federal programs. It has been administered very successfully by Assistant Secretary Podesta and his staff. This is the sort of program I would term as a partnership between local governmental officials and the Federal Government because the initiation of any project must begin at the local level with local officials who know their problems and understand them better and who are better able to evaluate what they need to upgrade the economy in their particular areas. Upon initiation at the local level, the Federal Government is ready to consider the needs of the community. This has been truly a Federal-local partnership.

Not only will construction of basic facilities in itself create jobs, but also it will attract new industry and expansion of existing industry, which will create additional jobs, all of which enables the citizens in these economically depressed areas to maintain a better standard of living, and to participate in growth and progress in the same fashion as have other parts of this Nation over the last several years.

One of the main problems we have noted in this program, in spite of the success the program has enjoyed, has been the fact that it has been underfunded. Sufficient money has not been available to meet the authorizations which Congress has made available.

I am not critical of that. I understand we have a number of priorities and a number of programs with which we have to deal.

In this legislation, as I understand it, what we endeavor to do is not to create new programs but to implement existing successful programs and to make some changes which we feel are called for under the circumstances, and which we have learned through experience are beneficial to the expeditious administration of this act.

In addition to that, we have provided for additional funds in order to more fully and more adequately fund a program that has been so successful.

As I said earlier, while I know there are provisions in this legislation that in their entirety do not meet the approval of everyone, this is a consensus measure which I believe does warrant the support of the House, and I would urge the House to adopt this legislation.

I thank the gentleman for yielding.

Mr. HAMMERSCHMIDT. I thank the gentleman for his contribution. I especially thank him for his outstanding leadership as the ranking minority member of the Committee on Public Works. I agree with his remarks. Economic Development Administration activities stemming from legislation developed in our committee are doing a good job across our Nation.

Mr. Chairman, one of the members of the committee on the majority side, the distinguished gentleman from New Jersey (Mr. Howard) I believe plans to further amplify some of the statistics as to the salutary effects this program has had and the low cost per job placement the Economic Development Administration has been able to put into effect. I hope he will bring that up later in the general debate.

Mr. TEAGUE of California. Mr. Chairman, will the gentleman yield?

Mr. HAMMERSCHMIDT. I yield to the gentleman from California (Mr. Teague).

Mr. TEAGUE of California. Mr. Chairman, I rise today in support of H.R. 16071, a bill which will amend the Public Works and Economic Development Act of 1965 and authorize the spending of $500 million for each of the next 2 years.

I would like to first commend Chairman Blatnik and the Public Works Committee for their fine work on this needed legislation.

We are all aware that serious pockets of unemployment exist within our country. We are also very well aware that there are a great many needed public works projects. Often we have found that the same cities and communities which are the "special impact areas" of very high unemployment are also those in most need of constructing or rehabilitating public facilities such as sewage treatment plants, storm drains and public buildings.

In my own district in southern California I am very cognizant of this situation. For example, in Ventura County the City of San Buenaventura, which has a disturbing amount of unemployment, has an admirable plan to renovate a historic and beautiful courthouse which has been condemned as unsafe. Not only could this courthouse serve as a fine city hall for the people of Ventura, but the process of renovating the building would employ many citizens and enhance the local employment situation.

I know that there are many similar situations to this throughout the United States. And I believe that this legislation, by providing $500 million through 80 percent Federal construction grants to high unemployment areas, will greatly assist the people of the cities and communities throughout the Nation.

I urge my fellow Congressmen to approve this measure.

Mr. CLEVELAND. Mr. Chairman, will the gentleman yield?

Mr. HAMMERSCHMIDT. I yield to the gentleman from New Hampshire (Mr. Cleveland).

Mr. CLEVELAND. Mr. Chairman, I rise in support of H.R. 16071 as reported by the Committee on Public Works. I have closely followed this legislation since its inception.

As ranking minority member of the Economic Development Subcommittee from its creation until the present Congress when similar duties with the Subcommittee on Investigations and Oversight were assigned to me—economic development has been one of my chief interests. This has lead to participation in hearings held on this legislation both in Washington and in the field. I have seen firsthand where badly needed jobs were created but also watched a "one-industry town" lose its major employer down the pollution drain while the agency stood helplessly by.

I introduced in April of this year, to correct this latter problem, H.R. 14670, which provides long-term, low-interest loans to enterprises when an environmental standard or order against such enterprises would otherwise create job loss. The major portion of this bill is included in the legislation before us.

Let me discuss now three aspects of this bill of special interest to me.

ONE: PUBLIC WORKS IMPACT PROGRAM

When the Public Works and Economic Development Act was amended last year a new program to provide immediate useful work to the unemployed and underemployed was added. This program, later referred to as the public works impact program—PWIP—was a departure from the long-range planned attack on high unemployment and low income. The funding of basic public works projects to make a community attractive to industry and business loans at an attractive rate of interest are well known for their success in creating jobs and in increasing income. Such economic development can be most effective when carried out in connection with a locally agreed upon long-range plan.

But something else was needed. In the transition period of deescalating military effort an dthe resulting changing economy, there is a need for immediately available jobs. As one answer to this problem the PWIP program was devised. For the first time EDA was in the business of providing jobs quickly where they were most needed. This was accomplished by funding those needed, ready-to-go public works projects in any area, without regard to political boundaries and with no requirement for long-range planning.

The results of the first year's administration were very encouraging—203 projects in 198 areas generating an estimate of nearly 11,000 jobs, over 8,000 of which were filled by the unemployed or underemployed in the problem areas.

The committee in H.R. 16071 created a new section 107 for PWIP setting forth its criteria, its administrative guidelines and its authorization of $500 million annually for fiscal years 1973 and 1974.

TWO: APPLICATION ASSISTANCE

In my district, as in many of those in the Nation, a large community may be regarded as one which has a population of 10,000. Many of the communities in my district have little or no staff. They are unaccustomed to the expertise enjoyed by their urban cousins whose city hall staffs include planners, accountants, attorneys, engineers and other such experts wise in the ways of applying for and obtaining Federal assistance. Rarely do the budgets of these smaller communities permit the hiring of such experts even when needed to assist in making applications. Usually by the time the smaller communities find out that some Federal program exists and how they can apply for such assistance, there is very little left to apply for.

To eliminate this injustice, I proposed and the committee accepted an amendment, now in section 5 of the bill, which provides that EDA may aid an applicant in applying for its assistance if the applicant does not possess the expertise nor the ability to obtain the expertise necessary to perform the technical aspects of application.

THREE: ENVIRONMENTAL LOANS

Section 802 appears in this bill as the result of testimony the Special Subcommittee on Economic Development Programs heard during its hearings on this legislation. This testimony revealed that environmental legislation and regulations have threatened the closing down of businesses with a loss of jobs. Now I am not here to question the wisdom of environmental standards but to accept the fact that they exist and may result in future closings. However, there is no reason why we cannot protect the environment and at the same time preserve jobs. If section 802 works as it should—the provisions of 801 may never have to be used.

Section 802 seeks to preserve both the environment and jobs. In so doing, it would benefit, of course, the industrial plants and commercial establishments that avail themselves of its benefits. More important perhaps it would benefit those who would find themselves jobless if an environmental order caused a shutdown. It would benefit those who live in communities that rely for their livelihood on the economic base provided by one or more of these enterprises. It would benefit all political entities by maintaining the tax base which might otherwise be lost. Finally, it would benefit the United States and its people by helping to eliminate adverse effects upon the environment.

It would do this by long-term, low-interest loans to those business enterprises who need them and have been certified as needing them by the State or a political subdivision concerned with economic development. These loans must be used to provide for acquiring, constructing, or altering pollution control facilities. A pollution control facility must in its turn be a facility, or equipment used, or a modification of methods, processes, or operations where the primary purpose is to abate or control water or atmospheric pollution or contamination. It may do this by removing, altering, recycling or restoring pollutants.

The Administrator of the Environmental Protection Agency must certify to the Secretary of Commerce that the pollution control facility is in accordance with applicable regulations of the Environmental Protection Agency and all other Federal agencies. Before the Administrator can do that, he must receive certification from the State that the facility is in accordance with State requirements.

An authorization for $100 million for each of fiscal years 1973 and 1974 is provided. It appears that this would be a small amount to make available for loans that must be repaid for the purpose of saving jobs and keeping our manufacturing potential strong.

Mr. JOHNSON of California. Mr. Chairman, I yield such time as he may consume to the gentleman from Alabama (Mr. JONES).

Mr. JONES of Alabama. Mr. Chairman, the committee in its deliberations on this bill took into account the historical experiences we had with the Accelerated Public Works Act which started in the early part of the 1960's. We gained considerable knowledge and information from observation of administrative practices which were engaged in during that period of time.

We also took into consideration the acts that preceded this, and it is because of that we bring this legislation here today for your consideration.

Mr. Chairman, I think that members of the Committee on Public Works have had a considerable length of time to consider this matter so that they can be mature in their judgments, not upon a new subject, but upon an old subject dealing with a chronic situation which exists in this country, namely, trying to deal with unemployment and underemployment.

In writing the bill we ran across probably the most difficult section of the bill contained in the committee report on page 25 in trying to define those pockets or areas which were geographically subject to underemployment or unemployment.

So we have written a formula here which I think is as close as we could possibly conceive of to utilizing this aid program so that it will meet the total requirements of the distressed areas of our country. It has universal application throughout the country.

As the gentleman from Arkansas (Mr. HAMMERSCHMIDT) just stated, in title V we deal with the various commissions that were created by law a number of years ago. Consequently we feel under the terms and the arrangements and categories that we have set up here under this act we come as close to a total application of our efforts as we could possibly arrive at.

Mr. Chairman, I commend the members of the Committee on Public Works who have worked diligently and patiently in understanding the problems that were required to be surmounted and in putting them into their proper perspective.

I hope all of these differences can be resolved and we can go out into every community in the country with this program. I do hope the House will give us in the Committee on Public Works their approbation and approval through the adoption of this legislation.

Mr. DANIELS of New Jersey. Will the gentleman yield?

Mr. JONES of Alabama. I am happy to yield to the gentleman from New Jersey.

Mr. DANIELS of New Jersey. Mr. Chairman, in order to develop the legislative history on section 4 which is dealt with on page 25 of the committee report, where you have an area of substantial and persistent unemployment which has existed for a considerably long period of time, is any population criterion required of a subdivision of a State, such as a country or a city, to qualify for assistance?

Mr. JONES of Alabama. No. You will recall, I say to my friend from New Jersey, when we had the Farbstein amendment up a few years ago we took care of that question, so that question does not arise in this bill.

Mr. DANIELS of New Jersey. So where a municipality has had persistent and substantial unemployment in excess of 6 percent and which has existed for a period of maybe 2 or 3 years and it is further injured by plant closings which will result in further substantial unemployment, then it could qualify for assistance under the EDA?

Mr. JONES of Alabama. Not only a county, but a subdivision of a community within a county could qualify.

Mr. DANIELS of New Jersey. I thank

the gentleman, and I appreciate his response.

Mr. KLUCZYNSKI. Mr. Chairman, will the gentleman yield?

Mr. JONES of Alabama. I yield to the gentleman from Illinois.

Mr. KLUCZYNSKI. I thank the distinguished gentleman from Alabama for yielding. I wholeheartedly support the pending legislation, H.R. 16071, and urge its passage.

During the past year the Special Subcommittee on Economic Development Programs of the Committee on Public Works has conducted an extensive evaluation of the Public Works and Economic Development Act. The legislation is now in its seventh year of operation.

The results of these evaluations have demonstrated without question that the programs authorized under this legislation have been effective in generating permanent jobs in economically distressed areas. Both the urban and rural areas of the State of Illinois have received substantial help in the establishment of stable and diversified local economies. The amendments which are found in Public Works and Economic Development Act Amendments of 1972 provide new tools, increased appropriations and new coordinating mechanisms to help make a very successful program even more effective.

Mr. MOLLOHAN. Mr. Chairman, will the gentleman yield?

Mr. JONES of Alabama. I yield to the gentleman from West Virginia.

Mr. MOLLOHAN. Mr. Chairman, in 1961 when John F. Kennedy became President of the United States, the State of West Virginia was suffering from its most severe and most prolonged economic recession since the depression of the 1930's. The January 1961 unemployment rate had reached a bruising high of 16.7 percent, and more than 105,000 men and women were looking for jobs in West Virginia which did not exist.

The Kennedy-Johnson administration moved rapidly to establish new programs and enact new laws to begin pumping economic development and public works funds into West Virginia and into other economically depressed areas across the country.

And so in quick succession, the new administration proposed and the Congress adopted the Public Works Acceleration Act, the Area Redevelopment Act and the Appalachian Regional Development Act, and later the Public Works and Economic Development Act. The purpose of these acts was clear and direct—to create jobs as fast as possible in a period of extremely high unemployment; and to stimulate overall economic development through the construction of needed public works such as roads, water works, libraries, airports, public streets, community centers, and so forth.

That is why we are here today debating this absolutely vital extension and expansion of the Public Works and Economic Development Act—with special emphasis on $500 million in fiscal year 1973 and $500 million in fiscal year 1974 for special public works programs under the accelerated public works programs.

We have faced for almost 4 years the same rising unemployment rates and slippage of the American economy which we saw in the late 1950's. Today's national unemployment of 5.5 million people is not something we can look at and say—as some cold observers have said—this level of joblessness is "acceptable." It may be "acceptable" to some, but it is clearly not acceptable to the bipartisan Public Works Committee of Democrats and Republicans which unanimously supports $1 billion in the next 2 years for the accelerated public works section of this bill.

In my State of West Virginia, this past January, the unemployment rate again hit another high of 9.1 percent. As late as June, there were still 45,500 people out of work.

In the First Congressional District which I am privileged to represent, the U.S. Department of Labor still continues to designate the labor areas of Wood, Marshall, Ohio, Tyler and Wetzel Counties—containing some of the largest urban centers in the district, including Wheeling—as areas of substantial or high unemployment.

This means, as we all know, that the labor area so designated has had a 6-percent unemployment rate for at least the preceding calendar year. But in many labor areas—rural and urban—in West Virginia, the unemployment rate for 1971 was double the 6-percent rate.

We cannot ignore the hardships such joblessness works on the lives, hopes and futures of thousands of West Virginia families and millions of families across the country.

These are the areas that need jobs. These are the areas that need quick public economic investment. These are the labor areas along with some 30 others in West Virginia which will again be eligible for Federal grants under one of the several titles of the act we are extending and expanding today.

We are asking for $500 million this year, and $500 million for the next fiscal year. This is not too much public money for a disaster—and that is what unemployment is to millions of American families—a personal and human disaster. After all, this House yesterday just voted almost $1.6 billion for victims of flood disaster. It should show no less sympathy for those dislocated or driven out of work by the misguided economic policies of the past 4 years.

So, I rise in support of this bill. It is an initiative of the Congress which created the Economic Development and Public Works Act of 1965 and has now had 7 years to evaluate its results. The report accompanying this bill said, in part:

> The programs authorized under this legislation have been effective in generating permanent jobs in economically distressed areas and have contributed substantially to the establishment of stable and diversified local economies. The continuation of this tested legislation is essential in order to assist lagging areas so that they may be brought into the main stream of our Nation's economic growth.

I hope that this measure will move swiftly through both Houses, with bipartisan support to the President for fast enactment into law. An economy which stands still, is going backwards, and we must all join together to get this country's prosperity moving again.

Mr. VAN DEERLIN. Mr. Chairman, will the gentleman yield?

Mr. JONES of Alabama. I yield to the gentleman from California.

Mr. VAN DEERLIN. Mr. Chairman, H.R. 16071 merits the overwhelming approval of this body. The bill is the product of a carefully wrought compromise involving senior members from both political parties on the Public Works Committee. As such, it should be veto-proof, as well as popular on both sides of the aisle both here and in the other body. But these days, you cannot take very much for granted from the White House, and accordingly I await with some trepidation the Presidential decision on this legislation.

Our colleagues, Messrs. BLATNIK and JOHNSON, deserve particular praise for the manner in which they have honed the conventional public works and special "impact" sections of the bill.

In particular, I am pleased to be one of the cosponsors, with Mr. McFALL, of the provisions which, as recommended by the Public Works Committee, would authorize $500 million over each of the next 2 years for the accelerated public works program.

As I understand it, eligibility for the special impact assistance would be based on unemployment within political subdivisions ranging downward in size to individual neighborhoods. This in itself is a vast improvement over the old APW effort, which determined eligibility on the basis of countywide unemployment rates. Under these criteria, an impoverished community in a heavily populated county such as Los Angeles, could not qualify because countywide, the jobs picture was fairly bright.

The McFall-Blatnik approach would provide the aid, for construction of useful public projects, where it was truly needed.

I urge Mr. Nixon to accept this bill, when it is sent to him, as I am sure it will be in the near future, for his signature.

The entire Nation stands to benefit from enactment of H.R. 16071.

Mr. VAN DEERLIN asked and was given permission to revise and extend his remarks.)

Mr. McCORMACK. Mr. Chairman, will the gentleman yield?

Mr. JONES of Alabama. I yield to the gentleman from Washington.

Mr. McCORMACK. Mr. Chairman, I should like to join in support of H.R. 16071.

Mr. Chairman, I am delighted that H.R. 16071 has moved so promptly through the Public Works Committee, and the Rules Committee, and is before us for consideration today. I am pleased also with the bipartisan support for this legislation within the Public Works Committee. Almost every member of the committee has joined in sponsoring this legislation. To me, this speaks eloquently of its importance and of the conviction on the part of the members of the committee that this legislation should be enacted into law without delay.

Last year, this Congress enacted similar legislation authorizing $2 billion over a period of 2 years for the purpose of accelerated public works programs which had already been approved for Federal support through one of the existing Federal agencies. Unfortunately, this legislation was vetoed by the President. I regretted this veto, particularly because this legislation would have meant so much to the State of Washington and to the Fourth Congressional District where unemployment is so very high.

It is common knowledge, Mr. Chairman, that Washington State has the highest unemployment of any of the 48 contiguous States. However, it is not generally understood that this unemployment is general throughout the State—that it is not strictly a phenomenon caused by cutbacks at the Boeing Aircraft plant. Unemployment is generally as high in eastern Washington, 200 miles away from Seattle, as it is in Seattle. Many of these unemployed are skilled craftsmen who are actively seeking employment. The public works projects which are available and ready for funding in the small and medium-sized communities of eastern Washington will easily consume all the funds that can be made available under this program, and as rapidly as they can be made available.

Mr. Chairman, while the accelerated public works bill was being considered by the House last year, I conducted conferences in my home district with mayors, county commissioners, city managers, and other public officials from throughout eastern Washington. They brought with them lists of projects ready to be funded. Storm drainage systems, sewer systems, hospitals, bridges, sidewalk improvements, public buildings, community centers, water purification plants, water supply systems were all included in the list.

All the ingredients for a successful program are available except for this authorization and subsequent funding. There can be no healthier program, administered as it will be through existing agencies such as EDA and the local political subdivisions of each State. No additional bureaucracy will be created. The programs can commence immediately and with maximum efficiency. Men and women who have sought employment will find it in constructive work. Welfare and unemployment compensation roles will be reduced. A sagging economy will be boosted. Free men and women will walk with a greater degree of pride.

Mr. Chairman, I am certain that the situation I am describing for my district in eastern Washington can be repeated in hundreds of others across the country.

An accelerated public works program is no panacea. It will not solve our long-range problems. It authorizes only $500 million each year for 2 years for accelerated public works programs. However, it is a major and healthy step forward, and it will help many Americans solve many of their economic problems in the least possible time and the most constructive way. I urge my colleagues to support this bill so overwhelmingly that it will be promptly passed by the other body, and signed into law by the President.

Mr. HAMMERSCHMIDT. Mr. Chairman, I yield such time as he may consume to the gentleman from California (Mr. Don H. Clausen).

Mr. DON H. CLAUSEN. Mr. Chairman, I rise in strong support of this legislation.

Mr. Chairman, at this time I would like to explain in more detail my views on the economic growth center concept that is included in the legislation before us today.

This provision marks another step forward in an effort to initiate a comprehensive and positive program of decentralization of our population in order to revitalize and diversify the economy of rural America.

It should be perfectly obvious to any perceptive observer of American society that the most significant trend on our domestic scene in the years since World War II, has been the abandonment of rural America. Paradoxically, this abandonment has been the source of two of the major problems our Nation faces today—the weakness of the rural economy and the deterioration of our urban centers.

Unfortunately, most planners have failed to grasp the cause for these related problems and their past attempted solutions have not only failed from a lack of appreciation of the source of the problem, but have fueled the growth and continuation of the problem by adding incentives for many people to continue to migrate to the cities.

It is for this reason that I have been working to check and reverse this trend. The amendment I offered to the 1970 Federal-aid Highway Act was a major effort in this direction since it constituted congressional recognition of the problem, and at the same time, expressed a commitment to help rural and urban areas through rural growth opportunities to reduce and reverse the migratory trend to the big cities.

This amendment established a program of "economic growth center development highways" to inventory and assist in the development of those roads which would assist in bringing economic rejuvenation to rural America. Quite frankly, I would like to see this program adopted for all other modes of transportation as well—both public and private.

The Economic Development Administration's goal is simply to provide jobs by aiding the construction of worthwhile projects that are needed but for one reason or another could not otherwise be undertaken.

While the initial jobs in the construction of an EDA project are important, it is the new job opportunities that are created by the project that are most valuable and vital. For this reason, I strongly believe the main thrust of EDA's efforts should be to help revitalize rural areas and smaller communities which have the potential for growth and which need economic diversification.

With this background in mind, Mr. Chairman, it is important to recognize that the Public Works and Economic Development Act of 1972 contains a version of the Clausen amendment and will give EDA needed flexibility and emphasis in joining the effort to advance a program of planned, orderly growth in rural America.

Mr. HAMMERSCHMIDT. Mr. Chairman, I yield such time as he may consume to the gentleman from North Carolina (Mr. Mizell), a member of the subcommittee.

Mr. MIZELL. Mr. Chairman, and members of the committee, several of my colleagues have already outlined the specifics of these economic development and public works amendments, which extend the Economic Development Administration and the title V commissions for an additional year and make a number of improvements in these development efforts.

I would like to take just a moment, Mr. Speaker, to commend my colleagues on the Public Works Commission for the excellent work they have done in preparing this legislation.

It has been my privilege to serve on this committee during this 92d Congress, and I have come to appreciate and admire the great talent of my committee colleagues in the field of economic development.

Scores of development projects, planned and funded through EDA and the title V commissions, as well as the Appalachian Regional Commission, provide lasting testimony to the vision and the wisdom of the Public Works Committee which has fashioned some of the most innovative and effective Government programs and structures ever devised.

The popularity of these programs within the Congress, and among the people these programs were created to serve, gives further evidence that the job of economic development has been a job well done under the leadership of the Public Works Committee.

But the amendments also make several worthwhile improvements in these programs, including new flexibility in the basic and supplementary grant programs of the Economic Development Administration.

Also provided is an expansion of loan and lease guarantee programs for business development, an improved technical assistance service to promote even more successful development, and a much-improved system of coordination between Federal agencies and local officials working in partnership toward responsible economic development.

In addition, these amendments authorize appropriations for those title V commissions which have completed their extensive planning assignments to go forward with implementation of the projects proposed in their plans. This is a giant step forward for these commissions, and I am sure their expanded work will greatly benefit these affected regions.

And there are other improvements as well, which are being discussed in greater detail by others here today.
